The inservice materials described in this monograph are designed for regular classroom teachers who are working with mainstreamed children in elementary and secondary school classrooms. The first section contains abstracts of six series of inservice materials: (1) "I'm a Lot Like You"; (2) "Educating Students in the Least Restrictive Environment"; (3) "Computer Aided Instruction for Teacher Education"; (4) "Tips for Teachers: Teacher-Made Reading Materials for Handicapped Children"; (5) "Teaching Children with Special Needs"; and (6) "The Heart of Teaching." Abstracts of modules contained with each series note recommended length of time and type of instruction, target audience, types of student content areas, and description of instructional materials and approach. Similar information is given on individual (non-series) materials on: (1) adapting instruction for mainstreamed students; (2) behavior management strategies; (3) testing; (4) learning-disabled high school students; (5) expanding work options for exceptional students; (6) hearing impaired elementary school students; (7) managing troubled students; (8) building positive attitudes in handicapped students and their classmates; (9) methods and materials for working directly with children with special needs; (10) developing a school-based workshop program; (11) creating an awareness of test bias; (12) behavior management; and (13) activities for improving communication skills. Information is provided on source and availability for each of the programs. (JD)

Acknowledgements

On behalf of the National Advisory Board of The National Inservice Network, I would like to extend our thanks to Patricia P. Kells, and Larry Stolurow, co-chairpersons of the Qualitative Assessment of Regular Education Inservice Materials task force, both of whom gave much of their personal time in organizing and developing this document. Their excellent management and editorial skills made this publication a true credit to inservice materials.

We especially thank Larry Stolurow and his staff, Gail Bahl, Melody Strom, Monica Wiegand, Janice Sywassink, Edyth Paul, Richard Ballandby, Colleen Ahmad and Chuck Gerson, at the University of Iowa for their gracious hospitality, and never ending assistance, no matter what the task, during our three visits to Iowa.

In addition, I would like to thank Dick Cortright of the National Education Association, Carolyn Trice of the American Federation of Teachers, Mary Coscarelli of the American Association of Health, Physical Education, Recreation, and Dance, Ann Carson of the Association of Childhood Education, International, and Ruth Long of the Association for Supervision and Curriculum Development for providing us with names from their memberships to comprise the panels.

The members of the panels themselves deserve a special recognition for reviewing all of the materials and joining us in Iowa for paneling their reviews.
Finally, we again thank Patricia Kells for her excellent management and editorial skills. We sincerely hope the professional associations as well as any interested party in inservice education will use this document. We of the National Inservice Network give it our hearty endorsement,

Leonard C. Burrello  
Project Director  
National Inservice Network
Background

The Division of Personnel Preparation of the federal Office of Special Education has made regular education inservice (REGI) a priority area for funding over the past few years. As a broader spectrum of educators and related professionals become involved in the education of handicapped children, they are beginning to turn to their own professional associations to provide opportunities and resources to develop the skills necessary in these new roles.

In order to facilitate the dissemination of inservices practices beyond the Network, NIN has launched an initiative to link the professional associations in the REGI effort.

Interviews with over twenty professional education associations were held in December of 1981 in an effort to determine current needs in inservice education.

The National Advisory Board to the National Inservice Network responded to one of those need areas identified by the associations by organizing a task force to qualitatively assess the past and present REGI materials.

The efforts of the Task Force on Qualitative Assessment of Regular Education Inservice Materials, follow.

Although printing had to be delayed to allow time to insure the accuracy of source information and to acquire permission to reproduce some materials, we are delighted to share this work with you now and hope you will find it most useful as you continue your work in inservice education.

Qualitative Assessment of Regular Education Materials
Introduction

The criteria for inclusion of inservice materials to be qualitatively analyzed were:

1) designed for target audience of regular education instructional personnel
2) not solely a piece of reference material
3) not commercially published for profit

The first criteria was necessary to meet the needs identified by the national associations who participated in the December 1981 survey described in the introduction of this report. The elimination of reference materials which were not a part of a larger inservice "package" was made to avoid the qualitative analysis of print, audio, or video materials which were primarily prepared for use by an audience of one person or were journal articles, texts or films best used as outside readings, or supplemental materials for a directed course of study.

The exclusion criteria of commercially published materials was made to reduce the number of materials analyzed to a more manageable level and was based on the assumption that the information regarding published materials would be available from sources other than this effort.

Sample Selection

The pool of materials from which the sample was selected included the holdings of the Center for Educational Experimentation, Development, and Evaluation (CEEDE), under the directorship of Lawrence M. Stolurow at The University of Iowa.
Dr. Stolurow directed the A System of Personnel Development (ASPD) project from 1978-1981 which had as one of its major purposes the identification of inservice materials designed to assist the regular educator better serve the handicapped student. The pool of materials available in Iowa exceeded 500 pieces.

To both update and add to the Iowa holding, all Regular Education Inservice (REGI) projects from 1978-1982 were requested to send any inservice materials which they had developed for consideration in the qualitative analysis. This request yielded over 100 pieces of material.

The procedures employed to select the sample of materials for inclusion in the qualitative analysis involved a personal, cursory review of all materials sent by REGI directors to determine if they met the selection criteria. This same procedure was used on approximately 300 pieces of material in the CEEDE holding which had not been previously categorized. This review was conducted at the CEEDE offices by members of the CEEDE staff, Patricia Kells, Chair of the Qualitative Analysis, and Barbara Erwin, NIN National Coordinator.

The remaining 250 CEEDE holdings had previously been evaluated through an initial staff review and through evaluations completed by users of the modules. Of these, 72 modules met the criteria for inclusion in the qualitative analysis. However, six modules had received consistently low ratings by users and were therefore excluded from further analysis.
The sample of materials determined to meet criteria for inclusion in the qualitative analysis totalled 131 with 66 coming from the CEEDE and 65 from REGI project directors.

Instrumentation

The CEEDE had developed an instrument to qualitatively evaluate training materials which had not been broadly applied to inservice materials. This instrument was slightly modified, critiqued by five inservice specialists, revised and piloted before being used by the panels to obtain the reviews contained in this report.

The four-page instrument used for the Qualitative Assessment of Regular Education Inservice Materials was designed to provide both descriptive and qualitative information about the materials being reviewed. The descriptive information included author(s) of materials, publication date, recommended length of time necessary to use material, focus of training, type of instruction, pilot testing results, target audience of materials - regular education instruction personnel, content area(s), type(s) of students with general content area(s), format, instructional approach, and content approach. The qualitative information reviewed included technical quality; clearly stated goals and objectives; appropriate, sufficient and varied activities; evaluation; appropriate, accurate, non-stereotypic and non-discriminatory content; and an over-all qualitative evaluation ranging from excellent to unsatisfactory.

Review Procedures

The review process employed involved independent review of each piece of material, first by experts in the field and then
a convening of three experts on April 1-3, 1982 to panel the reviews. The materials which received a rating of "fair" or higher by the expert panel were then sent to the eleven members of the consumer panel for independent review. The consumer panel met on April 22-23, 1982. Those materials which received an over-all rating of "good" to "excellent", seven series containing 49 separate materials and fourteen individual pieces of material, have been abstracted and are included in this report.
series of abstracts
The "I'm A Lot Like You" program is designed to help integrate special education students into regular education classes. There are modules in the series which deal with issues on both elementary and secondary levels. The videotapes and accompanying activities give teachers the opportunity to become familiar with current issues in the mainstreaming of handicapped students and give them practical suggestions which they can put to use in their classroom.

Each module consists of a videotape, a student workbook, a facilitator's manual, and where appropriate, response sheets and activities. The workbooks contain a variety of activities to reinforce the concepts presented on the tapes, and they offer extensive optional reading.

3) Activities which correspond to objectives; 4) Evaluation material
for each objective; 5) Provision for adding material

abstract
The videotape and activities accompanying this module provide
the participant with an understanding of the historical trends
leading to current mainstreaming legislation on both a national
and local level. Participants will be presented with informa-
tion on important court cases and the major elements inherent
in the concept of mainstreaming. They will discuss the pros and
cons of mainstreaming issues, laws dealing with "open record"
policies, concept and implications of "due process", and major
provisions of federal and state legislation.

abstract
The material in this module exposes the participant to some of
the dilemmas posed by current philosophical issues. It describes
the historical trends from which individualism has developed
and identifies factors which determine decision making in four
areas: 1) priority of the group versus priority of the individual,
2) teacher accountability, 3) teacher's responsibility to child's
classroom versus total environment, and 4) equal opportunity
versus equal product.

abstract
The feelings, behaviors, and unique experiences of the exceptional child are dealt with in this module. The videotape presents various ways in which a teacher can go about preparing him/herself and his/her class for a mainstreamed student. Common reactions toward handicapped students are presented for discussion and the process of values clarification is described. Participants are introduced to resources available for classroom use in the areas of: 1) understanding individual differences, 2) values clarification, and 3) group interactions.

**Abstract**
Videotape I stresses the concept that math is developmental, and therefore teachers must make sure that students have prerequisites for understanding concepts presented. Piaget's work is cited and demonstrated. Videotape II shows how to accommodate children with special needs into the regular math class by modifying curriculum, strategies, and expectations. Many practical suggestions are demonstrated and discussed.

Abstract:
Philosophical issues frequently arising regarding educating exceptional children in the mainstream are addressed. An open-ended format promotes discussion and personal clarification. Four issues for discussion are: 1) priority of group versus priority of individual, 2) relevancy of curriculum versus standard content, 3) classroom expectations versus broader environmental expectations, and 4) exclusion versus zero-rejection.

The difference between normal adolescent adjustment problems and those that need special education intervention are discussed. The videotape explains the overlapping of adjustment, educational and physical problems at the secondary level and the influence of this overlap when making programming decisions to meet a student's needs. Secondary student's problems are viewed from an ecological perspective in areas of education, and physical adjustment status. The concept of problems is viewed on a continuum.

1) Clearly stated, measurable objectives; 2) Pre and post tests;
3) Activities which correspond to objectives; 4) Evaluation material
   for each objective; 5) Provision for adding material

abstract
A procedure for managing curriculum to promote learning is
described, providing techniques and procedures for adapting and
modifying curriculum to meet special needs of students. Specific
examples of how adaptations and modifications can be applied to
specific content areas are provided. Variables that affect class-
room instruction are identified. Techniques for evaluating student
learning and which meet the special needs of students are discussed.

The life-centered approach to career education for all students is introduced in this module. The concept of adult functional competencies and their relation to all students is discussed. Participants explore how academic curriculum can be modified to prepare students to be competent adults. Minimal competencies necessary for effective adult functioning are identified. Modifying curriculum to incorporate career and pre-vocational aspects of education into all content areas is also discussed.

abstract
The existence and operation of social and affective behaviors
in all classrooms is discussed. The development of self-manage-
ment skills and how these skills vary among individual students
is examined. Participants view some of the characteristics of a
classroom with a positive climate, and techniques for preventing
problems, improving communication, and problem-solving in the
classroom are explored.

The instructional modules in this series were developed by the faculty of the University of Kansas' School of Education to be used in their preservice regular education classes. They were developed with the intent of ending the separation between regular and special education methodology in preparing teachers to serve children in Least Restrictive Environments.

The developers assume that the integration of Least Restrictive Environment content into regular education courses will:

* enhance student appreciation of the fact that teaching mildly handicapped students in regular classrooms is an integral part of the teaching responsibility, not an educational afterthought;
* facilitate student ability to apply techniques previously associated with special education to regular education content;
* enhance student awareness of the critical importance of sound instructional technology in all content areas for mildly handicapped students;
* enhance the potential application of this content to addressing the unique needs, learning styles, and interests of all students.

The "Educating Students in Least Restrictive Environments" series includes the following five components:

Series I: Characteristics and Assessment
Series II: Planning for Instruction
Series III: Instructional Management
Series IV: Communication Skills
Series V: Legal, Philosophical, and Social Issues: Implications for Handicapped Students

The following components have been recommended by the NIN panels: I, II, IV, and V.
EDUCATING STUDENTS IN LEAST RESTRICTIVE ENVIRONMENTS:

3) Activities which correspond to objectives; 4) Evaluation material for each objective; 5) Provision for adding material

abstract
The modules in Series I "Characteristics and Assessment of Exceptional Learners", are intended to supply basic information about exceptional and normal children, how they learn and how their performance may be assessed in the classroom.

The series discusses basic theoretical and applied techniques useful in identifying and assessing normal and exceptional children. Included are theories of learning, development and instruction, observation techniques, informal and formal assessment procedures, and the development of instructional objectives.

Each module in the series includes specific recommendations to the instructor, including a time schedule for teaching module content, independent work required of students, and discussion activities. Recommended readings are also listed.

The following module titles are included in Series I:
1. Characteristics of Normal and Exceptional Learners
2. Classroom Assessment Principles and Procedures
3. Theories of Learning
4. Writing Behavioral Objectives

3) Activities which correspond to objectives; 4) Evaluation material
for each objective; 5) Provision for adding material

abstract

The content and suggested activities for these modules focus on techniques for managing instruction and include activities that help learners develop specific skills that are considered essential for teachers working with exceptional children. The modules include activities designed to help preservice teachers develop skills that are used directly with children; e.g., verbal and nonverbal communication, questioning, motivation, and management through instruction. There are also activities that deal with the development of skills that support instructional programs; e.g., record keeping, reporting student progress.

Series III includes ten instructional modules:
1) Instructional Planning for Learner Participation; 2) Verbal and Nonverbal Communication; 3) Questioning Techniques for the Classroom; 4) Planning Frequent Success Experiences for the Learner; 5) Motivational Techniques; 6) Managing Your Classroom; 7) Formative Evaluation in the Classroom; 8) Maintaining Records of Student Progress; 9) Reporting Student Progress to Parents; 10) Reporting Student Progress to Ancillary Personnel.

The primary objective of the CAITE I series (Computer Aided Instruction for Teacher Education) is to give regular education teachers and other personnel the knowledge and skills necessary to deal effectively with handicapped children in a regular school setting.

The CAITE I materials, consisting of sixteen independent modules, have been designed for use in teacher education, both preservice and inservice. They may also be used by aides, parents, administrators, and other educational support personnel. The modules provide a basic introduction to special education for the regular teacher, giving examples of application at the primary through secondary levels.

Each module in the series contains:
1) a student booklet, which states the module objectives and provides the participant with a factual background on the topic to be studied;
2) a micro-computer based program of instruction which first measures student competency at entry, then leads the student through an interactive program of study, using computer graphics and interactive imbedded questions, and mastery test at the end of each module;
3) a management system, which is available to record the learner's responses, score choices and performance, store data, compare placement and mastery tests, and provide reports to the learner and his/her instructor.

The CAITE series includes the following sixteen module topics:

The following titles have been recommended by the NIN panels.

abstract

The decision process is represented as a series of interrelated tasks designed to help educational personnel make instructional decisions about children in a logical and systematic manner. A flowchart is used to illustrate the sequence of the process. The module illustrates the importance of the continual screening, evaluation, diagnosis, and possible referral of each child in the regular classroom.

abstract

The regular classroom teacher is provided with a general introduction to learning disabilities. The module identifies a set of common characteristics from various definitions of learning disabilities. It gives background on the characteristics, the identification, and the prevalence of L.D. Sample IEP's are shown. Various placement alternatives for learning disabled students are identified. Instructional approaches frequently used with L.D. students and current trends in L.D. education are covered.

All of the modules in the "Tips for Teachers" series have been developed through a systematic procedure involving a team of special educators, instructional developers, media-production specialists, and evaluators. The content for each module was chosen from a list of topics identified through an informal needs analysis conducted among teacher trainers.

Each module in the series consists of an audiotape-filmstrip and a student response booklet. The booklet provides trainees with the opportunity to apply the knowledge and skills gained from the module. The exercises provide trainees with a blueprint for the classroom application of what they learn.

The modules may be used to supplement instruction in methods courses or, in inservice teaching situations, to focus teachers' attention on new and alternative techniques and to stimulate innovative approaches.

The following titles are available in the series:

These modules have been recommended by the NIN panels:

TIPS FOR TEACHERS: Task Analysis

Center for Innovation in Teaching the Handicapped

1974

3 hours

Group or individual

All levels

General student population

1) Filmstrip
2) Audiotape
3) Facilitator's Manual
4) Evaluation material for each objective

1) Clearly stated objectives; 2) Post test;
3) Activities which correspond to objectives;
4) Evaluation material for each objective

The audiotape and filmstrip in this module follow the progress of a new teacher as he learns to perform a task analysis. The accompanying activities are designed to help teachers analyze a selected lesson topic, to break the objectives down into small, easily managed tasks, and finally to arrange the tasks into a logical learning sequence. The advantages of doing a task analysis are discussed.

TITLE: TIPS FOR TEACHERS: Improving Spelling Skills in Handicapped Children

author Center for Innovation in Teaching the Handicapped

publication date 1974

recommended length of time necessary to use material 2 hours

type of instruction Group or individual

target audience All levels

types of student with general content areas General student population

the instructional materials consist of

1) Filmstrip
2) Audiotape
3) Facilitator's Manual
4) Student Workbook

the instructional approach is

1) Clearly stated objectives; 2) Post test
3) Activities which correspond to objectives; 4) Evaluative material

abstract

The exercises in this module are designed to help teachers learn to match major types of written spelling errors with the appropriate remediation techniques. The content of the module is divided into two major areas. The first focuses on classifying spelling errors as phonetic or non-phonetic in origin, then determining which of a variety of causes is responsible for the error. The second area centers on choosing from among a variety of techniques the one most appropriate for a specific spelling problem.

PRICE $30.00 a module
The "Special Needs" elementary program has been developed as an inservice telecourse for primary teachers, providing them with introductory information in the observation, identification, and management of primary pupils with mild to moderate learning problems. The program seeks to:

* Assist regular and special educators in developing observational skills that will enable them to recognize learning patterns that may indicate actual or potential problems for pupils;
* Encourage educators to focus on learning characteristics rather than etiological categories of pupils;
* Offer teachers basic information on a variety of techniques, methods, and procedures that can be utilized in working in the regular classroom with pupils who have learning problems.

Each of the sixteen videotaped telelessons includes an interview with subject-matter experts, and actual classroom scenes illustrating the topic being studied. The follow-up seminars are designed to supplement the information presented in the telelessons.

The sixteen titles in the Special Needs program are:

* Preview
* Teacher Attitude I
* Teacher Attitude II
* Observation of Behavior
* Behavior Problems I
* Behavior Problems II
* Learning Styles
* Oral Receptive Language
* Oral Expressive Language
* Informal Assessment of Reading Problems
* An Analytic Approach to Reading
* A Synthesis Approach to Reading
* Mathematical Problems I
* Mathematical Problems II
* The Referral Process
* Review

| | 3) Teacher Manual |
| the instructional approach is |  
| | 1) Clearly stated, measurable objectives; 2) Pre and Post tests; 3) Activities which correspond to objectives  
| | 4) Evaluation material for each objective |
| abstract | The activities in this module stress the need for the regular classroom teacher to gather information on a child's reading skills in order to give a complete and accurate picture of his/her strengths and weaknesses. A variety of methods for informal assessment of basic reading skills are demonstrated, including the areas of visual perception, auditory perception, orientation, sight vocabulary, word attack skills, oral reading, and comprehension. The videotape contains a dialogue between consultants, and teacher and students demonstrate practical classroom activities for gathering information. |

Four problem behaviors are covered: aggressive, non-participating, excessively active, and covertly resisting children. Discussion centers on how the teacher can more effectively manage the learning environment by identifying specific problem behaviors, recognizing the individuals affected by the behavior, and determining the most effective short-term management technique to be used. Each management technique is discussed and shown in actual classroom situations.

3. Teacher Manual

The instructional approach is:
1. Clearly stated, measurable objectives;
2. Pre and Post tests;
3. Activities which correspond to objectives;
4. Evaluation material for each objective.

Abstract:
Teachers follow the entire process of the language experience approach and discuss its use in teaching reading to the slow learner. Each step of the process is viewed, and the rationale for this approach is systematically developed. Actual classroom situations are shown, demonstrating such techniques as dictated experience stories, word recognition activities, creative writing, individualized reading, and directed reading.

**abstract**

The basic math skills needed by primary students are demonstrated, emphasis on two critical areas of early math instruction: counting, one-to-one correspondence, matching numerals with members of sets, and rational counting. The use of manipulatives, and methods of moving from concrete to abstract understanding of concepts is demonstrated. Numerous methods of assessing learner's competencies in math are given, as well as methods of teaching these competencies to children having difficulties in math.

**Abstract**

Continuing Module 183, Mathematical Problems II illustrates procedures for teaching the basic math facts and demonstrates techniques for assessing student progress. The module offers a wide variety of methods for teaching young math students to relate number sentences to concrete situations, then move on to practice the basic facts. Many games and manipulative devices are demonstrated which can be used to give slow-learning children the practice they need to master the basic math skills.

The "Special Needs" secondary level telecourse has been developed to provide a viable training vehicle to reach and prepare substantial numbers of regular educators to work with special needs students at the secondary level.

Interviews with more than 90 regular educators from urban, suburban, and rural populations provided initial suggestions for proposed course content. Interviewees described their concerns about special needs students and problems prevalent in their classrooms for which they needed assistance.

A task force, representing teachers, administrators, and parents, conceptualized and sequenced topics for the series. Instructional units for the ITV programs and manuals were researched by consultants representing regular and special education, learning disabilities, psychology, speech and language pathology, counseling, medicine, law, career, and vocational education.

The specific goals of the course are
* To increase the viewer's awareness and understanding of students with special needs
* To provide the viewer with purposes and methods of assessment
* To give teachers specific tools for working with students

abstract
The videotape accompanying this module shows dramatizations of acting-out and non-participating behavior problems. Fifteen behavior management strategies are discussed and illustrated on the tape. The program presents behavior management as a protection of the rights of students and teachers. The importance of using an organized approach with clearly defined goals is emphasized.

"The Heart of Teaching" series was developed to meet a specific need identified by teachers: the need to understand themselves and their emotional responses to the daily experiences of their professional lives. It is based on the assumption that when teachers know and accept their own feelings, they are better able to perceive and respond to the emotional needs of their students.

The programs deal incidentally with various professional topics -- like grading, classroom techniques, and student discipline. But in this series it is the feelings of the characters (anger, joy, compassion, anxiety) and how they deal with them -- that are significant.

The series consists of five 15-minute programs on the common affective concerns that teachers themselves have identified as their most troublesome. In addition, there is a special videocassette in which the project's national consultants illustrate preferred ways of handling issues posed in the programs. A discussion leader's guide is also available to follow up the viewing of the videocassettes.

The five topics covered by "The Heart of Teaching" are:

* The Parent Crunch (Communication)
* An Eye for Change (Professional Growth)
* Last Hour Clash (Frustration)
* Everyone Is Something Else (Individual Differences)
* A Faculty Feeling (Loneliness)

The following modules are recommended by the NIN panels:

types of student with general content areas:

General student population

the instructional materials consist of:

1) Videotape
2) Discussion Leader's Guide

the instructional approach is:

1) Clearly stated objectives
2) Activities which correspond to objectives

abstract:

The videotape accompanying this module is semi-documentary. It presents scenes of a teacher and children interacting in a multi-cultural classroom with the teacher commenting about the challenges of dealing with individual differences.

In the follow-up discussion, viewers are given the chance to appraise the "emotional climate" of the classroom and consider what contributes to this climate, including the teacher's feelings and how she copes with these. Suggested discussion topics include such issues as how a teacher can provide for the comfort and inclusion of all the students he/she is responsible for.

### Title: The Heart of Teaching: Last Hour Clash

**Author:** Agency for Instructional Television  
**Publication Date:** 1976  
**Recommended Length of Time Necessary to Use Material:** 2 hours  
**Type of Instruction:** Group  
**Target Audience:** All levels  
**Types of Student with General Content Areas:** General student population  

The instructional materials consist of:

1. Video tape  
2. Discussion Leader's Guide

The instructional approach is:

1. Clearly stated objectives  
2. Activities which correspond to objectives

**Abstract:**

Using an open-ended character format, the videotape accompanying this module uses humor and exaggeration to bring out the best and worst characteristics of a concerned but bungling teacher, his "helping" friend, and the student, Sidney.

As a follow-up, viewers are encouraged to discuss the characters as caricatures and to focus their attention on: 1) the feelings of the characters, and 2) their attempts to cope with these feelings.

Possible discussion topics include:

- Sources of tension and how to deal with it and them;  
- The impact on the teacher of knowing a student's home life.

abstract
The materials and activities included in the "Behavior Management Strategies" workshop will prepare teachers to use the behavior modification approach in their classroom.

The four sessions are titled:
1) Introduction to Behavior Management; 2) Basic Intervention Principles and Procedures; 3) Reinforcement Strategies and Behavioral Observation; 4) Sample Programs and Intervention Strategies.

Activities include case studies, structured problem-solving activities, worksheets, simulations, and application of learning through a game activity.

The workshop is appropriate for teachers with no previous knowledge of the behavior modification approach, or with those who need a quick review. A complete outline is included for the facilitator.

# How Can Tests Be Unfair?

**A Workshop on Nondiscriminatory Testing**

**Jean N. Nazzaro**

**Publication date:** 1975

**Recommended length of time necessary to use material:** 1½ to 3½ hours, depending on format chosen

**Type of instruction:** Group

**Target audience:** All levels

**Types of student with general content areas:** All handicaps

**The instructional materials consist of:**

1. Facilitator's Manual
2. Student Booklets
3. Simulated Tests
4. Audiotape

**The instructional approach is:**

1. Clearly stated objectives; 2. Activities which correspond to objectives; 3. Evaluation material for each objective; 4. Provision for adding or skipping material

**Abstract:**

"How Can Tests Be Unfair" provides educational personnel with an opportunity to participate in the simulated experience of taking tests that are biased. The exercises provide an opportunity to feel the frustrations a child may experience if he/she has a problem in any of the following six areas:

4. Language; 5. Conceptualization; 6. Cultural difference

In addition to the simulations, follow-up discussions lead the participant to recommend actions to help protect children from being assessed by unfair materials and practices in the areas of:

* test administration  
* test selection and construction  
* use of test results  
* policy decisions

TITLE: EVERY STUDENT IS DIFFERENT: The High School

author Lexington, Massachusetts Public Schools

publication date 1974

recommended length of time necessary to use material 2 - 3 hours

type of instruction Group

target audience High School

types of student with general content areas General student population, Learning disabled

the instructional materials consist of

1) Facilitator's Manual
2) Student Workbook

the instructional approach is
1) Clearly stated objectives; 2) Pre and post tests; 3) Activities which correspond to objectives; 4) Evaluation material; 5) Provision for skipping and adding material

abstract The materials in this module address the problems involved in mainstreaming learning disabled high school students. The video cassette offers examples of different teaching approaches designed to accommodate students with different learning styles. Examples are given from English and science classes. The tape portrays the effect that changing-teacher approach may have on students' motivation and productivity. Suggestions are given for using the following techniques: grouping with a common topic but with different approaches in each group, the use of learning contracts, utilizing resources, and the work-study approach.

# EXPANDING WORK OPTIONS FOR EXCEPTIONAL STUDENTS

**Author:** Carole M. Johnson  
**Jill Lamkin**  
**Michael Ward**

**Publication Date:** 1979

**Recommended Length of Time Necessary to Use Material:** 9 - 27 hours

**Type of Instruction:** Group or individual

**Target Audience:** All levels

**Types of Student with General Content Areas:** General student population - including gifted and handicapped

**The Instructional Materials Consist of:**
- Facilitator's Guide
- Self-Instructional Manual
- Filmstrip
- Audiotape
- Supplementary booklets:
  - "Exceptional Students in Secondary Schools"
  - "Vocational Education: Teaching the Handicapped in Regular Classes"

**The Instructional Approach Is:**
1. Clearly stated, measurable objectives; 2. Pre and post tests; 3. Activities which correspond to objectives; 4. Evaluation material for each objective; 5. Provisions for skipping or adding material

**Abstract**
"Expanding Work Options for Exceptional Students" addresses the developmental career education needs of exceptional individuals from preschool through adulthood, and encompasses students in all areas of exceptionality. The emphasis of the program is on training educators to adapt and/or develop appropriate career education instructional materials and curriculum for handicapped learners.

The self-instructional manual covers three major content areas:
- Fundamentals of Career Education
- Exceptional Individuals and Career Education
- Implementing Career Education for Exceptional Individuals

The format is flexible and adaptable. The material is appropriate for use by a variety of school personnel -- special education, regular education, counselors, curriculum specialists, and administration.

The program stresses the importance of career education in helping students to understand and acquire the skills needed in both their current and future life roles.

2) Transparency masters  
3) Videotape  
4) Audiotape

**abstract**

The HIFI program is designed to be used as the basis of an inservice program in elementary school systems faced with the new task of mainstreaming hearing impaired children. The program is targeted for workshops comprised of classroom teachers and other school personnel and, as such, relates directly to school district management as well as classroom management of the hearing impaired child.

The materials primarily address the issue of mainstreaming the hearing impaired, but also include information on support services, background on the hearing impaired, and curriculum.

The manual is divided into seven sections:

1) Introduction; 2) Mainstreaming; 3) Hearing Impairment; 4) Educating the Hearing Impaired in Special Schools; 5) Educating the Hearing Impaired in Regular Schools; 6) Orientation; 7) Resources

TITLE: POSITIVE APPROACHES FOR MANAGING TROUBLED STUDENTS

author  Raymond M. Glass, Ph.D.

date  1982

recommended length of time necessary to use material

4-1½ hour sessions

type of instruction: Group

target audience: All levels

types of student with general content areas

general student population

the instructional materials consist of

1) Facilitator's Manual
2) Series of handouts

the instructional approach is

1) Clearly stated, measurable objectives
2) Activities which correspond to objectives
3) Final project for evaluation

abstract

"Positive Approaches to Managing Troubled Students" presents a program for teachers to use with children who exhibit troublesome behaviors in the classroom. The four sessions develop skills in:
1) Observing and describing behavior; 2) Developing behavioral objectives; 3) Using various reinforcement procedures; 4) Developing and managing reward programs; 5) Phasing out reward programs.

Both individual and whole group activities are included. Participants are encouraged to complete "homework" activities in their own classrooms between the sessions in order to practice and develop the skills being taught. A final project involves the writing of a case study on the progress of one student in the teacher's class as he/she is taken through each step of this behavior management program.

Complete, detailed outline and instructions are provided for the facilitator for each activity in the four sessions.

abstract
The "Project Criteria" inservice modules present classroom teachers with a course in understanding and working with handicapped children in the regular classroom. Emphasis is placed on building positive attitudes in the handicapped children and their classmates.

The four instructional areas covered by the inservice modules are:
* Characteristics, Attitudes, and Activities for Phasing the Handicapped Child into the Regular Classroom
* Managing Surface Behavior
* Adaptations of Materials and Instruction
* Peer Tutoring

The modules include complete instructions for the facilitator, including background information, lists of materials needed, suggested schedules, and introductory, formative, and application activities for each of the four modules.

**Recommended Length of Time Necessary to Use Material:** 10-3 hr. sessions

**Type of Instruction:** Group

**Target Audience:** Elementary through Junior High School

**Types of Student with General Content Areas:** Mildly handicapped, including the mentally handicapped, learning disabled, and emotionally handicapped

**Instructional Materials Consist Of:** 1) Teacher Activity Text; 2) overhead masters; 3) Facilitator's Manual

**The Instructional Approach Is:** 1) Clearly stated, measurable objectives; 2) Pre and post tests; 3) Activities which correspond to objectives; 4) Evaluation material for each objective; 5) Provision for skipping material

**Abstract:** The Sweetwater Plan is an on-site, inservice program for regular classroom teachers that can be implemented by the resource teacher or other special education personnel assigned to a school. The focus is on giving teachers general information about the mildly handicapped and methods and materials for working more directly with children with special needs. The preparation sessions utilize both large group instruction and relevant classroom activities designed to help the regular classroom teacher deal with all children in the classroom.

The emphasis on teaching the basic skills associated with fixed learning tasks such as reading, arithmetic, writing, and spelling. This is done by concentrating on how to logistically work with the handicapped given the constraints of the regular classroom, rather than with providing highly specialized training programs that must be made to fit the regular classroom.

The six study units cover: 1) The Mildly Handicapped: An Introduction; 2) The Use of Task Analysis in Educating the Mildly Handicapped; 3) The Assessment of the Mildly Handicapped; 4) Writing I.E.P.'s for the Mildly Handicapped; 5) Developing, Selecting, and Utilizing Instructional Programs with the Mildly Handicapped; 6) Methods for Increasing Academic Behavior and Decreasing Inappropriate Social Behavior

**target audience:** All levels

**types of student with general content areas**
- General student population

**the instructional materials consist of**
- Manual

**the instructional approach is**
1) Clearly stated objectives
2) Activities which correspond to objectives

**abstract**
"Developing a School-Based Workshop Program" is designed to help resource teachers plan for and implement inservice workshops for teachers of mainstreamed students. The hope is that these school-based inservice activities will enable all school personnel to update their knowledge about special education and to develop skills that will equip them to accommodate their mainstreamed special education students.

The guide introduces the resource teacher to his/her responsibilities in workshop planning, by providing:

* a discussion of common issues and problems that are associated with inservice
* a description of stages that are involved in organizing workshops
* a description of the resource teacher's role during the workshops
* specific suggestions for the design and implementation of different kinds of sessions

The four types of workshops discussed are:
1) Needs Assessment
2) Problem-Solving
3) Sharing Ideas
4) Information Sharing

The text follows a question-answer format and provides the participant with practical suggestions, examples, and checklists.

publication date
1978

recommended length of time necessary to use material
1 1/2 hours

type of instruction: Group or individual

target audience: All levels

types of student with general content areas
General student population

the instructional materials consist of
1) Creating Awareness of Test Bias: A Training Package" (which includes the simulations)
2) "Identification of Bias in Testing: A Checklist and Guide"

the instructional approach is
1) Clearly stated objectives
2) Activities which correspond to objectives
3) Provision for adding or skipping material

abstract
"Creating Awareness of Test Bias" is a program designed for use by educators involved in the assessment of exceptional children. It is intended to introduce users to the problems of culture-fair testing via simulated assessment activities. By using the package, participants should gain insight into the problems of culture-fair testing and should become more aware of potential sources of test bias. In addition, the simulations are designed to permit participants to share some of the thoughts and feelings experienced by the culturally different child involved in a test situation.

Section I presents the participant with a statement of the problem, an overview of the ways in which cultural differences can result in test bias, key issues in minority testing, and some methods for coping with cultural bias in testing.

Section II includes the eight simulation activities. Participants have the chance to complete General Information, Vocabulary, Spelling, and reading tests which simulate the problems confronted by exceptional or culturally different students.

As a culminating activity, the participant is provided with material to "walk through a case study, from diagnostic input to program planning.

**TITLE:** BEHAVIOR MANAGEMENT:  
A Competency-Based Manual for In-Service Training

**author**  Stanley Fagen and Jeffery Hill

**publication date:** 1977

**recommended length of time necessary to use material**
15-3 hour sessions

**type of instruction:** Group

**target audience:** All levels

**types of student with general content areas**
- General student population

**the instructional materials consist of**
1) Facilitator's Manual  
2) Activities  
3) Tests  
4) Various AV materials listed for optional use by instructor

**the instructional approach is**
1) Clearly stated, measurable objectives; 2) Post tests; 3) Activities which correspond to objectives; 4) Evaluation material for each objective; 5) Provision for adding or skipping material

**abstract**
The "Behavior Management" inservice program is intended to help teachers prevent and survive difficult encounters with student behavior. It also hopes to foster competencies to build such encounters into avenues for increased stability, trust, and self-esteem.

The course is made up of six modules:

**PREVENTION**
1. Establishing Behavior Values, Standards, and Limits
2. The Operant Strategy as One of Three Educational Approaches
3. Strategies for Reinforcing Behavior Values

**COPING**
4. Teaching Acceptance of and Coping with Frustration

**INTERVENTION**
5. Surface Management Techniques for Intervening in Disruptive School Behavior
6. Life Space Interviewing

The manual includes detailed lesson plans, suggested readings, charts, questionnaires, and activities which encourage direct application to classroom situations.

**Title:** DATA BANK GUIDE TEACHER TRAINING PROGRAM: COMMUNICATION

**Author:** Pamela Bodoin Smith and Glee Ingram Bentley

**Publication Date:** 1975

**Recommended Length of Time Necessary to Use Material:** 3 hours

**Type of Instruction:** Group

**Target Audience:** All levels

**Types of Student with General Content Areas:** General student population

**The Instructional Materials Consist Of:**
- 1) Filmstrip
- 2) Audiotape
- 3) Facilitator's Manual
- 4) Student Workbook
- 5) Game

**The Instructional Approach Is:**
- 1) Clearly stated objectives
- 2) Activities which correspond to objectives
- 3) Provision for adding material

**Abstract:**
This Data Bank Guide suggests activities for improving verbal exchange skills and the ability to effectively express feelings by emphasizing the accurate encoding and decoding of messages. Listening skills, information gathering, and conflict response skills are stressed. Activities include articles, individual activities, group discussion, and role playing. Roadblocks to communication are also analyzed. Active and passive listening, clarifying responses, and "I-messages" are practiced by participants.

2) Activities which correspond to objectives  
3) Provisions for adding material

**abstract**

This module is based on the premise that traditional grading and reporting systems do not reflect the intent of individualized instruction. Grading/Reporting addresses two major issues: the evaluation of student work, and the manner and form in which the evaluation is reported. A wide variety of materials and activities are provided which encourage opportunities for interaction and sharing points of view. Simulation activities allow participants to create, evaluate, modify, and discuss alternative grading systems.
