The rural Northeast Alabama Consortium for Professional Development is composed of five local school systems and an institution of higher learning that have joined together to share resources and enhance educational opportunities for teachers and students. The Consortium was formed as a result of the impact of three major factors: the Alabama State Board of Education's resolutions requiring formal inservice programs forced local school districts to seek alternatives for providing quality staff development opportunities for teachers; factors related to geographic location and diverse needs forced some local school districts and institutions of higher learning to explore creative options for establishing good staff development programs at extended locations; and lack of funding for the statewide inservice plan required local school districts to seek ways to fund the mandated staff development programs. In three years of operation, nearly 3,000 persons have attended inservice sessions offered through the Consortium. The document provides general information on the purpose of the Consortium, design of workshops and delivery of instruction, services provided, and financing the Consortium. In addition, the Consortium is viewed from the perspective of a local education agency (LEA), the College of Education, and the Division of Continuing Education. Seven attachments provide additional information and program forms.

(BRR)
Development/Operation of a Multisystem Staff Development Consortium in Rural Alabama

A Presentation to the National Conference of the National Council of States on Inservice Education, by:

Mr. Bob Addleton
Dr. Lanny Gamble
Dr. Foster Watkins
University of Alabama

Dr. Charles Edmonds
Marshall County (Alabama) Board of Education

November 22, 1982
Formal, ongoing cooperative working agreements between individual school districts and institutions of higher learning are common throughout Alabama. However, cooperative agreements between local school districts to share mutually beneficial goods and services are somewhat rare. The rural Consortium (formally named the Northeast Alabama Consortium for Professional Development) described in this paper is composed of a group of Alabama educational institutions (five local school systems and an institution of higher learning) that have joined together to share resources and enhance educational opportunities for teachers and students. The Consortium was formed as a result of the impact of three major factors.

First, the Alabama State Board of Education's (SBE) resolutions requiring formal inservice programs forced local school districts to seek alternatives for providing quality staff development opportunities for teachers. Historically, local school inservice training programs in Alabama have followed traditional patterns common in many states—one or two days devoted to general educational concerns, with intermittent faculty meetings dealing with day-to-day problems. Many Alabama school districts utilized this designated inservice time to good advantage; however, others were unable to design and maintain viable staff development activities for system personnel. Based on the belief that well designed and diversified inservice programs enhance professional growth and improved teaching, the Alabama State Board of Education in 1972 approved a policy requiring each public school system to provide opportunities for continuous improvement of professional personnel. In 1979 the State Board approved the State Plan for Inservice Education/Professional Development (see Attachment #1). These bold, forward looking acts by the Alabama State Board of Education provided the impetus for exploring new
and innovative ways for organizing and delivering staff development opportunities to educational personnel throughout Alabama.

This plan was a culmination of efforts of a cross-section of educators working together over a period of approximately one year. Although staff members of the State Department of Education had the primary responsibility for putting the various components together, this plan was made possible and greatly enhanced by the involvement of a variety of personnel from local education agencies, institutions of higher learning, and professional organizations working together.

The criterion for compliance with the resolutions of the State Board of Education is effective participation in professional development programs by all certified personnel. The goal of the program is to help provide the best possible education for each student enrolled in the public schools by improving the competence of professional personnel.

Secondly, factors related to geographic location and diverse needs forced some local school districts and institutions of higher learning to explore creative options for establishing good staff development programs at extended locations. As school systems across the state sought to implement the intent of the SBE policies requiring inservice programs, institutions of higher learning became prime focal points as suppliers of the human resources needed to deliver field based staff development opportunities across the state. Operationally, local school systems tapped the higher education personnel reservoir by randomly contacting individual faculty members to deliver inservice programs in specific areas on an as-needed basis; few formal institution/local school system arrangements were consummated. Seven school systems in rural Northeast Alabama and The University of Alabama did enter into a formal agreement. The diverse inservice needs of the seven school systems and their rural settings (150 miles from U of A campus) proved to be important factors in deciding to formalize the Consortium arrangement. The seven school systems identified a wide range of inservice needs and sought to work with one of the state's comprehensive institutions of higher learning. Sheer
distance between the Consortium school systems and the University of Alabama dictated an organizational arrangement that would allow University personnel to provide services to more than one school system while they were in the Consortium area.

The presence of these key factors, plus local school district and University administrators who were willing to work together, created a climate that was right for Consortium formation. From the beginning the Consortium was predicated on equal partnership and a commitment to an ongoing planning cycle.

Thirdly, lack of funding for the statewide inservice plan required local school districts to seek ways to fund recently mandated local staff development programs. The Alabama Legislature was unable to allocate funds to cover costs associated with the State Board of Education's Mandate for statewide inservice education. Consequently, local school districts were expected to implement the inservice plan out of existing funds. The Consortium was designed to assist its members to provide quality inservice programs in the most cost effective manner possible. The Consortium format permitted local school districts to share costs on a percentage basis, while at the same time, offering to their employees expanded opportunities to participate in inservice sessions. University dollars were added to the Consortium based on credit participation. By agreeing to pool dollars, the Consortium solved the problems of funding and need for expanded inservice opportunities.
Background

In the Fall of 1978, staff members of the University of Alabama Division of Continuing Education met with a newly-elected superintendent of schools in Marshall County, Alabama. The discussion centered on the State Department of Education mandated requirements for inservice education. The new guidelines required local school systems to:

1. Recognize the value of ongoing inservice education as a way of improving instruction to students.
2. Plan inservice activities which were based on a careful needs assessment of system teachers.
3. Utilize the resources of local school systems, the State Department of Education, public and private institutions of higher education and special consultants.
4. Annually evaluate the inservice plan.

As a way of meeting the requirements of the State Inservice Plan for Professional Development, the superintendent inquired if it might be possible to link University of Alabama resources with those of the Marshall County Board of Education in order to deliver a series of quality inservice experiences to teachers which would be directly related to practical instructional needs and would be part of a comprehensive inservice plan, not a random, disconnected number of experiences.

As funds were limited (no state funds were set aside to pay for the mandated inservice experiences), it was suggested that other nearby school districts might wish to become involved in order to reduce costs. Superintendents from Arab City Schools, Guntersville City Schools, DeKalb County, Fort Payne City, Jackson County and Scottsboro City Schools were contacted. They expressed interest in pooling their resources, and the Northeast Consortium for Professional Development was born.
Following a comprehensive needs assessment in the Spring of 1979, the Consortium offered its first programs in the 1980-81 school year. That first year, the Consortium provided inservice for 920 Consortium teachers and administrators. In 1981-82, the Consortium offered 45 different workshops and attracted 935 participants. In 1982-83, the Consortium was reduced to 5 systems, as Jackson County and Scottsboro City withdrew. Thirty workshops were offered and attendance was 910. In three years of operation, nearly 3,000 persons have attended inservice sessions offered through the Northeast Consortium.

Purpose of Consortium

The Northeast Consortium was designed to be a non-credit inservice system of activities for classroom teachers and school administrators. System representatives expressed a strong desire that sessions reflect the practical needs of those whose task it is to educate children. The instructional emphasis in all sessions is on the application of presented material to on-going school responsibilities.

Consortium sessions were designed for beginning teachers, who need practical introduction to school duties; teachers who need recertification credit; school personnel who have identified areas for needed professional growth based on staff evaluation procedures, and those wanting to learn more about topics of interest. Sessions were also designed for school administrators specifically related to their needs in fiscal management, staff evaluation, effective leadership, and the area of student discipline. Administrators have also attended the teacher-oriented sessions, and the mingling of teachers and administrators in the same classroom has fostered needed communication and cooperation between these two groups.

While the Consortium is mostly concerned with non-credit offerings, a credit option does exist for those interested in recertification or degree hours. The University of Alabama for the past three years has awarded graduate credit to those teachers who meet graduate admission standards, attend 45 contact hours of Consortium activities including workshop sessions, evaluation sessions, and other
advisor-approved educational meetings or activities. The credit option has proved to be a viable way for persons who live 150 miles from the campus to receive graduate instruction and credit from The University of Alabama while employed in a full-time job. The practical nature of Consortium sessions lends itself to "problems/field work area" graduate course work.

Design of Workshops and Delivery of Instruction

Consortium sessions generally are three hours long. Teachers consistently have chosen the 6:00-9:00 p.m. blocks as the favorite time for the sessions, and Tuesday night seems to offer the fewest conflicts with home, church, and school sponsored activities. Some sessions, such as art activity workshops, have been scheduled in blocks up to six hours in length to accommodate the special needs of particular topics. All sessions are offered at no cost to teachers who are employed by any Consortium member system.

The Consortium delivery methods are still in a state of transition. During the first two years of the Consortium, there was no pattern as to when or where sessions were to be offered (see Attachment #2). Programs were held on various nights, times, and locations throughout the Consortium districts. The administration of the program from the University, 150 miles away, became difficult to manage. In an effort to overcome randomness and provide added structure to the course offerings, a modular approach was implemented for the 1982-83 Consortium (see Attachment #3).

The modular approach involved the delivery of six three-hour workshops at a Consortium school located in each of the five member school systems. Five blocks of six sessions were held. Each block was held on a Tuesday night from 6:00-9:00 p.m. This service delivery design seemed to have several advantages:

- It insured that each participating system would have equal representation in allocation of sessions.
- Participants would not necessarily have to drive long distances to attend sessions.
Presenters would not have to drive separately, but could ride in a University van from a central location, increasing cost-effectiveness.

Required participants to remember only five dates.

An additional modification led to scheduling all evening sessions to end before Thanksgiving holidays. It was reasoned that effective teacher inservice should have an effect on classroom behavior. For this to occur, sessions should be offered as soon as possible in the school year.

Also incorporated into Consortium scheduling for the 1982-83 programs were all individual system inservice days which were opened to any interested Consortium participant, and topics of interest offered through weekend programs at the University of Alabama Gadsden Center and at the University campus in Tuscaloosa. While evening programs ended before Thanksgiving, these other Consortium components allow inservice participation throughout the school year (see Attachment #3).

Services Provided

To administratively and logistically support the Consortium, The University of Alabama Division of Continuing Education has provided to the Northeast Consortium each year a series of services beginning with a needs assessment of teachers and administrators each Spring (see Attachment #4). Following an analysis of the data, Consortium representatives from each system meet with Continuing Education representatives to decide on a tentative schedule of workshop offerings, instructors, locations, and times.

During the summer months, instructors are contacted and a form for teacher sign-up is designed (see Attachment #3). On institute day, (a work day for teachers) the forms are distributed to teachers who make their selections from the various workshops offered. Each teacher keeps a copy of the sign-up form and fills out a duplicate form so that both the local board of education and the Division of Continuing Education might know how many persons to expect at each session.

All instructors for Consortium sessions are provided with appropriate audio-visual equipment, handouts, class rolls and course evaluations by the Division of
Continuing Education (see Attachments #5 & 6). All honoraria and travel expenses are paid by the Division. Local systems are billed for their share of Consortium expenses, based on the number of employees in each system, following the last Consortium session.

Financing the Consortium (see Attachment #7)

Calculating individual school systems support needed for the Consortium is based on several factors:

1. Instructional Costs. (Currently, the honorarium is $125.00 per presentation)

2. Travel Costs

3. Reproduction and Mailing Costs

4. Number of Sessions

Administrative costs for the Consortium are low, since Continuing Education provides administrative support at no additional cost to the Consortium.

Each system's share is determined by calculating the number of teachers and supervisors (potential participants), finding what percentage they represent of the total number of teachers and administrators throughout the Consortium and applying that percentage to the total cost estimate.
The Marshall County School System instituted the requirements of the SBE Inservice plan during the 1979-80 school year. The school system proceeded with the idea that the effective utilization of the inservice activities can best be achieved through a sharing of responsibility between the individual, the school and the school system. Individual employees could choose to select activities that they wished to pursue on their own, such as travel experiences, night classes at a university, etc. Local school principals were given the flexibility of developing inservice activities to meet peculiar school needs, such as preparing a self study to meet the requirements of an accreditation review.

The central office took the initiative to plan for and provide those activities and events necessary to meet needs common to several schools and individuals. All professional employees were required to complete a survey for assessment of inservice needs. The results of this survey were tabulated and a priority listing of inservice activities was established.

Certain needs were found to be of an individual nature and were to be pursued on an individual basis. Some needs pertained to only certain schools, so these needs were pursued on a school basis. Other needs were identified that were of the nature that they could best be met through activities planned and developed at the central office level.

Efforts were made to secure the best presenters and consultants available. Use was made of employees within the system, who had expertise in specialized areas, as well as State Department of Education Personnel, consultants from colleges and universities, representatives of various firms and publishing companies and employees of other school systems.
A yearly Calendar of Activities and Events was published and a copy was distributed to all certified employees.

The inservice program for the year was evaluated and found to be successful. It was a tremendous improvement over the very limited programs of the past.

Due to the financial restraints of having to offer a multitude of activities to serve specialized areas, that often consisted of only a few individuals, some alternative was needed. This alternative was found through the idea of serving the needs of professional employees in several school systems through a consortium. Due to the cooperation and willingness of the University of Alabama to take the lead, a consortium was developed that has been very successful in assisting seven school systems in Northeast Alabama meet the obligation of providing an adequate program of professional development and improvement activities for their employees.

The Consortium is now in its third year of operation and continues to make possible professional improvement opportunities which otherwise would not be possible. The Division of Continuing Education, the University of Alabama, has been the catalyst in making the Consortium function effectively.

The professional employees, a total of over two thousand in the school systems comprising the Consortium, have had made available to them a wide variety of top quality professional growth activities conducted by outstanding presenters. The cost to each system participating in the Consortium has been very reasonable.

The Consortium concept has proved to be a practical and workable method of bringing to rural school systems with limited resources, high quality professional improvement activities.

In summary, the following benefits to the local education agency have been realized:

1) The Consortium has made available a wide variety of inservice and professional development activities that would ordinarily be beyond the capacity of a single school system to offer.
2) The Consortium has made full implementation of the SBE inservice requirements affordable.

3) The Consortium has brought about and strengthened closer cooperation and communication across school district lines.

4) The Consortium has helped to identify and make available a pool of excellent resource persons, consultants, and presenters that otherwise would not be available.

5) The Consortium has made available college credit options to teachers in a rural area that is not in close proximity to an institution of higher learning.
The College of Education Perspective

Historically, the College of Education had cooperated with the Division of Continuing Education in a number of alternative delivery programs such as offering extension courses for credit in off-campus settings, utilizing a Weekend College (Friday 6-9 p.m. and Saturday 8-5) format; and providing faculty expertise for inservice/staff development topics which were marketed on a statewide basis. A number of attitudinal, procedural, and operational questions/problems had to be addressed in responding to the opportunities provided by the Consortium from the perspective of the College of Education. A number of these will be discussed with attention given to the responses made in dealing with each of them.

A major concern which emerged early in the discussions was the desire of both the Local Education Agency (LEA) personnel and selected College of Education personnel to develop credit/noncredit options in the Consortium offerings. All previous off-campus offerings which carried credit options had consisted of didactic courses offered by University instructional personnel or carefully screened adjunct personnel who normally had a terminal degree. The format of the Consortium offerings, as described earlier, violated this more traditional delivery format through their utilization of multiple content topics, limited contact time on any one topic, and multiple instructors with a number of them being selected from noncollege positions such as LEA's and the State Department of Education (SDE). Supporters of a credit option for consortium-type activities advanced their position as being consistent with the previously
referenced SDE staff development and program approval guidelines that encouraged Institutions of Higher Education (IHEs) to generate field-based opportunities for earning credit toward advanced degrees.

The several Areas/Programs in the College of Education have responded to the Consortium opportunities in a variety of ways. The Area of Curriculum and Instruction which I represent took the following positions:

1. It was agreed that the generic designator CIE (Curriculum and Instruction Education) would be utilized for course credit and would be accepted for degree purposes across program lines.

2. It was agreed that credit would be offered under application course titles such as Workshop and/or Fieldwork in the Improvement of Instruction.

3. It was decided that only six credit hours of these application type courses could be included for meeting degree/certification requirements at any one level (i.e., MA/"A", Ed.S./"AA").

4. Responding to continuing concerns after the first year of the Consortium relative to the degree of control over the academic quality of the credit options, a decision was made to utilize Pass/Fail (P/F) grading procedures in subsequent cycles. Graduate students may take a maximum of 20% of the course hours for any degree under a P/F option.

5. While supporting the concept of utilizing field-based teacher educators (FBTEs), the position has been taken that a majority of the consortium offerings in any one year would be delivered by IHE personnel.

Other Areas/Programs within the College have participated in varying degrees in the Consortium activities. The program in School Administration (Administration and Planning-AAP) in the Area of Educational Leadership (AEL)
have made a credit option available under a Problems in School Administration course designator. Faculty members from that Area have participated actively in delivery consortium sessions. Other Areas to this point have not embraced the Consortium opportunity to the credit option extent. However, all Areas have accepted the CIE/AAP credit as meeting elective requirements in their several programs. Additionally, faculty members from all Areas have participated as session resource persons in Consortium programs.

Efforts to respond to the academic credibility concerns raised by some during the development of the Consortium resulted in the emergence of a number of philosophical points of departure, coordination, and communication procedures as reflected by the attached forms. The basis for the credit option has been based primarily upon the tridimensional concerns for a personal assessment of professional growth needs, a selection of professional growth experiences based upon this assessment, and the generation of "so what/application" reactions to the experiences and their carry over implementation in classroom/school settings. Efforts have been made to encourage appropriate dialogue by the teachers' system/school level administrators/supervisors in generating an information base upon which decisions are made relative to professional growth decisions and thus consortium participation selections.

The interest in the credit option in the Consortium boomed during the first year as described earlier. During subsequent years, we have either exhausted the market or have made the credit expectations so demanding that many prefer not to go that route.

Strengths of the Consortium approach from the College of Education perspective are many:
1. The Consortium has generated multiple contacts among university personnel and LEA personnel which obviously has had a student recruitment impact.

2. The involvement of College of Education (CED) personnel with LEA personnel in multiple systems has had spinoff effects which have resulted in a number of continuing consultative/program development relationships which move beyond the smorgasbord approaches which are offered by the Consortium.

3. The increased involvement of CED personnel in LEAs has opened up communications/feedback opportunities relative to program improvement needs of the CED as perceived by LEA personnel. The rural nature of the systems served by the Consortium have emphasized the need for the CED to redouble its efforts to recognize the special needs of rural schools in its basic teacher preparation programs.

4. The ability to bring in some nationally known resource persons has made it possible for CED personnel to benefit from staff development perspectives from their contacts with them.

5. The honoraria paid by the Consortium has provided a degree of salary supplement for IHE/LEA personnel which has been well-received in the existing economic doldrums.
CREDIT REQUIREMENTS

STAFF DEVELOPMENT CONSORTIUM

1. Utilizing any available job descriptions, staff evaluation forms, assessment for development procedures, etc., utilized in their system, credit participants will introspectively assess in writing their role performance as they see it in relation to their continuing professional development needs.

2. They will select forty-five (45) hours of staff development sessions inclusive of the orientation and the evaluation sessions from the various professional growth opportunities available through the Consortium and prepare a written rationale for the selection of these sessions in light of the self-assessment process called for in Step 1.

3. Prepare and submit a two-page typed report on each session attended which focuses particularly upon the application implications of the session for the participant's continuing professional development and on-going performance.

OR

4. Identify a topic of special interest which they would like to pursue in depth and share with the group during the evaluation session in May (i.e., development of a research/position paper on a special topic, development of curriculum materials which they may use in your classroom, implementation of an action research project in your local school or classroom, etc.).

5. Participate in group-sharing discussions during the evaluation session in May which will focus upon the cumulative impact of the year's activities. Participants will be expected to share any "products" or "processes" which have been developed. Additionally, the participants will introspectively reflect in writing upon their continuing professional development and project for the following year their professional growth needs.
1. Prepare a list of curriculum and instructionally related problems which might be attacked through your current role.

2. Identify the problem area that you have selected for special study in this course.

3. Provide a rationale that led to the selection of this particular problem. Relate your selection to your assessment of your staff development/professional growth needs.

4. Provide a summary of how you plan to approach this problem area with an indication of the current status of any ongoing activities relative to solving the problem. Give special attention to the assistance you anticipate from your participation in the staff development sessions offered through the Northeast Consortium.

5. Discuss how you plan to assess (evaluate), your progress in solving your problem.

6. Describe the expected results of your efforts in terms of "products" which you could share with the class during our final sharing/evaluation session.
CONSORTIUM FEEDBACK FORM

NAME ________________________________

1. Your initial response from a self-analysis perspective has been received. It reflected thoughtful consideration as a basis for selecting the sessions for your participation.

2. Your initial response from a self-analysis perspective has been received. It reflected some consideration to your professional development needs and provided a partial basis for selecting the sessions for your participation.

3. Your initial response from a self-analysis perspective has been received. It seems to have been done in a rather general manner and did not provide much specific information as a basis for selecting the sessions for your participation.

4. Your written responses to ______ of the consortium experiences have been received. They seem to reflect a high level of professional participation in the sessions as well as responsible consideration given to their implications for your on-going responsibilities. Keep up this level of performance.

5. Your written responses to ______ of the consortium experiences have been received and they tend to emphasize too much of "what occurred" and not enough of your reactions from the perspective of implications for your on-going responsibilities. Please give attention in future followup papers to this "so what/implications for application" dimensions.

6. Your written responses to ______ of the consortium experiences have been received. While they reflect an apparent degree of effort on your part, the papers are somewhat deficient from organization and presentation perspectives; contain errors in spelling, grammar and composition; and are not prepared in a neat and orderly manner.

7. Your written responses to ______ of the consortium experiences have been received. The ones received to this point reflect an inconsistency in their preparation particularly from the desired "implications" perspective.

8. No written responses (Option 3) to the consortium sessions have been received at this time if you selected that option, nor have I received a narrative relative to your special project (Option 4) if you selected that approach.

9. No written self-analysis from a professional development perspective has been received.

10. The narrative discussion of your special topic (Option 4) has been received. It gives appropriate attention to the Problem Attack Cycle.

STAFF DEVELOPMENT CONSORTIUM
EXAMINATION

1. Identify at least five (5) concepts, ideas, techniques, strategies, etc., from the staff development sessions which you have attended which have had special significance for you. Operationally define these five concepts in a short paragraph. Select one of the five and discuss it in some detail giving attention to the following points as a minimum:
   a. Your professional reaction to the concept
   b. Examples of your efforts to operationally implement the concept during the year
   c. Any information on which you judged success or failure of your efforts to implement the concept
   d. Projected future responses in your classroom to the concept.

2. During orientation session, you were asked to discuss your staff development needs with special attention given to the data sources upon which you based your perceptions of your professional growth needs. Secondly, you were requested to relate your identified needs to the selection of consortium sessions which you planned to attend. Please reflect upon those activities of the first session, your subsequent participation in the consortium, and your intervening year in the classroom/school as a basis for discussing your continuing professional growth needs giving attention to the following points as a minimum:
   a. Your perceptions of your responsibilities for your own continuing professional development
   b. The multiple data sources that you use in making such judgments
   c. Professional growth goals for the coming summer and pending academic year
   d. Steps you plan to take toward meeting those professional growth goals.

3. Complete the attached Graduate Student Self-Assessment Form and turn it in with your examination. Be sure and give yourself a letter grade as requested.

4. On a separate sheet of paper to be turned in in an anonymous manner, please give evaluative feedback on the consortium activities in the interest of improving them in subsequent offerings. Please give attention to such items as the meeting cycle spread out over the academic year, the topics which were presented, the identified special topics pursued on an individual basis, and the end-of-course sharing activities. Please feel free to extend beyond this list of suggested items in the interest of improving the course and the instructors/presenters.
A basic purpose of continuing education units at institutions of higher learning is to extend educational programs to individuals, groups and agencies. Historically, continuing education units have served as catalysts for fostering innovative delivery systems for institutional academic programs. Through the cooperative effort of the University of Alabama College of Education and seven local school districts, the Division of Continuing Education was able to develop the previously described delivery system to accommodate the needs of learners at remote locations.

During the entire developmental process, continuing education personnel kept two fundamental principles in the forefront: (1) provide relevant programs and (2) deliver the best quality programs possible. The University of Alabama Division of Continuing Education has long since determined that two factors play the most important roles in the success of any program designed for adult/part-time learners—relevance and quality. In regard to relevance, the local education agencies also were committed to providing program offerings based on the perceived needs of participants.

As is the case with all Continuing Education programs, the annual needs assessment played an important role in identifying topics have relevance to Consortium participants. The needs assessment instruments have been modified on an annual basis predicated on the idea of gathering the specific needs of participants. A longitudinal analysis of inservice session topics reveals a trend of movement from the general to the specific. For example, during the first year of the Consortium operation general topics such as "Math for The Elementary Teacher" and "Teaching Reading in the Elementary School" were common. Session topics became much more specific during the 1981-82 Consortium. For example, "Teaching the Math Concepts of Money and Time" and "Teaching Consonant Blends in Elementary Grades" were typical
of the session topics listed. This information is important to continuing educators, and for that matter, all academicians, in that specifically stated session topics allow participants to more appropriately distinguish those sessions that are relevant to them personally. More importantly, specific session topics permit presenters to more adequately focus on small segments of content for delivery in the short time allotted. Relevance, to many teachers, means focusing on the basics of teaching concepts and skills that they can employ in their daily jobs. Adhering to the fundamental belief that valid needs assessment data is the foundation for building inservice programs has played an important role in the success of the Consortium.

From a continuing educator's perspective, quality programming directly relates to factors such as (1) number of participants, (2) duration of program, (3) degree of acceptability and (4) replication opportunities. Generally, participation in non-credit continuing education programs is on a voluntary basis; therefore, programs lacking quality are shortlived. The developers of the Consortium recognized the need for high quality, practical programs. At all Consortium planning meetings, discussions have centered on ways to identify and select the best possible presenters to serve as instructors for various sessions. The selection of Consortium presenters is a responsibility shared by University Continuing Education personnel and the local school district personnel. Throughout all planning meetings, Continuing Education staff members were absolutely committed to obtaining the best presentors possible, whether instructors were employed by the University of Alabama, other colleges or universities, the State Department of Education, or local school districts. The basic criterion for selecting session presentors was that they be knowledgeable in the subject area, able to relate knowledge on a practical level, and capable of attracting the attention of teachers. Evaluation data collected from participants at each session indicate that the careful attention give to selection of presentors has enhanced the quality of programs.

Several positive "spin-offs" have occurred as a result of the intrasystem
dialogue related to Consortium matters. One by-product of the Consortium is the way in which school systems have begun to communicate and plan with each other. Administrators and teachers meet their counterparts from other systems at Consortium programs. They get a chance to compare approaches and learn new ideas being employed in other school districts. Systems begin to see each other not in a competitive, but in a cooperative light. This year, three systems will join together for a combined inservice day involving a nationally known presenter. This past summer, Principals from all five systems met in joint session to discuss plans for implementing new statewide competency regulations. This type of cross-pollination of ideas and cooperative efforts has been a very valuable off-shoot of school systems coming together in an educational consortium.

The Consortium has proved to be an excellent way for the University of Alabama to meet its mandated mission of service to the State of Alabama, and for the Division of Continuing Education to serve non-traditional adult learners who cannot travel to the main campus in Tuscaloosa. By taking educational services to those who need them, the Division has been able to render vital service to groups which would otherwise be without needed resources.
ADOPTED BY ALABAMA STATE BOARD OF EDUCATION AT ITS MEETING ON ____________________

STATE PLAN FOR INSERVICE EDUCATION/PROFESSIONAL DEVELOPMENT

WHEREAS, the State Board of Education currently requires each public school system annually to develop and implement a comprehensive plan for the continuous improvement of the professional personnel in its employ; and

WHEREAS, there exists the need to bring inservice education/professional development programs and related activities to the highest possible levels of adequacy; and

WHEREAS, the State Superintendent of Education has been directed by the State Board of Education to develop a State Plan for Inservice Education/Professional Development which would:

I. Establish inservice education/professional development as an essential and continuous function of a career in education and an extension of preservice preparation;

II. Establish inservice education/professional development as a major priority for improving the competence of those professionally certified employees of the local school systems;

III. Give further emphasis to inservice education/professional development as the mandated responsibility of the local school systems with specifically identified roles for teachers and other professional personnel, institutions of higher education, and the State Department of Education;

IV. Accommodate the establishment and use of up-to-date approaches to meet inservice education/professional development objectives;

V. Accommodate the renewal of professional certification by participants; and

WHEREAS, the attached document contains such a plan and provides for its implementation; and

WHEREAS, the State Superintendent of Education recommends the approval of this plan effective school year 1980-81;

NOW, THEREFORE, BE IT RESOLVED, That the State Plan for Inservice Education/Professional Development contained in the attached document be approved:

AND, BE IT FURTHER RESOLVED, That all plans and policies heretofore approved by this Board, which are not consistent with this State Plan, are by this action rescinded and replaced.

COURSE ENROLLMENT FOR CREDIT

In cooperation with The University of Alabama, seven credit course options are available for the 1981-1982 Northeast Alabama Consortium (pending approval by ACHE). Please check the course(s) below in which you plan to enroll for CREDIT. Students enrolled in courses for credit should plan to complete all the course requirements listed beneath each course title. All credit courses listed below are regular University of Alabama courses. Each 3 semester hour course may apply to selected degree programs or as an elective, with advisor's approval. Credit courses listed below may also be applied to Certification renewal.

GRADUATE CREDIT FEES - Graduate credit fees are $154.00 per 3 semester hour course. Graduate students who have not been admitted to The University of Alabama Graduate School must pay an additional $15.00 application fee. All course offerings are contingent upon sufficient student enrollment. Course fees are payable at the Orientation and Registration Session:

ORIENTATION AND REGISTRATION SESSION - Thursday, September 10, 1981, 6:00 P.M., Marshall Technical School. All students planning to register for a credit course must attend this meeting. Mid-year and Final Orientation Session dates will be determined by course instructors and participants.

__ CEC 592/692, "FIELD WORK IN EARLY CHILDHOOD EDUCATION" (3 semester hours)

COURSE REQUIREMENTS: 1) Attend Orientation and Registration Session 2) Attend 12 sessions. You may choose these from any of the inservice sessions offered. 3) Complete all assignments for each session you attend. 4) Attend Mid-year Evaluation Session 5) Attend Final Evaluation Session. (Total - 15 sessions)

__ CEE 592/692, "FIELD WORK IN ELEMENTARY EDUCATION" (3 semester hours)

COURSE REQUIREMENTS: 1) Attend Orientation and Registration Session 2) Attend 12 sessions. You may choose these from any of the inservice sessions offered. 3) Complete all assignments for each session you attend. 4) Attend Mid-year Evaluation Session 5) Attend Final Evaluation Session. (Total - 15 sessions)

__ CSE 592/692, "FIELD WORK IN SECONDARY EDUCATION" (3 semester hours)

COURSE REQUIREMENTS: 1) Attend Orientation and Registration Session 2) Attend 12 sessions. You may choose these from any of the inservice sessions offered. 3) Complete all assignments for each session you attend. 4) Attend Mid-year Evaluation Session 5) Attend Final Evaluation Session. (Total - 15 sessions)

__ CRD 592/692, "FIELD WORK IN READING EDUCATION" (3 semester hours)

COURSE REQUIREMENTS: 1) Attend Orientation and Registration Session 2) Attend 12 sessions. You may choose these from the Reading and/or Language Arts sessions that are offered. 3) Complete all assignments from each session you attend. 4) Attend Mid-year Evaluation Session 5) Attend Final Evaluation Session. (Total - 15 sessions)

__ CEC 593/693, "WORKSHOP IN LANGUAGE ARTS" (3 semester hours)

COURSE REQUIREMENTS: 1) Attend Orientation and Registration Session 2) Attend 12 sessions. You may choose these from the Reading and/or Language Arts sessions that are offered. 3) Complete all assignments from each session you attend. 4) Attend Mid-year Evaluation Session 5) Attend Final Evaluation Session. (Total - 15 sessions)

__ CEE 593/693, "WORKSHOP IN LANGUAGE ARTS" (3 semester hours)

COURSE REQUIREMENTS: 1) Attend Orientation and Registration Session 2) Attend 12 sessions. You may choose these from the Reading and/or Language Arts sessions that are offered. 3) Complete all assignments from each session you attend. 4) Attend Mid-year Evaluation Session 5) Attend Final Evaluation Session. (Total - 15 sessions)

__ CAR 548, "WORKSHOP IN ART EDUCATION" (3 semester hours)

COURSE REQUIREMENTS: 1) Attend Orientation and Registration Session 2) Attend 12 sessions. You must attend all of the Art sessions. You may choose other sessions from any of the inservice sessions offered. 3) Complete all assignments from each session you attend. 4) Attend Mid-year Evaluation Session 5) Attend Final Evaluation Session. (Total - 15 sessions)
**COURSE ENROLLMENT FOR NON-CREDIT**

Personal employed within the Consortium System may attend inservice sessions on a non-credit basis. No additional fees will be required other than a small fee which will apply to the "Make and Take" workshops. Credit students are also eligible to attend sessions for non-credit in addition to those required for credit course(s). Please circle N/CR to show those sessions you plan to attend for non-credit. (N/CR=Non-credit) Circle only those sessions that you plan to attend in order that a total count of participants can be obtained for each session.

**DIRECTIONS FOR COMPLETING THIS FORM**

1. COMPLETE TWO COPIES OF THIS FORM AND KEEP ONE FOR YOUR RECORDS
2. INDICATE THOSE SESSIONS YOU PLAN TO ATTEND FOR CREDIT BY CIRCLING CR
3. INDICATE THOSE SESSIONS YOU PLAN TO ATTEND FOR NON-CREDIT BY CIRCLING N/CR
4. CIRCLE ONLY ONE OPTION FOR EACH SESSION. CR OR N/CR
5. CIRCLE ONLY THOSE SESSIONS YOU PLAN TO ATTEND!

COMPLETE TWO COPIES OF THIS FORM AND KEEP ONE FOR YOUR RECORDS!
The Northeast Consortium for Professional Development is an association of five school systems: Arab City, DeKalb County, Fort Payne City, Guntersville City, and Marshall County. These systems have joined together as a means of providing high quality in-service training at an economical cost. In its two years of existence, the Northeast Consortium has provided in-service sessions for over 2,000 teachers and administrators. The programs this year, as in previous years, are based on the expressed needs of the personnel who will be attending the sessions. The instructional emphasis will continue to be on the application of theory to ongoing school responsibilities.

All sessions listed below (unless specified otherwise) may be attended by any teacher or administrator who is employed by a member system free of charge.

This year's needs assessment survey revealed that a number of teachers and administrators are interested in obtaining graduate course credit through the Consortium. Please refer to the section labeled "Course Enrollment for Credit" in this form for information regarding credit enrollment.

Please indicate which sessions you will be attending by placing a check mark (✓) on the appropriate line.

**EVENING CONSORTIUM SESSIONS:** Open to all Teachers and Administrators at NO COST.

**Arab High School, September 7, 6-9 p.m.**

- Introduction to Microcomputers - Dr. Robert Beach
- Student Discipline 9-12 - Mr. Richard Rhone
- Remedial Math 4-8 - Dr. C. J. Daane
- Remedial Reader in the Regular Classroom - Dr. David Brown
- Motivation of the Academically Gifted Student - Ms. Marsha Burke
- The Principal's Office and Fiscal Responsibility - Dr. Lanny Gamble

**Marshall County, Alabama Avenue Middle School, Albertville, October 12, 6-9 p.m.**

- Specific Techniques of Student Discipline K-5 - Dr. Barbara Adams
- Increasing Self-Concept and Motivation of the "Average" Student - Dr. Robert Anderson
- Teaching Slow Learners in the Regular Classroom 1-8 - Dr. David Brown
- The Teacher and the Law - Student Personnel - Dr. Kenneth Wilson
- Rest Construction and Grading - Dr. Charles Edmonds
- The Principal and Evaluation of Staff Personnel - Documentation - Dr. Lanny Gamble

**Guntersville, Carlisle Park Middle School, November 2, 6-9 p.m.**

- Student Discipline 6-8 - Mrs. Nell Clem
- Increasing Self-Concept and Motivation of the "Turned-Off" Student - Dr. Jerry Dillard
- Workable Approaches to Remediation - Dr. Jim Saski
- Classroom Management - Dr. Michael Palardy
- The Teacher and the Law - Staff Personnel - Dr. Lanny Gamble
- The Principal's Responsibility in Liability Suits - Dr. Coy Holllis

**Ft. Payne High School, September 28, 6-9 p.m.**

- Student Discipline 9-12 - Dr. Jim Saski
- Increasing Student Motivation and Self-Concept - TBA
- Science Experiments With Little Equipment - Dr. Michael Murphy
- Basic Math Skills - Dr. Patsy Kramer
- Teaching Composition Skills in the Junior High School 6-8 - Ms. Maxine Rose
- The Principal's Office: How to Operate it Effectively - Dr. Lanny Gamble

**DeKalb County, Plainview High School, Rainsville, October 26, 6-9 p.m.**

- Remedial Reading 9-12 - Dr. David Brown
- Student Discipline K-6 - Dr. Michael Palardy
- Increasing the Self-Concept and Motivation of Teachers - Dr. Norman Padgett
- Basic Math Skills 10-12 - TBA
- The Teacher and the Law - Competency Issues - TBA
- The Principal and Student Discipline - Dr. Lanny Gamble
LOCAL IN-SERVICE SESSIONS: Open to all Teachers and Administrators at NO COST.

### Course Enrollment for Credit

In cooperation with The University of Alabama Gadsden Center, credit course options are available for the 1982-83 Northeast Alabama Consortium. Students enrolled in courses for credit should plan to complete all the course requirements listed beneath each course title. All credit courses listed below are regular University of Alabama courses. Courses for credit will focus on the application of ideas gained to ongoing school responsibilities. Each 3 semester hour course may apply to selected degree programs or as elective, with advisor’s approval. Credit courses listed below may also be applied to Certification renewal.

**Graduate Credit Fees** - Graduate credit fees are $157.50 per 3 semester hour course. Graduate students who have not been admitted to The University of Alabama Graduate School must pay an additional $15.00 application fee. All course offerings are contingent upon sufficient student enrollment. Course fees are payable at the Orientation and Registration session.

**Orientation and Registration Session** - Thursday, September 2, 1982, 6-9 p.m., Gadsden Center. All students planning to register for a credit course must attend this meeting. Mid-year and Final Orientation Session dates will also be held at the Gadsden Center.

**CIE 592/692, "Fieldwork in the Improvement of Instruction" (3 semester hours)**

**Course Requirements:**
1. Attend Orientation and Registration sessions.
2. Attend mid-year Evaluation Session
3. Attend Final Evaluation Session
4. Attend other advisor approved sessions to total 45 contact hours including the sessions required above.

**AAP 612, "Problems in School Administration" (3 semester hours)**

**Course Requirements:**
1. Attend Orientation and Registration sessions.
2. Attend mid-year Evaluation Session
3. Attend Final Evaluation Session
4. Attend other advisor approved sessions to total 45 contact hours including the sessions required above.
You are aware that our school system is currently participating in the Northeast Alabama Consortium Inservice Program. Through the cooperation of the six participating school systems and the University of Alabama, we have been able to offer a wide range of timely inservice workshops to teachers and administrators. Evaluations of this year's inservice programs have been very positive, and we are currently planning next year's Consortium inservice program, which will differ in some important ways.

**THIS IS WHERE WE NEED YOUR HELP!** In order to better meet your inservice needs and interests, we would like for you to complete this Needs Assessment Form. Please give your thoughtful attention to this form. Your suggested inservice workshops will form the basis of next year's Consortium program.

- **NAME**
- **SCHOOL**
- **DATE**
- **GRADE TAUGHT**
- **SUBJECTS TAUGHT**
- **DEGREES HELD**
- **AREAS OF CERTIFICATION**
- **SOCIAL SECURITY NUMBER**
- **ARE YOU INTERESTED IN A DEGREE PROGRAM?** If so, list type of degree and area of interest.

One function of the Consortium this year will be to offer workshops during scheduled system inservice days. We are asking you to submit specific workshops that would be of interest to you in the 1982-83 Consortium program. **PLEASE BE AS SPECIFIC AS POSSIBLE!**

<table>
<thead>
<tr>
<th>SPECIFIC TOPIC -- PLEASE CHECK GRADE LEVEL(S)</th>
<th>PRIMARY</th>
<th>ELEMENTARY</th>
<th>MIDDLE</th>
<th>SECONDARY</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUGGESTED TOPIC (S) -- CHECK GRADE LEVEL (S)</td>
<td>PRIM.</td>
<td>ELEM.</td>
<td>MIDDLE</td>
<td>SEC.</td>
</tr>
</tbody>
</table>

**EVENING PROGRAMS.** The Consortium this year will also feature a series of workshops to be held in the evening and/or Saturdays on the University of Alabama campus or at a system location. These workshops will feature both specific and general information and are designed for both teachers and administrators. In the space below, please give some examples of programs you would like to see offered during the evening.

| SUGGESTED TOPIC (S) -- CHECK GRADE LEVEL (S) | PRIM. | ELEM. | MIDDLE | SEC. | OTHER |

It will also be possible to schedule one or more programs to be offered at a System location to meet particular needs. These programs, as all Consortium offerings, would be open to participants from all systems. In the space below, please identify a topic which you would like to see offered in your locale.

We realize that some times are more convenient than others for attending evening sessions. In the space below, could you list some dates and times which would be possible for you to schedule for evening inservice?

| Day of the Week | Time of Day | Preferred Month(s) |

Thank you for your time and interest in completing this form. Your input will enable us to plan a better inservice program for the 1982-83 Northeast Alabama Consortium.

**ADDITIONAL COMMENTS OR SUGGESTIONS ON BACK:**
It is necessary that we have an accurate accounting of all non-credit students who participate in this workshop. Please circulate this form and have each non-credit student provide the requested information.
