The need for vocational and personal attitude training for prisoners has been recognized for many years. In keeping with the commitment to individual prisoner's development, the Florida Department of Corrections developed a program of life skills training for inmates, the Life Skills Overview Module, in cooperation with local community colleges. To evaluate the success of the program, 19 faculty members who served as instructors (facilitators) in the program were surveyed. In addition, site visits were conducted to interview faculty members. A second procedure included the design and evaluation of a feedback workshop for facilitators, attended by the instructors, members of the Life Skills Task Force, and visitors from the Department of Corrections and the community colleges. A third research procedure involved hiring a research consultant who investigated facilitator characteristics, support of the community college and correctional institution, and facilitators' evaluations of training and materials. The evaluation concluded that there was a generally high level of satisfaction among instructors. Individual factors included previous experience in correctional education, sex of instructor, and institutional support. Instructors who felt their students were highly motivated reported greater satisfaction with the outcome. Each instructor recommended that the program be continued and expanded and made recommendations relating to the role of the community college. The report includes the survey instruments, a budget summary, Life Skills Task Force position papers, data on facilitators, feedback workshop data, and suggested specific actions. (JAC)

ACKNOWLEDGEMENTS

We would like to express our appreciation to the staff of the Division of Vocational Education for support of this project which represents significant support of guidance and counseling services with and for prisoners in the state correctional system in Florida. We particularly appreciate the encouragement of Dr. Herbert Rand in our efforts to understand the significance of this project to the community colleges at both Divisional and local levels. Dr. Stafford Thompson also gave us freely of his time; his understandings and insights were extremely valuable to us.

We greatly appreciate the encouragement and cooperation of the members of the Life Skills Task Force: Mr. T.P. Jones, Chairman, Ms. Gloria Ward, Mr. Bernard Cohen, Mr. Ron Jones, Mr. Jim Ivey, Ms. Mary Katherine Beyeslag from the Department of Corrections, Dr. Herbert Attaway from Lake City Community College and Mr. David Ehlert from the Division of Community Colleges. Working as members and adjunct members of the Task Force has been a joy, a challenge and a tremendously satisfying experience for each of us.

Each community college staff person who has served as facilitator of the life skills course has been extremely helpful. For some of them this experience was a significant departure from their customary stance with students. Their names appear in Appendix B.

And last but not least, we appreciate the opportunity to make an impact on a significant service delivered by community colleges to incarcerated persons throughout the state of Florida who so desperately need life skills oriented education and personal and career guidance.

Project Assistant Manager
INTRODUCTION

The need for vocational and personal attitude training for incarcerated persons has been recognized for many years; correction as well as punishment has been a major focus in the state of Florida. In recent years, however, the need is crucial. While in the 1970's the state population increased 41%, the prison population increased 125%. The current prison population exceeds 20,000. The Florida Department of Corrections is keenly aware of its statutory responsibilities to protect the public from those who commit criminal acts, and is also committed to providing the programs and experiences which will enable an individual to restructure his or her own life and return to the community as a productive citizen, as is stated by Mr. T.P. Jones, Special Assistant for Policy Development of the Department of Corrections, in the introduction to the facilitator's manual of the Life Skills Overview Module.

These concerns are shared by the citizens who make up the Florida Governor's Advisory Committee on Corrections, who in 1981 have stated:

"The primary mission of the Florida Department of Corrections is to protect society by incarcerating convicted offenders and supervising offenders in the community on probation and parole supervision. The Department's secondary mission is to offer every offender the education, training, work experience, religious opportunities, and counseling necessary to enable each offender to return to society as a productive and law-abiding citizen."

"All of Florida's citizens must unite not only to deal with the after effects of crime but also to utilize all of its resources in new and bold programs to help prevent crime that begins in your home and in this community and throughout the state."

In keeping with the commitment to each individual prisoner's development, the Department of Corrections has supported for many years several different programs that focused on the self concept and personal growth of incarcerated persons. In 1978 a Task Force composed jointly of representatives of the Division of Community Colleges and the Department of Corrections was called into being to develop one unified program to address the need for skill and attitude training of inmates that might lead to their being more personally and vocationally productive during incarceration and upon release. The Task Force noted the different kinds of needs of the inmate in moving through the period of incarceration and identified 57 life skills necessary for more effective functioning and more responsible exercise of vocational/
educational choices. A module of instruction for delivery during the first six months of incarceration at the permanently assigned institution was developed, with other modules planned for development in the near future. Such instruction was planned for delivery through 15 community colleges to the major correctional institutions throughout the state. An explanatory position paper from the Task Force and a detailed chart of the total program concept appears as Appendix A on this report.

Four community colleges (Manatee, Lake City, Miami-Dade, and Santa Fe) participated in a pilot project in Fall term 1979 at four prison sites with both male and female inmates. No special funds were sought. The feedback from these pilots was incorporated into the final draft of the Life Skills Overview Module. In the second phase of the project, fifteen community colleges sent 23 staff personnel to a "training of trainers" workshop in June 1980 in which the module was introduced and the staff were trained in its facilitation in the prison setting. The first module in Life Skills instruction is being taught at nearly every major correctional institution in the state.

The current proposal covered phase three of this project: The evaluation of the experiences of the community college staff in delivering life skills courses in Fall 1980, subsequent to their attendance at the training workshop, including limited evaluation of the instructional materials. Such evaluations are critical to the further development of both materials and instructional/facilitative strategies for the remaining modules; as well as to the decisions to continue to include life skills courses in community college offerings in the state's penal institutions.
OBJECTIVES

There were three objectives for this project:

(1) To supervise, support, and assist the staff of 15 community colleges in their use of the curriculum, materials, and suggested instructional/facilitative strategies for delivering vocational and attitudinal (life skills) training to incarcerated persons during the first year of operation of a major project involving nearly all of the penal institutions in Florida;

(2) To evaluate the experience of the community college staff in delivering the life skills overview module to inmates in Florida correctional institutions during fall 1980; and

(3) To evaluate and revise the curriculum educational materials and facilitative strategies based on feedback from the instructional staff.

These three objectives overlapped and will be reported on by giving detailed statements of the procedures followed by the staff during the six months of the project’s life, together with results and evaluations as they were elicited. The concluding section will focus upon findings and recommendations.
PROCEDURE #1: CONTACTS WITH INDIVIDUAL FACILITATORS

In order to collect information from those community college staff who seemed as life skills course facilitators in fall 1980, a list of such persons was first compiled from records of the Life Skills Task Forces and from numerous telephone calls to community colleges. The list included names and addresses of 21 facilitators representing 13 community colleges. A table listing the facilitators, the major correctional institutions served by each, together with an information sheet on each facilitator may be found in Appendix B.

Two contacts were made with each facilitator. A letter was sent in December 1980 to each person whose name had been secured, accompanied by an information sheet to be filled out and returned in an enclosed stamped envelope. After a follow-up in January, information was secured from 96% of those facilitators contacted. Copies of the letters and of the protocol may be found in Appendix B.

A second contact was made in January and February 1981 through a site visit made by a project staff member to each community college facilitator. During the personal interview the staff member discussed the life skills course delivery in general, serving as a resource and contact person from the Task Force. An interview protocol developed by the project staff and the research consultant was used to collect relevant specific data regarding the facilitator and all aspects of the facilitation process. The site visit proved to be the most significant component in Procedure #1, as well as in the securing of date which will be reported in the next section.
PROCEDURE #2: FACILITATORS' WORKSHOP

The second procedure for meeting the project objectives was to schedule, design, lead and evaluate a Feedback Workshop for Facilitators which was held in Orlando on March 26 and 27, 1981. Members of the Life Skills Task Force also attended this meeting. Several visitors both from the Department of Corrections and the community college were granted permission to attend; these were persons intending to involve themselves as facilitators in the future and persons interested in the life skills concept as a treatment for incarcerated persons other than those in state institutions. A total of 7 persons were present.

The staff members of this project were in charge of organizing and carrying out the planned agenda for the 1 1/2 day meeting. There were several components: (1) Extensive time for debriefing, that is, for feedback about the experience of facilitation; (2) Reports on the past, present, and future of the Life Skills project; (3) A swap shop for sharing activities and exercises that were particularly effective or ineffective; and (4) A preliminary research report from this project staff based on the data collected from the site visits. A copy of the planned agenda appears in Appendix C.

All persons present were effectively and intensely involved in all aspects of the workshop. Data were collected on the experience of the facilitators as related to the community college, the correctional institution, the students, the materials, and the instructional strategies. The summary of the problem areas and issues from the workshop appear on the following two pages. The summary of action plans and a discussion of these results may be found in the concluding section of this report.

Summary materials compiled from three group sessions (Life Skills materials - unit by unit; Problem areas/issues; and Action plans) were disseminated to all facilitators and Task Force members in April. The cover letter and evaluation of materials appear in Appendix C. Reactions to the workshop itself were uniformly positive: Good support, excellent sharing, good information given, very valuable experience.
Facilitators:
- Appropriate style for such an environment?
- Need to be role model
- Low credibility with DOC system and inmates
- Need skills in developing trust and safe atmosphere
- Had too high expectations - not able to know what to expect
- Need to serve as public relations salesman/administrator as well as instructor/facilitator
- Need to either do their own public relations for the program or call for help to community college or DOC
- Extent of role of facilitator - additional activities may include meetings with college personnel/DOC staff, giving feedback, recruiting other facilitators, helping design new modules

Inmates:
- Low self-esteem plus high (elevated) concepts about self-manipulative, style for survival
- Motivation for attending class
- "Old hands" at this kind of program need incentives
- Need immediate reinforcement for those people behavior programs who are not early incarcerated

Program and Materials:
- Could use handouts and take-home materials
- Need immediate reinforcement: Need advanced modules now (NOW) too WASP - of valuing feelings
- More explanations for some exercises
- Need strategies for adapting to different populations
- Need some "less scary" exercises
- Demand too much self-disclosure and awareness of feelings by students
Program and Material: (Continued):

- Need kit for each facilitator.
- Better if group meets more than once per week - twice or all of one day.
- Anytime different from evening - evenings conflict with activities.
- Should not be seen as rehabilitation.
- Some exercise demand intellectual ability above students' level.
- Credit or non-credit courses.

Evaluation:

- Hard to use the evaluation form.
- The S-20 method is difficult - subjective and arbitrary.
- Checklist of participant outcomes inappropriate.
- Get instructors to devise other methods.
- Need simple, short-term evaluation by instructors and long-term by institution.

B/W and Institutions:

- Logistics for space/time/students/materials/AV equipment.
- Non-human attitudes of guards, etc.
- Recruitment tactics - keep up publicity.
- Interference or interruptions of classes.
- How to develop a confidential and safe atmosphere in prison environment.
- Without repercussions on the compound.
- Transfers of students are disruptive.
- So clarity about the priority level of life skills in the institutional schema.
- Seems as if it needs to be sold or resold.
- Selected versus appreciated versus supported and integrated into programs.
- Staff need to be involved.
- Time lines for life skills.
- Clarify voluntary not mandatory.
- Tee shirts for inmates.

Philosophical Basis:

- Life skills in an aggressive environment.
PROCEDURE #3: RESEARCH

To facilitate an effective research component for this project, the project staff hired a research consultant, Mr. David E. Gray, professor of sociology at Jacksonville University, to assist in the design of the evaluation study, development of the necessary instrumentation, and data reduction. Since there are no other data on this very significant project, a thorough evaluation was undertaken including collection of several kinds of data in several different ways.

Areas investigated were facilitator characteristics (such as educational background, teaching experience, method of teaching, etc.); degree of involvement and support of the community college; degree of involvement and support of the correctional institution; student characteristics (such as motivation, enrollment and completion figures); facilitators' evaluative report of the June training of facilitators; and facilitators' report of the effectiveness of materials.

Data were collected from all participating institutions with the exception of Florida State Prison, Dade Correctional Institution, and DeSota Correctional Institution. Facilitators at these institutions were not available for interview. Lancaster Correctional Institution had two facilitators, each teaching a Life Skills course; one of these two facilitators was not available for interview. Data from Glades Correctional Institution was omitted from the analysis due to the fact that the Life Skills Overview Module delivered there was for staff and not for inmates. Lantana Correctional Institution and Polk Correctional Institution did not participate in the fall 1980 Life Skills Program.

As explained earlier, data from facilitators were collected in two ways; first, by mail and in person in site visits; second, in person at a feedback workshop held in Orlando on March 26 and 27, 1981, to which all facilitators were invited.
The instruments utilized in the study are the Life Skills Information Sheet, the Life Skills Interview Guide, the Supplemental Information Sheet, and the Behavioral Data Sheet. These instruments were designed to collect data on the experiences of the facilitators in delivering the Life Skills Overview Module in Florida correctional institutions during fall 1980. All instruments were developed by this grant staff for the purposes of this study. Copies of the instruments may be found in Appendix D.

The Life Skills Information Sheet was mailed with a cover letter to all individuals who had attended the Life Skills Facilitator Training in Orlando in June 1986. The purpose of this mail-out was to identify the facilitators who had delivered the Overview Module in the fall, inform them of the existence and purpose of this evaluation grant, obtain some preliminary information, and formulate an updated mailing list.

The Life Skills Interview Guide was used to conduct in-depth on-site interviews with the facilitators. The Interview Guide consisted of 52 questions coded for computer analysis. Additional comments were recorded for general information. Interviews were conducted on-site if possible. In a very few cases, data were collected by telephone. Facilitators were interviewed by one of the grant staff members during late February or early March. Interviews ranged in duration from 30 minutes to 3 hours, depending on how much available time the facilitator had and how much the facilitator chose to elaborate on these experiences. In many cases, the interview was the first opportunity the facilitator had to share the successes and problems of the course with an interested listener.

The Supplemental Information Sheet was mailed in April to the same facilitators who were personally interviewed. This instrument consisted of only three questions which were designed to obtain more specific data on the following areas of facilitator experience: How much the facilitator enjoyed teaching the Life Skills course; how valuable the course was to the facilitator in developing new teaching skills; and what aspects of the learning experience were most important to facilitators.

Data from the Life Skills Interview Guide and the Supplemental Information Sheet were collected and coded for statistical analysis. Frequencies were computed on each variable using a subprogram of the Statistical Package for the Social Sciences (SPSS). Frequency distributions on averages were presented at the feedback workshop. These data appear on the following seven pages. Recommendations based on these data appear in the concluding section of this report.

The Behavioral Data Sheet was responded to by facilitators at the Feedback Workshop in February 1981. Fourteen Life Skills facilitators indicated how much of their total class exhibited an increase in fifteen behaviors considered highly adaptable. These data show marked increase in desirable observable behavior. A compilation of these findings appears on page...
First we would like to ask you some questions about your background and training.

1. Name ____________________________

2. What correctional institution are you serving? ____________________________

3. What community college do you work for (name)? ____________________________

4. What is your official position at the community college (title)? Comm Educ Instr (5); administrator (3); Adm/Instr (4); full-time faculty (2); part-time/adjunct faculty (5)

5. What is your age? 41.0

6. What is your race? 17 White
   2 Black
   ___ Hispanic
   ___ Other

7. Sex
   ___ Male 14
   ___ Female 5

8. What is the highest academic degree you hold? 3 BS or BA
   11 MS or MA
   2 Ph.D.
   3 Other (Specify)

9. Have you taught courses in prison previously?
   ___ Yes, human relations courses 6
   ___ Yes, academic courses 6
   ___ No 10

10. Have you previously taught courses that were primarily experiential?
    ___ Yes 14
    ___ No 5

11. What was the main reason you decided to teach this course? (Interviewer should check one of the following):
    ___ Financial reward 1
    ___ General interest 13
    ___ Institutional pressures 2
    ___ Novelty 1
    ___ Job experience 1
    ___ Other (specify) 1
12. How much did you enjoy teaching this course?

<p>| | |</p>

46. Did you use the assessment instrument that was provided?
   Yes
   No

47. Did you have a graduation ceremony at the conclusion of your course?
   Yes
   No

48. Had you taught a Life Skills class previous to this one?
   Yes
   No
49. What day and time did you teach the Life Skills class last fall?
   - once per week: 15
   - more than once per week: A

50. How long was each session?

51. Did you use the certificates for those who completed the course?
   - Yes
   - No

52. What should be the future direction of the Life Skills program?
For each of the following behaviors, indicate the percentage of your total life that showed an increase in each behavior:

- Grooming: 72%
- Eye contact: 78%
- Self-disclosure: 75%
- Active listening: 71%
- Appropriated expression of feelings: 58%
- Reports of appropriate goal setting: 59%
- Arriving on time: 66%
- Showing interest in an additional class: 61%
- Wanting to discuss personal issues with instructor or group members: 66%
- Interaction with other than only closest friends: 33%
- Class participation: 67%
- Empathy: 50%
- Wanting to maintain contact after course is over: 23%
- Creative self-expression through poetry, art work, music, letters, etc.: 43%
- Responding with less hostility: 49%

The results of the research study are suggestive but not conclusive. Two limitations must be noted, however. In the first place, the conclusions drawn from this study are suggestive only due to the small number of subjects (facilitators) participating in the Life Skills Program. The typical problem involved in most studies such as this is the inability to generalize to a larger population. That is not the problem here. The Life Skills Program is an experimental program and, therefore, there is no larger population from which our subjects were sampled. A second limitation in this study is the inability to control for the effects of potentially intervening variables. Several factors appeared to be related to the outcome variables and, given the small number of subjects available for the study, it was not possible to isolate the effects of the different factors.

Despite these limitations, several conclusions may be drawn. First, there was a generally high level of satisfaction reported by instructors participating in the Life Skills Program. Although the participants came from a variety of educational, personal and social backgrounds, there was an almost unanimously high degree of satisfaction reported. This is a finding of considerable significance, given the difficulties encountered by individual participants who experienced varying degrees of institutional support, isolation from colleagues and the problems of teaching in a correctional institutional environment.

Second, there were several individual factors related to the perceived success of the Life Skills instructors. The first of these was previous experience teaching in a prison. Almost all of the respondents who reported exceptionally favorable experiences in connection with the program had not taught in prisons prior to their experience in the Life Skills Program. This outcome was something of a surprise to the authors of the study. It was anticipated that previous teaching experience in a prison would be useful in anticipating and overcoming the inherent difficulties of prison teaching. It was also anticipated that instructors without previous experience would have a harder time adjusting to the prison environment and be less resourceful in dealing with institutional problems when they developed. The expectations certainly were not confirmed in the results of the study.

There may be several reasons for this unanticipated outcome. First, the new experience of teaching in a prison may have been an unusually challenging experience for the instructors. The contact with uniquely different student population may have stimulated new instructional approaches and demanded more involvement than working with more traditional student populations. Second, instructors without previous experience...
may have anticipated more problems in dealing with prisoners and prisons than they actually encountered. This may have also made the instructors' experience more rewarding than they anticipated.

A second variable associated with positive outcomes was the sex of the instructor. Female instructors were disproportionately represented among the participants who reported positive experiences in connection with the Life Skills Program. There is no obvious explanation for this outcome, although there are a variety of possible reasons for this finding, all highly speculative. The most important problem in explaining the effects of sex on the success of the instructor is the small number of participants in the study. Without a larger number of participants it is not possible to control for extraneous factors that might confound the relationship between sex of instructor and the success of the program. This was a particularly troublesome problem with this study because the sex of the instructor was also related to the previous experience of the instructor. In other words, the female instructors in the study were much less likely than the male instructors to have had previous teaching experience in a prison environment. Given the small number of participants in the study, it was not possible to examine the independent effects of sex and previous experience.

A third factor associated with success of the program was the degree of institutional support available. Participants in the program who did not report difficulties with prison officials reported more success with the Life Skills Program than those instructors who reported some kinds of problems with prison officials. Unfortunately, this factor was also associated with the previous experience and the sex of the instructor. Therefore, an analysis of the separate contribution of institutional support to the success of the program was not possible. However, there are obvious reasons to assume that institutional support may be a critical factor in determining the success or failure of this kind of program. Even given the rather tentative findings of this study, there is reason to believe that the successful coordination of educational personnel and prison officials should be a high priority in future programs.

The last variable that was associated with positive outcomes in the study was the level of student motivation. Instructors who felt that their students were highly motivated also reported a higher level of positive outcomes in the program.

To recapitulate, the instructor-participants in this study of the Life Skills Program reported very favorable experiences with the program. Four variables seemed to be particularly related to a successful program: previous teaching experience in prison, sex of instructor, degree of institutional support, and level of student motivation. Given the small number of participants in the study, it is not possible to analyze the independent contribution of any one of these variables to the success of the Life Skills Program.
CONCLUSION & RECOMMENDATIONS

Feedback from instructors was obtained via three methods: questionnaires, on-site interviews and conference participation. Included here is a summary of all the feedback coupled with action-oriented plans for further movement of the program.

All participants questioned found the program to be valuable to both the students and themselves. Each instructor wanted to find ways to insure the continuation of the Life Skills Program and concept. This in itself is an impressive result.

Using this result as a foundation, recommendations were made in the areas of issues relating to inmates, and action relating to correctional institutions. In reviewing these recommendations, it is important to remember that the viewpoint they are offered from is the community college instructor entering the state correctional facility to instruct a class of DOC inmates. A copy of some suggested actions based on statements made at the facilitators' workshop is included in Appendix E.

Recommendations Relating to Community Colleges and Their Role in the Life Skills Program:

1. That a training center, clearinghouse and liaison office be provided for and housed in a community college. The first purpose of this office would be to serve as a training area for all instructors teaching Life Skills. As earlier noted, the experience of teaching in a prison setting is a growthful one. Some special orientation to the unique aspects of this environment was supported. A training office would orient instructors in delivering experiential methodology, overviewing program objectives and effective utilization of materials provided by the DOC.

A second purpose of the office would be to monitor on a regular basis how each community college is delivering the course, passing that information along to others in need of it and coordinating information to make the statewide effort cohesive and smooth.

The third purpose of the office is to pass along information from the DOC Tallahassee office to community college instructors and administrators. This office would assist in developing an accessible, functional communication channel that does not exist presently.

2. That a new orientation program be conducted for all local correctional staff. Emphasis should be given to creating institutional
ownership and responsibility for the program. At least two designated
staff should be responsible for Institutional coordination of the
Life Skills Program. Most instructors strongly advocate immediate
staff training. This would be Life Skills classes for staff
covering the same material as the inmate classes. Experimentation
that has been done in this area was met with favorable results.

1. That the Department of Corrections develop and adopt a
clear policy statement on the worth of Life Skills participation as
it relates to gain time.

4. That the Life Skills modules be expanded as planned.
Each area in the Overview Module should be developed into a compre-
henive course. Reinforcement of new behaviors through follow-up
courses is seen as essential. All materials should be revised
periodically to insure freshness, goal achievement and relateability.
Successive modules should incorporate more handouts and worksheets.

In conclusion, these recommendations were offered with utmost
support for Life Skills Program by community college Instruc-
Life Skills Task Force members and project staff.
The budget of $15,375 was funded to develop and carry out an evaluation of the experience of community college staff who served as facilitators of the Life Skills courses held in major Florida state correctional institutions in Fall 1980. The subcategories, as approved originally, were as follows:

- Personnel $10,875
- Travel $2,000
- Other expenditures $500

One budget amendment was submitted which transferred the $500 for Other Expenditures (printing) to Travel to cover additional trips the project staff have made and will make in disseminating the results of the project. Printing of the Final Report for dissemination will be done at the Department of Vocational Education in Tallahassee.

A general statement of the subcategory expenditures is as follows:

The Personnel budget covered salaries for the project director, $1,000; the project manager, $5,000; the project assistant manager, $3,375; research consultant, $500; and secretarial services, $1,000.

The Travel budget was spent in making site visits to thirteen community colleges in the state, in travel to planning and evaluation meetings of the Life Skills Task Force, and to the Feedback Workshop.
APPENDIX A

LIFE SKILLS TASK FORCE POSITION PAPERS
Considerable funds and resources are directed into efforts at institutions in the Florida Department of Corrections to provide "human relations" training for inmates. A joint Department of Corrections and Division of Community Colleges Task Force was appointed to assess problems and recommend solutions to resolve problems of widely varying, unarticulated human relations efforts. The Task Force has identified problems related to these human relations efforts:

- There is no consistent Departmentwide human relations program.
- There are no specific guidelines for the development or operation of human relations programs.
- There is no unifying philosophy or theory for existing human relations training efforts.
- Human relations training episodes come and go. Some institutions have a high level of such effort while others have little or none.
- Attempts to empirically evaluate such programs have relied on questionable dependent variables and have used questionable field research methods.
- Content is widely varied ranging from intensive encounter type sessions to "great books" studies.
- The funding base for such programs has been a shifting patchwork of declining general revenue funds, fee waivers, service contract swaps, small grant funding, volunteer time, and so on.

To resolve these problems, the Task Force adopted the "life skills" approach to human relations training. Based on social learning theory, life skills such as goal setting, listening, finding a job, problem solving, establishing supportive relationships, and many others, are identified and taught using discovery and experiential methods.

The Task Force identified eight principles to guide the development of the "Life Skills Program."

1. The program is based on the principles of social learning theory that individuals can and do interact with their environment to benefit both themselves and their communities.
2. The program is ultimately intended to reduce recidivism, but reduced substance abuse, improved social relationships, improved problem solving ability, improved self-concept, and other such effects would justify the program.

3. The program is intended for all incarcerated individuals with the exception of those who for security, disciplinary, or psychological reasons cannot participate.

4. The program has seven district target groups with different needs. For example, the needs of an inmate entering a prison facility are very different from an inmate approaching release from a community correctional center's work release program.

5. The program has seven integrated content episodes, one for each of the seven target groups.

6. Community college instructors trained in the social and behavioral sciences are providers of the Life Skills Program.

7. The program is ideally offered as non-credit college courses.

8. Full implementation of the program will involve 20,000 inmates in 76 prison facilities and 28 community colleges.

The Task Force also set priorities.

1. Focus first on the needs of inmates in the major prison facilities, starting with inmates who are in their first six months of incarceration.

2. Write a standardized content manual which includes objectives, content suggestions and options, and methods of evaluating learning.

3. Field test the manual to determine the adequacy of the content and the ability of the inmates to learn the indicated life skills. Identify and resolve administrative problems and test the materials with youthful offenders, women offenders, and offenders in higher security prisons in different Departmental regions.

The current status is that the first draft of a content manual for the "permanently assigned" target group has been filed tested. Four correctional institutions and the community colleges which serve them have participated in the field test.
Several results and benefits are considered important.

- Determine how well the Program can adhere to the eight principles outlined by the Task Force. Community colleges approach their decision according to a number of influences, so some colleges have to offer the content for college credit. The program is intended for all inmates, but some may have to be excluded for yet undefined reasons. Whether or not instructors can effectively execute the experiential and discovery methods indicated by social learning principles is also important.

- Determine if uniform Life Skills Program content can be successful in four different correctional institutions. The proposed content has uniform objectives. It is expected that instructors will be able to use the material effectively and be able to agree on appropriate revisions.

- Determine and resolve administrative problems. Scheduling, funding, inmate attendance, inmate absenteeism, classroom distractions due to noise, heat or other annoyances, public and political sentiment and other such factors will be assessed to determine the administrative viability of the program.

- Determine if the content is applicable to different demographic groups of offenders. The appropriateness of the objectives and content will be assessed for youthful offenders, women offenders, and older, medium risk inmates.

- Determine if inmates can learn the indicated life skills. Assessments will be made for each life skill as well as the overall content objectives.

- Orient a core of instructors in the principles and methods of Life Skills Training. The field test instructors are expected to be important in training other instructors as more components of the Life Skills Program are implemented.

- Print a revised Content Manual. The educators who devised the manual feel revisions are necessary. A final version of the manual will be printed for widespread implementation.
DIAGRAMS OF THE TOTAL LIFE SKILLS PROJECT

**Time Line**

R & O

- Introduction to Life Skills Module

First Six Months

Advanced Modules - home community orientation

Overview Module

Advanced Modules - life, 25 year mandatory

**Phases of the Program**

I. R & O

- Introduction

- 1 wk - 6 wks

- Emphases:
  1) survival motivation
  2) adaptation to prison problem solving

II. Overview

- Life Skills List - Sections I, II, III in depth; Section IV in depth

III. Advanced

- a. short
- b. long

- Prior to release on parole, MCR or probation or expiration of sentence

IV. Pre-Release

- CCC or adjustment centers

- Life Skills list: Section V plus

V. Work-Release

- Life Skills List - Section V

- Work with family, volunteer support groups, community agencies, churches, probation & parole officer

VI. Parole

- Same as probation

- 6000 persons; average 25 mos.

Brevard Community College

Vern Jansen taught Life Skills in the fall at Brevard Correctional Institution. His first class consisted of 20 youthful offenders. Brevard Community College offers the course through their Continuing Education Department for non-credit. Vern is currently teaching his eighth course on a 3 hours a day, 3 times a week, 5 weeks schedule.

Broward Community College

Bobbie Jackson was the Life Skills facilitator in the fall at Broward Correctional Institution. There were 26 women in her fall class which met for one evening a week for 15 weeks. Bobbie is currently teaching another Life Skills class at Broward Correctional Institution. Life Skills is being offered for transferable credit through Student Development.

Central Florida Community College

Koxanne Miller has been teaching the Life Skills Program at Florida Correctional Institution. She has taught several sections with enrollment averaging 30 women per section. She has offered the class in a variety of time schedules - morning, afternoon and evening, all twice a week for 9 weeks.

Paul Waugh is delivering the program at Marion Correctional Institution. He is currently offering his second course.

Central Florida Community College offers Life Skills through their Community Services Department for non-credit.
Chipola Community College

Brenda Evans had a class of 22 men during the fall at Apalachee Correctional Institution. The course is offered for transfer credit through the Vocational Education Department at Chipola. The course was offered one evening a week for 15 weeks. Brenda is currently teaching a second course. This time she is working with a co-instructor, Garry Brunson, and both find it working better.

Edison Community College

Lavada Baggett taught Life Skills in the fall to a class of 15 inmates at Hendry Correctional Institution. The course was offered for non-credit through the Community Education Department at Edison. Lavada taught the course one evening a week. The course is currently not being offered at Hendry Correctional Institution.

Indian River Community College

David Thompson and Chuck Kitzmiller are teaching a combination of Life Skills and Employability Skills at Indian River Community College. They are currently teaching their fourth course to youthful offenders on a 8:00 a.m. - 12:00 noon - 2 week schedule. This credit course is being offered through the Public and Industry Services Department at Indian River Community College.
Lake City Community College has delivered the Life Skills Programs to several institutions. They offer the course for institutional credit through the Career Education Division. A list of facilitators, schedules, and institutions served follows:

Lake Sumter Community College

Mike Sheets is delivering the Life Skills Program in both Lake Correctional and Sumter Correctional Institutions. He has delivered several courses in various time schedules. Those schedules run the gamut from morning to evening, twice a week. Life Skills is being taught as a credit course through the Co-operative Education Department at LSCC.
Paul Culterra delivered the Life Skills Program to 21 youthful offenders at Hillsborough Correctional Institution. The course was scheduled one evening a week for fifteen weeks. Life Skills was offered for transferable credit through the Co-operative Education Department. The program is currently being offered at Hillsborough Correctional by a co-worker of Paul's.

Palm Beach Junior College

Sandy Richmond taught Life Skills to a class of 17 staff members at Belle Glade Correctional in the fall. The course was offered through the Community Education Department and was a non-credit offering. The course was offered two afternoons a week for 74 weeks. Sandy is currently preparing to do a similar course for staff members at Lantana. Lloyd Spiro began teaching Life Skills Overview to inmates at Belle Glade Correctional winter semester.

Santa Fe Community College

Saint Elmo Cherry taught Life Skills in the fall to a co-ed group of 14 probation and parole students. This credit course was taught one evening a week for 15 weeks.

Don Mott was the Life Skills facilitator during fall semester for fourteen inmates at Lawtey Correctional Institution. The schedule was one evening a week for fifteen weeks. Both courses were taught for transfer credit through the Human Services Program at SFCC.

Currently Santa Fe is continuing to offer the course at Lawtey Correctional Institution through the Community Education Department. Karen Leathers is the current facilitator.
South Florida Junior College

Gene Statler taught Life Skills in the fall at Avon Park Correctional Institution. The course was offered as credit through the Vocational, Technical, Adult Education Department. Gene taught the course one evening a week for fifteen weeks. There were seventeen class participants.

Tallahassee Community College

Ed Baxter taught Life Skills during fall semester to a class of 18 inmates at River Junction Correctional Institution. The program is being offered non-credit through the Community Education Department at TCC. The course was offered one evening a week for 15 weeks. Ed is currently facilitating a second Life Skills class.
December 15, 1980

Dear Life Skills Facilitator:

We are writing to notify you that we have been contracted through Vocational Education funds to evaluate the Life Skills training that community college instructors were given last June and to coordinate the delivery of the courses you are now facilitating in Florida penal institutions. We want to know how you are doing and to be of help if you need us.

Our plans are to make a site visit in January or February to each community college that is serving an institution. We will be available to you for consultation and will also be collecting data from you on your experience. Data will be organized and incorporated into a written report describing the experiences of working with incarcerated persons. We exist as a support system and information center for the network of Life Skills facilitators throughout the state. We will be hosting a workshop, tentatively planned for late March, to provide a time and setting that facilitators can gather to share experiences and review curriculum and materials.

We will be contacting you early in the year to set up site visits. Enclosed is an information sheet that will inform us as to what is currently taking place with Life Skills. Please return that to us no later than January 3. One of the things we hope to eventually do is to set up a common course number for Life Skills across the state.

Any of the three of us can be reached by calling Santa Fe Community College: 904/377-5161, ext. 221. We look forward to our continuing contact with you.

Sincerely,

Lu Ramey, Grant Director

Pat Korb, Grant Coordinator

Karen Leathers, Grant Associate Director

PLANNED AGENDA

Thursday, March 26

9:00 a.m. Introductions and Announcements
    History and Perspectives
    Division of Community Colleges: Dave Ehlert
    Department of Corrections: T.P. Jones

10:00 a.m. Debriefing Session

10:50 a.m. Break

11:00 a.m. Reports from the Debriefing Session
    Designating of Major Issues

Noon Lunch

1:30 p.m. Scope of Life Skills Project: Pat Korb, Santa Fe
    Community College, Task Force Member

2:00 p.m. Critical Issues Session I

3:00 p.m. Break

3:10 p.m. Critical Issues Session II

After 4:15 p.m. Free for Special Activities

Friday, March 27

9:00 a.m. Greeting: Paul Cultrera, Manatee Junior College, Task
    Force Member

9:30 a.m. Swap Shop Session

11:00 a.m. Break

11:15 a.m. Research Report: Evaluation of Training - Pat Korb,
    Lu Ramey, Karen Leathers, Santa Fe Community College

Noon Lunch

1:30 p.m. Futures for Life Skills: Task Force Members

2:15 p.m. Closing Remarks: T.P. Jones and Dave Ehlert

2:45 p.m. Close
Dear Life Skills Facilitators and Task Force Members:

Enclosed are summary materials from three different group sessions:
1) Life Skills materials (unit by unit); 2) Problem areas/issues; and
3) Action plans for problem areas/issues.

Much good sharing resulted from this conference. Not only were
questions formulated, but in many cases, answers and action plans were
formulated! Each of us will be struggling with some of these questions
as we return to our local sites; however, we know, as a result of this
conference, that efforts are being made to work out the problem areas.
The conference truly was a linking process, drawing on the knowledge and
experience of many.

We hope to see you all again in the not too distant future!

Sincerely,

Luellen Ramey

Overview Module - Unit by Unit Feedback

Unit I - Understanding Life Skills

Exercise 1:

1. "Refiners Fire"
   - Needs some explanation to the class
   - Classes get different interpretations from it
   - Sometimes two viewings are needed
   - Understood better later in the course
   - Facilitator preparation needed to guide constructive discussion

2. "Name Game"
   - Generally good response
   - A little too "upbeat" for some instructional styles

3. "List Life Skills"
   - O.K.
   - Used on an overhead projector helps
   - The word inmate can be offensive
   - Some facilitators build their own list with the class before showing or referring to this list
   - Can be called a Survival List

4. "Introducing Life Skills"
   - Generally used as a handout
   - Overhead projector

5. "Group-Conversation: Discussion Starters"
   - Most facilitators don't use this exercise, the one's that do find it generally good

6. "Relating Personal Experiences"
   - Favorable reaction from the facilitators using this exercise. Only about half had used it

7. "Ten Stages of Grief"
   - Questionable value, sequencing odd, just doesn't fit for most instructors

Unit II - Self Introduction

Exercise:

1. "Peter-Paul: Getting Acquainted"
   - Many facilitators use this with good results. They do however use it in Unit 1, oftentimes
Unit II - Self Introduction (Continued)

2. "Coat of Arms"
   - Very positive, widely used

3. "Coat of Arms"
   - Very positive, widely used

4. "Rosebush Identification"
   - When used these exercises are modified.
   - Some facilitators accompany them with music they bring in
   - The verbage is changed to bring it more to participants level

5. "Fantasy Journeys"
   - Often there is not room to fully relax
   - Some imagery and relaxation training seems necessary before these fantasies can be really effective
   - Many students resistant to closing their eyes, etc.
   - Several facilitators bypass these exercises

6. "Circles of Privacy"

7. "Who Are All Those Others? And What Are they Doing In My Life"

8. "My Declaration of Self Esteem"

9. "People and Experiences That Made Me Me"

10. "It Takes Courage to Grow"

11. "Every Person's Bill of Rights"

- Generally an excellent exercise

- Often zeroxed, passed out, read and reacted to with good results

- Often used with positive results
- Some shift and use this in the Values Clarification unit

- Some feel this is inappropriate and don't use it. Some use it with positive results. Most instructors don't use it

- Generally used and produces controversy and discussion among group members
Unit III - Self Assessment

Exercise:

1. "A High Score: Two Dozen Things I Like to Do"
   - Widely used with good results

2. "Values Love List"
   - Widely used with good results

3. "Discoveries"
   - Several people don't use this
   - Those that do may use it throughout the curriculum

4. "Incomplete Value Sentences"
   - Widely used with good results

5. "Values Auction"
   - Widely used with excellent results

6. "Is It Always Right to Be Right"
   - Generally used and generally liked

7. "Walls and Walls"
   - Generally used and generally liked
   - Needs explanation before and after

8. "Irrational Ideas/Rational Alternatives"
   - Highly dependent on group attitude, needs a lot of background information
   - Takes skill to process so that the group understands

9. "Decision Making Strategies"
   - Facilitator's manual needs more information and description of the model
   - Generally used with good results
   - Suggested for a later unit

10. "Short Term Goal Setting"
    - Generally favorable reaction, suggested for a later unit

11. "R.I.P."
    - Moderately used but those that use it find it good with interesting results

12. "Zones of Awareness"
    - Generally not used
    - Better alternatives suggested

13. "Six Ways That I See Myself"
    - Used with positive response
    - Suggested to limit exercise to three ways instead of six

14. "Basic Preferences"
    - Not used, doesn't seem to fit here
15. "Epitaph"

- Seldom used but those that use it find it good

Unit IV - Communication Skills

1. "Walls and Walls"
   - Generally used and generally liked
   - Needs explanation before and after

2. "Communication Process Model"
   - Good to excellent reaction among instructors
   - Needs a lot of role modeling
   - Facilitator's manual needs more information and explanation

3. "A Value Dyadic Encounter"
   - Those who have used it have experienced problems

4. "Rumor Clinic: A Communications Experiment"
   - Frequently used with good results

5. "The Robbery - Pass it On"
   - Used frequently with good results

6. "Communications Successes and Failures"
   - Stimulates good group discussion
   - Careful processing needed

7. "Conditions Which Hinder Effective Communication"
   - Often passed over, but when used it gets a favorable reaction

8. "Role and Reversal"
   - Mixed reactions
   - Often used with a lot of variation

9. "Thinking and Feeling"
   - Valuable information
   - Needs to be presented in a much more interesting way
   - Mixed reactions from facilitators

10. "Feeling Words"
    - Mixed reactions, from great to negative

11. "Collage of Feelings"
    - Generally unused
    - Where used it has good results and involves the group well

12. "Feeling and Content: Dear Abbie"
    - Fair to good reactions from facilitators

13. "Paraphrasing and Direct Restatement"
    - Used often and students like it
Unit IV - Communications Skills (Continued)

14. "Reflection of Feelings" - Mixed reactions
   - Difficult for students

15. "Nonverbal Communication: A Collection of Activities" - Excellent exercise and excellent results

16. "Nonverbal Communication: A Collection" - When used this exercise is often modified, results are good

17. "Strategies of Changing: A Multiple Role Play" - Seldom used, when used this exercise has good results
   - Modified by having students conduct the exercise

18. "Not Listening: A Dyadic Role Play" - Generally unused

Unit V

1. "Group-on-Group: A Feedback Experience" - Often used with reactions varying from mixed to extremely positive

2. "Young/Old Woman: A Perception Experiment" - Reactions to this varied drastically. Some facilitators said it's terrible and never use it and many thought it was an excellent stimulus

3. "One Way - Two Way: A Communications Experiment" - When used there are generally favorable reactions

4. "Broken Squares: Nonverbal Problem Solving" - Varied reactions to this one: many think it is excellent, some think it's too hard for students and some think it's too much preparation for instructors

5. "Changing Questions to I Statements" - Many facilitators dislike this set of exercises

6. "I Have To - I Won't" - Some use them with good results

7. "I Can't - I Won't"

8. "Statement:: It-You-We-I"
Unit V (Continued)

9. "Communications Process Model"
   - See previous unit

10. "Is It Always Right to be Right"
    - See previous unit

11. "Isolation"
    - Used moderately with mixed reactions

12. "Attributes of Stereotypes"
    - Used often with excellent reactions

13. "Anonymous Problems"

14. "Interpersonal Communication Inventory"
    - Seldom used

Unit VI

1. "Decision Making Strategies"
   - See previous unit

2. "Central Values"
   - Seldom used, repetitive

3. "Force Field Analysis of Goal Behavior"
   - Manual needs clearer explanation
   - Hard for students to understand
   - Works well if the time is taken for thorough understanding
   - Difficult to use
   - Must push students
   - Worth the hard work

4. "Teach a Life Skill"

5. "List Life Skills"
   - See previous unit

6. "Bring Along a Friend"
   - Suggested to move to Unit 7
   - Institutional support is critical

7. "Guidelines for Setting Long Term Goals"
   - Used often with good results

8. "The Refiner's Fire"
   - See previous unit

9. "Kurt Lewins, Force Field Analysis"
   - Not used because the materials were presented earlier
Unit VI (Continued)

10. "Brainstorming: A Problem Solving Activity" - Out of sequence, brought in earlier

Unit VII

1. "The Giving Tree" - Mixed reactions from poor to excellent

2. "Wrap-Up" - Often used, generally favorable reactions

3. "Six Ways That I See Myself" - See previous unit

4. "The Gift of Happiness - Experiencing Positive Feedback" - Generally not used but the facilitators that use it think it is a wonderful wrap-up

Some Additional Exercises, Techniques, Etc.

Films:
- "How We Become Ourselves" - Introduction to personality development
- "Men's Lives" - how males are enculturated
- "Communication Skills" - slides
- "Gestures, Expressions & Body Language" - slides
- "Teacher Effectiveness" - Teaches listening skills
- "Prejudice & Perceiving" - film with Ed Asner
- "Bill Cosby on Prejudice" - film
- "Eye of the Beholder" - film
- "What You Are is Where You Were When" - 7 hour video

Exercises:
- "Survival List" of skills needed for effective living
- "Animal Identification" - what kind of animal and why they would be that animal
- Imagery Practice before fantasies - Feifer & Jones 'Lemons Balloons & Books'
- "Share Nonverbally How Your Day Went"
- From magazines cut and past on a sack outward pictures of yourself. Inside the sack past inward pictures of who you really are
- Life is a B-I-T-C-H
- "Relaxation Response"
- "Erroneous Zones" - eye
- "The Trial" - set up characters, write script, pick director and present to guests at the end
- Covered dish supper at the end
- Invite other classes from Community College in for the wrap-up
- Have Rotary Speakers, community leaders, etc.
- Present life histories of inmate success stories
- Bring in music
- Big Mac's at graduation
- Have students present poems, songs, etc.
- at graduation
- Use certificate of completion Community College in addition to regular Life Skills certificate
- Invite your college administrator's to graduation
APPENDIX D

RESEARCH INSTRUMENTATION
Life Skills Interview Guide

First we would like to ask you some questions about your background and training.

1. Name _____________________________

2. What correctional institution are you serving? _____________________________

3. What community college do you work for (name)? _____________________________

4. What is your official position at the community college (title)? _________

5. What is your age? __________

6. What is your race? ______ White

Black

Hispanic

Other

7. Sex ______ Male

Female

8. What is the highest academic degree you hold? ______ BS or BA

MS or MA

Ph.D.

Other (Specify)

9. Have you taught courses in prison previously?

____ Yes, human relations courses

____ Yes, academic courses

____ No

10. Have you previously taught courses that were primarily experiential?

____ Yes ______ No

11. What was the main reason you decided to teach this course? (Interviewer

should check one of the following).

____ Financial reward

____ General interest

____ Institutional pressures

____ Novelty

____ Job experience

____ Other (specify)
12. How much did you enjoy teaching this course?

- Very much
- Somewhat
- Didn't enjoy it

13. What did you enjoy most about the course?

- Interacting with students
- Use of new materials
- Experience teaching in prison
- Experimental course format
- Students progress in class
- Additional income
- Relief from other duties
- Other (Please specify)

14. Did you attend the two-day training session in Orlando?

- Yes
- No

15. If yes, how would you evaluate the overall usefulness of the training session?

- Very useful
- Somewhat useful
- Not useful
- Does not apply

16. In terms of its length, would you say that the training session was:

- Too long
- About right
- Too short
- Does not apply

17. In terms of its materials and methods, would you say that the training session was:

- Exceptional
- Adequate
- Inadequate
- Does not apply

18. How would you evaluate the format of the training session?

- Very good
- Fair
- Poor
- Does not apply
19. Did you receive financial support from your community college to attend the training session in Orlando?

---
Yes
No
Partial
Does not apply

20. How would you evaluate your experience teaching the Life Skills course in prison as a personal learning experience?

---
Very valuable
Somewhat valuable
Not valuable

21. How would you evaluate this course as a learning experience for the students?

---
Very valuable
Somewhat valuable
Not valuable
Don't know

22. In teaching Life Skills, what percent of each of the following methods did you use?

---
Didactic
Experiential
Discussion
100%

23. How were instructors from your community college recruited for the Life Skills program?

---
By the administration
Department heads
Community education
Other instructors
Other (Please specify)

24. Who was responsible for supervising the Life Skills program at your community college?

Name ________________________________
Position ________________________________
Department ________________________________

25. What department at your community college was responsible for directing the Life Skills program?

Department ________________________________
26. Did your community college accept work in the Life Skills program as a credit course for the students? (Please indicate course number).

- Yes, transfer credit (Course #: __________)
- Yes, institutional credit (Course #: __________)
- No, non-credit

27. Has your college shown any interest in teaching Life Skills on campus?

- Yes
- No
- Don't know

28. How supportive of the Life Skills program was your community college administration from your point of view?

- Very supportive
- Somewhat supportive
- Not supportive
- Don't know

29. How many students were initially enrolled in your Life Skills course?

- (Number)

30. How many students completed the course?

- (Number)

31. How many of your students who enrolled in the course were in their first six months of their incarceration?

- (Number)
- Don't know

32. How many of your students who enrolled in the course had had some previous experience in a motivational program?

- (Number)
- Don't know

33. How would you rate the previous skill level of your students?

- Good
- Fair
- Poor
- Wide range
- Don't know
34. What factors accounted for most of your dropouts?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

35. How did you deal with non-literate students?

- No special method
- Used only verbal exercises
- Used symbolizing exercises
- Individual attention by instructor
- Individual attention by other students
- Excluded non-literate from exercises
- Other (Please specify)

36. How many of the students enrolled in your course were:

- White
- Black
- Hispanic
- Other
- Don't know

37. How would you describe the motivational level of your class?

- High
- Moderate
- Low

38. Was there a need for bilingual instruction in your course?

- Yes
- No

39. Would you be interested in teaching this course again?

- Yes
- No

40. If you did not attend the training session did you receive some other kind of training?

- Yes
- No
- Attended training

41. If yes, what kind of training was it?

________________________________________________________________________

________________________________________________________________________
42. Was this training adequate?
   _____ Yes
   _____ No
   _____ Does not apply

43. Were you the only instructor in your course or did you have an assistant or co-instructor?
   _____ Only instructor
   _____ Had assistant or co-instructor

44. Generally, how would you evaluate the instructional material for the course?
   _____ Very good
   _____ Good
   _____ Fair
   _____ Poor

45. Estimate how much of the materials you used in each category for each unit.

46. Did you use the assessment instrument that was provided?
   _____ Yes
   _____ No

47. Did you have a graduation ceremony at the conclusion of your course?
   _____ Yes
   _____ No

48. Had you taught a Life Skills class previous to this one?
   _____ Yes
   _____ No
49. What day and time did you teach the Life Skills class last fall?

50. How long was each session?

51. Did you use the certificates for those who completed the course?
   Yes
   No

52. What should be the future direction of the Life Skills program?
1. Your Name: ________________________________

2. How much did you enjoy teaching the Life Skills course?

   1 2 3 4 5 6 7 8 9 10
   Not at all: ____: ____: ____: ____: ____: ____: ____: ____: ____: ____: Very much

3. How valuable to you was the Life Skills course in directly developing new teaching skills?

   1 2 3 4 5 6 7 8 9 10
   Not at all: ____: ____: ____: ____: ____: ____: ____: ____: ____: ____: Very much

4. What aspects of the learning experience were most important to you. Please rank 1, 2, 3 - 1 is the most important.

   ___ Working with non-traditional students
   ___ Personal insights and attitudes
   ___ Teaching skills; experiential
   ___ Teaching skills; class discussions
   ___ Understandings of prisoners, prison culture, and correctional systems
   ___ Impact on students' lives
   ___ Response from students
   ___ Other (specify) ________________________________
   ___ None of the above

Thank you for your immediate response.
BEHAVIORAL DATA SHEET

For each of the following behaviors, indicate the percentage of your total class that showed an increase in each behavior.

- Grooming
- Eye contact
- Self-disclosure
- Active listening
- Appropriate expression of feelings
- Reports of appropriate goal setting
- Arriving on time
- Showing interest in an additional class
- Wanting to discuss personal issues with instructor or group members
- Interaction with others than only closest friends
- Class participation
- Empathy
- Wanting to maintain contact after course is over
- Creative self-expression through poetry, art work, music, letters, etc.
- Responding with less hostility

Your Name: ____________________________

Correctional Institution Served: ____________________________
APPENDIX E

SUGGESTED SPECIFIC ACTIONS,
FACILITATORS' WORKSHOP
Action on Critical Issues Relating to Inmates

1. Inmates need to know how Life Skills relates to "life" - in prison and in life.
   a. Consider additional information in books
   b. Individual "testimony"
   c. Group process

2. Inmates need to know what they get out of Life Skills. What are the "pay-offs"?
   a. College credit
   b. Gain time
   c. College certificate
   d. Possibility of co-facilitating
   e. Privileges
   f. Grades
   g. Individual progress form

3. Inmates need to know what they have to do versus what they can choose to do. (What part of Life Skills is voluntary?)
   a. Attendance requirements
   b. Participation requirements
   c. What is the expectation in terms of mastery of skills?
   d. What outside efforts are required? (Goal setting, teaching a skill, etc.)

4. Inmates need to know what priority to give to Life Skills - i.e., is it better than AA but less important than "group" or Jaycees?

5. Inmates need the benefit of the total image of the Life Skills Program.

6. Facilitators may need to address (or at least be aware of) the following inmate concerns:
   a. Inmates are now in - they want out
   b. Sexual issues - Overview Module doesn't address
   c. Racial issues
Action on Critical Issues Relating to Community Colleges

1. Need to put together funding needs through corrections superintendents documenting their requests for services.
2. Put together lobbying effort for legislative funding.
3. Increase communication with community college administrations about Life Skills.
4. Send training needs and inmate needs letter to Division of Community Colleges from Department of Corrections.
5. Should facilitators be only Community College instructors and not from DOC? If so then an official statement needs to be made.
6. Common course number needs to be obtained for those institutions offering Life Skills for credit. Designate an institution and get it through.
7. Somehow get Life Skills in front of Community College Boards of Trustees for information sharing.
8. Instructors needing and not getting travel money should see if travel is allotted. If so, they should become advocates for themselves and present their cases to administration.
9. Strengthen the exchange of services, understandings, and offerings.
10. Correctional officers training should include Life Skills.
Summary of Action Plans

Action on Critical Issues Relating to Correctional Institutions

1. Regarding worth of Life Skills program in relation to other institutional programs:

   Recommend that the Department adopt policy and/or issue clarification statements on the worth of Life Skills participation particularly for earning gain time.

2. Regarding coordination:

   Recommend that in the institution the "home base" for Life Skills be clearly identified for correctional and college staff and that at least two staff be designated as responsible for coordination.

3. Regarding orientation of correctional staff:

   Recommend that a new or follow-up Life Skills orientation program be conducted immediately for all staff. Emphasis should be given to creating institutional ownership of the program thus eliminating feelings of detachment, remoteness and lack of responsibility for program effectiveness.

4. Regarding training of correctional staff:

   Recommend that the overview module be used to implement immediate training of correctional staff.

5. Regarding training of facilitators:

   Recommend a Training Center be established in the summer of 1981 for the specific purpose of providing on-going, comprehensive training for Life Skills facilitators. Such training should allow inexperienced facilitators an opportunity to experience the complete course as presented to inmates. Training should also provide experienced facilitators opportunities to refresh and refine skills.
