ABSTRACT

A formal review was conducted to assess the efforts made by federal agencies to implement the 1983 Emergency Jobs Appropriations Act (EJAA). (The EJAA provided emergency supplemental appropriations to provide productive employment for jobless Americans, to hasten or initiate federal projects and construction of lasting value to the nation, and to provide humanitarian assistance to indigent persons.) The review, which examined the way that 18 different federal agencies implemented the EJAA, indicated that the agencies were generally taking appropriate actions to implement the Congressional mandate expressed in the bill. It was determined that the ability of agencies to obligate Title I EJAA funds quickly was dependent, in large measure, upon the types of programs involved, with welfare-type, grant-in-aid program funds being obligated more quickly than funds for facility construction, renovation, and maintenance. By the end of 1983, a total of \$933 million or about 43 percent of the Title I funds were obligated. Because no uniform, comprehensive reporting requirements exist for the number, nature, or duration of jobs created with EJAA funds, data in this area were incomplete. It appeared, however, that the agencies examined have generally allocated funds in accordance with the targeting provisions of the act. (MN)

BY THE COMPTROLLER GENERAL
**Report To The Chairman,
Committee On Appropriations
U.S. Senate
OF THE UNITED STATES**

Federal Agencies' Implementation Of The 1983 Emergency Jobs Appropriations Act

Title I of the Emergency Jobs Appropriations Act made available \$9 billion in various funding actions to provide productive jobs for unemployed Americans and for other purposes. GAO reviewed 18 federal agencies' efforts to implement Title I of the Act to assess their progress and to identify any problems the agencies may have in quickly obligating the funds. Generally, GAO's review showed that agencies were taking appropriate actions to implement the congressional mandates expressed in the Act.

Telephone (202) 275-6241

The first five copies of individual reports are free of charge. Additional copies of bound audit reports are \$3.25 each. Additional copies of unbound report (i.e., letter reports) and most other publications are \$1.00 each. There will be a 25% discount on all orders for 100 or more copies mailed to a single address. Sales orders must be prepaid on a cash, check, or money order basis. Check should be made out to the "Superintendent of Documents".

COMPTROLLER GENERAL OF THE UNITED STATES
WASHINGTON D.C. 20548

B-205627

The Honorable Mark O. Hatfield
Chairman, Committee on Appropriations
United States Senate

Dear Mr. Chairman:

In response to a request from your Committee on April 20, 1983, we reviewed federal agencies' efforts to implement Title I of P.L. 98-8, the 1983 Emergency Jobs Appropriations Act, enacted March 24, 1983. The purpose of Title I was to provide productive jobs for unemployed Americans and humanitarian assistance to the indigent and homeless while, at the same time, hastening or initiating federal projects of lasting value to the Nation. We were asked to monitor agency progress and provide briefings on the implementation of the emergency jobs creation legislation. We provided briefings on agency progress to your office between May and September.

This report provides the overall results of our review, including the status of obligations as of June 30, 1983. Final year end data are not generally available from the agencies until early December. The objectives of our review were to (1) assess federal agency progress in implementing Title I of P.L. 98-8 and (2) identify and assess any problems the agencies may have in quickly obligating the funds available. Our review covered 18 federal agencies receiving the Title I funds. Our preliminary observations on certain aspects of P.L. 98-8 follow. (Detailed discussion is provided in Enclosure I.)

--The ability of the agencies to quickly obligate the Title I funds is dependent, in large measure, upon the types of programs involved. Welfare-type, grant-in-aid program funds were being obligated more quickly than, for example, facility construction, renovation, and maintenance program funds which required the identification of specific projects to be funded and long lead times to complete the required procurement processes. At least \$7.7 billion, or about 89 percent, of the \$8.7 billion¹ in Title I funds available for obligation falls under the construction, renovation, and maintenance category.

¹The transfer of \$300 million in P.L. 98-8 funds to the Agricultural Credit Insurance Fund for farm operating loans reduced the \$9 billion available for obligation under Title I to \$3.7 billion. See page 2 and page 5 of Enclosure I.

- A total of \$933 million, or about 43 percent of the Title I funds which had to be obligated before the end of fiscal year 1983 had been obligated as of June 30, 1983.
- Department of Agriculture officials have transferred \$300 million in funds made available in P.L. 98-8 for Rural Water and Waste Disposal Grants (\$75 million) and Rural Water and Waste Disposal Loans (\$225 million) to the Agricultural Credit Insurance Fund for the Farm Operating Loan Program--all within the Farmers Home Administration (FmHA). As a result of these transfers, which were made following congressional notification, \$300 million in P.L. 98-8 funds will be used for guaranteed or insured loans to family farms for operating expenses rather than for project grants and loans to the more labor intensive public works construction projects associated with the rural water and waste disposal systems.
- The administration plans to reduce budget requests for fiscal years 1984 through 1988 by \$3.9 billion to offset--or reduce them by--a portion of the P.L. 98-8 funds made available in fiscal year 1983. The administration has already submitted amendments to the fiscal year 1984 budget to offset \$712 million. Thus for this \$3.9 billion, P.L. 98-8 had the effect of accelerating funding which probably would have occurred in future years.
- The President proposed the deferral (delay of obligation) of \$67 million in P.L. 98-8 appropriations for two construction programs. The deferrals indicated that obligation of these funds will not begin until fiscal year 1984. These funds were appropriated without fiscal year limitation and will remain available for obligation until expended. The funds proposed for deferral could not be obligated in fiscal year 1983 because of the lead times required for these construction projects.
- There are no uniform, comprehensive reporting requirements for the number, nature, or duration of jobs created. Except for the Department of Housing and Urban Development (HUD) Community Development Grant funds, P.L. 98-8 did not impose any jobs-related reporting requirements on the agencies. Committee reports called for reporting by only three agencies, and OMB has not required agencies to report on jobs created. Data available from three agencies are presented in Enclosure I. Because the statistics are not compatible, an accurate estimate is not available.
- Generally, agencies have allocated funds in accordance with the targeting provisions of sections 101(a) and (b) of the Act to areas with high unemployment. The only exception is the transferred FmHA funds.

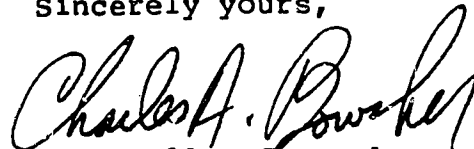

Our review of agency implementation plans showed that agencies were generally taking appropriate actions to implement the congressional mandate expressed in P.L. 98-8.

* * * * *

Implementation actions are still in process in many of the agencies. We are exploring possible methodologies for ascertaining the impact of P.L. 98-8 in creating productive jobs and will keep your office advised of the status of these efforts.

As requested by your office, we have not obtained agency comments on the report. Copies of the report are being sent to each of the agencies and to other interested parties.

Sincerely yours,

Comptroller General
of the United States

FEDERAL AGENCIES IMPLEMENTATION OF THE
1983 EMERGENCY JOBS APPROPRIATIONS

BACKGROUND

Public Law 98-8, enacted March 24, 1983 (97 Stat. 13), provided emergency supplemental appropriations for fiscal year 1983 and subsequent years to (1) provide productive employment for jobless Americans, (2) hasten or initiate federal projects and construction of lasting value to the Nation and its citizens, and (3) provide humanitarian assistance to the indigent as well as to provide for other purposes.

This legislation was a result of congressional findings that:

- the continued economic recession had resulted in nearly 14 million unemployed Americans;
- other millions work only part-time due to the lack of full-time gainful employment;
- the annual cost of unemployment compensation has reached \$32 billion;
- the hardships occasioned by the recession have been much more severe in terms of duration of unemployment and the reduced percentage of unemployed receiving jobless benefits than in previous recessions;
- actual filings of business-related bankruptcies for the year ending June 30, 1982, reached a total of 77 thousand as compared with a prior year figure of 66 thousand;
- business failures are up 49 percent compared to one year ago;
- delinquencies are many times greater;
- the American farmers are more than \$215 billion in debt; and
- hundreds of thousands of farmers are faced with bankruptcy.

Under Title I of the Act, the Congress made available \$9 billion in various funding actions to provide provide productive jobs for unemployed Americans and humanitarian assistance for the indigent and homeless while, at the same time, hastening or initiating federal projects of lasting value to the Nation. Table 1 shows amounts made available for obligation by funding action in fiscal year 1983 and in the fiscal years beyond.

Table 1

<u>Type of funding</u>	<u>Funds Available in millions^a</u>		
	<u>Expiring 9/30/83</u>	<u>Expiring FY 1984 and after</u>	<u>Total</u>

Increases in obligation and loan guarantee limitations	650	0	650
Earmarking of funds already appropriated	<u>0</u>	<u>1</u>	<u>1</u>
	\$2,147	\$6,582	\$8,729

^aFunds available do not include transfers to the Agricultural Credit Insurance Fund as follows: (1) \$225 million in increased fiscal year 1983 obligations limitation for Rural Development Insurance Fund loans and (2) \$75 million in no year appropriations for Rural Water and Waste Disposal Grants.

Title I also contains targeting provisions that direct \$2.1 billion to areas of high unemployment.

As a further assistance measure, Title II of the Act created a temporary emergency food assistance program for the needy and appropriated \$50 million to meet the storage and distribution costs of the states under the program in fiscal year 1983. Title III of the Act provided additional supplemental appropriations totaling more than \$11.2 billion including: \$5.707 billion in Reimbursement for Net Realized Losses of the Commodity Credit Corporation; \$5.033 billion for Advances to the Unemployment Trust Fund and Other Funds; \$200 million for additional capital for the Small Business Administration's Business Loan and Investment Fund; and \$276.1 million for Grants to States for Unemployment Insurance and Employment Services.

REVIEW OBJECTIVES, SCOPE, AND METHODOLOGY

The objectives of our review were to (1) assess federal agency progress in implementing Title I of P.L. 98-8 and (2) identify and assess any problems the agencies may have in quickly obligating the funds made available in Title I. Our review covered all federal agencies receiving funds under Title I of P.L. 98-8: the Departments of Agriculture, Commerce, Defense, Education, Energy, Health and Human Services, Housing and Urban Development, the Interior, Justice, Labor, Transportation, and the Treasury; the Federal Emergency Management Agency, the General Services Administration; the Railroad Retirement Board;

the Small Business Administration; the Tennessee Valley Authority; and the Veterans Administration.

To accomplish our review objectives, we interviewed budget officials and, where necessary, program officials in the headquarters offices of each agency. We obtained and analyzed data and documentation on agency implementation progress and plans, state allocations, transfers, targeting of funds, the status of obligations through June 30, 1983, and proposed budget deferrals and offsets. We also interviewed and obtained pertinent documents from officials of the Office of Management and Budget (OMB).

Our review focused on the budget execution aspects of the agencies' implementation of P.L. 98-8; however, we also obtained available information on the number of jobs being created and agency reporting requirements. The review covered the period from enactment of P.L. 98-8 on March 24, 1983, through June 30, 1983.

AGENCY IMPLEMENTATION EFFORTS DURING THE FIRST 3 MONTHS

During the first 3 months after enactment of P.L. 98-8, the executive branch agencies took steps to expedite implementation of Title I of the Act. By April 23, 1983, the agencies had requested, and OMB had approved, apportionment¹ of the \$9 billion in Title I funding actions requiring apportionment.

In accordance with the targeting requirements of sections 101(a) and (b) of the Act, agencies allocated \$2.1 billion in funds appropriated for 22 programs to states and localities on the basis of their relative percentages of high unemployment or numbers of long-term unemployed workers.

The agencies also took steps to begin obligating the funds. We noted two instances where P.L. 98-8 funds were proposed for deferral and one instance where P.L. 98-8 funds were transferred

¹Apportionment is a distribution made by OMB of amounts available for obligation, including budgetary reserves established pursuant to law, in an appropriation or fund account. Apportionments divide amounts available for obligation by specific time periods (usually quarters), activities, projects, objects, or a combination thereof. The amounts so apportioned limit the amount of obligations that may be incurred. In apportioning any account, some funds may be reserved to provide for contingencies or to effect savings, pursuant to the Antideficiency Act; or may be proposed for deferral or rescission pursuant to the Impoundment Control Act.

to another appropriation account and used for non-jobs-related purposes. These and other implementing actions are discussed in detail below.

Status of Obligations

We reviewed the status of agency obligations as of June 30, 1983. We chose this date because it was the end of the first quarter of implementation and because it was the mid-point for obligation of funds expiring on September 30, 1983. Final year end data are not generally available from the agencies until early December. In many cases, it was too soon to assess progress because of long lead times required to issue necessary regulations and complete the required procurement processes. We chose to measure status of obligations because it was too soon to measure agencies' implementation in terms of expenditures. Time lags often occur between the obligation (commitment of funds for a specific purpose) and the expenditure of funds. Expenditures indicate payment for goods and services rendered once a program or a project is underway.

As of June 30, 1983, the agencies reported that about \$933 million, or about 43 percent, of the P.L. 98-8 funds with a September 30, 1983 expiration date had been obligated. These obligations included \$903 million, or 60 percent, of the direct appropriations and \$30 million, or about 5 percent, of the other available funds. (See Enclosure II.) As of mid-September, the agency officials indicated that they would obligate all or most of the remaining unobligated fiscal year 1983 balance by September 30, 1983.

The ability of the agencies to quickly obligate the Title I funds is dependent in large measure on the types of programs involved. Welfare-type, grant-in-aid program funds were being obligated more quickly than, for example, facility construction, renovation, or maintenance program funds which require identification of specific projects and long lead times to complete the required procurement processes. For example, \$866 million, or 93 percent of the \$933 million in obligations of funds with a September 30, 1983 expiration date were for welfare-type grants or direct payment programs.

Over half of the grant and direct payment funds available for obligation beyond fiscal year 1983, were also obligated as of June 30, 1983. For two programs, all of the funds appropriated in P.L. 98-8 were obligated as of June 30, 1983. These were the Department of Education's Student Financial Assistance - College Work Study program funds which were available for obligation through September 30, 1984, and the Small Business Administration's Section 21a Grant Program funds which were to remain available until expended. Other obligations were for the Railroad Retirement Board unemployment benefits as well as a few small programs. For two Department of Housing and Urban Development (HUD) programs--Subsidized Housing and Urban Development

Action Grants--receiving \$3.3 billion through disapproval of proposed deferrals, the obligation status was unknown because the additional funds were commingled with the other funds in this appropriation.

About 75 percent of the funds with expiration dates beyond September 30, 1983 are for construction, renovation, and maintenance programs. At least \$7.7 billion, or about 89 percent, of the total \$8.7 billion in Title I funds available falls under the construction, renovation, and maintenance category.

Fund Transfers

In two instances, P.L. 98-8 authorized and directed the transfer of funds from one appropriation account to another to further the Act's jobs-related purposes. However, we noted that Department of Agriculture officials took action not authorized in P.L. 98-8, to transfer significant amounts of FmHA funds from two jobs supplemental appropriations and the Farm Ownership Loan Program to the Farm Operating Loan Program.

In enacting P.L. 98-8, the Congress appropriated an additional \$150 million to FmHA for its Rural Water and Waste Disposal Grant Program and increased, by \$450 million, FmHA's obligational limit for its Rural Water and Waste Disposal Loan Program in the Rural Development Insurance Fund. The committee reports on the legislation indicated that these additional funds should be used by FmHA to reduce its large backlog of loan and grant applications, stimulate employment, and rebuild the Nation's rural infrastructure. However, on April 15, 1983, concurrent with OMB's apportionment of these funds to FmHA and pursuant to its authority in 7 U.S.C. 2257, the Department transferred half of the apportioned amounts (\$75 million in appropriations and \$225 million in increased obligational limitations) to FmHA's Agricultural Credit Insurance Fund (ACIF) to be used to meet an increased demand for insured farm operating loans. The agency notified the cognizant appropriations committee and subcommittee chairmen of the reasons for the transfers in a letter dated April 15, 1983. As a result of these transfers, \$300 million in P.L. 98-8 funds will be used for guaranteed or insured loans to family farms for operating expenses rather than for project grants and loans to the more labor intensive public works construction projects associated with the rural water and waste disposal systems. The Department also transferred, within the ACIF, \$100 million of the existing obligational limitation from FmHA's Farm Ownership Loan Program to the Farm Operating Loan Program. The total transfer of \$400 million was necessary, according to Department officials, because fiscal year 1983 farm operating loan authority had been exhausted in 17 states, thus creating an extraordinary emergency situation for farmers needing operating loans in those states.

The Act also included a partial restoration of the transferred funds in the Supplemental Appropriations Act of 1983, approved on December 15, 1983 (P.L. 98-63, 97 Stat. 301). The Act provided a \$1.5 billion supplemental appropriation for the Rural Water and Waste Disposal Grant Program as well as a \$25 million increase in the obligation limit for the Farm Ownership Loan Program. In the House Conference Report, No. 98-308, the conference instructed the Department to expedite use of the available water and waste disposal grant and loan funds in areas of high unemployment.

Impact of the Supplemental Appropriations Act of 1983 on the Rural Water and Waste Disposal Grant Program

One of the funding made available in P.L. 98-8 was provided to accelerate construction and reduce repair and maintenance backlog. As a result, funding that would have been available in subsequent budget years was moved forward to fiscal year 1983 with the objective of providing productive jobs quickly. In an effort to minimize the impact of P.L. 98-8's fiscal year 1983 appropriations increases on future budget deficits, OMB developed a proposed offsets plan, on April 8, 1983, totalling \$2.7 billion in budget authority for fiscal years 1984 through 1988. One offset proposal in the amount of \$150 million for FMHA Rural Water and Waste Disposal Grants was subsequently withdrawn.

As a result of the offset plan formulated by OMB, the administration plans to reduce budget requests for fiscal years 1984 through 1988 by \$2.9 billion to offset a portion of the P.L. 98-8 funds made available in fiscal year 1983. On April 20, 1983, the President submitted to the Congress a series of proposed amendments to the fiscal year 1984 budget. These amendments would reduce appropriations for 23 programs by \$587 million and offset \$1.1 billion of new discretionary authority for the General Services Administration's Federal Buildings Fund. For the 23 programs affected by the fiscal year 1984 offset amendments, the aggregate offsets through fiscal year 1988 would total \$1.1 billion.

Offsets are proposed for 12 additional programs in fiscal years 1984 through 1988 totalling \$1.5 billion. In addition, the offsets would reduce discretionary authority and loan limitations for farm trust funds by about \$2.3 billion.

Therefore, offset requirements in subsequent fiscal years would reduce budget plans of \$1.1 billion for the funds made available in fiscal year 1983 under P.L. 98-8.

Proposed Funding Deferrals

The President reported the deferral,³ until fiscal year 1984, of P.L. 98-8 funds intended for facilities construction or improvement programs in two executive agencies as follows:

- Deferral D83-35A, dated May 19, 1983, relating to Department of Justice, Federal Prison System, Buildings and Facilities budget authority in the amount of \$51,507,000, and
- Deferral D83-78, dated July 7, 1983, regarding Department of Health and Human Services, Centers for Disease Control, Preventive Health Services budget authority in the amount of \$15,560,000.

In both cases, the deferred funds were appropriated in fiscal year 1983 to remain available until expended. The President's special messages reporting the deferrals stated that the P.L. 98-8 funds could not be effectively used in fiscal year 1983 because of the lead times required for these construction projects. Therefore, no obligations were anticipated in fiscal year 1983.

Part of the Department of Justice deferral was related to a reprogramming request pending before the Congress to permit \$43.4 million in P.L. 98-8 funds to be used for new construction projects rather than modernization and repair of existing prison facilities. As required by Conference Report No. 98-44, the Department submitted the reprogramming proposal to the Congress on May 3, 1983. On June 1, 1983, the Chairman, House Appropriations Subcommittee on Commerce, Justice, and State, the Judiciary, and Related Agencies, advised the Department that a majority of the Subcommittee's members did not approve of the proposed reprogramming. However, according to the Department, the deferred P.L. 98-8 funds could not be efficiently used if made available in fiscal year 1983 for either facility modernization and repair or new construction because of the lead times required for project planning and design and for contractor

³Deferral of budget authority is any action or inaction by an officer or employee of the United States Government that temporarily withholds, delays, or effectively precludes the obligation or expenditure of budget authority, including authority to obligate by contract in advance of appropriations as specifically authorized by law. Deferrals may not extend beyond the end of the fiscal year in which the message reporting the deferral is transmitted.

selection. This deferral terminated automatically at the end of fiscal year 1983.

The Department of Health and Human Services (HHS) funds proposed for deferral were released before the end of fiscal year 1983. However, HHS officials did not anticipate that obligation of funds would occur until fiscal year 1984. These funds were appropriated for construction of a high containment virology laboratory at the Centers for Disease Control in Atlanta, Georgia. According to the Department, the architectural and engineering contract for the facility would not be completed until some time in fiscal year 1984 and actual construction would not begin before the last quarter of fiscal year 1984.

The funds proposed for deferral could not be obligated in fiscal year 1983. It is planned that they will be obligated in fiscal year 1984 as originally requested in the fiscal year 1984 budget. Because of the lead times required for these construction projects, the funding could not be utilized in fiscal year 1983.

Reporting on the Number of Jobs Created

No uniform or comprehensive reporting requirements have been established to capture data on the number of jobs created as a result of P.L. 98-8. OMB has not required agencies to report on the number of jobs created. The Act required only HUD to submit detailed quarterly reports to the appropriate committees of the Congress on the use of funds for projects resulting in productive jobs.

The committee reports accompanying P.L. 98-8 called for reporting of employment benefits and the estimated number of productive jobs to be created as a result of construction projects to be carried out by the Army Corps of Engineers-civil functions, the Bureau of Reclamation, and the Tennessee Valley Authority. Senate Report No. 98-17 called for these agencies to submit a report to the Senate Committee on Appropriations "within 60 days and each 30 days thereafter through September 30, 1983 on obligations, expenditures, and employment benefits realized." House Report No. 98-11 recommended that funds be provided to these three agencies for repair, restoration and improvement projects much of which resulted from natural disaster damage. The report indicated that repair of this damage called for an estimated 21,500 productive jobs.

The agencies maintaining jobs creation data provided the following information as of June 30, 1983:

Table 2

<u>Agency/appropriation</u>	<u>Estimated number of jobs created as of 6/30/83</u>
Army Corps of Engineers:	
--Flood Control, Mississippi River	1,494
--Construction, General	654
--Operations and Maintenance	2,779
	<u>4,927</u>
Department of Housing and Urban Development:	
Community Development Grants	a
Department of the Interior, Bureau of Reclamation:	
--Operation and Maintenance	156.8
--Loan Program	17.9
--Construction Program	310.7
	b <u>485.4</u>
Tennessee Valley Authority	c 1,957

^aProcessing of applications did not begin until after July 1, 1983.

^bData indicates work year estimates rather than jobs.

^cTotal excludes 1400-plus trainees for one of the TVA projects.

The jobs statistics reported by the above agencies are not being reported in a uniform manner and the data is not compatible. The data reported is on the number of jobs created rather than the number of people hired and provides only a limited status because it represents only a few of the numerous agencies receiving jobs creation funds. Additionally, only HUD appears to have a reporting requirement extending beyond fiscal year 1983. Three of the four agencies are reporting data on the number of jobs created, while the Bureau of Reclamation is maintaining data on the number of work years created.

Targeting and Allocation of P.L. 98-8 Funds

We looked at compliance with the targeting requirements of P.L. 98-8. The Act targeted about \$2.1 billion in funds specified for 22 programs and activities under two formulas in sections 101(a) and 101(b). The committee reports accompanying P.L. 98-8 also earmarked some of these funds for specific projects and purposes. In addition, we looked at allocations under existing provisions of law for the remaining programs. (See Enclosure III for allocations of P.L. 98-8 funding by major recipient category.)

Section 101(a) targeted \$1.4 billion, or 75 percent of the \$1.9 billion, in funds appropriated for 17 specified programs or activities to civil jurisdictions with high unemployment, labor surplus areas, political units, or pockets of poverty eligible for Urban Development Action Grants.⁴ The untargeted 25 percent of these funds was to be allocated in accordance with the programs' preexisting requirements.

Section 101(b) of the Act targeted half, or \$725 million, of \$1.45 billion in funds for five program areas as follows: one-third based on each state's relative numbers of unemployed individuals and one-sixth to long-term unemployment states. The remaining half of the funds were to be allocated under other existing provisions of law authorizing the programs. The Act stipulated that states receiving funds under this subsection were to utilize these funds in areas where they would have the greatest immediate employment impact.

Documentation obtained from the agencies administering the 22 programs and activities show that the agencies generally followed the targeting formulas. In most cases, the agencies either allocated the funds to states using the formula or they allocated the funds to projects taking unemployment data into consideration.

We noted only one instance where the allocation of funds did not follow the targeting requirements of section 101(a). This involved the transfer of \$75 million in Rural Water and Waste Disposal Grants to the Agricultural Credit Insurance Fund. These funds will be allocated to states to meet an increased demand for insured farm operating loans. The transfer was reported to the Congress in accordance with the notification requirement for the use of transfer authority.

AGENCY IMPLEMENTATION PLANS AND OBJECTIVES FOR LAST QUARTER OF FISCAL 1983 AND BEYOND

Our review of agency implementation plans showed that agencies were generally taking appropriate actions to implement the congressional mandates expressed in P.L. 98-8. Agency plans and objectives for further implementation of P.L. 98-8 included:

- completing the regulatory processes for new or newly funded programs initially funded in P.L. 98-8;

- approving grant applications for those grant-in-aid programs for which that process had not been completed on June 30, 1983;

⁴Army Corps of Engineers funds were to be subject to the provisions of section 101(a) "to the extent practicable."

- identifying, prioritizing, and selecting projects subject to national competition;
- selecting contractors and awarding contracts for those facility maintenance, repair, and improvement projects that are federally managed or supervised;
- obligating by September 30, 1983, as much as possible of those P.L. 98-8 funds that would otherwise expire for obligational purposes on that date; and
- obligating all other P.L. 98-8 funds, not proposed for deferral, as expeditiously as possible.

Summary Schedule of P.L. 98-8, Title I Funding, Showing
Amounts Appropriated, Availability for Obligation,
and Status of Obligation as of 6/30/83

		(\$000)				
Department/agency and bureau	<u>Appropriation account</u>	<u>Funds made available in P.L. 98-8</u>	<u>Last date funds are available for obligation</u>	<u>Total obligations at 6/30/83</u>	<u>Unobligated balances at 6/30/83</u>	<u>Percent of P.L. 98-8 funds unobligated</u>
<u>Department of Agriculture:</u>
