This report is a comprehensive description of a Federally-funded Special Services program known as Operation Success at Wichita State University. The program began in 1970 and is designed to assist students from low income families and/or who are the first in their families to attend college. Part I of the report describes program philosophy and goals, plus the current organizational framework, staff development and training, and program communications. Part II summarizes student enrollment and presents demographic data on students who received assistance through the tutoring component during the Spring, Summer, and Fall semesters of 1983. Part III summarizes the tutorial, cultural, research and evaluation, Vietnamese, and fundraising components of the program. It also provides a detailed analysis of program survey data, summarizes scholarships awarded to students, and describes the Tutor Appreciation Awards banquet. Numerous charts, tables, figures and organizational models are utilized throughout the report. (CJM)

Preface

Beginning in 1970, a federally funded program entitled "Special Services" opened its doors on the Wichita State University campus. It was designed to provide financial assistance covering tuition fees, books, personal tutoring, and counseling to 300 Wichita State University students meeting federal poverty-level guidelines. Almost 14 years later, students today are still utilizing the supportive services that has made Special Services a unique and personal program. Although the services offered have changed, the underlying philosophy still remains the same. Our program is designed to assist those students meeting the following federal guidelines defined by the Office of Education.

1. First Generation
2. Low Income
3. Physically Disabled

Students from various ethnic, social, and educational backgrounds are attracted to our program. The service most students seek is the one-on-one tutorial service, but they also receive assistance in peer counseling, cultural exposure, free typewriter service, limited book loan program, and information on various minority scholarships. Currently, we are fundraising monies to contribute towards our newly established Leslie Rudd Academic Incentive Scholarship Program.

Our program will continue to consist of three main components: Tutorial, Cultural, and Research & Evaluation. We plan to add a computer tutorial-assisted program in the fall of 1984. Each component has been successful in meeting the goals of the program. Our program has grown each year, both in quality and quantity of service.
With this in mind, I feel the commitment on behalf of the staff and students, allow for a positive educational environment. This environment has allowed over 3,000 students to utilize the services that have made OPERATION SUCCESS a program which promotes equal educational opportunity.

April, 1984

Mario Ramos
Program Director
INTRODUCTION

The fifth Program Overview and Performance report of OPERATION SUCCESS provides a comprehensive and detailed description of the activities of the Special Services Program at Wichita State University, covering Spring, Summer, and Fall academic semesters of 1983.

The organizational framework of OPERATION SUCCESS consists of five components: the Tutorial Component, the Cultural Component, the Research and Evaluation Component, the Vietnamese Component, and the newly formed Fund Raising Component. As seen in the illustration on page one, the five components of OPERATION SUCCESS are mutually supportive and complementary. Together the components provide a supportive framework for assisting the disadvantaged student in successfully completing his or her college education.

The Tutorial Component is the backbone of the program through which individualized tutoring is made available to enrollees. The Cultural Component sponsors activities, such as educational visits and cultural events, to provide students with additional learning experiences. The Research and Evaluation Component collects and analyzes both quantitative and qualitative data in order to formulate effective strategies to best serve the disadvantaged student. The Vietnamese Component serves students from that culture who are in need of tutorial assistance. Finally, the Fund Raising Component operates to help counteract budgetary constraints.
This comprehensive report is available to Wichita State University faculty, administrators, and the Wichita community with information on activities and a performance report of OPERATION SUCCESS. The report is divided into three parts. Part I covers the program model goals and objectives, and philosophy of the program. It also contains the current organizational framework, program work ideals, procedures for the professional development and training of the staff, and program communications through the newsletter. Part II provides a summary of student enrollment during the Spring, Summer and Fall semesters of 1983. It also contains demographic profiles and statistical data on students who received tutorial assistance through the Tutorial Component. Part III provides a summary of the Tutorial, Cultural, Research and Evaluation, Fund Raising and Vietnamese Components. The detailed analysis of the Program Survey of Spring, Summer, and Fall of 1983 is also included in this section. This section also has information on scholarships awarded to students enrolled at OPERATION SUCCESS as well as the Tutor appreciation awards banquet.

This report is an attempt to provide the reader with details of OPERATION SUCCESS annual activities by compiling information, incorporating charts, tables, figures, flow charts, and organizational models. This report will not only be useful to Special Services Program Personnel in formulating future strategies that will better meet the needs of disadvantaged students, but will also assist in comparative studies done here and elsewhere in the nation to further improve programs that assist the disadvantaged student.
I want to express my appreciation to the Director of OPERATION SUCCESS, Mario Ramos, for his encouragement and assistance in the preparation of this fifth report. I also want to thank the program secretary, Hercilia Recinos, Student Assistant Audrey Krug, Tutor-Advisors Elizabeth Freund, Rebecca Pegg and Faeq Shaikh and Research Assistant, Clara Freund, for their assistance through the various stages in the preparation of this report.

Wichita State University

TUTORIAL COMPONENT
- Enrollment of students
- Matching tutors to students
- Individualized tutoring to assist students to successfully complete course requirements, and thereby facilitate the graduation process.

CULTURAL COMPONENT
- Educational visits and cultural activities
- Enhance student's learning experience through exposure to cultural and educational experiences

VIETNAMESE COMPONENT
- Tutoring by Vietnamese tutors to facilitate the learning process for Vietnamese students

RESEARCH AND EVALUATION COMPONENT
- Data Collection analysis
- Evaluation of program and projects
- Data collection, statistical analysis, in-group evaluation of programs and projects to provide feedback for effective strategies to achieve program goals

FUND RAISING COMPONENT
- Supplement to budget cuts

Model of Program: Deemethie de Silva
GOALS AND OBJECTIVES OF THE PROGRAM

Program Title

OPERATION SUCCESS is a Special Services Program for students from disadvantaged backgrounds (TRIO). The programs were instituted after the Higher Education Act of 1965, Title IV (Student Assistance Programs) Part A, Subpart 4 P.L. 92-318 as amended by 96-374.¹

Purposes of the Program

The purpose of the program at OPERATION SUCCESS is to identify qualified individuals who are the first in their families to attend college and/or from low-income families. The program objective is to prepare these students for postsecondary education and provide special supportive services until they graduate from college.

Therefore, the principal objectives of OPERATION SUCCESS will continue to be:

1. To provide the necessary support services to assist students in the program for successful graduation from Wichita State University.

2. To provide exposure to cultural events and academic programs not usually available to disadvantaged students.

¹Information provided by the National Council of Educational Opportunity Association (NCEOA) at the NCEOA Policy Seminar, Washington, D.C., March 18-20, 1984.
3. To provide activities designed to acquaint students participating in the program with a range of career options available to them and to attain an appreciation of the students' distinctiveness and sense of participation in a society larger than himself or herself.

These objectives of OPERATION SUCCESS will be reached by a number of activities enhancing each student's experiential background. The activities will be provided by the Tutorial and the Cultural Components, monitored by the Research Component, and facilitated by the Fund Raising Component.

The overall intent of OPERATION SUCCESS is to provide the following supportive services:

1. tutorial assistance;
2. peer counseling;
3. workshops in Science, English, and Mathematics courses;
4. career planning and assessment;
5. workshops covering such topics as test-taking techniques and study skills;
6. cultural activities (including transportation to and from such events);
7. seminars on graduate and professional schools;
8. referrals to health, employment, housing and legal agencies, in an effort to assist students in resolving problems that may be beyond the scope of project services, but may interfere with the student's academic progress.

Through these "support services" the goals and objectives of the program will be achieved.

PHILOSOPHY OF THE PROGRAM

The Special Services Program "OPERATION SUCCESS" is designed to assist disadvantaged students so that they may experience success as college students. In order to achieve this objective, the program offers a wide range of opportunities for educational awareness through four main components of OPERATION SUCCESS. The four main components are: the Tutorial Component, the Cultural Component, the Research and Evaluation Component, and the Fund Raising Component, which were all designed to be mutually supportive. The fifth component, the Vietnamese Component, is co-sponsored by OPERATION SUCCESS and the Student Government Association. This component is for Vietnamese students who need and want to work one-on-one with a Vietnamese tutor.

The Tutorial Component offers the unique opportunity at Wichita State University for individualized tutoring throughout each semester. A student who requests a tutor is matched with a tutor who is qualified in that particular subject area. Each tutored student is monitored for progress by his or her tutor and evaluated by the counselors. The tutoring covers a wide range of classes, from basic English and Math to Philosophy, and including Foreign Languages, Business Administration, Pre-med and advanced Engineering. Thus, students who are underprepared for some college level courses obtain assistance which allows them to successfully complete these courses.

The Tutorial Component also features counseling for students through their tutors. As a Tutor-Advisor, part of a tutor's time is devoted to peer counseling. Peer counseling entails being a good listener, an empa-
thizer, and a helper in solving both personal and academic problems. This is expected from the Tutor-advisors in their role as peer-counselors and it is emphasized during their recruitment.

An integral part of exposure to learning is provided by the Cultural Component. The Cultural Component organizes educational visits to institutions of higher learning, and to seminars by visiting faculty or counselors. The major portion of this component, however, is made up of events designed to promote cross-cultural understanding. These include international food-sampler parties and foreign films shown in cooperation with local theaters. Another major event sponsored by OPERATION SUCCESS, which in 1983 was also co-sponsored by the Kansas Arts Commission, was the annual "Spring Fling." This event featured music, dancing, costumes and foods representative of many different cultures. All of these activities are designed to encourage interaction between diverse ethnic groups and provide opportunities for students to appreciate a variety of cultures. As a result, the individual student is able to grow both intellectually and emotionally.

The Research and Evaluation Component provides the statistical framework for OPERATION SUCCESS. The basic purpose of this component is to analyze, on a systematic basis, the on-going activities and services of the program. The analysis is used to promote increased efficiency to improve tutoring methods, and to suggest possible improvements, additions, or subtractions from the program. This component of the program helps us to get the most out of our limited resources so that we can serve our students to the best of our ability.
The Research and Evaluation Component involves consistent monitoring of student academic progress, tutor evaluation, evaluation of tutor-advisor training programs, administering questionnaires, and the collection and analysis of statistical data.

The Fund Raising Component was established in the Fall of 1980 to meet expenses usually not covered by the program budget. Funds have been raised by screening Spanish films and Black films; holding the annual cultural Spring Fling, garage sales, basketball tournaments and baked food sales; and selling raffle tickets. The funds collected have been used for cultural trips, supplies and funding for student participation in workshops or conferences, tutor awards, special treats for tutors, and food samplers to celebrate a cultural day during each month. Fund Raising involves students and other community members, thus making it an important mechanism for communication within the program.
PRESENT ORGANIZATIONAL CHART

OPERATION SUCCESS functions with the knowledge that in order to serve the changing needs of the special student, it needs a well-qualified and motivated staff. This involves careful advance planning by the Director, both Program Counselors and the Program Secretary. A simple human power system has been developed within the framework of the organizational chart provided by the program.

THE TUTORS OF SUMMER 1983

Operation Success hired five tutors to help meet the needs of the students. Four were returning tutors from the preceding Spring semester. They were recruited from various areas of specialty to meet the demands of the students enrolled in Operation Success. The following were hired for the Summer 1983 semester:

<table>
<thead>
<tr>
<th>TUTOR NAME</th>
<th>AREA OF TEACHING</th>
<th>SEMESTER OF TUTORING</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Abdul Cherri</td>
<td>Math, Engineering, Chemistry, Physics</td>

</tbody>
</table>
CURRENT PROGRAM WORK IDEALS

The Program concentrates on seven (7) key elements:

1. The projection of the future needs of the college student.
2. Careful selection, recruitment, and training of Tutor-Advisors.
3. Sensitivity to the needs of each student who comes to the program seeking assistance.
4. Creating a sense of "belonging and caring" within the organizational working so that both the staff and students participate in their endeavor to facilitate the successful graduation of the students enrolled in the Special Services Program at Wichita State University.
5. Communication within the organization to be simple and straightforward and effective.
6. Involve staff and students in fund raising activities, to provide financial support for special projects undertaken by the program.
7. Continuous evaluations of projects and programs to formulate effective strategies to best serve the students enrolled in OPERATION SUCCESS.

The future needs of the college student are continually assessed by the constant interaction with the students themselves. The Director, Program Counselors, and the Program Secretary interact with students, participating in all the cultural activities sponsoring educational visits, organizing food samplers, basketball tournaments, joint meetings with other minority student associations, and cultural activities that involve the whole campus.

Sensitivity to each student's needs have been stressed by the Director and have the cooperation of the staff. The new policy of one-to-one interaction of a Program Counselor with each enrolling student was introduced in 1981. In this manner, the student who is being enrolled has informal
verbal interaction with a counselor and is made to feel welcome into the program. The staff has an unwritten policy of greeting and inquiring after the well-being of the Tutors as well as the students. This atmosphere of caring allows students to be comfortable around the office.

The staff of OPERATION SUCCESS believes that communication is an information transformation process, and that it should be done effectively to prevent misunderstandings. The staff as well as each Tutor-Advisor has a mailbox, and a bulletin board which is used as the main information center. Small note pads with the names of the staff, with "From the Desk of..." are printed for ease of communication. Frequently, notes are decorated with stickers such as "Outstanding Work", "Great", "Very Successful". The feedback effect reaches far, with the belief that an important method of improving communication is feedback. This term, adopted from electrical engineering, refers to the ability of certain complex machines, to check their own performance and to correct itself if necessary. Either in casual conversation or through notes, each counselor will communicate with the tutors, or with each other. The staff constantly communicates face-to-face, which has been found superior, under most circumstances. The staff also will speak over the telephone intercom, when they feel their walking to the next room may be disruptive. The program staff perceives communications as a matter of both transmitting and receiving. In this manner the staff of the program while providing the necessary supportive services to meet the changing needs of the under-prepared college student, will also strive to provide students with an academic atmosphere which is conducive to the development of independence rather than dependence.
PROFESSIONAL DEVELOPMENT AND TRAINING OF THE STAFF - 1983

During the year 1983, the staff of OPERATION SUCCESS were involved in the coordination of several workshops and seminars, and also presenting papers at various conferences. The staff also held offices in TRIO organizations. While the conferences provided an excellent opportunity to meet colleagues from other universities and TRIO programs, they made professional contacts, shared ideas and opinions. They gained further insights into Services Programs in other parts of the nation. The sessions at the conferences enabled them to gain exposure to new ideas, research activities, and additional knowledge.

The Director, Mario Ramos, has been involved in numerous community, state, and national activities during the 1983 year. These activities ranged from coordinating workshops to active participation in ethnic films coordination, basketball tournaments, cultural meetings, and board meetings with Amigos de Ser, a local business advisory board.

He continues to believe in the philosophy that one's involvement in a variety of activities promotes not only good public relations but also an awareness of activities by other groups and organizations.

He was involved in the following activities during 1983:

- Planned and coordinated a spring conference entitled "Retention Support Strategies for Success" in Kansas City, Missouri for the Missouri-Kansas-Nebraska (MO-KAN-NE) tri-state membership.

- Cultural Spring Fling, promoted an all day Arts and Cultural Exchange at Wichita State University, mini-grant from Kansas Arts Commission.

- Provided a workshop on "Fund Raising with Cultural Films for TRIO Programs". Coordinated with Films Incorporated, Chicago, on implementing unique fund raising activities at colleges.

- Guest speaker at Emporia State University, Upward Bound Student Program, Emporia, Kansas.

- MO-KAN-NE Proposal Writing Workshop.

- "Leadership Workshop", sponsored by MAEOPP, Pheasant Run, Illinois.

- Hispanic Films Festival, promoted all day statewide Spanish Language Festival for 1,000 persons, mini-grant from Kansas Arts Commission.

- Panelist, "Minority Workshop", Office of Admissions, Wichita State University, Wichita, Kansas.

- Black Films Festival, screened two unique black films, Wichita State University, mini-grant from Kansas Arts Commission.

- "TRIO Equity and Excellence in Education", Annual Conference of National Council of Educational Opportunity Association (NCEOA), Washington, D.C.

Participation in Academic and Civic Affairs:

October 17, 1983 - "Innovative Approaches for Improving Study Skills and Academic Aptitudes", all day computer workshop sponsored by Missouri-Kansas-Nebraska Chapter of Educational Opportunity Personnel and Office of American College Testing (ACT), Donnelly College, Kansas City, Kansas.

October 3-4, 1983 - Second Annual Conference of the Kansas Student Personnel (KASPA) "Pathways to Success", Sheraton III, Wichita, Kansas.

September 22, 1983 - "Minority Student Workshop" day program, Office of Admissions, Wichita State University, Wichita, Kansas.

July 14, 1983 - Kansas Women in Energy, all day State Meeting, Marcus Center, Wichita State University, Wichita, Kansas.

March 6, 1983 - Attended the Fifth Annual Conference of the Western Association of Educational Opportunity Personnel, WESTOP, "Educational Fitness in the 80's, Strengthening our Alliances", Sahara, Tahoe, March 5-9, 1983.

Publications

May 13, 1983

April 24, 1983
- "Spirit Possession: A Case Study", presented at the Fifth Annual Meeting of the American Culture Association and Thirteenth Annual Meeting of the Popular Culture Association, American Culture Association, Wichita, Kansas.

April 28, 1983

Coordination and Presentations for Academic and Civic Affairs

May 21, 1983
- Planned, coordinated and moderated the Regional Meeting of the Independent Scholars of Asia, with the Asian Studies Program of Wichita State University, and University of California, Berkeley, held at Wichita State University.

April 14, 1983
- "The Ritual in the Life Cycle of the Sinhalese", Guest Speaker, the Sociology of the Life-Cycle: Sociology 500. Wichita State University.

February 23, 1983
- Moderator, "The International Student: Program and Relations." An In-Service Training Program of Wichita State University Staff, Project Officers and Budget Review Officers.

February 17, 1983
- "Ethical Wills Love Letter Now", Guest Speaker Series, sponsored by Campus Ministries in Higher Education.

February 16, 1983
- Planned and coordinated Staff Workshop, TRIO (Talent Search, Upward Bound, Special Services Program), on "Data Collection and Program Evaluation", Wichita State University, Wichita, Kansas.

January 25, 1983
- "The International Student", first Spring Meeting of the membership of Serving Higher Education, (SHE) of Wichita State University.
Program Counselor, Vincent S. Roberson, participated in the following professional development activities. He is Advisor to MECHA, the Mexican American Student Organization, and Advisor to the Black Student Union.

Participation in Professional Activities - Vince Robertson / Program Counselor

August 30-31, September 1
TRIO Workshop, Wichita State University

April 7-8
MO-KAN-NE Spring Conference, Kansas City, MO

February 16, 1983
TRIO Workshop, Wichita State University

Offices Held in Professional Associations:

Mario Ramos, Director

1983-Present
Treasurer. Amigos de Ser, Jobs for Progress Association of Hispanic Business Leader.

1983-Present
President. (MO-KAN-NE) Mid-American Association of Educational Opportunity Program Personnel, involves professional membership from all three states, Missouri-Kansas-Nebraska.

1983-Present
President. Hutchinson Community College Mexican Advisory Board.

Deema de Silva, Program Counselor

1982-1983
Chairperson, Gift Book Committee, (Wichita State University (DAMES), Board of Directors, Women Faculty and Faculty Wives Association).

1982-1983
Kansas Representative of the MO-KAN-NE Association, and on the MO-KAN-NE Board of Directors.

1982-1983
Committee Member, Research and Evaluation, MAEOPP.

1982-1983
Chairperson, Research and Development, MO-KAN-NE Association.
EFFECTIVE COMMUNICATION THROUGH
THE OPERATION SUCCESS NEWSLETTER

One of the most effective communication tools utilized by OPERATION SUCCESS is a monthly newsletter. The newsletter, which is edited by the program secretary, is published by the program. It is mailed to every student who is enrolled in the program as well as to staff members and various academic and community supporters.

Some of the regular features of the newsletter include:

1. a calendar of upcoming events
2. information on upcoming cultural and educational activities
3. information on program services
4. information on available scholarships
5. names of scholarship recipients
6. profiles of staff members
7. tips on improving study and test-taking skills

* A copy of the September 1983 OPERATION SUCCESS Newsletter is enclosed.
OPERATION SUCCESS

MAIL TO:
WELCOME BACK - New and former students!

Looks like 1983-84 promises to be a good year. We hope you are in the right frame of mind to make this a very successful semester. At least at this point you have one thing going for you - a new year; a fresh start. Use your time wisely and plan ahead.

As usual the beginning of the new year marks some changes in our tutorial staff. Also, for the first time in over 2½ years, we have had a change in full-time staff. We welcome HERCILIA RECINOS who replaces JAN ATAKPA as Program Secretary. As such she will be the new editor of the Monthly Newsletter. Hercilia, or "Chila" as we have come to know her, comes all the way from BELIZE, a beautiful country wedged between Mexico and Guatemala. She is on display at OPERATION SUCCESS, Room 309, Grace Wilkie Hall. Come by and meet her.

The staff of OPERATION SUCCESS hopes you enjoy an academic positive semester. If our office can be of assistance, please contact us at 689-3715.

FALL 1983 TUTORS

RETURNING

Randy Castleberry
Tim Chavez
Abdallah Cherri
Ray Leonard
Faeq Shaikh
Othello Curry ('81)
Rebecca Pegg ('82)

NEW

Khoder Farhat
Elizabeth Freund
Steve Gibbons
Kelly Massey
Dinesh Sharma

As yet there are still some tutoring times available. If you need our services you will need to enroll soon in order to take advantage of what we have. REMEMBER also that you must re-enroll at the beginning of each semester.

SCHOLARSHIP NEWS

As you may know, Boeing Military Airplane Company provides scholarship money each year for OPERATION SUCCESS students. This year a summer program was added as well. Students receiving the awards were chosen on the basis of academic achievement, financial need, and community-campus involvement. Summer awards were $100.00 each. Recipients include Patrick Hill, Ilana Johnson, Nick Oropeza, Rebecca Pegg, and Michael Sweany.

Fall awards were $250.00 each. Recipients include John Egbo, Sheridan Garrett, Rebecca Pegg, Sheri Lynne Redo, Southat Sathnagam, and Muoi Truong.

If you are interested in applying for the next school year be sure to look us up come April.

Minority Student Scholarship for Engineering are available. Please call Debra Fountain at 689-3085.

CULTURAL NEWS

Our first cultural excursion this year will be to the Fifteenth Annual Arts & Crafts Fair in Hillsboro, Kansas. This event is on Saturday, September 17th and features Dutch foods, bake sales, entertainment, over 300 artists/crafters, sidewalk sales, Kaffee haus, Mennonite culture, free admission, and a picnic lunch setting. Over 15,000 people attended last year's fair.

This will surely be a rich, memorable experience. If you are interested we have limited free transportation available. Call the office.
at 689-3715 to reserve a seat. We hope to take 8 students but if the response is great sign up anyway because we can then organize car pools.

If you have anything you might want to exhibit please call Vince Robertson at OPERATION SUCCESS for details before September 12th.

The Native American Heritage Association (NAHA), (formerly NAISA), will be having open membership. All interested persons welcome. First meeting will be Thursday, September 8 at 1:30 p.m. in the Union Pub.

RECREATIONAL NEWS

DID YOU KNOW THAT:

KMUW Radio has spanish music on Saturdays at 5:30 p.m. to 9:00 p.m.? KMUW Radio - 89.1 FM.

Also Soul line - 9:00 p.m. - 12 midnight Saturday
5:00 p.m. - 7:00 p.m. Sunday

Gospel Express - 7:00 a.m. - 11:00 a.m. Sunday

Reggae Music - 9:00 p.m. - 11:00 p.m. Sunday

UPCOMING MOVIES

September 30 & October 1 - 208 Hubbard Hall - 7:30 p.m. both days: "The Man" with James Earl Jones, Martin Balsam and Burgess Meredith. Irving Wallace's explosive drama of the first black U.S. President. The second movie will be "Gospel" with James Cleveland, Walter Hawkins and The Hawkins Family, the Mighty Clouds of Joy, Shirley Caesar and the Clark Sisters. Both movies will be only $2.00. This movie presentation cosponsored by Kansas Arts Commission. For more information call 689-3715: OPERATION SUCCESS.

If you want to help OPERATION SUCCESS raise monies to support various activities that cost money to operate, buy one today! It's only $2.00 and we keep $1.00. Special thanks to Ms. Pam Irish - House of Schwan Inc. for providing this fundraising idea.

~ IMPORTANT DATES ~

September 2 - Last day for late registration or to add classes. Withdraw and receive 80% refund.

September 3 - Football game, WSU vs. Missouri Southern - 7:30 pm, Cessna Stadium.

September 5 - Labor Day Holiday. Office Closed.

September 8 - Native American Heritage Assoc. (NAHA) open membership.

September 9 - All school dance - 8:00 p.m., CAC Ballroom.

September 16 - Mexican Independence Day. Food Sampler Party, 12:00 noon - 1:30 p.m. - OPERATION SUCCESS.

September 20 - Art exhibit and sale - 10:00 a.m. - 7:00 p.m., CAC Shocker Lounge.

September 22 - Minority Admission Advisory Committee day, 2:00-5:00 p.m., CAC Ballroom. Free cookies and punch available.

September 23 - Last day to withdraw and receive 40% refund.

Hands are back! We are currently selling the "We are No. 1" hands in our office and at the CAC.

STATISTICAL INFORMATION

Enrollment
Tutorial Component
Figures
ENROLLMENT

Enrollment Procedure

At the beginning of each semester the dates for enrollment at OPERATION SUCCESS are announced in the Student Newspaper, the Sunflower. Students who are familiar with the program or have been enrolled before generally come in early in the semester. Some students join the program to avail themselves of the tutorial services; others do so to gain cultural exposure, join peers for educational visits, or to be eligible for scholarships that are awarded through the program.

When a student comes into the office to enroll, he or she fills out:
1. an enrollment card;
2. a class schedule from Wichita State University; and
3. a needs assessment sheet.

After determining an applicant's eligibility, the necessary forms are filled out and the program secretary begins or updates that student's file. At the end of the week, the secretary provides the Director and Counselors with a statistical breakdown of the enrolled students.

Guidelines For Current Special Services Programs

The Higher Education Act of 1965, as amended, has further extended federal financial assistance to projects designed to assist qualified post-secondary students, who need academic support in order to successfully pursue a post-secondary educational program. These individuals are eligible project participants according to the following selection requirements. 4

---

646.4 * Eligible Project Participants: Selection requirements.

(a) At least two-thirds of the eligible individuals an applicant proposes to serve under a Special Services project must be---

1. Physically handicapped; or
2. Low-income individuals who are first-generation college students.

(b) The remaining individuals the applicant proposes to serve under the Special Services project must---

1. Physically handicapped;
2. Low-income individuals; or
3. First-generation college students.

(c) A "low-income individual" means an individual whose family's taxable income did not exceed 150 percent of the poverty level in the calendar year preceding the year in which the individual participates in the project. Poverty level income is determined by using criteria of poverty established by the Bureau of the Census, U.S. Department of Commerce.

(d) 1. A "first-generation college student" means a person neither of whose parents received a bachelor's degree.
2. With respect to individuals 18 years of age and under, only the natural or adoptive parents who are currently residing with the individual are considered the individual's parents in determining whether the individual meets the criterion of being a first-generation college student.
3. With respect to individuals over 18, only the natural or adoptive parents who were residing with the individual before the individual's eighteenth birthday are considered the individual's parents in determining whether the individual meets the criterion of being a first-generation college student.

(e) "Physically handicapped," with reference to an individual, means a person who, because of a physical disability, needs specifically designed instructional materials or programs, modified physical facilities, or related services in order to participate fully in the experience and opportunities offered by post-secondary educational institutions.

SUMMARY OF ENROLLMENT - SPRING 1983

Student enrollment at OPERATION SUCCESS for the Spring semester of 1983 was 101 students. The number of first generation students significantly increased to 66.34 percent in the spring of 1983 as compared to 55.56 percent during the fall of 1982. It is encouraging to know that OPERATION SUCCESS is attracting these students, because the new federal guidelines require the program to assist low income, first generation college students.

During the Spring semester 62 students (61.39%) qualified under the category of both low income and first generation. Twenty-nine students (28.71%) qualified under first generation exclusively, and seven students (6.93%) under low income exclusively. Two students (1.98%) were enrolled under both first generation and physically handicapped, and 1 student (.99%) was qualified under both low income and physically handicapped.

Of the total number of students enrolled in the program in the Spring semester of 1983, 31 students (30.69%) were first time enrollees. Seventy students (69.31%) had been past members of OPERATION SUCCESS.

During the first week of the Spring semester, 48 students (47.53%) requested OPERATION SUCCESS services. Nineteen students (18.81%) students were enrolled in the second week, bringing the first two weeks' total to 67 students (66.34%). By the end of the eighth week, enrollment had been completed with 101 students.

Forty-three students (42.58%) in the Spring semester were freshmen. There were 21 sophomores (20.79%), 19 juniors (18.81%), and 13 seniors (12.87%). One graduate student (.99%) was enrolled, and 4 students (3.96%)
were qualified under Continuing Education.

The majority of students enrolled in OPERATION SUCCESS in the Spring semester were Blacks, Whites, and Hispanics. Sixty-two students (61.39%) were Blacks, 23 students (22.77%) were Whites, and 10 students (9.90%) were Hispanics. There were 4 students (3.96%) classified as Native Americans and Alaskans, and 2 students (1.98%) were Asians.

According to the Individual Needs Assessment Survey conducted in the Spring semester, the highest demand was for tutorial services. Seventy-seven students requested tutorial services. The next highest demand was for typewriter usage, followed by information/referral services, cultural activities, and fundraising events. Workshops on study skills, test-taking, preparing for tests, and memorization techniques were also in high demand.

Graphs and tables depicting these statistics are included on the following pages.

SUMMARY OF ENROLLMENT - SUMMER 1983

Student enrollment at OPERATION SUCCESS for the Summer Semester of 1983 totalled 43 students. This brought the total enrollment for 1983 for the Spring and Summer semesters to 144 students.

During the Summer of 1983, 27 students (62.79%) qualified under the category of low income and first generation. Ten students (23.27%) qualified under first generation exclusively. Three students (6.97%) qualified under low income exclusively and under low income, first generation, and physically handicapped.

Twenty-five students (58.14%) in the Summer semester were first time enrollees. The other 18 students (41.86%) were past members of OPERATION SUCCESS.

During the Summer semester, 18 students (41.86%) were enrolled during the first week of school. Six students (13.95%) were each enrolled in the second, third, and fifth weeks. Four students (9.30%) were enrolled in the fourth week and 3 students (6.99%) in the sixth week.

Of the students enrolled in OPERATION SUCCESS in the Summer semester, 18 students (41.86%) were freshmen. Six students (13.95%) were sophomores, 12 students (27.94%) were juniors, and 2 students (4.65%) were seniors. There was one graduate student (2.32%) and 6 students (9.29%) were classified as Continuing Education.

Blacks and Whites were the largest ethnic groups served by OPERATION SUCCESS in the Summer semester. Twenty-four students (55.84%) were Blacks and 11 students (25.58%) were Whites. There were 3 Hispanic students (6.97%), 1 Native American student (2.32%), and 4 Asian students (9.29%).
According to the Individual Needs Assessment Survey conducted in the Summer semester of 1983, the highest demand was for tutorial services. Twenty-nine students out of the total enrollment of 43 students requested tutorial assistance. Cultural/educational activities were the next highest demand area, followed by information/referral services. Workshops on study skills, test-taking, and memorization techniques were also in high demand.

Graphs and tables depicting these statistics are included on the following pages.

*Number of students interested in obtaining assistance in the services offered by Operation Success*
SUMMARY OF ENROLLMENT - FALL 1983

Student enrollment at OPERATION SUCCESS for the Fall semester of 1983 was 124 students bringing the total enrollment for 1983 to 268 students.

The largest number of students; 62 students (50.00%), qualified under the category of low income and first generation. Forty-five students (36.29%) were first generation only and 8 students (6.45%) were low income only. Seven students (5.65%) were first generation and physically handicapped, and 2 students (1.61%) were low income, first generation, and physically handicapped.

Sixty-three students (50.81%) in the Fall semester were first time enrollees. Sixty-one students (49.19%) were past members of OPERATION SUCCESS.

By the end of the second week of the Fall semester, 39 students (31.45%) had enrolled at OPERATION SUCCESS. Ninety-eight students (79.03%) had enrolled by the sixth week, and 107 students (86.29) had enrolled by the middle of the semester.

During the Fall semester, 49 students (39.51%) were freshmen. There were 22 sophomores (17.74%), 28 juniors (22.58%), and 23 seniors (18.55%). There was also two graduate students (1.62%).

Sixty students (48.38%) out of the total enrollment were Blacks, and 39 students (31.45%) were Whites. There were 12 Hispanic students (9.68%), 11 Asian students (8.87%), and 2 Native American students (1.62%).
The highest demand was for tutorial services according to the Fall Individual Need Assessment Survey. Eighty-six students out of the 124 total students requested tutorial services. The next highest demands were for typewriter usage and cultural/educational activities. All the academic workshops were also in high demand.

Graphs and tables depicting these statistics are included on the following pages.

**TOTAL NUMBER OF STUDENTS ENROLLED AT OPERATION SUCCESS** 124

*Number of students interested in obtaining assistance in the services offered by Operation Success*
TUTORIAL COMPONENT

Total student enrollment at Operation Success for the Spring, Summer, and Fall of 1983 was 268 students; 212 students of the total received tutorial assistance. All student enrollees were either low income, first generation, or physically handicapped or some combination of the three. The Tutorial Component provided individualized tutoring with a student obtaining assistance in a subject throughout the semester. Tutor-Advisors were selected for their academic excellence and ability to relate to their peers.

There were 13 Tutor-Advisors recruited for the Tutorial Staff for Spring, 1983, with 10 returning Tutors. During the Summer of 1983, there were 5 Tutor-Advisors on staff, all returnees. In the Fall of 1983, the Tutor-Advisor Staff was back up to 12, with 5 new tutors hired and 7 returning tutors. The Tutor-Advisors gained basic counseling skills through on-going training sessions held weekly each Friday. A program counselor chairs the weekly session held during Tutor Orientation and Training at the beginning of each semester.

The Tutors were selected after taking into consideration the needs assessment carried out during the previous semester. The areas of tutorial assistance varied from Accounting to Chemistry to Economics to Social Work to Aeronautical Engineering, to name a few. Regular tutoring sessions continue until the end of the semester. Throughout the semester, student progress is reported by the tutors and at the end of the semester, the student completes a tutor evaluation. The needs met by the tutorial staff were carried out in both the regular sessions and in special problem sessions before examinations. The Tutorial staff of the program will continue to work to meet the changing needs of the underprivileged student, provide a strong supportive service for the academic success of each student, and contribute to the retention of students at Wichita State University.
SUMMARY OF THE TUTORIAL COMPONENT - SPRING 1983

According to the needs assessment evaluation, students enroll at OPERATION SUCCESS primarily to use the services of the Tutorial Component. Seventy-seven students out of the total enrollment of 101 students received tutorial assistance in the Spring semester of 1983. The areas of tutorial assistance were the following: Accounting, Aeronautical Engineering, Biology, Chemistry, Computer Science, Economics, Electrical Engineering, Engineering Technology, English, French, German, History, Math, Philosophy, Physics, Psychology, Sociology, Spanish, Speech, and Women Studies. From these areas of tutorial assistance, 410 tutorial credit hours were generated by the tutorial staff.

The tutorial staff of the Spring semester consisted of 13 students. The tutors included 3 sophomores, 3 juniors, 3 seniors, and 4 graduate students. Ten of the tutors were Whites, 1 tutor was Hispanic, and 2 tutors were Asians.

Of the 77 students tutored in the Spring semester, 34 students (44.16%) were freshmen. Sixteen students (20.78%) were sophomores, 12 students (15.58%) were juniors, and 10 students (12.98%) were seniors. There was one graduate student (1.30%) being tutored and 4 students (5.20%) who were in Continuing Education.

The majority of tutored students were Blacks and Whites. Forty-five (58.44%) of the tutored students were Blacks, and 21 students (27.28%) were Whites. Eight students (10.38%) were Hispanics, 1 student was Native American, and 2 students were Asians.

Graphs and tables depicting these statistics are included on the following pages.

SUMMARY OF THE TUTORIAL COMPONENT - SUMMER 1983

Twenty-seven students out of the 43 total received tutorial assistance through OPERATION SUCCESS in the Summer 1983. The courses tutored were Chemistry, English, Math, Personal Development, Philosophy, Spanish, Speech, and Statistics. The total number of tutorial credit hours generated was 98 credit hours.

The tutorial staff in the Summer semester consisted of 5 students. There were 2 juniors, 1 senior, and 2 graduate tutors. Three of the tutors were White and 2 tutors were Asian.

Thirteen tutored students (48.17%) were freshmen. Four students (14.81%) were sophomores, and 7 students (25.92%) were juniors. There was one graduate student (3.70%) tutored and 2 Continuing Education students (7.40%).

During the Summer semester, 15 of the tutored students (55.58%) were Black and 8 students (29.62%) were White. There were 2 students (7.40%) who were Hispanic and 2 who were Asians.

SUMMARY OF THE TUTORIAL COMPONENT - FALL 1983

In the Fall semester of 1983, 108 students out of the total enrollment of 124 received tutorial assistance. A total of 552 credit hours were generated with tutoring in the following course areas: Accounting, Administration of Justice, Anthropology, Biology, Business Law, Chemistry, Computer Science, Decision Sciences, Economics, Electrical Engineering, English, Finance, French, Geology, Health Sciences, Industrial Engineering, Psychology, Math, Minority Studies, Philosophy, Physics, Political Science, Social Work, Sociology, and Spanish. The most credit hours were generated in Math-related courses with 211 credit hours.

The tutorial staff consisted of 12 tutor-advisors. These included 1 sophomore, 4 juniors, 6 seniors, and 1 graduate student. Five of the tutors were Whites, 5 tutors were Asians, 1 tutor was Black, and 1 tutor was Hispanic.

Forty-three students (39.82%) of the tutored students in the Fall semester were freshmen. Sophomores totalled 20 students (18.51%), juniors totalled 26 students (24.07%), and seniors totalled 17 students (15.74%). Two students (1.86%) were graduate students.

Blacks and Whites made up the majority of tutored students. Fifty-three students (49.08%) were Blacks and 35 students (32.40%) were Whites. There were 9 Hispanic students (8.33%), 2 Native American students (1.86%), and 9 Asian students (8.33%).

Graphs and tables depicting these statistics are included on the following pages.

PART III

COMPONENTS OF OPERATION SUCCESS

Tutorial Component
Cultural Component
Research and Evaluation Component
Fund Raising Component
Vietnamese Component
TUTORIAL COMPONENT

Tutor - Advisor Interview & Recruitment

Tutor Orientation & Training

On-going Tutor training program through weekly meetings

Students enroll

Needs Assessment

Qualified by Counselors

Counselors match Student and Tutor

Student assignment form is put in Tutor's Mail-Rox

Tutor picks up the assignment form, calls the student for convenient time to meet and schedule session times

Tutor and student sign a contract scheduling the session time. Tutor advises on the prerequisites and content of the course

Regular Tutoring continues till the end of the semester

Monitoring of student progress by counselors

Student-Tutor Counselor Conferences

Mid term Down Slips

If student performance is poor, he/she is advised to withdraw from the course

If student shows promise, then extra tutorial sessions are arranged

Tutor submits contract slips for each session and a pink slip for each absence

Tutor evaluation by the student

Overall program evaluation by the student

Special review session before final exams

Referral to Campus Services

Financial Aid Information

Scholarships

Free T-S.

Book Loan Program

Student progress report by tutors

OPERATIONS CHART FOR TUTORIAL COMPONENT
Recruitment of Tutor-Advisors

OPERATION SUCCESS advertises for tutors through the courtesy of Public Service Announcements over the radio and television stations as well as through the Career and Placement Office in the University. All students from Wichita State University are eligible to apply. An evaluation made on the demand for tutorial assistance in various academic areas each semester determine the tutors who would be recruited for their expertise in these subjects. Applicants come to the program office at Grace Wilkie Hall, Room 309, and fill out an application form. They are given an information sheet containing a brief description of the time commitments, payment, tutoring hours, and details of the job requirements of Tutor-Advisors. In the application form, permission is obtained from the potential tutor for the release of his or her transcript from the Registrar's office at Wichita State University.

The transcripts of the applicants are obtained from the Registrar's office. Grade point average and past academic performance are checked by the counselors. The general rule for tutor qualifications is a GPA of 3.0 or above in the subject areas they will be tutoring.

Each tutor is telephoned for an interview. The persons who do not qualify are sent letters stating that they are not being considered for an interview and suggest other avenues for similar employment such as the Reading and Study Skills Center.
The unique feature of the Tutorial Component of OPERATION SUCCESS is that each student receives individual tutoring. For example, a student needing assistance in Business Calculus will schedule a three hour meeting with his or her tutor at mutually convenient days and times. Thereafter the student will be tutored in Business Calculus throughout the semester, up to the final week. The student will continue to have the same tutor throughout the semester. This gives an opportunity for the student to build a rapport with his or her tutor and receive supportive services until the semester end final examinations.

Peer Counseling

OPERATION SUCCESS' Tutorial Component also provides peer counseling to the enrolled students. A characteristic of disadvantaged students as a lack of self-esteem and self-confidence which causes them to give up on a task before giving themselves a chance to succeed. Consequently, they are constantly under stress. A reduction of this stress provides a climate in which students confidently respond to situations and progress in their academic work. A tutor, by working with one student for a whole semester, gets to know that student's personal needs, goals, and problems, and can reduce the level of stress through counseling.

In the role of peer counselor, the tutor is expected to be a good listener, an empathizer, and one who can suggest various and diverse alternatives, without being judgemental, to solve both the student's personal as well as academic or career problems. The tutor, however, is not expected to solve the student's problems, whatever they may be. The
tutor is only expected to help the student as much as possible within reasonable limits. At times if a tutor is confronted with a difficult problem with which he or she does not feel comfortable or competent to handle, the tutor will consult a Program Counselor, who might refer the student to the Counseling Center at Wichita State University. When the scope and depth of academic or career problems are far beyond the tutor's knowledge and ability in advising such matters, the tutor might refer the student directly to the appropriate campus resource center.

The tutor in the role of a peer-counselor is also expected to act as a source of information for the student. The tutor provides the student with a variety of information concerning not only campus facilities and resources, but also the university's bureaucratic procedures, which are helpful for survival in college. Also the tutor provides the Program Counselors with brief weekly description of what concepts in a subject area were covered during the tutorial sessions and comments on the student's academic progress.

ROLE PLAYING

Model by: Deema de Silva/Summer 1981
Tutor Interviews

Interviews are informal and the candidate is encouraged to share information on his or her academic achievements and extra-curricular interests as well as ideas and attitudes towards cross-cultural interaction. Interviews take at least one hour, since the interview process is also used as a tool to inform the applicant about their commitments, job expectations, and goals of OPERATION S.E.R.F. Part of each interview is devoted to explain a concept or solve a problem in the candidate's major area of tutoring. After each interview, the counselors confer as to the suitability of the candidate as a Tutor-Advisor.

After all the interviews are completed, the decision whether to hire each tutor is made. The decision is made according to the individual's overall qualifications, the demand for the subject areas and the individual's eagerness to be affiliated with the ideals of the program.

The potential tutors then come to the office and the Program Secretary authorizes them to receive payment. Tutor-Advisors are paid minimum wage of $3.35 per hour and usually are given a raise every successive semester.

A student who has requested tutorial assistance is matched with a tutor, who is competent in that subject area. A counselor places a message in the tutor's mailbox with the name and telephone number of the student, the subject area to be tutored, and the best time to contact the student. The tutor then contacts the prospective student and sets up an initial appointment. After establishing convenient hours for the tutorial sessions, a contract is signed by both the tutor and student.
Tutor Training and Orientation

The philosophy behind the Tutor-Advisor training developed at OPERATION SUCCESS is that effective training will instill confidence in the Tutor-Advisors by providing them with information and skills commensurate with their job expectations. The training also encourages Tutor-Advisors to develop a sense of responsibility and dedication which may extend even beyond their immediate job.

In 1981, OPERATION SUCCESS introduced an action program of training based upon learning theories. Learning is most efficient when the learner is actively involved in the learning process, rather than merely listening to the description of it. The greater the number of senses involved, the more effective is the learning. Therefore, instead of only relying on a two-day lecture series, the program has included continuous training throughout the semester which involves weekly meetings of at least an hour for various informative and training activities.

The model shows the Conference with both Counselors present. During the Tutor-Advisor interview, program goals, objectives and philosophy, student population characteristics and the overall working of the program are disseminated to the Tutor-Advisor job applicants. After recruitment, the Tutor-Advisors undergo a two-day Training and Orientation Program.

In the Training and Orientation Program, a professional counselor from the Counseling Center guides the tutors through various exercises which teach them to be sensitive to the students they would tutor. The

program counselors, on the other hand, plan a program of activities to enhance maximum interaction within the group which included the following:

more experienced tutors sharing their experiences with those just entering the program; exercises, slide presentations, discussions, question and answer periods to facilitate the learning of necessary skills for being a Tutor-Advisor; and counselors use a traditional lecture format to best provide information on the day-to-day procedures of OPERATION SUCCESS. In providing the above items, Case-Study, Demonstration, and Role Playing methods are employed during the course of the training session.

The Case-Study method is a technique which has been popularized by the Harvard Business School. The case method, when used as a puzzle that can be solved, increases the trainee's power of observation, encourages the group to test their solution's reality, and urges the group to consider not only what to do but how to do it. A case solved during Tutor-Training and Orientation, often written by tutors in the program, encourages Tutor-Advisors to gain a realistic perspective in carrying out their role.

Another feature introduced into the training program last year was a series of eight video tapes produced and directed by program counselor, Deema de Silva. All the vignettes were written after observing actual situational experiences by tutors in the program with Tutor-Advisors and their tutees as actors. Voice for the narrative was provided by a student who is majoring in theatre at Wichita State University and the music was provided by Jerry Hahn, a faculty member. The demonstration effects of the tapes, such as in "Tutoring a Student From a Different Culture" or "Reviewing for an Examination," have been especially useful for Tutor-Advisors by
aiding them in developing insights into behavior that would be more effective in interpersonal relations and in dealing with concerns that are common to the tutorial process.

The next technique that is used for training is Role Playing which is a form of simulation emphasizing a human relations problem or a tutorial problem. It differs from ordinary drama in that the actors are given no lines to memorize and must improvise as they go along. A group discussion following each role-play makes them more effective in teaching Tutor-Advisors to be more self-conscious and analytical of their behavior than they might normally have been in real life. Furthermore, role play pushes Tutor-Advisors to show imagination and ingenuity in devising solutions to everyday situations without being penalized if they make a mistake. If guided carefully, role play is a highly effective technique for arousing interest and stimulating group participation.

On-The-Job-Training is thereafter provided with the weekly staff meeting. Every Friday for one to two hours, a distinguished guest speaker is invited from the Wichita State University faculty and staff to inform the Tutor-Advisors. For example, during a "Money Management Workshop," a professor from Wichita State University's College of Business guided the tutors through a series of steps where they actually budgeted a certain sum of money on paper. This particular meeting was also attended by program students who had to learn to budget their grants, loans, and scholarship money in order to stay in college.
OPERATION SUCCESS' model of Tutor-Advisor training has been developed to insure that all tutors are familiar with, and responsible for their job functions. The initial orientation sessions provide an opportunity for Tutor-Advisors to get acquainted with the staff and to acquire background information on the tutorial component activities, student needs and policies of the program. The on-going training is provided to insure that each tutor has an opportunity to share experiences and to sharpen and enhance his or her tutoring skills.
During the Fall Semester of 1981, OPERATION SUCCESS, in cooperation with the Media Resource Center at Wichita State University, produced eight instructional video tapes (copyright 1981). These video tapes were tailored to meet the needs of the disadvantaged students.

The video tapes were produced and directed by counselor, Deema de Silva, and edited by Jim Suer of the staff of Media Resources. Jerry Hahn of the faculty at the Department of Music at WSU and Miles Hahn, student at Northwestern University, donated their time to play light jazz background music for each tape.

The video tapes have been used to inform and instruct during Tutor Training and Orientation and intermittently during on-going training sessions for the Tutors at OPERATION SUCCESS.

The following are the other titles of the Tutor video tapes:

1. Tutor-Tutee Responsibilities
2. Finding Information from the Library
3. Tutoring Tips
4. More Tutoring Tips
5. Tutoring a Foreign Language
6. Tutoring a Student from a Different Culture
7. Reviewing for an Examination
8. Meeting with an Instructor
Brief Description of Each Tutor Video Tape

Tutor-Tutee Responsibilities

This video introduces the nature of the initial session with a student. It emphasizes that both tutor and student have responsibilities that need to be fulfilled to get the maximum benefit from the tutorial sessions. It emphasizes three main responsibilities: punctuality, preparedness, and advance notification if unable to meet for the session.

Finding Information from the Library

This video involves helping the student to find information in the library. It includes information about using the card catalog call numbers and the Library of Congress list of subheadings to find appropriate material.

Tutoring Tips

This video demonstrates how a tutor assists a student who comes to a session with a particular mathematics problem. Also included is the importance of positive reinforcement and the need for frequent contacts with the student's professor.

More Tutoring Tips

This video shows a tutor encouraging his student to be prepared for her class through reading the material and identifying problem areas. It also shows the student trying to answer problems on her own before coming for a tutorial session.
Tutoring a Student from a Different Culture

This video shows a tutor helping a student from a different cultural background to his own. It emphasizes that the tutor should empathize with the student and urge her to read for details. The tutor administers a sample test in order to build confidence in the student who has to sit for the real examination, the next week.

Tutoring a Foreign Language

Using the foreign language during the session is important when tutoring a foreign language. It is important to help the student develop a sense of mastery over the language and to help the student sort out relevant material. This video provides this information and more.

Reviewing for an Examination

Many hints for studying for a test are given in this video. It includes studying key concepts and chapter summaries. It also shows the importance of studying early, having adequate sleep and arriving early for the exam.

Audio Slide Presentation of OPERATION SUCCESS

A significant project completed during the Fall Semester 1981 was an audio and video slide presentation of the Special Services Program at Wichita State University. The photographs were taken by counselor Deema de Silva, and a narrative was written to describe the spectrum of activities at OPERATION SUCCESS. Doug Boody, a theatre major, worked with de Silva and Jim Suer of the staff at the Media Resource Center to coordinate the narrative with the slides. The package consists of sixty-five slides which cover many of the activities of the Tutorial and Cultural Components.

Wichita State University

SCHEDULE OF TUTOR-ADVISOR TRAINING/MEETINGS

SPRING 1983

JANUARY

21  Tutor Orientation and Training
28  Tutorial meeting regarding counseling and training

FEBRUARY

4   Tutorial staff meeting, emphasis on student academic achievement
11  Tutorial staff meeting, discussion on tutorial process
18  Tutorial staff meeting, focus on peer counseling
25  Tutorial staff meeting, discussion of possible cultural activities

MARCH

2   "Note Taking"
   Featured Speaker: Ms. Sue Martin, Instructor of Learning Resource Center
4   Tutorial staff meeting
11  "Student Careers"
   Featured Speaker: Dr. Gerry Lichti, Assistant Dean, College of Liberal Arts and Professor of English
13-18 Spring Break
21  Tutor-Counselor-Student Conferences and Tutor Evaluation
25  "Teaching Methodologies for Mathematics"
   Featured Speaker: Dr. Kirk Lancaster, Professor of Mathematics
29  Tutorial staff meeting
   Featured Speaker: Ms. Sue Martin, Instructor of Library Media Resources Center
APRIL

8 Tutorial staff meeting

15 Featured Speaker: Dr. Don Wineke, Professor of English

18-22 Tentative dates to hand out program evaluation sheets to students

22 Tutorial staff meeting
"Preparation for Resume Writing"
Featured Speaker: Ms. Sally Sheets, University College Counselor

29 LAST TUTORIAL STAFF MEETING FOR THE SEMESTER
"Resume Writing Workshop"
Featured Speaker: Ms. Sally Sheets, University College Counselor

MAY

1 Last day of tutoring

3 Last day of classes

5-11 Final examinations

15 Commencement
OPERATION SUCCESS

FALL 1983

AUGUST

19 Tutorial staff meeting, new tutor orientation
  "Motivating Students"
  Featured Speaker: Dr. Ann Sweney, Assistant Director of Center
  for Human Appraisal

SEPTEMBER

2  Tutorial staff meeting
   "Teaching and Learning Styles"
   Featured Speaker: Dr. Myrliss Hershey, Associate Professor of
   Educational Psychology

9  Tutorial staff meeting

16 Tutorial staff meeting: yearbook pictures taken

23 "What Are TRIO Programs"
   Featured Speaker: Mr. Mario Ramos, Director of OPERATION SUCCESS

30 Tutorial staff meeting

OCTOBER

7  "Career Aspirations at the High School Level"
   Featured Speaker: Mrs. Mary Garcia-Navarro, Career Counselor

14 "Near Death Experiences"
   Featured Speaker: Dr. Howard Mickel, Assistant Professor of
   Religion

21 "Evolution of a Course"
   Videotape/Discussion

28 Tutorial staff meeting

NOVEMBER

4 Computer Center Orientation

105
"Effective Communication"
Featured Speaker: Dr. Laurel Klinger-Vartabedian, Assistant Professor of Speech Communication

Tutorial staff meeting

DECEMBER
2  "What Constitutes a Handicap?"
Featured Speaker: Jo Gardenhire, Director of Handicapped Services

9  Tutor luncheon and meeting
Films: "The Critic"
     "Cosmic Zoom"
     "Begone Dull Care: Caprice in Colors"
For the third consecutive Spring, OPERATION SUCCESS tutors were honored at a banquet held at the home of Mr. Leslie Rudd, a Wichita area businessman.

Each tutor brought a covered dish, as a contribution to the social gathering.

The Awards Banquet while providing a very enjoyable and pleasant atmosphere, serves as an occasion to provide appreciation of the dedication and commitment of tutors at OPERATION SUCCESS.

Wine was served with the buffet style dinner which provided a variety of cuisine from various cultures. After the dinner, the tutors, their guests, staff members and distinguished guests went upstairs for the awards ceremony.

The Chief guest, Dr. John Poe, Director of the Honors Program at Wichita State University, presented the awards to each tutor. The award which was a brass plate on a wooden plaque had the following words engraved on it:

"OPERATION SUCCESS
Tutor Award
in Appreciation of
devotion and invaluable services contributed
(by (Name of Tutor)"

107
After the awards were presented, Dr. Poe made a speech followed by a brief talk by Assistant Dean of Students and TRIO Coordinator, Deltha Q. Colvin and Vice President of Student Affairs and Dean of Student Affairs, James P. Rhatigan. They spoke of the valuable services rendered by the tutors.

Director, Mario Ramos also gave awards of appreciation to the staff members, Deema de Silva, Vince Robertson and Jan Atakpa.

Special Programs
Tutor of the Month Awards

Once a month, OPERATION SUCCESS Program Counselors choose a Tutor of the Month. The tutor receives a coupon for a free dinner, or a ticket to a movie theater from the Director, Mario Ramos. The tutors' names are engraved on the Tutor-Advisor Award Plaque that is hung on the wall as a permanent fixture. The program counselors base their decision for choosing "Tutor of the Month" on the following:

1. Turning in all necessary paperwork, such as: Student Contract, Progress Reports, Contact Slips, Mid-term and end of term student evaluations.
2. Signing-in daily when checking mailbox.
3. Attendance at Friday meetings.
4. Checking back with Counselors and providing feedback on student progress.
5. Supportiveness for program activities.

CULTURAL COMPONENT

Visits to places of scientific, historical and artistic value

Food Sampler Parties

Appreciation Parties for Staff & Tutors. Give-away, Welcome, Birthday Parties

Educational visits to different universities

Annual Spring Fling

Screening of cultural movies

Cooperation with the International Program and Department of Anthropology

OPERATIONS CHART FOR CULTURAL COMPONENT
CULTURAL COMPONENT

The philosophy of the programs organized by the cultural component is that a student's learning can be greatly enhanced by various kinds of cultural and educational experiences. This is particularly true of students enrolled at OPERATION SUCCESS coming from various ethnic backgrounds and are determined as being disadvantaged in being first generation college students from low income families.

The objective of the cultural component programs is to provide access to events that promise a cultural and educational value which our students, perhaps, might not otherwise have an opportunity to experience. The events planned offer cultural, historical or sociological significance, expansion of educational horizons, and an opportunity to interact with individuals from different cultures.

The following is a short summary of some cultural activities our program participated or conducted during the 1983 academic year.

SPRING 1983

A Valentine's Day "food sampler" was held on February 14 in the OPERATION SUCCESS office with cultural pastries and ethnic food dishes donated by staff members and program students. During a two-hour period during midday, many students and university staff personnel came and shared in the decorated office in an atmosphere of companionship.

The film "From Harlem to Harvard" was a Harvard student project that traced the life and development of an inner city youth through his first couple of years at a prestigious school. The film was brought to campus on March 1 with free admission and open to all university personnel. Students enrolled in OPERATION SUCCESS attended the screening of this film.
The most important educational visit of the year is the field trip taken during Spring Break each year. During 1983, eight students and two staff members took the trip to Kansas City, Missouri on March 16-20. The activities included a classic foreign film, the Museum of History and Science, Truman Library and Museum, Tiffany's Dinner Theatre, the St. Patrick's Day Parade, and the 1859 Marshall's Home and Jail. Other sights and attractions included a tour of Swope Park, Crown Center, a movie, Country Club Plaza, Westport Square, a gala luncheon, and a music concert headlined by the group "Prince." This outing ended months of preparation and involvement by many students who had signed up to participate.

A film thought to have some important significance was the movie about the life of Mohandas K. Gandhi. Free tickets for those interested students to see the film "Gandhi" was sponsored by OPERATION SUCCESS on April 12. A short response survey was the only requirement to be eligible to attend as it is with all program activities.

Another event that the program was willing to sponsor was the Mid American All-Indian Center Pow-Wow on April 17. Food, dance, teachings, and dress are done in the Indian tradition. Wichita is fortunate to have the opportunity to host this cultural event on an annual basis.

"Dinosaurs, the Terrible Lizards" was the subject of an informative and enlightening presentation at the Wichita Omnisphere on April 24. Students attending reported that the show was interesting and educational.

The Fourth Annual Cultural Spring Fling was held April 29 with its usual blend of international music attractions, international dancing, and many ethnic and cultural food dishes available. This gala event provides publicity for the program as well as strengthen friendly relations among the university, program, and the community. Those participating in this year's activities included the Indian Dancers, Egyptian Treasure Dancers, Grapevine International Dancers, and the Exodus Reggae Band.
FALL 1983

A food sampler to celebrate Mexican Independence Day was again held in the program office September 16 complete with the appropriate food and decorative atmosphere. As always, the event is over the holiday period when a host of university students, faculty, and staff are able to interact.

The 15th Annual Arts & Crafts Fair was held September 17 in Hillsboro, Kansas. During the day, entertainment and demonstrations by over 300 artists and crafts people were offered. Admission was free and transportation was provided by the program.

German culture came to Wichita in the form of the annual Oktoberfest held September 23-October 2. For this event, program students attended any of the available days, and after writing a short reaction paper on "What I Saw in German Culture", they were reimbursed their $2.00 admission cost. It was an enlightening experience for those who participated.

The end of October traditionally brings another food sampler to the office agenda. Visitors and pre-schoolers were entertained October 28 with a Halloween celebration.

Two films featuring primary roles of Blacks were shown at a community theatre October 28 as a fundraising event. The films "Gospel" and "The Man" were chosen also for its particular appeal to the community. This event was appreciated by the non-university population and it served as exposure for the program.

Due to the success of the previous films, OPERATION SUCCESS sponsored the showing of "Say Amen, Somebody" November 11-13. This documentary jubilee of Black American gospel met with good response and was again promoted among program enrolled students as well as in the community.

Cultural films have been used by the program frequently in order to offer entertainment to the minority population of the Wichita community. The appeal of these cultural films has encouraged minority participation.

*Other activities do occur during the academic year that are cultural. Our participation as a program is limited, but we are involved with campus and community events monthly.*
RESEARCH AND EVALUATION COMPONENT

Statistical data tabulation for each semester

Graphical Illustration of the collected data

Weekly monitoring of student enrollment

Writing of case-study

Publishing of semester report of program overview and performance

Analysis of program evaluation, Tutor-evaluation and student progress reports

Analysis of grades received by students in the courses tutored

Discussion of results to formulate strategies for improvement in all the components of the program

OPERATIONS CHART FOR RESEARCH AND EVALUATION COMPONENT
RESEARCH AND EVALUATION COMPONENT

The goal of the evaluation plan for Operation Success is to obtain valid and reliable feedback on a daily, weekly, monthly, and semester basis and to maintain effective strategies to best serve the disadvantaged student. To achieve this goal, evaluation instruments have been developed to obtain data on all of the components. These instruments ensure a greater utilization of human and physical resources available to the program by collection of statistical data, analysis by charts, tables, illustrations, and graphs. Much of the evaluation assesses services to students and the adequacy of those services.

**Needs Assessment**

A needs assessment is administered to each student at the beginning of the semester. The needs assessment will enable each student to indicate their perceived academic needs and receive individual assistance in the academic areas requested.

**Student Conferences**

The Student-Tutor-Counselor conferences at mid-semester provide staff with information that may not have been previously shared about their educational goals, performance, and concerns. A comfortable, friendly open atmosphere which contributes to the feeling of trust is created during these conferences. This is to obtain valid information for the continuation of quality assistance to each student.

**Informal Observations**

At the weekly tutorial meetings, counselors will encourage tutor-advisors to identify behaviors that will enhance or inhibit learning. Informal observations are helpful techniques to diagnose problems that may be inhibiting the student's education and usually experienced tutors will provide peer-counseling for a troubled student during the tutorial session.
Standardized Tests

If a tutor observes that a student is unable to grasp simple mathematics or language concepts, a basic skills standardized test is available for the students to take. The program counselors will administer the test to make students aware of the underpreparation and need for an intensified program of study in specific areas.

Files and Cumulative Records

A file will be maintained on each participating student. The file will have the following information: enrollment card, eligibility criteria, information pertaining to income level when applicable, student-tutor contract giving details of time, day and responsibilities of both student and tutor. Cumulative information will be maintained on student-tutor sheets with descriptions of peer counseling and grades.

Monitoring Present Program Participants

Academic performance of program participants is monitored throughout the semester by a variety of methods. From the beginning of the semester, a student who is assisted through the tutorial component has his/her academic progress monitored. Each tutor will follow the student's academic progress and log the appropriate information on academic progress in the space available on the contact slip. During the middle of the semester, a list of all program participants who have a mid-semester down-slip will be obtained from the Registrar's office and used to counsel students. Finally, grade slips will be obtained at the end of the semester from the Registrar's office, and will be recorded individually as well as separately in order to assess individual progress as well as cumulative progress achieved by the program participants.

Monitoring Past Program Participants

Files of all past program participants will be stored until they graduate. Files on students who have been served by the program and who are still enrolled
at the university, but are not currently using the services of the program, will also be maintained. The Registrar will be requested to send names of flagged program participants at the time when a list of graduates are available. This will enable the program to keep an overall record of all participants who have received program services and their progress, thus a tracking system to monitor student progress has been developed.

Evaluation Plan of Tutorial Component

There are five basic phases in the continuous system of monitoring and evaluating participant academic performances and progress. The following list displays an overview of this evaluation. The evaluation instruments used during each phase are attached at the end of this narrative.

Phase 1

Enrollment criteria completed by student.
Needs assessment administered by counselor.
Open new file or continue recording in previous file.

Phase 2

Student signs for Study Skills course in deficient area.
Record assistance, record daily, weekly, and monthly figures of students by eligibility criteria, grades to mid-term criteria, and end of semester evaluation.

Phase 3

Receive tutorial assistance.
Student: selects learning activities.
Tutor: selects techniques of instruction, monitors student's academic progress, cooperates with staff to assist student in successfully completing course.

Phase 4

Evaluation on daily, weekly, and monthly basis.
Continue to keep records of student statistical data, including analysis and statistical breakdown to identify trends and areas of need.

Phase 5

Evaluate effectiveness of tutorial services provided.
Maintain statistical records.
Record statistical analysis by data with narrative.
In Phase 1, the student completes an enrollment card (page 108) which is used by the counselor to determine enrollment eligibility criteria of the student and record the information (page 109). The counselor also administers and then reviews the individual needs assessment of the student (page 110).

The actual assignment of tutorial assistance takes place in Phase 2. The counselor matches a tutor with the student according to the academic competency of the tutor and need area of the student. An assignment slip (page 111) is completed by the counselor and given to the selected tutor. The "Tutor-Student Contract" will then be signed by the student and the tutor initiating the tutorial assistance. The purpose of the contract is to affirm the agreements and responsibilities of both the tutor and student (page 112). A letter signed by the staff (page 113) is then given to the student which describes further how the student will derive the maximum benefit from the tutorial session.

The student now enters Phase 3 and receives tutorial assistance from the individual's assigned tutor. The tutor will record what concept area was covered during the tutorial session, amount of time spent, and any progress observed on a "Student Contact and Peer Counseling Form" (page 114). A "Missed Appointment Slip" (page 115) will be used to document tutorial sessions missed by the student without any prior notice. A copy of the "pink slip" goes to the counselor and one goes into the student's file to be used to counsel the student for better attendance.

There are three important objectives in Phase 4; the execution of these objectives fulfills the overall purpose of this phase. The main objective will be to (1) select devices to observe student academic progress; (2) to provide feedback to students of methods for improvement in striving for a goal of academic excellence; (3) to counsel and encourage the student.

Finally, in Phase 5, the effectiveness of tutorial services provided to
the student is evaluated. The following questions will be answered: First, were the needs of the student met? The Tutor responds to this question by completing the "Student Progress Report" (page 116). Second, was the tutorial assistance provided effective and satisfactory? The students, thus in turn, evaluate the tutors, through the "Tutor Evaluation" form (page 118) giving their perception of the tutoring received. This serves as a two-way avenue through which staff members can realistically evaluate services. Third, was there improvement in the study skills of the student, did the GPA increase and were all of the total program services and objectives met? To answer these questions, the student is requested to complete a "Program Survey" (page 120).

If a student withdraws from the program, a program-developed "Student Withdrawal Report" is completed by the student (page 122). This report is part of the exit interview process and is used to assess reasons for withdrawal from the program.

All evaluations are conducted by the Research and Evaluation Component. The staff will review all data collected, including the responses of students regarding activities provided and responses of students to determine if the program has met its goals and objectives. All of the daily, weekly, monthly, and semester data will be collected through program developed forms. The collective use of all information maintained and utilized by the program provides for an excellent evaluation of the Special Services Program and its services.

TUTOR/STUDENT CONTRACT

OPERATION SUCCESS
Wichita State University
689-3715 or 689-3716

AGREEMENT & RESPONSIBILITIES

I. The Tutor and Student agree to meet at least once a week.
   A. If unable to attend, the Tutor shall contact the Student at least hours in advance in order to be excused.
      1. A call can be made to the Student's place of residence or work, or a message can be left at the Program Office.

II. The Tutor and Student agree to miss no more than 3 unexcused sessions per semester. Discretion will be used on the amount of excused absences accumulated.

III. The Tutor and Student agree to be prepared and on time for all sessions.
   A. The Tutor shall be attentive and knowledgeable concerning the content and progress of the course.
   B. The Student shall read, review and identify the problem areas needing clarification.
   C. The Tutor or Student shall wait 15 minutes before counting the session as being an unexcused absence for the late party.

IV. The Tutor and Student agree to meet at the following times during the week:

   MONDAY TUESDAY WEDNESDAY THURSDAY FRIDAY SATURDAY SUNDAY

      Changes are permissible but must be agreed upon.

V. The Tutor and Student agree to fill out and complete all pertaining forms.

VI. The Tutor and Student agree to meet for tutoring on-campus unless special arrangements are made.

VII. The Tutor and Student agree that the violation of any part of this contract could result in the termination of this agreement.

VIII. The Tutor and Student agree to fulfill this contract and recognize that the Program Counselors are there to help service any needs and work with any problems.

TUTOR

STUDENT

Program Counselors: Deema de Silva, Vince Robertson
Dear

First, we would like to take this opportunity to say, "Welcome to OPERATION SUCCESS". We are sure that the benefits you receive will lead to your academic success. In order to receive maximum benefits we have developed some guidelines.

A tutor is assigned to you because you have expressed a desire to improve your skills in a particular area of study. Your tutor will work with you throughout the entire semester, according to the terms of the TUTOR-Student contract.

Having a tutor means that you are being assisted by another student; someone who can relate to many of the pressures you may experience. He or she can serve as an advisor in their academic major. Also, he or she can be a valuable asset to you for information and referral regarding other WSU services. Having a tutor also means that you are willing to attend every session during the semester and put forth the necessary effort to learn. If you have to miss a tutorial session please notify your tutor in advance. If you are unable to contact him/her at home, you may call your tutor at the OPERATION SUCCESS office (689-3715) where a message can be left.

Our program is designed to provide assistance in a systematic way. Therefore, maximum use of each session is one of the most important factors in the tutorial meetings. Random or "hit and miss" sessions do not bring the positive rewards of systematic learning during weekly sessions. So, in order to enhance the tutorial sessions, you need to be prepared. Think about what you want to accomplish in the tutorial sessions. Read, review and identify the problem areas in which you need help and write down the points to discuss or clarify. Use the session time for your maximum benefit. In this way you can realistically expect to meet your course goals. Be open and attentive. Your tutor is willing to spend some time with non-academic problems affecting your performance. Also, remember that OPERATION SUCCESS counselors are there to help service your needs and work with any problems that may arise.

This semester, prepare to meet your goals.

Deema deSilva, Program Counselor
Vince Robertson, Program Counselor

Please read this note, detach and return it to either Vince or Deema, to initiate the tutoring you have requested.

Dear Mario, Deema and Vince:

I have read the above letter and agree with you that this is the most effective way for me to utilize the tutorial assistance at OPERATION SUCCESS. I clearly understand my responsibilities and will abide by the rules of the program.

Thank you for your concern.

Sincerely,

OPERATION SUCCESS,
Student

Wichita State University, Campus Box 81, Room 309 Grace Wilkie Hall, Wichita, Kansas 67208, Telephone: (316) 689-3715, 689-3716.

Note: Please choose the number (1,2,3,4,5) which most closely reflects your opinion as regarding the characteristics of your tutor. Color the space in the computer sheet starting with Number 1.
1. _______ My tutor was friendly.
2. _______ My tutor was courteous.
3. _______ He/She was interested in my work.
4. _______ My tutor was patient with my work procedures.
5. _______ My tutor was usually on time for the tutoring sessions.
6. _______ My tutor was knowledgeable in the subject area assigned to him/her.
7. _______ My tutor was usually available.
8. _______ My tutor was dependable.
9. _______ My tutor was encouraging.
10. _______ My tutor was easy to work with.
11. _______ My tutor used tutoring time very well.
12. _______ My tutor explained the material well.
13. _______ My tutor helped me improve my study habits.
14. _______ My tutor was a good listener.
15. _______ How well did you prepare for the sessions to obtain the maximum benefit of your tutor?
16. _______ How well does he/she tutor?

   5 = Excellent; 4 = Very Well; 3 = Satisfactory;
   2 = Unsatisfactory; 1 = Poorly.

17. Were you satisfied with your tutor?

   5 = YES; 1 = NO

18. For this course, would you accept or recommend the same tutor again?

   5 = YES; 1 = NO

We would appreciate your comments on any of the above answers.

Any other comments positive, or otherwise, about your tutor:
The following is a survey of OPERATION SUCCESS in which you participated this past semester. The items which follow will be used to assess the program in order to make it more effective. Please answer all of the questions as accurately as possible.

PART I

The answers in this section apply to this past semester; please mark the appropriate answers.

AS A RESULT OF PARTICIPATION IN THIS PROGRAM, I HAVE:

1. Increased my awareness of my academic strengths and weaknesses.

2. Got to know about financial services/obtained information on scholarships.

3. Become more confident about my educational goals.

4. Become more aware of my abilities and how they relate to my career plans.

5. Increased my awareness of university services.

6. Increased my awareness of self in general.

7. Asserted myself to a greater extent than before.

8. Improved my ability to express myself.
AS A RESULT OF PARTICIPATION IN THIS PROGRAM, I HAVE:

9. Began or continued to develop a set of personal values to guide my life.
10. Increased my awareness of other people (races, cultures, etc.)
11. Become more comfortable about continuing my education.
12. Have met new people and have a feeling of belonging.
13. Received assistance through: They were beneficial to me:
   1. Tutoring services Yes No
   2. Typewriter services Yes No
   3. Book loan services Yes No
   4. Workshops Yes No

PART II

1. What, in your opinion, was the most beneficial part of OPERATION SUCCESS?
   How was this helpful to you?

2. What would you change about the program?

3. Will you enroll in the program next semester?

4. What are your plans for next semester?

COMMENTS:
Reason for Withdrawal from Program:

A SUCCESS STORY

Maria Rodriguez lived in a small western Kansas community. She had been raised by very conservative Hispanic parents. Maria graduated from high school in May 1965 and concentrated on being a homemaker and a housewife. She adopted these roles well and while raising four children, actively involved herself in community activities. She was involved with the St. Paul Methodist Church and organized many of the programs for the Hispanic community.

Involvement in many church activities brought her into contact with various people and programs at Wichita State University. Through a Hispanic faculty member, Maria became aware of the Continuing Education Program at the campus. She had not known that such a program existed at the university and had always thought that being out of school for more than 13 years had put her out of the educational system for good.

In the fall of 1977, she decided to go to college. Although she decided to enter college, she could not enroll during that particular semester due to the lack of encouragement from her family. The following semester, despite the continued lack of family supportiveness, she enrolled as a Continuing Education student with Spanish as her major field of study. Even after many years away from academic work, she progressed in college. She studied her books conscientiously and fulfilled the many obligations of being mother, housewife, and student. Maria's goal was to stay in college and maintain a grade point average of 3.0 or above.

Maria heard that the Special Services Program titled "OPERATION SUCCESS" at Wichita State University was looking for a Spanish tutor. She applied for the position, was interviewed, and she was hired as a tutor in 1978. Tutoring proved to be a rewarding experience for her. She continued broadening her horizons.
taking advanced courses. In the fall of 1979, she decided to have a double major by adding Business Administration to her present major area of study, Spanish. However, she found that she was unable to understand the concepts in her math course, therefore she enrolled at Operation Success to obtain tutorial assistance. She mentioned in her interview that obtaining the tutorial help in mathematics helped her maintain her grade point average above her goal of 3.0. As time went on, she felt that she needed tutorial assistance in areas of Economics, Accounting, and other business courses with which she was totally unfamiliar. She says, "The support I received from the Director and my tutors at Operation Success kept me going during tough times."

Maria continued to maintain involvement in community activities and remained very active in her church. Some of the special areas of her involvement were with the Hispanic Minorities of the United Methodist Church through English as a Special Language classes, the Health Clinic, and Christian Education. In the summer of 1980, she received a full scholarship from Sigma Delta Pi to study in Puebla, Mexico. She also attended the First National Hispanic Women's Conference in San Francisco, California. The Director of Operation Success, Mario Ramos, raised funds to cover her total trip to enable her to attend this conference; she felt that this was a "growing experience" for her. From then onwards, she gained confidence to appear as a speaker on many forums. In 1981, she received the United Methodist Ethnic Minority Scholarship. Thereafter, she displayed outstanding performance, both in extracurricular activities and academic work. She says this was largely due to the total dedication and to the tremendous support she received from Operation Success. For a first generation student from a Hispanic background to come to college after 13 years of being away from academic studies, speaks of the positive effects of the program. When the necessary support services are made available to the special needs student, they can shine because
they have potential to achieve.

Maria graduated from Wichita State University in May 1983. She was offered the position of Program Director in the United Methodist Urban Ministries. She is president of the Hispanic Network and Co-ordinator of the Bilingual/English as a second language program for the public schools for the city in which she resides.

A STUDY OF SOME CHARACTERISTICS OF FOUR PROBATIONARY STUDENTS IN THE SSDS PROGRAM: RESEARCHER’S IMPRESSIONS AND AVAILABILITY OF SUPPORTIVE SERVICES

Following are brief college study profiles of four students enrolled in OPERATION SUCCESS. The researcher, a graduate student in Counseling and School Psychology was given names of seven students who are on, or recently have been on academic probation. She observed and interviewed the following four students and followed their progress for eight weeks during the Spring semester 1983. Their names have been changed to protect their anonymity.

Student A

Kevin is a 19 year old, Black, single male. He works part-time and attends school full-time. He is a freshman majoring in computer engineering. He has two siblings, including an older sister who attends Wichita State University. He and she are first generation college students. Until recently, he lived with his sister and her young baby, and this situation interfered greatly with his ability to study. Now, he has his own apartment and more time and better conditions for studying.
Kevin is retaking the calculus course he failed last spring semester, and with the help of his tutor, believes he will perform better.

Kevin graduated from a Kansas City high school and his parents still live in Kansas City. They are supportive of his attending college, and have given him some financial support. He has also received financial aid from a Pell Grant.

Student B

Stanley is a 33 year old, Black, married male. He and his wife moved to Wichita from another country so that he could attend Wichita State University. His major is electrical engineering. He works part-time and attends school full-time. He says he does not have sufficient time for studying, and his studying time is limited to early in the morning and between classes. He was put on academic probation at the end of the spring semester, but went to summer school and raised his grade point average enough that his probationary status was removed.

Stanley receives a Pell Grant and is also a first generation college student. He says he feels a good deal of pressure to be a model and source of inspiration to younger members of his family. He has four siblings.

Student C

James is a 23 year old Black, single male. He is one of 12 children and a first generation college student. He is a Pell Grant recipient. He is a junior majoring in art and was on academic probation until the end of the spring 1983 semester. James is anxious to leave Wichita. He does not anticipate graduating from Wichita State University, but instead is applying to a school for chefs in New York. If accepted, he will attend classes there, and will probably finish his art degree later at another university. His level of motivation for
doing well at Wichita State University seems low. He says he has no study or
school related problems. He seems interested in the activities of a fraternity
of which he is vice-president.

**Student D**

Terry is a 20 year old, White male. He works part-time and is taking one
class this semester and trying to raise his 1.4 grade point average. He is
taking the class for the second time. He is no longer being tutored. He is
reading his assignments more than once now and has found that his comprehension
is improving as a result. He cites reading comprehension and test anxiety as
being problems. His level of motivation seems high.

Terry is the youngest of seven children, three of which have graduated from
Wichita State University. He and his siblings are first generation college
students, and he is a Pell Grant recipient. He is considering economics and
accounting as possible majors.

**Observations**

Some commonalities in these students are evident. All four students are
first generation college students, although two of them have siblings that are
attending or have attended Wichita State University. In both cases the siblings
are older and may have "tested the waters" and served as role models for young-
er siblings desiring a university education. All four have jobs. All four
qualify as Pell Grant recipients, i.e. their family incomes are low. All are
male (a female student on probation was unavailable for an interview). Three
of the men are Black; one is White. Three of the four students mentioned prob-
lems concerning poor study habits, an environment in which it was difficult to
study, or a lack of time for studying.
The level of motivation of the interviewees seems high, for the most part. Student C was the least motivated, yet, interestingly, he had been able to pull his GPA up to the level that his probation had been lifted.

Discussion

The researcher's impression was that lack of motivation is not strongly influencing the low performance level of these four students. Other possibilities include:

- Lack of time for studying. All four students worked, along with taking classes, so that they do not have adequate time to study.
- Deficient study habits and/or reading comprehension problems.
- Test anxiety and lack of information on how to take an exam.
- Lack of ability to do college-level work.

Conclusion

All four of the students come from backgrounds that are disadvantaged, culturally and/or economically. Operation Success provides cultural enrichment activities and scholarship and grant information, thus helping with problems that are a result of a disadvantaged background. In some instances financial aid may free a student from having to work and go to school concurrently, thereby increasing the amount of time he/she has to study.
Operation Success uses a monitoring system to track the performance of all past and present probationary students enrolled in the program. The grade point average of each program member is monitored. When a student's grade point average drops below 2.0 and the student is placed on academic probation, the program counselors at Operation Success attempt to give the student extra assistance to help the student remove himself from probation. Extra tutoring and counseling might be used to help the student. After a student is removed from academic probation, he/she is monitored closely for the next few semesters or until he/she achieves a stable grade point average above 2.0.

Effective study habits and reading comprehension skills are taught to enhance the performance of students enrolled in Operation Success. Methods of relaxation to be used before test taking and information on how to take a test is also presented. This information is presented in pamphlets, workshops, or on an individual basis as needed.

It should be realized that not all students can be helped with supportive measures. In an open admissions university, occasionally students that are unable to do college work are admitted. Career counseling to help these students explore other options for post secondary education or training could get them pointed in a direction that would provide them with more success experiences than would the university campus.

Based on "A Study of Problems Facing Disadvantaged Students Enrolled at OPERATION SUCCESS With an Emphasis on Students on Probation," by Diane Farnsworth, Wichita State University, Fall Semester 1983.
In the Spring of 1983, a questionnaire was developed through the Research and Evaluation Component by Program Counselor, Deema de Silva. The purpose of the questionnaire was to not only collect but also to obtain the Tutor-Advisor's opinions and perceptions of several projects especially pertaining to the tutorial component. The questionnaire was divided into three main parts. The first part concerned the Tutor-Advisor's initial access to Operation Success. The second part considered the experiences that the Tutor-Advisors had accumulated while working at Operation Success. Finally, the third part attempted to measure among many items, the Tutor-Advisor's perceptions and opinions of the on-going Tutor Training and Orientation to enhance tutorial skills. Of the twelve tutors, ten persons completed and returned the questionnaire.

In the first part, the Tutor-Advisors were asked why they initially thought of joining Operation Success as a tutor. There were six alternatives to choose from. However, each Tutor-Advisor could select more than one alternative that would explain why he or she had initially thought of joining Operation Success. For the six different alternatives, the ten Tutor-Advisors' responses totaled thirty. Ninety-nine percent (99%) or nine Tutor-Advisors thought it was convenient to work on campus. Also, ninety percent (90%) thought it was an advantage of keeping in touch with academic material while tutoring. Eight out of the ten persons believed that it was a convenient way of earning some money. Two of the Tutor-Advisors thought that there was a possibility of enhancing one's confidence by being a tutor at Operation Success. Two persons also saw it as a potential advantage for future job opportunities. No one selected the last category which was the any other category.
In the second part, the Tutor-Advisors were asked first, what their most satisfying experiences were regarding their students. Here, there were six different items which the Tutor-Advisors were to respond "yes" or "no" to. However, some persons chose not to respond to all six items. Four persons responded that seeing a student of theirs gaining study skills was a satisfying experience, while three persons marked that it was not satisfying. Sixty percent (60%) of the Tutor-Advisors thought that seeing students receive better grades was satisfying, while two persons or twenty percent (20%) thought it was not. There were seven persons responding "yes" on whether the experience of seeing the growth of a student in comprehension, concentration, and learning was satisfying; two persons responded "no". Fifty percent (50%) of the group thought that observing a student's increased interest in academic work while experiencing success in college work was satisfying, ten percent did not find it satisfying. Sixty percent (60%) responded "yes" that the feeling of appreciation and accomplishment when a student mentions their tutorial assistance was a satisfying experience, whereas ten percent (10%) responded "no". For the last item, sixty percent (60%) of the Tutor-Advisors thought that being able to offer some counseling as a peer to a student with a personal problem was a satisfying experience; there were none disagreeing with this assessment.

The next part asked the Tutor-Advisors what disappointments they had experienced. There were five items listed as possible areas of disappointment requiring a "yes" or "no" response. Eighty percent (80%) responded that it was disappointing to observe students who are not motivated to study, while ten percent disagreed. Seventy percent (70%) thought that having students not show up at the contracted time often without giving notice disappointed them; the other thirty percent (30%) did not see this as a disappointment. Four of the Tutor-Advisors thought that observing students who are not enthusiastic about academic achievements was
disappointing; an equal number responded that this was not a disappointment. In answer to whether observing a student's inability to perceive the importance of academic achievement in their future job opportunities was a disappointment, thirty percent marked "yes", fifty percent answered "no" and the others did not respond. Four out of the ten thought that observing students who want merely to obtain a "passing" or a "C" grade was disappointing; whereas five persons did not see this as a disappointment. In the other category, disappointments mentioned by Tutor-Advisors were observing a lack of confidence in what the student is doing; having a student whose intellectual skills were not up to college level and not knowing where to start or how to tutor him or her; and lastly, observing a student who knows the material but who has a hard time taking tests to prove they know it.

In the last area of the second part, the Tutor-Advisors were asked if they had experienced some personal growth and development while working at OPERATION SUCCESS. Again, there were five items that the Tutor-Advisors were asked to respond to. Seventy percent (70%) felt they had more confidence in dealing with people, having seen they possessed strengths that could influence growth in their students; ten percent (10%) did not experience this. Four persons responded "yes" that they had developed and/or enhanced their leadership qualities by being in the role of a Tutor-Advisor, while three persons replied "no". Eighty percent (80%) of the Tutor-Advisors thought they had gained inner satisfaction from being able to assist others with the possibility of being instrumental in enhancing their academic work; ten percent (10%) did not experience this. Of the ten Tutor-Advisors, sixty percent (60%) thought they had contributed to the program in a positive manner, and the other forty percent (40%) chose not to answer "yes" or "no" to this. For the last item, sixty percent felt their contributions are worth more than what they are paid for, while twenty percent disagreed or had no response to this.
In the third part of the questionnaire, the Tutor-Advisors were first asked if they thought the initial training they received when they entered the program was adequate or inadequate, eighty percent (80%) of the group thought the initial training was adequate, while twenty percent (20%) found it to be inadequate. The Tutor-Advisors were then asked how they continued to learn the process of tutoring as time progressed. There were four different ways listed and an additional space for other ways that might have been used. Furthermore, each Tutor-Advisor could select more than one item if it applied to him or her. Four persons marked that they learned from observing other experienced tutors. Fifty percent (50%) of the group thought that asking questions of the Counselors helped them and likewise fifty percent (50%) responded that having brief conversations with the Counselors helped them continue to learn the process of tutoring. Three persons thought the weekly Friday tutorial staff meetings were helpful. In the other category, there were three persons responding that they had learned more about the process of tutoring through trial-and-error and their own experiences.

The Tutor-Advisors were asked next about the quality of the weekly Friday meetings. Here, there were three main items which the Tutor-Advisors had to respond to. Eighty percent (80%) of the tutors would have preferred more speakers that would have given them insight into "How to be an Effective Tutor", while for ten percent this was not a preference. On the second item, seventy percent (70%) would have preferred more speakers on "How to be an Effective Peer Counselor", while twenty percent (20%) responded this was not a preference and ten percent did not respond. The third item was broken down into six parts, each being a possible area that a featured speaker had enhanced a Tutor-Advisor's perspective about. Fifty percent (50%) of the group responded that their perspective on Wichita State University instructors had been enhanced. Seven out of the ten thought that the featured speakers had enhanced their perspective on how to be an
effective tutor, and six persons felt the featured speaker had enriched their perspective on teaching methodology. Six persons also thought that their perspective on overall campus activities was enriched by the featured speakers. Thirty percent of the group believed that their perspective on campus services, such as health and dental services was enhanced. On the last item, forty percent responded that their perspective on useful information for their future, such as resume writing, was enhanced by the featured speakers in the weekly Friday meetings.

The tutors were finally asked for their perceptions concerning certain fringe benefits that the Program Director provides to the Tutor-Advisors. Fifty percent (50%) of the tutors liked to be remembered on their birthday by celebrating with a cake or card. Six out of ten would like to have gone for pizza more often, and one person responded that the summer tutor trip was rewarding, while others' answers were that they had not made the summer trip while working at OPERATION SUCCESS. Seventy percent (70%) felt it was gratifying to receive a tutor award at the President's home. Also, seventy percent (70%) felt they were a part of the program and found it gratifying for the staff of OPERATION SUCCESS to recognize their tutorial services as valuable. Lastly, forty percent (40%) of the tutors believed that by assisting their peers and by tutoring, they enhanced their own self-confidence and self-respect.

In summary, by looking at the results of each component, the Director and staff will have an idea of which areas of the program need to be improved. The Tutor-Advisors, by completing the questionnaire, have indicated various strengths and weaknesses as well as their perceptions of what affects them. The Research and Evaluation component, which conducted this questionnaire, has found that this information is linked to the services obtained by the students and is valuable in planning the strategies for an effective tutorial process during the following year.
This questionnaire is designed to collect data on the general feelings, opinions, and perceptions of Tutor-Advisors at OPERATION SUCCESS. Your honest answers would assist the program to offer improved services to our students and facilities and training that are more satisfying to you. Return the questionnaire to Deema's mailbox. Your cooperation is appreciated.

You may check more than one answer.

INITIAL ACCESS TO OPERATION SUCCESS

1. Why did you initially think of joining OPERATION SUCCESS as a Tutor?
   a) Convenience of working on campus
   b) Advantage of keeping in touch with academic material while tutoring
   c) Convenient way of earning some money
   d) Possibility of enhancing one's confidence
   e) Potential advantage of future job opportunities
   f) Any other

EXPERIENCE AS A TUTOR-ADVISOR

2. What have been your most satisfying experiences regarding your students? When relevant, please write a short description of your experience as a response to each question.
   a) To see a student of yours learn study skills
   b) To see students get better grades
   c) To experience seeing the growth of a student in comprehension, concentration, and learning
   d) To observe a student increase his/her interest in academic work as he/she experiences success in college work
   e) I feel appreciation and a sense of positive accomplishment when a student mentions that I assist him/her.
   f) To have been able to offer some counseling as a peer or even act as a 'C' sounding board, to a student with a personal problem. Comment on how effective you felt you were in this capacity.
3. In your own perception, what disappointments have you experienced?
   a) To observe students who are not motivated to study
   b) To have students not show up at the contracted time, often without notice
   c) To observe students who are not enthusiastic about academic achievement
   d) To observe students' inability to perceive the importance of academic achievement in their future job opportunities
   e) To observe students who want merely to obtain a "passing" or a "C" grade (comment on frequency or lack of it)
   f) Any others

4. As a Tutor-Advisor, you may have experienced some personal growth and development. Comment on the following:
   a) I feel that I have more confidence in dealing with people, having seen that I have strengths that can influence growth in my students.
   b) I feel that I have developed/enhanced leadership qualities during my time as a Tutor-Advisor.
   c) I feel that I gain inner satisfaction from being able to assist others who have not had the same advantages I have had so far in life, and that I may have been instrumental in enhancing their academic work.
   d) Looking back at the tutorial process, my contributions to the program have been of a positive nature (please enumerate).
   e) I feel that my contributions are worth more than I am paid for.

5. The Training Program
   a) The initial training I received when I entered the program as a Tutor-Advisor was: adequate inadequate
      Comments:
b) As time progressed, I learned the process of tutoring:

- from other experienced tutors.
- from asking questions of the Counselors.
- from brief orientations or conversations with Counselors.
- from observations of the experienced tutors.
- at the weekly Friday meetings.
- Other ___________________

6. The weekly meetings were targeted to not only enhance the tutor's role in the job capacity but also to enhance the personal growth of the tutors. With this in mind answer the following:

   a) I would have preferred more speakers who gave me insight into "How to be an Effective Tutor."
   b) In addition to the above, "How to be an Effective Peer Counselor."
   c) The weekly meetings had featured speakers that enhanced my perspective on:

- W.S.U. instructors.
- some tips on how to be an effective tutor.
- some methodology of teaching (W.S.U. professors speak on their teaching methodologies).
- my overall awareness of campus activities (announcements by persons who were involved in campus activities)
- campus services (health, dental).
- information useful to my future (i.e., resume writing).

7. Fringe Benefits

The Program Director often raises funds in order to provide some fringe benefits for the tutors. What are your perceptions of their benefits to you?

   a) It is nice to be remembered on my birthday and I have positive feelings when we have a cake, card, etc.
   Comments:

   b) I would have liked to have gone for pizza more often, to share some fun time with my fellow tutors.
   Comments:
c) During the summer, the tutor trip was very rewarding.
   Comments:

   d) It was gratifying to receive a tutor award at the President's home as well as during the last occasion. Comment on the positive and negative aspects:

   e) I feel a part of the program. The staff recognizes my services as valuable, and I receive positive remarks from our speakers.
   Comments:

   f) In the process of assisting peers, my awareness of future goals has become wider, and being on the tutorial staff has enhanced my self-assurance and self-esteem.
   Comments:

   g) Other:
RESULTS OF TUTOR SURVEY

Question 1. Why did you initially think of joining OPERATION SUCCESS as a Tutor?

(9) nine tutors answered (a), convenience of working on campus.
(9) nine tutors answered (b), advantage of keeping in touch with academic material while tutoring.
(8) eight tutors answered (c), convenient way of earning some money.
(2) two tutors answered (d), possibility of enhancing one's confidence.
(2) two tutors answered (e), potential advantage of future job opportunities.

Comment: Improving my ability to communicate difficult ideas.

Question 2. What have been your most satisfying experiences regarding your students? When relevant, please write a short description of your experience as a response to each question.

a) Seeing a student of yours learn study skills. (4) four tutors said yes. (3) three tutors said no.

Comment: This doesn't happen very often - but whenever it does, I am always quite pleased.

I rarely see "study skills", however that is defined, greatly improved.

Yes. Some skills were surprisingly undeveloped.

b) Seeing students get better grades. (6) six tutors said yes. (2) two tutors said no.

Comment: Especially when they begin to see the fruits of their hard work.

This is some thing that really keeps a tutor, or at least myself going. I am indifferent about grades. I emphasize learning and test for it orally. Grades reflect an ability to answer written questions under pressure.
c) Seeing the growth of a student in comprehension, concentration, and learning. (7) seven tutors said yes. (2) two tutors said no.

Comment: Usually once in a tutoring session, all this can be achieved with little difficulty.

d) Observe a student increase his/her interest in academic work as he/she experienced success in college work. (5) five tutors said yes. (1) one tutor said no.

Comment: This is quite encouraging, but unfortunately very seldom seen.

Somewhat, many students take a class because it is required and is of no interest in itself.

It's satisfying to help a person master a class, and then to have that person gain enough confidence to want to take more classes in that area.

e) Feeling appreciation and a sense of positive accomplishment when a student mentions that I assist him/her. (6) six tutors said yes. (1) one tutor said no.

Comment: It's nice to know that you have somehow helped someone accomplish something that they might not have, without you.

Sure, it's a pat on the back.

This is something quite common usually at the end of semester and makes me at least 20 pounds heavier with happiness.

f) Being able to offer some counseling as a peer or even act as a "C" sounding board, to a student with a personal problem. Comment on how effective you felt you were in this capacity. (6) six tutors said yes. (0) zero tutors said no.
Comment: I don't know how helpful I was to the student directly, but talking with the student helped me to realize where she was coming from and to relate to her better.

I have done more academic advising than personal advising. Students usually just need someone to listen rather than advise on personal issues.

I felt my students knew I was always there to listen - they could count on me.

I found a lot of times that person just needed someone to listen to them.

I felt I was fairly effective in this role. I might add that this was in no small way attributable to the information sessions and guest speakers during tutor meetings.

I had a student last (spring 1983) semester whom I have tutored twice before - we are very good friends. In the middle of semester she was having some personal problems, and I found her lost during the session. I asked her to go and see one of the counselors, but she did not ask if I could help her. We spent at least two sessions talking about her problem.

I felt I have been relatively successful in the capacity of a counselor.

No doubt I need work in this area. Problem solving can be so personal, that the most I can do is encourage others to go on any way, but that the decision is theirs. That responsibility for themselves is why I am never more than a sounding board. My "over concern" only makes me uncomfortable, knowing that I can't and usually shouldn't do anything but listen. Yet I would rather listen in discomfort then watch someone silently tearing their hair out.

Question 3. In your own perception, what disappointments have you experienced?

a) Observe students who are not motivated to study.
   (8) eight tutors said yes.
   (1) one tutor said no.
Comment: Some wanted me to feed them the material. This is something seen very often. Pushing them to small successes always gets them motivated!

b) Disappointments of students not showing up at the contracted time, often without notice. (7) seven tutor said yes. (3) three tutors said no.

Comment: Some were very inconsiderate. I experienced this, but I never considered it a disappointment.

For me, this problem wasn't too bad, I had quite a few good and responsible tutees.

Seldom and rare.

c) Disappointments in observing students who are not enthusiastic about academic achievement.

(4) four tutors said yes.
(4) four tutors said no.

Comment: It's important to know if it's just a temporary burnout or not but this apathy is one that I don't know how to deal with.

d) Disappointments in observing students' inability to perceive the importance of academic achievement in their future job opportunities. (3) three tutors said yes.
(5) five tutors said no.

Comment: Let's be frank - a lot of the stuff we tutor is fairly irrelevant to future job opportunities. English, mathematics, and general courses.

This is a sub-topic of the previous question.

e) Disappointments in observing students who want merely to obtain a "passing" or a "C" grade (comment on frequency or lack of it). (4) four tutors said yes.
(4) four tutors said no.

Comment: Sometimes this is understandable with a very difficult (but required) class.

A lot of my students only required a credit/no credit grade, so the grade was not that important.

Too frequently.
I don't feel disappointed with this; if it is the result of the students priority evaluation. I can understand - there might be other things which take precedence over getting an "A" in Basket-weaving (if you get my point!).

Three out of four students want to obtain a "C" in the course and get rid of it. Maybe they are so used to obtaining a lower grade, that they don't even want to work hard for a better grade.

If they are knowledgeable and just can't demonstrate it on tests, then I don't care. If they just want to know enough to get through, I rant about concepts and the fact that knowledge is not measured in mediocrity (Mediocrity is the absence of superiority).

f) Any others

Comment: One thing I have noticed which is very common is lack of confidence in what they do.

To have a student whose intellectual skills aren't up to college level due to family background and to missing out on the basics earlier, not to know what level to start on and how to get through to her.

To observe a student who knows the subject material, but they can not prove it on a test.

Question 4. As a Tutor-Advisor, you may have experienced some personal growth and development.

a) I feel that I have more confidence in dealing with people, having seen that I have strengths that can influence growth in my students. (7) seven tutors said yes, (1) one tutor said no.

Comment: Any experience in positive relations with others, builds confidence.

I feel more confident and comfortable around people I don't know.

This certainly applies to me and this is one of the greatest things I have achieved through tutoring.
b) I feel that I have developed/enhanced leadership qualities during my time as a Tutor-Advisor.
   (4) four tutors said yes.
   (3) three tutors said no.

Comment: Quite true for me. Now I can really make things go for me the way I want to without being a dictator.

Probably not.

c) I feel that I gain inner satisfaction from being able to assist others who have not had the same advantages I have had so far in life, and that I may have been instrumental in enhancing their academic work.
   (8) eight tutors said yes.
   (1) one tutor said no.

Comment: I had a student tell me once that when she received her diploma some day - part of the reason would be because of me.

I am thankful for my ability and I feel a bit obligated to help others if I can.

I sort of had this before.

Sometimes, when neither me nor my tutees feel like studying, we usually talk about our life experiences, and usually people get quite fascinated by any past life.

Definitely.

d) Looking back at the tutorial process, my contributions to the program have been of a positive nature (please enumerate).
   (6) six tutors said yes.
   (0) zero tutors said no.

Comment: I have worked for the counselors, besides tutoring. I have also helped in the research component.

I think this question is a bit odd. Who is going to say "no" for enumeration, see section (3) and (4). In addition, I have made some good friends and; I think, broadened a few minds here and there.

More numerous than I can go into - positive friendships - learning experience, meeting others from a variety of cultures.
I feel that my background helps me to deal with a wider variety of personalities. This can help both in the tutoring room and when the tutors meet to exchange ideas.

e) I feel that my contributions are worth more than I am paid for. (6) six tutors said yes. (2) two tutors said no.

Comment: No comment!

I don't think that I can access my contributions or worth.

Don't we all. It is difficult to assess the relative worth of what we do as opposed to a construction worker or an engineer, who works on flight systems for nuclear war-heads. On the whole, given the situation, it seems fair enough.

In reference to the other tutorial services on campus, we are under-paid! (In reference to private tutoring we are being cheated).

I would like to be paid more, but I can't complain about what I am getting.

Is there any of us who don't feel this way? Even so, I enjoyed tutoring so much that I will continue to do it even if I am paid less. In fact I already tutor friends (on a limited basis) for nothing. I get a lot out of it.

Question 5. The Training Program

a) The initial training I received when I entered the program as a Tutor-Advisor was: (8) eight tutors said adequate (2) two tutors said inadequate

Comment: It has been a while since I have attended a training orientation program, but whatever I can recall from my earlier training - I think it was quite adequate.

Probably due to trying to cover everything in an afternoon. Also the "relating" exercise, while amusing, was really not all that useful.
It is very difficult to teach someone to tutor. This is because tutoring is, first and foremost, communication. Furthermore, it is personalized communication. No matter how knowledgeable you are on the subject, or how many learning theories you know, you can't accomplish much if you can't develop a rapport with your students. However, this is not to say effective when presented as an on-going process, so the tutor can get experience putting it into effect. In other words, the system is fine just the way it is.

I don't think it is possible to completely prepare a person for this type of job, but I think the training helped me to know a little of what to expect and what was expected of me.

Very warm "easy-going" atmosphere. Training was fun as well as informative. I liked the relationships I developed with other tutors, and feel I learned a lot from them as well as the counselors.

I was informed of the offices main mission, the ways that we account for ourselves and how I fit into the big picture. Tutoring (specifically) is not something you can learn by taking a class in tutoring. However, by making the environment conducive to confident performance, our natural abilities were able to function.

b) As time progressed, I learned the process of tutoring:
(3) three tutors said: from other experienced tutors.
(5) five tutors said: from asking questions of the Counselors.
(5) five tutors said: from brief orientations or conversations with Counselors.
(1) one tutor said: from observations of the experienced tutors.
(3) three tutors said: at the weekly Friday meetings.
(3) three tutors said: other.

Comment: My own experience previously.

Mostly from tutoring itself although the above times were somewhat helpful.

Trial and error.

Experience:

From my own experience obtained through the tutoring process.
From trial and error with each tutee. Each required a different approach.

Question 6. The weekly meetings were targeted to not only enhance the tutor's role in the job capacity but also to enhance the personal growth of the tutors.

a) I would have preferred more speakers who gave me insight into "How to be an Effective Tutor."
   (8) eight tutors said yes.
   (1) one tutor said no.

b) In addition to the above, "How to be an Effective Peer Counselor." (7) seven tutors said yes.
   (2) two tutors said no.

c) The weekly meetings had featured speakers that enhanced my perspective on:
   (5) five tutors said: W.S.U. instructors.
   (7) seven tutors said: some tips on how to be an effective tutor.
   (6) six tutors said: some methodology of teaching (W.S.U. professors speak on their teaching methodologies).
   (6) six tutors said: my overall awareness of campus activities.
   (3) three tutors said: campus services (health, dental).
   (4) four tutors said: information useful to my future (i.e., resume writing).

Comment: These meetings should be optional. If someone doesn't want to be there, they usually just become a pain to those who do.

Question 7. Fringe Benefits: The Program Director often raises funds in order to provide some fringe benefits for the tutors. What are your perceptions of these benefits to you?

a) It is nice to be remembered on my birthday and I have positive feelings when we have a cake, card, etc.
   (8) eight tutors said yes.
   (0) zero tutors said no.

Comment: I am too far away from home, and it is always heartwarming to know there are people around who will remember and celebrate your birthday.
My birthday is in the summer, but I enjoy everyone else's.

Although I don't celebrate my birthday, I enjoy sending cards to others so that they know I care about them.

b) I would have liked to have gone for pizza more often, to share some fun time with my fellow tutors.
   (6) six tutors said yes.
   (1) one tutor said no.

Comment: This wouldn't always have to be paid for by OPERATION SUCCESS, (Dutch).

Tough to do.

I have been in this program for a long time and I have seen the good ole days and all the changes that came about in the program. I would like to have more pizza parties, but considering everything, I know why we can't have such parties so often.

This is of course a true statement. Fellow tutors are some of the best company one can have.

c) During the summer, the tutor trip was very rewarding.
   (2) two tutors said yes.
   (0) zero tutors said no.

Comment: Positive rapport was between the tutors for the most part. Working for OPERATION SUCCESS in every capacity was rewarding.

I never went on the summer tutor trip.

I have never participated in a summer trip with the tutors.

Didn't go.

Not applicable - I am willing to find out.

I didn't go on any tutor trip.
d) It was gratifying to receive a tutor award at the
President's home as well as during the last tutor
banquet. (7) seven tutors said yes.
(0) zero tutors said no.

Comment: I am the wrong person to ask, since I hate
ceremonies in general and in principle. How-
ever I will say that a ceremony in which every-
one present gets an award seems to defeat the
purpose of the award - recognition. The awards
could just as easily be put in everyone's mail
box. But that's just an opinion. I'm sure for
others it is a good experience, and it should
be continued.

I think personally, it is quite an occasion, and
I do long for it during Fall and Spring semesters.

I really enjoyed the Wine Barn!!!

It was a gratifying experience and a positive
feeling of recognition.

It was very satisfying knowing you were appreciated
enough to receive an award.

Everyone loves to be appreciated and recognized -
thank you.

I don't require much encouragement or recognition
and find such things slightly embarrassing. Never-
theless the little plaque that I took home seems
to grow in value as I realize that it serves as a
touchstone of my memories with OPERATION SUCCESS.

e) I feel a part of the program. The staff recognizes my
services as valuable, and I receive positive remarks
from our speakers. (7) seven tutors said yes.
(0) zero tutors said no.

Comment: "I belonged!" and was made to feel valued and
respected for my contributions to the program.

I really enjoy being a part of OPERATION SUCCESS
because I felt appreciated.

I have a feeling of belonging.

Yes, I really like the "gang".
This is quite true. People respect me and really do know as to what we tutors go through. I love the atmosphere where I work.

I'm not sure I understand. Other than that, "yes".

In general I don't feel unappreciated at all. If anything I feel over appreciated by the staff.

f) In the process of assisting peers, my awareness of future goals has become wider, and being the tutorial staff has enhanced my self-assurance and self-esteem.
(4) four tutors said yes.
(0) zero tutors said no.

Comment: When a tutee asks my opinion about a personal problem, and if I do help - it is quite satisfactory. I have matured a lot just by tutoring and counseling other fellow students.

This program has changed my career goals.
True.

I think my awareness of many different things has increased.

I have become more confident and expressive of my future goals. With this increased confidence and expressiveness I find it much easier to get worth-while counseling or determine what advice is worthless.

g) Other

Comment: All I would say is you - counselors - are doing a great job. In accordance I would like to extend my thanks to the Director and the lovely secretary for giving me proper assistance whenever I needed it. I think you all are doing an excellent job - and I hope to see this program go on for many more years to come. Also I think this is an excellent questionnaire and the questions are very adequate and concise - but there is always room for improvement.
First of all, I'd like to explain why I felt so many of the questions blank, because many of them demanded a flat "yes" or "no" when a "somewhat" or a "not applicable" answer would have been more appropriate in my case, and I suspect in some others as well. Also questions like d, e, and f above seem like leading questions. They seem designed to discourage any but positive replies. Again it's a matter of my most truthful answer falling somewhere between the two extremes. I really think that tutors need to be made more aware of what they're getting into in the way of tutees who need extensive remedial work but who instead must cope with assignments that are too advanced for them. Relating to this in a way is the need for some kind of education-related psychology and sociology information, dealing with such things such as - how do people learn, how can they be helped to learn, etc. An area that I found in my experience was cultural barriers to learning - in one case poverty and a stressful home life, in another, foreign customs and language differences (this one I didn't find too difficult as I have taken language courses, but someone else might). I also wish we'd have the lecture on assertiveness training, and now that I think of it, maybe assertiveness training should be part of the orientation program. How to establish an authoritative but not insensitive image with a tutee from the beginning. Also the lectures by faculty members, while interesting in themselves, were about teaching rather than tutoring. I felt there were a lot of differences between the two-individual vs. classroom basis; different experience (having a degree vs. being an undergraduate); age differences, how much help the student needs, etc. Maybe some former tutors could clarify some of this. All in all, I have gained some insights which might help me in future situations where it is up to me to help someone else learn.

Thank you Mario for always being available to come, to talk when I needed to. You have been an excellent "leader" as well as my friend. I find it hard to think of someone who is more considerate, kind and unselfish than you. Thank you Deema for being there to listen and share my thoughts with - I never had to be afraid you would be judgmental, you always accepted me as I was. I always enjoyed our conversations and you inspire me as a woman who truly seeks to know herself. Thank you Vince for your friendly words and support. I'll miss you all!!!
I like the informal friendly atmosphere at OPERATION SUCCESS. I like the independence and responsibility, I have in my work, also.

Thank you.
The following data was collected by the Operation Success Research and Evaluation Component through the survey conducted to find out students' opinions and perceptions on services offered to them by the SSDS Program during the Summer Semester of 1983.

There were three categories of responses to the questions:
Agree, No Opinion, and Disagree. The questions were:

As a result of participation in this program, I have:

1. Increased my awareness of my academic strengths and weaknesses.
2. I got to know about financial services/obtained information on scholarships.
3. Become more confident about my educational goals.
4. Become more aware of my abilities and how they relate to my career plans.
5. Increased my awareness of university services.
6. Increased my awareness of self in general.
7. Asserted my self to a greater extent than before.
8. Improved my ability to express my self.
9. Began or continued to develop a set of personal values.
10. Increased my awareness of other people (races, cultures, etc.)
11. Become more comfortable about continuing my education.
12. Have met new people and have a feeling of belonging.
13. Received assistance through: 1. Tutoring Services
2. Typewriter Services
3. Book Loan Services
4. Workshops

Question 13: Received assistance through:

- Yes
- No

1. Tutoring Services: 100% 0%
2. Typewriter Services: 33% 67%
3. Book Loan Services: 75% 25%
4. Workshops: 25% 75%
Comments of students about their tutors.

1. Good in subject and basic math needed for Chemistry; always on time and flexible on times as he had it to offer.

2. She was a good tutor; she helped me a lot and was always well prepared. She always went out of her way to help me. The only fault she has was that she was always putting herself down, but other than that she was good.

3. My tutor and I utilize our time very well. He is an excellent tutor and I will request him next fall. He has helped me a great deal.

4. It seems like I needed more time with my tutor. We would go over the assignment and there isn't enough time to go over other sections. She showed me some short cuts and explained things more easily than my instructor; an example was the matrix system.

5. I am very pleased with my tutor. He is always nice and explains things very thoroughly. When someone knows the material well, it is easier to learn from them.

6. She always reinforced what was covered in class by the instructor and sometimes she would explain the problem and solution another way from the teacher's way which was easier to understand and covering the material before it would be covered in class was very helpful.

7. She is a great tutor and a beautiful, understanding person. I would so much like her to continue to tutor me. She helps me to understand and to get a better view on my lessons. I wish that I could return some great thing in return.

8. My tutor helped me the best he could but I couldn't understand his language. He was a good tutor.

9. I think the tutor is doing a good job tutoring.

10. My tutor is interested in Biology. He understands the subject. He knows what is expected of a Biology 203 student and is a good tutor.

11. My tutor is a good tutor and he makes me do the thinking, which is very good. He tells me if I know the material or not and that makes me want to study more.

12. My tutor has been very helpful in tutoring Psychology and Speech, and relating the two areas. She listens patiently to what I have to say, and not only that, she types for me and corrects my grammar. Her disposition and attitude is remarkable.

13. My tutor is very encouraging. She's always been positive given when things are going bad. She's an excellent, dependable tutor. She knows her material well in Math.
Continued. Comments of students about their tutors.

14. She took the time to check papers, during unscheduled times. She was very encouraging, giving immediate feedback. She was knowledgeable on the subject matter.

15. I have two suggestions: if she could have a book in class at the time, and if we could understand what room to use, more rooms are needed.

16. He is a good tutor and I would recommend him for others. Our time was utilized well and I felt I learned the subject matter well.

17. He is a very excellent tutor. He is very knowledgeable in the subject in which he was tutoring me in. I would definitely recommend him to others. He is a great tutor.

18. He has a solid knowledge of calculus and can usually convey ideas to me very clearly and economically. What's more he usually can tell just where I'm having trouble. He doesn't drink beer but he's an ok tutor anyway, because he likes Paul Simon and Monty Python. I also hope I never need him again, but if I do, he's a good egg.
FUND RAISING COMPONENT

- Bake sales
- Garage sales

- Sale of Program Report

Donations from enterprises in Wichita area
- Book loan program
- Scholarships
- Office supplies

Screening of Spanish movies
- Karate movies

Sponsoring of athletic activities
- Sell advertisements & brochures

OPERATIONS CHART FOR FUND RAISING COMPONENT
Since 1980, the Special Services Program, OPERATION SUCCESS, like many programs all over the country has been affected by budget cuts. Every year our program has developed activities geared towards raising those additional funds that enable us to serve the disadvantaged students even when its funds are curtailed.

This year we developed fundraising activities that included area community organizations and businesses. We were successful in involving over 20 businesses to assist us with this activity. The following businesses or organizations allowed for the fundraising component to have a successful year:

CONTRIBUTORS:

White Star Inc. -- Scholarships for Book Loan program

Commonwealth Theatres -- provided theatre space for one fundraiser movie that was a success.

Squeeks Donuts Inc. -- provides pastries used for various sales.

Bonanza Steak House -- donated gift certificates used in various fundraisers.

D & M Trophies -- provides partial discount on tutor plaques given at Annual Awards Dinner.

KARD-TV, KAKE-TV, KTVH-TV, KMUW-Radio -- provides public service announcements that inform community of fundraisers.

Amigos de SER -- receive scholarships to which at least one program student is a recipient.

Anheuser-Busch Inc. -- donated calendars and other items used to promote Program's efforts in raising funds.

Other contributors to various on-going activities have been the following:

Fidelity Savings & Loan

Rico's Hair Fashion

Alford Electric Company

The Spice Merchant

Filmex Films

Azteca Film Company
VIETNAMESE COMPONENT

This component was established to assist Vietnamese students. Initially, this component was established by the present Director of Operation Success on a trial basis. Throughout each semester, it has been found that the component is one that is continually assisting the Vietnamese students meet their needs.

Those students who enroll at Wichita State University experience difficulty in understanding the concepts taught in class, due to barriers of language, frames of reference, and the adjustments they are making from living in a culture different to their culture.

Many of the past students have been high achievers. Those students also have come back as tutors to assist the Component. Partial funds for the component come from Operation Success, as well as from the Student Government Association, to the Vietnamese Student Organization.

The excellent coordination of the activities between the Vietnamese Component and Operation Success has enhanced better understanding of the cultures that constitute the program. Vietnamese students invite other students when they have a social gathering and there have been many interactions. Operation Success will continue to be sensitive to the needs of the Vietnamese students at Wichita State University.
