Based on the theory that learning takes place if the learner is able to relate new knowledge to something already known, the course of study described in this booklet consists of recording stories dictated by individual students and using these stories as a basis for teaching reading and creative writing to students from preschool through adult levels. The first part of the booklet provides an overview of the course, which was developed for use with Belizean students in a Peace Corps program; discusses problems these students had with English verb tenses and cultural aspects of the stories they produced; and describes teaching methods, primarily drawn from the language experience approach, used with the students. The second part of the booklet contains sample lessons, word cards, vocabulary lists and student stories, while the final part contains materials used to teach phorics, vocabulary, word configuration, and story vocabulary in different contexts. (FL)
Teaching Reading and Creative Writing: A Language Experience Approach

"PERMISSION TO REPRODUCE THIS MATERIAL HAS BEEN GRANTED BY

Peace Corps

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)."
Peace Corps' Information Collection & Exchange (ICE) was established so that the strategies and technologies developed by Peace Corps Volunteers, their co-workers, and their counterparts could be made available to the wide range of development organizations and individual workers who might find them useful. Training guides, curricula, lesson plans, project reports, manuals and other Peace Corps-generated materials developed in the field are collected and reviewed. Some are reprinted "as is"; others provide a source of field based information for the production of manuals or for research in particular program areas. Materials that you submit to the Information Collection & Exchange thus become part of the Peace Corps' larger contribution to development.

Information about ICE publications and services is available through:

Peace Corps
Information Collection & Exchange
Office of Program Development
806 Connecticut Avenue, N.W.
Washington, D.C. 20526

Add your experience to the ICE Resource Center. Send materials that you've prepared so that we can share them with others working in the development field. Your technical insights serve as the basis for the generation of ICE manuals, reprints and resource packets, and also ensure that ICE is providing the most updated, innovative problem-solving techniques and information available to you and your fellow development workers.
TEACHING READING AND CREATIVE WRITING:

A Language Experience Approach

INTRODUCTION

This course of study was developed for five remedial reading classes of secondary school students, and also for remedial reading instruction for one adult. The basic method used here can be adapted for teaching reading and creative writing to students from the infant school level to adulthood. The vocabulary, or thought content of the material, will be relevant to the student because it comes from his own background of experience. He has a personal interest in the message the material conveys. All instruction is based on the theory that learning takes place if the learner is able to relate new knowledge to something he already knows.

The course of study consists of recording stories dictated by individuals, and using these stories as a basis for developing the required skills for reading, and creative writing. To achieve success in literacy programs, I believe that all the reading skills must be developed with scrupulous attention to the value of each one, as a part of the synchronized whole, which is instruction for reading with comprehension, and expressing one’s ideas in writing with clarity. To eliminate any of these skills from a reading instructional program, to give less than the necessary amount of instruction and practice to any of them, or to overemphasize some, phonics for example; and exclude, or give insufficient attention to others, is to contribute to the lack of success in the development of literacy programs. Another important consideration in instructional programs in reading, is to allow for realistic time allotments. In a primary grade it is generally estimated that at least twenty-five minutes are necessary for developmental reading instruction for a single group, (most primary classes have three groups), and also time must be allotted daily for a separate phonics lesson in addition to the phonics skills that are taught as an integral part of each reading lesson. To give due time to the language or creative writing component requires another period daily; so that at least two and three-quarters hours daily is necessary for language arts instruction. Handwriting skills must also be taught daily. Legible handwriting is a basic requirement for a language program. Because the length of a class period at the secondary school level is usually about fifty minutes, it is necessary to spread the teaching of these skills over
a period of several days.

As is evident from the material that has been used to compose these story books, some basic supplies are essential to make sufficient copies available for student and teacher use. These are: duplicating machine (mimeograph or spirit duplicator), master sheets or stencils, adequate supplies of ink or fluid for the machine, paper in sufficient quantity to produce multiple copies, binding material such as oak tag, cardboard, Bristol board, rubber, yarn, string or thread, crayons or paints for illustration. (If illustration is not done, much conceptual development is lost). We found, too, that material printed on a spirit duplicator fades in the light. I had the great advantage of having all the machine copying of the material done by an assistant at the Comprehensive School, which gave me much more time, and energy, to devote to the instructional program. He traveled a distance to another school to do this work because a machine is not available here.

Some of the processes described here, for example reconstructing the story by each student for individual vocabulary words, would be done in infant school, and primary classes, by the teacher; and during the initial stages of word-matching instruction she would use word cards for matching and flashing of approximately 3 by 9 inch size for comparing to like words in a large demonstration copy (on oak tag or Bristol board, approximately 13 by 24 inches), of the story the class is working on.

In supplementary work, or reinforcement exercises, more emphasis can be placed on the development of specific skills in individualized instruction which is adapted to the particular learning style of each student. The development of apparatus for this kind of thing requires much planning and time. As the instructional program develops, a skills checklist should be designed, also, to test periodically the development of each skill in each student.

For adequate phonics instruction there should be at least one word in the stories' vocabulary beginning with one of each of the letters of the alphabet. Keep this in mind, and elicit words in story context that would not be like.

occur otherwise, for example, quiet, zipper, xylophone. Words in English beginning with x are rare; it seems better to use words ending with x for this exercise.
The teaching of phonics starts with the first story, and develops in this way, as an integral part of each daily reading lesson.

Word configuration skills, and the use of story vocabulary in a different context by students, is an integral part of each reading lesson also.

Using stories' vocabulary in sentences composed by students offers the opportunity not only for developing creative writing, but reinforcing good patterns of English usage; tenses of verbs, punctuation, styles of writing.

A good foundation in phonics is necessary to read well. To spell well also depends on knowledge of phonics, and to a degree, on the use of the dictionary.

In the future, when working on this kind of reading instruction, I would plan more carefully to elicit vocabulary in the students' stories that would provide a better basis for the phonics instruction. With more forethought, almost every beginning sound and blend could have been included in the stories' vocabulary. That this was not done in this course of study is an obvious weakness.

**Tenses of verbs**

Generally these Belizean students I work with, because they speak Creole as well as English, or Spanish or an Indian dialect as a first language; tend to use the present tense, almost always, in speaking and writing. For this reason the stories must be used, too, for systematic teaching of the correct forms of the verb, depending on when the action takes place. These students generally use the present tense in English regardless of what time they are speaking about; past, present, future. For this reason much patterning and reinforcement must be done on verb forms. Nevertheless, Belizean Creole incorporates the English language, so that in Belize, English is not taught as a foreign language.

**Word configuration**

(Student's stories are the source of this vocabulary)
The methods and materials used here in developing reading skills can also be expanded for use in individualizing instruction, for reinforcing skills, and for correcting weaknesses, and providing interesting, useful seatwork for students. There are a variety of ways of using word matching, phonics, word configuration, story illustration; either in apparatus or by use of multiple copies. The quality of this material will depend on the ingenuity of the teachers, and their ability to communicate ideas to each other.

Cultural Aspects of Student’s Stories

A most important feature of some of these stories of Belizean students is that they relate the learning of skills in the family, and the surroundings, as well as in the school. For example, boys tell of learning farming skills from their fathers, as they tell of learning how to make cement blocks from their fathers, or how they have learned a second or third language from a parent or a friend. Young people have told me of skills that they have, and their processes, such as dressing chickens, baking Creole bread in a drum, making Johnny cake, making clothing from a pattern designed and drafted in the home. I did not have the opportunity to record many of these skills
and their processes, but in my work in the future, I will make it a priority to elicit stories from students which describe skills and their processes that are locally taught; either in the home or the neighborhood, or the district. I would encourage a very explicit description of a method of doing something. For example, if the skill to be related were how to bake Creole bread in a drum, I would ask such questions as: "Where would you get the firewood? How would it have been cut? Where would you get the drum? How would it be prepared for use as an oven? Where would it be best to place this oven? What are the time elements for preparing the fire, baking the bread? What ingredients are needed to make Creole bread? One of the ingredients is coconut milk. How is it made?" Stories prepared in this way develop literacy, and they also record and preserve the local culture.

Many local customs that students have described to me I didn't have time to record. I would encourage students who farm in a milpa, to describe other crops than corn, that they raise in a milpa setting. Why the land is cleared by a slash and burn method, rather than in other ways. Which operations are carried on at a particular time of the year. How they prepare their own seeds for planting. Do they use local fish for fertilizer? Or what fertilizer do they use?

Students talk about how their fathers, in the home, make cassava graters using mahogany, or how their grandmothers cook in an iron pot, in an open fire outside the house. Spanish-speaking Belizeans prepare delicious food from different forms of corn, and Carib Belizeans from such vegetables as cassava. I would take particular interest in helping students put these processes into printed story form.

Reading Aloud to Students

In any instructional program in reading, reading aloud to students regularly, from a wide variety of literature, is most necessary. Belize has a national library system which has been a resource for my work. The Comprehensive School has a library, and I have used literature from there, too.

In a developing country which lacks resources such as these, a teacher
would possibly be able to assemble her own library of literature from such sources as A.I.D., the O.A.S., C.A.R.E., and other organizations whose purpose is international development. The Darien Book Aid Plan of Darien, Connecticut has been most generous in providing me with a very choice selection of children's literature; both in English, and Spanish. Although English is the official language of Belize, in many homes here Spanish is the first language.

Handwriting

Manuscript and cursive handwriting was reinforced with these students, by taking a separate lesson daily, on each letter of the alphabet. As in all the other components of this course of study, the stories' vocabulary would be used as a basis to teach, or review handwriting skills. (For quick reference—use the composite vocabulary list at the end of the collection of Pre Year's stories.)

Workbooks, Word Cards, Vocabulary Lists Compiled By Students

Enclosed are samples, or sample booklets for each area of this course of study:

- stories
- word cards
- vocabulary lists
- phonics
- word configuration
- sentences using stories vocabulary in a different context
- writing lessons

Examples of the workbooks, word cards, and vocabulary lists for only the Pre Year class have been included here. However, all of these components were developed with each of the other four classes, and with the one adult student, throughout each course. The development of these components required much student involvement, which was what was intended, so that maximum learning would take place.
Method of Instruction

1. Have a student dictate an experience. The teacher, as scribe, writes this story on the board, unobtrusively correcting grammatical errors. This story is then printed on a Fotostar masterchart, and the mastersheet is given to the author to illustrate. Multiple copies are prepared from this on a machine. These copies are distributed to the class. Over a period of time each student will have contributed a story, and will have added it to a book which includes a story from each student in the class.

2. As each story is returned to the class, distribute blocked paper. The vocabulary of the story is copied into separate blocks on this paper. The blocked paper then is cut up into individual word cards and these used to develop the following reading skills:

1. word matching (recognizing word in context)
2. flash card drill (recognizing words out of context)
3. placing vocabulary in alphabetical order

Phonics skills:

a. beginning sounds
b. final sounds
c. middle sounds
d. long and short vowel sounds
e. beginning blends, e.g. - st, ch, fl, br.
f. sounds formed from ay, ee, igh, etc.
g. building new words from story vocabulary by replacing initial consonants ex: day way pay hay stay
h. paradigms, or inflected forms of nouns and verbs
i. word syllabication

5. Word configuration (for differentiating words by their shape, if they begin with the same letter, and have the same number of letters; and also for distinguishing paradigms or inflected forms of words.)

walk walked walking liked
here help
read read

6. Using stories' vocabulary and language patterns as a basis for creative writing. Student selects a word from a story. With
this he constructs a sentence using the word in a different context than that in which it appeared in the story. Phrases, and sentences, from the stories can be used in the same way.

**Phonics**

( The basis of all the phonics lessons is vocabulary from student's stories, or words elicited from students in class, in a frame of reference. )

1. **Initial consonants and vowels.**
   
   a b c, c(soft) d e f, ph g, m (soft), g (silent) h, h(silent) i j k, k(silent)
   
   l m n o p q r s t u v w x y (as a consonant and a vowel) z

   (Final and middle sounds can be taught using the same procedure. Find necessary words in story vocabulary, or elicit them from students in a frame of reference.)

2. **Blends - Letters combined in a sound whose separate constituents cannot be distinguished.** (Teach each of these using a word from stories' vocabulary, or a word elicited from a student in a frame of reference.)

   bl, br
   
   ch, cl, cr, cy
   
   dr, dw, dy
   
   fl, fr
   
   gh, gl, gr
   
   ph, pl, pr
   
   rh
   
   sh, sl, sm, sn, sp, st, sw
   
   th, tr, tw, ty
   
   wh, wr

3. **Short vowels combined with consonants to build words of one syllable.**

<table>

<tr>
<td>ub</td>
<td>ud</td>
<td>ug</td>
<td>um</td>
<td>un</td>
<td>up</td>
<td>ut</td>
<td>ux</td>
</tr>
</tbody>
</table>

   example: cab web rib job tub
4. Long vowels (e at the end rule)

- ade  ede  ide  ode  ude  example: made  cede  hide  code  rude
- ege  ege  ige  oge  uge  made
- ake  ake  ike  oke  ukw
- ale  ale  ile  oile  uile
- eme  eme  ime  one  uma
- ome  ome  ime  one  une
- epe  epe  ipe  ope  upe
- ete  ete  ite  ote  ute

5. Building words from known words by replacing initial consonant

- house  get  race
- mouse  let  face
- met  pace
- set
- net
- wet

6. Vowel sounds produced by letter combinations such as:

- ey  ee  ie  oe  ue  stay  week  tie  boat  Tuesday
- ai  ea  ye  oe  ey  to
- eigh  igh  mail  nest  eye  too  new
- eigh  sight  straight

After the sounds of the letters of the alphabet are taught, there are
an infinite number of ways that they can be combined in phonics exercises.
Only a few examples are given here. The important thing is to teach the
basic sounds from the stories' vocabulary.

Sample phonics lesson for teaching sound of a letter

Teacher tells class she is going to say some words that begin with the same sound as a word in one of the student's stories (for example, garden) and one that does not begin with the same sound. The students are to tell the teacher when they hear the word that did not begin with the same sound as the others.

Teacher says:

garden
game
good
got

governor

give

gum

sign
gate
gold

Students tell her that "sign" did not begin with the same sound as the others.

Teacher then asks students to take turns providing her with words that begin with the same sound as "garden". As the students provide the words, they are printed in a column on the board by the teacher.

A student can be asked to come to the board and underline the "g" sound with chalk of a contrasting color while the other students say the sound in unison.

This lesson can be copied onto paper by students, and illustrated with objects which represent things which begin with the "g" sound. These copies of individual lessons can be compiled into a notebook by each student. They make a useful reference. The illustrations can be drawn by the students themselves, or cut from magazine illustrations. For reinforcement students should be asked, "What letter spells the sound of "g". 
Pre-Year
Nine Miles From Stann Creek

We have a two and one-half month vacation during the Summer. Then my parents let us go to my grandmother's farm. When my grandmother sees us, she hugs us because she is so glad that we have come.

Every day my grandmother takes my sisters Lynn and Beulah, and myself to swim at the river. She gets good things to eat, like mangoes, especially for us. She lets me help by feeding the pigs.

Belmopan Comprehensive School

I am going to the Belmopan Comprehensive School. We have beautiful teachers. Mrs. Cayetano is one. I like her ways. If we ask her to tell a story she will.

Students learn to cook and sew here. We also have a beautiful library. Mrs. Marder has made it so.

The fifth year students are selling sweets to get money for their graduation.

Coconuts and Swimming on Caye Caulker

One day when I was about eight years old, my uncle took me to Caye Caulker. We went on a motor boat and took a lunch of egg sandwiches, apples, oranges, soft drinks. When we left the boat, we went to our house. I climbed a tree, got some coconut, and had coconut milk to drink. After that I went for a swim.

Spanish Lookout, A Mennonite Community

One time I went to Spanish Lookout with my uncle.

We took the car onto the ferry, got out and crossed the river standing on the ferry.

Spanish Lookout is beautiful.

It has lots of houses, cornfields, and vegetable gardens.

I saw a man milking a cow.

I saw tobacco fields.

Spanish Lookout is a Mennonite Community.

It gives good example in farming to Belize.

I enjoy buying in the many shops there.

My Work In Belmopan

I work with the Dieterly family. They help us to get chickens, and rabbits.

In their yard I take care of the garden.

On Saturday we go to Belize City to buy feed.

We eat with the Dieterlys. We have barbecued chicken, doughnuts, cake.

We have Kool-Aid to drink.

I enjoy being with the Dieterlys.

A Belizean Caye

Often I go to Caye Caulker by boat. Usually my uncle takes our family. Caye Caulker has beautiful beaches, shops, houses, a cinema, coconut trees. When I am there I climb trees to get coconuts. We have our lunch on the boat. For lunch we often bring rice and beans, fried fish that we have caught, conch and soft drinks.

First Year :  
Fishing

Once, in Punta Gorda, my uncle and I went out fishing. When he threw out the net and pulled it in, he was surprised to see so many fish. Among them was a big one we call the barrow. He kept the barrow, and sold the other fish. The barrow made a delicious meal for us.

Experience With Horses

This past Summer I went to the Lone Star Farm where my grandfather was working. My grandfather is a cattleman on that ranch.

At the ranch I saw a horse that I wanted to put in the Derby Race. My grandfather bought him for me. I put him in the race and he won second place. I now have the horse at a stable at Big Falls Ranch.

My grandfather taught me to ride when I was five. I have loved it ever since.

A Belmopan Market Stall

My mother and father have a stall in the Belmopan Market. They sell watermelon, bananas, oranges, limes, tomatoes, peppers, cassava, cabbage, Irish potatoes and other ground foods. My mother is a Creole cook. Every day she prepares a different lunch to be served in our stall in the market. The meal may be boil-up which is made with pig tail or fish, plantains, yams, coco, cassava, green bananas and flavored with coconut oil. Another day my sister Verna would prepare the meal which would be rice and beans, meat and vegetable salad.

When I am free from school I go to help to serve in our market stall.

What a Terrific Day!
My brother Telford and I went game hunting in Rancho Dolores. We killed a gibbon and an armadillo. As we went on through the forest we realized we were lost. It was late and I was getting thirsty. About twelve o'clock we had been passing different hills for some time. I said to myself "I am not only thirsty, but I am getting hungry." At first, my brother had been ahead of me leading, then I took the lead. Off and on we missed our road, then found it again in the bush. We had marked our trail by cutting with our machete. We had traveled long when we burst out of the bush somewhere near our house. When we reached our house my brother and I drank a lot of water. I ate two plates of dinner and Telford ate three. That evening we made a bargain never to go so far hunting by ourselves.

Belize Proves Its Agricultural Potential

Every year the Belize Agricultural Show is held in Belmopan at the National Agricultural Show Grounds. At the Show Grounds there are many stalls. Some stalls have fruits such as oranges, grapefruit, melons, which are grown locally. Farmers display crops they have harvested such as corn, beans, rice, sugar cane, sorgum, yams, coconuts, bananas, coco, plantain. Livestock such as cattle, pigs, chickens, rabbits were proudly shown by their owners. The Belize Fisheries showed products of our sea. It has been said that Belize has the potential to feed all of Central America. This year's Agricultural Show seems to prove that this is true. Ernest Mossiah

Two Happy Homes

My family is very happy at home
and they are very good to me.
In my family we are five and
we enjoy being together with our
parents in the living room. We are
together for supper. We eat beans,
eggs, rice, bread.

In my family there are my mother,
my father, my brother Walter and my
sister Caroline.

Here in Belize I am very happy
with my cousins and my aunt and uncle.
Placentia Is Near the Beach Side

When I lived in Placentia
I went to school every day
After school I had a job
doing chores for Miss Baby Lou.
My chores were to go and catch
fish, and bring sand from the beach
side. Mornings I used to go
down to the bridge, and catch
fish for my mother. In the
evenings my friends Dean, and
Lil Body, and I would go into the
bush and shoot fowl with sling
shots. These we would cook and eat.

Third Year
Candy Making

Fudge is something I make well. The ingredients I use are:
- a tin of condensed milk
- 1 pound of white sugar
- 1 1/2 pack of raisins
- 1 1/2 cup of peanuts
- 1 teaspoon of vanilla
- 1 tablespoon butter

Method
In a saucepan mix the milk, and sugar, and butter, and stir until brown. Then add peanuts, raisins, vanilla. Drop a small amount of this into a cup of cold water. If it forms a ball, it is ready to pour into a greased pan to set.

Therese Middleton
1976-6-7
Belize Agricultural Show In Belmopan

At the Agricultural Show grounds you can see displays of livestock and crops that are raised in Belize. There are things on sale such as tamales, watermelon, snow-cones, barbequed rabbit, and hot dogs. On Monday they had the rodeo, the greased pole contest, coconut husking, and a watermelon contest. There was no end to the dancing.

Belive Village Life

Roaring Creek on the Western Highway is the village that I live in. Its name came from the small river that runs through it. It is interesting for the many kinds of trees it has, guava, coconut, cashew, bukut, plum, cocoa, cahoume, breadfruit, supa and custard apple. The fruit from these trees is sold in the market. In the village we use these fruits to make guava jelly, coconut oil, wine from cashew juice from bukut and stew from supa.

Village life is calm. We have activities such as dancing, horseback riding and cattle herding. We are within walking distance of the river for bathing, yet it is easy enough to get to the city when we want to.

Youth Fashions In Belize 1976

The youth in Belize have many different styles of dress. The greatest variety of styles can be seen at Field Day, or at Birds Isle when there is a dance. Favorite styles for boys are bell-bottom pants and three quarter jeans, tank-type shirts, a jeans hat, necklaces of axes, beads, beans, semi-precious stones, black coral and bracelets of ox bill shell.

I like to see girls wearing midi-skirts or dresses or three quarter pants made out of blue denim or jersey. I like afro hairstyles, and eleganza shoes. There are shoes with a high platform. I think kerchiefs are especially interesting for the different ways they can be worn. I like girls in earrings, rings, bangles and chokers. Arturo Arnold 1976-5-5.
**Dressmaking Skills**

For four years I have been studying dressmaking at the Comprehensive School with Mrs. Bucknor, and Mrs. Hunter. Now I am in the process of making a pair of blue denim pants. Saturday, I went to Queen Street in Belize City to buy the denim at the shop of Simon Quan. Mrs. Bucknor showed me how to cut the cloth from a paper pattern. It pleases me to learn dressmaking skills. Now I do not have to depend on others to make my clothing.

A Belizean Bread

Now and then I make Creole bread. I get the ingredients together. I must have: coconut milk, lard, flour, yeast, salt and sugar. I grate the coconut, pour warm water over it, and squeeze out the coconut milk. I put the yeast to set, I sift the flour and add sugar, salt, lard, the yeast and the coconut milk. I mix these, knead the dough and set it aside to rise. After a time I punch the dough down, shape it into loaves, and set it to rise again. I bake it in a 350° oven for two hours. Baking bread gives me a good feeling.

Name
Since 1961 when the Peace Corps was created, more than 80,000 U.S. citizens have served as Volunteers in developing countries, living and working among the people of the Third World as colleagues and co-workers. Today 6000 PCVs are involved in programs designed to help strengthen local capacity to address such fundamental concerns as food production, water supply, energy development, nutrition and health education and reforestation.

Loret Miller Kuppe, Director
Edward Curran, Deputy Director Designate
Richard B. Abell, Director, Office of Program Development
