This module is intended to help guidance personnel in a variety of educational and agency settings increase their skills in assessing desired outcomes, current status, and needs of program clients as well as skills to assess the environmental conditions that influence those needs. The module is one of a series of competency-based guidance program training packages focusing upon specific professional and paraprofessional competencies of guidance personnel. Patterned after the Performance Based Teacher Education Modules developed at the National Center for Research in Vocational Education, the modules teach competencies for planning, supporting, implementing, operating, and evaluating guidance programs. The module follows a standard format that includes the following components: (1) an introduction that gives the user an overview of the purposes and content of the module; (2) a section that provides information about the module goal and a list of the competencies covered in the module; (3) a reading containing information on each of the competencies; (4) learning experiences consisting of an individual activity, individual feedback, and a group activity; (5) evaluation techniques that can be used to measure what workshop participants need prior to training and what they have accomplished through training; and (6) an annotated list of resources. Topics include identifying methods and scope of needs assessment, planning, acquiring instrumentation, reporting results, and using the findings. (KC)
Determine Client and Environmental Needs
COMPETENCY-BASED CAREER GUIDANCE MODULES

PLANNING

A-1 Identify and Plan for Guidance Program Change
A-2 Organize Guidance Program Development Team
A-3 Collaborate with the Community
A-4 Establish a Career Development Theory
A-5 Build a Guidance Program Planning Model
A-6 Determine Client and Environmental Inputs

SUPPORTING

B-1 Influence Legislation
B-2 Write Proposals
B-3 Improve Public Relations and Community Involvement
B-4 Conduct Staff Development Activities
B-5 Use and Comply with Administrative Mechanisms

IMPLEMENTING

C-1 Counsel Individuals and Groups
C-2 Tutor Clients
C-3 Conduct Computerized Guidance
C-4 Infuse Curriculum-Based Guidance
C-5 Coordinate Career Resource Centers
C-6 Promote Home-Based Guidance
C-7 Develop a Work Experience Program
C-8 Provide for Employability Skill Development
C-9 Provide for the Basic Skills
C-10 Conduct Placement and Referral Activities
C-11 Facilitate Follow-through and Follow-up
C-12 Create and Use an Individual Career Development Plan
C-13 Provide Career Guidance to Girls and Women
C-14 Enhance Understanding of Individuals with Disabilities
C-15 Help Ethnic Minorities with Career Guidance
C-16 Meet Initial Guidance Needs of Older Adults
C-17 Promote Equity and Client Advocacy
C-18 Assist Clients with Equity Rights and Responsibilities
C-19 Develop Ethical and Legal Standards

OPERATING

D-1 Ensure Program Operations
D-2 Aid Professional Growth

EVALUATING

E-1 Evaluate Guidance Activities
E-2 Communicate and Use Evaluation-Based Decisions
Determine Client and Environmental Needs

FOREWORD

This counseling and guidance program series is patterned after the Performance-Based Teacher Education modules designed and developed at the National Center for Research in Vocational Education, under Federal Number NE-C00-3-77. Because this model has been successfully and enthusiastically received nationally and internationally, this series of modules follows the same basic format.

This module is one of a series of competency-based guidance program training packages focusing upon specific professional and paraprofessional competencies of guidance personnel. The competencies upon which these modules are based were identified and verified through a project study as being those of critical importance for the planning, supporting, implementing, operating, and evaluating of guidance programs. These modules are addressed to professional and paraprofessional guidance program staff in a wide variety of educational and community settings and agencies.

Each module provides learning experiences that integrate theory and application, each culminates with competency referenced evaluation suggestions. The materials are designed for use by individuals or groups of guidance personnel who are involved in training Resource persons should be skilled in the guidance program competency being developed and should be thoroughly oriented to the concepts and procedures used in the total training package.

The design of the materials provides considerable flexibility for planning and conducting competency-based preservice and inservice programs to meet a wide variety of individual needs and interests. The materials are intended for use by universities, state departments of education, postsecondary institutions, intermediate educational service agencies, JTPA agencies, employment security agencies, and other community agencies that are responsible for the employment and professional development of guidance personnel.

The competency-based guidance program training packages are products of a research effort by the National Center's Career Development Program Area. Many individuals, institutions, and agencies participated with the National Center and have made contributions to the systematic development, testing, and refinement of the materials.

National consultants provided substantial writing and review assistance in development of the initial module versions. Over 1300 guidance personnel used the materials in early stages of their development and provided feedback to the National Center for revision and refinement. The materials have been or are being used by 57 pilot community implementation sites across the country.

Special recognition for major roles in the direction, development, coordination of development, testing, and revision of these materials and the coordination of pilot implementation sites is extended to the following project staff: Harry N. Drier, Consortium Director; Robert E. Campbell, Linda Pfister, Directors; Robert Bhaerman, Research Specialist Karen Kimmel Boyle, Fred Williams, Program Associates, and Jane B. Connell, Graduate Research Associate.

Appreciation also is extended to the subcontractors who assisted the National Center in this effort: Brian Jones and Linda Phillips-Jones of the American Institutes for Research developed the competency base for the total package. Managed project evaluation, and developed the modules addressing special needs. Gratitude is expressed to Dr. Norman Gysbers of the University of Missouri-Columbia for his work on the module on individual career development plans. Both of these agencies provided coordination and monitoring assistance for the pilot implementation sites.

Appreciation is extended to the American Vocational Association and the American Association for Counseling and Development for their leadership in directing extremely important subcontracts associated with the first phase of this effort.

The National Center is grateful to the U.S. Department of Education, Office of Vocational and Adult Education (OVAE) for sponsorship of three contracts related to this competency-based guidance program training package. In particular, we appreciate the leadership and support offered project staff by David H. Pritchard who served as the project officer for the contracts. We feel the investment of the OVAE in this training package is sound and will have lasting effects in the field of guidance in the years to come.

Robert E. Taylor
Executive Director
National Center for Research in Vocational Education

THE NATIONAL CENTER FOR RESEARCH IN VOCATIONAL EDUCATION
The Ohio State University
1960 Kenny Road • Columbus, Ohio 43210

The National Center for Research in Vocational Education's mission is to increase the ability of diverse agencies, institutions, and organizations to solve educational problems relating to individual career planning, preparation, and progression. The National Center fulfills its mission by:

- Generating knowledge through research.
- Developing educational programs and products.
- Evaluating individual program needs and outcomes.
- Providing information for national planning and policy.
- Installing educational programs and products.
- Operating information systems and services.
- Conducting leadership development and training programs.

Bell & Howell, Publication Products, is one of two operating units that comprise Publication Systems Division. Based in Wooster, Ohio, Publication Products specializes in the production and reproduction of newspapers, periodicals, indexes, career information materials and other widely used information sources in microform, hard copy and electronic media.
ABOUT THIS MODULE

INTRODUCTION .................................................................................................................. 5

READING ............................................................................................................................. 7

Competency 1. Describe current methods of assessing career guidance needs and select the most appropriate assessment methods for use in one's setting ........................................ 7

Competency 2. Specify how and where the assessment will be conducted, appropriate target populations to be included, and the range of characteristics and needs to be assessed .......................................................... 9

Competency 3. Solicit the assistance of staff and other interested and qualified individuals in the agency and the community, assign roles and responsibilities, and set a time line for task completions ......................................................................................... 13

Competency 4. Select, modify, or develop appropriate needs assessment instruments including questionnaires and interview schedules and any additional documents, such as instruction sheets, that will be required to use the instruments effectively .................................. 15

Competency 5. Prepare a report on the results of the assessment, and communicate and interpret its contents to clients, professional personnel, clients' family members, and others in the community .................................................. 18

Competency 6. Analyze needs assessment findings in light of program goals and procedures, and develop specific modifications to be made based on apparent discrepancies ..................................................... 19

LEARNING EXPERIENCES
1. Identifying Methods of Assessing Career Guidance Needs ........................................... 21
2. Specifying the Scope of Your Needs Assessment .......................................................... 25
3. Planning Your Needs Assessment Effort ...................................................................... 29
4. Acquiring Instrumentation .......................................................................................... 35
5. Reporting Results ....................................................................................................... 39
6. Using the Findings ...................................................................................................... 43

EVALUATION ..................................................................................................................... 47

ABOUT USING THE CBCG MODULES

CBCG Module Organization

The training modules cover the knowledge, skills, and attitudes needed to plan, support, implement, operate, and evaluate a comprehensive career guidance program. They are designed to provide career guidance program implementers with a systematic means to improve their career guidance programs. They are competency-based and contain specific information that is intended to assist users to develop at least part of the critical competencies necessary for overall program improvement.

These modules provide information and learning activities that are useful for both school-based and non-school-based career guidance programs.

The modules are divided into five categories. The GUIDANCE PROGRAM PLANNING category assists guidance personnel in outlining in advance what is to be done.

The SUPPORTING category assists personnel in knowing how to provide resources or means that make it possible for planned program activities to occur.

The IMPLEMENTING category suggests how to conduct, accomplish, or carry out selected career guidance program activities.

The OPERATING category provides information on how to continue the program on a day-to-day basis once it has been initiated.

The EVALUATING category assists guidance personnel in judging the quality and impact of the program and either making appropriate modifications based on findings or making decisions to terminate it.

Module Format

A standard format is used in all of the program’s competency-based modules. Each module contains (1) an introduction, (2) a module focus, (3) a reading, (4) learning experiences, (5) evaluation techniques, and (6) resources.

Introduction. The introduction gives you, the module user, an overview of the purpose and content of the module. It provides enough information for you to determine if the module addresses an area in which you need more competence.

About This Module. This section presents the following information:

Module Goal: A statement of what one can accomplish by completing the module.

Competencies: A listing of the competency statements that relate to the module’s area of concern. These statements represent the competencies thought to be most critical in terms of difficulty for inexperienced implementers, and they are not an exhaustive list.

This section also serves as the table of contents for the reading and learning experiences.

Reading. Each module contains a section in which cognitive information on each one of the competencies is presented.

1. Use it as a textbook by starting at the first page and reading through until the end. You could then complete the learning experiences that relate to specific competencies. This approach is good if you would like to give an overview of some competencies and a more in-depth study of others.

2. Turn directly to the learning experiences(s) that relate to the needed competency (competencies). Within each learning experience a reading is listed. This approach allows for a more experiential approach prior to the reading activity.

Learning Experiences. The learning experiences are designed to help users in the achievement of specific learning objectives. One learning experience exists for each competency (or a cluster of like competencies), and each learning experience is designed to stand on its own. Each learning experience is preceded by an overview sheet which describes what is to be covered in the learning experience.

Within the body of the learning experience, the following components appear.

Individual Activity: This is an activity which a person can complete without any outside assistance. All of the information needed for its completion is contained in the module.

Individual Feedback: After each individual activity there is a feedback section. This is to provide users with immediate feedback or evaluation regarding their progress before continuing. The concept of feedback is also intended with the group activities, but it is built right into the activity and does not appear as a separate section.

Group Activity: This activity is designed to be facilitated by a trainer, within a group training session. The group activity is formatted along the lines of a facilitator’s outline. The outline details suggested activities and information for you to use. A blend of presentation and “hands-on” participant activities such as games and role playing is included. A Notes column appears on each page of the facilitator’s outline. This space is provided so trainers can add their own comments and suggestions to the cues that are provided.

Following the outline is a list of materials that will be needed by workshop facilitator. This section can serve as a duplication master for mimeographed handouts or transparencies you may want to prepare.

Evaluation Techniques. This section of each module contains information and instruments that can be used to measure what workshop participants need prior to training and what they have accomplished as a result of training. Included in this section are a Pre- and Post-Participant Assessment Questionnaire and a Trainer’s Assessment Questionnaire. The latter contains a set of performance indicators which are designed to determine the degree of success the participants had with the activity.

References. All major sources that were used to develop the module are listed in this section. Also, major materials resources that relate to the competencies presented in the module are described and characterized.
Effective planning for any developing or ongoing career guidance program includes identifying the current and projected needs of those people affected by the effort. To accurately identify your program needs, it is necessary to determine exactly what is occurring now (assessing current status) as well as to decide how your program would look if it satisfied all your needs and wants (assessing desired outcomes). The gap between the two indicates the direction for program improvement.

There are many sound reasons for investing the time, energy, and resources to conduct a thorough needs assessment. Obtaining information about the skills needed and learned by clients in any career guidance program, has resulted in efforts to do a better job in identifying client needs. Instead of program planners maintaining the responsibility for specifying what clients should know and be able to do, we have begun asking the clients themselves, their parents or guardians (where appropriate), the community at large, employers, and staff members within our own agencies. Also, we have recognized that the needs of the clients cannot be met in isolation.

The needs of the surrounding environment--home, agency, and community--must also be examined.

Information gathered from needs assessment studies provides the "hard data" needed to ensure that you can evaluate the process and outcomes of the program in the future. By stressing the importance of meeting "people" needs, you build in the ideas of flexibility and change.

Obtaining, organizing, and using needs assessment information involves a variety of skills. You will need to know how to: gather information, specify the scope of your effort, organize the activities of staff and others involved, select or develop instrumentation, report and use results effectively, and plan for needed changes. This module addresses these competencies.

There are many additional resources to help guide your activities should you decide to undertake a needs assessment effort. Several documents listed as references--some in the area of career guidance, some not--provide additional technical details that may be of interest to you.
Identifying Methods of Assessing Career Guidance Needs

The best way to determine what people need is simply to ask them. Your career guidance program touches the lives of many people—your clients in particular—but also staff members, community members, and often parents or guardians. Maximum gain can be achieved if you solicit the advice of all these sources before planning or making changes in your program. In fact, an advisory committee with representatives from each concerned group is often viewed as an essential first step to ensure that a variety of opinions are registered. The issues the various audiences cite may differ; however, the more closely related your program is to the concerns felt by those involved, the more complete your entire undertaking will be.

There are a variety of ways to get the information you need. Three commonly used methods include personal interviews, telephone interviews, and mail questionnaires. All require a planned approach to identifying the needs of your clients.

**Personal Interviews**

Face-to-face interaction through meetings often give you more in-depth information than you can gather through any other method. A human touch is present and you can often get suggestions as to possible corrective actions.

Since personal interviews at meetings usually do not follow a predetermined set of questions, different information is gathered with each interview and therefore there can be inconsistency in the type of information collected. Responses are usually not recorded immediately and often many good suggestions are left unrecorded. There is also a danger of the responses being misinterpreted by the interviewer.

**Telephone Interviews**

The personal touch is also a key advantage in using the telephone as an interviewing tool. Because you are reaching people at their homes or offices, their time is saved. Also, you may be able to reach people who would not take the time to complete a questionnaire. As with personal interviews it is difficult to record responses immediately. If more than one interviewer is used there is danger of the responses being recorded differently, thus affecting data interpretation. Telephone interviews limit the amount and type of questions asked. Also if the people contacted resent being called they may respond in a negative fashion or provide false information. Telephone interviews prevent the respondent from thinking through the questions, thus preventing a thorough reply.

**Mail Questionnaire**

This is probably the best way to reach a large number of people in a short amount of time. You can undoubtedly reach a much larger audience, at minimal cost, than you can through any interview procedure. Also, some people are more candid when their privacy is ensured by not having to reveal their identities. The trade-off you make to reach more people is the loss of the opportunity to clarify questions or probe for deeper concerns. Many times the return rate is poor unless you provide an incentive for returning the questionnaire. Sometimes all that is needed is a stamped, self-addressed envelope. Other times you may have to think of a gimmick such as inserting a piece of candy or gum to provide sweet thoughts while completing the instrument.
Summary

The method you select to assess your client needs depends upon your local situation. Many times it is appropriate to use two or possibly all three methods of data collection. Data collected by one method can verify and clarify information collected by another method. A summary of the advantage and disadvantages of each method follows in Sample 1.

<table>
<thead>
<tr>
<th>Method</th>
<th>Advantage</th>
<th>Disadvantage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interview</td>
<td>Face-to-face conversation</td>
<td>Client may feel uncomfortable</td>
</tr>
<tr>
<td>Questionnaire</td>
<td>Can be anonymous</td>
<td>May not capture all client's needs</td>
</tr>
<tr>
<td>Observation</td>
<td>Direct observation</td>
<td>Limited to what is observed</td>
</tr>
</tbody>
</table>

Sample 1
Sometimes a needs assessment is undertaken as a reaction to visible problems. If so, it may also be useful to examine previous surveys conducted by your agency or studies completed on populations that are similar to yours. These additional data can serve as a base of comparison so that you can see either the strides your system has made or the uniqueness of the needs expressed by those surveyed.

**Specifying the Scope of Your Needs Assessment**

In order to focus your effort, you must decide what type of information you want. Challenge yourself and your advisors as to reasons why you want to gather certain information—how will you use it?

Are you planning to analyze all aspects of your program? Or one or two major areas? How extensive do you want the information to be? Will it take 15 minutes or 2 hours of the respondent's time? How many different populations do you plan to reach? Should they be asked the same types of questions? Do you want information about staff and organization needs as well as client needs in the same needs assessment effort?

Ideally, you will want to learn as much as possible. However, it is also important to consider the human and financial resources that you have available to conduct the needs assessment. The results might provide justification for additional staff and/or funding. However, as you specify the scope of the task at hand, be practical. Do not overpromise what you can deliver; instead make certain that the study—whatever the scope—has specific objectives and that your procedures are designed to accomplish them.

Nine dimensions to consider as you begin specifying the scope of your assessment effort are outlined in a document published by the Mesa, Arizona City Schools, *A Systematic Approach to Guidance: Assessing Desired Outcomes*.

**Content and Direction of Focus**

This dimension refers to the purpose of the assessment. The focus will determine the content. Are you seeking information on family situations, school or employment situations, interpersonal needs, work-related needs or academic needs? The direction of your assessment instrument may be either positive or negative as shown in Sample 2.
Breadth of Focus

This refers to the comprehensiveness of the assessment, how many content areas will be covered. Do you want to design an assessment that has a single focus, one that focuses on two or three areas, or one that covers many aspects. The narrower the focus, the more that can be learned about any one area. The broader the focus, the better the overall picture, but the weaker the understanding of any one area. The choice depends upon the purpose of the assessment. Sample 3 provides examples of breadth of focus.
Depth of Coverage

This refers to the overall length of the assessment. Will it take the respondent 10 minutes to complete a questionnaire or 2 hours to be interviewed? Depth also refers to how deeply the assessment probes into the areas of focus. Will the assessment include a few key items in a given area or undertake an extremely thorough investigation?

Degree of Structure

This refers to the nature of responses called for by the respondent. Will the respondents be asked to check, circle, rank, or asked to structure their own responses on an open-ended questionnaire or interview? The more structured responses (check, circle, rank) make the task of recording and analyzing data easier. Open-ended questions allow more individual expression and may also produce insights and suggested selections. (See Competency 4 for example of question types.)

Personalization

Assessments range all the way from the individual interview, in which the respondent talks to an interviewer, to the mass inventory in which thousands of individuals indicate their feelings on paper. The degree of personal attention is a dimension on which assessment approaches vary.

Sampling Considerations

This dimension refers to who and how many individuals/groups will be assessed. Do you want information from elementary students, college graduates, workers within a company, unemployed, union members, or specific cultural groups? How many individuals do you want to assess: all the K-12 students, a percentage of the K-12 students, all the 10-12 students, or a percentage of the 10-12 students? How will you ensure that your sample is representative of your population?
Quality

Four factors are particularly important in determining the quality of any assessment instruments and procedure itself.

a. **Validity** refers to whether an instrument actually measures what it is designed to do.

b. **Reliability** refers to whether an instrument produces consistent results over repeated usage.

c. **Generalizability** refers to whether the results obtained within a limited sample are accurate for the broader group they are intended to represent.

d. **Replicability** refers to whether the entire process can be documented and repeated elsewhere.

Availability and Costs

This refers to whether instruments and procedures are already in existence, are commercially available, or must be developed individually. Sample 4 displays some example costs.

Ease of Administration

This dimension includes several factors: (1) ease in processing data, (2) time of administration, (3) amount and nature of training necessary for administration, (4) scheduling flexibility for administration, and (5) appropriateness of the instrument for the level of respondents.
Planning Your Needs Assessment Effort

The success of your career guidance needs assessment is likely to depend on the ability and commitment of those individuals charged with the responsibility. For the results to have the most impact, the assessment should not be undertaken by you alone. The results of the findings may set the stage for significant and long-term change, and thus a variety of individuals should be involved from the start.

The career guidance staff can help you to--

1. identify the major goals of the career guidance program (where you want to go),
2. develop clear statements of need based on data gathered (where you are),
3. select the needs assessment method most appropriate to your situation,
4. develop and field test an instrument appropriate to your situation,
5. determine the groups and numbers to sample.
6. conduct the needs assessment,
7. tabulate and analyze the assessment data,
8. interpret the results to target audiences, and
9. utilize the results in overall planning efforts and program activities.

The chief executive/administrator can help you by--

1. making a public commitment to the assessment,
2. appointing an advisory committee (with your assistance),
3. taking part in the early meetings of the advisory committee, and
4. soliciting staff support and expertise.

The advisory committee should represent all aspects of your organization and community. An effective group is one that is willing to devote time and energy for an extended period. Wide representation is desirable; however, keep the group small enough to enable them to perform as a work group.

Because you are asking for long-term involvement, you must make certain that you use the time of your advisory committee wisely. If you direct their advice-giving efforts, you will find that your meetings will be more effective. When there is a decision to be made, be certain that they have the information needed to make it wisely.

The advisory committee can help you to--

1. identify and list needs that exist in the district,
2. identify population to be sampled,
3. select the method of assessment, and
4. communicate the results to the community and board of education.

Your organization and timing are important. Your needs assessment plan must have in it at least the activities listed below. Sample 5 shows what a needs assessment plan might look like.

Note: The table continues with more key dates and tasks.
A critical decision which you will have to make is whether to select existing instrumentation or develop your own. It may appear that a practical solution is to select a measure that has already been developed and used. After all, why reinvent the wheel? There certainly are advantages to doing this--particularly if you can find an instrument that parallels your goals or if your schedule does not permit sufficient development time. Another advantage when using many of the commercially available instruments is the possibility of obtaining summary reports, thus assisting you as you begin to analyze the data.

The disadvantage in using any existing instrument is that it probably will not match all of your goals and objectives. In some cases, you may make the decision to use the available instrumentation and thus gather data on only a portion of your goals. This is often a satisfactory first step. However, to have an instrument truly tailored to meet your agency's needs assessment efforts, you may well decide to take on the task yourself. Of course, you will have the help of your staff and consultants!

There are several item formats that you may use as you begin developing your instrument. Four common types of items are: (1) those that require a free or open-ended response, (2) those that require a yes/no response, (3) those that provide multiple-choice options, and (4) those that require ranking on a scale. Sample 6 presents examples of these formats.
Yes/No Response  
(Circle Y for Yes and N for No)
1. Clients should have job-seeking skills  Y N
2. Clients should have job-holding skills  Y N

Multiple Choice
1. Clients should have the following skills: (Check all that apply.)
   a. Job-seeking ___
   b. Job-holding ___
   c. Decision-making ___
   d. Personal economics ___
   e. Self-awareness ___

Scale Ranking  
(Circle your Response)
1. Clients should have job-seeking skills
   1 2 3 4 5
2. Clients should have job-holding skills
   1 2 3 4 5

You can use any or all of these formats in your instrument. However, keep in mind the process involved in tabulating the data. The more structured types of formats (yes/no, check, circle, rank) make the task of recording and the analyzing data easier to do than with the less structured open-ended formats. The more open-ended items that you provide, the more complex it will be for you to compile the data. Some structuring will probably always be necessary to allow meaningful summary and analysis. However, the more open-ended type of questions allow for more individual expression. These type of questions may produce insights and suggested solutions that cannot be obtained through structured formats.

Six characteristics of effective items are noted in Needs Assessment: A Step in Program Planning, a booklet published by the New York State Education Department. These criteria can serve as a reference as you develop or select your instrumentation:

1. Items should seek information which cannot be readily obtained from other sources.
2. Items should be clearly stated, unbiased, and create no embarrassment or annoyance to persons who respond.
3. Items should use language which is in common usage by the general population.
4. Items should reflect a neutral position as to the "correct" response.
5. Items should deal with one concern per item; one subject, one action, and one object of the action.
6. Response choices should be clear and understandable with commonly agreed upon meanings.
After the process of development is under way, be sure that each item is reviewed by a variety of individuals for content, readability, and style. When you are satisfied with the quality, pilot test the items with a group of sample respondents. This adds to the timeline, but is well worth the effort.

One aspect that is sometimes overlooked is the importance of developing instructions to introduce the instrument. All directions should be concise, but complete. If you find your instructions becoming lengthy, review them to see how they can be stated more simply. Also, a clear statement of purpose is critical so all involved know why you are conducting the assessment, and how the information will be used. Sample 7 contains an example of an introduction and instructions. The extent to which the respondents feel they are playing an important role in improving guidance programs will determine their degree of cooperation.
Reporting Results

You may be faced with a large amount of data that you have gathered as you begin to write the report of your career guidance needs assessment effort. If you decide to share the results with several different audiences, your task of disseminating this information will be even more challenging. Potential groups you will want to include along with basic reasons for reporting to them are listed in Sample 8.

A common pitfall that occurs during report writing is to overload the reader with data meaningful only to a statistician. It is necessary to find ways in which the findings can be presented in a manner which is useful to the audience. This can be accomplished by preparing a technical report, including data presented in tables, as well as an executive summary which will condense the report for those who do not require the extensive detail.

Your report needs to summarize the entire process of your effort. You should provide the reader with background regarding the purposes of the needs assessment. The procedure for conducting the study should also be reported, documenting the key steps and decisions made in the design. Your most extensive section will undoubtedly deal with reporting your findings. Be comprehensive--report good news and bad--but organize your presentation so that it is logical for the reader. Finally, you should include a section on recommendations. This section should answer the "so what" questions that are often raised when analyzing findings. As this report may receive wide circulation, this is your opportunity--in conjunction with your advisory committee--to make suggestions for programmatic changes in your agency.
Of course, the written report is only one way to disseminate the findings. You may wish to involve yourself in making presentations to the different audiences involved in the study, reporting to them firsthand what has been discovered. This is ideal as it provides an opportunity for questions and dialogue with your audience. However, since it is time consuming, and thus expensive, such presentations should be limited to key decision-making groups. If you have audiovisual support, you may want to consider putting together a slide or sound/slide package which serves not only to highlight your presentation but also provides a standard approach that can be used if several people are making such presentations.

An alternative way to get wider coverage is to use your local and agency newspapers. Be precise and clear in the information that you provide a reporter so that the facts are represented accurately. It may be helpful to prepare a news release to serve as the basic framework and then answer questions.

Using the Findings

As was stated early in this reading, the purpose of conducting a needs assessment effort is to determine the gaps that exist in your program. With these gaps identified, your agency has the direction it requires to implement change.

A needs assessment can impact on a program in a variety of ways. For instance, the results may initiate a total curriculum review or provide the rationale for establishing a more intensive staff development program.

A valuable outcome of the findings can be to use the data as a base against which subsequent assessments can be compared. With increased emphasis on accountability, using the data in this way serves to establish an evaluation process for measuring the effectiveness of your career guidance program.

Review the findings carefully. Be sure the analysis has been done carefully and that recommendations take into consideration past and present efforts. In short, do not view the report in isolation—use it as a means to link past efforts with future plans for change. If information in the report seems contradictory to your knowledge and experience, reexamine the data. Sometimes, a practical hunch adds the necessary meaning to raw data.

If the study is extensive, it may not be possible to implement the many recommendations that emerge. As a result it is necessary to assign priorities to proposed changes. An advantage to the assigning of priorities is that it may provide a more organized approach and prevent a flurry of haphazard responses to the recommendations.

You may wish to use your advisory committee to assist you in assigning priorities. In some cases, more consideration is given to the respondents in one audience than others. In other situations, all respondents are viewed equally and the gaps, or discrepancies, that are the widest get the most immediate attention. How extensive would the changes be, how long would it take, and how much would it cost? However, these are realities in all agencies and must not outweigh the needs assessment results.

To assure that the prioritized needs are met it may become necessary to develop another planning matrix, listing the prioritized activities, assigning individual/group responsibilities, and developing a realistic time line. If everyone involved is aware of the planned changes and their individual responsibilities for activities within the plan, chances are that needed changes will occur as scheduled.
Sometimes needed changes do not occur due to the costs involved. If agency funds are unavailable or inadequate you might consider applying for outside funding. The data you collected through the assessment process can be used as the basis for writing a proposal to obtain outside funds.

Your career guidance program needs assessment has the potential to make your agency truly responsive to the needs of your clients, as viewed by them as well as by agency staff and community members. By taking part in the planning process, you will have an opportunity to monitor the impact that this effort has on improving the agency's program in the future.
Learning Experience 1
Identifying Methods of Assessing Career Guidance Needs

OVERVIEW
Needs assessment efforts are often focused exclusively on the needs of clients. It is also important at times to assess the needs of the staff serving these clients. In this activity, you will be considering just such an effort. Prior to starting this activity, review the reading for Competency 1 on page 7.

You have decided to initiate a staff needs assessment within your agency to determine their needs in relation to your career guidance program. There are 500 staff members, and you have a staff of 3 to assist you in this effort. You hope to complete your study within two months. As you begin planning for methods of collecting the data, what key items should you keep in mind?
Do your key issues include the following:

1. Degree of personal contact you want?  
2. Amount of information you want to gather?  
3. Number of respondents you hope to reach?  
4. Your budget?  
5. Staff time available?

You should consider all these issues. Since you have access to your total population, you can offer everyone the opportunity to respond. You could distribute a questionnaire and have the staff return it anonymously to you by using your agency mail system or dropping it off at your office. If time is available, you could also interview a representative sample of staff members to probe for additional information.

---

Note: The following outline is to be used by the workshop facilitator.

<table>

<tbody>
<tr>
<td>A. Setting the Stage</td>
<td></td>
</tr>
<tr>
<td>1. Have the participants review the reading for Competency 1 on page 7.</td>
<td></td>
</tr>
<tr>
<td>2. Explain that this activity is designed to demonstrate the advantages of different information gathering techniques.</td>
<td></td>
</tr>
</tbody>
</table>
### Facilitator's Outline

3. Review three methods for gathering data:
   - Face-to-face interview (individual or small group)
   - Telephone interview
   - Mail survey/paper pencil administration

B. Present Situation

1. Ask the participants to break into three groups.

2. Assign each group one of the three data gathering methods and ask them to list advantages and disadvantages of using it as a method to conduct a career guidance program needs assessment.

3. Have each group vote on the most important advantages they listed and brainstorm about ways to convince the total group of this particular method.

4. Have each group elect a spokesperson.

5. Have the participants reassemble as a total group and have spokespeople for each group form a panel.

6. Chair a brief session where panel members "sell" the total group on their method for gathering data.

7. At end of session invite comments from the total group, noting pros and cons to be considered in using each method.

</tr>
<tr>
<td>3. Time frame</td>
</tr>
</tbody>
</table>
The following scenario outlines the plans for a needs assessment for a school district. Your task is to identify problem areas that you foresee and to make recommendations as to how to prevent or solve them.

Bedford School District has received state funds to conduct a career guidance program needs assessment. Terry Hadley has been designated by the superintendent of schools to direct this effort.

Although guidelines are sketchy, Terry has been told that this effort—the first in 10 years—should serve several purposes:

1. Survey community attitudes towards guidance goals and methods (a positive side effect may be an affirmative vote on next year's bond levy).

2. Establish a comprehensive set of educational goals, including guidance, for the district (nonexistent to date).

3. Provide direction for a new staffing effort as enrollments decline (a possible answer to solving overstaffing).

It is now January and the superintendent has asked that a final report be submitted no later than July 1. Because there has been publicity about the district's effort to obtain more community involvement, it is suggested to Terry that it is critical to develop and widely circulate a questionnaire as soon as possible.

Terry has asked you for advice. What problem areas are apparent that you might point out to Terry?

Before you assist Terry, read the Competency 2 reading on page 9 and then jot down some ideas.
As you examine Terry's problem—keeping in mind the dimensions as outlined in the reading—you can see that there are many issues to deal with prior to determining the type of instrumentation to be used. You should have noted at least two major problems.

First, there are too many purposes to be served—politically as well as educationally. Although the needs assessment may serve as a community attitude survey, there is no mention as to what other groups will be questioned. Will this effort look at student achievement to see how that may parallel community expectations?

Additionally, it seems that the state has funded a career guidance program needs assessment, not a total educational needs assessment. Establishing the goals for this effort could be quite extensive. Establishing goals for a career guidance program needs assessment would be a sound step toward establishing a comprehensive set of educational goals, but would not likely cover all that would be necessary.

Lastly, a needs assessment should provide direction; however, to have staff reassignment as a purpose is inappropriate. Equally inappropriate is to put public relations goals ahead of a thoroughly designed and carefully conducted needs assessment. The effort should generate positive feelings within the community, but if the job is done haphazardly, it serves no long-term educational purpose.

Note: The following outline is to be used by the workshop facilitator.

<table>
<thead>
<tr>
<th>Facilitator's Outline</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. Introduce Activity</td>
<td></td>
</tr>
<tr>
<td>1. Have the participants review the reading for Competency 2 on page 9.</td>
<td></td>
</tr>
<tr>
<td>2. Explain that this activity requires participants to play the roles of advisory committee members.</td>
<td></td>
</tr>
<tr>

<tr>
<td>-------------------------</td>
<td>----------</td>
</tr>
<tr>
<td><strong>B. Present Situation</strong></td>
<td></td>
</tr>
<tr>
<td>1. Ask the participants to break into groups of six to eight people each and assume varying roles of an advisory committee--client, staff member, administrator, parent, community member.</td>
<td>Encourage participants to represent the “special interests” of the roles they are playing.</td>
</tr>
<tr>
<td>2. Using the nine dimensions listed in the reading, have each group specify the conditions for a needs assessment of a career guidance program that has been formally established for 5 years--budget is not to be considered.</td>
<td>Note similarities and differences in the ways the groups approach the task.</td>
</tr>
<tr>
<td>3. Have each group list on large sheets of paper the decisions that need to be made and the recommendations of the group.</td>
<td></td>
</tr>
<tr>
<td>4. Reassemble all the participants and have each group share its plan.</td>
<td></td>
</tr>
</tbody>
</table>
The final report of your career guidance program needs assessment is due in 6 months. What is the basic sequence of events that must occur to meet that deadline? After reviewing the reading for Competency 3 on page 13, list the basic activities that need to be accomplished, indicate who is responsible for each activity, and note the time needed to complete the activity.
Compare your plan to Sample 5 “Needs Assessment Plan” on page 14. Planning is a key to the success of your needs assessment. An important aspect to keep in mind is to allow ample time for instrument selection or development and the tabulation and analysis of results.

Note: The following outline is to be used by the workshop facilitator.

<table>
<thead>

<td>----------------------------------------------------------------------</td>
</tr>
<tr>
<td>5. Ask the partners to work as a team to determine the additional types of staff assistance that would be required to conduct a needs assessment.</td>
<td>You may wish to remind the participants that budgets are always a concern. Realistically, what staff support could they expect in their settings?</td>
</tr>
<tr>
<td>6. Convene the total group and list on a chalkboard or large sheets of paper the skills needed to conduct a career guidance program needs assessment.</td>
<td>The competencies needed are identified on the handout, &quot;Competencies for Conducting a Needs Assessment&quot; on page 33.</td>
</tr>
<tr>
<td>7. Summarize this activity by mentioning the variety of skills needed to conduct a needs assessment.</td>
<td></td>
</tr>
</tbody>
</table>
Competencies for Conducting a Needs Assessment

Program staff should be able to--

1. identify major goals of career guidance programs,
2. develop clear statements of need based on data gathered,
3. know of available instruments,
4. develop items for needs assessment instruments,
5. collect needs assessment data,
6. tabulate and analyze needs assessment data, and
7. interpret results of needs assessment to staff, parents, clients, employers, and community members.

Learning Experience 4
Acquiring Instrumentation

OVERVIEW
The item format for your agency's needs assessment instrument requires the respondent to answer on a scale of 1-5 for each item. Assume that you have the responsibility for writing the instructions to aid respondents in completing the instrument. Review the reading for Competency 4 on page 15 and develop a set of instructions.
It is important that you provide the respondents with sufficient information so that they can easily complete the instrument. A brief description of the purpose of the instrument helps the respondents understand why their advice is being solicited. Since the format of the instrument requires a response from 1-5, be sure to give advice as to how that should be indicated. Last, be sure to thank the respondents for taking the time to complete the instrument. Review sample 7 on page 17.

Learning Experience 5
Reporting Results

OVERVIEW
The data from your career guidance program needs assessment have been analyzed and your report has just been completed. Your advisory committee has urged you to disseminate the findings and recommendations widely. You do not have funds available to launch a large campaign, but you agree that the study should receive attention. After reviewing the reading for Competency 5 on page 18, decide to which audiences you will send information.
All of the groups listed in the reading—clients, staff, parents, employers, and community members—should be included in your dissemination plan.

If an executive summary of the report has not been written, you could develop one as a starting place. The executive summary could be your basic dissemination document, thus decreasing the costs of printing the entire study and probably increasing the readership of the report.

The executive summary could be forwarded to key leaders (including client groups) throughout your setting and the community. You may wish to inform them of your interest—with the possible assistance of your advisory committee—in meeting with groups to discuss the findings in detail.

From your executive summary, prepare a news release for your local newspapers. Be open to meeting or talking with reporters. They have the potential of generating the level of interest that might satisfy the concerns of your advisory committee.

Learning Experience 6
Using the Findings

OVERVIEW
Prior to starting this activity, review the reading for Competency 6 on page 19.

You have been invited to discuss the findings of the career guidance program needs assessment with key administrators within your setting. Great concern is expressed regarding a recommendation in the report which states:

"The most widely noted need—as evidenced by clients and all other audiences served—is the lack of adequate instruction in the area of job-seeking skills. It is recommended that the agency address this area as the highest priority and institute a comprehensive instructional and guidance program activity to overcome this deficiency."

The concern has been raised because this area has been viewed as a priority for the last 2 years and significant funds have been spent on the purchase of materials to meet that need. How would you respond in this situation? List three possible explanations for this discrepancy.
Did you include the following possible reasons for the discrepancy?

1. Materials are ineffective.
2. Staff lacks necessary training.
3. Findings have been misinterpreted.
4. Time period of instruction was not sufficient to impact on the system.
5. Funds for this effort were misspent.

Any one of these reasons, or a possible combination, could explain the problem. A positive side benefit from this finding could occur—perhaps a follow-up study could be conducted of those clients involved in the job-seeking skills instructional effort. If the results are positive, renewed emphasis and support might be provided.

In essence, you need to help the group get to the core of the problem. There is a breakdown between agency priorities and client learning. This meeting could result in a closer evaluation of the effectiveness of the materials and methods and lead the way for curriculum review, or it could point to the need for new staff development activities, time allocations, or new methods.

Note: Circle the number that best reflects your opinion of group mastery.

Code:

- **Little**: With no concern for time or circumstances within training setting if it appears that less than 25% of the learners achieved what was intended to be achieved.
- **Some**: With no concern for time or circumstances within the training setting if it appears that less than close to half of the learners achieved the learning experience.
- **Good**: With no concern for time or circumstances within the training setting if it appears that 50%-75% have achieved as expected.
- **Outstanding**: If more than 75% of learners mastered the content as expected.
PART III

SUMMARY DATA SHEET—Instructions: In order to gain an overall idea as to mastery impact achieved across the Learning Experiences taught, complete the following tabulation. Transfer the number for the degree of mastery on each Learning Experience (i.e., group and individual) from the Workshop Impact form to the columns below. Add the subtotal's to obtain your total module score.

<table>
<thead>
<tr>
<th>GROUP Learning Experience</th>
<th>1 = score (1-4)</th>
<th>2 = score (1-4)</th>
<th>3 = score (1-4)</th>
<th>4 = score (1-4)</th>
<th>5 = score (1-4)</th>
<th>6 = score (1-4)</th>
<th>Total (add up)</th>
</tr>
</thead>
<tbody>
<tr>
<td>INDIVIDUAL Learning Experience</td>
<td>1 = score (1-4)</td>
<td>2 = score (1-4)</td>
<td>3 = score (1-4)</td>
<td>4 = score (1-4)</td>
<td>5 = score (1-4)</td>
<td>6 = score (1-4)</td>
<td>Total (add up)</td>
</tr>
</tbody>
</table>

Total of the GROUP learning experience scores and INDIVIDUAL learning experience scores = __________. Actual Total Score __________ Compared to Maximum Total* __________

*Maximum total is the number of learning experiences taught times four (4).
Performance Indicators

As you conduct the workshop component of this training module, the facilitator's outline will suggest individual or group activities that require written or oral responses. The following list of performance indicators will assist you in assessing the quality of the participants' work:

Module Title: Determine Client and Environmental Needs
Module Number: CG A-6

<table>
<thead>
<tr>
<th>Group Learning Activity</th>
<th>Performance Indicators to Be Used for Learner Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Group Activity Number 1: Providing rationale for method of gathering information.</td>
<td>1. Each group presents at least three reasons why their method is the best.</td>
</tr>
<tr>
<td>Group Activity Number 2: Determine the scope of a hypothetical career guidance program needs assessment effort.</td>
<td>1. Each group's decisions are based on the nine dimensions. 2. Each group is able to defend its decisions.</td>
</tr>
<tr>
<td>Group Activity Number 3: Determine your skills in the area of needs assessment.</td>
<td>1. The groups are able to identify at least seven skills needed to conduct a needs assessment.</td>
</tr>
<tr>
<td>Group Activity Number 4: Develop sample needs assessment.</td>
<td>1. The assessment items meet the review criteria.</td>
</tr>
<tr>
<td>Group Activity Number 5: Determine the information needs of various audiences.</td>
<td>1. Each participant was able to identify at least two audiences with which they would want to communicate.</td>
</tr>
<tr>
<td>Group Activity Number 6: Rank priorities for suggested educational change.</td>
<td>1. Each group is able to reach consensus on the top five priorities.</td>
</tr>
</tbody>
</table>
REFERENCES

ADDITIONAL RESOURCES

Fifteen recommended steps of an approach useful for identifying and serving the total needs of older Americans within their communities are delineated. Three broad types of need criteria discussed are normative need, felt need, and prior receipt of service need. The approach is illustrated by actual data from a 1976 study in Cleveland, Ohio. Continued research is needed to test out the basic assumptions underlying this approach to needs assessment, with respect to cost-efficient services, existing community services, and the extent to which the measures for determining normative need are good proxies for determining true need. Five attachments are included: indicators of normative need for four services; indicators of felt need and prior service need for four services; definition of twenty-eight services identified in the Cleveland study; the format of the data collection instrument sent to 118 agencies in Cleveland; and six tables of data from the Cleveland study.

The primary purpose of educational needs assessment should be to determine the specific nature of learner needs in order that programs may be designed and instruction prescribed that will meet those needs. Needs assessment should be conducted only when the information is necessary and will be used. Before a needs assessment is undertaken, it should be determined why it is being done, what should be assessed, how the information will be obtained, who will use the assessment results, how the information will be interpreted, and what kinds of decisions will be based on the results of the assessment. The needs assessment process involves seven basic steps: (1) deciding who will provide information; (2) deciding what information to collect; (3) developing procedures for collecting the information; (4) collecting the information; (5) processing and analyzing the information; (6) designating needs based on analysis of the information; and (7) informing the community and decision-makers of the results.

Statements of educational need developed through needs assessment processes should not be ranked without careful consideration of factors that can facilitate or impede their attainment. The process of determining the resource requirements for meeting assessed needs and estimating resource availability can be enhanced by following several suggestions: involve a carefully selected sampling of individuals representing all groups affected by attempts to fill the need being considered; take into account the economic, human, legal, social, and political variables influencing efforts to meet the need; determine the probability of modifying conditions that could impede efforts to meet the need; using a rating scale, arrive at a rating that indicates the feasibility of addressing each need. Establishing priorities for needs to be resolved involves determining the intensity and extent of the need, the duration of the need, the relevance of meeting the need to the achievement of identified goals, the feasibility of meeting the need, and the results anticipated from meeting the need.

This manual explains how to administer the instrument, Life Career Development Needs Survey--Elementary School (grades 4-6) and suggests ways to interpret the data obtained. Interpretive information is included for both computer analysis and hand computation. Computational aids for hand computation and the survey instrument are appended. This survey instrument is based on the following three domains of career development needs: interpersonal effectiveness, work and life skills, and life career planning. These domains represent major spheres of concern in the Georgia Comprehensive Guidance Project's life career development model. (ERIC document ED160850 provides a detailed description of this model and strategies for program development/implementation on the elementary and secondary levels; CE019692 describes the postsecondary and adult model.)

This manual explains how to administer the Life Career Development Needs Survey(s) for adults and suggests ways to use the data obtained. Three separate needs surveys are included for the following segments of the adult population: young adult, middle adult, and older adult. The instruments are based on three domains of career development needs: interpersonal effectiveness, work and life skills, and life career planning. These domains represent major spheres of concern in the Georgia Comprehensive Career Guidance Project's life career development model. (See ERIC document CE019692 for a detailed description of the career guidance model.)

This manual explains how to administer the instrument Life Career Development Needs Survey--Secondary School, and suggests ways to interpret the data obtained. Interpretive information is included for both computer analysis and hand computation and the survey instrument appended. This survey instrument is based on the following three domains of career development needs: interpersonal effectiveness, work and life skills, and life career planning. These domains represent major spheres of concern in the Georgia Comprehensive Career Guidance Project's life career development model. (ERIC document ED160850 provides a detailed description of this model and strategies for program development/implementation on the adult model.)

This booklet specifically addresses career guidance planning, providing specific how-to-do-it instructions. In addition to being instructional, it provides sample materials designed to be adapted for use in other types of settings.

This document outlines procedures for conducting needs assessment efforts. The eight steps described are: (1) establish a needs assessment committee, (2) prepare goal statements, (3) conduct a survey to determine perceived needs, (4) assign priorities to perceived needs, (5) set desired levels of student achievement, (6) determine actual status of student achievement, (7) compare actual status with desired levels, and (8) assign priorities to needs. Although not designed specifically for career guidance, it is comprehensive and informative in presenting step-by-step instructions that can be adapted in a variety of settings.

The purpose of this needs assessment study was to demonstrate the need for a comprehensive career and vocational guidance and counseling plan in West Virginia. Survey instruments adapted from a number of existing instruments which pertain to career and vocational education and counseling were administered in forty-nine of fifty-five counties. Students, parents, out-of-school youth and adults, postsecondary public school students, college freshmen, and school counselors completed questionnaires on the importance of career and vocational guidance needs and how well these needs were being met. Counselors, school administrators and teachers, and vocational rehabilitative administrators completed forms dealing with current levels of counselor competencies and the importance of these competencies. In addition, ten employers in each county were contacted in order to gain understanding of desirable skills and the attainment of these skills by former students. The major finding of the project was that there exists a need for career and vocational guidance and counseling services throughout the state. Findings support the necessity of developing a state model for comprehensive services to be available to all persons. The needs assessment instruments are included in the appendix.

The purpose of this project was to develop and disseminate a conceptual model for comprehensive secondary school (7-12) career guidance programs. The model consisted of transportable packages intended to provide a framework for the delivery of career guidance strategies designed to facilitate the achievement of desired student outcomes. Initially, sixteen Georgia school systems were involved, but later seven systems were discontinued and twenty-one new systems were added. A needs assessment was conducted to ascertain need priorities for program planning and development, and a multiple criterion approach to the assessment of the project was planned. The major conclusions are (1) though staff development is costly and frustrating, it seems to be the key to lasting effect and carry-over from project orientation to project continuation; and (2) there is a critical need at all levels (state, local, and federal) for more program coordination. (Numerous materials are appended, including guides for training paraprofessionals, establishing a career guidance center, setting up a career guidance library, and evaluating the program. Also, twenty-four related documents are available, such as a program development guide--CE018146; a staff development handbook--CE018339; and several staff development training manuals and materials for both the secondary and elementary school levels.)
KEY PROJECT STAFF

The Competency-Based Career Guidance Module Series was developed by a consortium of agencies. The following list represents key staff in each agency that worked on the project over a five-year period.

The National Center for Research in Vocational Education

Harry N. Drier ......................... Consortium Director
Robert E. Campbell .................... Project Director
Linda A. Pfister ....................... Former Project Director
Robert Bhaerman ..................... Research Specialist
Karen Kimmel Boyle .................. Program Associate
Fred Williams ......................... Program Associate

American Institutes for Research

G. Brian Jones ........................ Project Director
Linda Phillips-Jones ................. Associate Project Director
Jack Hamilton ......................... Associate Project Director

American Association for Counseling and Development

Jane Howard Jasper ................. Former Project Director

American Vocational Association

Wayne LeRoy ........................ Former Project Director
Roni Posner ......................... Former Project Director

U.S. Department of Education, Office of Adult and Vocational Education

David Pritchard ...................... Project Officer
Holli Condon ......................... Project Officer

A number of national leaders representing a variety of agencies and organizations added their expertise to the project as members of national panels of experts. These leaders were—

Ms. Grace Basinger
Past President
National Parent-Teacher Association

Dr. Frank Bowe
Former Executive Director

Ms. Jane Razeghi
Education Coordinator
American Coalition of Citizens with Disabilities

Mr. Robert L. Craig
Vice President
Government and Public Affairs
American Society for Training and Development

Dr. Walter Davis
Director of Education
AFL-CIO

Dr. Richard DiEugenio
Senior Legislative Associate
(representing Congressman Bill Goodling)
House Education and Labor Committee

Mr. Oscar Gjermoe
Administrator (Retired)
U.S. Department of Labor
Division of Employment and Training

Dr. Robert W. Glover
Director and Chairperson
Federal Committee on Apprenticeship
The University of Texas at Austin

Dr. Jo Hayslip
Director of Planning and Development in Vocational Rehabilitation
New Hampshire State Department of Education

Mrs. Madelines Hemmings
National Alliance for Business

Dr. Edwin Harr
Counselor Educator
Pennsylvania State University

Dr. Elaine House
Professor Emeritus
Rutgers University

Dr. David Lacey
Vice President
Personnel Planning and Business Integration
CIGNA Corporation

Dr. Howard A. Matthews
Assistant Staff Director
Education (representing Senator Orin G. Hatch)
Committee on Labor and Human Resources

Dr. Lee McMurrin
Superintendent
Milwaukee Public Schools

Mr. Nanine Mailejohn
Assistant Director of Legislation
American Federation of State, County, and Municipal Employees

Dr. Joseph D. Mills
State Director of Vocational Education
Florida Department of Education

Dr. Jack Myers
Director of Health Policy Study and Private Sector Initiative Study
American Enterprise Institute

Mr. Reid Runde
Director of Personnel Development
General Motors Corporation

Mrs. Dorothy Shields
Education
American Federation of Labor and Congress of Industrial Organizations

Mr. John Wills
Director
Employment and Training Division
National Governors’ Association

Honorable Chalmers P. Wylie
Congressman/Ohio
U.S. Congress

63
Competency-Based Career Guidance Modules

CATEGORY A: GUIDANCE PROGRAM PLANNING

A-1 Identify and Plan for Guidance Program Change
A-2 Organize Guidance Program Development Team
A-3 Collaborate with the Community
A-4 Establish a Career Development Theory
A-5 Build a Guidance Program Planning Model
A-6 Determine Client and Environmental Needs

CATEGORY B: SUPPORTING

B-1 Influence Legislation
B-2 Write Proposals
B-3 Improve Public Relations and Community Involvement
B-4 Conduct Staff Development Activities
B-5 Use and Comply with Administrative Mechanisms

CATEGORY C: IMPLEMENTING

C-1 Counsel Individuals and Groups
C-2 Tutor Clients
C-3 Con duct Computerized Guidance
C-4 Infuse Curriculum-Based Guidance
C-5 Coordinate Career Resource Centers
C-6 Promote Home-Based Guidance

C-7 Develop a Work Experience Program
C-8 Provide for Employability Skill Development
C-9 Provide for the Basic Skills
C-10 Conduct Placement and Referral Activities
C-11 Facilitate Follow-through and Follow-up
C-12 Create and Use an Individual Career Development Plan
C-13 Provide Career Guidance to Girls and Women
C-14 Enhance Understanding of Individuals with Disabilities
C-15 Help Ethnic Minorities with Career Guidance
C-16 Meet Initial Guidance Needs of Older Adults
C-17 Promote Equity and Client Advocacy
C-18 Assist Clients with Equity Rights and Responsibilities
C-19 Develop Ethical and Legal Standards

CATEGORY D: OPERATING

D-1 Ensure Program Operations
D-2 Aid Professional Growth

CATEGORY E: EVALUATING

E-1 Evaluate Guidance Activities
E-2 Communicate and Use Evaluation-Based Decisions
