This paper examined the status of assessment of writing as it is currently performed in the United States. All fifty states and the District of Columbia responded to a survey requesting information on their testing programs. Twenty-six states and the District of Columbia were found to assess writing on the statewide level, and eight states were in the process of developing procedures. Statewide assessment was made at various grade levels. Purpose for statewide assessment varied, as did the population taking the test. States which conducted comprehensive assessment (where the writing ability of every student in a specific grade was assessed) could utilize the results in several ways. Results were used to indicate the need for remediation in writing, to determine whether minimum competency requirements had been met for graduation, and to provide information for improving curriculum and instruction. The appendix provides a state by state summary of survey results. (LMO)

Appendix: Survey Results......................13
   (listed alphabetically by state)
Introduction

Recently, students' writing ability has been a salient educational concern. Following several years of complaints about the sorry state of writing in American schools (e.g., Graves, 1978; Sheils, 1975), there has been a surge of interest in how students learn to write (e.g., Bereiter, 1980; Graves & Calkins, 1980), the quality and method of writing instruction (e.g., Applebee, 1981; Walmsley, 1980); and how writing may be responded to or evaluated (e.g., Cooper & Odell, 1977; Hillerich, 1979; Searle & Dillon, 1980).

At the same time, there continues the demand for schools' accountability in providing students with basic skills (Wigdor & Garner, 1982). This has led to utilization of writing research and its results for specifying what constitutes competency in writing, identifying children's difficulties in writing so they may be remedied, and identifying those writing program features that encourage and develop student writing.

Many states have recently introduced procedures for accomplishing all or some of these goals by establishing minimum competency tests for high school graduation, by setting up a series of diagnostic tests across elementary and secondary grades, or by performing sample assessments at the statewide level. Other states regard the issue as a local one, leaving
the perogative of writing assessment to local school districts.

While most educators know what their own state requires in terms of minimal competencies, provides for diagnostic testing purposes in writing, or uses to evaluate writing programs, we have no comprehensive picture of the assessment procedures required by all the states in the Union. Lawlor (1979) has analyzed the writing minimal competencies of seven states; and Frederick (1979) has reviewed writing assessment as performed in sixteen states. A recent NAEP state-of-the-states survey (1983) found that 39 of 47 states responding to the survey conduct statewide testing programs, but it did not report on the frequency or status of writing assessment in the states.

This paper examines the status of assessment of writing as it is currently performed in the United States. The paper considers the current status of writing assessment in each state, the grade level(s) at which the assessment is made, whether assessment is comprehensive (i.e., made of every student in the state at a certain grade level) or of a sample population, the purpose of the assessment, the actual tasks required in the assessment, and the methods of scoring the assessment. Also, unique writing assessment features (such as one state's inclusion of a writing
apprehension questionnaire, and another's provision of two assessment sessions for the revision of writing samples) are noted.

All fifty states and the District of Columbia responded to requests for information on their testing programs. An NCES yearbook, *Educational Directory of State Education Agency Officials* (Porter, 1981), was used to obtain the names of the appropriate officials and departments, and all information was supplied by an official familiar with, or responsible for, the testing program. Names and phone numbers of state education agency directors or supervisors are included in the Appendix.

**Results of the Survey**

**Test Status**

Twenty-six states and the District of Columbia currently assess writing on the statewide level. Eight states are in the process of developing assessment procedures. Seventeen states do not conduct statewide assessment of writing.

**Grade Level**

The statewide assessment of writing is made at various grade levels. Some states assess at three grade
levels (e.g., Alabama, Hawaii, Minnesota), some at two grade levels (e.g., Maryland, Nevada), and some at one level (e.g., Connecticut). Other states require the student to pass the test by a certain grade level for promotion or graduation (e.g., Texas' Exit Level Assessment).

Who Takes the Test

As the purpose of statewide assessment of writing varies, either to certify a student as minimally competent, to diagnose particular writing difficulties, or to evaluate a writing program, so too does the population that takes the test. Some states require comprehensive assessment, where all students at a specific grade take the writing assessment, while other states assess sample populations, much in the same way as the National Assessment of Educational Progress.

Utilization of Test Results

Comprehensive Assessment. Those states which conduct comprehensive assessment (where the writing ability of every student in a specific grade is assessed) can utilize the results in several ways, though not all states use assessment findings to the same purpose.

Comprehensive assessment results may be used as
indicators of the need for remediation in writing. A student who performs poorly may be recommended for, or required to take, special writing instruction. The assessment of writing at earlier grades is often so utilized.

Some states utilize comprehensive assessment results to determine whether minimum competency requirements have been met for graduation, or for the award of a specific diploma. Recently, such minimum competency tests have been challenged in court (e.g., Debra P. vs. Turlington, 1979). There has been much debate (Madaus, 1983; Wigdor & Garner, 1982) concerning the validity of such tests (i.e., the extent to which the tests measure what is actually taught in the classroom).

Additionally, comprehensive assessment results may provide information for improving curriculum and instruction. Poor performance on specific items may indicate lack of appropriate instruction, materials, or both. Increases in writing performance may signal writing programs of exceptional quality. Of course, findings of such assessments must be carefully analyzed before one can begin to suggest that increases in writing performance are attributable to specific programs or program components.

Sample Assessment In states where writing assessment is made of sample populations (e.g.,
Illinois test 2400 students each at grades 4, 8 and 11) an approximate level of writing ability of groups or levels of students may be inferred. The effectiveness of a writing program may also be examined. Because of the restricted (i.e., not all students take the test) nature of sample assessment, individuals' writing ability is not normally examined, except as a part of a larger group.

Type of Task

The tasks included in statewide writing assessment vary greatly. In general, writing ability is tested by objective test items (usually multiple choice), with actual writing samples, or with both combined.

Objective test items typically include components of writing such as handwriting, punctuation, spelling, and capitalization. Also found on some objective item tests are "complex composition skills" (Stiggins & Bridgeford, 1983) such as sentence structure and paragraph organization. Some states which use objective test formats in lieu of actual writing samples acknowledge that actual writing samples are probably more valid measures of students' writing ability (e.g., California Assessment Program). The objective test format is, however, often less costly and time consuming to administer and score (Frederick, 1979; Stiggins, 1982).
State assessments which use actual writing samples vary considerably, ranging from narrative and expository to descriptive and persuasive writing tasks. Specific tasks within these modes include letter writing (often a business letter), descriptions of a place (such as a favorite place), and persuasive writing (e.g., why the principal should extend lunch period by 15 minutes). Some states include "survival skills" (e.g., completing job and license application forms) as component parts of their writing assessment. The Appendix summarizes the specific writing tasks required by each state.

Scoring

Machine-scoring of objective multiple-choice tests is common. Assessments which use actual samples of student writing employ several scoring methods, including holistic scoring (see Cooper, 1977), primary trait scoring (see Lloyd-Jones, 1977), and analytical scoring. Some states use combinations of these scoring procedures; for example, initially scoring papers using the holistic method, and then scoring analytically those which do not receive a passing mark. Other states use modified procedures which draw from one or more of the above procedures (e.g., South Carolina uses a "modified holistic" scoring procedure).
Guide to the Appendix

The Appendix is a compilation of information concerning assessment of writing by individual states. In it, the following information is given for most states:

Assessment Title. The name of the writing assessment (e.g., Alabama Basic Competency Test) is listed next to the state.

Grade. The Appendix lists grade(s) at which assessment is made.

Task. The nature of the writing assessment task (e.g., Write a paragraph on a given topic) is listed. The tasks were taken from the actual tests, except where test items are considered secure. In these instances, sample tasks provided by the state education agency were used.

Scoring Method. Objective item tests are machine scored. Actual writing samples are scored by the method listed (e.g., Holistic).

Assessment Type. A comprehensive assessment is one that is taken by every student at a specific grade level. A sample assessment is one that is given to a representative sample of students. The size of the sample and the grade level(s) are given in most instances.

Purpose. The rationales for the assessment (e.g., competency certification), and the utilization of the
Conclusion

An examination of the data in the Appendix indicates the wide variety in the statewide assessment of writing. This is, in part, a reflection of the purpose of the assessment. A comprehensive assessment performed at grade 4 will most likely be used for diagnostic purposes, while one performed at grade 12 might be for competency certification. In a state where there is an interest in evaluating a writing program, a sample assessment might be utilized.

A second factor affecting the nature of the assessment concerns the construction of the assessment. Those who develop writing assessments, typically state education agency employees or consultants, bring a variety of types of professional training to the task. Among the group given the task of developing the writing assessment, there may be differences in opinion as to what to include (e.g., business letter, application forms to be filled out, essay on a favorite place) in the assessment, and how to best elicit and score writing samples.

Finally, most statewide assessments of writing are performed under time and financial constraints. A carefully planned assessment which takes consideration of recent research in writing might not be utilized if
money is not available for administering and scoring the test, or if there is not adequate time for the assessment sessions or for scoring the assessment.

Given the factors which influence the status of writing assessment, the variety found among the states is not surprising. Because many statewide assessments are being developed, or have just recently been implemented, it should be interesting and worthwhile to pay close attention to findings and suggestions from such assessments.

Author Note. Many states are developing, or considering developing statewide writing assessment procedures. Thus, this list should be considered tentative. Those interested in the current status of a specific state's assessment should contact the state education agency or official listed for that state.
Appendix: Survey Results

ALABAMA

Alabama Basic Competency Test

Grade Task
3  Label pictures; copy words or short sentences; expand topic sentences by adding two or more sentences; write legibly; proofread.
6  Write paragraph on given topic. Given topic sentence, write four supporting sentences, including a concluding sentence to the paragraph.
9  Write paragraph on given topic. (e.g., My Favorite Season). Must write paragraph of 5 to 8 sentences. Should include topic sentence, 3 to 5 supporting sentences, and a concluding sentence. Write a one-sentence summary of given paragraph.

Scoring method: Analytical

Assessment type: Comprehensive. Every student in grades 3, 6, and 9.

Purpose: Determine needs of individual student relative to minimum skills.

Contact person: Martha Jungwirth
Education Specialist
State of Alabama
Department of Education
State Office Building
Montgomery, AL 36130

ALASKA

No statewide assessment. Local districts determine curriculum and assessment.

Contact person: Annie Calkins
Department of Education
(907) 465-2841
ARIZONA

No statewide assessment. Specific competencies are determined and assessed at the local district level with criterion-referenced tests. State requires 6th grade competency in written communicative skills prior to receiving 8th grade certificate of promotion.

**Scoring Method:** Determined locally.

**Assessment type:** Comprehensive. Each student must be assessed and certified as having met minimum requirements.

**Purpose:** Obtain information needed for planning instruction that provides for levels of achievement, progress rates, and special skill needs.

Note: Recent state legislation requires composition skills testing of 1,000 students each in grades 4, 8 and 11 in a week in April 1985. This is for one year only. The 1983-84 NAEP Writing Assessment instruments will be used.

CALIFORNIA

**Program I: Student Proficiency Test**

Required for high school graduation. Developed at local school district level. State provides sample assessment exercises (Sample Assessment Exercises Manual) to aid districts in designing their own assessment instruments.

**Scoring method:** Determined locally.
CALIFORNIA, continued

Assessment type: Comprehensive.

Purpose: To verify minimum competencies of student.

Program II: California Assessment Program

Grade Task
3  Objective multiple choice test of writing process skills dealing primarily with matters of judgement in writing (e.g. complete a sentence by choosing correct word), and supporting skills (e.g., spelling, punctuation, capitalization).

3  Objective multiple choice test of writing process skills and supporting skills.

12 Objective multiple choice test of writing process skills and supporting skills.

Note: The California Assessment Program uses "matrix sampling" where each student receives only a portion of all the items on the total test. With matrix sampling, individual student results cannot be obtained, but accurate estimates of the overall performance of groups of students can be computed.

Assessment type: Comprehensive. All 3rd, 6th, 8th and 12th graders.

Purpose: Identification of programmatic strengths and weaknesses.

Note: There is also an objective, multiple choice test of writing process skills and supporting skills for grade 8. In the near future, there will also be a statewide direct writing assessment.

Contact person: David Gordon, Associate Superintendent Curriculum, Instruction & Assessment (916) 445-0297

COLORADO

No mandatory state wide assessment. Competency tests are prerogative of local school board. Statewide Writing Assessment program available to districts for voluntary participation.
COLORADO, continued

CONNECTICUT

Connecticut Ninth Grade Proficiency Test

Grade | Task
--- | ---
9 | Objective, 36-item multiple choice test including Mechanics of Expression (e.g., use correct capitalization), Composing and Organizing Skills (e.g., language appropriate to writers' purpose and audience), and Library Skills for Writing Tasks (e.g., demonstrate dictionary skills). Write about a topic you are familiar with (e.g., "Something You Own").

Scoring Method: Holistic

Assessment type: Comprehensive.

Purpose: Identify those students who may need remedial help in the basic skills.

Note: A grades 4-6-8 Mastery Test--census testing--will also include a writing sample. The sample will be holistically scored. If sample is below standard, it will be scored analytically.

Contact person: Pat Forione, Chief Bureau of Research, Planning & Evaluation Department of Education Hartford, CT 06115

DELAWARE

No statewide assessment. State requires that students be certified as having met minimal performance requirements in writing before graduation. State sets guidelines, school districts determine procedures for assessment.

FLORIDA

State Student Achievement of minimum performance standards

Part I (SSAT-I): Measure student achievement of minimum performance standards

Grade Task
3 Objective multiple-choice test given at all four levels.
5
8
11
FLORIDA, continued

Assessment type: Comprehensive

Purpose: To identify strengths and weaknesses in student achievement and curricular programs.

Part II (SSAT-II): Application of basic skills to everyday situations

Grade Task
11 or Complete a check and its stub; complete accurately common application forms; include necessary information when writing letters to supply or request information.

Assessment type: Comprehensive

Purpose: To verify minimum competencies for high school diploma

Florida Minimal Skills Writing Assessment

Grade Task
3 Typical tasks include: copy a letter, write the letters of the alphabet in sequence, capitalize correctly.

5 Typical tasks include: write declarative sentences, spell words, write legibly in cursive and manuscript.

8 Typical tasks include: write compound declarative sentences, write a set of simple directions, group words or objects that are familiar.

11 Typical tasks include: write a business letter. use correct punctuation, organize information for a report under appropriate headings.

Scoring method: Rating scales ranging from 0-5.

Assessment type: Sample.

Purpose: Assessment of writing skills that do not lend themselves to measurement through multiple-choice items.
FLORIDA, continued

Currently uses "mechanics" and "expression" subtests of the Comprehensive Test of Basic Skills (CTBS), Form U, McGraw-Hill. Statewide assessment in development.

Note: Statewide assessment of writing skills using objective tests will begin in Spring 1986. Students K-12 will be assessed.

Contact person: Joseph Clark
Director of Language Arts
(502) 564-2672

LOUISIANA
Program I: State Assessment Program
Program II: Basic Skills Testing Program

Writing assessment is undertaken with two programs. Program I samples 5% of the tests given to students in grades 3, 7, and 10 (in a manner similar to the NAEP). Program II, a basic skills program, will assess every student's writing ability at each grade (effective grades 2-12, 1992).

Scoring method: Program I-Primary trait and multiple choice objective test.
Program II-Multiple choice objective test.

Assessment type: Program I-Sample (5% of all tests are scored).
Program II-Comprehensive. Students at every grade level will be assessed.
LOUISIANA, continued

Note: The 95% of the writing samples from Program I that are not scored at the state level are available for districts to score. The state provides training necessary for the interested districts.

Contact person: Donna Nola
(504) 342-3743

MAINE

Grade Task
4 Write an expressive selection (e.g., How you feel on a rainy school morning).

8 Same as Grade 4.

11 Write a descriptive essay about something you know about (e.g., Acadia National Park).

Scoring Method: Grades 4 & 8: Primary trait; Grade 11: Holistic. On all grade levels, a second scoring method has been utilized, on which is a "more specific holistic scale" consisting of a 7-point competence scale.

Assessment type: Sample. Approximately 1500 students each at grades 4, 8, 11.

Purpose: To examine the condition of writing performance in the state and make recommendations based on findings.

Note: Maine encourages students to write drafts of their writing tasks and provides them with dictionaries to assist in some of the mechanical aspects of writing. A new assessment program will test all students in grades 4, 8 and 11 and will require writing samples that are more extensive than those of the 1982 assessment. The new assessment will be implemented Fall, 1985.

Scoring method: Holistic.

Assessment type: Comprehensive

Purpose: Tests for grade 5 and grade 8 or 9 aid in the identification of students who need special help in developing their writing skills.

Test for grade 11 or 12 must be passed in order to receive a high school diploma. (Other testing alternatives provided.)

Contact person: Winsor Lott, Director
Division of Educational Testing
State Education Department
Albany, NY 12234

NORTH CAROLINA

Statewide assessment in development.

Grade Task
6 Write a descriptive composition; write a clarification composition.

9 Write a point of view composition; write a persuasive composition.

11 Write a persuasive paragraph; write a message; take a "writing mechanics" objective test.
NORTH CAROLINA, continued

Scoring method: Undecided. Will consider focused holistic and analytic checklist.

Assessment type: Sample. 7,500 students at grades 6 & 9. Comprehensive. Grade 11 may be required to take the writing test as a component of minimum competency test beginning 1987.

Purpose: Information obtained from tests may be used for planning for the instruction, time allocation, and resources necessary for those who have not made adequate progress in acquiring essential writing skills.

SOUTH CAROLINA

South Carolina Basic Skills Assessment Program

<table>
<thead>
<tr>
<th>Grade</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>Write a narrative selection, an expository selection, and a descriptive selection.</td>
</tr>
<tr>
<td>8</td>
<td>Write a narrative selection, an expository selection, and a descriptive selection.</td>
</tr>
<tr>
<td>11</td>
<td>Write a persuasive selection, a narrative selection, an expository selection, and a descriptive selection.</td>
</tr>
</tbody>
</table>

Scoring method: Modified holistic. Papers are scored on a 4 point scale. Papers receiving less than "3" are scored analytically.

Assessment type: Comprehensive
SOUTH CAROLINA, continued

Purpose: To evaluate student writing skills, and to identify students for remedial programs.

Note: Only one type (narrative, descriptive, expository, persuasive) of writing (per grade) is assessed in any one test administration. The grade 11 assessment will be replaced with grade 10 beginning in Spring 1986. The grade 10 writing assessment will be part of an "exit" examination required for a state high school diploma. The diploma requirement becomes effective for graduates in 1989-90 and thereafter.

Texas Assessment of Basic Skills (TABS)

Includes multiple choice items on components of writing. Written composition assessment may contain any of the following:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Task</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>Write a story; write instructions that tell how to do something; write a description of an object or scene.</td>
</tr>
<tr>
<td>5</td>
<td>Write about how two objects are alike or different; write about reasons for a particular course of actions; write about any of the Grade 3 topics.</td>
</tr>
<tr>
<td>Exit</td>
<td>Write a story; write a description of an object, scene or concept; write to compare and contrast objects, events, ideas or concepts; write about the advantages or disadvantages of a given subject; write proposing a solution to a problem; write stating a position on a topic to influence an audience.</td>
</tr>
</tbody>
</table>

Scoring method: Focused holistic.

Assessment type: Comprehensive.

Purpose: To determine individual student mastery of specific objectives so that districts can implement appropriate compensatory instructional services for students.

WISCONSIN

Wisconsin Pupil Assessment Program

Grade Task
5 Write a narrative composition (impromptu); write a science report (with revision).
8 (Same as Grade 5).
11 Write a narrative composition (impromptu); write a persuasive essay (with revision).

Note: Two writing samples, one impromptu (written in one session), and one with extra time for revision (written in two sessions), are obtained in the assessment.

Scoring method: Holistic, primary trait.

Assessment type: Sample. 3541 students.

Purpose: To obtain valid and reliable information about the general status of educational achievement in the state.

Note: Analysis of the kinds, extent and quality of revisions made by students in the statewide assessment is performed. A questionnaire regarding student attitudes toward and experiences in writing is included in the assessment.
