Findings are reported of a process evaluation of the Automated Performance Tracking and Productivity Improvement Project, a project developed to enhance the productivity and efficiency of child protective services (CPS) staff and to enable Region 10 of the Texas Department of Human Services to better meet federal and state performance guidelines. Described are the methods used to establish the automated system for measuring productivity and the techniques used to train managerial staff in solving problems that might be identified when the system is fully operational. Once developed, the system will serve as a mechanism to track individual and regional achievement of stateide performance standards and work load measures and to assist in identifying areas where corrective action is needed. Appendices contain: the newly developed set of uniform personnel tasks and standards; the case reading guides used to judge case compliance with federal regulations; a flowchart of the automated tracking system; and samples of the system's computer-generated reports. GENERAL INTRODUCTION

Innovations in Protective Services is the collective name of seven projects funded by P.L. 93-247 state grant money and conducted by the Texas Department of Human Services (DHS). The seven demonstrations, designed to test ideas for improving services to children in need of protection, are listed below:

- Multidisciplinary Institute for Child Sexual Abuse Intervention and Treatment;
- Project Amistad (Friendship), a Joint Venture between DHS and Family Outreach;
- Family-Centered, Home-Based Intervention for Protective Services Clients;
- Child Protective Services Case Management;
- Child Abuse and Neglect Prevention;
- Advanced Job Skills Training; and
- Automated Performance Tracking and Productivity Improvement.

Overall objectives established for the seven projects are to develop innovative child abuse and neglect programs using volunteers and private agencies; to strengthen the quality of services for child abuse and neglect through competency-based and specialized training programs; and to develop models and program designs for planning and delivering child abuse and neglect services and for allocating resources.

Priorities from DHS's long-range plan for child protective services (CPS) provided the basis for selection of the projects to be demonstrated, and project results will be used in planning improvements in CPS service delivery systems.

The project reported on in this document, Automated Performance Tracking and Productivity Improvement, is being conducted in DHS Region 10.

Copies of this and other reports on the 93-247 projects can be obtained by writing to Project Support and Utilization Section; Office of Research, Demonstration, and Evaluation; Texas Department of Human Services; P.O. Box 2960 (MC 504-E); Austin, Texas 78769.
ACKNOWLEDGMENTS

The Texas Department of Human Services wishes to acknowledge the contributions of those who participated in the development of the Automated Performance Tracking and Productivity Improvement Project. Sandy McSsey managed day-to-day operations. Grady Rhodes served as project manager. Consultants John Cox, programmer, and Jerry Lackey, Ph.D., statistical consultant, contributed their expert knowledge to the project. Margaret Maxwell, regional director for Services to Families and Children, supported the project manager; and the Regional Management Information System Committee assisted the project manager in implementing all the procedures necessary to make the project work. Special appreciation is accorded to the child protective services supervisors and specialists who enthusiastically accepted the project goal and implemented the necessary procedures to make it work.

At headquarters in Austin, David Brock served as program liaison with the Protective Services for Families and Children (PSFC) Branch. The Personnel Division and the Office of Field Management sent representatives to serve on the advisory committee. The regional director of Services for Families and Children from DHS's Region 6 also served on the committee.

From the Office of Research, Demonstration, and Evaluation (ORDE)—headed by Assistant Commissioner Suzette Ashworth, Ph.D.—efforts were contributed by several members of ORDE's Research and Demonstration Division, which is administered by Kent Gummerman, Ph.D. Lucretia Dennis-Small, project specialist, wrote the required federal reports, monitored project progress, and wrote the process evaluation. Nicholas Constant and Phyllis Jamar edited and produced the documents.
The Automated Performance Tracking and Productivity Improvement Project was designed by staff members in Region 10 of the Texas Department of Human Services (DHS). The project was developed to enhance the productivity and efficiency of child protective services (CPS) staff and to enable the region to better meet federal and state performance guidelines.

This annual report, a process evaluation, describes the methods used to establish the automated system for measuring productivity and the techniques used to train managerial staff in solving problems that might be identified when the system is fully operational.

Once developed, the system will serve as a mechanism to track individual and regional achievement of statewide performance standards and workload measures and to assist in identification of areas where corrective action is needed.

For the reader's information, appendixes to the report contain copies of the newly developed set of uniform personnel tasks and standards (Appendix A); the case reading guides used to judge case compliance with federal regulations (Appendix B); a flowchart of the automated tracking system (Appendix C); and samples of the system's computer-generated reports (Appendix D).
BACKGROUND AND ORIGIN

The Protective Services for Families and Children (PSFC) Program at the Texas Department of Human Services (DHS) is constantly concerned with improving the administration of child protective services (CPS). Ways to improve productivity (enhancement of efficiency in combination with quality of services) are a prime concern of DHS administrators.

Over the past few years, the PSFC program developed statewide program standards and work load measures to assist each DHS administrative region in upgrading its productivity. With the emergence of these statewide measures, tracking individual and regional performance became more manageable. Despite the efforts to improve productivity and to develop work load standards, there is no consensus about the number and difficulty of cases a worker or unit can handle efficiently.

In order to achieve further gains in productivity, DHS's Region 10 proposed the Automated Performance Tracking and Productivity Improvement Project. With computer technology, the project proposed to develop a mechanism or mechanisms to track individual and regional achievement of uniform performance measures. The automated system would compare individual performance with a set of uniform personnel tasks and standards and would identify areas where corrective action is needed.

Project planners anticipated that electronic tracking of individual and regional performance would give PSFC regional directors accurate and current data about staff productivity patterns. These data were expected to enable early implementation of corrective action measures and to give individuals and units concrete expectations about job performance.

This final report describes how the Automated Performance Tracking and Productivity Improvement Project was planned, designed, and implemented in Region 10.

PROJECT OPERATIONS

OBJECTIVES

Region 10 staff believed they must first collect and accurately measure data on productivity and efficiency patterns. To accomplish the tasks of data collection and measurement, five objectives were established for the project:
1. to interface program standards and work load standards with the uniform personnel tasks and standards (Form 4040);

2. to develop electronic tracking mechanisms for as many performance items as possible;

3. to develop and program computer-generated output reports on the quantity of performance at regional, unit, and worker levels;

4. to develop a model of adequate performance based on work load standards and case load mix; and

5. to research and provide a training module that will teach managers how best to use the newly developed performance evaluation process.

START-UP

To enhance the acceptance of the project, the project manager and regional director solicited knowledgeable persons to serve on the project's executive advisory committee. The advisory committee consisted of representatives from DHS headquarters divisions--PSFC; Personnel Division; and the Office of Field Management, which has authority over regional staff--as well as the regional directors of Services for Families and Children from regions 6 and 10.

The project manager regularly met or talked with the advisory committee members, all levels of CPS staff, contract management staff, and contractors to introduce the concepts of productivity improvement and performance tracking through automation. The same groups were used to discuss concepts, programming problems, implementation strategies, and overall project progress.

In the beginning, regional administrators expected reluctance of the worker and supervisory staff to be held accountable for their casework actions and decisions. However, both caseworkers and supervisors cooperated fully and were enthusiastic about the potential benefits of the project. Supervisors were receptive to the idea of receiving management training to show them how to effectively use the newly developed performance evaluation process.

All the supervisors participated in the initially scheduled management training and later requested follow-up training sessions.
NEW PERFORMANCE STANDARDS

Developments in the State Office

In 1983, the PSFC Branch in DHS’s state office completed two sets of standards:

1. program standards and

2. work load standards.

These two sets formed the basis for developing a third set, the new performance standards, known as--

3. the uniform personnel tasks and standards.

The new performance standards (Set 3) had to reflect all the state and federal requirements contained in Set 1 and Set 2.

PSFC decided to expand the original scope of project Objective 4, which called for developing a model of adequate performance. PSFC requested that the project also include a pilot test of a new formula for determining the ideal number and mixture of cases that a CPS specialist can maintain effectively. The formula, which takes into account the type of case—substitute care, investigation, in-home services—and the average amount of time needed to complete the appropriate unit of service, produces an estimate of the ideal case load for each CPS specialist.

Regional Implementation

Program directors (PDs) in the CPS program drafted a set of uniform personnel tasks and standards (Form 4040) to be used for all Region 10 CPS specialists (Appendix A). The draft incorporated statewide program and minimum child placement standards.

The PDs presented the initial draft of the uniform personnel tasks and standards to Region 10 CPS supervisors for their review and comment. The supervisors determined which items on the proposed performance plan would affect program and federal standards then being used to judge the region's level of compliance. Some performance indicators were added by the supervisors, others were deleted. CPS supervisors insisted that indicators of quality be added to the performance evaluation.
The current version of the uniform personnel tasks and standards was submitted to these groups for approval—Region 10 Management Information Analysis Systems Committee, CPS supervisors, program directors, the regional director, and the executive advisory committee.

In the region, formal meetings and informal gatherings were used to make decisions about the project's direction. Also, telephone calls were used to get consensus on project activities. The executive advisory committee met quarterly to review project activities and give guidance to the project director.

ELECTRONIC TRACKING MECHANISMS

Early on, staff and advisory groups decided to keep the project as simple as possible. They decided to limit the number of items the project would track; to use those data elements for which there were existing mechanisms; and to include the data elements that headquarters uses on statewide service control and case reading guides (Appendix B). The format of the guides was modified to make it compatible with data entry procedures. All modifications were cleared with headquarters to ensure that no performance standards were altered.

Quantifiable items are tracked and used to collect two sets of data—compliance percentages for the region and for the CPS specialist. (A chart of the overall system flow appears in Appendix C.)

COMPUTER-GENERATED REPORTS

The computer-generated output reports (an example of which appears in Appendix D) serve the following purposes:

- to show which CPS specialists are or are not meeting performance standards;
- to provide adequate documentation for work load planning by supervisors, program directors (PDs) and regional directors (RDs);
- to assist in the identification of training needs of CPS specialists; and
- to accumulate documentation for determining individual and regional program performance.
The computer-generated output reports will be reviewed by all CPS staff—specialists, supervisors, PUs and RDs.

DEVELOPMENT OF PERFORMANCE MODEL

As mentioned earlier, PSFC expanded the original scope of project Objective 4, which called for developing a model of adequate performance. PSFC requested that the project also pilot test a new formula for determining ideal case load and mixture. This formula required considerable refinement; as a result, the model could not be completed during the first project year. Completion is expected in the first quarter of the second project year.

COMPETENCY-BASED TRAINING MODULE

A training module entitled "Supervisory Effectiveness Training" was purchased from a Texas firm skilled in human resources and organizational development. Some of the topics included in the training were Supervisor Effectiveness; What Does a Supervisor Do?; Supervision Skills; Communication: The Key to Effectiveness; Supervisory "Styles"; Team-Based Problem Solving; and Increasing Productivity.

The major elements of the training stressed self-awareness by supervisors and effective problem solving. Each topic in the model discussed methods supervisors would use to enhance their individual effectiveness as leaders.

The competency-based training focused on both the individual supervisor and Region 10 as a supervisory group. The management style of each participant was assessed by subordinates, peers, and each manager's supervisor. Each participant also performed a self-assessment. The responses to the four questionnaires were entered into a computer and plotted to show a pattern of behavioral skills on a 10-point scale. The behavioral scales were interpreted to the managers in work sessions where each participant was given feedback on his or her managerial strengths and weaknesses. Recommendations for improving management styles were provided, and ways to affect behavioral changes were suggested.

The average score of all participants was determined. Time was spent with the entire group to give actual techniques for improving management skills.

When the participants returned to their regular duties, they divided into groups and held weekly meetings to address their personal management goals and ways to strengthen administrative and managerial
skills. So far, the participants report that morale in Region 10 has improved and that changes have been observed in their interaction with each other and with subordinates. Region 10 will schedule a follow-up assessment for those who attended the original training.

CONCLUSIONS

The Automated Performance Tracking and Productivity Improvement Project was funded to develop an automated system for tracking the performance of CPS specialists and the Region 10 CPS program. The project is currently collecting data on the quantity of casework being done by CPS specialists in the region.

Work load and program standards can form the basis of uniform personnel tasks and standards. The personnel standards will be developed early in the second project year following data collection and analysis. The formula for case load and mixture will be automated during the first quarter of the second project year. Headquarters in Austin is helping project staff to develop standards that will meet federal and state compliance levels. The uniform performance plan has been developed. In January 1985, Region 10 began evaluating CPS specialists by the performance standards developed by project participants.

RELATIVE IMPORTANCE | PERFORMANCE PLAN—List Task Statements, Followed by Performance Standards

ACTUAL ACHIEVEMENTS

2. Testimony presented in a professional manner as judged by supervisor and/or District Attorney. 1 exception allowed per quarter.

2. Situations of child(ren) are accurately evaluated for degree of life-threatening or safety endangering conditions, initially and on an ongoing basis. 1-2 exceptions allowed per year.

3. Investigations and/or visits are conducted at time and in locations appropriate for the individual case situation.

B. Uses interviewing techniques to obtain information needed for serving client needs.

1. Methods of obtaining information are within policy and guidelines and are adapted to the individual situation.

2. Sufficient information is obtained to make timely decisions and case plans. Obtains relevant social history information with 2-4 exceptions allowed per quarter.

3. Efforts are made to obtain information from collateral contacts. 1-3 exceptions allowed per quarter.

4. Sufficient information is obtained to facilitate court proceedings. 1-2 exceptions allowed per quarter.

C. Places and provides services to children in substitute care.

1. Child placement activities are carried out according to policy requirements and standards.
   a. Case movement form completed within 24 hours of initial or subsequent placement with 1-3 exceptions per quarter.
   b. All forms (2200, 213 series, etc.) and intake study completed within 30 days of placement. 1-3 case exceptions allowed per quarter.

SUPERVISOR'S QUALITATIVE RATING SCALE

1. *Unacceptable*

   (1) Work is of poor quality
   (2) Work is of inadequate quality to meet basic performance standards
   (3) Work assignment must be redone or requires the assistance of the supervisor and/or other personnel in order to make it acceptable.
   (4) Continued work of this quality indicates dismissal of the employee.
   (5) Written justification of this rating is required.

2. *Less than adequate*

   (1) Work is marginal in terms of performance standards.
   (2) Some rework required on the part of the worker in order to meet basic standards.
   (3) Excessive supervision needed in order to complete the task.
   (4) Failure to meet time requirements or deadlines.
   (5) Omission or partial omission of material or actions needed to meet compliance standards.
   (6) Remedial action required.

3. *Good*

   (1) Work is adequate; meets expected performance standards.
   (2) Normal or expected amount of supervision needed in order to complete the task.
   (3) Work is complete; task finished in a timely manner; no omissions or partial omission requiring unusual rework or revision.
   (4) Continued work of this quality will meet performance expectations and compliance standards.
   (5) Quality of this work represents what is expected of a worker in this position.
4. Very good

(1) Quality of work is more than adequate and exceeds expected performance standards.
(2) Less than normal or expected amount of supervision is needed to complete the task.
(3) Worker turns out above average amount of work.
(4) Worker's speed and accuracy exceed basic performance standards.
(5) Continued work of this quality indicates special recognition for the contributions of this employee.

5. Exceptional

(1) Quality of work is unusually high; to the degree that it can be considered outstanding, extraordinary, or rare.
(2) Work goes well beyond basic performance standards. Worker needs much less than normal or expected supervision. Work accomplished quickly and efficiently with virtually no errors.
(3) The worker takes initiative, develops new procedures or techniques which may increase productivity of the entire unit or organization. Other workers seek this person out for advice and instruction.
(4) Worker shows exceptionally high degree of interest, willingness, and dedication. Extra effort is typical.
(5) Continued work of this quality indicates this person should be aggressively recruited for promotion to a more responsible position. They show potential for significant long range contributions to the organization.
(6) Written justification for this rating required.

Date of Referral: 07-09-85  

Please check if all standards were answered Y or NA  

I A Priority I Reports  

1. Did the worker, within 24 hours of the referral, attempt to inform the supervisor of the report and obtain the supervisor's approval of the action to be taken/that had been taken?  
   Yes[ ] No[ ]  

2. Did the worker level or above staff begin protective services for the child within 24 hours of the referral?  
   Yes[ ] No[ ]  

3. For Priority I reports other than those made by law enforcement: Did the worker orally notify law enforcement within 24 hours of the report and send a written report within 5 calendar days?  
   Yes[ ] No[ ] N/A[ ]  

II The Investigation  

Did the worker determine:  

A. The nature, extent, and cause of the abuse/neglect?  
   Yes[ ] No[ ]  

B. The identity of the person apparently responsible?  
   Yes[ ] No[ ]  

C. The names, ages, and conditions of the other children in the home?  
   Yes[ ] No[ ] N/A[ ]  

D. The caretaker's ability to protect the child?  
   Yes[ ] No[ ]  

E. The adequacy of the home environment?  
   Yes[ ] No[ ]  

F. The relationship of the child to the caretakers?  
   Yes[ ] No[ ]  

G. If any action by DHR is needed to protect the child?  
   Yes[ ] No[ ]  

III Did the supervisor approve the worker's actions and findings at the completion of the intake process?  
   Yes[ ] No[ ]  

IV. Results explained to:  

A. The parents/caretakers  
   Yes[ ] No[ ]  

E. Children who were interviewed

F. The relationship of the child to the caretakers? Yes [ ] No [ ]

G. If any action by DHR is needed to protect the child? Yes [ ] No [ ]

III. Did the supervisor approve the worker’s actions and findings at the completion of the intake process? Yes [ ] No [ ]

IV. Results explained to:

A. The parents/caretakers Yes [ ] No [ ]

B. Children who were interviewed Yes [ ] No [ ] N/A [ ]

C. The identified complainant Yes [ ] No [ ]

[ ] Rate the overall quality of the casework on this case using the quality rating scale. A rating of 1 or 5 requires written justification below:

Supervisor's Signature Date Reviewed

Please submit to MIS within 3 days of review.
Date the decision was made to provide on-going services was 08-07-85

7A Date original Family Service Plan completed ____________

1 Was the original service plan completed within 45 days of the above date? Yes[ ] No[ ]

2 Is there a parent's signature indicating that the service plan was jointly developed or an explanation that the parents refused to cooperate? Yes[ ] No[ ]

3 Is there an indicator that a copy of the service plan was given/sent to the parent/caretaker? Yes[ ] No[ ]

4 Does the service plan identify the family's problems and the effects on family and child? Yes[ ] No[ ]

5 Does the service plan identify solutions to the problems and objectives for the family? Yes[ ] No[ ]

B If a review of the service plan was due during the case-reading period, answer the following (if not go to standard 8). Date review was due of the Original Plan: 3-86

Date Reviewed: ____________

1 Was it reviewed with the family every 6 months? Yes[ ] No[ ]

2 Was each review approved and signed by supervisor? Yes[ ] No[ ]

8 Monthly Contacts

Did the worker have face-to-face contact with the family and child once a month unless otherwise specified in the service plan? Yes[ ] No[ ]

[ ] Rate the overall quality of the casework on this case using the quality rating scale. A rating of 1 or 5 requires written justification below

Remarks:
NOTE: ITEMS 10-14 ARE RESPONSIBILITY OF UNIT WHICH REMOVES CHILD

10. Was prior or concurrent approval obtained from a supervisor or above before the child was removed? 
   Yes[ ] No[ ]

11. Was a permanent plan for the child established before 02/15/85? Date of permanency plan_________________.
   Yes[ ] No[ ] NA[ ]

CASE PLAN

12. Is there a written family case plan? Date of plan_________________.
   Yes[ ] No[ ] NA[ ]

12a. completed within 30 days of placement (check NA if case was opened prior to 10/81) 
   Yes[ ] No[ ]

12b. identifies the family's problems which caused removal of child
   Yes[ ] No[ ]

12c. a description of efforts made to obtain services before removal of child and any services provided to prevent substitute care placement
   Yes[ ] No[ ]

12d. identifies changes that must take place before DHR recommends conservatorship
   Yes[ ] No[ ]

12e. identifies services to accomplish the change
   Yes[ ] No[ ]

12f. identifies the role of the worker, other service providers and parents in achieving changes
   Yes[ ] No[ ]

12g. a proposed time limit for achieving the change
   Yes[ ] No[ ]

12h. a plan for the parents to visit, telephone, or write to the child
   Yes[ ] No[ ]

12i. family's plan for financial support
   Yes[ ] No[ ]

12j. special conditions or stipulations of the court order
   Yes[ ] No[ ]

12k. consequences if the change is not achieved
   Yes[ ] No[ ]

12l. signed by parents
   Yes[ ] No[ ]

13. Was the family service plan reviewed every 6 months? Parents must be involved in the review unless parents rights terminated. 
   Yes[ ] No[ ]

14. Was the child's case plan designed to achieve placement:
   a. in the least restrictive setting
      Yes[ ] No[ ]

   b. in close proximity to the parent's home
      Yes[ ] No[ ]
15. **Periodic Reviews**

C. Was a periodic review held before 03/16/85?
   - Yes [ ] No [ ] NA [ ]
   - When?

D. Was the next periodic review held within 6 months plus 30 days of the previous periodic review (before 00/00/00)?
   - Yes [ ] No [ ] NA [ ]
   - When?

E. Was periodic review a court review?
   - Yes [ ] No [ ] NA [ ]

16. Was an administrative review held?
   - Yes [ ] No [ ] NA [ ]
   - When?
   - If yes, read for following items:

16a. description of child's placement and its appropriateness
   - Yes [ ] No [ ]

16b. continued need for the child's placement.
   - Yes [ ] No [ ]

16c. extent of compliance with service plan.
   - Yes [ ] No [ ]

16d. progress towards correcting the problems causing removal.
   - Yes [ ] No [ ]

16e. DHR plan for compliance with court orders.
   - Yes [ ] No [ ]

16f. projected date that permanency plans will be accomplished.
   - Yes [ ] No [ ]

17. Were parents notified that an administrative review is to be held?
   - Yes [ ] No [ ]

18. **Dispositional Hearings**

Is the child in an adoptive placement, a court specified permanent foster home, or a relative placement?
- Yes [ ] No [ ]
- If yes, go to #19

F. Was a dispositional hearing held before 04/16/86?
   - Yes [ ] No [ ] NA [ ]
   - When?

G. Was the next dispositional hearing held 6 months plus 30 days from last hearing date (before 00/00/00)?
   - Yes [ ] No [ ] NA [ ]
   - When?

19. Were changes affecting eligibility reported within 5 days of the change?
   - Yes [ ] No [ ] NA [ ]
