This document contains validated activities and competencies needed by information professionals working in a library system supplier organization. The activities and competencies are organized according to the functions which information professionals working in such organizations perform: research and development; marketing; customer support; and organization/management support. Within each function, competencies are grouped under the categories of Knowledge, Skills, and Attitudes, and three professional levels are dealt with: entry level (0-3 years experience), mid-level (4-9 years experience), and senior level (10 or more years experience). (THC)

INTRODUCTION

This document contains validated activities and competencies needed by information professionals working in a library system supplier organization. The following operational definition of competency was developed:

A competency is a generic knowledge, skill or attitude of a person that is causally related to effective behavior as demonstrated through external performance criteria, where:

- **Knowledge** is having information about, knowing, understanding, being acquainted with, being aware of, having experience of, or being familiar with something, someone, or how to do something.

- **Skill** is the ability to use one's knowledge effectively.

- **Attitude** is a mental or emotional approach to something, or someone.

We have identified several types of knowledge that are necessary to perform information work satisfactorily as follows:

- **Basic knowledge** in such areas as language, communication, arithmetic operations, etc.

- **Subject knowledge** of primary subject fields of users served such as medicine, chemistry, law, etc.

- **Library and information work environments** such as the information community, its participants and their social, economic and technical interrelationships, etc.

- **Knowledge of what work is done** such as the activities required to provide services and produce products, etc.

- **Knowledge of the organization or user community served** such as the mission, goals, and objectives of the user or the organization, user's information needs and requirements, etc.
There appear to be three kinds of skills necessary to perform information work satisfactorily including:

- **Basic skills** such as cognitive, communication, analytical, etc.

- **Skills related to each specific activity** being performed such as negotiation of reference questions, evaluation of search outputs, etc.

- **Other skills** such as managing time effectively, budgeting and making projections, etc.

Attitudes of information professionals are found to be extremely important to work performance. We have found it useful to subdivide attitudes into:

- **Dispositional attitudes** toward one's profession, the organization served, one's work organization, and other people such as users and co-workers.

- **Personality traits/qualities** such as confidence, inquisitiveness, sense of ethics, flexibility, etc.

- **Attitudes related to job/work/organization** such as willingness to accept responsibility, willingness to learn, desire to grow, etc.

The activities and competencies are organized according to the functions which information professionals perform, and by professional level as displayed in Figure 1. The competencies are cumulative across professional level, i.e., competencies of mid-level professionals include entries shown at the mid-level as well as those at the entry level, etc.

It is important to understand the distinction between functions performed and positions or job titles. Our rationale behind the functional approach was that we were more concerned with what information professionals do than with what they are called. In a single-person library, therefore, the information professional will undoubtedly perform more than a single function. In using and interpreting the competency data in this document, it is important to consider the functions being performed by

**Figure 1** Organization of Activities and Competencies
professionals and the activities being performed to determine which competencies are appropriate. The functions identified for information professionals working in library system supplier organizations are:

- research and development
- marketing
- customer support
- organization/management support.

Three professional levels were defined as follows:

- entry level (up to 3 years of professional experience)
- mid level (4-9 years of professional experience)
- senior level (10 or more years of professional experience).

The activities performed are listed first and numbered sequentially. The actual assignment of individual activities to subcategories of the major activities and to the functions varies from one worksetting to another. The organization of activities that we developed provided us with the "best fit" case. Indented and unnumbered activities are essentially paraprofessional activities which, in small organizations, may be performed by professionals.
LIBRARY SYSTEMS SUPPLIER PROFESSIONAL COMPETENCIES

RESEARCH AND DEVELOPMENT
ACTIVITIES

R&D Team Activities

1. Attend and participate in R&D team meetings

2. Work as part of the team to identify the specific data to be assembled and analyzed to develop systems, system modules and/or system modifications/enhancements to support automation of library activities

3. Work with mid level staff in preparing detailed plans for the assigned R&D activities; revise plans as required, following review of the R&D team leader

4. Assist/work with consultants, as assigned

5. During the systems analysis and development phase, make recommendations to the team leader regarding plans and activities, as appropriate

6. Notify the team leader of any problems encountered in working on an R&D project

7. Keep a detailed record of costs incurred and time spent on each R&D project

8. Draft portions of monthly project status reports, as assigned

Systems Analysis and Development

9. Perform systems analyses of assigned library activities based on personal knowledge of these activities and on input from consultants and/or practicing librarians

10. Flowchart and document the preliminary analysis of the assigned library activities, including identification of system requirements and functional specifications

11. Assist mid level staff in preparing draft design specifications for the proposed system

12. Assist mid level staff in preparing draft record formats for various files in the proposed system

13. Assist mid level staff in preparing draft specifications for system outputs
ACTIVITIES

SYSTEMS ANALYSIS AND DEVELOPMENT (CONT'D)

14. Following review of the systems analysis and preliminary design by the R&D team leader, selected consultants and other senior staff of the organization, assist mid level staff in preparing the detailed system specifications.

15. Assist mid level staff in working with in-house/contract programmers who will write the programs to build the prototype system, modify the prototype system and later enhance the marketed system.

16. Assist mid level staff in testing the prototype system and any future system modifications/enhancements.

17. Assist mid level staff in providing assistance to and obtaining feedback from librarians at selected test sites.

18. Assist mid level staff in preparing specifications for modifications to the prototype system and/or for enhancements to the marketed system.

19. Assist mid level staff in preparing detailed design specifications for customized versions of the system for specified clients.

20. Participate in briefing management and appropriate organizational staff of the new/modified system/system modules and on enhancements to the system/system modules.

21. Participate in training marketing and customer support staff in the operation of the new/modified/enhanced system/system modules.

22. Assist mid level staff in reviewing documentation for system users as prepared by customer support staff.

23. Suggest ways in which new technologies may be integrated with the system/system modules.

R&D TEAM ACTIVITIES

24. Conduct meetings of sub-groups of the R&D team.

25. Develop and revise, as required, detailed R&D plans.
R&D Team Activities (cont'd)

26. Develop a detailed schedule for each R&D project

27. Following review and approval/modification of the schedule by the R&D team leader, track the progress of systems research and development activities and notify the team leader of any actual or potential delays

28. Arrange for and coordinate the R&D related activities of contractors and other organizational units which provide support services (system and application programmers, hardware suppliers, telecommunications experts, network consultants, library consultants, etc.)

29. Review and verify supplier billing/charging information

30. Compile monthly costs incurred for development work on each R&D project and compare with the budgeted costs; prepare draft monthly reports of expenditures of resources

31. Supervise the production of and edit all documentation developed in support of each R&D project

32. Function as assistant to the R&D team leader on large-scale, complex projects; resolve minor problems and refer major problems to the team leader

33. Function as team leader for smaller, less complex R&D projects

Systems Analysis and Development

34. Review the systems analyses and documentation of assigned library activities as prepared by entry level staff

35. Contact consultants and/or practicing librarians to resolve any questions raised by review of the systems analyses and identification of system requirements and functional specifications

36. Coordinate and participate in the preparation of draft system design specifications, draft record formats, and draft specifications for system outputs

37. Coordinate and participate in the preparation of detailed system specifications, following review of the system analyses and preliminary designs by the R&D team leader, selected consultants and other senior staff of the organization
RESEARCH AND DEVELOPMENT  MID LEVEL

38. Develop procedures for and coordinate all system testing

39. Coordinate and participate in preparing specifications for system modifications/refinements, enhancements and customizations

40. Work with the R&D team leader to outline requirements for briefing management and appropriate organizational staff on the new/modified/enhanced system/system modules

41. Coordinate and participate in training marketing and customer support staff in the operation of the new/modified/enhanced system/system modules

RESEARCH AND DEVELOPMENT  SENIOR LEVEL

42. Function as R&D team leader for specific R&D development projects

43. Keep abreast of industry-wide standards for online databases

44. Anticipate long-range automation needs of libraries in developing and configuring systems

45. Identify the basic data and processes required to properly examine each library activity selected for potential automation

46. Manage the in-house coordination of all activities related to analysis and development of automated systems for libraries

47. Manage the coordination of all external support required for analysis and development of automated systems for libraries

48. Review and approve/modify the detailed R&D plans and schedule as developed by junior staff

49. Conduct R&D team meetings and maintain effective communication with the team and its individual members

50. Organize the R&D team by developing lines of authority, responsibility and accountability
ACTIVITIES

RESEARCH AND DEVELOPMENT

51. Review with the R&D team the goals, objectives, policies and procedures related to each R&D project

52. Lead, motivate and supervise the R&D team

53. Anticipate, minimize and manage conflict which may arise among team members

54. Act as a decision-maker and problem-solver among team members, as required

55. Assign specific tasks to consultants supporting R&D projects

56. Plan and conduct meetings of systems analysis and development advisory groups

57. Assimilate information obtained from advisors and from the team in order to further direct R&D efforts

58. Monitor and measure the progress of R&D projects by reviewing staff reports on the schedule, costs and resources

59. Evaluate the performance of team members in completing their respective assignments

60. Identify problems/discrepancies in analysis and development of systems for libraries; take corrective action

61. Assess the value of alternative system designs, configurations and refinements; perform cost-benefit analyses to evaluate the alternatives

62. Determine system development priorities; identify the system modules and features which will be implemented first to meet the most important requirements in the marketplace

63. Ensure that system developments are compatible with other library tools and services (e.g., OCLC)

64. Review and approve/modify all aspects of the new/refined/enhanced system before it is reviewed by management and other staff of the organization

65. Coordinate and manage any required modifications to the system prior to releasing it for sale

66. Obtain copyright for the software
### ACTIVITIES

<table>
<thead>
<tr>
<th>RESEARCH AND DEVELOPMENT</th>
<th>SENIOR LEVEL</th>
</tr>
</thead>
</table>

67. Work with management and marketing staff to price the system

68. Assist marketing staff, as required, in configuring the system in response to specific bid solicitations

69. Obtain feedback from marketing and customer support staff on ways in which clients and staff recommend that the system could be refined/enhanced

70. Encourage brainstorming by R&D staff and others to identify additional products/enhancements which may be generated from R&D project-related activities
KNOWLEDGE

RESEARCH AND DEVELOPMENT

ENTRY LEVEL

Basic knowledge

knowledge related to literacy, numeracy, communications, etc.

Subject knowledge

knowledge of the primary subject field of clients served (i.e., librarianship)
knowledge in greater depth in specific subjects (e.g., systems analysis and design, computer programming, accounting, etc.)
knowledge of foreign languages

Information Science Knowledge (Generic)

knowledge of definition, structure, and formats of information
knowledge of alternative approaches to the organization of information
knowledge of alternative approaches to retrieval of information
knowledge of alternative approaches to information management
knowledge of available and emerging information technologies and their applications
knowledge of completed and ongoing research in the field and its applicability to practice
knowledge of career opportunities

Knowledge about information work environments

knowledge of the expanding information community, its participants and their interrelationships (social, economic, technical, etc.)
knowledge of the variety of work settings and their organizational structures
knowledge of the functions performed within the various work settings and the services and products offered
knowledge of the users of the services and products, their characteristics and information habits
knowledge of the functions related to research, and development of automated library systems, the range of services and products offered (both actual and potential)
knowledge of the goals and objectives of each project
knowledge of librarians' automation needs and requirements
knowledge of the activities that are required to support research and development, offer the services and produce the products
knowledge of the various resources that are necessary to support the activities
knowledge of systems research, analysis and design tools
knowledge of systems research, analysis and design methods and techniques
knowledge of various computer and telecommunications technologies, database and retrieval system structures, and basic programming vocabularies
knowledge of project management tools
knowledge of project management methods and techniques
knowledge of job responsibilities
knowledge of performance expected and how it can be measured

Knowledge of how to do work

knowledge of how to perform the various activities
knowledge of how to use the systems research, analysis and design tools
knowledge of how to apply the systems research, analysis and design methods and techniques
knowledge of how to apply the project management tools
knowledge of how to apply the project management methods and techniques
knowledge of public relations techniques

Knowledge of the organization and specific work unit

knowledge of the mission, goals and objectives of the organization
knowledge of the structure of the organization and the role of the section within the organization
knowledge of the various projects and key personnel within the organization
knowledge of the policies and procedures relevant to the section operations
knowledge of the various resources available within the organization (e.g. personnel, equipment, etc.)
knowledge of the systems-related information needs of other sections within the organization
KNOWLEDGE

RESEARCH AND DEVELOPMENT

MID LEVEL

greater depths of knowledge specified above
knowledge of the operations of other sections in the organization and how they relate to research and development
knowledge of available vendor-supplied systems, services and products to support research and development and project management
knowledge of the contracting process, both in general and within the organization
knowledge of evaluation methods and techniques to evaluate systems, services and products

RESEARCH AND DEVELOPMENT

SENIOR LEVEL

greater depths of knowledge specified above
knowledge of the costs associated with resources (materials, personnel, space, etc.)
knowledge of cost analysis and interpretation methods
knowledge of pricing methods
knowledge of the value assessment methods
knowledge of methods of resource allocation
state-of-the-art knowledge of research and practice in techniques for research and development of automated systems
state-of-the-art knowledge of research and practice in project management techniques
SKILLS

Basic Skills

literacy, numeracy, cognitive, analytical, communications, etc.

Skills Related to Specific Activities

Ability to:

- perform each activity
- use computer and telecommunication equipment/systems with ease
- perceive the potential application of new technologies to library activities
- discern the real situation facing librarians and technicians in the performance of various library activities
- use a logical approach to problem analysis and problem solving
- establish rapport with colleagues and interviewees
- communicate well by written, verbal and non-verbal means
- conduct an interview in person or by phone
- elicit required data
- listen carefully
- think and argue logically
- use systems analysis techniques for collecting, analyzing and interpreting data
- discern questionable data and verify or reject them
- make decisions and recommendations based on available information
- work independently and in groups
- develop criteria for evaluation
- make effective, timely, and well-informed decisions
- isolate and define problems and develop the necessary criteria and action for their solution
- manage time effectively
- work under pressure of strict deadlines
- endure the stress of irregular work hours during rush periods
- stay organized while working on several projects at the same time
- extract data and/or techniques which are not environment-specific to one project and use the data and/or techniques to support related projects
- supervise staff
- train organizational staff
SKILLS

RESEARCH AND DEVELOPMENT

MID LEVEL

Skills Related to Each Specific Activity

Skills listed above are developed to a greater extent

- identify and define gaps in data
- resolve conflicting data
- develop criteria to evaluate competing systems designs
- communicate with programming staff and other support/contract staff on a technical level
- arbitrate and negotiate with contractors
- conduct meetings with individuals and groups

RESEARCH AND DEVELOPMENT

SENIOR LEVEL

Skills listed above are developed to a greater extent

- develop realistic research and development project plans and cost estimates for each system module
- identify the basic data and analyses required to properly examine each library activity to be analyzed
- assemble appropriate staff and consultants for each R&D team
- anticipate long-range needs of the organization and the effect of these needs on each R&D team and other organizational resources
- plan and schedule activities effectively
- lead and motivate the individual members of each R&D team
- design systems and procedures to improve operations of each R&D team, of the organization, and for actual and potential clients
- use feedback to suggest modifications to system modules
- apply methods of measurement and evaluation
- budget and make projections
- optimize the use of organizational and project team resources
- anticipate long-range automation needs of libraries
- make recommendations to clients with confidence
- present salient features of R&D reports to organizational staff who may or may not be technically knowledgeable
- justify recommendations, methodologies, etc.
ATTITUDES

RESEARCH AND DEVELOPMENT

Dispositional Attitudes

Attributes Toward Institutions

Respect for profession
Respect for the section
Respect for the parent organization

Attributes Toward Other People

Toward Users

Respect users
Like people in general
Like to help people
Like to meet people
Like to make others feel comfortable
Sensitive to others' needs

Toward Others in the Workplace

Respect co-workers
Like to work with others/as a team
Like to work on own
Willingness to draw upon and share knowledge and experience with others
Supportive of co-workers
Enjoy managing/supervising others

Personal Qualities

Alertness
Assertiveness
Compassion/Kindness
Confidence
Cheerfulness
Dependability
Determination/Tenacity
Diplomacy
Emotional stability
Fairness
Flexibility/Versatility
Imagination
Inquisitiveness
Leadership ability
ATTITUDES

PERSONAL QUALITIES (cont'd)

- Neatness
- Need for achievement
- Objectivity
- Open-mindedness
- Optimism/Positive attitude
- Organization
- Patience
- Physical endurance
- Resourceful
- Sensitive/Thoughtful
- Sense of humor
- Sense of ethics
- Tolerance

ATTITUDES RELATED TO JOB/WORK/Organization

Individual should demonstrate:

- Willingness to take/accept responsibility
- Willingness to take initiative
- Willingness to respond to authority, apply and follow policy
- Realization that there is no single "right" way to achieve the goals of the section/organization
- Desire to learn/try
- Willingness to fail
- Willingness to ask questions
- Desire to work to best of ability
- Responsiveness to time constraints
- Accuracy
- Willingness to get hands dirty
- Attention to detail
- Willingness to do clerical tasks
- Desire to follow-through
- Service orientation
- Organizational identity
- Willingness to promote parent organization and its services
- View of parent organization as part of a larger information environment
- Ability to see broad picture
- Ability to sacrifice short-term gains for long-term goals
- Political sense
- Curiosity
- Variety of interests
- Desire to grow personally
- Desire to grow professionally
- Desire to remain current in specific and general subject field
- Positive attitude toward job
LIBRARY SYSTEMS SUPPLIER PROFESSIONAL COMPETENCIES

MARKETING
1. Attend and participate in brainstorming sessions to identify potential marketing strategies and ideas.

2. Assist mid level staff in preparing draft copy for brochures to advertise the products, services, and publications provided/produced by the organization.

3. Identify professional organizations whose membership lists should be obtained for marketing purposes.

4. Contact designated sources to obtain information on the requirements for acquiring copies of their mailing lists for marketing purposes.

5. Coordinate mailing marketing literature to potential clients.

6. Assist mid level staff in preparing draft copy for press releases on the organization's products, activities, personnel and publications.

7. Coordinate mailing press releases to the news editors of designated journals, newsletters, etc.

8. Assist mid level staff in developing the standard "boiler plate" sections of proposals/bid specifications which detail corporate experience, product development, services, resources, facilities, etc.

9. Recommend topics for inclusion in the organization's newsletter.

10. Prepare preliminary copy for the organization's newsletter as assigned by mid level staff.

12. Assist mid level staff in preparing draft copy for paid advertisements.

13. Proofread galleys of marketing documents as assigned.

14. Prepare a list of products and publications produced by the organization for inclusion in marketing literature and for distribution at exhibits.

15. Assist mid level staff in developing a plan for the organization's exhibit at professional meetings and conferences.

16. Staff the organization's exhibit during assigned time periods.
17. Answer exhibit viewers' questions about the products and the services of the organization; refer appropriate questions to higher level staff for response

18. Attend local, national, and international professional meetings and conferences to maintain the visibility of the organization, to discover areas of interest to potential clients, to maintain professional contacts, and to gain up-to-date information on developments, technologies, systems, services, experts, consultants, competitors, etc. in the information field

19. Participate in committee work for professional organizations in the information field

20. Contact potential clients to arrange meetings/system demonstrations

21. Attend and participate in meetings with potential clients, as indicated by senior staff, to sell them the features and benefits of the system

22. Contact actual and potential clients to obtain feedback on their responses to the organization's and/or competitors' products/services

23. Update account files (call reports, sales call reports, correspondence, etc.) as appropriate/as directed

24. Prepare weekly expense reports and sales forecasts

25. Attend and participate in seminars, workshops, presentations, etc. which describe the organization and its products/services

26. Keep abreast of activities of competing companies and of the market conditions for automated library systems; prepare summary reports for in-house distribution

27. Participate in preparing proposal/bid specifications by drafting the cost sheet for the system as configured by senior staff

28. Informally educate other organizational staff about libraries, how they do business and what their needs are

29. Prepare a detailed outline of information to be presented in paid advertisements, brochures, exhibits, etc. to advertise the products, services, and publications provided/produced by the organization

30. Prepare draft copy for advertisements, brochures, exhibits, etc.; review and approve/modify any copy prepared by entry level staff
31. Present the draft copy with preliminary ideas for artwork to senior staff for review.

32. Arrange for and coordinate the support activities of photographers, graphic designers/artists and other media production staff/contractors in planning the layout and illustrations for paid advertisements, and brochures, and/or media productions for exhibits, etc.

33. Arrange for the purchase of advertising space in appropriate journals, etc.

34. Coordinate and participate in the writing and layout of the organization's newsletter at specified intervals.

35. Coordinate the proofreading of the galleys by staff.

36. Present the galleys to senior staff for review.

37. Arrange for and coordinate the printing of marketing materials.

38. Coordinate and participate in drafting press releases on the organization's products, activities, personnel and publications.

39. Prepare a draft listing of news editors who should receive the organization's press releases.

40. Work with librarians to help them find the best solution to their automation needs for the funds available; suggest lease/purchase arrangements and/or implementation in stages, if necessary.

41. Assist librarians in preparing their system requirements prior to soliciting bids.

42. Coordinate and participate in the writing of the standard "boiler plate" sections of proposals which detail corporate experience, resources, facilities, etc.

43. Work with senior staff to prepare the appropriate text and pricing for proposals/bid specifications within specified deadlines.

44. Work with senior staff to respond in writing to questions about the proposals/bid specifications.

45. Together with customer support staff, work out terms and conditions of contracts between various libraries and the organization.

46. Plan and make arrangements for display of the organization's exhibit at appropriate professional meetings and conferences.

KNOWLEDGE

MARKETING

ENTRY LEVEL

Basic knowledge

knowledge related to literacy, numeracy, communications, etc.

Subject knowledge

knowledge of the primary subject field of clients served (i.e., librarianship)
knowledge in greater depth in specific subjects (e.g., marketing, business administration, etc.)
knowledge of foreign languages

Information Science Knowledges (Generic)

knowledge of definition, structure, and formats of information
knowledge of alternative approaches to the organization of information
knowledge of alternative approaches to retrieval of information
knowledge of alternative approaches to information management
knowledge of available and emerging information technologies and their applications
knowledge of completed and ongoing research in the field and its applicability to practice
knowledge of career opportunities
knowledge of how to learn on an ongoing basis

Knowledge about information work environments

knowledge of the expanding information community, its participants and their interrelationships (social, economic, technical, etc.)
knowledge of the variety of work settings and their organizational structures
knowledge of the functions performed within the various work settings and the services and products offered
knowledge of the users of the services and products, their characteristics and information habits
knowledge of the requirements and demands of the marketplace for the services and products provided by the organization and similar organizations
knowledge of the benefits experienced by clients who have used the services/products produced by the organizations
knowledge of the benefits experienced by users of the services/products of competing organizations
knowledge of the satisfaction levels experienced by users of the organization's services/products
knowledge of satisfaction levels experienced by users of the services/products of competing organizations
KNOWLEDGE

MARKETING

ENTRY LEVEL

Knowledge of what work is done

- Knowledge of the marketing functions, the range of services and products offered (both actual and potential)
- Knowledge of the activities that are required to offer the services and produce the products
- Knowledge of the various resources that are necessary to support the activities
- Knowledge of marketing tools
- Knowledge of marketing methods and techniques, including selling methods and techniques
- Knowledge of public relations methods and techniques
- Knowledge of business methods and techniques
- Knowledge of basic costing methods and techniques
- Knowledge of job responsibilities
- Knowledge of performance expected and how it can be measured

Knowledge of how to do work

- Knowledge of how to perform the various activities
- Knowledge of how to use the marketing tools
- Knowledge of how to apply the marketing methods and techniques
- Knowledge of how to use basic costing methods and techniques to develop bid specifications

Knowledge of the organization and specific work unit

- Knowledge of the mission, goals and objectives of the organization
- Knowledge of the structure of the organization and the role of the section within the organization
- Knowledge of the various projects and key personnel within the organization
- Knowledge of the policies and procedures relevant to section operations
- Knowledge of the various resources available within the organization (e.g. personnel, equipment, etc.)
- Knowledge of specific and generic services and products produced by the organization
greater depths of knowledge specified above
knowledge of the operations of other sections in the organization and how they relate to marketing
knowledge of available vendor-supplied systems, services and products to support marketing
knowledge methods and techniques for preparation of bid specifications
knowledge of the appropriate media sources and services to utilize to support the organization's marketing program
knowledge of the contracting process, both in general and within the organization
knowledge of evaluation methods and techniques to evaluate systems, services and products

MARKETING

greater depths of knowledge specified above
knowledge of statistical description, analysis, interpretation and presentation
knowledge of the costs associated with resources (materials, personnel, space, etc.)
knowledge of cost analysis and interpretation methods
knowledge of methods of resource allocation
state-of-the-art knowledge of research and practice in marketing techniques
SKILLS

MARKETING

ENTRY LEVEL

Basic Skills

literacy, numeracy, cognitive, analytical, communications, etc.

Skills Related to Specific Activities

Ability to:

perform each activity
use/interface with users of microcomputer, computer, telecommunications
and other new equipment/technologies
perceive the service/product needs of potential clients with regard to
the services and products offered by the organization
establish rapport with colleagues, clients (actual and potential), and
appropriate media personnel
communicate well by written, verbal and non-verbal means
sell the organization and its products/services
demonstrate business sense
listen carefully
think and argue logically
think quickly in response to questions
project a winning attitude

collect, analyze and interpret data
make decisions and recommendations based on available information
work independently and in groups
develop criteria for evaluation of services/products
make effective, timely, and well-informed decisions
elicit feedback from actual and potential clients on their responses to
the organization's and competitors' services/products
isolate and define problems and develop the necessary criteria and
action for their solution
identify alternative solutions
manage time effectively
work under pressure of strict deadlines
stay organized while working on several projects at the same time
endure the stress of traveling and irregular work hours, when necessary
educate other sections in the organization about libraries
supervise staff
SKILLS

MARKETING

Skills Related to Each Specific Activity

Skills listed above are developed to a greater extent

Ability to:

communicate with research and development staff and media production staff/contractors on a technical level
arbitrate and negotiate with contractors and with new/potential clients' representatives
conduct meetings with individuals and groups

MARKETING

Skills listed above are developed to a greater extent

Ability to:

develop marketing plans and strategies that produce an increase in business for the organization
anticipate future needs in the marketplace
elicit creative ideas from marketing staff
anticipate long-range needs of the section and of the organization
design systems and procedures to improve operations of the section and of the organization
apply methods of measurement and evaluation
budget and make projections
optimize the use of organizational and section resources

MID LEVEL

SENIOR LEVEL
Dispositional Attitudes

Attitudes Toward Institutions
- Respect for profession
- Respect for the section
- Respect for the parent organization

Attitudes Toward Other People

Toward Users
- Respect users
- Like people in general
- Like to help people
- Like to meet people
- Like to make others feel comfortable
- Sensitive to others' needs

Toward Others in the Workplace
- Respect co-workers
- Like to work with others/as a team
- Like to work on own
- Willingness to draw upon and share knowledge and experience with others
- Supportive of co-workers
- Enjoy managing/supervising others

Personal Qualities
- Alertness
- Assertiveness
- Compassion/Kindness
- Confidence
- Cheerfulness

Sense of ethics
Tolerance

Attitudes Related to Job/Work/Organization

Individual should demonstrate:

- Willingness to take/accept responsibility
- Willingness to take initiative
- Willingness to respond to authority, apply and follow policy
- Realization that there is no single "right" way to achieve the goals of the section/organization
- Desire to learn/try
- Willingness to fail
- Willingness to ask questions
- Desire to work to best of ability
- Responsiveness to time constraints
- Accuracy
- Willingness to get hands dirty
- Attention to detail
- Willingness to do clerical tasks
- Desire to follow-through
- Service orientation
- Organizational identity
- Willingness to promote parent organization and its services
- View of parent organization as part of a larger information environment
- Ability to see broad picture
- Ability to sacrifice short-term gains for long-term goals
- Political sense
- Curiosity
- Variety of interests
- Desire to grow personally
- Desire to grow professionally
- Desire to remain current in specific and general subject field
- Positive attitude toward job
LIBRARY SYSTEMS SUPPLIER PROFESSIONAL COMPETENCIES

CUSTOMER SUPPORT
ACTIVITIES

CUSTOMER SUPPORT

1. Assist senior staff with procedures, documentation and communication to support the implementation of regular and special training classes, refresher workshops and system demonstrations.

2. Train system users in the basics of computer retrieval, equipment operation, network protocol, system protocol, search language and strategies, query formulation, data entry and maintenance, report generation, system maintenance, etc.

3. Answer customer service phones and provide users with technical advice and assistance; if an immediate response cannot be given, consult experts and/or investigate the problem and provide a prompt reply to the system user.

4. Respond promptly to system users' questions/comments entered in an online comments/electronic file or received as correspondence.

5. Enter news for system users in online news files, if applicable.

6. Assist mid level staff in developing and testing practice files and computer-aided instruction packages for use as training aids.

7. Assist mid level staff in developing online "Help" data.

8. Suggest ways in which the system may be made more user-friendly.

9. Assist in setting up and conducting regular system users' meetings in order to obtain feedback from clients, provide them with the latest information about the system/system modules and to answer their questions.

10. Assist mid level staff in preparing and shipping all materials in order to obtain feedback from clients, provide them with the latest information about the system/system modules and to answer their questions.

11. Participate in cross-education of staff by filling out and distributing staff alert forms describing new information discovered about the system, specific types of equipment, telecommunication systems, system interfaces, etc.

12. Prepare articles for inclusion in the regularly-distributed newsletter for system users.

13. Assist mid level staff in investigating users' complaints about the system; draft replies for review and signing by senior staff.
ACTIVITIES

CUSTOMER SUPPORT

14. Participate as a team member in staffing exhibits and demonstrating the system at professional meetings and conferences.

15. Keep abreast of developments in the information field and online retrieval, automated library systems, telecommunication networks, library/information networks and microcomputers.

CUSTOMER SUPPORT

16. Function as editor and chief writer of all manuals for system users and other technical documentation describing the organization's automated library systems and customer support services (system pocket guides, newsletter for system users, etc.).

17. Work with appropriate organization staff/contractors to arrange for printing of all system documentation and related customer support materials.

18. Develop and conduct training classes and system update workshops for system users.

19. Work with R&D staff and section staff to develop and test practice files and computer-aided instruction packages for use as training aids.

20. Make all arrangements for setting up the regular system users' meetings.

21. Work with senior staff to develop the program content for each users' meeting.

22. Coordinate the investigation of and response to users' complaints about the system; edit draft replies prepared by entry level staff for review and signing by senior staff.

23. Coordinate the preparation and shipping of materials/equipment to support system installation, training and implementation activities at each client's site.

24. Arrange for technical personnel to install and test the system and network interfaces at each client's site.

25. Coordinate all training of clients at their sites in the use, operation and maintenance of the system.
ACTIVITIES

CUSTOMER SUPPORT

26. Coordinate all activities related to supplying users with updated versions of the system and related system documentation

27. Work with R&D staff on the technical details of defining system refinements, enhancements and new modules, as required

28. Function as official representative of the organization at each client's site when senior staff of the organization are not coordinating system installation, training and implementation activities

CUSTOMER SUPPORT

29. Function as manager of and technical expert in all activities related to system installation, training, implementation and customer support

30. Identify the objectives and develop the general plans and schedule of activities for system installation and implementation at clients' sites

31. Develop customer programs and strategies that produce satisfied clients

32. Develop the program for the regular users' meeting with the assistance of junior staff; make specific assignments for staff participation

33. Represent the organization as an official spokesperson at users' meetings, professional meetings, conferences and system demonstrations/exhibits

34. Develop the objectives and general outline for training activities

35. Monitor and evaluate all training activities and system demonstrations by direct observation and by review of participants' written evaluations

36. Advise section staff of ways in which they may improve training sessions, documents, exercises and special online training packages

37. Elicit feedback from new clients after the system is operational

38. Contact appropriate in-house staff, equipment suppliers, telecommunication systems representatives, etc. to resolve any major problems encountered with system installation, implementation and operation during the warranty period
