A consolidation of the Directory of ERIC Microfiche Collections and the Directory of ERIC Search Services, this directory lists organizations that provide their users and clientele with significant access to the ERIC database and its related resources. Included are organizations that provide computerized searches of the ERIC database, have sizeable collections of ERIC microfiche, and subscribe to and collect the various ERIC publications. Material is presented in three sections covering the domestic United States, outlying U.S. territories, and non-U.S. countries. Where applicable, entries are grouped geographically by country, state, and city within these designations. A sample data entry with explanations is provided, and ERIC information service provider statistics are presented in three tables. Additional information includes a list of ERIC Clearinghouses, a brief discussion of online searching, information for ordering subscriptions to "Resources in Education," an ERIC Fact Sheet, an ERIC Document Reproduction Service order form, and a data input form for the directory. Introduction

The Directory of ERIC Information Service Providers attempts to list every organization that provides its users and clientele with significant access to the ERIC database and its related resources. It includes organizations that provide computerized searches of the ERIC database, that have sizeable collections of ERIC microfiche, and that subscribe to and collect the various ERIC publications (such as the abstract journals Resources in Education and Current Index to Journals in Education, the Thesaurus of ERIC Descriptors, and the many ERIC Clearinghouse information analysis publications).

This Directory represents a consolidation of two existing directories that ERIC has issued periodically for the past several years: the Directory of ERIC Microfiche Collections and the Directory of ERIC Search Services. These two directories always had a considerable overlap and it was finally decided that it would be best to combine them into one comprehensive directory. Additional candidates for listing came from various sources: subscribers to ERICTAPES, attendees at previous ERIC User Conferences, users of ERIC via one or more of the online services, and organizations appearing in related directories.

In the area of computer searching, the intent is to include all sites providing ERIC computer search services on a regular basis, irrespective of whether the service is available only to a circumscribed community (e.g., state education agency or university campus) or to all users without restriction.

In the area of ERIC microfiche, the intent is to list every organization with a sizeable collection of ERIC microfiche, whether or not that collection is currently being kept up-to-date by a subscription. All current ERIC microfiche subscribers are included (no matter when their subscriptions began) along with past subscribers whose collections cover a 2-year period or more.

Not all subscribers to the ERIC abstract journals (some 2,000 subscribers to each) have been included, because not all were appropriate, some were overlapping, some were not heard from, and some didn’t want to be listed as a service provider. However, those have been included who have responded to inquiries and whose total service package seemed to qualify them as an ERIC information service provider.

A certain number of organizations known to be subscribers to the ERIC microfiche were not heard from during the survey or during follow-ups. These have simply been listed as a basic minimal name and address entry without additional detail. It is hoped that future editions of the Directory will be able to complete these entries more informatively.

The Directory is organized geographically, i.e., entries are grouped by country, state, and city, in that order. The domestic U.S. entries appear first, proceeding alphabetically from Alabama to Wyoming, with the outlying U.S. territories following the states. Non-U.S. entries are sequenced by country following the U.S. group. This arrangement brings entries for organizations in the same city together for easy comparison and for ease of use in referral work. The Directory is designed to help users find the ERIC microfiche collection or ERIC search service or ERIC abstract journal collection geographically closest to them that can respond best to their particular information need.

The information gathered for this Directory was recorded on a data input form (shown at the back of the Directory). Organizations that would like to inform us of substantial changes in their entries, and organizations not listed that would like to be listed in future editions, should complete this form and submit it to the ERIC Facility.

Every effort has been made to provide accurate entries. It should be kept in mind, however, that changes in service information are frequent. For this reason, it may be advisable to call and check relevant details before you visit.

Recognizing that some organizations have undoubtedly been overlooked and that those listed will undergo change, this Directory will be periodically updated and re-issued. Inquiries concerning this Directory, including all additions, deletions, changes, or corrections, should be submitted to the ERIC Processing and Reference Facility at the address shown in the back.
Users of this Directory may also wish to make inquiries about purchasing ERIC microfiche, obtaining online access to ERIC, subscribing to the ERIC abstract journals, ordering the Thesaurus of ERIC Descriptors, or getting on distribution for publications of the ERIC Clearinghouses. These contacts should all be made directly with the source of the information and for this purpose the Directory's last section (Section VA) includes the names, addresses, and telephone numbers of all components of the ERIC system, of the online vendors, and of the U.S. Government Printing Office (GPO). The respective responsibilities are as follows:

- **Abstract Journals**
  - Resources in Education (RIE)
  - Current Index to Journals in Education (CIJE)

- **Clearinghouse Publications**
  - ERIC Clearinghouses

- **Database on Magnetic Tape**
  - ERIC Facility

- **Microfiche**
  - ERIC Document Reproduction Service (EDRS)

- **Online Access**
  - Online Vendors (e.g., DIALOG, BRS, SDC)

- **Thesaurus of ERIC Descriptors**
  - Oryx Press

Studies have shown that ERIC is the fourth most used bibliographic database in the U.S., ranking behind LEXIS (Legal Data), CAS (Chemical Data), and MEDLINE (Medical Data), and that its usage is constantly growing. That means that this Directory will also grow. The editors of the Directory hope that the many users of the ERIC database, current and prospective, will find this publication useful, and urge the organizations listed herein to help keep the information in it complete, accurate, and up-to-date.

Online Retrieval

The ERIC database (both RIE and CIJE components) can be searched online by computer via all three of the major vendors of online retrieval services: DIALOG Information Services, System Development Corporation (SDC), and Bibliographic Retrieval Services (BRS).

ERIC was one of the very first bibliographic data bases to take advantage of this advanced technology and remains File #1, for example, among the many files offered by DIALOG.

Individuals and organizations wishing to search ERIC online need only the following:
- a computer terminal (that can link by phone with the online vendor's computer),
- an open purchase order with one or more vendors (you pay only for what you use).

Online computer searching is a superior way to perform retrieval for the following reasons:
- You get responses back in real time, while you wait.
- You can search both subject matter and non-subject matter fields, e.g., authors, institutions.
- You can make complex logical demands that your output must meet; requirements more complex than you can apply manually.
- You get to interact with the computer and can adjust your requirements as you see what the computer selects.
- You can search both controlled input fields (e.g., index terms selected from a thesaurus) and free text fields (e.g., words in the abstract). Free text fields are not normally searchable manually.

In order to establish your own online searching capability contact one or more of the online vendors listed alphabetically below. Each vendor offers different retrieval software, command structure, and training and user support facilities. You should choose the one best fitted for your particular needs.
