This compendium, which is part of a series, describes the current status of 105 demonstration projects funded by the United States Department of Education, Office of Special Education and Rehabilitative Services, as part of the Transition Initiative to help disabled youth make the transition from schooling to successful employment. Eight major sections define the different funding competitions occurring in 1984 and 1985: (1) Handicapped Children's Model Demonstration Programs: Youth Employment Projects; (2) Handicapped Children's Model Demonstration Program: Post-Secondary Projects; (3) Post-Secondary Educational Programs for Handicapped Persons--Demonstrations; (4) Post-Secondary Education Programs for Handicapped Persons--Demonstrations; (5) Rehabilitation Services--Special Projects; (6) Secondary Education Transitional Services for Handicapped Youth--Service Demonstration Projects; (7) Secondary Education and Transitional Services for Handicapped Youth: Cooperative Models for Planning and Developing Transition Services; and (8) Secondary Educational and Transitional Services for Handicapped Youth: Cooperative Models for Planning and Developing Transition Services. Information provided for each project includes: title, mailing address, contact person, phone number, geographic area served, number and type of students served, number of staff and parents served, project purpose, current focus of project activities, cooperating agencies and organizations, project evaluation plan, product availability and project descriptors. Compendium of Project Profiles

Phelps

TRANSITION INSTITUTE AT ILLINOIS
The following principles guide our research related to the education and employment of youth and adults with specialized education, training, employment, and adjustment needs.

- Individuals have a basic right to be educated and to work in the environment that least restricts their right to learn and interact with other students and persons who are not handicapped.

- Individuals with varied abilities, social backgrounds, aptitudes, and learning styles must have equal access and opportunity to engage in education and work, and life-long learning.

- Educational experience must be planned, delivered, and evaluated based upon the unique abilities, social backgrounds, and learning styles of the individual.

- Agencies, organizations, and individuals from a broad array of disciplines and professional fields must effectively and systematically coordinate their efforts to meet individual education and employment needs.

- Individuals grow and mature throughout their lives requiring varying levels and types of educational and employment support.

- The capability of an individual to obtain and hold meaningful and productive employment is important to the individual's quality of life.

- Parents, advocates, and friends form a vitally important social network that is an instrumental aspect of education, transition to employment, and continuing employment.

The Secondary Transition Intervention Effectiveness Institute is funded through the Office of Special Education Programs, Office of Special Education and Rehabilitative Services, U.S. Department of Education (contract number 300-85-0160).

**Project Officer: Dr. Mel Appell**

Introduction and Overview

The Compendium describes the current status of 105 demonstration projects that have been funded by the U.S. Department of Education, Office of Special Education and Rehabilitative Services as part of the Transition Initiative. In early 1984, the Transition Initiative was developed under the leadership of Assistant Secretary Madeline C. Will for the purpose of strengthening the connection between school and work life for the nation's handicapped youth. Her seminal paper entitled Bridges from School to Working Life, published in April, 1984, outlined the policy and programming issues affecting the 300,000 handicapped youth who leave secondary schools annually. The Transition Initiative, which has been supported by three different Federal discretionary programs, was formalized in Section 626 of the Education of the Handicapped Act Amendments of 1983. In Fiscal Year 1984, Congress appropriated $6.0 million for grants and contracts focusing on Secondary Education and Transition Services under Section 626.

With this significant and substantial federal investment, identification and dissemination of model program information is extremely crucial to assuring the long-range impact of the initiative upon both school and community-based programs. Usually, professionals from special education, rehabilitation, vocational education, adult services, as well as employers and parents have a multitude of questions regarding program development for youth. The project profiles are designed to provide comprehensive and current information describing the following: target audiences, program purposes, current activities, evaluation, products, cooperating agencies and organizations. The profiles highlight and summarize the development of the model programs through the 1985-86 school year. The profiles are intended
to provide the essential information regarding the current status of each model demonstration project.

The Compendium is organized into eight major sections--one for each of the different funding competitions that occurred in 1984 and 1985. At the beginning of each section is a description of the purposes of the funding competition and a composite profile that summarizes the various aspects of the projects within each competition (e.g., students served, project purposes, etc.). The individual project profiles follow, which detail the specific components of each project in the competition.

Users of the Compendium are urged to communicate directly with the project contact persons listed on the profiles. In most cases, the projects have a variety of materials and products that they are willing to share with others.

Since this is the initial edition of the Compendium, the Institute staff would welcome comments and suggestions for improving the useability and effectiveness of the document. Please direct your comments to the Director of the Institute, Dr. Frank R. Rusch at the address noted on the cover.
TRANSITION PROJECT COMPETITION PROFILE

Competition: Handicapped Children's Model Demonstration Program--Youth Employment Projects

CFDA 84.023D

Twelve model demonstration grants were funded under this competition in fiscal year 1984. The purpose of this grant competition was to support demonstrations relating to expanding and improving the education of handicapped individuals so as to increase the range of jobs available to them as well as to facilitate transition from school to the world of work. The major goals of projects within this competition are: (1) to determine the problems affecting the employability of handicapped individuals, particularly those relating to the transition from school to work; (2) to develop, determine the effectiveness of, and demonstrate specific interventions related to these problems, particularly interventions related to: (a) the role of the school in increasing the employability of handicapped individuals including long-range planning for employment, counseling, job awareness, the development of social/interpersonal skills needed for employment, and specific occupational skills; and (b) the transition from school to work, including job placement, training on-site in specific job requirements, and follow-up support to ensure job maintenance.

Purpose: The purpose of this program is to support model programs that demonstrate innovative approaches to facilitating transition from school to work. Issues of particular interest are: the role of the schools in preparing the handicapped person for the world of work including counseling; skill development, both social/interpersonal and job specific; and occupational information—all within the framework of a model program. The aim of this grant program is to use direct service to demonstrate the effectiveness of newly conceived educational models, which may be replicated, either in part or in their entirety, in other communities.

Eligible Recipients: State or local educational agencies, institutions of higher education, state, and other public or nonprofit private educational or research agencies and organizations.

No. of Grants to be Awarded: Approximately $1,500,000 will be available to support 15 new demonstration projects under this program in fiscal year 1984.

Anticipated Funding Level: Projects should be budgeted at approximately $100,000.

Duration: Grant approval is for a three-year period subject to an annual review of progress and availability of funds.
Youth Employment Projects

Recipients/Sponsoring Agencies: Of the 12 projects funded under this competition, six were awarded to institutions of higher education. The remainder of the awards were to three public and private schools, two to private nonprofit rehabilitation associations and facilities, and one to a state education agency.

Geographic Location: The 12 projects are located in nine different states with New York, Oregon, and Wisconsin having two projects each. The states are fairly evenly spread throughout the United States.

Target Audience: Each of the projects have as their major goal the provision of direct services to handicapped youth which will facilitate the transition from school to work by increasing the range of jobs available to them and in developing innovative approaches to assure a smooth transition. It is estimated that approximately 2,087 handicapped youth will be served over the three years that projects are funded. The ages of the project participants range from ages 15 to 21. A variety of specific handicapping conditions are being served in the projects. Five of the projects indicated that they are focusing their efforts in serving severely multiply handicapped youth, one indicated serving mildly and moderately handicapped and one indicated an emphasis on serving disabled women and girls. Other projects are serving a combination of youths having specific handicapping conditions.

Project Purposes: Although each project is unique, all have as their major emphasis the provision of a continuum of services which will assist handicapped students who are exiting secondary schools to pursue opportunities in the world of work, and the development of linkages to postsecondary adult service delivery systems. The purpose statements encompass efforts to enhance the employability of handicapped high school students; develop and implement transitional services and strategies; provide career counseling, social/interpersonal skill and specific job skill development; and placement and follow-up.

Current Focus (1985-86): The general focus during 1985-86 has been activities toward implementing program plans and initiatives which were developed in the first year of the project. These plans include but are not limited to collecting formative evaluation data, developing plans for replication, and expanding services. Specific foci during this year are on developing and making available products in the form of videotapes, curriculums, in-service packages, parent resource handbooks, manuals, computer-assisted instruction research studies, compendium of entry criteria and program options, quarterly newsletter, telephone "hot line," and computerized information clearinghouse.
Cooperating Agencies and Organizations: Extensive interagency relationships characterize most of the projects in this competition. For the most part the grant recipients indicate involvement with local school districts; vocational rehabilitation; job services; Job Partnership Training Act (JPTA); mental health and developmental disabilities boards; adult service agencies; labor, business and industry/Chamber of Commerce; and parent advocacy groups. Several projects indicate an emphasis of services to parents or the involvement of parents in advisory capacities.

Project Evaluation Plan: Most evaluation plans are in the formative stage of gathering data which will support preliminary reporting of results. No one program is a replica of another, however, each reports similar efforts to compile data and information on student characteristics and background, employer satisfaction, consumer perceptions, student outcomes, and follow-up status. Summative reporting of specific outcomes and postprogram follow-up status are planned for the final year of the project. The project directors or their designated coordinators all appear to be interested in knowing the level of participant, employer, and parent satisfaction with the program and the services received. The most frequently mentioned strategies for collecting evaluative data were: review of student cumulative records and program files; interviews with students, parents and staff involved in the program; follow-up studies; and the use of third-party evaluators.

Products: The projects in this competition are producing a variety of products and materials to describe their efforts. One project has developed and published a quarterly newsletter. Others are producing operations, training, and replication manuals. Still others are producing implementation checklists, curriculum guides, parent handbooks, employment readiness assessment packages, job skills profiles, adult services manuals, computer-assisted instruction packages, and parent and participant follow-up surveys. To date, seven projects have produced a progress report for either their first or first and second years of operation.

Total: 120

STAFF SERVED: 38 Other direct service agencies.

PARENTS SERVED: 215+

OTHERS: Secondary school staff and community college staffs.

PROJECT PURPOSE:
 LoggerFactory: To develop, test and refine a model designed to link secondary handicapped youth with community training/education resources, and ultimately with jobs in competitive or non-traditional employment.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

Providing technical assistance to participating educational facilities, development of curriculum modifications for school districts and community colleges, updating of data base used in computerized clearinghouse for matching client needs with available community resources, telephone "hot line."

COOPERATING AGENCIES & ORGANIZATIONS (if any):

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Program client statistics.

PROCEDURES FOR COLLECTION AND REPORTING: Predetermined schedule to document attendance, problem areas, progress of participants, intake and referral process forms.

PARENTS SERVED:

OTHERS:

PROJECT PURPOSE:

Develop and implement a community-based training model in integrated public school classrooms of regular high schools for severely handicapped secondary aged school youth, integration of model components into teacher preservice at University of Utah, and provide on-going inservice training and technical assistance to participating school district staff with respect to model.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

Implementation of model in three high school programs, training classroom and supervisory staff in model components, conducting quarterly implementation reviews, providing on-going technical assistance to implementation sites.

COOPERATING AGENCIES & ORGANIZATIONS (if any):

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Student, parent, teacher, employer satisfaction.

PROCEDURES FOR COLLECTION AND REPORTING: Personal interview, staff observation, self-reported responses to mailed questionnaires.

PARENTS SERVED: Parents of students in all classroom sites receive a locally developed transition manual, are invited to transition inservices, and take an active part in IEP/ITP.

OTHERS: Technical assistance was provided to those sites expressing an interest but not chosen as target sites for the 1985-86 school year. Cumulative inservice is provided for all interested staff in one-day workshops and a more intensive Summer Institute.

PROJECT PURPOSE:
To develop a classroom model for students with severe/moderate handicaps which prepares individuals for life and employment in the community. Model features include: selection of locally relevant job clusters for training, parent involvement in IEP processes, on-site training and systematic reporting on post-school service needs of severely handicapped school leavers.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):
Extension of program to 3 LEA's in state of Washington, development of operations manual that details work training component for a self-contained high school class serving severely handicapped individuals, and that details operation of community work crews and central work training sites.

COOPERATING AGENCIES & ORGANIZATIONS (if any): 3 local school districts

PROJECT EVALUATION PLAN:
DATA/INFORMATION TO BE COLLECTED: Documentation of project effectiveness and impact from employers, parents, teachers.

PROCEDURES FOR COLLECTION AND REPORTING: On-site quarterly reviews, evaluation information collected from employer and consumer instruments, outside school community activity record.

TOTAL: __________

PROJECT PURPOSE:
Development and evaluation of a transition to work model which includes assessment of the employment readiness of handicapped students, provision for training to remediate skill deficits which could be barriers to successful employment, and provision of intensive job search training designed to gain suitable employment; and development of training materials and processes for adoption to other Wisconsin school districts.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):
Field test of structured, revised curriculum, providing technical assistance to staff at various project sites, collection of data on 50 nonparticipants at the research sites, and conducting formative and summative evaluations (e.g., interviews, survey of participants who have graduated).

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Data on participant's ability to obtain employment following graduation, manner in which model implemented at each demonstration site, (e.g., Vocational Adaptivity Scale, interviews, survey, base-line samples).

PROCEDURES FOR COLLECTION AND REPORTING: Surveying program graduates 3 months and 9 months after graduation, personal interviews, student records.

TRANSITION PROJECT COMPETITION PROFILE

Competition: Handicapped Children's Model Demonstration Program--Post-Secondary Projects

CFDA 84.023G

Fifteen model demonstration grants were funded as a result of this competition conducted in the spring of 1984. The major purpose of this grant competition was to initiate model demonstration programs focusing on assisting handicapped youth who had completed secondary education in pursuing appropriate postsecondary education and training opportunities. The following specifics from the grant application materials describe the intent of the U.S. Office of Special Education and Rehabilitation in establishing these projects.

Purpose: The purpose of this program is to support new model demonstration projects which will complement secondary programming and link handicapped individuals, who exit the secondary schools but are not yet ready for competitive employment, to community-based training programs and services. Issues of particular interest include: development of an interface between education programs and community service providers, efforts to place and provide continued training and support to individuals for competitive employment, and the development of models to demonstrate that all handicapped individuals leaving public school programs, regardless of disability or severity, have access to community-based training programs. The aim of this grant program is to use direct service to demonstrate the effectiveness of newly conceived educational models, which may be replicated, either in part or in their entirety, in other communities.

Eligible Recipients: State or local educational agencies, institutions of higher education, and other public and nonprofit educational or research agencies and organizations. In addition, the Secretary may award contracts to profit-making organizations.

No. of Grants to be Awarded: Approximately $1,500,000 will be available to support 15 new demonstration projects under this program in FY 1984.

Anticipated Funding Level: Projects should be budgeted at approximately $100,000.

Duration: Grant approval is for a three-year period subject to an annual review of progress and the availability of funds.
Post-Secondary Projects

Recipients/Sponsoring Agencies: Nine of the 15 grants were awarded to institutions of higher education. In most instances, university faculty who are directing the projects have employed staff who are directly involved in providing postsecondary services in concert with local schools, adult service agencies, parent/advocacy organizations, and other agencies. Private, nonprofit organizations (such as local ARC organizations) received four of the 15 grants, while the others were received by a state department of special education and a local educational agency.

Geographic Location: The 15 projects are located in 12 different states. The state of New York has three, while Illinois has two projects.

Target Audience: The 15 projects are each involved in providing direct services to handicapped youth. The project directors collectively estimate that approximately 6,168 handicapped youth and young adults will be served in these programs over the three year period that they will be operated. Due to differences in state and local classification schemes and the ambiguity of local identification practices, it is extremely difficult to determine the nature of specific handicapping conditions being served in the projects. However, six of the 15 projects indicated they are focusing their efforts on serving severely handicapped youth. Two projects are attempting to serve the post-secondary education needs of youth from all disability areas.

Eight of the projects also include provisions for staff inservice training, while four projects seek to directly serve parents in addition to handicapped students.

Project Purposes: Each of the projects has a somewhat unique purpose. They each address the postsecondary education, training, support service, and placement needs of handicapped youth who have exited or are about to exit from secondary schools. The purpose statements encompass efforts to: enhance the employability of handicapped college students; prepare severely handicapped youth for competitive employment; provide transitional employment services; provide career planning, job seeking, and placement services; and increase the coordination of school-community resources.

Current Focus: 1985-86 was the second year of operation for these projects. For the most part, the activities focused on implementation of program plans that had been developed in the initial year. In addition, several projects were developing new program components, collecting formative evaluation data, developing plans for replicating the program at additional sites, and expanding services from those provided in the first year. Among the innovative techniques being testing were the following: a referral network of placement alternatives, analysis of local employment alternatives, development of videotapes on teaching transitional skills to autistic youth, and establishing a career internship program for learning disabled college students.
Cooperating Agencies and Organizations: Extensive interagency relationships characterize most of the projects in this competition. In most instances, the organization receiving the grant had designated the involvement of local schools, vocational rehabilitation, adult service agencies, mental health and developmental disabilities agencies, and the service delivery agent for the Job Training Partnership Act. Most of the projects also have developed mechanisms for parent involvement in an advisory capacity, and in two projects, parents were receiving services directly. Most of the projects were also working with local business people/employers in planning and implementing their programs, but few had mechanisms for formal advisory or evaluative involvement by this group.

Project Evaluation Plan: The evaluation designs being used by the projects were highly varied in focus. Each of the projects appeared to be compiling data and information on student characteristics, student achievement (where appropriate), and client/student outcomes from participation in the program. Most frequently, projects planned to collect or were collecting job placement information (e.g., employment status, job held, earnings, etc.). Several projects intended to compare student outcome data to information collected at program entry as a measure of program impact. In two projects, the evaluation plan included the use of a comparison group of similar students. The directors and staff of these projects also appear interested in knowing the level of client/student and employer satisfaction with the program and the services received. Finally, four projects noted interest in determining the cost(s) of the program per client, although no detailed cost-benefit/outcome designs had been developed.

Among the most frequently mentioned strategies for collecting evaluative data were the following: review of student records and program files, interviews with participants and other key personnel, completion of follow-up studies, and the use of a third-party evaluator.

Products: Each of the projects is and will be producing different materials describing their efforts. Two projects have developed newsletters and publish them on a regular basis. Three projects report they have developed or are planning to develop descriptive brochures. A third of the projects (5) intend to produce one primary document (i.e., a handbook) which will include a comprehensive description of the model program and the procedures used in its development. Among the other documents under development are the following: employer guides and brochures, instructional films, transition strategy books, client and coordinator handbooks, and resource guides for specific personnel (e.g., instructors, employers, community resource mentors, etc.).

To date, all except three of the 15 projects have produced a progress report for either their first or first and second years.

OTHERS: Employers, community service workers, etc.

PROJECT PURPOSE:

Design, implement, and evaluate a model post-secondary demonstration project for handicapped youth ages 18-22 years of age. Project INTERFACE is designed for handicapped youth who exit secondary schools and who are not yet ready for competitive employment, to community based training programs and services.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

The project activities have focused on the development of a source of employers and Information Clearinghouse, Job Development, Placement on Jobs, and follow-up of clients placed for handicapped youth. During 1985-86 the model clearinghouse is being implemented with clients and inservice training is being provided to various cooperating agencies and business and industry personnel. A Task Team Board consisting of members representing populations served by Project guides and advises the Project Director and staff.  

COOPERATING AGENCIES & ORGANIZATIONS (if any): 17 member advisory committee, 15 major cooperating agencies, and 177 business/industry contacts  

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Model program effectiveness, efficiency, and transportability data.  
PROCEDURES FOR COLLECTION AND REPORTING: Questionnaire to professionals, business/industry CEO's, review of state education agency records, observations and interviews with clients and professionals trained and business/industry persons in key positions of hiring clients of this project.

TRANSITION PROJECT COMPETITION PROFILE

Competition: Post-Secondary Educational Programs
for Handicapped Persons--Demonstrations

CFDA 84.078B

Fifteen model demonstration grants were awarded in this competition in fiscal year 1984. The primary focus of the demonstration program was to provide handicapped individuals a means by which to pursue appropriate and effective educational opportunities in postsecondary, vocational and technical institutions.

Purpose: This grant competition sought to develop, operate, and disseminate specially designed model programs of postsecondary, vocational, technical, continuing, or adult education for handicapped individuals.

Eligible Recipients: State education agencies; institutions of higher education, including junior and community colleges; vocational and technical institutes; and other appropriate nonprofit educational agencies.

No. of Grants to be Awarded: Approximately 15 grants will be supported under this competition for fiscal year 1984.

Anticipated Funding Level: Approximately $2,200,000 will be available; average annual project funding level is $150,000.

Duration: Grants may be approved for 12 to 36 months subject to an annual review of progress and the availability of funds.
Demonstration Projects

Recipients/Sponsoring Agencies: Twelve of the 15 grants were awarded to institutions of higher education. Other recipients included state departments of education, public school systems, and vocational rehabilitation agencies.

Geographic Location: Nine of the 15 projects are in different states with New York having four and Virginia having two projects.

Target Audience: The primary handicapped persons served in these projects included the learning disabled (in nine of the 15 programs) and the mildly mentally retarded (in four of the programs). Two of the projects serve both of these groups. The project directors estimate that approximately 12,271 students will benefit from these projects over the grant periods of operation (from one to three years).

One of the projects also provides workshops and seminars for parents, staff, and others in addition to directly serving handicapped clients.

Project Purposes: The purpose for the individual projects vary. However, a significant number of the projects (10) indicate similar purposes of aiding and facilitating the adjustment of learning disabled and mildly retarded students into postsecondary educational settings. These settings include community colleges and universities. Other project purpose statements reflected transition to the adult community and providing training in the human services field for functionally handicapped youth adults.

Current Focus (1985-86): The current year was the second year of operation for most of these projects. Each project is in a different phase of development and operation, thus the activities being undertaken were diverse. Some of the current activities included: establishing a clerical skills training program; preparing a job development manual; writing curriculum; program evaluation activities; workshops; and dissemination of information.

Cooperating Agencies and Organizations: Most of the projects in this competition indicated extensive interagency collaboration. The most frequently cited cooperating agency was universities and community colleges. A number of other projects also work with community agencies such as the Association for Retarded Citizens and United Way in the delivery of services. Other agencies involved were vocational rehabilitation, sheltered workshops, and employment services. Several projects indicated they were also cooperating with local school districts.
Project Evaluation Plan: The project evaluation plans were also highly varied in focus and design. The information being gathered included student progress and training outcomes, successful job placements, increased independent living skills, and assessments of overall program effectiveness. The strategies for information and data collection were also highly varied. Three projects were using pre- and post-program, criterion referenced tests to measure student progress. Several of the projects also reported using teacher observation and reporting.

Products: Several of the projects in this competition plan to produce some form of informational product. Among the anticipated products were: evaluation and progress reports, training manuals, and monographs. To date, only three of the 15 projects had released progress reports while five indicated a report would be forthcoming in the near future.

OTHERS:

PROJECT PURPOSE:
To offer learning disabled students at New York Univ. in undergraduate colleges with three different orientations - traditional, liberal arts, professional preparation, and a non-traditional work/study program-varied services to facilitate academic survival/success, career development and job preparation. Services include individualized programming, computer-assisted instruction, and group and individual career and study strategies/tutoring services.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):
Providing computer-assisted instruction to 24 undergraduate students with emphasis on micro-computer/word processing. Also, five learning disabled graduate students/peer counselors to have training, counseling and microcomputer/word processing assistance available. Individualizing student's academic program in cooperation with college faculty. Career counseling, tutorial assistance, internship placement, supervision, and guidance.

COOPERATING AGENCIES & ORGANIZATIONS (if any):

PROJECT EVALUATION PLAN:
DATA/INFORMATION TO BE COLLECTED: Formative evaluation will involve participation of students, faculty and staff in filling out questionnaires and behavior checklists to determine: (1) How effective a particular strategy is working; and (2) Need for change in current system. Summative evaluation will assess the terminal objectives of the program and will involve before-after measures of basic skills, observed behaviors, career maturity, self-concept and case studies of selected project studies.

PROCEDURES FOR COLLECTION AND REPORTING: On-going formative evaluation and summative evaluation to assess terminal objective.

Demonstration Projects

Recipients/Sponsoring Agencies: Ten of the fourteen grants were awarded to institutions of higher learning. The remaining recipients were rehabilitation centers/large institutions for handicapped individuals. In most instances, university faculty members have been listed as contact persons but have staffed the projects with qualified persons from a variety of backgrounds for the implementation process. Rehabilitation centers have generally used in-house staff expertise for implementation.

Geographic Location: Ten of the fourteen projects represent different states. New York has four projects and Ohio has two projects. The Pacific coast is not represented in this competition.

Target Audience: Each of the fourteen projects are involved in activities to facilitate completion of postsecondary education and/or training so that a variety of handicapped individuals can participate in competitive employment. The foci of some projects include: curriculum revision, instruction, tutorial benefits, occupational skill training, life skill training, and technical knowledge (computers). Others have chosen to concentrate on the linkage/transition aspect relative to support services, career planning, job placement, and employability.

The primary handicapping condition being addressed in most projects is the learning disabled. Other handicapping conditions such as physical impairments, mental retardation, emotional disturbance, language impairment and developmental disorders are also being addressed, but in smaller numbers. One project is using 104 nonhandicapped students as both a control group and modeling group for mainstreaming.

Collectively, the actual number of students served was estimated to be 1,318; however, this is likely an underestimate because several projects are designed to provide support and linkage services to large regional areas.

Project Purposes: Each of these projects has its own perspective on the transition problems of handicapped individuals. They variously focus on education, training, support/counseling, job placement, and use of high technology equipment. The ultimate goal of each is to more adequately prepare handicapped individuals for the workplace and to provide support and linkage services in the process.

Current Focus: Collectively the projects are focusing on: assessing program needs and needs of individual participants; improving employability by way of counseling, guidance, employment leads, business committees and sites to utilize job coaches; integrating the use of equipment such as word processors, computers and other high tech adaptations; and providing interpersonal/life skills training. FY 1985 was the first year of funding for these projects.
Innovations included developing an individualized curriculum, establishing a "job club," establishing an assessment laboratory, and using a business advisory committee.

Cooperating Agencies and Organizations: Among the projects cooperation is characterized by interagency involvement with public schools, community colleges, vocational rehabilitation, colleges/universities, and the business/industry community. Collaborative activities include a job bank, a newspaper, a communication center, use of the visually impaired schools for the handicapped, and a program advisory council.

Project Evaluation Plan: Most evaluation plans contained formative evaluation processes and several discussed summative processes. Most tended to concentrate on context evaluation in the form of needs assessments, questionnaires, surveys, testing, etc., due to the initial year of the project. Others, based on the nature of the project activities were looking at input and process evaluation in the form of designs, strategies, measurement, feedback, and reports.

The projects which seemed to be addressing summative evaluation appeared focused on actual numbers of students being employed or specific products for dissemination, e.g., a curriculum.

Products: The products of these projects can be viewed as change agents in the transition of handicapped students from school to work. Some projects listed their products as: written modules, in-service materials/dissemination materials, criterion-based outcomes, and curriculum guides. Finally, there were projects which listed anticipated outcomes as products--replication of the model, number of job placements, clearinghouse for employment listings, and the number of institutions to implement components of the demonstration project.
Title: Transition to Community Employment

OTHERS:

PROJECT PURPOSE:

Establish linkages between the educational system, existing adult vocational services and community employers. Post-secondary teens and adult participants will be placed on-the-job within normalized community settings with training and on-going support as needed.

(1) Develop/disseminate criterion-referenced assessment instruments; (2) Develop on-the-job training methods and resources; (3) Vocational placement of 55 adults in normalized community settings; (4) 9 graduate and 50 undergraduates will be trained; (5) Development, dissemination of overall evaluation procedures; and (6) Identification of funding sources beyond grant period.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

Comprehensive, multidisciplinary approach to assessment, e.g., abilities and interests, followed by individualized program planning and on-the-job training. Will target post-secondary youth and adults unemployed, underemployed, or “at risk.”

(1) Identify/clarify vocational needs; (2) Develop/implement on-the-job training program; (3) Linkage between vocational training and work; (4) Provide graduates/undergraduates in occupational therapy, vocational education, and social work with knowledge of the aforementioned; and (5) Develop materials/implement training.

PROJECT PURPOSE:

To enhance the quality of occupational skill training and ease the transition from school to work for participants in its existing facility-based training programs by developing community-based training sites in area businesses and industries which will facilitate, encourage, and coordinate the post-secondary training of handicapped participants in a non-handicapped environment. Demonstrate feasibility of program design.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

Improving transition from school to work, site development, job coaching/training, case management, placement preparation and assistance, 90-day follow-up services, program evaluation, distribution of evaluation data, fiscal management, and staff supervision.

COOPERATING AGENCIES & ORGANIZATIONS (if any):

Businesses/industries, Occupational Skill Training Advisory Council, Missouri Division of Vocational Rehabilitation

PROJECT PURPOSE:

To allow the disabled college student to take full advantage of his/her education through a combination of instruction and computer adaptations. The program will provide an evaluation of student needs and capabilities, an educational program combining tutorial services and computer technology, and a center for disabled students, prospective students and their parents to help concerning current computer technological applications.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

1. Aid students through use of computers with adaptive devices to achieve educational objectives;
2. Develop a center to provide assistance to UNL handicapped students, prospective students, and their parents concerning computer applications for their particular needs;
3. Develop tutoring and other educational resources for aiding the otherwise academically qualified student with disabilities; and
4. Build base program to be expanded through grants from other agencies and the federal government.

COOPERATING AGENCIES & ORGANIZATIONS (if any):

Augmentative Communication Center, Barkley Memorial Center, UNL, State Vocational Rehabilitation, Services for the Visually Impaired

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Assessment of abilities, determine system requirements, selection of equipment, evaluate educational needs, develop resources, pursue funds.

PROCEDURES FOR COLLECTION AND REPORTING: Evaluation of needs, progress in academic work, changes in academic programs, software/hardware adjustments, improvement in attainment, interviews, testing.

PRODUCTS: Visible program, reduce course dropout rate, contribution to knowledge, affective education strategy, aid in transition, regional information center.

PROJECT PURPOSE:

To provide training in course content in a special curriculum built around the themes of knowledge of self, knowledge of self in relation to the world of work and knowledge of self as a worker. This generic skills program will be offered as part of a "reverse mainstreamed" adult education program 2-4 evenings per week over a 30-week period.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

Emphasizes a heavy involvement of a Business Advisory Committee in identifying the three hi-tech job clusters for which training will be developed, providing work simulation training materials for use in this training, and in providing short term "contracts" for work experiences to be conducted as part of the abilities program.

COOPERATING AGENCIES & ORGANIZATIONS (if any):

Business Advisory Committee (15 member) post 36 months - OVR, JTPA, employer sponsorship

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: (1) Data on the timely and efficient completion of the tasks proposed in this project; and (2) Formative and summative evaluation of the curriculum content developed through this project.

PROCEDURES FOR COLLECTION AND REPORTING: Monthly meetings with Project Director to track the progress of activities, and offering suggestions to facilitate change when necessary.

PROJECT PURPOSE:
To develop, demonstrate, and disseminate a model, transitional post-secondary preparation program which will expand opportunities in higher education, for learning disabled students. (1) Provision of appropriate preparation for transition and promotion of post-secondary education as a viable option for L.D. students. (2) Implementation of linkage between the university and local school districts in order to provide support to students before and after making a transition to college.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):
(1) Development of collaborative linkages between secondary and post-secondary school personnel, parents and learning disabled students in order to develop and demonstrate a transition support system which better prepares college-bound learning disabled students for success in college. (2) Attention will be focused on the role of post-secondary institutions as service providers in meeting the needs of handicapped students.

COOPERATING AGENCIES & ORGANIZATIONS (if any):
Post-secondary institutions, secondary schools, community agencies, advocacy groups, high school students, parents

PROJECT EVALUATION PLAN: Discrepancy-evaluation model = Process and product evaluation

DATA/INFORMATION TO BE COLLECTED: Transitional difficulties, high school faculty attitude/awareness, monitor H.S./college efforts, role model effectiveness, refinement of college checklist

TRANSITION PROJECT COMPETITION PROFILE

Competition: Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Disabled Individuals

CFDA 84.128A

Five special projects and demonstration grants were funded as a result of this competition conducted in Spring, 1984. The major purpose of this grant competition was to establish demonstration projects for providing comprehensive programs in rehabilitation services which hold promise of expanding or otherwise improving the vocational rehabilitation of groups of severely disabled people who have special rehabilitation needs because of the nature of their disabilities. The primary goal of these projects is to assist severely disabled individuals to achieve the optimal vocational adjustment of which they are capable. It is expected that project activities will be fully coordinated with those of other appropriate community agencies which may provide rehabilitation services to special populations of severely disabled individuals. The following specifics from the grant application materials describe the intent of the U.S. Office of Special Education and Rehabilitative Services in establishing these projects.

Authority: Under Section 311 (a) (1) of the Rehabilitation Act of 1973, as amended. (84.128A)

Eligible Recipients: State, public, and other nonprofit agencies and organizations are eligible to apply under this program.

No. of Grants to be Awarded: Approximately $2,935,000 will be available to support 25 new projects under this program in FY 1984.

Anticipated Funding Level: Projects should be budgeted at approximately $117,000.

Duration: Grant approval is for a three-year period subject to an annual review of progress and availability of funds.
Special Projects and Demonstrations

Recipients/Sponsoring Agencies: Three of the five grants were awarded to rehabilitation programs. Two of these rehabilitation programs are public, governmental agencies and the other is from Goodwill Industries of America serving a national scope. The remaining two grants originate from the College of Education at San Diego State University and the Valley School in Fishersville, Virginia.

Geographic Location: The five projects are located in four different states. The state of Virginia has two, while California, Arizona, and Maryland have one each.

Target Audience: The five projects are each involved in providing direct services to handicapped youth. The project directors collectively estimate that approximately 465 handicapped youth and young adults will be served in these programs over the three year period that they will be operating. The projects report a wide variety of handicapping conditions to be served. These conditions include educable, trainable, severe and profound mental retardation, blind and visually impaired, severe learning disabilities, autism, physical handicaps, and multihandicapped. Three of the projects are attempting to work closely with parents and two report that staff inservice will be an integral component of the grant.

Project Purposes: Each of the projects has a somewhat unique purpose. They each address the educational and training needs of handicapped youth as they transition from school to work. The purpose statements encompass efforts to: enable blind student/clients to make a smooth transition from classroom to employment by providing a mechanism to participate in computer-related courses, meaningful work experiences, job placements, and follow-up services; ensure that handicapped Navajo youth leave school with marketable skills and with opportunities for postsecondary training and employment; provide comprehensive rehabilitation and educational services to severely disabled students; provide active coordination of school and adult service agencies working with students, parents, and families to facilitate transition; design a model which includes instructional, training and employment strategies; and recruit, evaluate, train and place in employment in the private sector severely handicapped individuals using the Projects With Industry model of vocational habilitation/rehabilitation.

Current Focus (1985-86 Activities): 1985-86 was the second year of operation for these projects. For the most part, the activities focused on implementation and follow through on program plans developed in year one. Some of the activities undertaken in the second year include: the installation of adaptive units for computer systems placed in educational institutions; utilization of work experience programs; placement of clients in competitive employment; establishment of an Interagency Planning Committee; conducting a survey of graduates, school leavers, and employers to determine job availability; establishing a computerized job hot-line; evaluating students on vocational
skills and knowledge; providing inservice training for staff; development of curriculum models for career education; and follow-up of the first wave of program completers.

Cooperating Agencies and Organizations: Extensive interagency and interorganizational relationships characterize all of the projects in this competition. The type of organizations and agencies include: private businesses, vocational rehabilitation, colleges and universities, school districts, ARC, United Cerebral Palsy, city government, division of labor, Navajo Nation Council on the Handicapped, Youth Development Services, and job service agencies.

Project Evaluation Plan: The evaluation designs being used by the projects were highly varied in focus. Projects appeared to be compiling data and information on such things as computer system utilization by clients, satisfaction, client placements, client performance on the job, degree to which project complies with grant objectives, average wage of clients placed, cost-benefits achieved, input from participants on program effectiveness, and conference evaluations. For the most part, projects were not as explicit about the means of collection and reporting, but follow-up surveys and questionnaires were mentioned in two of the five projects.

Products: Each of the projects are and will be producing a variety of materials regarding their project efforts. Four of the five indicated that they will produce evaluation progress reports, one reported the use of a quarterly newsletter, and two indicated nonspecific products and reports. One project indicated that they would produce vocational surveys.
Title: Olta Doo Naa Nishji (School to Work)

STAFF SERVED:
At Window Rock High School, two inservice training sessions. At Twin Trails Treatment Center, two inservice training sessions.

PARENTS SERVED: 100 parents will take part in training on advocacy and vocational education alternatives.

OTHERS: 25 employer contact, 10 advisory group-training

PROJECT PURPOSE:
The purpose of this project is to ensure that handicapped Navajo youth leave school with marketable skills and with opportunities for post-secondary training and employment, including access to a handicapped job hot-line.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):
Establishing an Interagency Planning/Action Committee; conduct a survey of graduates, school leavers, and employers to determine job availability (serve as a base for a computerized job hot-line); evaluate students on vocational knowledge and skills; revise IEPs to include vocational goals; provide career counseling for students and inservice training for school personnel; plus the development of a curriculum model for career education.

COOPERATING AGENCIES & ORGANIZATIONS (if any):
Navajo Division of Labor, Dine Assoc. for Handicapped Citizens, Dine Center for Human Development, Navajo Nation Council on the Handicapped, Navajo Community College, Twin Trails Treatment Center, Division of Youth Development Services, BIA-Career Education, Arizona Job Services

PROJECT EVALUATION PLAN:
DATA/INFORMATION TO BE COLLECTED: Conference evaluation, parent & student evaluation of project activities, and external evaluation whereby cooperative agencies can review the project's progress and accomplishments, student/adult surveys.

TRANSITION PROJECT COMPETITION PROFILE

Competition: Secondary Education and Transitional Services for Handicapped Youth--Service Demonstration Projects

CFDA 84.158A

5 model demonstration grants were funded as a result of this competition conducted in February, 1984. The primary purpose of the grant competition was to assist handicapped youth in the transition from school to postsecondary environments such as competitive or supported employment. The following specifics from the grant application materials further describe the intent of the U.S. Office of Special Education and Rehabilitative Services in conducting this grant program.

Purpose: To support projects that develop and establish exemplary models for service programs which include specific vocational training and job placement.

Eligible Recipients: Institutions of higher education, state and local education agencies, or other public and private nonprofit institutions and agencies.

No. of Grants to be Awarded: Approximately 10 demonstration programs will be supported in fiscal year 1984.

Anticipated Funding Level: Approximately $1,000,000 will be available to fund 10 projects operated at the level of approximately $100,000 per year.

Duration: Projects will be funded for 12 to 36 months.
Service Demonstration Projects

Recipients/Sponsoring Agencies: Seven of the 16 grants were awarded to institutions of higher education. Projects were also awarded to school districts, vocational rehabilitation agencies, and nonprofit, private local organizations.

Geographic Location: The 16 projects are in 11 different states. Three projects are placed in Washington and two in New York.

Target Audience: The 16 projects provided direct services to handicapped youth ages 16-21. The project directors estimated that these projects will serve approximately 34,324 during their one-three year period of operation. The handicapping conditions served varies from project to project. Several of the projects focused on moderately and severely handicapped youth. Two of the projects also dealt with handicapped youth in rural and socio-economically disadvantaged communities. Other projects were serving autistic and emotionally disturbed students.

Project Purposes: The basic purpose of these projects was focused on transition from school to the workplace with the ultimate anticipated outcome being permanent, competitive employment. Some of the purpose statements include: development of a continuum of transition services for employment of the developmentally disabled; development of a supported work model for mentally retarded youth; providing high risk and dropout youth who are mildly handicapped with vocational guidance leading to successful job placement; and development of work experience opportunities.

Current Focus (1985-86): 1985-86 was the second year of operation for most of these projects. Five of the grants indicated that providing job placement and follow-up services for the students was a current activity. Continuation of previous services and refinement of service delivery models was also being undertaken. Replication of the model in other sites and implementation of evaluation procedures were also among the current activities.

Cooperating Agencies and Organizations: A majority of the projects (11) indicated the use of interagency collaboration. In several instances the projects also cited involvement with local vocational rehabilitation services and local educational agencies. Because the focus of this competition was school to work transition, there are also business associations and organizations involved with the projects, e.g., Projects with Industry, private industry councils, and the National Alliance of Business.

Project Evaluation Plan: The project evaluation plans were highly varied; however, several of the projects planned to use evaluations focusing on student outcomes (e.g., job retention, beginning salary data, acquisition of independent living skills, and class attendance). Overall project effectiveness was also to be examined: goal attainment,
task completion, cost, and employee integration. Among the most frequently listed methods of data collect were pre- and post-program tests, rating scales, and documented observations. One project proposed to use a control group of students.

Products: The projects in this competition are producing various informational resources regarding their efforts. Included among the products are newsletters, brochures, training manuals, journal articles, and progress reports. Three of the projects are producing or have produced slide tape and video tape presentations describing their activities and outcomes. Ten of the 16 projects reported having progress reports available at the present time.

PROJECT PURPOSE:

To plan, establish, develop, and demonstrate a vocational training and job placement program for secondary level handicapped youth that demonstrates a fully unified and coordinated approach between business, industry, labor, local education agencies, and rehabilitation systems.

CURRENT FOCUS OF PROJECT ACTIVITIES (1984-85):

This program focused on five goals: 1) to prepare students for competitive employment through OJT training, 2) generate work experience in the private sector, 3) to achieve career oriented placements, 4) to establish follow-up services both for workers and employers, to insure smooth and lasting transition, and 5) to disseminate methods found most effective to serve as a model to encourage wider efforts.

COORDINATING AGENCIES & ORGANIZATIONS (if any):

Local employment development depts., state depts. of education and rehabilitation, local education agencies, JTPA, PIC's, and Youth Employment Services

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Activities in support of project objectives and actual performance (e.g., client recruitment, screening, job training, supportive services).

STAFF SERVED: Executive Director, National Coordinator, Associate National Coordinator, Vocational/Job Placement Coordinators.

PARENTS SERVED: Parents have been encouraged to provide support for their children’s efforts.

OTHERS:

PROJECT PURPOSE:

To promote the transition from classroom to workplace for students with disabilities by 1) providing vocational and on-the-job training, 2) developing work experience opportunities, 3) placing 50 handicapped students in permanent full-time competitive employment following OJT, and 4) providing on-site follow-up to participants and employers.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

(1) Perfecting methodologies for broader application in the transition from school to work; (2) Program continues to take on difficult cases involving severe disabilities and will work to strengthen kinds of services which will better prepare handicapped youths for worthwhile careers in the private sector; and (3) Approaches common to PWI will continue to be a mainstay of IAM/TSHY.

COOPERATING AGENCIES & ORGANIZATIONS (if any):

Local employment development departments, State Depts. of Education, local education agencies, State Depts. of Rehabilitation

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Numerical and descriptive data.

Focused on the three phases of transition process: 1) secondary program IEP management, 2) transitional management, and 3) availability/appropriateness of post secondary program options.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):

To develop parents as "prime advocates" in the transition process and develop/field test individualized transition plans, demonstrate effectiveness of job coach role.

COOPERATING AGENCIES & ORGANIZATIONS (if any):

Dept. of Special Education, University of Hawaii-Manoa; State Dept. of Education Exceptional Children Branch; Association for Retarded Citizens of Hawaii-COMTEP; Community College Employment Training Program; Division of Rehabilitation

PROJECT EVALUATION PLAN:

DATA/INFORMATION TO BE COLLECTED: Information necessary to measure the effectiveness of demonstrated project innovations and information to help facilitate project development, implementation, replication, and institutionalization.

PROCEDURES FOR COLLECTION AND REPORTING: Evaluation questions of process/product.

STAFF SERVED: 45-50 Special education department teachers/psychologists/counselors.
PARENTS SERVED: 19 Parents of participating students.

OTHERS: 19 Transition project directors and staff in Washington state.

PROJECT PURPOSE:
To develop a model that school districts can use to better prepare 17-21 year old handicapped students for the world of work. Students will work in competitive jobs during the day, evenings or weekends, will attend a transition resource room three times per week, and participate in an Employment Support Group once per week. They will be placed in other in-district programs (e.g., vocational classes) as warranted by individual training needs.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):
Developing the model for Highline School District activities: recruiting student population, hiring and training staff, field-testing curriculum, monitoring student progress, developing a replication site and population.

COORDINATING AGENCIES & ORGANIZATIONS (if any):
Office of the Superintendent of Public Instruction, Olympia, WA, Dept. of Vocational Rehabilitation, Washington

PROJECT EVALUATION PLAN:
DATA/INFORMATION TO BE COLLECTED: Student outcomes: class attendance, rate of employment, length of employment, degree of independent living skills. Project outcomes: quality of methods, integration of the project into the Highline Secondary Special Education program.

TRANSITION PROJECT COMPETITION PROFILE

Competition: Secondary Education & Transitional Services for Handicapped Youth: Cooperative Models for Planning and Developing Transitional Services

84.158B

Eleven model demonstration grants were funded as a result of this competition conducted in fiscal year, 1984. The major goals of projects in this competition are: (1) development of formal working agreements and mechanisms between state or local education agencies and adult service agencies that result in programs and service models assisting handicapped youth to enter competitive or supportive employment; (2) demonstration of unique methods for ensuring placement of handicapped students in continuing education and training programs; and (3) creation of models demonstrating the intervention of various support systems.

Purpose: The major purpose of this competition was to support projects designed to plan and develop cooperative models for activities among state or local education agencies and adult service agencies with the goal of facilitating effective planning to meet the service and employment needs of handicapped youth as they leave school.

Eligible Recipients: State or local education agencies, institutions of higher education, state, and other public or nonprofit private educational or research agencies and organizations.

No. of Grants to be Awarded: Approximately $1,000,000 was made available to support 13 new cooperative models in fiscal year 1984.

Anticipated Funding Level: Projects should have been budgeted up to $75,000.

Duration: Grant approval was for up to a two-year period subject to an annual review of progress and the availability of funds.
Recipients/Sponsoring Agencies: Seventy percent of the grants awarded in this competition were received by local education agencies (5 of 11 grants) or by state education agencies (3 of 11 grants). The other three recipients were two private nonprofit organizations and an institution of higher learning.

Geographic Location: The 11 projects are located in 6 states, one commonwealth and two in Washington D.C. California has two projects. Five of the projects (45%) are structured to facilitate interagency collaboration within counties that include major metropolitan cities (e.g., Dallas, Hartford, Santa Barbara). Five of the projects (including one commonwealth) are state-wide in focus and are primarily concerned with state-level program planning and implementation. Two projects are national in focus and structured to provide technical assistance to state-level program planners and implementations.

Target Audience: Of the 11 projects, all have provided indirect services to handicapped youth via development of interagency collaboration and programming. While nine of the projects indicated aggregate numbers of youth served totaling over 4,000 individuals, less than 70% of those appear to have received direct services from grants in this competition. However, an emphasis of across agency and parental training among recipients/sponsoring agencies has provided direct services to over 450 individuals who will directly affect state and local level policy related to interagency collaboration.

Project Purposes: The geographic area of interest appears to have heavily influenced the purpose of most projects in this competition. Four of the five projects are structured to effect metropolitan interagency collaboration and seek to develop and implement a model that will be applicable in other major cities. One of the five metropolitan projects is directly linked with handicapped military dependents in the continental U.S. and on a base overseas. The five statewide projects seek to maximize their utilization of resources for handicapped persons via structuring coordination among state-level agencies. Similarly, the nationwide projects seek to maximize utilization transition information by "reporting-out" activities to state education agencies and providing state-level technical assistance.

Current Focus (1985-86): Since these projects began in late 1984 or early 1985 and will terminate in late 1986, all are currently involved in activities directly related to effecting the implementation of models for interagency collaboration, staff and parent training, and dissemination of their model products.

Cooperating Agencies and Organizations: As expected, all projects in this competition have extensively engaged existing agency and organizational resources. Reflective of geographic focus and purpose, each of the three groups within this competition (i.e., national, state or local in delivery of services) has involved appropriate agencies and organizations. For example, projects with a statewide focus have collaborated with State Departments of Public Instruction and State Departments of Mental Health while at the metropolitan level projects mirror a mixture of locally-based advocacy groups as well as state and national direct service providers agencies and governmental units.
Project Evaluation Plan: Evaluation plans appeared to rely upon gathering information on a continuing basis. Plans which were formative in nature, providing data to help formulate the direction and content for evolving interagency collaboration, seemed to be the primary interest across projects. Data was collected from a variety of sources: minutes of meetings, pre-post test instruments to measure change of awareness levels in participants, summary progress reports, project interagency agreement documents.

Products: All projects have products that are currently available upon request. Products include: interagency agreements, training packets to effect interagency collaboration, site procedural manuals, resource guides, video-tapes and/or slide-tape presentations, workshop packages, regional training sessions manuals, parent manuals for transition and supported employment, and reports on the status of adult transition services.

TRANSITION PROJECT COMPETITION PROFILE

Competition: Secondary Education and Transitional Services for Handicapped Youth: Cooperative Models for Planning and Developing Transitional Services

85.158C

Sixteen model demonstration grants were funded as a result of this competition conducted in fiscal year 1986. It was expected that applications submitted under this competition would consist of a planning phase (1 year) and an implementation phase (2 years) which would result in cooperative systems planning to go beyond collaboration to formal working commitments and agreements. In addition, it was expected that models would be rigorously evaluated to determine their effectiveness to extend current knowledge relating to the transition needs of handicapped youth.

Purpose: The purpose of this project is to plan and develop cooperative models for activities among state, intermediate, or local education agencies and adult service providers, which will facilitate effective planning and program development to meet the service and employment needs of handicapped youth as they leave school.

Authority: Section 326 of Title 34 of the Education of the Handicapped Act (20 U.S.C. 1425).

Eligible Recipients: State or local education agencies, institutions of higher education, state or other public or nonprofit private educational or research agencies and organizations.

No. of Grants to be Awarded: Approximately $880,000 was made available to support eight to 10 new cooperative models in fiscal year 1986.

Anticipated Funding Levels: Projects should have been budgeted up to $85,000 per year.

Duration: Grant approval was up to three years subject to annual review of progress and the availability of funds.
Recipients/Sponsoring Agencies: Eighty percent of the grants awarded in this competition were received by private nonprofit educational agencies or organizations (7 of 16), or by state education agencies (6 of 16). The other three recipients were an institution of higher education and two local education agencies.

Geographic Location: The 16 projects are located in 11 states and one in Washington D.C. North Carolina has three projects while Missouri and Virginia have two projects each. Seven of the projects (about 45%) are structured to facilitate models within counties that include major metropolitan cities (e.g., Nashville, Phoenix, Charlotte, Stockton). Four projects are state-wide in focus, another four projects target rural regions within states, and one is structured to initiate and document five comprehensive state interagency models.

Target Audience: Of the 16 projects, 13 provided direct services to handicapped youth through model programs that were developed as a result of this competition. Over 1,200 youth had received services as of June 1986. In addition, over 600 parents of handicapped children received services from the various projects, plus over 600 professional staff from education and service provider agencies received training and/or other services from grant recipients related to the transitional programming of handicapped youth.

Project Purposes: Nine of the 16 models have as their expressed purpose the transition of individuals with handicapping conditions from school to employment. Four of the projects have seemingly focused their purposes on a more generic approach to provide a variety of transitional services which include: transition to work, further vocational training, continuing education, supported employment, and/or adult services. Of the remaining three: one has developed a model to assist LD students' transition to post-secondary education; another seeks to provide vocationally-oriented rehabilitation and education services for severe physically disabled youth 14-22 years of age; and the third to facilitate the integration of visually impaired students into secondary vocational education programs.

Current Focus (1985-86): All projects are in their second year of operation and are implementing and refining their models for transitional services. Activities across all projects are currently focused on inservice training of project staff, parents, and related agency personnel. Additionally, most projects indicated refinement of student placement related activities, development and evaluation of student transitional training materials, and conducting parent and community information seminars as main efforts being undertaken during the current and upcoming year of operations.

Cooperating Agencies and Organizations: Five of the projects did not list or identify cooperating agencies or organizations. Most of the remaining nine projects extensively engaged other agencies and organizations. One project indicated involvement of vocational education.
Project Evaluation Plan: Evaluation plans varied across projects. Projects seemed to be collecting data on student achievement, general characteristics, and outcomes from student participation. Almost all projects were collecting data to compare student program entry with exit activity as a measure of project/model success. Frequently identified strategies for collecting data included: interviews with parents, employers and students; student follow-up; review and maintenance of student records and program checklists; project manager on-site visit reports; and, use of a third-party evaluator. Eleven projects indicated an evaluation report would be available by 10/1/86. Five project evaluation reports will not be available until after the project has terminated.

Products: Fourteen of the projects have indicated the availability of products and/or reports by the fall of 1986. Commonly identified products include: video-tape on transitional program; publicity brochures; training modules/manual for parents, businesses and students; forms and procedures for transitional process; workshop materials; and the project's cooperative model plan.

OTHERS:
Teachers 10-30
Adult Service Providers 10-30

PROJECT PURPOSE:
To develop and implement a model cooperative plan to insure the effective and timely transition of persons with developmental disabilities into the world of work. This plan will be developed by a planning committee consisting of adult service providers, parents, school personnel and employers and implemented through a Community Transition Center. In addition, recently graduated students unemployed or underemployed are provided vocational training utilizing the Supported Employment Model as well as related skill training.

CURRENT FOCUS OF PROJECT ACTIVITIES (1985-86):
Development of cooperative plan and employment options, enrollment of graduating students who are not fully employed at the Community Transition Center, securing employment through the Supported Work Model and parent teacher training.

COOPERATING AGENCIES & ORGANIZATIONS (if any):
Dept. of Mental Health, Regional Center, Vocational Rehabilitation, JTPA, Job Service, Social Security Administration, Northeast Missouri State University

PROJECT EVALUATION PLAN:
DATA/INFORMATION TO BE COLLECTED: Agencies involved and time spent by each, time spent in on-the-job training, time spent in skill training, employer contacts, and employer follow-up, participant skill acquisition.

PROCEDURES FOR COLLECTION AND REPORTING: Parent and consumer questionnaires, informal assessments by staff, weekly log of participant contacts, continuous assessment of skill acquisition.
