The Orlando Displaced Homemaker Program was developed to assist displaced homemakers in finding career focus and direction, to introduce them to vocational training possibilities, to set realistic work and training goals, and to develop the positive self-concept necessary to carry them out. The project goal was to recruit and provide training, counseling, and placement services to 110 individuals. A total of 210 displaced homemakers participated in all or part of the program, which included 11 monthly two-week courses and 9 one-day workshops. The program had a 94 percent completion rate of those completing the two-week program with 48 percent of the completers obtaining jobs. Of these, 20 percent (12 people) were placed in nontraditional high-wage areas. Sixteen people entered and completed vocational training and are currently employed, and nine people are enrolled in degree-seeking programs. Services provided through the program include daytime and evening classroom instruction, outreach workshops, individual and group counseling activities, campus visits to career development centers and vocational education programs, development of staff liaisons with the business community, and needs assessments of minority clients. A study was conducted to identify high-wage jobs and employment projections for the area, and the findings were used as a basis for recommendations for improving the program. (Appendixes include data on program participants and program outcomes, workshop agendas, correspondence pertaining to and materials from the courses and workshops, results of the program evaluations, and a report on the study of local employment projections.) Preface

The Central Florida area continues to experience rapid growth, adding 2,300 new residents daily as documented by the Orlando Chamber of Commerce. With this growth, problems related to employment and the traditional structure of the family have increased. There have been significant increases in the number of divorced women, the number of women living alone, and the number of women who need to work to support their children. There are 14,000 single-parent families in Orange County, according to latest census figures. These single parents have a disproportionately high rate of unemployment, or find themselves in low paying entry-level positions. According to MOHAWC (Metro-Orlando Housing That's Affordable Women's Coalition), these households represent a majority (58%) of the city's low and moderate income and 30% have incomes below the poverty line.

The Orlando Displaced Homemakers Program has enabled these unemployed and underemployed women to recognize and appreciate their self-worth, gain important insights through self-assessment, improve communication and employability skills, and address nontraditional and vocational career options. The program has assisted participants in establishing realistic vocational/educational and job search goals that have enabled them to attain and retain meaningful employment.

Special acknowledgment must be made of contributions to this project by the Health and Rehabilitative Services' Displaced Homemaker Program, the Job Internship Project, the Nontraditional Options in Training for Employment Project (NOTE), and the Council for Continuing Education for Women of Central Florida, Inc. A number of other community organizations and social service agencies, including We Care, Spouse Abuse, Job Service of Florida, Four-C, Health and Rehabilitative Services, Legal Aid, Orange County Mental Health, The Private Industry Council, JTPA, MOHAWC, and The Christian Service Center have served as linkages and providers of special resources for the program.
Abstract

The national trend of increasing numbers of single women heading low income households is borne out in Orange and Osceola Counties. Latest census figures list 12,000 female headed households in Orange County alone. These households represent 58% of the city's low and moderate income households, and 30% of these are below the poverty line. This indicates lack of awareness of high wage opportunities in vocational training or nontraditional fields, job and sociological skills without which it is, and will continue to be, impossible for them to adequately provide for themselves and their children.

In order to interrupt this cycle of poverty, the goal of this project was to assist individuals in finding career focus and direction; introduce students to vocational training possibilities; set realistic work, educational or training goals; and develop the positive self-concept necessary to carry them out.

The objectives of the project were:

1. To recruit 110 displaced homemakers for the program.
2. To target and conduct recruitment in two ethnic or minority communities.
3. To conduct outreach workshops in the two targeted communities.
4. To provide assessment and a structured, 66-hour employability skills course for 110 displaced homemaker students.
5. To present nontraditional career exploration modules to 110 displaced homemakers.
6. To assist 110 displaced homemaker students in setting career goals.
7. To offer employment assistance to participants through an intensive or weekly job support group.
8. To offer career and job retention counseling to participants during their first year of employment.

Grant objectives were achieved through daytime and evening classroom instruction, outreach workshops, individual and group counseling activities, campus visits to career development centers and vocational education programs, staff liaisons/contacts with the business community, use of available (especially free) media, needs assessments of minority clients, and use of materials developed by other vocational education grants (e.g., Nontraditional Options in Training for Employment).

Two hundred ten individuals participated in all or part of the program. Eleven monthly two-week courses and nine one-day workshops were conducted. There was a 94% rate of program completion and, due to economic pressure, 48% of course participants sought and were assisted in finding immediate employment. Twenty percent of the job placements were in nontraditional areas. Thirteen percent entered and completed vocational training and are currently employed.

Future recommendations in improved programming are tied to a recent job market survey on vocational training and employment opportunities in the tri
county area. The purpose of the survey (made possible by vocational funds) was to identify high-wage jobs and employment projections for the area, and companies which provide on the job or apprenticeship training (See Appendix G). IsLw and improved linkages with vocational technical schools in our area, particularly Winter Park Vo-Tech, will improve service to the target population.

Since its initiation, the Orlando Displaced Homemaker Program has made a meaningful difference in many lives. As Central Florida continues to grow the need for this service, which provides the basis for economic self-sufficiency through exposure to high wage jobs and vocational/educational career and training opportunities, will be even greater.
Introduction

This report will highlight the economic condition of single parent/displaced homemakers in the Orlando area as it relates to their ability to support themselves and their children. It will show that training is needed to assist these women in moving out of this cycle of poverty. Awareness of nontraditional high-wage jobs, vocational training, and education options is a necessary part of this awareness. Building confidence, gaining self-knowledge and employability skills is also a component of making sound career decisions which will ultimately lead to self-sufficiency and independence.

According to the latest census figures, there are 14,000 single-parent families in the Orange County area. Of this number, 12,000 are female-headed households created by the death or divorce of a spouse. These households represent a majority (58%) of the city's low and moderate income households and according to MOHAWC (Metro Orlando Housing that's Affordable Women's Coalition), 30% of all Orlando households headed by women have incomes below the poverty line.

The "displaced homemaker" label grew out of the 1970's and was given to an individual whose home and family structure changed from one in which she received financial and emotional support from another to a situation of emotional upheaval and little or no financial support. After death, separation, divorce, or disability of a spouse, this new "head of household" had to provide for herself and her family. Too often, however, she had no skills and little confidence in her abilities. Consequently, she gravitated toward pink- and blue-collar, entry-level positions. The State of Florida statute, which provides funds for training programs to help the displaced homemaker pull her life together, set an age requirement of 35 years or older. However, the problems of the displaced homemaker are situational and not age related.

The HRS-funded Displaced Homemaker Program, offered through the Center for Continuing Education for Women at Valencia Community College, has provided employability skills training and support services for the over 35-year-old population for 10 years. When women over 35 complete the two-week structured program, they are assisted with job placement and training options. The institutional support of this program is an example of the College's commitment to vocational education (See Appendix D-2). During the early years of the program, the Center for Continuing Education for Women conducted a survey to gather information about the needs of displaced homemakers. The statistics gathered indicated that there were many displaced homemakers under 35 years of age. While this group was in great need of the types of services offered in the HRS program, they were not eligible for existing training. In response to the needs of this younger group of women, the vocational education-funded Orlando Displaced Homemaker Program at Valencia Community College was initiated in September 1981.

Statistically, displaced homemakers and single parents have a disproportionately high rate of unemployment, or find themselves in low paying entry level positions. According to the fall 1985 annual survey conducted by the Orlando Sentinel, there are 91,900 single women working in the tri-county area
(Orange, Osceola, and Seminole Counties). Sixty-one percent of these are under 35 and the majority are in low paying entry-level jobs. This program has encouraged these unemployed and underemployed women to recognize and appreciate their self-worth, gain important insight through self-assessment, improve communication and employability skills, and address nontraditional and vocational career options. The program also assists participants in establishing realistic vocational/educational and job search goals and provides support while they are striving to achieve these goals.

The formal objectives of this year's program were: 1) To recruit and provide assessment and a structured 66-hour employability skills course for 110 displaced homemakers, (2) to target and conduct recruitment and workshops in two minority communities, (3) to present nontraditional career exploration modules to 110 displaced homemakers, (4) to assist 110 displaced homemakers in understanding and setting career goals; (5) to offer employment assistance through weekly job support groups and to offer career and job retention counseling to participants during their first year of employment.

This year the program has been marked with increased interest and participation. Through the employability skills classes and various programs and services provided, the project served 210 individuals between July 1, 1986 and June 30, 1987. One hundred nineteen of these were displaced homemakers or single parents. Sixty-seven percent had an income level at or below $10,000 per year. Fifty-five percent had an educational level at high school or below (See Appendix A-2). Nine one-day employability skills outreach workshops in minority communities were conducted and a six-week evening class for displaced homemakers, who are currently employed in low income jobs and cannot attend daytime classes was held.

All 150 individuals were offered ongoing employment counseling through Job Club, and others were referred to positions available through Job Bank. Job Club was expanded from one to two days a week to better serve students' needs. In addition, those completing the program were invited to participate in a job internship program for the first year of their employment. The internship includes continued counseling as well as monthly job retention and advancement modules (See Appendix D-6). Personal appointments for counseling and resume revisions were available throughout the year.

The program had a 94% rate of completion by students who enrolled. Of those completing the 2-week program, 48% obtained jobs, twelve (20%) of these were in nontraditional high wages areas. Sixteen (27%) of the students completed vocational training and are currently employed. Nine individuals enrolled in degree-seeking programs (See Appendix A-7).
Methods

A goal of the Orlando Displaced Homemaker Program at Valencia Comunity College is to assist women in attaining independence by increasing their self-awareness, self-confidence, motivation, also, by providing employability skills and vocational and educational options so that they can make effective career decisions and establish independence.

The objectives of the project were:

1. To recruit 110 displaced homemakers for the program.
2. To target and conduct recruitment in two ethnic or minority communities.
3. To conduct outreach workshops in the two targeted communities.
4. To provide assessment and a structured, 66-hour employability skills course for 110 displaced homemaker students.
5. To present nontraditional career exploration modules to 110 displaced homemakers.
6. To assist 110 displaced homemaker students in setting career goals.
7. To offer employment assistance to participants through an intensive or weekly job support group.
8. To offer career and job retention counseling to participants during their first year of employment.

1) To recruit 110 displaced homemakers

Recruitment was conducted with informational mailouts to appropriate agencies, area churches, public service media, and interested individuals (approximately 150-200 per month). Speaking engagements, encouragement of graduates to become program advocates, and posters and fliers circulating throughout the community added to that effort (See Appendix B). Linkages with MOHAWC, Health and Rehabilitative Services, Spouse Abuse, and SMILE (Single Mothers In A Learning Environment) assisted with referrals and planning workshops.

2&3) To target and conduct recruitment in two ethnic minority communities and to conduct outreach workshops in two targeted communities.

Through community linkages, speaking engagements, and needs assessments outreach areas were identified. Nine outreach seminars were conducted in minority areas with high numbers of single parents or displaced homemakers. Monthly one-day employability workshops for residents of the Spouse Abuse Shelter and SMILE programs in Apopka were provided. The workshops included modules on risk taking, value clarification, goal setting, job application forms, interviewing, dressing for the interview and job search, information on JTPA, Job Service of Florida, GED preparation, and local vocational education opportunities was also presented.
4) To provide assessment and a structured 66-hour employability skills course for 110 Displaced Homemaker students.

Eleven structured two-week classes were held monthly this year.

Many participants who entered the program had experienced emotional and economic crisis and lacked self-confidence. To assist the participants in developing a more positive self-image, the first sessions focused on assessing personal strengths and career interests. Preliminary inventories such as the Myers Briggs Type Indicator and the Holland Self-Directed Search were administered during the first module of a two-week 66-hour structured employability skills training course (See Appendix C-1).

The Myers Briggs Type Indicator provided a profile of personality types. An understanding of participants' types helped them choose a career more suitable to their personality and their needs. The Holland Self-Directed Search, a career interest inventory, further helped students explore and identify personality traits and their career interests and strengths. This self-scoring measure gave students an opportunity to learn about a range of careers in which their interests, values, skills and abilities are similar to people employed in those occupations. Further assisting students in making sound career decisions, personal and professional values were addressed and identified. Together, these inventories and exercises gave participants a concrete way to aid in understanding themselves and their needs and at the same time identify some of the positive qualities about themselves with which they may have lost touch.

In the second segment of the class, students were assisted in conducting career exploration. A career research module was added this year which included a tour of the Valencia career development center. The center has extensive materials available for researching specific careers and training institutions. The instructor and the Valencia career counselor were available to assist students with questions and direction in an effort to help them in setting informed, appropriate training and educational goals.

Students received instruction on a variety of topics (See Appendix C-1). The modules included: Assertive Communication, Job Skills Activities, Application and Resume Writing, Interviewing Techniques, Dressing for the Interview, Decision Making, Goal Planning and Stress Management. This part of the course focused on the practical aspects of the program and built upon the self-awareness developed in the assessment portion.

Emphasis was placed on the job search, especially the interview experience. A "mock interview" was recorded on videotape. A professional interviewer from the business community conducted the interview. The tapes were reviewed by the class, and students offered support and constructive criticism to each other.
5) **To present nontraditional career exploration modules to 110 displaced homemakers.**

This module was developed through the NOTE project (Nontraditional Option in Training for Employment) and presented as a component of the two-week class/or workshop. Guest speakers from the Bureau of Apprenticeship were also added. The curriculum challenged thinking with regard to traditional roles of men and women in the work force, identified new career options and available vocational on-the-job training, and clarified positives and negatives in pursuing these new options (See Appendix H).

6) **To assist 110 displaced homemakers in setting career goals.**

Career goal setting was addressed as part of the classroom curriculum. It was a two-hour module which fell on the ninth day in order to take full advantage of all previous self-assessment and career/vocational/educational information.

Both long and short term goals were addressed and steps in achieving these goals identified. Time limits were set to encourage individuals in accomplishing these steps along with acknowledging obstacles and ways of overcoming them.

7 & 8) **To offer employment assistance to participants through intensive, or weekly job support group. To offer career and job retention counseling to participants during their first year of employment.**

This objective was met by coordination and linkage with the Job Internship Project, a sister vocational education program. A Job Bank was developed which served many students by providing initial employment opportunities. Referrals to the Job Bank were made by local employers who had openings in their companies. In addition, job development efforts uncovered positions which were not yet advertised. A weekly Job Club lent additional support and resources to displaced homemakers who needed more assistance in their job search.

After they became employed, the participants were eligible for placement in the Job Internship Project. This one-year internship assisted students who found employment in the private sector. A close alliance was developed between the college and employers. Students earned while they learned. During their internship, they received "on-the-job" counseling and monthly job retention information. This included modules on Advanced Assertive Communication, Career Advancement, as well as Stress and Conflict Management (See Appendix D-6). The internship counselor kept in touch with the employer and employee during this first year on the job. Periodic evaluations were received from the employers. These assisted the students in retaining their jobs and advancing in their careers. Students received a certificate of completion following their internship.

In addition to the structured modules, outreach seminars, and Job Club, coordination with the H.R.S. Displaced Homemaker program allowed students access to additional programs (See Appendices D-1 and D-5). Such programs include Legal Information for Women, Medical Information for Women, Financial Information, Substance Abuse, and Social Services.
Displaced homemakers had a variety of needs that were addressed. Referrals were given when a participant was in need of specialized services beyond college resources. During this grant year, referrals were made to community and governmental agencies. Some included Job Service of Florida, Florida Department of Health and Rehabilitative Services, Private Industry Council, JTPA, Spouse Abuse, Legal Aid, We Care, and Orange County Mental Health.

In cooperation with the University of South Florida, the program's demographic data collection procedures were implemented to more accurately report participant information. Data was collected, assembled, and formally reported to the University as part of a national pilot program (See Appendix A-1). This volunteer joint effort not only provided information for further study, it assisted in establishing ways to better serve students.

Staff recruited volunteers to promote the program and assist paid personnel in providing client services. Over 250 volunteer hours were logged this year in the form of guest speakers, masters level interns, counselors, interviewers, group facilitators and community liaisons.

This year, the advisory board played a significant role in assisting with increased emphasis on recruiting displaced homemakers and single parents.

The project's advisory board, The Council for Continuing Education for Women (CCEW), was composed of community leaders from throughout the Central Florida area. Officers of the board were:

President: Beatrice Ettinger
Vice President: Alice MacMahon
Secretary: Diane Brown
Treasurer: Marilyn Crotty

Active members of the board included representatives from city governments, banking, Orange County Public Schools, Walt Disney World, prominent members of the minority community, as well as women business owners.

Valencia Community College and the Council for Continuing Education for Women provide staff and funds to ensure the project's success and to continue services for a period of time in the event of an emergency.

Coordination

Displaced Homemakers have a variety of needs that must be addressed. Referrals are given when a participant is in need of specialized services beyond our resources.
- **Valencia Community College**

Valencia provided a full-time staff psychologist for counseling purposes. The college provided vocational assessment instruments as well as vocational/educational information and career counseling in the Career Resource Centers on East and West Campuses.

Valencia provided administrative leadership.

Valencia provided consumables, offices, classrooms, staff for vocational placement and follow-up personnel as well as office support for a consultant (See Appendix I).

- **Council For Continuing Education For Women**

CCEW provided a 30-hour-a-week clerical support person to assist with clients' needs.

- **Governmental Agencies**

Project staff worked closely with Job Service of Florida and Florida Department of Health and Rehabilitative Services.

- **Community Organizations and Training Programs**

Job Training and Partnership Act

The Orlando Displaced Homemaker program cooperated with VCC and the Orlando business community in a JTPA Title III Dislocated Worker grant. CCEW provided confidence building, vocational assessment, employability skills training while Valencia offered classroom and on-the-job training (through local business) to participants in the areas of Horticulture, Hospitality and Office Skills. The local Private Industry Council determined client/student eligibility.
Results and Findings

The objectives of the project were:

1. To recruit 110 displaced homemakers for the program.
2. To target and conduct recruitment in two ethnic or minority communities.
3. To conduct outreach workshops in the two targeted communities.
4. To provide assessment and a structured, 66-hour employability skills course for 110 displaced homemaker students.
5. To present nontraditional career exploration modules to 110 displaced homemakers.
6. To assist 110 displaced homemaker students in setting career goals.
7. To offer employment assistance to participants through an intensive or weekly job support group.
8. To offer career and job retention counseling to participants during their first year of employment.

The statistical profile of those who attended the classes offered by the program is contained in Appendix A. Of the 210 participants, 119 or 57 percent were displaced homemakers or single parents. Fifty-two percent of program participants gained knowledge of the services available by newspaper or social service agencies. Of the 137 individuals who began the 66-hour employability skills course, 129 or 94 percent successfully completed the course, including modules on nontraditional careers and goals setting, employability skills and self-assessment (See Appendix A). Ninety percent were female, and 10 percent were male; of the total, 56 percent of participants were under age 35. The 44 percent who were over 55 included women who were displaced homemakers or whose marriage was in crisis and men who were chronically unemployed.

Obtaining job skills and subsequently entering the job market afforded these students independence and the assurance that they could support themselves and their families.

Sixty-six percent of the participants were female single heads of households, over 50 percent with children needing support. Nineteen percent were minorities and 81 percent were Caucasian. Many had few or no job skills, and little confidence. Sixty-seven percent had income below $10,000 per year and 51 percent had education at high school level or below.

Of those completing the two week course, 59 students (46 percent) were placed in jobs, and 21 students (16 percent) returned to school. Nine students were enrolled in vocational-technical degree-seeking programs at Valencia or Seminole Community College; 16 were enrolled in short-term certificated programs at Valencia. Of those 16, 15 completed the programs and were placed in jobs. Of the 59 job placements, 12 or 20 percent were placed in nontraditional jobs, including horticulture, security, and lab technology.

The 208 students who attended programs benefited from the group support and friendship. This bonding helped draw out some members and provided emotional support during the difficult time of transition. For many, the idea that they were not alone was a source of encouragement and motivation to move in a new direction.
Nine monthly one-day workshops were presented to individuals staying in the Spouse Abuse shelter and SMILE (Single Mothers In A Learning Environment) programs. The majority of these women were minorities with no source of income and young children to care for. The interviewing skills, job search techniques, value clarification, and goal setting were modules which presented concrete tools to help them move with confidence and hope toward self-sufficiency.

The experimental six-week evening class (See Appendix C-2) was successful and will be implemented again.

The Job Club provided ongoing support for the students who had not found employment during the 66-hour class. At weekly meetings, students were not only informed of new opportunities, but also helped to analyze the successes and failures they had experienced the previous week. In addition, the group support served as a needed motivator to continue their job hunt and interviewing activities.

Sixty-five students participated in the Job Internship Project. This year-long program provided support and education toward the goal of job advancement and retention (See Appendix D).

Thirty-one students requested and received individual counseling sessions beyond the intake and career counseling that was part of the structured class.

Through counseling, classroom activities, referral, and group support most of the students developed increased self-confidence in their abilities and were able to set goals. At least 88 percent of the participants set career employment and/or training goals by the end of the 66-hour course. The theme that was evident in all evaluation was a sense of self-confidence, direction and pride in accomplishment (See Appendix E).
Conclusions

The project was successful in meeting its eight formal grant objectives and in continuing to provide high quality service to displaced homemakers and single parents.

The emphasis needs to continue moving in the direction of linking career focus and direction, employability skills, and confidence building with high wage vocational training areas. Staff are currently moving to bring the program more on task; i.e., making more direct linkages with neighboring vocational schools. The advantage of having the job market survey that identified high wage jobs; employment projections for the area (in labor market or apprenticeship need); companies which provide on-the-job or apprenticeship training; and vocational programs which provide training programs related to their identified labor needs (See Appendix G), will strengthen the program in 1987-88.

The conclusions continue the trend from previous years; recommendations include areas that need to be addressed more fully. They are:

1. High wage vocational/nontraditional options are a viable means for moving displaced homemakers/single parents from low income, poverty level jobs to self-sufficiency.
2. In this population individuals need to improve their self-concept and gain confidence to risk changes.
3. Goal setting is necessary to help motivate and guide these individuals to make changes.
4. Employability skills training for displaced homemakers who have been out of the job market is necessary to assist them in obtaining placement after training.
5. Continued support services are necessary to encourage individuals in moving toward their goals and to assist with job retention and progression.
6. A strong community network of referral linkages is an important component of the program.
Recomendations for Improved Services

1. Continued focus and emphasis toward linking our participants with high wage vocational technical programs in an effort to bring our program more on task.
2. Additional refinement automation of data collection and summation procedures.
3. Continued advocacy for child care, transportation, and tuition funds for participants.
4. Scheduling additional evening classes for participants who are currently working survival jobs.
5. Increased use of volunteers to continue providing quality service and enlarge the scope of what can be done.
6. Increased employer contacts to open more doors for program participants.
7. Additional speakers from the local business community provide creditable, current information.
8. Entrepreneurship and nontraditional employment goal exploration should continue to be encouraged.
9. Need to further identify more high wage jobs and companies which provide on-the-job training.
10. Continued counseling support for individuals who need additional career or personal counseling sessions.
11. Improved recruitment efforts in reaching displaced homemakers.

RE: Job Search Seminar

Valencia Community College's Center for Continuing Education for Women, is offering a 60-hr. job search training course for men or women who are unemployed or underemployed. The course provides:

- Self-assessment and career exploration.
- Resume writing, including a personalized, printed resume.
- Job application techniques.
- Job interview techniques.
- Effective communication skills.
- Job placement information.
- Follow-up assistance during the first year of employment.

This program will take place once a month, and a schedule of classes is enclosed for your convenience.

The course will take place at the Displaced Homemaker Center, 423 East Pine Street, Orlando. To sign up any referrals for the course, call Valencia Community College for Continuing Education for Women, at 299-5000, extension 3200, 843-4260, or 422-7534.

MEMORANDUM

May 20, 1987

TO: Lucy Boudet-Clary
FROM: Sheri Murphy
RE: News for Immediate Release

The following news item is available for immediate release to the media and newspaper:

The Center for Continuing Education for Women at Valencia Community College is offering a 66 hr. Job Search course. The program is designed for those under 35 who are separated, widowed, divorced or single parents. Others interested in attending are welcome on a space available basis.

The program will focus on self-assessment, career exploration, and employability skills. Job placement assistance, as well as a one year job internship follow-up program are included.

The class begins June 8, running through June 19 daily from 9:00 a.m. to 3:00 p.m., Monday through Friday.

To sign up call Valencia Community College North Center at 628-1976.
SOAR INTO A GREAT FUTURE

The opportunity you have waited for is about to start!
We have reserved a space for you in the next JOB SEARCH class.
This employability skills training will provide you with:
- IDEAS FOR CAREER DIRECTION
- ASSISTANCE IN WRITING YOUR RESUME
- TECHNIQUES FOR JOB INTERVIEWING.
- CLARIFICATION OF WORK VALUES

Call 628-1976 to confirm your reservation.
Enrollment will be limited!
AN INTAKE APPOINTMENT IS REQUIRED.
Class is held at: 1010 Galloway Dr.
Winter Park, FL 32789

Intake appointments
February 26 or 27
Starts at 9:00 a.m.
finished approx. 12:00 p.m
First day of class begins
Mon. March 2nd 9:00-3:00
Class meets daily 9:00-3:00
March 2, 3, 4, 5, 6, 9, 10, 11, 12, 13
April 28, 1987

We want to personally invite you to take part in our next job skills seminar from May 11 to May 22. We have your name in our file, but if you would like to sign up for the course, please let us know by phone, *626-1976 so we can sign you up for an intake appointment on May 7 or 8th.

The course will spend a few days on personality and career assessment, with both long and short term career planning. We help you write your resume and then have it printed for you. We will help you rehearse for the job interview and also spend time talking about effective communication. Job placement assistance is also provided. The job internship is the final part of our program and consists of a one-year follow up from our staff in case you have questions or problems with the new job.

So, if you are unemployed, underemployed, are thinking about a career change or re-entering the job market, give us a call. Take two weeks to think about yourself and your future. Feel free to give us a call if you have and questions.

Looking forward to meeting you.

Sincerely,

Sheri Murphy

P.S. Our next class begins June 8th. Orientation will be held on 4th and 5th of June.
ARE YOU A SINGLE HEAD OF HOUSEHOLD?

UNDEREMPLOYED, UNEMPLOYED, OR CHANGING CAREERS?

A program is being offered to assist you with career focus, direction and employability skills.

The two week class is offered once a month and held Monday through Friday from 9:00 to 3:00 P.M. at the Valencia North Center 1010 N. Orlando Avenue, Winter Park.

This program is especially designed for single parents and under 35 separated, widowed, or divorced persons. Others who are interested will be accepted on a space available basis.

THE TWO WEEK JOB SEARCH COURSE INCLUDES:

- SELF ASSESSMENT
- SELF ESTEEM BUILDING
- CAREER EXPLORATION
- RESUMES AND JOB APPLICATIONS
- INTERVIEWING TECHNIQUES
- EFFECTIVE COMMUNICATIONS
- COMMUNITY INFORMATION
- JOB SEARCH ASSISTANCE
- JOB RETENTION INFORMATION

FOR FURTHER INFORMATION ABOUT THE NEXT JOB SEARCH CLASS CALL 628-1976.

Class: September 18-24
Orientation to Job Club: 9-30
Job Club: Every Tuesday, 9:00 - 11:00

Class #36
Intake and Assessment: October 17 and 18
Class: October 20 - 31
Orientation to Job Club: November 3
Job Club: Every Tuesday, 9 - 11:00 a.m.

Class #37
Intake and Assessment: November 7 and 8
Class: November 10 - 21
Orientation to Job Club: November 25
Job Club: Every Wednesday, 9 - 11:00 a.m.

Class #38
Intake and Assessment: December 12-16
Class: January 1-8
Orientation to Job Club:
Job Club: Every Wednesday, 9 - 11:00 a.m.

Class #39
Intake and Assessment: February 6 and 7
Class: February 9 - 20
Orientation to Job Club: February 25
Job Club: Every Wednesday, 9 - 11:00 a.m.

Class #40
Intake and Assessment: February 26
Class: February 26 - April 6
Evening Class
Job Club: April 16

Class #41
Intake and Assessment: April 17 and 18
Class: April 20 - May 1
Job Club: May 6, Every Wednesday, 9 - 11:00 a.m.
Class #42
Intake and Assessment: May 7 and 8
Class: May 11 - May 22
Job Club: May 27, Every Wednesday, 9 - 11:00 a.m.

Class #43
Intake and Assessment: June 4 and 5
Class: June 8 - 19
Job Club: June 24, Every Wednesday, 9 - 11:00 a.m.

Job Club held Tuesday at Pine Street Center, 9 - 11:00 a.m.
Wednesday at the North Center, 9 - 11:00 a.m.
MEMORANDUM

TO: Carla and Sheri
FROM: Ginny

SPOUSE ABUSE PROGRAMS

July 1, 1986 - June 30, 1987

7/9/86
8/13/86
9/10/86

MAY AT THE ORLANDO DISPLACED HOMEMAKER PROGRAM

423 E. PINE STREET, ORLANDO, FLORIDA 32801
422-7534 or 843-2388

MONDAY, MAY 11th
7:00 - 9:30 p.m.

STRESS MANAGEMENT

Topics to be covered will be:

1. Stress and Grief - and how to deal with it.
2. The Turnaround - how to develop momentum in management of personal stress. Learn your individual rhythm.

This stress management program will provide a time to learn and a time to share.

Presenter: Ginny Stuart

* * * * *

MONDAY, MAY 18th
1:15 - 3:15 p.m.

MEET THE TEMPS

Temporary employment services representatives will present their specific opportunities to all who attend this special program. Come and be informed of the many job openings available. You can work around your special needs in many different jobs. Plan to attend if you aren't employed.

Temporary service representatives from ADIA, Healthforce, Personnel Pool and Today's Temporaries

* * * * *

TUESDAYS, MAY 19th and 26th
7:00 - 9:30 p.m.

BOOSTING YOUR SELF-ESTEEM
OR LIKING YOURSELF MORE

This two-part esteem building workshop will help you to understand and improve the way you feel and think about yourself. Activities involving group participation will be the focus of the sessions.

Come and learn some skills that can help you appreciate yourself!

Presenter: [Name]

3. Please suggest additional ideas or information which you think would be helpful to include in the two-week program:

4. Other comments:
I really enjoyed the whole class. I can't think of any big changes I would have. It was very helpful to me and I feel it was instrumental in my making many changes in my personal life. Sheri is a great instructor - it is so clear you care very much about us.

Other comments: I'm very sorry it is over! I will definitely recommend such a program.

4. Other comments:

The class was so beneficial. I was very energized and felt totally rejuvenated. Now I feel the will to forge on and have more self-assurance.

This class should be advertised more widely.

Other comments:

Thank you all for helping me find myself. I know I will succeed with your help. God Bless you!

Audra Suarez
I was very impressed by what was offered. I was able to refer those who have the time in their direction. Very supportive. Very helpful. Very in formation.

PLEASE LIST WAYS IN WHICH YOUR IDEAS, ATTITUDES, SKILLS, ACTIONS HAVE CHANGED AS THE RESULT OF YOUR PARTICIPATION IN THIS COURSE:

more confident when looking for a job the course has helped

I feel like I understand the world of working people. Now I also can feel out a application in full detail.

PLEASE LIST WAYS IN WHICH YOUR IDEAS, ATTITUDES, SKILLS, ACTIONS HAVE CHANGED AS THE RESULT OF YOUR PARTICIPATION IN THIS COURSE:

Have a more positive attitude. Feel I will be able to make it own on my own. I believe I can find a job when I go back home.
Other comments:

The course was very helpful to me in the realm of motivation, focusing and goal setting. I really appreciate the time you spent for understanding the program. The staff did an outstanding job making students feel very secure, comfortable, and self-confident.

I hope my thoughts will be valuable for you. I also type as I think so if something is unclear, I apologize. I really thank you so much for all the effort and time that has been put into this class for me personally and the hundreds of people who have come before me and will come after me. I was so confused as to what to do with the rest of my life. I really don't know if I would have ever got back on track if it had not been for this class. Sheri Murphy was a wonderful facilitator. I have great respect for her and what she is giving to this community. I only hope once I am done completing my education to prepare me for the future I will be able to give back to the people of Orlando ½ of what she is giving right now. I look forward to volunteering at the DHC anyway I can to repay you for what you have given me.
VALENCIA COMMUNITY COLLEGE
OPEN CAMPUS
JOB DESCRIPTION

POSITION TITLE: Project Assistant - Orlando Displaced Homemaker Program

DUTIES:

1. Establish linkages with vocational-technical schools, colleges and universities, and employment-related agencies.

2. Survey vocational education training programs.

3. Identify high wage jobs and employment projections for the tri-county area.

4. Identify companies that provide on-the-job or apprenticeship training.

5. Report demographics of students enrolled in Valencia's A.S. degree programs.
IDENTIFICATION OF HIGH WAGE JOBS

AND

ASSOCIATED TRAINING PROGRAMS

IN

ORANGE & OSCEOLA COUNTIES, FLORIDA

(REGION 19)
INTRODUCTION

The decade of the 1980's has brought great change to the state and, in particular, to the Central area. According to the Florida Trend Yearbook 1987, "Florida's staggering growth over the past few years has seemed like a marathon. While most regions of Florida have paced themselves, Central Florida has been running toward the finish line at breakneck speed." This rapid growth trend is particularly visible in population growth, employment levels and economic development. "From 1981 to 1986, Central Florida's population soared 23.6%." "Central Florida's population growth strongly outpaced the statewide rate between 1981 and 1986. Osceola County had the region's biggest increase in population, 49.2%." The rate of population growth in Orange County was a healthy 20.0%.

Employment levels blossomed in 1986 when over 32,000 new jobs were created in the tri-county, Orange-Osceola-Seminole, area. "Employment growth is projected to be solid in 1987, although not quite matching 1986 levels. Orlando ranks 13th in annual employment growth throughout the nation." "The number of people employed (in Central Florida in) 1986 was up 9.4% over 1985." The unemployment rates in Orange and Osceola Counties were 5.1% and 5.3% respectively in September, 1986.

Economic development has paralleled population growth and employment level increase in Central Florida, especially in Orange and Osceola Counties. "Overall, tourism traffic has increased 10% in Central Florida. Feeding off the tourist traffic is the region's retail sector. Sales in the Orlando area up 17% over 1985..." Following the influx of tourists are many new corporations. "In 1986, Orange and Seminole Counties had more than 80 corporation relocations or expansions." In addition to tourism and retail growth, Orange and Osceola Counties show increases in high tech and electronics businesses in both the research and manufacturing areas. Commercial construction has also been strong but is
expected to slow in 1987. Residential construction, particularly single-family homes should do well because of continued low mortgage rates and strong population growth.

From this brief look at the Central Florida economic picture, it is clear that a broad variety of jobs exist in the area along with a population of potential workers to fill the vacancies. The gap between the supply of jobs and the demand for workers can be bridged by adequate training of the labor force to fill the empty jobs.

In an effort to assure the economic success of workers, it is desirable to identify the high wage jobs available in Central Florida, especially by Orange and Osceola Counties (Region 19) that are served by Valencia Community College. Training programs for these higher paying jobs can then be identified. This information has two important uses. First, it makes it possible to refer clients seeking training for employment to programs that will prepare them for a position with some assurance of future economic success. Second, it reveals gaps in the local training opportunities for these higher paying jobs. This information can be used for planning of new programs to fill the gaps.

METHODOLOGY AND RESULTS

To identify the average wage earned by workers employed in all job categories in Orange and Osceola Counties, the current (May 4, 1987) Supply and Demand Listing was obtained from the Labor Market Information Coordination Committee, Occupational Information System In Tallahassee. This information, also referred to FLOIS (Florida Labor Occupational Information System) data, includes the total projected openings for 1989 and 1994, the average current wage and the total potential supply of workers based on current enrollments in public and private training programs. It should be noted that demand is based on vacancies created by death, retirement and expansion and does not include those
created by turnover. Further, the wage figures included in the FLOIS data are the average earned by all workers for each job title and do not represent the entry level wage.

The Supply and Demand Listing was reviewed to identify appropriate entries to be included in the calculation of the average wage figure. The following items were omitted from consideration:

1. duplicate listings of job titles
2. job titles for which the project average annual openings were zero or SUPPRESS (except in two instances were additional research indicated that such job titles should be included)
3. job titles for which at least a four year college degree is required.

These omissions left 439 different selected job titles for which there is a projected demand and which can be obtained with less training that a four year college degree. The individual wage information for these 439 job titles was then totaled and divided by the total number of jobs to give an average wage of $5.41 per hour. All 439 job titles were given equal weight in calculation with no consideration given to the comparative projected demand for each job. That is, the wage for job titles with a project demand of one employee per year were included once in the total as was the wage for job titles with a projected demand of 100 employees per year. The calculation of the average wage is further described in TABLE 1.

To determine those selected job titles which would be considered higher paying jobs, a second value was calculated which is 10% higher than the average wage. This is the average higher paying wage for selected job titles and is $5.95 per hour. The calculation of the average higher paying wage is further described in TABLE 2.
The average higher paying wage was then compared to the FLOIS data for each of the selected 439 job titles and a list of 128 job titles with wage values greater than or equal to the average higher paying wage of $5.95 were compiled. These 128 job titles are the higher paying jobs which can be obtained without a four year college degree, for which there is a projected demand in Orange and Osceola Counties and for which the average wage is at least 10% higher than the average wage for all workers in the selected job titles. These job titles and wages figures are listed in TABLE 3.

Public and private training programs were then identified for the 128 higher paying job titles. The types of training include certificate programs, Associate of Science program, apprenticeships and on-the-job training. When no local training programs exist for a job title, this was also noted. The entry requirements, duration and cost were also identified for each program. Sample entry requirements for various programs may include a high school diploma or GED, entrance exam, demonstration of physical ability and/or an interview. The programs range in duration from 6 weeks to 6 years. The costs of the various training programs may include tuition, books, enrollment fee, tools, and/or materials. Some of the training programs are paid for by employers or are provided by the employer at no cost to the employee. Some training programs allow an employee to earn a wage during both the classroom and field portions of training. In addition, funding for classroom training for economically qualified students at vocational schools can be provided by the Private Industry Council. Many of the training programs are accredited and make students eligible to receive financial aid in the form of Pell Grants and Guaranteed Student Loans. There are two kinds of apprenticeship programs included - those offered by union organizations and those offered by non-union organizations. The union apprenticeship programs may also include the cost of the union dues that range from $0 to $300 per year depending on the union and the training program. A listing of the training program providers is contained in TABLE 4.
A card file was prepared by job title according to the order established in Table 3. It lists the job title, wage, training program provider, duration of the program, entry requirements and cost. The training program providers include public institutions, private institutions, trade organizations and private businesses which conduct classroom training or on-the-job training. In addition to the private on-the-job training opportunities listed in this report, the Private Industry Council maintains a revolving list of more than 250 employers which provide on-the-job training with funding from the PIC for economically qualified employees. In preparation of the card file, when more than one training program is available for the job title, the information for each program is listed on a separate card.

In the course of this research, three pre-employment or pre-training programs were identified. The purpose of these programs is to help the client identify the career area for which she or he is best suited and to provide background in employability skills to help assure successful completion of training and maintenance of a job. These programs include:

1. Center for Continuing Education for Women at Valencia Community College
2. HRS' Displaced Homemakers Program, 423 East Pine Street, Orlando, Florida
3. JOBS – Job Opportunities Basic Skills, McCoy AFB 8434 Avenue C, Orlando, Florida 32812

SUMMARY

The 128 jobs paying a wage 10% higher than the average wage were identified from FLOIS data. A listing of training programs in Orange and Osceola Counties for these higher paying jobs was then compiled. The listing includes the program provider, the duration of the training program, the entry requirements and the cost of the training.

3. Ibid., page 102
6. Ibid., page 98
7. Ibid.
OBJECTIVES:
At the conclusion of this module, each participant will be able to:

1. Identify the advantages of non-traditional occupations.
2. List the disadvantages of nontraditional careers.
3. Determine which factors are most important to her/him in making a career choice.

TIME FRAME:
At least 15 minutes.

MATERIALS:
Chalkboard, whiteboard or flip chart
Handout: "Pro's and Con's of Nontraditional Careers"
Pencils or Pens

STEPS:
1. Introduce the module by discussing the fact that all careers have some advantages and disadvantages. Making an informed career choice depends on knowing both the pro's and con's of a specific occupation.
2. Brainstorm advantages and disadvantages of nontraditional careers. (It is anticipated that some prior discussion and identification of nontraditional occupations has taken place.)
3. Using the list generated, ask participants to note which items would personally make a difference to her/him if they were considering a nontraditional career. Additional discussion might include exploring which of the pro's might outweigh the negative factors in their own decision-making.

EVALUATION:
1. Completion of the brainstorming with a list of pro's and con's.
2. Each participant will have a personalized list noting which factors are most important to her/him.
PRO'S AND CON'S OF NONTRADITIONAL CAREERS
