A project was conducted to accomplish the following: (1) to enhance the existing career resources in the career center at Northside Junior High School (Virginia) by purchasing computer programs appropriate for all segments of the middle school population; (2) to make the career center resources available to regional school systems or other visiting school systems for the examination and evaluation of materials, for inservice programs, and for assistance in program design; and (3) to evaluate the computer programs through counselor and student usage and to share the evaluations with interested educators across the state. During the project, the program administrators planned to purchase computer software appropriate for middle school students, to have counselors and students review the software, and to make the software and other career resources available to interested educators. As a result, 23 software programs, 5 sets of printed materials, and 2 videotapes were purchased, and 80 percent of the purchases were reviewed. Since the project was completed, one school system has visited the center, and two Virginia systems and two out-of-state systems have requested information. State conference workshops will be held in the career centers at a high school and a junior high, and evaluation of the software will continue. Recommendations were made to establish additional regional centers. (This project report includes the software evaluation form and a software catalog listing program names, descriptions, computer specifications, user levels, costs, sources, and source addresses.) (KC)
FINAL REPORT

IMPROVING VOCATIONAL GUIDANCE AND COUNSELING FOR MIDDLE SCHOOL STUDENTS BY ESTABLISHING A REGIONAL MIDDLE SCHOOL RESOURCE CENTER FOR SOUTHWEST VIRGINIA

VOCATIONAL GUIDANCE AND COUNSELING PROJECT - EXEMPLARY
VA -87-I-II3-GC-001

Conducted Under
Vocational Educational Amendments of 1976
Public Law 94-432

TITLE OF PROJECT: IMPROVING VOCATIONAL GUIDANCE AND COUNSELING FOR MIDDLE SCHOOL STUDENTS BY ESTABLISHING A REGIONAL MIDDLE SCHOOL RESOURCE CENTER FOR SOUTHWEST VIRGINIA

FUNDING PERIOD: August 1, 1986 to June 30, 1987

OBJECTIVES OF THE PROJECT:
1. To enhance the existing career resources in the career center at Northside Junior High School by purchasing computer programs appropriate for all segments of the middle school population.
2. To make the career center resources available to regional school systems or other visiting school systems for the examination and evaluation of materials, in-service programs and for assistance in program design.
3. To evaluate the computer programs through counselor and student usage and to share the evaluations with interested educators across the state.

PROCEDURES OF THE IMPLEMENTATION:
1. Purchase career software appropriate for middle school students.
2. Counselors and students review and evaluate the software.
3. Make software and other career resources available to interested educators.

RESULTS:
Twenty-three software programs, five sets of printed materials and two video tapes were purchased. Through career center and inservice counselors and students have previewed and evaluated 80% of the purchases.

EVALUATION:
One school system has visited the center. Two Virginia systems and two out-of-state systems have requested information. State Conference workshops will be held in the career centers at Northside High School and Northside Junior High School. Evaluation of the software will continue.

CONCLUSIONS AND RECOMMENDATIONS:
Based on the response to educators across the state, Regional Career Centers are a needed resource in the developing and updating of local career centers. We recommend the establishment of additional regional centers and that funds necessary for future maintenance be made available.
PROJECT NARRATIVE

PROJECT TITLE: IMPROVING VOCATIONAL GUIDANCE AND COUNSELING FOR MIDDLE SCHOOL STUDENTS BY ESTABLISHING A REGIONAL MIDDLE SCHOOL RESOURCE CENTER FOR SOUTHWEST VIRGINIA

STATEMENT OF THE PROBLEM:

Roanoke County School System has had a comprehensive, curriculum-infused career education program since the early seventies. The guidance services personnel have collaborated with the instructional staff (including handicapped and gifted) in developing career education experiences and activities for all students. As of this summer, these activities have been incorporated into the Standards of Learning Guidebooks for all subject areas.

Through a number of grants from Career Education and Vocational Guidance Funds, career centers have been operational for a number of years in our four high schools, five junior high schools, the alternative school and at the vocational center. The career centers are an integral part of the guidance and counseling program and they also serve as a resource to all teachers and students. Information about occupations, careers, training opportunities and further education is provided in printed form through an organized access system. Through Vocational Guidance grants in 1984 and 1985, microcomputers were installed in the secondary schools. In September 1986, the school system, under the auspices of the Roanoke Valley Career Education Consortium, purchased an IBM-XT microcomputer and printer and a comprehensive career information program, DISCOVER, for each career center.

The microcomputers proved to be a needed and beneficial addition to the career centers. Students were motivated to use independent self-assessment inventories and to explore job and educational requirements for a greater number of careers than could have been expected had printed resources been the sole
reference source. The microcomputer printer provided specific and personal feedback in a form that the student could use for class reporting, further exploration and for communicating with parents.

The introduction of the microcomputers also created an interest in the software market for guidance and counseling. Roanoke County Schools sponsored a class, EVALUATION OF GUIDANCE AND COUNSELING SOFTWARE, through University of Virginia for administrators and counselors in the Spring of 1986.

The problem encountered in our program is the selection of computer software. In implementing our vocational grants for 1985 and 1986, the evaluation of suitable software for selected schools evidenced the following problems:

1. the recent proliferation of career software
2. the necessity of ordering for preview on a purchase order
3. the varied quality of program content
4. the lack of user interaction in some programs
5. the length of time to complete some programs
6. errors in textual content of programs and in user manuals
7. program suitability for grade-levels and special populations
8. the amount of counselor time necessary to evaluate and student test the programs
9. limited budget for purchasing new material.

From participation in the presentations at the Project-Directors meetings and from discussions with educators from various school districts the writer feels the problem is shared throughout the Commonwealth.

To help alleviate the problem, Roanoke County Schools proposed to establish a regional middle school career resource center at Northside Junior High School. The regional center would
house a number of career resource materials including a large selection of appropriate software for previewing by interested educators in southwestern Virginia. The center would provide an expedient, efficient, and time-saving method of selecting the most accurate and applicable information necessary for students to make informed career decisions and curriculum choices.

PROJECT OBJECTIVES:

Objective 1 - To enhance the existing career resources in the career center at Northside Junior High School by purchasing computer programs appropriate for all segments of the middle school population.

Objective 2 - To make the career center resources available to regional school systems or other visiting school systems for the examination and evaluation of materials, in-service programs and for assistance in program design.

Objective 3 - To evaluate the computer programs through counselor and student usage and to share the evaluations with interested educators across the state.

PROCEDURES OF IMPLEMENTATION:

1. Project Design -

   Step 1. Purchase computer software appropriate for middle school students in the following areas with attention to selections for special needs and gifted and talented.

   a. Career information
   b. Self-assessment
   c. Curriculum planning
   d. Time management
   e. Study skills
   f. Vocational planning
   g. College planning

   Step 2. Throughout the school year counselors will evaluate the programs through Career Counseling meetings, inservice meeting and inschool activities. Students using the programs will also give an evaluation. Locally prepared evaluation forms will be designed.
1. Project Design (continued)

Step 3. The computer programs will be added to the existing resources in the career center at Northside Junior High School. A descriptive brochure of the resources and services available in the career center will be sent to guidance personnel in the Region Study Group No. VI.

Step 4. Counselors, career center assistants and administrators at Northside Junior High School will meet to plan for scheduling and managing the Regional Career Resource Center.

Step 5. The data will be compiled and distributed at the Project Directors Meeting and will also be available to users of the Regional Career Resource Center.

Step 6. School systems across the State will be made aware of the service through the Project Directors Meeting.

2. Target Population -

1. Middle School counselors or teachers in school systems in Region Study Group No. VI.

2. Visiting school personnel from other regions.

3. Results -

Twenty-three software programs, five sets of printed material and two video tapes were purchased. Through career center usage and inservice programs, counselors and students have previewed and evaluated 80% of the purchases. The evaluation is continuing. Four inservice programs for counselors have been held and vocational instructors are currently involved in examining the possibilities for infusing the new material into the classroom.

Since May, when the availability of the center was announced, one school system has sent personnel to visit, two school systems have called for information. Additionally, we have received requests from a private school in Connecticut and a public school in Arizona for career center information. Plans are being made to host several workshop programs in the
3. Results - (Continued)

Northside Junior High School Regional Resource Center as part of the State Career Education Conference in August 1987.

Two problems encountered in meeting the objectives of the grant were:

1. The billing system of a vendor had a lag of three months. A letter and four telephone calls to California secured an invoice which did not arrive in time for the funding deadline. Consequently, Roanoke County could not expend the full dollar amount of the grant.

2. Full evaluation of the software could not be fully completed due to a time factor. With rare exception, each program takes the equivalent of a class period or longer to run. There were twenty-three software packages and a number of these contained more than one program. We felt that more than one evaluation from counselors, teachers and students were needed for a fair assessment. The on-site coordinator previewed each package for operation and technical aspects and to determine if content was contrary to counselor ethics.

4. Evaluation -

Based on the results and plans to continue the project, the project was successful and will be a useful resource for local and area school systems.

5. Conclusion -

Current literature and the experiences of counselors across Virginia agree that career centers are an integral part of career education. The information contained in the center must be current and up-to-date. Limited budgets necessitates getting the best buy for the dollar; yet, the problems mentioned in the beginning of this report exist. Add to that the lack (and possibly the waste) of counselor time in evaluating the plethora of available software and the result is our current dilemma.

If several regional career centers could be established and funds made available as they were in this grant, then the compiled evaluations and accessible resources would greatly enhance the likelihood of stocking the most useful and suitable resources for our students.
5. **Conclusion - (Continued)**

Roanoke County Schools has submitted a grant proposal to continue the objectives of this grant. The Regional Career Resource Center and the counseling staff are prepared to serve as a resource for interested educators throughout the Commonwealth.
Dear Counselor:

Last year Roanoke County Public Schools was the recipient of a vocational guidance grant to establish a regional career resource center at Northside Junior High School. The objectives of the grant were:

1. To purchase and evaluate current career education software and
2. To share our career center with counselors and educators in Region Study Group VI.

In addition to the materials previously in the career center, we have purchased twenty-three computer programs, some new printed materials and several videos. We are continuing to evaluate them.

If you are in the process of setting up or improving your career center, you are welcome to visit us at Northside High School and/or Northside Junior High School.

If you are planning to purchase software, you may visit to preview the programs or call us about any questions you have. We will send you a descriptive list of what is available if you are interested.

The enclosed brochure lists the contacts for arranging a visit. You may write me to request a listing at A. R. Burton Voc-Tech.

We look forward to sharing our resources with you.

Our best wishes for the coming school year.

Sincerely,

Barbara D. Page
Career Counseling Coord.

ROANOKE COUNTY SCHOOLS 20 GUIDANCE SERVICES
PROGRAM NAME:

Newsroom

DESCRIPTION:

This program allows you to regularly distribute an attractive guidance newspaper informing your students of new job availabilities, visiting recruiters, guidance services, deadlines, resources, workshops, programs, and anything else newsworthy. This highly interactive package allows you to raise your department's visibility and keep students informed of the latest developments. You can quickly and efficiently produce a professional quality publication complete with artwork. In the "copy lab" you can select from up to five fonts to use with the built-in word processor. In the "photolab" you can select from 600 pieces of clip art, combine them, alter them, or create your own pictures. Using the "layout editor", you can position news items, announcements, and artwork as you wish.

PROGRAM NAME:

Blueprint for Decision Making

DESCRIPTION:

This activity uses examples of problems involving peers and parents. They are encouraged to ask for more information and consider consequences of alternate decisions. Also students make up their own problems and decide how to handle the situation. Goal is to learn how to make important decisions and approach these choice points with an improved attitude.

PROGRAM NAME:

Choices Jr.

DESCRIPTION:

This program introduces students to the processes of career exploration.

Appealing graphics, color, and sound guide students on a journey of exploration through the Universe of Career CHOICES to their final destination: the World of Work. The program introduces students to the processes of career exploration including the importance of self-assessment, how to use self-awareness to find alternatives in the world of work assessing career options on the basis of personal priorities, and expanding career horizons.

The system is entirely tutorial. Summary printouts are provided so students have a record of their experience to discuss with their teacher, counselor or parents.

COMPUTER SPECIFICATION:

Apple II+, IIe, IBM-PC

USER:

Fifth grade level and beyond, including basic vocational and special ed students at the secondary level.

COST:

$450.00

SOURCE:

Counseling Technologies
PROGRAM NAME:

Career Systems 2000

DESCRIPTION:

Provides detailed information on over 560 careers with the option of a screen or print-out presentation.

Career System 2000 is a computer reference data base of detailed career descriptions. Each of the over 560 occupations in the system gives information on the duties and working conditions of the career(s) selected; physical surroundings, physical demands, aptitudes, temperaments, educational requirements, interests, opportunities, earnings, outlook, where employed, and sources of additional information. Information can be accessed by title; DOT, SOC, or GOE codes; or cluster category.

COMPUTER SPECIFICATION:

Apple II, II+, and IIe with 48K memory, 1 or 2 disk drives, 3.3 DOS; printer optional.

USER:

Students in grade 7-12 and college, adults.

COST:

$220.00

Education Associates
PROGRAM NAME:
The Corporation Job Game

DESCRIPTION:
The object of this microcomputer simulation of corporate life is to teach job maintenance. Students learn how to keep their jobs and advance in the organization. They attempt to climb three career ladders within an imaginary company. Rungs in the career ladder represent problems that must be solved and conflicts that must be resolved. Three imaginary characters represent high demand career areas: sales/marketing, data processing/accounting, and engineering/production. Each character has 9 to 12 situations to master. Students will be awarded "powers points" based on their answers and "energy points" that will allow movement up the career ladder.

COMPUTER SPECIFICATION:
Apple II or IIe with 48K and DOS 3.3; TRS-80 Model III with 48K; IBM PC with 48K (disk drive required); IBM PC with 64K

USER:
Junior and Senior High School Students

COST:
$150.00 for four disks with User's Manual plus courseware Exercises

SOURCE:
Career Aids, Inc.
PROGRAM NAME:
Careers of the Future

DESCRIPTION:
A futuristic format introduces the student to the high demand careers that will emerge within the next 50 years.

With the microcomputer program, the student may access more than 200 High Demand Future Careers based on the latest research. This simulation game takes place in the year 2030 in which a computer bank matches a newborn's potential interests, values, and skills from genetic patterns with the perfect future career. Students will explore careers in space, energy, the ocean, robotics, and computer/information.

All five career areas are linked together with unique futuristic challenges. Starship invasions, assembling robots, maze survival, and cryptograms develop an awareness of the vast possibilities for future careers. A typical day in the year 2030 is also explored.

PROGRAM NAME:
The Military Career Sort

DESCRIPTION:
The program allows the user to explore military enlistment from a career decision-making viewpoint. Provides a convenient method for students to obtain information on military enlisted occupations in such areas as Business and Clerical; Electrical and Electronics; Health, Social and Technology; and Mechanical & Crafts. Evaluates student chances of entry into one of 134 occupational or training areas based on results of the Armed Services Vocational Aptitude Battery (ASVAB). Also provides student with individual descriptions on any enlisted occupation including information such as duty responsibilities, related high school courses; related civilian occupations arranged according to Worker Trait Groups; annual number of openings; length of training; type of advancement; and chances of qualifying based on ASVAB scores. The Basic Enlistment Facts section provides answers to frequently asked questions about enlistment. Finally, the system allows the student to print out a personalized planning guide.

Successful Job Interviewing

DESCRIPTION:
Your students can improve their job interviewing skills and better understand the interviewing process using this interactive program. Provides the student with tips on how to plan and implement a successful job interview. Specifically, it teaches students such things as proper dress, importance of being on time for interviews, acceptable behavior during the interview process, questions to expect and questions to ask, as well as the proper follow-up procedure. Interactive program containing creative graphics makes this program fun to use besides being highly educational.

COMPUTER SPECIFICATION:
Apple

USER:
Jr., Sr. High School
Reading level grades 3-4. Interest level grade 9 to adult.

COST:
$54.95

PROGRAM NAME:
The Right Job Application

DESCRIPTION:
This program explores the major components of the job application with the student completing real life applications taken from large and small companies. Major problem areas are identified with suggested solutions—listing type of work, academic level, salary expectations, reasons for leaving previous job, work experience and what to do with illegal questions. Tutorial presentation provides concept feedback. Structured inputs result in actual applications sent to the printer for class study.

Career Information Center - 3rd Edition

DESCRIPTION:

Twelve Volumes and Master Index -
The volumes contain over 600 occupational profiles in which nearly 3000 jobs are discussed. Each profile describes work characteristics, job entry, education and training requirements, advancement possibilities and employment outlook, earnings, and benefits.

Each volume has a section called "Getting into..." which contains useful information on entering the particular field. It offers self-evaluation and decision-making help; and it relates possible job choices to individual interests, abilities and work characteristics. There is also practical information on job hunting, on how to use classified ads, on how to prepare resumes and on how to handle interviews. New features have been added that offer tips on job-hunting techniques such as networking, and provide helpful checklists.

The volumes are:

Vol. 1 - Administration, Business, and Office
Vol. 2 - Agribusiness, Environment, and Natural Resources
Vol. 3 - Communications and the Arts
Vol. 4 - Construction
Vol. 5 - Consumer, Homemaking, and Personal Services
Vol. 6 - Engineering, Science, and Technology
Vol. 7 - Health
Vol. 8 - Hospitality and Recreation
Vol. 9 - Manufacturing
Vol. 10 - Marketing and Distribution
Vol. 11 - Public and Community Services
Vol. 12 - Transportation
PLUS A separate, comprehensive, master index

STUDY SKILLS: WHO NEEDS THEM?
Levels 7 - 12

BICEP's career education program now offers a new curriculum. Focusing on the teaching of study skills and career/life skills, this 400 page resource provides teachers and counselors with a ready-to-use resource for both middle school/junior high and high school students. Personal assessment, motivation, home, oral communication, listening skills, organizing information, note taking, research, and viewing skills are included in a series of instructional Activities that can be easily integrated into the existing curriculum.

Every middle school and secondary educator as well as counselors, career education coordinators, and special needs instructors needs this book. Now available from BICEP for $25.00 plus 10% for shipping and handling.

STUDY SKILLS: WHO NEEDS THEM?
Levels K - 6

BICEP's career education program now offers a new elementary curriculum guide. Focusing on the teaching of study skills and career/life skills, this 385 page resource also provides teachers and counselors with a ready-to-use resource that integrates career awareness goals into the academic program through the teaching of study skills. Using the format of all other BICEP publications, topics such as motivation, oral communication, listening, organizing information, note taking, research, and viewing skills are introduced to the elementary student.

Both study skills/career education curriculum documents were developed in conjunction with educators from the North Olmsted, Ohio City Schools and their comprehensive career education program.

Now available from BICEP for $25.00 plus 10% for shipping and handling.

Counselors are spokespersons for learning, career development, personal evaluation, and growth. Growth implies change; and in this age of technology, change is coming in the form of the computer. In order to keep counselors, administrators, and guidance personnel informed of the latest software available in their fields, the Santa Clara County Office of Education announces the publication of the 1998 edition of the

GUIDANCE AND COUNSELING DIRECTORY
OF
MICROCOMPUTER SOFTWARE

The three volume set contains the very latest in guidance and administrative software. Over 250 programs in the areas of Jobs/College, Personal Counseling, and Administrative Systems/Programs are covered. Programs are described, the necessary hardware is listed, development date, cost, and intended users are mentioned, and ordering information is given.

Volume I - The Job/College Directory covers the areas of career/job exploration, job search, job success skills, college entrance exams and helps, and college financial aid. Contains invaluable material to use with both career/minded and college/minded students. COST: $9.00 + tax

Examples of programs included are:

- Peterson's Career Planning Service
- Job Search
- Exploring Your Future
- Living With Your Paycheck
- College Search
- Preparing for the SAT
- Financial Aid Scan
- Preparing for the Aptitude Tests

Volume II - The Counseling Directory covers personal programs such as self understanding, stress management, self management skills, and mental and physical health. Describes many new and innovative approaches for counselors. COST: $7.00 + tax

Examples of programs included are:

- If You Drink
- Eating Disorder Inventory
- Motivation: Go For It
- Stress Management
- Decision Making and Problem Solving
- Motivating Teenagers for Decision Making

Volume III - The Administrative Systems/Programs Directory covers systems/programs that deal with scheduling, transcripts, attendance, reporting, grading, and finances. A must for schools that are "going computer." COST: $7.00 + tax

Examples of programs included are:

- Counselor Genie
- Gradebook Plus
- Student Management System
- Attendance Manager
- Academic Progress Report
- Computerized Transcripts

Total Package Price: $23.00 + tax. Save $3.00 by ordering all three volumes at once. Discounted Three Volume Price: $20.00 + tax.

Thomas L. Goodman, Superintendent
PROGRAM NAME:

Paving the Way (Video)

DESCRIPTION:

Video shows parents how to plan ahead for their children's college education. It is especially suited for parents with children in the junior high and middle school years. It helps them focus their efforts on their children's educational goals and helps them understand the need for advance planning - financial and scholastic.

Five animated characters - parent, school counselor, college financial and administrator, college admissions officer and recent college graduate - answer questions at a meeting with actual parents. They tell how to get into college and how to pay for it.

SPECIFICATIONS:

Videotape - 3/4" U-Matic, 1/2" VHS, 1/2" Beta
Film - 16 mm

USER:

Parents, PTA, Counselors

COST:

$49.00 Video purchase; $15.00 Video rental
$118.00 Film purchase; $30.00 Film rental

VIDEO CASSETTE NAME:
The 4 Stages of Interviewing

DESCRIPTION:
Students learn each of the four stages of interviewing and how to be prepared to deal with the issues and questions unique to each stage. This program begins with The Worst Interview in History, a tongue-in-cheek illustration of everything that can go wrong in an interview. The video goes on to cover the Reception, Interrogation, Your-Turn, and Leave-Taking stages in clear, understandable terms. "Do's" and "Don'ts" are covered for each stage and tips are given on how to conduct yourself. This video presents clear explanations on how to anticipate and deal with likely questions. The program also covers follow-up actions to take after the interview is complete.
