The All Day Kindergarten (ADK) Program of the Columbus (Ohio) Public Schools was established to provide a full day of instruction for underachieving kindergarten pupils. The program concentrated on preparing pupils for successful learning experiences in first grade by providing them an extra half day of instruction. The program served 571 children, with 18 teachers providing daily instruction for two groups of students in 18 Chapter 1 eligible elementary schools. Groups were limited to 15 pupils, and instruction time was 13.3 hours weekly. The All Day Kindergarten Program functioned during the 1986-1987 school year for 130 hours of instruction, with emphasis on activities that would increase language and reading development and enhance those skills needed for success in first grade. For program evaluation purposes, pretests and posttests were administered to 396 students (who met the 80% attendance requirement; 379 students were present for both tests. The Normal Curve Equivalent (NCE) gain for these students was 3.0 points for each month of treatment—greatly exceeding the criterion of 1.0 NCE point that was the original program goal. Results suggest the efficacy of the All Day Kindergarten Program. Based on the evaluation results, a continuation of the program was recommended for the following school year. (A teacher census form, an inservice evaluation form, and a Chapter 1 parent involvement survey form are appended.) (NKA)

ABSTRACT

Program Description: The All Day Kindergarten (ADK) Program served 571 pupils. Funding of the program was made available through the Education Consolidation and Improvement Act - Chapter 1 of 1981.

The purpose of the Columbus Public Schools in planning the ADK Program was to provide a full day of instruction for underachieving kindergarten pupils. The overall goal of the program was to prepare pupils for first grade. The program provided pupils with an extra half day of instruction in addition to the half day of instruction provided in the regular kindergarten classroom. The program operated on the philosophy that the additional help and attention provided by the program would better prepare underachieving kindergarten pupils for successful learning experiences in first grade.

To reach the 1986-87 program goal, 18 program teachers served in 18 Chapter 1 eligible elementary schools. Each All Day Kindergarten teacher provided daily instruction for two groups of pupils. Groups were limited to 15 pupils each, for approximately 13.3 hours each week.

TimeInterval: For evaluation purposes, the All Day Kindergarten Program started on September 15, 1986 and continued through April 13, 1987. This interval of time gave 130 days of program instruction. Pupils included in the final pretest-posttest analysis must have attended at least 104 days (80%) during the time period stated above.

Activities: Implementation of the program was accomplished through daily instructional activities to strengthen and extend regular classroom instruction without pursuing the basic reading readiness textbooks. Emphasis was placed on activities which would increase language development and enhance those skills needed to be successful in first grade.

Achievement Objective: The average language/reading growth of pupils in program attendance for at least 80% of the instructional period will be 1.0 Normal Curve Equivalent (NCE) point for each month of instruction as determined by a nationally standardized achievement test appropriate to program content.

Evaluation Design: The major evaluation effort was accomplished through the administration of the Oral Comprehension Test, Form U, Level A, of the Comprehensive Tests of Basic Skills (CTBS). Analyses of the data included comparison between pretest and posttest change scores in terms of raw scores, grade equivalents, percentiles, and NCE's.

Major Findings/Recommendations: The information collected on the Pupil Census Forms indicated that the program served 571 pupils for an average of 13.3 hours of instruction per week. The average daily membership in the program was 507.2 pupils. The average days of enrollment per pupil was 109.0 days and the average attendance per pupil was 97.8 days. The average number of pupils served per teacher was 31.7.
The attendance criterion was met by 396 pupils, which was 69.4% of the 571 pupils served. Of these, 379 received both administrations of the achievement test.

The overall NCE gain for the program averaged 21.2 NCE points for the seven month treatment or 3.0 NCE points for each month of treatment. The evaluation objective set a goal of 1.0 NCE point for each month of treatment. Thus, the evaluation objective was met with the average change of 3.0 NCE points for each month of treatment, greatly exceeding the criterion of 1.0 NCE point for each month of treatment.

The analyses of monthly parent involvement indicated the greatest amount of parent involvement occurred in September, with a total of 614 parent hours. The least amount of parent involvement occurred in April, with a total of 70.5 parent hours reported. An unduplicated count of an estimated 650 parents were directly involved with the program. Areas of parent involvement included: (a) planning operation, and/or evaluation; (b) group meetings; (c) individual conferences; (d) classroom visits and field trips; and (e) visits by the program teacher to their homes.

Program teachers attended one inservice meeting during the school year. The meeting which was evaluated received positive ratings by program teachers.

The program evaluator collected process data by visiting some project schools. The visitation plan called for the program evaluator to visit program teachers in selected schools and record the results of the evaluator's observations and interviews with the teacher on the Evaluator's Visitation Log. Visitation occurred during the period from March 5 to March 17, 1987. Data gathered regarding evaluation and program concerns were generally found to be satisfactory. All teachers interviewed (4) indicated that the level of communication with cooperating teachers was very good. Coordinating instruction of the reading program was rated as very important and generally occurred on an informal basis. However, three (75%) of the program teachers rated the degree of parent response, to efforts at parent involvement, as very poor. Some concerns were expressed regarding the pupil selection process and testing procedures.

Based on the evaluation results, it is strongly recommended that the All Day Kindergarten program be continued in the 1987-88 school year. It is also recommended that school visitations be continued next year. These visits provide useful information regarding evaluation concerns and program needs; they can be of considerable value in assisting and continuing to monitor the utilization of the test series that was implemented during the 1984-85 school year.
The All Day Kindergarten Program was instituted in the Columbus Public Schools in January, 1982, for the purpose of providing a full day of instruction for underachieving kindergarten pupils. The overall goal of the program is to prepare pupils for first grade. The program provides pupils with an extra half day of instruction in addition to the half day of instruction provided in the regular kindergarten classroom. The program operates on the philosophy that the additional help and attention provided by the program will better prepare underachieving kindergarten pupils for successful learning experiences in first grade.

To reach the 1986-87 program goal, 18 program teachers served in 18 Chapter 1 eligible elementary schools. The schools are listed below.

- Broadleigh
- Cassady
- Dana
- East Columbus
- Fair
- Fairwood
- Kent
- Lincoln Park
- Linden
- Livingston
- Main
- Ohio
- Reeb
- Second Ave.
- Sullivant
- Trevitt
- West Broad
- Windsor

Each All Day Kindergarten teacher provided daily instruction for two groups of pupils. Groups were limited to 15 pupils each.

The average language/reading growth of pupils in program attendance for at least 80% of the instructional period will be 1.0 NCE point for each month of instruction as determined by a nationally standardized achievement test appropriate to program content.

For evaluation purposes, the All Day Kindergarten Program started on September 15, 1986 and continued through April 3, 1987. This interval of time gave 130 days of program instruction. Pupils included in the final pretest-posttest analysis must have attended at least 104 days (80%) during the time period stated above.
Evaluation Design

The evaluation design for the All Day Kindergarten program called for the collection of data in five areas. A copy of each instrument is found in the Appendix, with the exception of the standardized achievement test.

1. ECIA Chapter 1 Pupil Census Information

A Pupil Census Form was completed by program teachers for each pupil served to provide the following information: days of program enrollment, days of program attendance, and hours of instruction per week. The form also includes information on the pupil's grade and sex. Collection of these forms was completed in May, 1987.

2. Standardized Achievement Test Information

The instrument used to assess pupil progress in language was the Oral Comprehension Test (Form U, Level A) of the Comprehensive Tests of Basic Skills (CTB/McGraw-Hill staff members, 1981). This test which is published by CTB/McGraw-Hill has empirical norms for fall and spring established in October, 1980 and April, 1981. The program pupils were pretested the week of September 22, 1986 and posttested the week of April 6, 1987.

3. ECIA Chapter 1 Teacher Census Information

The Teacher Census Form was designed to provide information regarding the characteristics of program personnel. Data from this form included number of years of teaching experience, number of years of Title I and/or Chapter 1 teaching experience, highest college degree attained, and whether the teacher's teaching certificate includes certification in Reading as a subject area. The forms were completed by the program teachers and collected at the Chapter 1 teachers' orientation meeting held September 2, 1986.

4. Parent Involvement Information

The Parent Involvement Survey was designed to provide information on involvement of parents with ECIA Chapter 1 programs, as required in the Annual Chapter 1, ECIA, Evaluation Report. It was filled out monthly by all program teachers. Monthly data included number of parents and number of hours involved in five categories of parent involvement, including a monthly unduplicated count of parents involved. In addition, a yearly unduplicated count of parents was collected at the end of the school year.
5. Inservice Evaluation Information

The General Inservice Evaluation Form was constructed locally to collect information about the effectiveness of the inservice meetings as well as provide feedback to the program administrators.

An orientation session was presented by program staff and other presenters on September 2, 1986.

In addition to the types of data specified in the evaluation design, process evaluation data were obtained in a series of on-site visits to program classrooms during the period from March 5 to March 17, 1987. An Evaluator's Visitation Log was completed during each classroom visit to record the results of the evaluator's observations and interview with the teacher. The Log was designed to record pertinent information regarding record keeping, communication, pupil selection procedures, evaluation feedback, and facilities and program materials, as well as to increase the familiarity of the program evaluator with the workings of the program.

Major Findings

The information collected on the Pupil Census Forms is summarized in Table 1. The program served 571 pupils for an average of 13.3 hours of instruction per week. The average daily membership in the program was 507.2 pupils. The average days of enrollment per pupil was 115.5 days and the average attendance per pupil was 104.3 days. The average number of pupils served per teacher was 31.7.

The evaluation sample was comprised of those pupils who attended 80% of the program days and who received both a pretest and a posttest. The attendance criterion was met by 396 pupils, which was 69.4% of the 571 pupils served. Of these, 379 received both administrations of the achievement test. Data from testing are presented in Tables 2-5.

The analyses of pretest-posttest achievement data for raw score minimums, maximums, averages, and standard deviations are shown in Table 2. The average number of items correct on the posttest was 11.4 which is an average increase of 4.4 items or 29.3% increase of the 15 item test.

</tr>
</tbody>
</table>

Pretest-posttest percentile data are presented in Table 3. The median percentile for the pretest was 14.0, which was well below the 36th percentile. Percentile scores on the posttest ranged from 1%ile to 96%ile with a median of 51.0.

Table 4 presents pretest and posttest data in terms of grade equivalents. It should be noted that a grade equivalent of 0.0 for kindergarten can be deceptive, as it does not allow for those pupils functioning at the pre-kindergarten level. Thus the comparison of pretest and posttest median grade equivalents in kindergarten is a very conservative comparison due to the ambiguity of the 0.0 grade equivalent score. The average grade equivalent on the posttest was 0.9, a positive change during the seven month treatment period.

The presentation of achievement data thus far has included results from the analysis of raw scores, percentiles, and grade equivalents. Raw scores are equal units of measurement, but can only provide a limited interpretation of achievement data. Percentiles and grade equivalents provide comparative information but are not equal units of measure. Caution is advised in drawing conclusions about program impact from any of the scores above. Normal curve equivalents (NCE’s) are generally considered to provide the truest indication of pupil growth in achievement, since they provide comparative information in equal units of measurement. Data for normal curve equivalents are presented in Table 5.

The overall NCE gain for the program averaged 21.2 NCE points for the seven month treatment period or 3.0 NCE points for each month of treatment. The evaluation objective set a goal of 1.0 NCE point for each month of treatment. Thus the evaluation objective was met with the average change of 3.0 NCE points for each month of treatment greatly exceeding the criterion of 1.0 NCE point for each month of treatment.

Analysis of the Teacher Census Form data revealed that of the 18 program teachers, one teacher had a Ph.D., seven teachers had Master’s degrees, and the other ten had Bachelor’s degrees. Three teachers had certification in Reading as a subject area. The average years of total teaching experience was 19.8, with 12.4 of Title I/Chapter 1 teaching.

Monthly involvement of program parents is summarized in Table 6. If total parent hours per month are used as a basis of comparison, the greatest degree of parent involvement occurred in September, with a total of 614 parent hours. The least degree of parent involvement appeared to occur in April, with a total of 70.5 parent hours reported. The number of parents involved is not additive, since a parent could be involved in more than one activity across months. Therefore, a yearly unduplicated count of parents who were involved with the program was collected from program teachers at the end of the school year. The annual unduplicated count of parents was estimated at 650.

All Day Kindergarten teachers attended one inservice meeting during the school year. The topic and date of this meeting was the Opening Conference on September 2, 1986. The Opening Conference Evaluation Form was completed by participants at the meeting. The responses of the All Day Kindergarten group are summarized in Table 7. The rating scale key is as follows: (1) SD = strongly disagree; (2) D = disagree; (3) U = undecided; (4) A = agree; and (5) SA = strongly agree. As Table 7 indicates, the ADK teachers attending the meeting agree that the information presented would assist them in their program.

It should be noted that the Opening Conference Evaluation Form was specifically designed to address concerns regarding the Opening Conference Inservice. For more detailed accounts of the evaluation, the reader is referred to the ECIA Chapter 1 report of the Opening Conference Inservice which was submitted to the Department of State and Federal Programs, Columbus Public Schools.

The visitation plan called for the Chapter 1 evaluator to visit program teachers in selected schools and record their perceptions on the Evaluator's Visitation Log. Visitation occurred during the period from March 5 to March 17, 1987.
The data indicated no major problems regarding scheduling, evaluation feedback, facilities, space, materials, nor the environmental noise level. All teachers (4) interviewed indicated the level of communication with cooperating teachers was very good; coordinating instruction for the reading program was rated as very important and generally occurred on an informal basis. The data indicated 3 (75%) of the program teachers rated the degree of parent response, to efforts at parent involvement, as very poor. The ratings of two (50%) teachers indicated the selection process and testing procedures were inadequate. However, all interviewed (4) stated that the program had goals and objectives, with each having varying interpretations, and utilizing diverse strategies to see them attained.

For a more detailed account of the evaluation, the reader is referred to the ECIA Chapter 1 Report of School Visitations to All Day Kindergarten Classrooms, 1986-87, which was submitted to the Department of State and Federal Programs, Columbus Public Schools.

Summary/Recommendations

The All Day Kindergarten Program provided underachieving kindergarten pupils in 18 schools with an extra half day of instruction, in addition to the half day they received in a regular kindergarten classroom. The goal of the program was to prepare pupils for first grade. The program served a total of 571 pupils, of whom 379 met the two criteria for inclusion in the evaluation sample: (a) attendance for 80% of the program days; and (b) administration of both the pretest and the posttest. The evaluation objective called for an average gain of 1.0 NCE point for each month of program instruction. This would amount to an average of 7.0 NCE points for the 130 days of program instruction.

The average normal curve equivalent gains of 21.2 NCE points in language is three times the average gain of 7.0 NCE points required to meet the evaluation objective. There is a very strong indication of success in the program's overall goal, to better prepare underachieving kindergarten pupils for first grade.

The total number of program teachers was 18. The number of teachers having master's degrees was seven, or 38.9% of the teaching staff with one teacher having a Ph.D. The number of teachers having reading certification was 3, or 16.7% of the program teachers. Program teachers reported an average of 12.4 years of Title I/Chapter 1 teaching experience, and an average of 19.8 years of overall teaching experience.

An unduplicated count of approximately 650 parents were directly involved with the program. Areas of parent involvement included: (a) planning operation, and/or evaluation; (b) group meetings; (c) individual conferences; (d) classroom visits and field trips; and (e) visits by the program teacher to their homes.
Program teachers attended one inservice meeting during the school year. The meeting which was evaluated received positive ratings by program teachers. Teacher comments highlighted areas of concern and possible consideration in future inservice planning.

The program evaluator collected process data by visiting some project schools. The visitation plan called for the program evaluator to visit program teachers in selected schools and record the results of the evaluator's observations and interviews with the teacher on the Evaluator's Visitation Log. Visitation occurred during the period from March 5 to March 17, 1987. Data gathered regarding evaluation and program concerns were generally found to be satisfactory. All teachers interviewed (4) indicated that the level of communication with cooperating teachers was very good. Coordinating instruction of the reading program was rated as very important and generally occurred on an informal basis. However, three (75%) of the program teachers rated the degree of parent response, to efforts at parent involvement, as very poor. Some concerns were expressed regarding the pupil selection process and testing procedures.

Based on the evaluation results, it is strongly recommended that the All Day Kindergarten program be continued in the 1987-88 school year. It is also recommended that school visitations be continued next year. These visits provided useful information regarding the evaluation needs and general program and evaluation concerns.

6. What was the least valuable part of this meeting? __________________________

7. What additional information or topics would you like to see covered in future meetings? __________________________
CHAPTER 1 EVALUATION
PARENT INVOLVEMENT SURVEY

mailing label
 goes here

Name ____________________________________________

School ____________________________________________

For the month of ________________________________

<table>
<thead>
<tr>
<th>(A) Number of Parents</th>
<th>(B) Total Number of Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Parents involved in the planning operation and/or evaluation of your unit</td>
<td></td>
</tr>
<tr>
<td>2. Group Meetings for Parents</td>
<td></td>
</tr>
<tr>
<td>3. Individual Parent Conferences</td>
<td></td>
</tr>
<tr>
<td>4. Parental Classroom Visits or Field Trips</td>
<td></td>
</tr>
<tr>
<td>5. Visits by you to Parent Homes</td>
<td></td>
</tr>
<tr>
<td>6. Totals</td>
<td></td>
</tr>
<tr>
<td>7. Estimated Unduplicated Count of Parents</td>
<td></td>
</tr>
</tbody>
</table>

DIRECTIONS: 1. Complete all information; fold over so back is showing; staple; and place in school mail.
2. Place a parent in only one activity for any one meeting.
3. Total hours equals the number of parents times the number of hours spent, e.g., a group meeting for 10 parents which lasts 3 hours would result in 10 parents (Column A) and 30 hours (Column B); 15 parent conferences each for 30 minutes would result in 15 parents and 7.5 hours. Please round all figures in Column B to the nearest half hour. Enter half hours as .5; no fractions please.
4. Item 7 - This is total parents seen not total in 6A. If you had 16 parent conferences but 10 conferences were with 1 parent the unduplicated count is 7 parents - you saw 7 parents but had 16 conferences. Do not count a parent more than once. The figure in Item 7A should not exceed the figure for Item 6A.

Please return by Friday, November 7, 1986.
CHAPTER 1 EVALUATION
PARENT INVOLVEMENT SURVEY
SCHOOL YEAR ESTIMATE OF PARENTS
NON-CHAPTER 1 STUDENTS

Estimated Unduplicated Count of Parents __________________________

DIRECTIONS: Please complete all information; indicate a 0 if the number of parents or hours is actually zero—otherwise enter the number.

Column A (Number of Parents) lines 1-5: Please place a parent in only one activity for any one meeting.

Column B (Number of Parent Hours) lines 1-5: Indicate the sum of the hours each parent spent in an activity. For example, a group meeting with 10 parents which lasted 3 hours should result in a 10 on line 2/Column A and a 30 on line 2/Column B (each parent met with the teacher 3 hours and there were 10 parents). Please round all figures in Column B to the nearest half-hour. Enter half hours as .5; no fractions please.

For the Estimated Unduplicated Count of Parents do not count a parent more than once (even if a parent is listed in more than one activity).

Having completed all the information on this survey; fold it so the back is visible; staple and place it in the school mail.

Thank you.
IMPORTANT

Enter on the line to the left the annual unduplicated count of the number of parents you have involved in any of the Activities 1-5 below. COUNT EACH PARENT ONLY ONCE FOR THE YEAR. If you have questions regarding this count, please call Sharon Bermel at 222-3011 or bring your question(s) to the end-of-the-year inservice meeting.

COMPLETE THE REST OF THIS REPORT FOR JUNE ONLY

<table>

DIRECTIONS

1. Complete all information; fold over so back is showing; staple; and place in school mail.

2. Place a parent in only one activity for any one meeting.

3. Total hours equals the number of parents times the number hours spent e.g., a group meeting for 10 parents which lasts 3 hours would result in 10 parents (Column A) and 30 hours (Column B); 15 parent conferences each for 30 minutes would result in 15 parents and 7.5 hours. Please round all figures in Column B to the nearest half hour. Enter half hours as .5; no fractions please.

4. Item 7 - This is total parents seen not total in 6A. If you had 16 parent conferences but 10 conferences were with 1 parent the unduplicated count is 7 parents - you saw 7 parents but had 16 conferences. Do not count a parent more than once. The figure in Item 7A should not exceed the figure for Item 6A.

RETURN RIGHT AWAY BUT NO LATER THAN FRIDAY, MAY 29, 1987
