The expert system computer simulation detailed in this report is designed to investigate patterns of valuing in decision-making about dossiers of performance data used in teacher promotion evaluations. The knowledge base for the simulation consists of 111 questions organized into 117 rules. The questions and linked advice were derived from questionnaires completed by human judges of teacher dossiers, and the knowledge base is organized into sub-bases for five phases of dossier analysis: (1) preliminary screening; (2) analysis of nine individual data sources; (3) determination of data safety; (4) promotion decisions; and (5) comparison of two dossiers. This report lists the questions and rules for each of the nine individual data sources: (1) student achievement; (2) administrator reports; (3) other or unique data; (4) parent surveys; (5) peer reviews of materials; (6) professional activities; (7) student surveys; (8) systematic observations; and (9) teacher tests. It is noted that two judgments may be derived from the application of this system—to promote or to deny promotion, and the ranking of dossiers. The expert shell system used in this simulation design was MacSMARTS, and it was used on an Apple Macintosh microcomputer. (EW)
EXPERT SYSTEM KNOWLEDGE BASE FOR A COMPUTER SIMULATION
OF JUDGMENTS ON DOSSIERS OF SCHOOL TEACHER PERFORMANCE

Teacher evaluation is an informed, rational, subjective human activity. The purpose for design of this simulation was to investigate patterns of valuing in human expert decision-making about teacher dossiers of performance data. The expert system uses many of the same decision strategies as human judges, but also employs some not used by humans. Information about these strategies may be useful for training of judges for dossier evaluation.

The expert system shell used in this simulation design was MacSMARTS from Cognition Technology, 55 Wheeler Street, Cambridge, MA 02138. MacSMARTS uses a Prolog inference engine. MacSMARTS requires 134K of space. The computer was an Apple Macintosh Plus with 800K internal and external disk drives.

The knowledge base for the simulation design consists of 111 questions organized into 117 rules. The questions and linked advice were derived from questionnaires completed by human judges of teacher dossiers. These judges were from two school district promotion panels, students in a university course on teacher evaluation, and several university education faculty. The knowledge base requires 382K of space. The knowledge base is organized into sub-bases for five phases of dossier analysis: preliminary screening, analysis of nine individual data sources, determination of data safety, promotion decision, and comparison of two dossiers. Two judgments may be derived from this application: 1) Promote or Deny and 2) ranking of dossiers. The knowledge base will be refined in later versions.

The sub-bases include:

RULES: FOR I. INITIAL SCREENING

1. Assess each line with appropriate knowledge base, then use PROMOTION DECISION knowledge base.
   IF YES: At least 3 years experience, with 1 in district?
   IF YES: Dossier no more than 17 pages?
   IF YES: Evidence appears in required, comparable formats (forms, procedures)?
   IF YES: Evidence appears to be serious, good-faith?
   
   2. DENY. Wait until minimum tenure met.
      IF NO: At least 3 years experience, with 1 in district?
   
   3. DENY. Wait until dossier is shortened to maximum of 17 pages.
      IF NO: Dossier no more than 17 pages?
   
   4. Refer dossier to Promotion Panel for decision.
      IF NO: Evidence appears in required, comparable formats (forms, procedures)?
   
   5. DENY. No hoaxes, please.
      IF NO: Evidence appears to be serious, good-faith?

RULES: FOR II. ACHIEVEMENT

1. PASS: EXCEPTIONAL
   IF YES: Goals & measures selected & validated as per district system?
   IF YES: Do pre- and post- measures show pupil gain adjusted for prior achievement?
   IF YES: Are descriptions of educational significance present?
   IF YES: Are gain data significantly better than competitors?
   IF YES: Have multi-year data been presented which show an exceptional pattern of achievement?
   
   2. PASS
      IF YES: Are significant gain data presented?
      IF YES: Goals & measures selected & validated as per district system?
      IF YES: Are pre- and post- measures used?
      IF YES: Do gain data take into account prior achievement?
      IF YES: Are descriptions of educational significance present?
   
   3. PASS: BARELY
      IF YES: Are significant gain data presented?
      IF YES: Goals & measures selected & validated as per district system?
      IF YES: Are pre- and post- measures used?

   IF NO: Most recent year included?

6 FAIL
   IF NO: "contributing, well functioning" OR "...with exemplary practice"?

RULES: FOR II. OTHER, UNIQUE

1 FAIL. Combine this evidence with another line.
   IF NO: Is the evidence distinct from other lines, i.e., clearly not fit in?

2 FAIL. Evidence is not equivalent of other lines.
   IF NO: Is evidence from a non-classroom position, e.g., media, counselor, pull-out teacher, nurse?
   IF NO: A significant teacher leadership function, with effects beyond the classroom?
   IF NO: Benefits for a legitimate audience other than students, parents, peers, administrators?
   IF NO: Educational function not usually associated with classroom teaching?
   IF NO: A creative contribution to the educational system?

3 FAIL. Evidence does not suggest that effort had beneficial effect on a legitimate audience.
   IF NO: Did the effort educationally benefit students?
   IF NO: Did the effort benefit teachers in the system?
   IF NO: Did the effort benefit parents in their support of the system?
   IF NO: Did the effort bring significant additional resources and/or recognition to the system?
   IF NO: Did the effort increase educational opportunities for students?

4 FAIL
   IF NO: Were the data gathered and reported with credibility, using safe procedures?

5 PASS
   IF YES: Evidence that someone benefitted from the effort: students, teachers, parents, administrators, public?
RULES: FOR II. PARENT SURVEY

1 PASS: EXCEPTIONAL
   IF YES: Global rating 1 SD above the mean OR 4.9?
   IF YES: If junior or senior high, were at least 3 classes per year used?
   IF YES: Three years of data included?
