Developed by the Washington Office of the Superintendent of Public Instruction and written by classroom teachers, this document provides guidelines for a kindergarten through grade 12 English/language arts curriculum. Following a discussion on the philosophy and implementation of an English/language arts curriculum, the guide presents sections on three different aspects of language arts—modes (listening, reading, speaking, and writing), content (language and literature), and functions (imagining, feeling, informing, controlling, and ritualizing). For each section, a brief discussion of the section's topic is followed by a list of goals for the discipline. Preceding the learner outcome pages for grades K-3, 4-6, 7-9, and 10-12, an annotated learner outcome page explains the format of the section, listing the focus, learner outcome (goal), grade level, instructional implications, integrated activity sample, and instructional resources for each aspect of the curriculum. Appendixes include: (1) an annotated bibliography on six language arts categories (research and theory; cognitive foundations/language acquisition; teaching strategies, issues, and texts; integrating the language arts; writing across the curriculum; and curriculum development/inservice); (2) a taxonomy of cognitive and affective dimensions of listening and reading; (3) definitions of language arts terms; and (4) suggested novel reading lists. (MM)
MESSAGE FROM THE SUPERINTENDENT OF PUBLIC INSTRUCTION

At the core of all that our schools stand for, all that our legislators and others call for, all that give our efforts direction is the goal of developing in each student a competent and complete person capable of striving to the height of his or her potential. The State Board of Education and the Office of the Superintendent of Public Instruction have sought this development with increased graduation requirements and curriculum guidelines that would help achieve excellence across both academic and vocational areas and assist students in developing competencies necessary for college, work, and life.

It is my hope that school districts will find these English/Language Arts guidelines written by classroom teachers another contributing factor in achieving that goal. These guidelines are intended to provide assistance and guidance as districts improve curriculum, revise Student Learning Objectives, and engage in other program improvement efforts.

It is always my hope that, as we revise this initial working draft and periodically upgrade these guidelines themselves, all educators in the State will take a sense of ownership, seeing them as "their" guidelines and contribute to their improvement.

As we proceed with joint efforts to upgrade the English/Language Arts curriculum, I strongly urge you to adopt a thrust of excellence and equity which will:

- facilitate improvement and change in the English/Language Arts curricula,
- enhance the quality of teaching and learning, and
- emphasize the importance of the language and literary legacy that each student brings to our common schools.
The planning of these English/Language Arts Curriculum Guidelines involved many educators from all levels throughout the State. Their professional commitment of time, energy, and search for excellence made this document possible. I congratulate the educators, whose names appear in the pages of this document, for their significant contributions in developing guidelines for K-12 English/Language Arts curriculum. I am also grateful to the superintendents, principals, and school boards who cooperated and facilitated their teachers' participation in this project. The guiding assistance of this document and ideas and concepts expressed will truly lead us forward in meeting present and future needs in language arts education.

Sincerely,

[Signature]

Frank B. Brouillet

A MESSAGE TO THE READER

The ultimate goal of this document is to generate guidelines to be used in curriculum development by districts, schools, and teachers throughout the State. As this document is piloted it should be seen as "work in progress" wherein improvements gained can be incorporated. Therefore, all comments and responses for later revision of this document will be welcomed.

As you read and work with this document, please focus special attention upon:

- **The Philosophy**
  
  Understanding and accepting the integrated thrust of these guidelines is critical if it is to be implemented in a way that serves the intended purpose.

- **The Implementation**
  
  Because these guidelines advocate the teaching of English/Language Arts in a context larger than compartmentalized times, resources, or staffings, it is critical that the implications relevant to all facets of implementation be carefully viewed.

- **The Components of the Arts of Language: How, What, Why**
  
  Each statement about the components of Language Arts provides operational definitions of what we mean by the modes, the contents, and the functions. (Pay particular attention to the functions chosen to use as the "glue" for thrust of integration.)

- **The Map/Guide to the Format of Each Learner Outcome**
  
  This page is intended to make the guidelines "user-friendly."

- **The Learner Outcomes, Instructional Implications, Optional Integrated Activity Example and Resources**
  
  These are organized by grade level bands (primary/K-3, intermediate/4-6, middle school or junior high/7-9, senior high/10-12) in a manner that seemed most usable at the local level. These grade band levels are not intended to be discrete; reference to previous/following grade band materials would be appropriate.

  Learner Outcomes: Expected learning; what we want the student to know, be able to do, or have an attitude about.

  Instructional Implications: The instructional implications for modes (LISTENING, READING, SPEAKING and WRITING) are included. The implications are not arranged in order of occurrence on the page left to right, but are arranged on the basis of RECEPTIVE or EXPRESSIVE modes.
The implications can either be read on the basis of individual modes or in their entirety relevant to the learner outcome. (Note that in some cases the implications cover more than one of the modes).

Optional Integrated Activity Example: This is our exemplar activity that shows you how the modes can be integrated. These are not mandatory as much as simply what we consider good examples. Build and add your own examples as you work with the guidelines.

Instructional Resources: This listing should be considered only a start, a good primer to get you going; the most relevant list will be the list you generate.

Finally, you are the ultimate answer to ways that this guide can be used. As it was developed, the intent was to create guidelines that could be helpful at the district, building, and classroom level for uses such as SLO refinement, curriculum education/modification, scope and sequence development, and where applicable, instructional materials selection.

PHILOSOPHY & IMPLEMENTATION

The preparation of any curriculum requires that two critical components be developed as a foundation for the meeting of the goals and objectives of new programs, the philosophy and plans for implementation.

It is not the purpose of this guide to dictate a philosophy for individual district's language arts programs. It is the intention of this section, however, to share critical features of philosophy about what is essential in the teaching and learning of the English/Language Arts.

All of the teacher/authors of these guidelines--whether they came from Blaine or Camas, Pullman or Port Angeles, one-building school districts or the largest districts in the State; whether they taught in the inner city or the outer reaches of the high plateau coulees; whether they taught in affluent private schools or schools representing mostly the underprivileged--all agreed upon the highest priority of one critical ingredient: the integration of the language arts.

Philosophy

Historically, the modes of listening and reading, speaking and writing have been well integrated in the education of active and productive citizens. Students studied all these modes together in exercises intended to provide principles and practice to nurture their understanding and language arts skills.

In our own time, the integrated use of the four modes of the language arts, and especially of the expressive acts of writing and speaking, is obvious throughout our society. Our legal system demands both abilities; we see carefully prepared written briefs and carefully argued oral presentations. In our churches we read silently, and aloud. We read sermons and hear sermons. In the business world individuals write memos and detailed informative and persuasive documents. They also engage continually in speech activities ranging from simple social exchanges to carefully planned policy planning conferences and group discussions. Teachers in our education system write exercises and critiques for their students and they also talk to their students, in one-to-one interpersonal contexts as well as in classroom settings. In the workplaces of our society, the needed abilities of listening and reading, speaking and writing are essential for effectiveness. Neglecting the fullest development of any one of these modes, and not understanding the means for integrating them, places the learner in peril. Yet, in our recent language arts training the modes have not been as well integrated as they might be. Hence the intention and orientation for this document.
The integration of the language arts meant for the writers that genuine learning is dependent on interrelating the arts of language in the forms of its content (the what), the modes (the how), and the functions (the why). When these dimensions of languaging are interrelated, learning activities can be established that assist students in the development of a repertoire of language skills needed for formulating and communicating in any situation. Integrated language learning is the central focus of these guidelines, a focus that the writers recommend be a part of the philosophies, vision statements, rationales, and/or statements of beliefs that give direction to the language arts programs in our State. With integration as a common focus, we can bring an end to "language parts" programs which dissect living language into inert pieces with reading taught in isolation to writing, writing in isolation to spelling, spelling in isolation to penmanship, penmanship in isolation to poetry.

Implementation

The writers also believe that the functions of language—imagining, sharing feelings, informing, controlling, and ritualizing—can also provide a framework to assist teachers in the integration of the language arts content of language and literature with the listening, reading, writing, and speaking modes. This guide contains examples of how this can be done at each grade level.

In preparing this document a critical component became clear: through involvement comes ownership. Thus this document ought to be used by teachers who are involved in the development of their own statements of philosophy and implementation strategies. A staff that has taken the time to involve everyone in the preparation of its statement of philosophy with its collection of beliefs about what is important in the teaching and learning of the English/Language Arts will find that it has taken a major step to help insure the successful implementation of the language arts curriculum.

It must be noted that the successful implementation of the language arts guidelines described in this document into sustained and successful curriculum improvements cannot be achieved if it is relegated solely to the classroom teacher. The successful implementation of these guidelines will also depend on the initial and continuing involvement of the building principal in every part of the program preparation and implementation. The principal must know the philosophy, purposes, and critical dimensions of the curriculum in order to provide the staff with the support and resources needed to develop, implement, evaluate, and modify the program. Likewise, central office administrators must also know and be involved in the preparation and implementation of these programs to add their support and to communicate these curriculum developments to the community who may not otherwise understand and support these changes. Without the support of building and district administrators, little significant improvement can be expected.
LISTENING

ARTS OF LANGUAGE

I. MODES IN LANGUAGE ARTS: HOW

The development of competence in language use, the "how" focus of our language arts, involves instruction and practice in the receptive and expressive modes of language. Developing competence in listening and reading, the receptive modes, and speaking and writing, the expressive modes, requires a careful understanding of the nature of each mode and how they interact to promote the fluent, confident use of language.

1. Listening

Listening plays a significant role in an individual's life from infancy through adulthood. Listening involves, but is not limited to, actively hearing, perceiving, discriminating, interpreting, synthesizing, evaluating, organizing, and remembering information from verbal and nonverbal messages. Listening is the other half of speaking. It is a skill given little attention but of great importance if students are to become effective communicators.

There is little or no direct instruction in listening in most K-12 language arts curricula. Developing a listening curriculum requires that:

1. The teaching of listening must address everyday communication needs of the student in the classroom, on the playground, and at home.

2. The teaching of listening must include direct instruction and practice in the various forms of listening including empathic, critical, evaluative, and comprehensive listening and cannot be limited to opportunities to listen.

3. Instruction in effective listening should include the various listening contexts of one-to-one interactions, small groups, and one-to-many situations.

4. Instruction in effective listening should enable students to identify/determine speakers' intentions to ritualize, imagine, express feelings, inform, and control.

5. Instruction in effective listening should be developmental and take into consideration the student's attention span and ability to process information.
LISTENING

GOALS

1. The student focuses attention on a message—hears the speaker, understands meaning, follows sequence of ideas, and draws inferences.

2. The student recognizes, interprets and responds to nonverbal cues given by others.

3. The student decides on a reason for listening and adopts an appropriate listening strategy.

   The student listens for understanding as in:

   --comprehending and accurately restating message content.
   --asking questions to clarify message content.
   --correctly interpreting the speaker's intent or purpose.
   --focusing concentration on structure and content of message (rather than on distractions or on what listener is going to say next).
   --distinguishing main ideas from subpoints and supporting materials.
   --taking notes accurately while listening.

   The student listens critically as in:

   --all of the above (accurate understanding is prerequisite to effective evaluation).
   --recognizing difference between statements of fact and statements of belief.
   --listening to whole message before beginning to evaluate it.
   --recognizing claims as opposed to supporting material.
   --evaluating evidence as sufficient? biased? etc.

   The student listens empathically as in:

   --comprehending and accurately restating message content.
   --asking questions to clarify message content.
   --correctly interpreting the speaker's intent or purpose.
   --avoiding evaluative (e.g., negative) nonverbal cues.
   --confirming speaker through paraphrasing and positive nonverbal feedback.
   --accepting emotion without becoming overinvolved.
   --listening to message content to help speaker understand what is actually being said.

4. The student understands the perspective of another.

5. The student develops aural memory/information-retaining strategies.
2. Reading

Reading is a search for meaning. It involves a complex process that begins with the reader blending graphic symbols into the words they represent. Students who complete this first step may be proficient decoders, but may not be competent readers. Much more is required of competent readers.

The next step in this process of discovering meaning from printed text requires the reader to understand the purpose and ideas of the author. Reading teachers commonly call this part of the reading process "comprehension." Comprehension demands an increasingly complex set of skills from literal comprehension, the "who did what to whom, where and when" questions, to the higher level inferential comprehension, the "suppose you were the main character, Ira, how would you have behaved?" type of questions.

An important dimension of reading comprehension that we sometimes overlook as language arts teachers involves the active interaction of the relevant previous experience of the reader with what is being read. If a reader has little or no previous real or vicarious experience with what he or she is reading, the level of reading comprehension will be very low. On the other hand, if the reader has had previous experience in the form of books, videotapes, field-trips, family vacations, home/school discussions, etc., he or she will have the background to discover with more fluency and enthusiasm the meaning of the author.

Additionally, several other important factors currently being researched must be considered for the potential effects they could have on the student's discovery of meaning from the printed page. Understanding a variety of text structures is critical to unlocking meaning of printed passages. Classroom environment is another important factor that may facilitate or hinder the search for meaning. Primary grade teachers establish a climate for understanding narrative structures when they frame questions that organize a child's recollection of events of a story. Another very significant influence on a student's ability to read can be found in the home. A child who comes from a home where there is a rich exchange of parent-child talk, a ready access to a variety of reading materials, regular parent-child "read aloud" sessions, and a parent modeling of reading as a valued leisure activity, will enjoy much success in school and life-long reading activities.

In building and rebuilding our schools' reading programs, we must not let ourselves overemphasize the skill-building component of our reading programs. We live in a country where the majority of our citizens possess reading skills but do not use those skills to read for the pleasure of life-long learning. We need balanced programs that see to it that children can read and do read. We ought to consider carefully that constructive criticism of Albert Sommers and Janet Worthington who maintain:

Our schools are reasonably successful in teaching Americans the fundamental skills of reading . . . . What the schools too often fail to do is to excite children about reading. They present no
convincing case for reading as a lifelong habit that is pleasurable, meaningful, enlightening, and rewarding. They fail to build fires about books. A contributing factor to this failure, we believe, is American education's love affair with the basal reader . . . and the subsequent neglect of children's books as a valid cornerstone of any reading program.

GOALS

1. The student practices skills necessary to decode printed words.

2. The student can read a variety of fiction and non-fiction with established purposes.

3. The student can relate his or her own experience in the process of comprehending an author's meaning.

4. The student uses appropriate strategies for meeting the demands of a reading task (e.g., uses index, table of contents, glossary, scans for general information, skims for locating specific information).

5. The student reacts consciously to the ideas of an author by analyzing, making inferences, critically evaluating the written content, and assessing the author's mood and intent.

6. The student uses speaking and writing to respond in a variety of ways to what he or she reads (e.g., paraphrasing, elaborating, summarizing, appreciating, parodying).

7. The student analyzes and evaluates various literary devices used to sway, influence, persuade, create images, evoke feelings, etc.

8. The student uses reading as a tool for learning across the curriculum.

9. The student develops an appreciation for books as a life-long source for information and recreation.

3. Speaking

Speaking is a cooperative making of meaning through talk. Speaking skills, verbal and nonverbal, vary with the situation, purpose, audience, form, and style. Instruction in speaking must be direct, frequent, developmental, and address everyday communication needs.

Speaking occurs where two or more persons are interacting by transmitting and receiving auditory and visual stimuli to which meaning is attached. This is our most immediate mode for establishing human contact, interaction, and united social action. Centuries ago Cicero wrote:
It is by this one gift that we are most distinguished from brute animals, that we converse together, and can express our thoughts by speech... What other power could either have assembled mankind, when dispersed, into one place, or have brought them from wild and savage life to the present humane and civilized state of society?

Speaking develops out of social contact that begins at the moment of birth. A child then goes through the stages of babbling, imitations, and finally to communication. Children learn in their first years to use speech to imagine and pretend, to visualize social interaction, to express feeling, and to use speech with others to inform and control. Speech does not develop naturally without social contact, molding, and learning. Our very concept of self (our self identity) develops largely through our speech interaction with significant others according to research.

Speaking is an on-going, active, adaptive, and dynamic activity. An effective speaker will receive a continuous reaction (feedback) from the listener, a reaction to which he or she will adapt. If the listener appears puzzled and unable to understand, the speaker must modify the comments at that very moment. The speech situation does not bring together an audience as an object, as does the exhibition of a painting or the study of a piece of written discourse; the speech situation brings together persons who take turns sending and receiving, speaking and listening, providing feedback and adapting to the other. The mutual involvement and interaction of persons with one another is the essential distinguishing characteristic of speech communication.

All too often when people consider "speech" and "speaking," they think immediately and only of the public-speaking setting and context. Public speaking is indeed important, but it is not the only speech context. It is certainly not the most frequently used setting for the speaking mode, and it is probably not the most important.

In any context, one tries to speak in terms that will be clear and appropriate for the listener, to adapt one's ends to the interests of the listener, to be in a position if possible to look at the listener, and to respond to the listener's reactions. All that one tries to do in good conversation, one tries also to do in any other speech setting. And these most general principles, applicable and adaptable in all speech settings, are the content of instruction about the speaking mode.

Given this background, the following aspects of instruction in speaking should be considered:

1. Instruction in speaking must be direct, frequent, systematic and developmental or age-appropriate.

2. The teaching of speaking must address everyday communication needs and not be defined solely in terms of formal or public speaking contacts.

3. Instruction in speaking skills requires supervised practice followed by constructive feedback followed by more practice and cannot consist simply of opportunities to speak.
4. Instruction in effective speaking should encompass the various speaking contents including interpersonal/conversational, interviewing, public speaking, group discussion, and oral reading.

5. Instruction in effective speaking can be organized according to the speaker's intent to ritualize, imagine, express feelings, inform, or control others.

6. Speaking often illuminates the thinking process as in "How do I know what I mean until I hear what I've said?" "Realization at the moment of utterance" is a common phenomenon.

7. Instruction in effective speaking should enable students to argue effectively to satisfy their own needs.

8. Oral communication skills needed for adult life should be identified.

9. Speaking competency must be assessed systematically.

GOALS

1. The student is aware of the major elements of the specific situation: speaker, listener, context, message, specific purposes/intentions, reactions, and adaptations.

2. The student selects information, arguments, issues, and developmental devices appropriate to all elements in the specific context according to the intentions or purposes.

3. The student organizes information and materials for clear and memorable impact.

4. The student uses clear, correct, appropriate, and vivid language.

5. The student speaks with clear and suitable articulation, pronunciation, volume, rate, vocal variety and emphasis, and with fitting nonverbal expression (e.g., gestures, posture, physical movement, facial expression).

6. The student is capable of adapting during the course of the interaction to feedback received from others.

7. The student communicates effectively in a variety of contexts: interpersonal-conversational, small group, and one-to-many.

8. The student provides sufficient information and development of ideas so that the listener can easily make sense of the topic being covered.
9. The student employs conventional oral English and/or other dialects appropriate to the situation.

10. The student communicates effectively with a variety of age groups from younger students to peers to older students to adults.

4. Writing

Writing is the private struggle, with language, to make sense on paper. This struggle to create meaning in the face of ambiguity may take place on tablet or screen, it may happen alone or in company, its final product may or may not be shared, but the essential act occurs in the effort to say what one means as truly as one can say it.

The best method for teaching writing has been debated for centuries, supported at times with hard research and at other times with little more than statements of preference or opinion. The following considerations for developing an effective writing program are synthesized from historical as well as recent research conducted by Writing Northwest and the Puget Sound Writing Program in real classrooms with real students. These findings, to borrow the phrase, are neither wishes, lies, nor dreams.

1. Writing is not recorded speech. Because it exists apart from the writer, writing can be looked at, questioned, revised, checked, and double-checked until the text is as accurate and well-stated as the writer can make it.

2. Many programs of writing instruction currently in effect may be characterized as atomistic or holistic. Atomistic instruction in writing focuses on the individual parts of a final product, emphasizing the correctness of spelling, punctuation, and other conventions; it also tends toward a negative view of writing competence, (e.g., avoidance of run-on sentences) as if the successful writer is one who manages to sidestep a prescribed number of pitfalls. Holistic instruction in writing recognizes that writing is not a singular act like playing middle C on a keyboard, but it is a process: something that involves the imaginative, organizational, and adaptive intelligence of the writer in a whole symphony of cognitive activities from beginning to finished manuscript.

3. Since the works of oral rhetoricians Aristotle, Cicero, and Quintilian, process competencies in writing have included skills that produce ideas, skills that organize ideas, and skills that polish ideas for public view. In current writing programs idea-producing or expressive skills (ex-press: to press out) include those skills that enable the student to invent topics or explore implications of assigned topics, to set goals, to imagine one's audience and to produce tentative notes, plans, and drafts.
Editing or revising skills (re-vision: to see again) include those steps that enable the student to "work" roughly drafted material by focusing, adding, deleting, consolidating, replacing and rearranging ideas. Revising includes identifying what parts of the draft need to be changed, what needs to be strengthened, and what needs to be wholly redrafted to satisfy the demands of reader, occasion, purpose, and the fresh insights into the topic caused by the very act of writing.

Presenting or publishing skills (publish: to make public) include those skills that enable the student to produce an acceptably finished manuscript with conventional spelling, punctuation, capitalization, subject-verb agreement, pronoun case, margins, title, paragraphs or stanzas, footnotes, and legibility.

4. Process skills in writing may occasionally operate lineally as in those rare instances when everything falls into place for the writer. But more typically, the process skills recur where, in the struggle to say exactly what needs saying, the writer loops back and forth between drafting and editing to accommodate new goals, new ideas, and new patterns.

5. Drafting skills must necessarily be addressed first, because if there are no ideas on paper, there is nothing to develop, nothing to organize, nothing to punctuate. Drafting includes anything that generates plans, drafts, and ideas for thinking about and developing. Walking, talking, reading, viewing, thinking, visiting, guessing, watching, listening, drawing, imagining, and discussing are some of the verbs a teacher might well include in a lesson plan designed to produce truly substantive student writing that goes beyond mere responses to story-starters. Students need to learn the skills that story-starter writers employ.

6. Editing may be the most severe test of the writer's skills. Instruction and practice in writing must reflect a major commitment to the editing process. Students should have the chance to observe and interview teachers and professional writers engaged in the act of editing. Peer editing, an act that might be called "unnatural" and one that requires a great deal of teacher patience and effort, is nonetheless the single most effective method available for improving student editing skills.

7. Presentation skills, fairly or unfairly, most often determine the degree of acceptance that a writer may expect from a critical world. Appearance and correctness do count. It bears repeating here that writing programs that address all of the writing skills produce higher scores on tests of the "mechanical" skills of spelling, punctuation, and capitalization than do programs that address only the "mechanical" skills. Perhaps the reason for these findings is that so-called mechanical skills are seldom merely mechanical.
8. There is very little evidence that supports the effectiveness of narrowly-defined atomistic writing programs. There is a great deal of evidence, much in research conducted within the State of Washington, to validate the effectiveness of holistic writing programs. Holistic programs tend to produce improved student skills in everything from higher-level thinking skills to neater penmanship and reduced sentence fragments.

9. Writing is often communicative, but it just as often serves its most important purpose when it is intensely private. Writing is our most serious means of making sense, that is, creating meaning. While the meanings composed by the writer may sometimes be shared with an audience, at other times it is enough that the writer has created or attempted to create meaning. In either case, the act of writing serves as a most powerful vehicle for exercising the instrumentalities of thought, including the higher cognitive levels of judgment and evaluation.

10. There is a growing body of research to support the point of view that student writers need responses before grades (formative prior to summative evaluation). Any grade (C+) is a singular, largely inexplicable judgment delivered after it is too late to do anything about it. Evaluation of writing-in-progress, however, tells the writer what the draft does and does not do, and may suggest ways in which it might be improved. Evaluation before grading can come from peer-editors, teacher, or other readers, including parents. Commenting on student writing in helpful, responsive ways during the rehearsal before a final grade is awarded for performance is an art that needs to be cultivated.

11. There are two quite disparate activities currently in vogue, both of which claim to be grammar. One such activity has students engaged in the disassembly and naming of parts of sentences supplied by the teacher or textbook. In one of the most researched issues in the teaching of English, there is little evidence to support the contention that this activity—which the dictionary more properly called "parsing"—improves either grammar or writing. Another activity, involving the creating, rearranging, and recombining of the students' own sentences by the student (patterned after the Greek root grammaein: "to write") has a growing body of evidence to support its choice as one important way to help students improve their sentence structure.

12. Fill-in-the-blank and multiple-choice tests are not sufficient methods of evaluating writing. Even as a writer must write to demonstrate writing competence, there must be an informed and capable reader to evaluate effectiveness as well as correctness in writing. From primary trait scoring as in the recent National Assessment of Educational Progress, to holistic scoring by The College Entrance Examination Board, there are several strategies available that yield adequately reliable and valid data about achievement in writing.
GOALS

1. The student focuses on a definite and recognizable topic.

2. The student communicates a purpose (imagining, sharing feelings, informing, controlling, ritualizing) and an awareness of the reader.

3. The student provides enough information and development so the reader can make sense of the topic.

4. The student organizes and revises material so it is easy to follow.

5. The student composes structurally correct and effective sentences.

6. The student uses clear, accurate, and appropriate vocabulary.

7. The student employs conventional usage.

8. The student proofreads for appropriate spelling, punctuation, and capitalization.

9. The student produces a neat and legible copy.

10. The student composes in a variety of forms: reports, stories, poems, essays, plays, and letters.

II. CONTENT IN THE LANGUAGE ARTS: WHAT

In designing our language arts programs to support the development of students' reading, writing, listening, and speaking skills, we cannot overlook the critical fact that the English/Language Arts comprise a discipline with a unique content. The two major components of this content are language and literature.

1. Language

Language empowers people. Thinking depends principally upon command of language. Language facility gives our students the power to say "yes" or "no," the power to make sense out of an often senseless world, and the power to explore and understand their own inner thoughts and feelings. With the power of language, children can avoid becoming the victims of adults, peers, and their own depressing and confusing emotions.

Language is the system people of all ages use to construct their vision of "what is real." When children reach school age, they already possess a most impressive command of the grammar and usage of their language. They know intuitively that language is a system they use for communicating their needs and wants. They also are intuitively aware that language is a system they can use to formulate their own schemes and dreams and to distinguish reality from fantasy.

Too often this linguistic competence of children goes unrecognized in our schools because of our use of prescriptive grammar. This "fill-in-the-blanks, underline the nouns, circle the verbs" approach has emphasized the testing of grammatical rules and formulae which students are required to commit to memory. Unfortunately, or fortunately depending on your perspective, most students forget these unrelated grammatical facts. Most likely, however, these same prescripts and prohibitions of prescriptive grammar will be resurrected the next school year accompanied by complaints that "...these kids don't know pronouns from prepositions!"

It is unfortunate that many educators do not realize that students do know how to use pronouns and prepositions. Rather than spending unproductive time on the study of prescriptive grammar, students ought to be given assistance in learning descriptive grammar. With descriptive grammar students will acquire the tools to analyze, label, expand, compress, and control their own expressive language. With descriptive grammar, they will possess the tools to evaluate the effectiveness of their oral and written language in meeting intended purposes. This form of grammar will give students regular occasions to deal more directly with consciously controlling their own use of language. Constance Weaver in her excellent book, Grammar for Teachers, makes the following recommendation:
Instead of formally teaching students grammar, we need to give them plenty of structured and unstructured opportunities to deal with language more directly. If we want them to improve their reading, they must read; if we want them to improve their writing, they must write.

Another point of contention is the recognition that "Standard English" is a fabrication that has labeled the home language of many of our nation's children "Bad English." It is time to retire the myth of standard English and recognize what linguists have been telling us for a long time, viz., that there are several standards of English, from the informal to the formal. What linguists refer to as "appropriateness conditions," i.e., what is appropriate language for this situation and audience will determine the standard chosen for a given language use.

Finally, language arts teaching colleagues are encouraged to focus on language in general and on the English language in particular to address the following goals:

GOALS

1. The student knows that language is a system and develops a feeling for this system and when its components are used correctly early in life.

2. The student can consciously control his or her language to clarify thoughts and feelings, convey messages, and improve the effectiveness of his or her use of language.

3. The student knows the history of English language and recognizes that each age adds its mark to the dynamism and beauty of our language.

4. The student recognizes and appreciates the wide variety of language features in our multicultural society (e.g., dialects, idioms, pitch, grammatical differences, pragmatics).

5. The student can select the standard of English appropriate for a variety of informal and formal situations.

6. The student understands that language is both personal and social.

7. The student understands that language can be used to elevate or oppress individuals or social groups.
2. Literature

In rebuilding our K-12 Language Arts program, careful attention should be given to the place and treatment of literature within our curriculum. Louise Rosenblatt, has helped us maintain a focus on what is essential in the teaching of literature. According to Rosenblatt, "We may not always be able to look over a student's shoulder while he or she is having a real literary experience, but we can be careful . . . that we are not in actuality substituting other aims--things to do about literature--for the experience of literature." At all levels of schooling, our students should not be spending their time and energy analyzing literature, categorizing genres, identifying meters, or memorizing definitions of "denouement". The primary aim of our literature component should focus directly on promoting a live sense and experience of literature.

How do we involve students in this "experience of literature"? One of the first and most critical steps involves the selection of appropriate literature. "Literature to which children and adolescents cannot relate," Margaret Gillespie and John Conner maintain, "has no place in their world." The selection of literature is too critical of a component of a successful program to leave to chance. It requires the careful matching of a student's ability and interests with a wide variety of outstanding works of fiction and non-fiction. It requires that teachers up-date themselves with the help of librarians and specialists in literature for children and adolescents. Finally, it requires the extension of students' experiences of literature into areas they have not journeyed before, with the guidance of a teacher who regularly cultivates his or her own fascination with literature.

Once the appropriate literature is selected, our task is to develop regular opportunities and activities that promote active student responses to literature. We have to teach students how to respond to literature, not just "assign" responses and hope they really happen. Mary Lou White believes: "... children need to know how to respond to books in order to express themselves in ways other than the traditional, 'It was a good book,' or 'I didn't like it.'" The integration of listening, speaking, and writing with reading activities can give students the tools they need to produce imaginative individual responses to literature and to relate their own experiences to those encountered in their involvement with literature. Once students learn how to respond to literature, they can better recognize and appreciate our literary heritage and the values and dynamics of cultures revealed in literature.

Responding to literature can provide students with opportunities to learn more about themselves by enlarging their view of the human condition. It can also give students the opportunity to examine, question, challenge, or affirm the values portrayed in literature. Bernice Cullinan, believes that literature can:

... open doors to new knowledge, expand the imagination, and challenge children to reach beyond their own environment. They also offer children the opportunity to explore and understand
their own feelings and the feelings of others. This kind of understanding is an essential part of the maturing process that can be pursued by the careful selection and use of literature in the classroom and appropriate follow-up activities.

GOALS

1. The student actively responds to literature through integrated activities of listening, reading, speaking and writing, incorporating higher level thinking.

2. Student responds to literature in such ways that help him or her know more about self and others and more of what it is to be human.

3. Student responds to literature in such ways that help him or her know more about literature as an art form.

4. Student knows a variety of strategies for responding to literature, including summarizing, predicting outcomes, inferring motives, expressing appreciation, and asking critical questions.

5. Student responds to literature in such ways that help him or her know about literature as an expression of a culture or value system.

6. Student reads a wealth of literature that includes values defining American and other cultures and develops the capacity to critically imagine the nature and consequences of those values (e.g., inherent worth of each person, role of education in the realization of individual capacity, knowledge for its own sake and for its contribution to a culture, dependence of a free society upon the free interchange of ideas).
III. FUNCTIONS IN LANGUAGE ARTS: WHY

A number of linguists have sorted communication acts into broad categories of functions—sets of communication acts which are basically similar to each other in overall communicative purpose. The term "communication functions" is used to refer to these categories of communication purposes.

1. IMAGINING

These are communication acts which cast the participants in imaginary situations and include creative behaviors such as role-playing, fantasizing, speculating, dramatizing, theorizing, and storytelling.

1.1 Student appreciates the power of language.

1.2 Student uses a variety of prompts to generate, produce, and present a work.

1.3 Student enjoys and values the literary arts.

1.4 Student understands and uses literary devices such as elements of fiction and figurative language.

1.5 Student respects and describes different points of view.

2. FEELING

These are communication acts which express and respond to feelings and attitudes such as exclaiming, expressing a state or an attitude, taunting, commiserating, tale-telling, blaming, disagreeing and rejecting.

2.1 Student expresses feelings, attitudes, and values effectively to others.

2.2 Student interprets and responds respectfully to another's feelings, attitudes and values.

2.3 Student gives and accepts compliments and criticisms.

2.4 Student interprets and portrays different moods.

2.5 Student knows and respects cultural differences.
3. **INFORMING**

These are communication acts that seek information; for example, stating information, questioning, answering, justifying, naming, pointing out an object, demonstrating, explaining, and acknowledging.

3.1 Student follows and gives directions accurately.

3.2 Student accurately paraphrases a message or main idea.

3.3 Student seeks, organizes, and uses information from a variety of sources.

3.4 Student develops skill and confidence in discussions, conversations, and presentations.

3.5 Student increases vocabulary according to developmental level and subject matter.

3.6 Student recognizes and uses literary forms and terms.

3.7 Student selects reading material appropriate to task, reading level, and audience.

3.8 Student becomes familiar with important writers and their works.

4. **CONTROLLING**

These are communication acts that control behavior; for example, commanding, offering, suggesting, permitting, threatening, warning, prohibiting, contracting, refusing, bargaining, rejecting, acknowledging, justifying, persuading, and arguing.

4.1 Student distinguishes between fact and opinion.

4.2 Student states an opinion and defends it with relevant evidence and examples.

4.3 Student determines the intent of a message.

4.4 Student identifies and uses techniques of persuasion.

4.5 Student understands how biases influence a response to a message.
5. **RITUALIZING**

These are communication acts that serve primarily to maintain social relationships and to facilitate social interaction, such as greeting, taking leave, participating in culturally appropriate speech modes (for example, teasing, shocking, punning, praying), and demonstrating culturally appropriate amenities.

5.1 Student recognizes and responds to the rituals of communication (e.g., greetings, introductions, interruptions).

5.2 Student interprets and responds to nonverbal language.

5.3 Student delivers a message in a manner appropriate to situation, purpose, and audience.

5.4 Student selects conventions of English appropriate for formal and informal situations.

5.5 Student understands and respects the varieties of dialects, idioms, and usage.

5.6 Student understands and uses standard media forms (e.g., textbooks, newspapers, newscast, theater).

5.7 Student understands the American tradition of the free expression of ideas.

5.8 Student incorporates language conventions in oral and written presentations.
MAP/GUIDE TO ARCHITECTURE OF LEARNER OUTCOME PAGES

1. **FOCUS:** The language arts function/purpose under which the learner outcome is most appropriately placed. Remember that the functions/purposes include:
   - IMAGINING
   - SHARING FEELINGS
   - INFORMING
   - CONTROLLING
   - RITUALIZING

2. **LEARNER OUTCOMES:** Expected learning; what we want the student to know, be able to do, or have an attitude about. (Notice that they are all number coded, based on function and rank order within that function.)

3. **GRADE LEVEL:** Identification and use.

   - **LEVEL:**
     - K-3
     - 4-6
     - 7-9

4. **INSTRUCTIONAL IMPLICATIONS: RECEPTIVE**

<table>
<thead>
<tr>
<th>LISTENING</th>
<th>READING</th>
<th>SPEAKING</th>
<th>WRITING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teacher helps students develop a variety of skills in giving and receiving evaluative comments. (e.g., student listens to another student criticizing his or her paper by: focusing, drawing out, listening without judging)</td>
<td>(e.g., students offer and respond to peer editing)</td>
<td>(e.g., students interview each other, then introduce their partner to the class, focusing on positive statements)</td>
<td>(e.g., students frequently practice peer editing)</td>
</tr>
</tbody>
</table>

5. **INTEGRATED ACTIVITY EXAMPLE:***
   1. Students bring to class a draft of an assigned paper.
   2. Through class discussion the teacher and students develop a list of criteria by which to evaluate the effectiveness of the papers.
   3. The teacher arranges the class into groups of three or four, where students will exchange papers.
   4. For each paper the student reads, he or she writes comments that make it clear to the author how effectively the paper meets the established criteria. Each student must include at least two comments of praise and at least two comments which identify weaknesses or problems.
   5. After each student receives the comments written about his or her paper, he or she paraphrases to the group the substance of the comments without reacting defensively.
   6. Student rewrites paper incorporating comments.
   7. Teacher discusses advantages of peer-editing situation.

6. **INSTRUCTIONAL RESOURCES:**
   - Writing Without Teachers, Peter Elbow
   - Writing to be Read, Ken Macrorie
   - Stack the Deck Series

7. **INSTRUCTIONAL IMPLICATIONS:** The instructional implications for modes (LISTENING, READING, SPEAKING, and WRITING) are included. (Note that in some cases the implications cover more than one of the modes.)

8. **INSTRUCTIONAL RESOURCES:** This listing should be considered only a start, a primer to get you going; the most relevant list will be the list you generate.

9. **OPTIONAL INTEGRATED ACTIVITY EXAMPLE:** This is an exemplary integrated activity that shows you how the modes can be integrated. These are not mandatory activities as much as simply what we consider good examples. Build and add your own examples as you work with the guidelines.
FOCUS: Imagining

LEARNER OUTCOME: (1.1) Student appreciates the power of language.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

7) Relate what the manager said in response to the call (see writing and speaking).

Teacher provides a variety of literature for student response.

5) When they return they will call the manager of the site (e.g., aquarium manager) to express appreciation for the experience.

6) Practice on a play phone first.

1) Provide students with the "prompt", a field trip.

2) When they return they will write the manager of the site to express appreciation for assorted items.

3) Practice with a draft and at least one revision.

4) Proofread and mail.

**INTEGRATED ACTIVITY EXAMPLE:**

The teacher reads aloud to the class a familiar folk tale. The teacher then leads students in a discussion of the feelings and points of view of the antagonist in the tale.

After this discussion, students finish a lead sentence that the teacher has provided (e.g., "If I were a troll and someone came tromping across my bridge, I could . . ."). Student uses this sentence as a starter for writing a new version of the story.

The teacher selects several of these stories to read aloud to the class. In groups, students select one of these new stories to dramatize.

**INSTRUCTIONAL RESOURCES:**

Teacher Resources:

- Sunflowering, Bob Stanish
- If You're Trying to Teach Kids How to Write, You've Gotta Have This Book!, Marge Frank
- Improvisation for the Theater: A Handbook of Teaching and Directing Techniques, Viola Spolin
- Writing the Natural Way: Using Right-Brain Techniques to Release Your Expressive Powers, Gabriele L. Rico
**FOCUS:** Imagining

</tr>
<tr>
<td><strong>SPEAKING</strong></td>
<td><strong>WRITING</strong></td>
</tr>
<tr>
<td>Allow for exchange of views and opinions about resource materials or speakers.</td>
<td>Student creates a myth or short story related to a particular culture, (e.g., &quot;Why the Rabbit has a Short Tale,&quot; &quot;Why the Sun Comes Up&quot;).</td>
</tr>
<tr>
<td>Interview family members regarding family customs (viz., holidays, language, responsibilities); share findings in oral reports.</td>
<td></td>
</tr>
</tbody>
</table>

**INTEGRATED ACTIVITY EXAMPLE:**

Teacher assigns students task of discovering their ethnic background by interviewing their parents, grandparents and other family members. Teacher leads students in group discussion to develop appropriate questions to ask including: where did we come from, who came, when, why, how, and a favorite holiday recipe.

Students write accounts based on the interview with their families. As a class project students compile a class recipe book including their story from the interview questions. This book may be appropriately illustrated.

Students invite their parents to an ethnic potluck where the children will introduce and explain their dishes to the audience pointing out on the map the country of its origin. After the party, children write about a food other than their own describing what they liked about it using sensory descriptive words.

**OPTION:** Use ethnic potluck for open house, back-to-school night or other such function.

**INSTRUCTIONAL RESOURCES:**

- Just So Stories, Rudyard Kipling
- Anansi the Spider, Gerald McDermott
- Arrow to the Sun, Gerald McDermott
- TIK TIK TIK, Yembo, Arlene Mosel
- Annie and the Old One, Miska Miles, (book and film)
- Games of the World, Frederic Grunfeld
- Why Do Mosquito's Buzz in Your Ear?, Verna Aardema

**Filmstrip:** "Why the Sun and the Moon Live in the Sky"

<td></td>
<td>Give demonstrations to share information, new knowledge, skills (e.g., &quot;My New Hobby&quot;).</td>
<td></td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

Use a science or social studies topic to introduce this outcome.

1. Introduce the word dinosaur. List the things known about dinosaurs and questions about dinosaurs. Discuss the difference between the theory and fact.
2. Make an ongoing list of kinds of dinosaurs and another list of vocabulary words relevant to dinosaurs (e.g., paleontologist, fossil). (Students can continue to add words to the list throughout the study.)
3. Take the students to the school and/or public library to locate information on dinosaurs (viz., encyclopedias). Students can also interview a paleontologist or geologist, if one is available.
4. Students can choose specific dinosaurs to research individually or in small groups. The information could be collected in booklets. Depending on the ability of the students, the information could then be reorganized.
5. Students share information in various ways (e.g., book talks, oral reports, charts, newscasts). Have students choose from a variety of ways to extend the project (e.g., make dioramas, create puppet plays, make clay models, write about imaginary situations, tell stories).
6. Students evaluate their work by responding to questions such as, "Which questions were difficult/easy to answer?"

</table>

INTEGRATED ACTIVITY EXAMPLE:

1. Teacher reads excerpts from a book similar to The Phantom Tollbooth, emphasizing the powerful images. Discussion.
2. Students draw and share orally a picture portraying the images they received from the words. 3. Students write their own powerful images (e.g., haiku).
3. Students read their expressions and discuss similarities and differences perceived.
4. Students visit the library looking for excellent examples showing powerful language. Each student nominates and shares oral written excerpts to substantiate. The class votes on most vivid book depicting powerful language. (Note to teacher/librarian: assist students in selection of powerful language selections.)

INSTRUCTIONAL RESOURCES:

The Phantom Tollbooth, Norton Juster
Me and Caleb Again, Meyer
The King Who Rained, Fred Gwynne
Cloudy With A Chance of Meatballs, Judith Barrett
Hailstones and Halibut Bones, Mary O'Neill
Librarians might prepare a selection/shelf of appropriate books:
Adventures of Tom Sawyer, Mark Twain
Little House on the Prairie, Laura Ingalls Wilder
Uncle Remus, Joel Chandler Harris
Where the Red Fern Grows, Wilson Rawls
Onion John, Joseph Krumgold
Where the Lillies Bloom, Vera and Bill Cleaver
"Inside Out" Film Series
**FOCUS:** Imagining

**LEARNER OUTCOME:** (1.2) Student uses a variety of prompts to generate, produce and present a work.

<tbody>
<tr>
<td>Teacher provides students with opportunities to explore different types of moods through various forms of media (e.g., recordings, music, books, movies).</td>
<td>Teacher provides carefully chosen short stories/poems/articles/books exhibiting various moods for the student to read.</td>
<td>Teacher provides background information that defines mood.</td>
<td>Teacher provides writing activities for students to interpret and portray a specific mood.</td>
<td></td>
</tr>
<tr>
<td>Teacher provides experiences from which students interpret and describe their interpretation of the mood to peers.</td>
<td>Gives examples of various moods.</td>
<td>Gives examples of moods in relationship to various situations/circumstances.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

The teacher brainstorms with students a wordbank of feeling/mood words. The teacher provides a variety of materials--poems, stories, pictures, films, music--illustrating different moods. Students discuss the words and how they portray moods.

Teacher prepares index cards, each listing a different emotion or mood. Each student receives a card, and in small groups plans a skit in which each member displays his or her emotion. Groups then present their skits to the class, and the audience attempts to identify each student's mood. Students write a real or imaginary journal entry recounting a day and how it affected their moods without naming the mood. In small groups students read each other's entries and write down the mood they think it portrays, giving evidence from the writing.

INSTRUCTIONAL RESOURCES:

<td>Teacher provides stories from various parts of the country or world depicting a variety of dialects directing the students to read and interpret a selection.</td>
<td>Once the students have had experience in listening to various dialects, the teacher provides the opportunity for the students to read orally a selection having specific dialects.</td>
<td>Teacher provides samples of writings which have various dialects, idioms and usage, then directs the students to write a short story using a specific dialect.</td>
</tr>
<tr>
<td>The teacher provides students with opportunities to listen to and become familiar with a variety of dialects.</td>
<td>Listen to recorded examples of varied patterns from regional books, poetry, and stories.</td>
<td>Teacher reads aloud from several selections that have definite dialectal differences in vocabulary and pronunciation. Through discussion, students identify those differences. Teacher presents additional selections for students to read aloud in small groups. Students write a paragraph answering this question: &quot;How can one kind of English differ from another?&quot;</td>
<td></td>
</tr>
</tbody>
</table>

**INSTRUCTIONAL RESOURCES:**

- Resources Materials: Books - Twain, Wilder, Ashen, Uncle Rhesus.
- *Tom Sawyer*, Mark Twain
- *The Cay*, Theodore Taylor
- *Where the Red Fern Grows*, Wilson Rawls
### Learner Outcome: (5.6) Student understands and uses standard media formats (e.g., textbooks, newspapers, newscasts, theater).

**Grade Level:** K-3

**Instructional Implications:**

<table>
<thead>
<tr>
<th>Receptive</th>
<th>Reading</th>
<th>Expressive</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teacher reads aloud forms of standard media formats with the parts clearly defined.</td>
<td>Teacher provides experiences on how to read text, in content areas--math, social studies, science, newspaper scanning, skimming. Teacher provides instruction in the following: reference materials (e.g., dictionary, encyclopedia, almanac).</td>
<td>Teacher provides opportunities for student to examine and participate in various dramatic newscast productions. Teacher provides opportunities for students to create: - class newspapers - event programs - bulletins - morning announcements - written research reports.</td>
</tr>
</tbody>
</table>

**Instructional Resources:**

- Field trips--Newspaper, T.V. studio
- Steven Kellogg Filmstrip: "Island of the Skog" "Plays" Magazine
- Leo the Late Bloomer, Jose Amigo
- Encyclopedia Brown Series, Donald J. Sobol
- Books by Walt Morey

### Learner Outcome: (5.7) Student understands the American tradition of the free expression of ideas.

**Grade Level:** K-3

**Instructional Implications:**

<table>
<thead>
<tr>
<th>Receptive</th>
<th>Reading</th>
<th>Expressive</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teacher defines free expression. Teacher provides opportunities for students to listen to examples of free expression of ideas such as: - political speakers - news editors - an author - recordings of selected speakers.</td>
<td>Teacher introduces students to the parts of a newspaper with special emphasis on the editorial section. After careful preparation, students will read to compare and contrast different editorials about the same subject.</td>
<td>Teacher gives students an opportunity to express their feelings about a specific subject: - homework - allowance - too much T.V. - busing (sensitive) - war (sensitive). Teacher guides students through the steps in writing--prewriting, writing, editing, rewriting--in order to have a quality product expressing the student's ideas (i.e., write a letter to the principal about a school rule you don't like and give your reasons).</td>
</tr>
</tbody>
</table>

**Instructional Resources:**

- Jacque Wuertenberg tape, local authors, Miller Brody author series. Tapes of famous speakers. Newspapers.
**ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE**

INSTRUCTIONAL RESOURCES:

Films based on novels:
- How Green Was My Valley, Richard Llewellyn
- Kidnapped, Treasure Island, Robert Louis Stevenson
- The Pearl, John Steinbeck
- The House of the Seven Gables, Nathaniel Hawthorne
- The Adventures of Tom Sawyer, Mark Twain
- The Adventures of Huckleberry Finn, Mark Twain
- The Outsiders, S. E. Hinton
- Bless the Beasts and Children, Glendon Swarthout
- The Chosen, Chaim Potok
- Island of the Blue Dolphins, Scott O'Dell
- Jane Eyre, Charlotte Bronte
- All Quiet on the Western Front, Erich Maria Remarque

Films Based on Short Stories:
- "The Open Window," Saki
- "The Pit and the Pendulum," Edgar Allan Poe
- "Bernice Bobs Her Hair," F. Scott Fitzgerald

(See Suggested Novel Reading Lists, Appendix.)
SPI—ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE

FOCUS: Imagining

LEARNER OUTCOME: (1.5) Student describes and respects different points of view.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th></th>
<th>RECEPTIVE</th>
<th>EXPRESSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>LISTENING</td>
<td>Read to discover point of view: 1st person, 3rd person, omniscient, partial omniscient.</td>
<td>Role play viewpoints between: student to teacher (bringing radios to school), peer to peer (locker conflicts), child to parent (curfew).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Identify point of view after listening to classmate's speech.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>From Moffett's curriculum arrays create an experience. Write the experience from a different point of view ranging from character talking to himself to 3rd person omniscient.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Read a story and write the story from the viewpoint of another character.</td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

(A) Students read a selection illustrating a conflict between characters. Following discussion of the selection, they discuss how biases and life experiences influence people's viewpoints and how people can come to terms with conflict; students explore alternatives to decisions made by character. Students select a character from the selection and role play the character's viewpoint. The context of the role playing might be an interview by a student acting as a TV reporter. Students then write an alternative ending to the selection which resolves a conflict in another way.

(B) Build repertoire by reading a selection where there is a conflict between characters, such as The Red Pony, Diary of Anne Frank, The Outsiders, The Pigman. Have students role play opposing viewpoints. Discuss how biases and life experiences influence people's viewpoints and how they can change. Discuss how people can "come to terms" with conflict—alternatives in decision making. Write an end to any story to resolve a conflict in another way. Select a common school conflict such as a dress code or bringing a radio to school. Students discuss possible points-of-view. Students select a different point of view other than themselves and write a point of view paper.

INSTRUCTIONAL RESOURCES:

Novels: The Pigman, Paul Zindel; The Outsiders, Rumblefish, Tex, That Was Then, This Is Now, S. E. Hinton; The Red Pony, John Steinbeck; Summer of the Swans, House of Wings, Betsy Byars; Summertime, My German Soldier, Bette Greene; Where the Lilies Bloom, He Too, Vera and Bill Cleaver; Union John, Joe Krumgold; The Cay, Theodore Taylor.

Anthologies: American Indian Prose and Poetry: We Wait in Darkness, Gloria Levitas, ed.; Eskimo Songs and Stories, Knud Rasmussen, ed.

Don't You Turn Back, Langston Hughes
Someday It Feels Like It Wants to Rain, David Zastow
SPI-ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE

FOCUS: Sharing Feelings

LEARNER OUTCOME: (2.1) Student expresses feelings, attitudes, and values effectively to others.

<tr>
<td>Listen to oral book report and decide if/whether wants to read the book.</td>
<td>Independent book reports: Student selects book on his/her reading level within the assigned genre and appropriate for classroom presentation.</td>
<td>Present book reports through variety of activities (e.g., dramatization of a scene, drawings, Reader's Theatre, interview, slide presentation).</td>
<td>Follows appropriate book report format.</td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

Discuss criteria for selection of reading material for preschool children. Select story (books from home, school or public library). Read story to children (at home, in neighborhood, in kindergarten). Report the reaction of children to class. Compile a list of good books for young children to be used by students when occasions arise (babysitting, etc.). Write and illustrate a children's story following the criteria established.

INSTRUCTIONAL RESOURCES:

Teaching Writing and K-8 Classrooms, Iris M. Tiedt, et al., eds.

Competency and Creativity in Language Arts, (children's book list) Nancy Hansen-Krening

Turn Not Kale, Beloved Snail, Jacqueline Jackson (children's book list)

Ideas for Teaching English in Junior High and Middle School, Candy Carter, Zora Rashkis, eds. (book report suggestions)
SPI--ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE

FOCUS: informing

LEARNER OUTCOME: (3.8) Student becomes familiar with important writers and their works.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th>RECEPTIVE</th>
<th>READING</th>
<th>SPEAKING</th>
<th>WRITING</th>
</tr>
</thead>
<tbody>
<tr>
<td>LISTENING</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Present pertinent information and/or titles of books. Students identify the author.</td>
<td>Become familiar with various biographical dictionaries.</td>
<td>Present a report on a biography/autobiography.</td>
<td>Write a report about a biography or autobiography read, organizing the information in the form of a timeline.</td>
</tr>
<tr>
<td>View film. Jot down important facts of author's life.</td>
<td>Become familiar with, select and read biography or autobiography.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Invite a local author to come visit the classroom (e.g., David Greenberg, Molly Cove, Jack Prelusky).</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

Student listens to explanation of various references containing information regarding writers and their works. Before selecting a novel to read, student uses references to prepare two 4 x 6 notecards as follows:

**NOVEL CARD**

Name:
Reference book used:
Edition:
Page:
Title of novel:
Author:
First published:
Time of plot:
Locale:
Principal characters: (name 2 major characters and give 2-5 attributes for each)
Brief plot summary or critique: (on back of card)

**AUTHOR CARD**

Name:
Source:
Author:
Dates: (Born-died)
Major Novels:
Brief summary about author: (on back of card)

After recording this information that will help make a selection of a novel to read, student shares it with the class. Student reads novel previewed.

INSTRUCTIONAL RESOURCES:

See Suggested Novel Reading Lists, Appendix.

<tr>
<td>Evaluate T.V. and radio commercials as to their intent. Ask these kinds of questions:</td>
<td>Read fables and myths to build repertoire and then identify authors' intent in other selections (e.g., essays and editorials).</td>
<td>Teacher provides students with opportunities to debate current issues.</td>
<td>Write a message that demonstrates a variety of intentions. A message that would:</td>
</tr>
<tr>
<td>&quot;What do they want you to:</td>
<td>Read editorials or letters to editors to determine what they want you to do.</td>
<td>Students give a variety of messages orally (e.g., directions, personal feelings regarding school-related problems, suggestions for improvements of park or school facilities).</td>
<td>- persuade a friend to go to a movie</td>
</tr>
<tr>
<td>- think?</td>
<td>Read political issues or candidate's pamphlets and decide how to vote.</td>
<td>Rest of class identifies the intent of the message.</td>
<td>- make someone laugh</td>
</tr>
<tr>
<td>- feel?</td>
<td></td>
<td></td>
<td>- make a person change his or her mind</td>
</tr>
<tr>
<td>- do?</td>
<td></td>
<td></td>
<td>- make a person feel better.</td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

Class listens to a recorded message such as "I Have a Dream," Martin Luther King, Jr. Class discusses the intent of the message. Students bring in sample editorials or letters to the editor from newspapers or magazines such as Sports Illustrated. Independently, they write the intent of the message. Student shares with class the message and the intent. Class discusses other possible intents about a school or community issue. Share by publishing.

INSTRUCTIONAL RESOURCES:

Group Process Manuals

Values Clarification: A Handbook of Practical Strategies for Teachers and Students, Sidney B. Simon et al.

Teacher Effectiveness Training, Thomas Gordon

Folk Literature:

Aesop's Fables
Thurber's Fables
Greek Myths
Norse Myths
African Myths and Legends
Indian Myths and Legends
### Learner Outcome: (4.4) Student identifies and uses techniques of persuasion.

**Grade Level:** K-3, 4-6, 7-9, 10-12

### Instructional Implications:

<table>
<thead>
<tr>

Film: Your Communication Skills: Speaking
SPI--ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE

FOCUS: Ritualizing

LEARNER OUTCOME: (5.2) Student interprets and responds to nonverbal language.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th>RECEPTIVE</th>
<th>EXPRESSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>LISTENING</td>
<td>READING</td>
</tr>
<tr>
<td>Student listens to a speaker paying particular attention to nonverbal language (hand movement, eye contact, facial expression).</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

The teacher videotapes several commercials that use a considerable amount of nonverbal language. Students view these commercials without sound and write their interpretation of the commercials.

Students then view the commercials with sound and compare their initial interpretations with the actual message. The teacher uses these comparisons to illustrate how important nonverbal language can be.

Students in small groups prepare their own "silent" commercials to present to the class. After each presentation students evaluate the effectiveness of the nonverbal content of the commercial.

INSTRUCTIONAL RESOURCES:

Film: Pantomime: The Language of the Heart
The Chairy Tale
**SPI--ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE**

**FOCUS:** Ritualizing

**LEARNER OUTCOME:** (5.3) Student delivers a message in a manner appropriate to situation, purpose, and audience.

**GRADE LEVEL:** K-3 4-6 7-9 10-12

**INSTRUCTIONAL IMPLICATIONS:**

<table>
<thead>
<tr>
<th>RECEPTIVE</th>

<th>SPEAKING</th>
<th>WRITING</th>
</tr>
</thead>
<tbody>
<tr>
<td>LISTENING</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Student identifies in literature strategies characters use to deliver a message appropriate to the audience. Then class discusses how to adapt delivery to the situation/purpose/audience.</td>
<td>Class brainstorms various speech qualities. Example: - whisper - shout - conversation level - emphasis or stress - enunciation Select appropriate pace and volume to use while speaking orally. Student reads selection aloud and video tapes. Take students around various places in building to do oral drama. Example: - carpeted vs. non-carpeted area, gym vs. classroom, outside vs. inside. Student dramatizes situations that reflect different settings. Examples: - presidential speech - phone conversation - talking in hall - person in grief Audience responds.</td>
<td>Student writes for a variety of purposes: - letters - invitation - thank you - note of inquiry Student writes for a variety of audiences: - letter to a friend - letter to relative - letter to principal - letter to school board member</td>
</tr>
</tbody>
</table>

**INSTRUCTIONAL RESOURCES:**

Humorous books that deal with inappropriate manners: *How to Eat Like a Child,* Delia Ephron; *The Twits,* Roald Dahl; *What's Wrong with this One,* From the Mixed-Up Files of Mrs. Basil E., E. L. Konigsburg; *Don't Stand in the Soup,* Bill Martin, Jr.; *All About Letters,* U. S. Postal Service.
SPI—ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE

FOCUS: Ritualizing

LEARNER OUTCOME: (5.4) Student selects language standards appropriate to audience and purpose.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th>LISTENING</th>
<th>READING</th>
<th>SPEAKING</th>
<th>WRITING</th>
</tr>
</thead>
<tbody>
<tr>
<td>The teacher helps students distinguish between formal and informal situations and determine appropriate language for each.</td>
<td>The teacher provides opportunities for student to speak both formally and informally in class (e.g., in small group discussions, class presentations, student body presentations, school announcements).</td>
<td>The teacher provides a variety of writing experiences which allow for both formal and informal usage.</td>
<td></td>
</tr>
</tbody>
</table>

INSTRUCTIONAL RESOURCES:

LEARNER OUTCOME: (5.5) Student understands and respects the varieties of dialects, idioms and usage.

</thead>
<tbody>
<tr>
<td>Student listens to stories (records or tapes) that have dialects. Teacher presents linguistic fact that no one dialect is superior.</td>
<td>Student identifies and interprets figurative language and idioms that are unique to a particular culture.</td>
<td>Student identifies and discusses the various dialects present in the classroom.</td>
<td>Student writes a travel advertisement for different parts of the country or another English-speaking country using the appropriate dialect.</td>
</tr>
<tr>
<td>Student watches commercials that show different dialects (tourism in Australia).</td>
<td>Student reads novels and short stories that use dialects.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

INSTRUCTIONAL RESOURCES:

Novels and Films: The Adventures of Tom Sawyer, The Adventures of Huckleberry Finn, The Prince and the Pauper, Mark Twain; Now Green Was My Vallet, Richard Llewellyn; Gone With the Wind, Margaret Mitchell; To Kill A Mockingbird, Harper Lee; Smoky, Will James.
FOCUS: Ritualizing

LEARNER OUTCOME: (5.6) The student understands and uses standard media format (e.g., textbook, newspapers, newscasts, theater).

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

| RECEPTIVE | LISTENING | Students go to a play noting its divisions: act, scenes. |
| READING | In a peer editing group student uses table of contents and/or index of grammar handbook to find rules or explanations for proofreading each other’s memory books. |
| SPEAKING | Students present a mock radio broadcast based on a common theme (e.g., “family customs,” “favorite winter sports”). |
| WRITING | Student writes memory books in which the basic parts of a book are incorporated (title page, dedication page, table of contents, author page). |

MEMORY book is autobiographical, including hobbies, favorite things, idiosyncrasies, ambitions, etc.

INSTRUCTIONAL RESOURCES:

Newspapers. Journalism texts. The Elements of Style, William Strunk, Jr., and E. B. White; Basic English Revisited, Patrick Sebranic and Verne Meyer.

LEARNER OUTCOME: (5.7) Student understands the American tradition of the free expression of ideas.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

| RECEPTIVE | LISTENING | Students listen to records and tapes of famous essays and speeches: |
| READING | Student reads early American literature that reflects thinking of that era (e.g., Salem witch trials in House of Seven Gables). |
| SPEAKING | Students read play Inherit the Wind. |
| WRITING | Student selects issues he/she feels strongly about and writes poetry, article, short story, play or essay to express those feelings. |

INSTRUCTIONAL RESOURCES:

Novels: The Scarlet Letter, House of Seven Gables, Nathaniel Hawthorne; The Witch of Blackbird Pond, Elizabeth G. Speare.

SPI--ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE

FOCUS: Imagining

LEARNER OUTCOME: (1.1) Student appreciates the power of language.

(1.4) Student understands and uses literary devices, such as elements of fiction and figurative language.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th>RECEPTIVE</th>
<th>EXPRESSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>LISTENING</td>
<td>READING</td>
</tr>
</tbody>
</table>

Teacher provides students with opportunities to listen to different recorded and live oral presentations.

Teacher asks students to react to and analyze various literary devices used to create images and evoke feelings.

Teacher develops students' understanding of plot, theme, characterization, etc.

Teacher instructs students in identifying figurative language in reading material (e.g., students find examples of figurative language and explain their contribution to meaning).

Teacher expects that students will use figurative language, allusion, etc., in a variety of oral presentations.

Teacher has students read aloud material that uses figurative language (e.g., students practice oral interpretation of poems or imaginative prose).

The teacher helps students discover clear, accurate and vivid language.

The teacher encourages students to use a variety of strategies for commencing and sustaining the writing act (e.g., brainstorming, word banks, reading, talking and films).

The teacher provides students with opportunity to write in a variety of creative forms (e.g., poetry, descriptions, narrations).

RESOURCES:

Writing the Australian Crawl, William Stafford
Writing with Power, Peter Elbow
Wishes, Lies and Dreams and Sleeping in the Wing, Kenneth Koch
Creative Short Stories, Damon Knight

LEARNER OUTCOME: (1.2) Student uses a variety of prompts to generate, produce and present work.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th>RECEPTIVE</th>
<th>EXPRESSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>LISTENING</td>
<td>READING</td>
</tr>
</tbody>
</table>

Teacher involves students in a variety of listening situations from which the student generates a written or spoken response (e.g., student listens to a tape of an editorial on a controversial topic, then writes his or her own).

Teacher encourages students to use reading material as sources of ideas.

Teacher encourages students to think beyond a work (e.g., students complete unfinished stories).

Teacher helps students use impromptu speaking as a way of finding material or exploring a concept.

Teacher encourages students to do a variety of free writing activities.

RESOURCES:

Writing Without Teachers and Writing with Power, Peter Elbow
A Writer Teaches Writing, Donald Murray
Writing To Be Read, Ken Macrorie
Sweet Agony, Gene Olson
**FOCUS:** Imagining

**LEARNER OUTCOME:** (1.3) The student enjoys and values the literary arts.

<td>Teacher provides students with opportunities to attend plays.</td>
<td>Teacher provides time for students to read materials of their choice for pleasure. Teacher maintains a focus on reading for pleasure.</td>
</tr>
<tr>
<td>Teacher uses a variety of films and videos in the classroom.</td>
<td></td>
</tr>
</tbody>
</table>

**INTEGRATED ACTIVITY EXAMPLE:**

Each student lists five movies he/she likes. From this list each student picks one movie and lists reasons why he/she liked the movie. From these reasons the student writes a recommendation that would encourage other students to see this movie. The student then creates something visually appealing, incorporating the recommendation, to display in an area of the room. The teacher encourages students to add frequently to this display by recommending a variety of works—books, plays, television programs, records, magazines.

**INSTRUCTIONAL RESOURCES:**

Local theaters
Literary Cavalcade
Washington State Humanities Commission
Oregon Shakespeare Festival
Mad, Sad, and Glad
Reflections on a Gift of Watermelon Pickle, Stephen Dunning

**LEARNER OUTCOME:** (1.5) The student describes and respects different points of view.

<td>Teacher helps students develop a variety of skills in giving and receiving evaluative comments.</td>
<td>(e.g., student listens to another student criticizing his or her paper by: focusing, drawing out, listening without judging).</td>
<td>(e.g., students offer and respond to peer editing).</td>
<td>(e.g., students frequently practice peer editing).</td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

1. Students bring to class a draft of an assigned paper. 2. Through class discussion the teacher and students develop a list of criteria by which to evaluate the effectiveness of the papers. 3. The teacher arranges the class into groups of three or four, where students will exchange papers. 4. For each paper the student reads, he or she writes comments that make it clear to the author how effectively the paper meets the established criteria. Each student must include at least two comments of praise and at least two comments which identify weaknesses or problems. 5. After each student receives the comments written about his or her paper, he or she paraphrases to the group the substance of the comments without reacting defensively. 6. Student rewrites paper incorporating comments. 7. Teacher discusses advantages of peer-editing situation.

INSTRUCTIONAL RESOURCES:

**SPI--ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE**

**FOCUS:** Informing

**LEARNER OUTCOME:**
- (3.6) Student recognizes common literary forms and terms.
- (3.7) Student selects reading material appropriate to task, reading level and audience.
- (3.8) Student becomes familiar with important writers and their works.

**GRADE LEVEL:**
- K-3
- 4-6
- 7-9
- 10-12

**INSTRUCTIONAL IMPLICATIONS:**

<table>
<thead>
<tr>
<th>RECEPTIVE</th>
<th>EXPRESSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>LISTENING</strong></td>
<td><strong>READING</strong></td>
</tr>
<tr>
<td>Teacher provides students with frequent practice in identifying a variety of literary forms in oral messages.</td>
<td>Teacher helps students identify different characteristics of various pieces of literature.</td>
</tr>
<tr>
<td>Teacher arranges for students to hear or see poems, plays, etc.</td>
<td></td>
</tr>
</tbody>
</table>

**INTEGRATED ACTIVITY EXAMPLE:**

Teacher models a reading recommendation for a student in the class. Students identify three people, any age, in the school or community they know well enough to recommend a book to. Students choose a book from the works they have read, for each person on their list. Students present in speaking or writing a recommendation that includes: 1) why the form, content, and reading level are appropriate for the person, 2) what literary devices in the work the person might enjoy, 3) why this author might appeal to the person, and 4) a representative passage from the work. Students design a questionnaire that reflects the selection criteria as a follow-up and gives it to at least one of their three people. Students share results of questionnaire.

**INSTRUCTIONAL RESOURCES:**

- A Lexicon of Modern Literary Terms
- Elements of Style, William Strunk, Jr., and E. B. White
SPI—ENGLISH/LANGUAGE ARTS CURRICULUM GUIDE

FOCUS: Controlling

LEARNER OUTCOME: (4.1) Student distinguishes between fact and opinion.
GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

Teenagers Themselves
The Lively Art of Writing, Lucille Vaughn Payne
FOCUS: Convolving

LEARNER OUTCOME: (4.3) Student determines the intent of a message.

(4.4) Student identifies and uses persuasive techniques.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th>LISTENING</th>
<th>READING</th>
<th>SPEAKING</th>
<th>WRITING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Teacher gives students frequent practice in summarizing the intent of a variety of messages (e.g., students can write one sentence summaries of a series of brief student speeches and compare responses for accuracy). Teacher presents students with a list of common fallacies and provides students with a variety of oral messages that contain fallacies. Teacher presents students with a variety of materials and strategies for understanding the different kinds of persuasion (e.g., students analyze a recorded advertisement for its content and techniques).</td>
<td>Teacher develops students' logical thinking (e.g., students work with a list of logical fallacies and arguments in which these fallacies can be detected). Teacher provides students with frequent practice in analyzing a text for its intent. Teacher presents students with a variety of materials and strategies for understanding the different kinds of persuasion (e.g., students analyze one piece of junk mail for its content and techniques).</td>
<td>Teacher presents students with a list of common fallacies and has students develop speeches that use those fallacies for other students to examine. Teacher arranges for students to prepare brief speeches with a variety of intents for other students to analyze. Teacher allows students to present persuasive messages to each other for analysis (e.g., students attempt to convince other students to vote for or against a candidate).</td>
<td>Teacher assigns papers for students to practice various persuasive techniques for different audiences.</td>
</tr>
</tbody>
</table>

INSTRUCTIONAL RESOURCES:

Persuasion, Connely, et al.
FOCUS: Controlling

LEARNER OUTCOME: (4.5) Student understands how biases influence a response to a message.

GRADE LEVEL: K-3 4-6 7-9 10-12

INSTRUCTIONAL IMPLICATIONS:

<table>
<thead>
<tr>
<th>RECEPTIVE</th>
<th>EXPRESSIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>LISTENING</td>
<td>READING</td>
</tr>
<tr>
<td>Teacher helps students identify their own biases and how these affect their listening.</td>
<td>Teacher helps students see the role of their preferences in their reactions to a variety of reading material.</td>
</tr>
<tr>
<td>Expressive</td>
<td></td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

The teacher brings samples of advertisements, both in print and on videotape, to class. The class discusses the persuasive techniques used in advertising (tones, words, graphics). The class makes a list of emotionally charged words found in the ads. Students then write two advertisements for the same product, each ad directed at a distinct group (e.g., elderly vs. teenagers). By using emotionally charged words, students attempt to make use of the predictable biases of each audience.

Students can also write a persuasive letter to their parent or teacher for something they want. This letter must respond to possible biases students have identified in their audience.

Students can also choose a product and try to sell it to the class. Each student has $100 in paper money to spend; the student who sells the most products is declared the winner. Students examine how the different attempts to sell these products made use of possible biases in the audience.

<td>Writing</td>
</tr>
<tr>
<td>Teacher instructs students in the use of glossaries, indexes, tables of contents, lists of credits, bibliographies, etc.</td>
<td>Teacher provides students with various formats. (e.g., students write a newspaper front page based on a piece of literature).</td>
</tr>
</tbody>
</table>

INTEGRATED ACTIVITY EXAMPLE:

Class brainstorms a list of possible media formats. Each student chooses one to research and prepares a demonstration speech for the class.

Possible formats include:
- glossary, index, table of contents in books
- organization of magazine and newspaper
- structure of different kinds of television programs (documentary, sitcom, drama, soap opera)
- libraries
- theatrical productions

After presentations, student summarizes another student's speech. Student gives his/her summary to speaker who writes response indicating the accuracy of the summary and gives it back to the student.

INSTRUCTIONAL RESOURCES:

The media
Learning Seed Company: The News Kit and The Media Kit.

LEARNER OUTCOME: (5.7) Student understands the American tradition of the free expression of ideas.

APPENDIX A

An Annotated Bibliography on Language Arts

Compiled by

Betty Hanson, Yakima Public Schools
Tammy Reid, Whitworth College
Adina Walsh, Onion Creek School District
Stanley Zehm, Ph.D., Selah School District

1. Research and Theory
2. Cognitive Foundations/Language Acquisition
3. Teaching: Strategies, Issues, Texts
4. Integrating the Language Arts
5. Writing Across the Curriculum
6. Curriculum Development/Inservice
1. Research and Theory

Britton, J., "Teaching Writing," In A. Davies (ed.), Problems in Language and Learning, London: Heinemann, 1975. This paper was published in the same year as were the results of Britton's Schools Council project. He puts that research into context, talking about questions they did not address and about additional questions developing out of their conclusions.

Britton, J., T. Burgess, N. Martin, A. McLeod, and H. Rosen, The Development of Writing Abilities (11-18), London: Macmillan Educational LTD, 1975. Britton's account of the conclusions drawn by the seminal Schools Council project in their analysis of 2122 pieces of writing from 65 British schools. Not only do they reclassify writing into different categories, but they provide a detailed discussion of the writing process.

Clay, M., Observing Young Readers: Selected Essays by Marie Clay, Exeter, NH: Heineman Educational Books, 1982. A volume of journal articles by Clay comprising all the major research through which the author's theories of reading instruction have been developed.

Donovan, T., and B. McClellan (eds.), Eight Approaches to Teaching Composition, Urbana, IL: National Council of Teachers of English, 1980. This collection describes 8 current theoretical approaches to teaching writing.
Emig, Janet, *The Composing Processes of Twelfth Graders*, Urbana, IL: National Council of Teachers of English, 1971. Emig's influential case study of the writing process used by 8 high school seniors composing aloud. She contrasts methods used by professional writers with the dicta of texts, and draws her own conclusions about changes schools should make in teaching writing.

-----, *Writing: Teachers and Children at Work*, Exeter, NH: Heinemann Educational Books, 1983. To quote Graves, his book includes "workshops emphasizing teacher activity, child growth in the writing process, issues of recording and reporting child progress." His material is based on teacher research and his own personal experiences. His work has had a major impact on the teaching of writing.

Haley-James, S. (ed.), *Perspectives on Writing in Grades 1-8*, Urbana, IL: National Council of Teachers of English, 1981. The editor opens the book with a brief historical overview of answers to some of the central questions about young children's writing. Six essays discuss current practices.

Hays, Janice N., et al. (eds.), *The Writer's Mind: Writing as a Mode of Thinking*, Urbana, IL: National Council of Teachers of English, 1983. This collection of essays addresses writing in three ways: language and mind, the composing process, and the writer as interpreter. There is a need for such a collection for as the editors write in the introduction, "Only in understanding how writing is a mode of thinking will we be able to teach writing in ways best calculated to promote cognitive development..."

Hirsch, E. D., Jr., *The Philosophy of Composition*, Chicago: The University of Chicago Press, 1977. The author draws from several disciplines to build his case for "relative readability" being the most relevant criterion for written prose. One chapter applies the concept to teaching writing.

Loban, W., Language Development: Kindergarten through Grade Twelve, Urbana, IL: National Council of Teachers of English, 1976. His report on the longitudinal study which helped develop norms and procedures for research in writing.

-------, The Language of Elementary School Children, Urbana, IL: National Council of Teachers of English, 1963. Loban found reading achievement and effectiveness in writing were characteristics of groups with the highest language ability.

C'Hare, Frank, Sentence-Combining: Improving Student Writing Without Formal Grammar Instruction, Urbana, IL: National Council of Teachers of English, 1973. A study which developed a sentence-combining stem that was in no way dependent on students' formal knowledge of grammar.

-------, The Reader, the Text, the Poem, Carbondale, IL: Southern Illinois University Press, 1978. The best introduction to and coverage of the transactional theory of literary interpretation. This work explores in depth the role of the reader in creating and interpreting a literary work of art.

Wilkinson, A., G. Barnsley, P. Hanna, and M. Swan, Assessing Language Development, Oxford: Oxford University Press, 1980. A detailed, exciting description of the British Crediton Project. The research team analyzed samples according to 4 models: cognitive, affective, moral, and stylistic. There's a stated assumption that Britton's project had "grave limitations" because it described writing in cognitive terms only.

------, Development of Functional Communication Competencies: Grades 7-12, Urbana, IL: ERIC Clearinghouse on Reading and Communication Skills, 1977.

These two monographs offer a direct succinct explanation of the communication functions and instructional implications for the classroom teacher.

RESEARCH RELEVANT TO DEFINITION OF WRITING

Sources of supporting evidence for the considerations stated in the Writing section as well as locations of K-12 writing programs that exemplify these considerations in classroom practice are available from the Reading/Language Arts Supervisor in the Office of the State Superintendent of Public Instruction.
2. Cognitive Foundations/Language Acquisition

Britton, James, *Language and Learning*, Coral Gables: University of Miami, 1970. Britton combines psychology, philosophy and linguistics with his own experiences in teaching to discuss the role that language (primarily spoken language) plays in the child's understanding of the world.

DeCcecco, J, *The Psychology of Language, Thought, and Instruction: Readings*, New York: Holt, Rinehart & Winston. In order to gain greater understanding in thought and language, the articles included cover a variety of disciplines by well known authorities in their fields. An excellent overview of the theoretical foundations of language, thought, and instruction.

Pinnell, Gay Su (ed.), Discovering Language With Children, Urbana, IL: National Council of Teachers of English, 1980. This collection of articles has three interrelated sections: "Language and the Young Language Learner," "Language Growth in Education Environments," and "Evaluation in Language Education." These articles, based on current research, were written by scholars in this field and present implications for classrooms.

Sapir, E., Culture, Language and Personality, Berkeley and Los Angeles: University of California Press, 1961. Sapir discusses his theory of the essentially expressive nature of all speech and the way in which it moves to a greater explicitness at the expense of its expressive features when the need to communicate increases.

Vygotsky, L., Thought and Language, Cambridge: M.I.T. Press, 1962. Vygotsky describes his findings on the relationship between inner speech and later language development. He is quoted frequently by every important subsequent researcher in the field.

3. Teaching: Strategies, Issues, Texts

Brannon, Lil, Melinda Knight and Vera Neverow-Turk, Writers Writing, Montclair, NJ: Boynton/Cook Publishers, Inc., 1982. Examples of student writing are used to show various writing strategies following the writing process approach in a workshop setting.

Brown, Rosellen, et al. (eds.), The Whole Word Catalog, New York: Teachers and Writers Collaborative, 1972. The publication contains a wealth of writing ideas to stimulate imaginative responses. Teachers and Writers collaborative is tied closely to the Artists in the Schools programs. Many writers contributed ideas to this book.

Carter, Candy, and Zora Rashkis, Ideas for Teaching English in the Junior High and Middle School, Urbana, IL: National Council of Teachers of English, 1980. The ideas are organized in a three ring binder under the categories of studying language, communicating orally, reading and literature, writing, listening and viewing and is an excellent resource of materials.

Cramer, R., Writing, Reading, and Language Growth: An Introduction to the Language Arts, Columbus, OH: Charles Merrill, 1978. The teaching of writing in the lower elementary grades is treated with especially good sections on teaching editing skills and spelling.

Elbow, Peter, Writing Without Teachers, New York: Oxford University Press, 1973. Builds a thorough philosophical and practical rationale for the use of free writing as a way of discovering and developing ideas. Includes descriptions of structuring a class that's not dependent on the teacher.

------, Writing With Power, Oxford: Oxford University Press, 1981. Conversational, comprehensive discussion of topics like the impact of audience, reader-based response vs. criterion-based response, the use of non-stop writing for drafting, etc.

Graves, Donald, *Writing: Teachers and Children at Work*, Heinemann, 1983. Practical application of current writing theory by one of today's most credible researchers. Graves has spent a number of years in elementary classrooms, so he includes many specific examples to make his point.

Herum, John and D. W. Cummings, *Writing: Plans, Drafts, and Revisions*, New York: Random House, 1971. The authors outline a practical approach to writing nonfiction—the kind of writing often assigned. Early chapters suggest ways to get started and the importance of a zero draft that contains many more words than you will ultimately need. Revising techniques are also clearly explained.

Hoffman, Marvin, *Vermont Diary: Language Arts in the Open Classroom*, New York: Teachers and Writers Collaborative, 1978. This book is an informal account of four teachers' experiences in an open classroom. The philosophy supporting this concept is given. Included are many student samples of writing.

Jackson, Jacqueline, *Turn Not Pale, Beloved Snail: A Book About Writing Among Other Things*, Boston: Little, Brown and Co., 1974. Jackson writes about writing in the context of her own children's writing experiences. She uses samples of professional and her children's writing to encourage the reader to write. She includes specific ideas for novice writers to use. This is a particularly charming book to read.

Judy, S., Exploration in the Teaching of English, (2nd ed.), New York: Harper & Row, 1981. The sections on the relationships between writing and basic skills (i.e., grammars) and on evaluating writing are theoretically sound and practical besides.

Kirby, Dan, and Tom Liner, Inside Out: Developmental Strategies for Teaching Writing, Montclair, NJ: Boynton/Cook, 1981. The authors have some basic beliefs: there is a joy in the teaching of writing; all children have language that is the raw material of good writing, and teachers can find a way to tap these inner linguistic resources. This book concentrates on positive ways to teach writing including journal writing and poetry.

Macrorie, Ken, Uptaut, New York: Hayden Book Company, 1970. Macrorie's conversational explanation of his evolution as a writing teacher seeking to free students' authentic voices.

------, Telling Writing, (3rd ed.), New York: Hayden Book Company, 1980. College text which covers Macrorie's basic concepts of honest voice (the opposite of "Engfish") and free writing. Specific revision strategies are among the best in any text.

------, Writing to be Read, Revised Third Edition. Upper Montclair, NJ: Boynton/Cook, 1984. Macrorie states that "fundamental to the making of writers is fully carrying out the act of writing to be read by real persons who respond." He stresses reading aloud and sharing and responding to each other's writing. His book is full of sound advice and specific writing activities.

------, Active Voice, Montclair, NJ: Boynton/Cook, 1981. Moffett puts his theories into practice in this writing program guide concerning elementary school to college level. He applies a three-stage writing process to assignments that move from the writer's inner world out to the larger public.

Murray, Donald M., A Writer Teaches Writing: A Practical Method of Teaching Composition, Boston: Houghton Mifflin, 1968. Although published as a college methods text, Murray's comments on writing from an author's point of view are helpful to the teacher at any level.

Myers, Miles A., A Procedure for Writing Assessment and Holistic Scoring, Urbana, IL: National Council of Teachers of English, 1980. Discusses the use of holistic scoring for use in the classroom, the school, or the district.

Neman, B., Teaching Students to Write, Columbus: Charles E. Merrill, 1980. Neman's writing methods text is divided into 3 main categories: teaching expository structure, expository style, and creative writing.

Sealy, M. K., Using Student Writing Response Groups in the Classroom, Berkeley: Bay Area Writing Project, 1980. Practical advice from the director of the Bay Area Writing Project on the advantages of student groups and how to set them up effectively.

Strunk, William, Jr., and E. B. White, The Elements of Style, Third Edition. New York: Macmillan, 1979. This concise handbook, originally written by Strunk and revised by White, should be part of every teacher/writer's professional library. Topics include rules of usage, principles of composition, matter of form, words and expressions commonly misused, and an approach to style.

Tchudi, Susan and Stephen, The Young Writer's Handbook: A Practical Guide for the Beginner Who is Serious About Writing, This book is based on the belief that "one learns to write by writing." The authors state this is "an idea book and a guide." Specific types of writing are considered including journals, letter, fiction, poems, and school writing. There are also chapters on editing and publishing.

Tiedt, Iris M., Individualizing Writing in the Elementary Classroom: Theory Into Practice, Urbana, IL: National Council of Teachers of English, 1975. Like other ERIC documents in this series, theory behind the practice is discussed, in this case, the reasons for providing a classroom climate that individualizes writing. The practice includes how to set up a writing center with materials and activities.

Walshe, R. D. (ed.), Donald Graves in Australia: Children Want to Write, Rosebury, Australia: Primary English Teaching Association, 1981. Graves emphasizes the child's process of revision in the essays he contributes to this collection. In the others, classroom teachers discuss their applications of his ideas.
Zavatsky, Bill, and Ron Padgett, The Whole Word Catalog #2, New York: McGraw-Hill, 1977. This publication is an expanded version of The Whole Word Catalog, not a duplication. It deals much more with the "philosophical outlook about the role of imaginative doing in education." Many writers from Teachers and Writers Collaborative contributed ideas.

Ziegler, Alan, The Writing Workshop, New York: Teachers and Writers Collaborative, 1977. According to Ziegler, "The Writing Workshop is primarily concerned with the teaching of creative writing at any grade level, although some ideas may not be applicable with very young students... Much of this material can be applied to any writing..." The book combines "theory and process with practice and procedure." Items considered include turning the classroom into a writing workshop, the writing process, the teacher's relationship with student writers, and how to generate writing all emphasizing the individual writer.
4. Integrating the Language Arts

Cramer, D. L., Writing, Reading, and Language Growth, Columbus: Charles E. Merrill, 1978. This language arts text emphasizes all phases of writing (from language acquisition through writing as therapy and evaluation questions) and relates it to reading and spelling. Excellent blend of theory and practical suggestions. Pertinent chapter bibliographies.

Lundsteen, S. W., Listening, Its Impact on Reading and the Other Language Arts, Urbana, IL: National Council of Teachers of English, 1979.

Sebranek, Patrick, and Verne Meyer, Basic English Revisited: A Student Handbook, Burlington, Wisconsin: Basic English Revisited, 1980. Junior high students particularly enjoy using this handbook because of its humorous examples and illustrations. It is also the kind of reference book that encourages browsing with various charts and tables. As the title suggests this book is a student handbook.

Weaver, C., Grammar for Teachers: Perspectives and Definitions, Urbana, IL: National Council of Teachers of English, 1979. Discusses the relationship between grammar, reading, and writing. Also makes a distinction between grammar as product and as process.
5. Writing Across the Curriculum

Adams, F. B., "A Study of Writing as a Counseling Technique," Dissertation Abstracts, March 1981, Vol. 41, 387A. High school students and the counselors they corresponded with for six weeks both felt that writing was an effective counseling technique and should be included in public school counseling programs.

Freisinger, Randall, "Cross-Disciplinary Writing Workshops: Theory and Practice," College English, October 1980, Vol. 41, 154-166. The theoretical basis for cross-disciplinary writing is that "language for learning is different from language for informing." Freisinger builds his rationale on Polanyi's view and says that "teachers across the curriculum have limited their conception of language to the communicative or transactional function."

"Showing, Not Telling, at a Writing Workshop," College English, January 1981, Vol. 43, 55-63. Setting up writing workshops for the teachers in other disciplines requires diplomacy and inductive methods. Author explains the organization and strategies he uses in working with his colleagues.

Hayes, Irene, Writing for the World of Science and Technology, The National Education Association, 1983. (See Tchudi below.)

Herrington, A. J., "Writing to Learn: Writing Across the Disciplines," College English, April 1981, Vol. 43, 279-387. Using the rationale of writing as a means of learning, the author describes her work with interdisciplinary training workshops. She describes the writing assignments in detail.

Martin, N., P. D'Arcy, B. Newton, and R. Parker, Writing and Learning Across the Curriculum 11-16, London: Ward Lock Educational, 1976. The British Schools Council Writing Across the Curriculum Project picked up where Britton's earlier project ended. Their goal was to apply the earlier research findings. This book gives a number of examples from teachers' lessons and children's writings.

6. Curriculum Development/Inservice

California State Department of Education, Handbook for Planning an Effective Writing Program, Kindergarten Through Grade Twelve, 1983 (revised edition). Section I reviews research on the teaching of writing and the writing process. Section II describes the process in more detail and so provides a useful framework for further reading. Rest of the booklet gets into nitty gritty issues like implementing school programs and setting up staff development. (Sells for $2.50 from Publication Sales, California State Department of Education, P.O. Box 271, Sacramento, CA 95802.)

-----, Writing Programs in Washington State, 1983.
APPENDIX B

A Taxonomy of Cognitive and Affective Dimensions of Listening and Reading

by

Thomas Barrett

(from Innovation and Change in Reading Instruction, Sixty-Seventh Yearbook of the National Society for the Study of Education, Part II, pp. 19-23.)
1.0 Literal Comprehension. Literal comprehension focuses on ideas and information which are explicitly stated in the selection. Purposes for reading and teachers' questions designed to elicit responses at this level may range from simple to complex. A simple task in literal comprehension may be the recognition or recall of a single fact or incident. A more complex task might be the recognition or recall of a series of facts or the sequencing of incidents in a reading selection. Purposes and questions at this level may have the following characteristics.

1.1 Recognition requires the student to locate or identify ideas or information explicitly stated in the reading selection itself or in exercises which use the explicit ideas and information presented in the reading selection. Recognition tasks are:

1.11 Recognition of Details. The student is required to locate or identify facts or specific details.

1.12 Recognition of Main Ideas. The student is asked to locate or identify an explicit statement in or from a selection which is a main idea of a paragraph or a larger portion of the selection.

1.13 Recognition of a Sequence. The student is required to locate or identify the order of incidents or actions explicitly stated in the selection.

1.14 Recognition of Comparisons. The student is requested to locate or identify likenesses and differences in characters, times, and places that are explicitly stated in the selection.

1.15 Recognition of Cause and Effect Relationships. The student, in this instance, may be required to locate or identify the explicitly stated reasons for certain happenings or actions in the selection.

1.16 Recognition of Character Traits. The student is required to identify or locate explicit statements about a character which help to illustrate the type of person he is.

1.2 Recall requires the student to produce from memory ideas and information explicitly stated in the reading selection. Recall tasks are:

1.21 Recall of Details. The student is asked to produce from memory facts such as the names of characters, the time of the story, or the place of the story.
1.22 Recall of Main Ideas. The student is required to state a main idea of a paragraph or a larger portion of the selection from memory, when the main idea is explicitly stated in the selection.

1.23 Recall of a Sequence. The student is asked to provide from memory the order of incidents or actions explicitly stated in the selection.

1.24 Recall of Comparison. The student is required to call up from memory the likenesses and differences in characters, times, and places that are explicitly stated in the selection.

1.25 Recall of Cause and Effect Relationships. The student is requested to produce from memory explicitly stated reasons for certain happenings or actions in the selection.

1.26 Recall of Character Traits. The student is asked to call up from memory explicit statements about characters which illustrate the type of persons they are.

1.27 Recall of Author's Organization. Main headings.

2.0 Reorganizational Comprehension. Reorganization requires the student to analyze, synthesize, and organize ideas or information explicitly stated in the selection. To produce the desired thought product, the reader may utilize the statements of the author verbatim or he may paraphrase or translate the author's statements. Reorganization tasks are:

2.1 Classifying. In this instance, the student is required to place people, things, places, and/or events into categories.

2.2 Outlining. The student is requested to organize the selection into outline form using direct statements or paraphrased statements from the selection.

2.3 Summarizing. The student is asked to condense the selection using direct or paraphrased statements from the selection.

2.4 Synthesizing. In this instance, the student is requested to consolidate explicit ideas or information from more than one source.

3.0 Inferential Comprehension. Inferential comprehension is demonstrated by the student when he uses the ideas and information explicitly stated in the selection, his intuition, and his personal experience as a basis for conjectures and hypotheses. Inferences drawn by the student may be either convergent or divergent in nature, and the student may or may not be asked to verbalize the rationale underlying his inferences. In general, then, inferential comprehension is stimulated by purposes for reading and teachers' questions which demand thinking and imagination that go beyond the printed page.
3.1 **Inferring Supporting Details.** In this instance, the student is asked to conjecture about additional facts the author might have included in the selection which would have made it more informative, interesting or appealing.

3.2 **Inferring the Main Idea.** The student is required to provide the main idea, general significance, theme, or moral which is not explicitly stated in the selection.

3.3 **Inferring Sequences.** The student, in this case, may be requested to conjecture as to what action or incident might have taken place between two explicitly stated actions or incidents, or he may be asked to hypothesize about what would happen next if the selection had not ended as it did but had been extended.

3.4 **Inferring Comparisons.** The student is required to infer likenesses and differences in characters, times, or places. Such inferential comparisons revolve around ideas such as: "here and there," "then and now," "he and he," "he and she," and "she and she."

3.5 **Inferring Cause and Effect Relationships.** The student is required to hypothesize about the motivations of characters and their interactions with time and place. He may also be required to conjecture as to what caused the author to include certain ideas, words, characterizations, and actions in his writing.

3.6 **Inferring Character Traits.** In this case, the student is asked to hypothesize about the nature of characters on the basis of explicit clues presented in the selection.

3.7 **Inferring Author's Organization.** Note headings.

3.8 **Inferring Outcomes.** The student is requested to read an initial portion of the selection, and on the basis of this reading, he is required to conjecture about the outcome of the selection.

3.9 **Inferring Figurative Language.** The student, in this instance, is asked to infer literal meanings from the author's figurative use of language.

4.0 **Evaluative Comprehension.** Purposes for reading and teachers' questions, in this instance, require responses by the student which indicate that he has made an evaluative judgment by comparing ideas presented in the selection with external criteria provided by the teacher, other authorities, or other written sources, or with internal criteria provided by the reader's experience, knowledge or values. In essence evaluation deals with judgment and focuses on qualities of accuracy, acceptability, desirability, worth, or probability or occurrence. Evaluative thinking may be demonstrated by asking the student to make the following judgments:
4.1 Judgments of Reality or Fantasy. Could this really happen? Such a question calls for judgment of the reader based on his experience.

4.2 Judgments of Fact or Opinion. Does the author provide adequate support for his conclusions? Is the author attempting to sway your thinking? Questions of this type require the student to analyze and evaluate the writing on the basis of the knowledge he has on the subject as well as to analyze and evaluate the intent of the author.

4.3 Judgments of Adequacy and Validity. Is the information presented here in keeping with what you have read on the subject in other sources? Questions of this nature call for the reader to compare written sources of information, with an eye toward agreement and disagreement or completeness and incompleteness.

4.4 Judgments of Appropriateness. What part of the story best describes the main character? Such a question requires the reader to make a judgment about the relative adequacy of different parts of the selection to answer the question.

4.5 Judgments of Worth, Desirability, and Acceptability. Was the character right or wrong in what he did? Was his behavior good or bad? What is your opinion of what Jack did at the baseball game? Questions of this nature call for judgments or opinions based on the reader's moral code, value system, or personal criteria which have been internalized through experience.

5.0 Appreciative Comprehension. Appreciation involves all the previously cited cognitive dimensions of reading, for it deals with the psychological, and aesthetic impact of the selection on the reader. Appreciation calls for the student to be emotionally and aesthetically sensitive to the work and to have a reaction to the worth of its psychological and artistic elements. Appreciation includes the knowledge of the emotional response to literary techniques, forms, styles, and structure.

5.1 Emotional Response to the Content. The student is required to verbalize his feelings about the selection in terms of interest, excitement, boredom, fear, hate, amusement, etc. The focus is on the emotional impact of the total work on the reader.

5.2 Identification with Characters or Incidents. Teachers' questions of this nature will elicit responses from the reader which demonstrate his sensitivity to, sympathy for, and empathy with characters and happenings portrayed by the author.

5.3 Reactions to the Author's Use of Language. In this instance, the student is required to respond to the author's craftsmanship in terms of the semantic dimensions of the selection, namely, connotations and denotations of words.
5.4 Imagery. In this instance, the reader is required to verbalize his feelings with regard to the author's artistic ability to paint word pictures which cause the reader to visualize, smell, taste, hear, or feel.
Key Phrases to Use When Conferencing
With Barrett's Taxonomy

Level 1.0 Literal Comprehension

1.11 Recognition
Find ...
Show me ...
Locate ...
Identify the place ...

1.12 Recall
Remember ...
Tell me ...
State ...
List ...
Recall ...

Level 2.0 Reorganizational Comprehension

Compare ...
Contrast ...
List in order ...
Summarize ...
Classify ...
Can you make a group ...

Level 3.0 Inferential Comprehension

Pretend ...
Suppose ...
Consider ...
Could ...
How would you ...
What might happen if ...

Level 4.0 Evaluative Comprehension

Is it right/wrong/fair/unfair ...
Do you believe a person ...
In your opinion ...

Level 5.0 Appreciative Comprehension

How do you feel when ...
Do you know anyone like ...
Have you ever ...
What words made you feel happy/sad/etc. ...
What words made you see/smell/taste/feel/etc. ...
APPENDIX C

Definitions of Language Arts Terms
DEFINITIONS OF LANGUAGE ARTS TERMS

1. Functions of Language: The purposes for which language is used:
   (1) Communicative functions: to imagine, to share feelings, to
       inform, to control, and to ritualize; (2) Formulative functions: to
       generate ideas, to structure concepts, to speculate, to think
       critically.

2. Modes of Language: The ways in which language is used, (i.e., the
   receptive modes of listening and reading, and the expressive modes of
   speaking and writing).

3. Writing Processes: Recursive stages used by writers to produce ideas,
   organize thoughts, develop drafts, make revisions, and prepare the
   final copy for publication by proof-reading, and checking for
   appropriate usage and format requirements.

4. Prompt: a real or vicarious experience in the form of a stimulus that
   will assist students to produce a spoken or written response, (e.g.,
   picture, sound, field-trip, video tape, a childhood memory).

5. Fluency: The ability to express an idea or feeling orally or in
   writing with relative ease and confidence.

6. Prewriting: The first stage in the writing process that provides
   experiences that readies and motivates a person to write.

7. Clustering: The visual representation of the structuring of thoughts,
   events, feelings, etc., in a generative, open-ended mapping of one's
   interior landscape.

8. Holistic Scoring: The evaluation of a piece of writing for its
   overall effectiveness to fulfill its purpose without specific regard
   to spelling, grammar, usage, or any other surface feature.

9. Analytical Scoring: The evaluation of a piece of writing by means of
   close reading with score given for such features as idea development,
   organization, style, grammar, usage, and spelling.

10. Primary Trait Scoring: The assessment of a piece of writing with a
    focus on the effectiveness of the use of specific writing
    characteristics such as purpose, tone, and awareness of audience.

11. Barrett's Taxonomy: Thomas Barrett has assembled a useful hierarchy
    of comprehension skills from the less difficult literal comprehension
    skills to the more difficult skills of appreciative comprehension.
    This taxonomy is useful for the preparation of questions teachers can
    use in conferences to check for listening and reading comprehension.
