Developed to enhance the quality of secondary school U.S. history instruction, this curriculum guide provides implementation suggestions and includes the Louisiana social studies: (1) program rationale; (2) curriculum goals; and (3) program scope and sequence. The guide is divided into sections that feature the following themes: (1) toward a new nation; (2) conflict and reunion; (3) the emergence of a modern United States; (4) conflict and international power; (5) global change and conflict; and (6) problems and prospects. Each section contains an overview of learning goals and a content outline and is divided into specific teaching units. Each unit presents objective, concept, and generalization statements, along with a suggested content outline and related student activities. A vocabulary word list and suggested computer activities are included for each section, and a developed sample unit on the U.S. government branches is provided. Evaluation techniques and two bibliographies with 368 citations are included, along with an appendix containing charts of social studies skills for grades K-12. (JHP)

Act 750 of the 1979 Louisiana Legislature (R.S. 17:24.4) established the Louisiana Competency-Based Education Program. One of the most important provisions of Act 750 is the mandated development and establishment of statewide curricular standards for required subjects. As reenacted and redefined by Act 146 of the 1986 Legislature, these curricular standards include "curriculum guides which contain grade appropriate skills and competencies, suggested activities, suggested materials of instruction, and minimum required time allotments for instruction in all subjects."

During the 1979-80 school year, curriculum guides for social studies were developed by advisory and writing committees representing all levels of professional education and all geographic areas across the State of Louisiana. The major thrust of the curriculum development process in each of the guides has been the establishment of curricular standards for student achievement.

During the 1980-81 school year, the Social Studies Curriculum Guides were piloted by teachers in school systems representing the different geographic areas of the state as well as urban, suburban, inner-city, and rural schools. The standard populations involved in the piloting reflected also the ethnic composition of Louisiana's student population. Participants involved in the piloting studies utilized the curriculum guides to determine the effectiveness of the materials that were developed. Based upon the participants' recommendations at the close of the pilot study, revisions were made in the curriculum guides to ensure that they are usable, appropriate, accurate, comprehensive, and relevant. The curriculum guides were implemented statewide during the 1981-82 academic year.

The statewide implementation is not, however, the end of the curricular development process. A continuing procedure for revising and improving curricular materials has been instituted to ensure that Louisiana students have an exemplary curriculum available to them—a curriculum that is current, relevant, and comprehensive. Such a curriculum is essential if we are to provide the best possible educational opportunities for each student in the public schools of Louisiana.

I wish to express my personal gratitude and that of the Department of Education to each educator whose efforts and assistance throughout the curriculum development processes have been and continue to be vital to the attainment of our curricular goals.

LOUISIANA SOCIAL STUDIES PROGRAM

RATIONALE

Any curriculum plan should address questions of what is to be taught, to whom, and in what arrangement. It also must be concerned with who decides upon these matters. The central focus of the Louisiana Social Studies Program is the child or youth to be educated, and the program is designed for all the children of all the people of the state who choose to enroll in grades K-12 of the public schools. It is assumed that all persons are educable and that there should be a common minimal core of goals for all. Knowledge about individual differences is applied through providing differentiated recommended means to attain the minimum standards. These means include a variety of activities and resources from which to choose. It is also important to note the assumption that, while the state has responsibility with regard to minimum programs for all students of the state, local systems, schools and classrooms must still define and provide for individual and community needs.

The knowledges, skills, and attitudes treated in the Louisiana Social Studies Program guides are arranged in a developmental sequence from grades K-12 to provide a cohesive, cumulative program designed to improve the quality of learning. Statewide testing has identified past shortcomings in achievement in social studies. The present guides are designed to promote improved performance in those areas. The program arrangement or design places emphasis at the elementary school level upon acquisition of skills in a context of social studies content. The middle school grades articulate between the elementary school emphasis on skills and the secondary school emphasis on content as well as the changes from the self-contained classroom to departmentalized patterns. At the secondary level, emphasis is upon further development and application of skills to new learning tasks. At this level, the activities using study, reasoning, discussion and group participation skills previously introduced are necessary to the continued development of these skills and to the attainment of overall course goals. It is also assumed to be the case that, while there are few specific affective objectives within the secondary course guides, the activity selections are proper means to affective development for adolescents in the public high schools. The activity program for students encompasses learning procedures with potential for increasing interest, empathy, sense of justice, respect for others, and other attitudes consistent with democratic values. Thus, the arrangements of objectives, content, and activities are integrally structured so that they will contribute to the attainment of program goals and course objectives.

Decisions about what is to be taught are made through the democratic structure and processes established by the state of Louisiana for enactment of school laws and policies. Professional aspects of the curriculum development tasks have been designed to fulfill the principle that the quality of decisions can be improved through involvement of all parties concerned and having contributions to make. Representation of a broad array of educators has been provided throughout. Materials developed by other school systems have been sampled, and recommendations by professional and scholarly societies have been analyzed in relation to the Louisiana curriculum development project. The overall framework with explicit written documents also lends itself to accountability and to continuing improvement.
It seems proper to conclude this statement of the Louisiana Social Studies Program Rationale with Thomas Jefferson's broad and enduring statement of the rationale for American public education:

"I know no safe depository of the ultimate powers of the society but the people themselves; and if we think them not enlightened enough to exercise their control with wholesome discretion, the remedy is not to take it from them, but to inform their discretion by education."
LOUISIANA SOCIAL STUDIES CURRICULUM PROGRAM GOALS

I. Develops an understanding of the relationships between human beings and their social and physical environments in the past and present; develops an understanding of the origins, interrelationships, and effects of beliefs, values, and behavior patterns; and applies this knowledge of new situations and data by:

A. Acquiring knowledge about social organization.

B. Acquiring knowledge about the relationships between human beings and social environments; understanding some of the effects of these relationships, and making value judgments about the consequences of these relationships.

C. Acquiring knowledge about the relationships between human beings and the physical environment; explaining some of the effects of these relationships; and making value judgments about the consequences of these relationships.

D. Acquiring knowledge about decision-making processes.

E. Acquiring knowledge about conflict and the impact it has on individual and group relationships and making value judgments about these relationships.

F. Expressing awareness of some of the beliefs and values expressed by people and recognizing that the times and places in which people live influence their beliefs, values, and behaviors.

G. Demonstrating knowledge of ways beliefs and values are transmitted in various cultures.

H. Acquiring knowledge about some of the influences beliefs and values have on relationships between people.

II. Develops the competencies to acquire, organize, evaluate, and report information for purposes of solving problems and clarifying issues by:

LOUISIANA SOCIAL STUDIES PROGRAM

Scope and Sequence

The schematic diagram, "Scope and Sequence for Louisiana Social Studies," graphically represents major features of the social studies education program design. It shows the child as the center and dominant interest of the program. At the top of the chart are the Conceptual Strands encompassing Economic Organization, Historical Heritage, Political Organization, Political and Cultural Geography, and Social Organization and Culture. These strands indicate selection principles to be used in drawing upon the disciplines of anthropology, economics, geography, history, political science, and sociology for course content. The design of the elementary program, then, is shown to be multi-disciplinary. The central concepts recurrently treated throughout the program are identified in the "Conceptual Strands Chart" that follows the Scope and Sequence Chart.

Sequencing is based upon the spiral pattern of introducing concepts and skills then treating them at increasing levels of complexity from grade level to grade level. The Themes show, in the diagram of the chart, are used in selecting and sequencing course content. Through grade 6 there is a modified expanding horizon pattern beginning with that which is familiar and near to the child—the Family Community. The program then sequentially proceeds outward through School and Local Community, Contrasting Communities, Regional Studies, National Studies and World Studies. The middle school grades then reverse this pattern. World Studies in the sixth grade is followed by American Studies and then moves homeward again with the Louisiana Studies course. The United States Studies and Louisiana Studies courses are designed as broad cultural studies to provide the scope of experiences appropriate to the age group. These courses are also designed for articulation with other aspects of the middle school curriculum and the senior high separate subject design. The required high school courses for which minimum standards and curriculum guides are being developed at this time are Civics, Free Enterprise, and American History.

Another major component of the program's scope and sequence is represented by the accompanying skills charts. One of these shows those skills that are shared with other subjects and the other shows those that are major responsibilities of the social studies program. The skills are coded with asterisks showing the grade levels at which they are to be introduced, developed, mastered and continued for increasing sophistication. These charts are adapted from the rather extensive array of skills identified by the National Council for the Social Studies.

In addition to the charts, the Louisiana Social Studies Program is further defined by the statements of program goals and course objectives and by course content outlines, unit overviews, and suggested activities and resources. Collectively these features seek to fulfill the ABC's of curriculum—articulation, balance, and continuity—and, thereby, to provide a cumulative, developmental framework for Louisiana's children and youth.

USING THE GUIDE

Skills Charts

Note that there are two skills charts in the appendix. One of these charts identifies skills that are to be cooperatively developed and are, therefore, shared responsibilities of social studies teachers and others. The other chart designates those skills which are the major responsibility of the social studies program. These charts have been adapted from skills charts developed by the National Council for the Social Studies. The skills are listed and coded to indicate the nature of responsibility for each grade level. One asterisk means that the skill is to be introduced at the grade level indicated. Two asterisks mean that work is ongoing toward mastery. Three asterisks denote the grade level at which the skill should be mastered. Subsequently, practice is to be continued and some skills are to be developed at increasingly more sophisticated levels. This continuation is shown by four asterisks. These two charts provide a guide to be developed and used at various levels of pupil progression and should facilitate analysis and planning for advancement and remediation.

Pupils develop skills more effectively where there is systematic instruction and continuing application of the skills. The following principles of learning and teaching have been emphasized as a basis for the social studies skills program:

1. The skill should be taught functionally, in the context of a topic of study, rather than as a separate exercise.

2. The pupil should be helped to understand the meaning and purpose of the skill in order to stimulate motivation for developing it.

3. Careful supervision should be provided in the first attempts to apply the skill so that correct habits will be formed from the beginning.

4. Repeated opportunities to practice the skills should be provided along with immediate evaluation so that future efforts may be guided by knowledge of successful or unsuccessful performances.

5. Individual help based upon diagnostic measures and use of selective follow-up exercises should be provided. Not all members of any group learn at exactly the same rate or retain equal amounts of what they have learned.
6. Skill instruction should be presented at increasing levels of difficulty, moving from the simple to the more complex. Growth in skills should be cumulative as the learner moves through school. Each level of instruction should build upon and reinforce what has been taught previously and lead toward subsequent development.

7. At each stage students should be helped to generalize the skills by applying them in many and varied situations. In this way maximum transfer of learning can be promoted.

8. The program of instruction should be sufficiently flexible to allow skills to be taught as they are needed by the learner. Many skills should be developed concurrently.

In applying these principles, teachers should remain aware that although it is possible to make a general plan for continuity in skill development, it is not possible to set a precise place in the school program where it is always best to introduce a specific skill. Many factors enter into the final decision of the teacher working with a specific class. True continuity in skill development is that which is developed with the learner, not that which can be blocked out in a general plan. Furthermore, it can never be assumed that a child has gained command of a particular skill merely because he has been exposed to it. Review and reteaching of skills that have been stressed at an earlier grade level are often necessary, even with the most capable students.

The suggested grade placements indicated in the chart are based upon a combination of current practice and the subjective judgments of many teachers, including the authors. The recommended placements reflect what young people seem to be able to achieve within existing patterns of instruction. It is possible that pupils could achieve earlier and more effective command of many aspects of social studies skills if new patterns and approaches for instruction were employed. More systematic and intensive readiness experiences, for example, might enable children to profit from systematic instruction in skills at an earlier age. If so, they would gain an earlier command of tools that could enhance their learning through the rest of their school years. On the other hand, it is possible that present practice calls for instructions in some skills before the learner has developed the necessary related concepts. If so, he may not only fail for the moment but also be handicapped in later efforts to gain control of the particular skill. Almost no research evidence exists to guide the proper grade placement of skill instruction. Evidence of this kind is urgently needed as a basis for improving the teaching of social studies skills. It is the hope of the authors that their efforts in preparing this guide to the analysis and grade placement of skill instruction will stimulate such research in the years immediately ahead.

Activity Charts

Each section and/or unit of the course includes an orienting Overview and a Content Outline for that part of the course. The Activity Charts are set up to show relationships among objectives, concepts
and generalizations, sections of course content, and activities. The parts are designed so that the content serves to clarify the objectives and the activities provide for application of developing skills. Each section and/or unit includes suggested references to encourage teacher reading and to facilitate pupil guidance.

Since Social Studies has a special vocabulary, students must have a good understanding and a working knowledge of the unique words, terms, and phrases of social studies in order to be successful in the classroom. A suggested Vocabulary List is also included at the end of each unit. Teachers are encouraged to emphasize vocabulary development throughout the course of study.

Grade Level Standards

An asterisk beside an objective means that it is a Grade Level Standard, an objective which students should master during a particular course of study. These Grade Level Standards were identified by the teachers on the writing committee as the most essential for inclusion in an American History course. These Grade Level Standards are not intended to become the only objectives for the programs. Clearly, some situations will be conducive to pursuit of all the suggested objectives. Others will require additional objectives pertinent to teaching skills, meeting individual needs, pursuing local purposes, and so on. It should be kept in mind that it will be at least 12 years before any student will have completed the total program. There will also be program changes, transfer students, and other conditions such that good instructional practice will continue to require informed adaptation to the local situation.

Activities

The concept of minimum essentials necessarily implies that mastery of the competencies is the minimum aim for all pupils. While these objectives are the same for all students, there are diverse ways for seeking mastery. The Activity Charts are designed to include three levels of approaches.

The activities are designated as follows:

"A" are for students achieving at grade level
"B" are for students who are behind grade level
"C" are for advanced students.

The matching of students with activity levels is a task of the classroom teacher and may be accomplished in a variety of ways. Additionally, teachers should use their professional judgment in modifying any activity to suit the particular needs of their students. There is no requirement that a particular student always be assigned the same level of activity. One individual may be assigned "A" level for some objectives, "B" level for others, and "C" level for still others. A given class may or may not have students assigned to all three levels of the activities.
Concepts and Generalizations

The primary concepts that are recurrently dealt with in the Louisiana K-12 Social Studies Program are identified in the Conceptual Strands Chart accompanying the Scope and Sequence section of this guide. Each Activity Chart also has identified concepts specific to the study at hand.

Neither concept statements nor the generalizations should be read or given to the student in any manner or form. They are intended to be outcomes or understandings derived by the students from engaging in the activities and studying the various topics. As recent investigations have pointed out, the most permanent learning is that which takes place through individual discovery. The instructional program should be implemented in such a way that the concepts and generalizations will be developed by the pupils. The concepts may also be used as guidelines for testing and measuring the student's understanding and comprehension of the basic ideas.

Teaching Units and Lesson Plans

Each teacher will find it necessary to develop the resource units structured by the curriculum guide into teaching units and lesson plans. These latter plans should include the necessary adaptations for particular individuals, classes, and settings. For example, introductory interest-arousing techniques and culminating features of lessons and units need to be designed with and for the local participants. Some objectives may be deleted or augmented. Locally available reference materials must be identified. Application exercises must be suited to the locale. Also, a model teaching unit is included in the guide to assist teachers in development of similar units appropriate to the course. The purpose of this unit is nothing more than a way of organizing for teaching. A teaching unit can be devised only by the classroom teacher who will be teaching that unit to a particular group of students. Here, specific topics, content, objectives, resources, and teacher techniques which suit the abilities and needs of those students are decided upon and used.

Teacher-made tests need to be designed for the program that is actually taught. These should include selected evaluative activities pertinent to the minimal essential competencies as well as other to aspects of the program of the class. Some suggestions relating to evaluation are provided in the present guide.

AMERICAN HISTORY

Section I. Toward a New Nation

Overview

The overall design of the social studies program suggests that the lower grades emphasize the early periods of American history and that the senior high school American History course emphasize later periods. The present section, then, should be in the nature of reviewing, deepening, and enriching prior studies. Studies are to touch upon European and Native American precursors to the discovery, exploration, and colonization of North America and to clearly set forth a foundation for considering the diverse peoples who have become Americans.

Students are to come to understand that many of the activities of the colonial and early American period were extensions of the commercial revolution in Europe and that a number of causal factors shaped the era. They are to expand appreciation of motivations and experiences of immigrants and of those whose lands were being confiscated. The design sets forth activities intended to deepen understanding that certain individuals and circumstances have come together in ways that have significantly affected human history. Studies are to emphasize how European precedents and creative American efforts forged a Constitution and workways to achieve sufficient stabilities and scope for change.

The design of activities includes attention to map and study skills, group participation, and opportunities for experiences associated with affective development. Occasions for experiencing a range of human motives, value conflicts, noble and ignoble responses to varied circumstances and causes of human anguish and celebration are central features of effective education through studies of history.

Overview

The design of this section of the senior high school American history course provides opportunities to continue developing appreciation of American diversity and sources of unity. Students are to trace patterns of geographic mobility and expansion and to recognize institutional roots being laid in relation to geographic, political, and economic opportunities and constraints of nineteenth century America. They are to learn about the political process as studies are made of the nature and impact of Jacksonian democracy and the agonies of secession, the War Between the States, and Reconstruction.

Students are to be provided opportunities to sample a wide range of human behaviors and emotions involved in the vigorous frontier life including the extremes associated with human slavery and the warring of immigrant with Indian, colonist with mother country, and brother against brother.

AMERICAN HISTORY

Section III. Emergence of Modern America

Overview

Students are to trace the emergence of the United States from the Armageddon of the War Between the States into an era of enterprise and economic prosperity on an unprecedented scale. Demographic shifts, political coalitions, and class conflicts are to be viewed as they relate with new institutions including big business, big labor, and big government. Examples of ingenuity and inventiveness in many spheres of life provide opportunities for students to become intrigued with questions about conditions that contribute to increasingly creative, productive, just, and humane societies. As chronological chains of events are traced, both continuities and changes may be used to illuminate such possibilities.

The course design includes historic examples of militarism, nationalism and imperialism, and activities to encourage reflection upon domestic and international consequences of such policies and programs. The activities of this section are intended to make globes and information about current events take on new depth and meaning.

AMERICAN HISTORY

Section IV. Conflict and International Power

Overview

Students are to come to understand the multiple chains of events that erupted into the world's first global war. They are to gain insight into conflicts and compromises, alliances and arrays of interests that were involved and to seek out missed opportunities to deflect violence and pursue alternatives to war. Opportunities for empathetic experience are a part of the activity design and are intended to aid development of this necessary component of historical study.

The design of this section of the course allows opportunities for "postholing" or selected in-depth study of aspects of the era which have special interest for a particular local school system, for an individual teacher, and/or for individual students. Students and teachers are to be encouraged to seek out and use primary resources of various kinds. Persons, pictures, letters, magazines and so on for the early 1900's are still commonly accessible and frequently evoke effective responses worthy of cultivation.

(C) Using a textbook and the attached paragraphs on the Fourteen Points Program, check each sentence that states a point in the program for peace.
WILSON'S FOURTEEN POINTS

The first five points were aimed at improving relations among nations. Point number one said that nations must deal openly with each other and not make secret "deals." Nations should also enjoy freedom of the seas, trade with each other, and build fewer weapons.

The next eight points dealt with giving Europeans freedom. Many small countries in eastern and southern Europe had been conquered by their more powerful neighbors. Now those people were given the right to decide how and by whom they wished to be governed. This right of the people to choose their own government was called "self-determination."

The fourteenth and final point was the one closest to President Wilson's heart. To prevent future wars, he proposed an organization called the League of Nations. Members of the League were to discuss their problems and differences, not go to war over them. "Great and small states alike" were to show respect for each other.

The Fourteen Points were announced early in 1918. Wilson hoped that all the European nations would agree to them when peace talks began. Late in 1918 the Germans asked for a cease-fire and a peace based on the Fourteen Points.

( ) 1. All nations had the right to enjoy freedom of trade.
( ) 2. Germany should give up all territory seized during the war.
( ) 3. Governments should make no security agreements that would lead to war.
( ) 4. Germany should be broken up into smaller countries.
( ) 5. Nations should reduce their war forces.
( ) 6. The high seas should be open to all nations in peace and war.
( ) 7. Each power should be ready to go to war to preserve peace.
( ) 8. Small European nations should not be controlled by greater ones.
( ) 9. All possessions in Africa and Asia should be given their independence.
( ) 10. A League of Nations should be established to preserve peace.

Overview

Students are to understand that the 1920's have been characterized as the Roaring Twenties, the Age of Disillusionment, the Jazz Age, the Decade of Wonderful Nonsense, the Ballyho Years, the Golden Twenties, and the Age of Innocence. They are to understand that it was also a period of marked discrepancies between classes, of political bosses and corruption in many cities, oppression of various "out groups," and frenzied speculation resulting in the stockmarket crash of 1929 and the subsequent depression.

The design of this section involves both internal and international studies. The actions Roosevelt termed an "epidemic of lawlessness" involved powers in the Pacific and in Europe. The series of conquests, occupation of lands belonging to others, and violations of treaties and arguments escalated into global war on a massive scale. Students are expected to achieve meaning for many subsequent events through studies of this era. They are to be encouraged in affective development as injustices become recognized. Alternative actions in the interest of human well being should be explored to enrich the intellectual range of factors considered in decision making.

Overview

The design of this section extends from the Truman years to the re-election of President Ronald Reagan. Students are to come to understand that beliefs, life styles, and values vary according to the place and circumstance and have profound consequences in human history. They are to learn about demographic patterns with the continuities and changes that have occurred during the twentieth century. Cycles of prosperity and depression provide occasions for trying to sort out causal factors related to each and to expand the options to be considered in seeking to improve the quality of life in the future. Students are to be taught about the New Deal, the Fair Deal, the New Frontier, and the Great Society programs of social legislation. The program of studies encompasses opportunities to gain insight into the massive mobilization and destructions of World War II. Studies of the subsequent reconstruction period show how some individuals, groups, and nations have arisen phoenix-like to new powers and prosperity. The dismantling of former empires, the forging of new nations, and the recurrent hot and cold conflicts that followed convey continuities and changes that have characterized human history.

Students are to be engaged in activities to promote understanding of domestic and global developments, to encourage recognition of injustices, and to increase capacities for appropriate intellectual, social, and affective responses.

Evaluative Techniques

Purposes of evaluation in the social studies program are to improve curriculum, instruction, and learning. Each program and course should have an overall evaluation design encompassing the full array of goals and objectives. Evaluation requires more than testing, marking papers, and filling out report cards. The design, for instance, may include plans for evaluation of a textbook, a film, an activity, or even an examination item. In addition, some important evaluative information about affective development or side-effects of classroom activities may be inappropriate for use in grading pupils but crucial to improving instruction. Instruments and procedures for use in evaluation include observation checklists, rating scales, and questionnaires. There is also a wide variety of examination forms and types of questions from which one may choose.

Any major change in courses and programs should be accompanied by corresponding changes in the evaluation design. As the study and thinking habits of students are to some extent geared to the testing and reporting methods used by the teacher, the design of examinations and choice of test items should be as deliberately chosen as teaching methods and materials. It is extraordinarily difficult to keep students vitally involved in considerations of contemporary affairs, observations of relationships, and empathetic caring about other persons and civic decision making when they are anticipating that immediate success or failure depends upon ability to recall huge quantities of details on an examination. Clearly, there needs to be an alignment of objectives, content, teaching methods, and testing.

The essay item is admirably suited to testing ability to reason, organize, and write effectively. The scoring difficulties may be somewhat ameliorated by describing the nature and scope of responses desired.

Example: In an essay of one or two pages, discuss the G.I. Bill. Include information about time, numbers, and persons involved to emphasize the long-range political, economic, and social consequences.

Example: Write a three-page bibliographic essay. Include works with contrasting interpretations of the Lyndon B. Johnson administration. Defend your choice among the positions developed by the authors included.

Questions requiring short answers tend to be more limited in the depth of responses elicited but expand the scope of the sampling of items that can be included in a single examination.

Example: Identify each of the following persons in a paragraph or less:
1. Wendell Willkie
2. John Jacob Astor
3. Marion Anderson
4. Eleanor Roosevelt

Example: In an essay of one or two pages, discuss the G.I. Bill. Include information about time, numbers, and persons involved to emphasize the long-range political, economic, and social consequences.
Example: Briefly describe the characteristics of a market economy.

Example: Define and contrast the functions of the legislative, executive, and judicial branches of government.

Most teachers are familiar with a variety of "easy scoring" types of test items. These can vary in levels of complexity and, when carefully and skillfully framed, can assess achievement of a considerable range of objectives. Bloom's Taxonomy, which is referenced at the end of this section of the guide, provides a collection of examples to assist in developing skill in matching items and levels of objectives. Objective test items need not be limited to trivial item-detail recall. For example, objective multiple choice items may be developed so that to some extent "why" rather than simply "who, what, where, and when" responses may be required.

Example. Thomas Jefferson advocated the purchase of Louisiana because:
   _____ 1. The vast territory would enhance the power and prestige of the United States.
   _____ 2. He did not want Louisiana to become a British possession.
   _____ 3. He was afraid the United States would be hemmed in by foreign powers.
   _____ 4. All of the above.

Questions like the above may be made to require higher levels of thought by pairing with other instruction such as: State reasons or cite evidence that would support your choice. This could be made into a "DBQ" (Documented Based Question). Access to references to be used in developing a response is an important feature of this type of test item.

Questions about chronology are essential to history examinations and aspects of tests in other social studies courses. They may serve to enhance development of a sense of history and to remind students that focusing upon chronological sequences is one way of understanding the world in which we live. Such questions can be organized in various ways.

Example: Place the letter of the event which occurred last in spaces provided for each of the following:
   _____ 1. (a) Battle of New Orleans
       (b) Treaty of Ghent
       (c) Capture of Washington, D.C.

   _____ 2. (a) Surrender of New Orleans
       (b) Burning of the State Capitol
       (c) Battle of Mansfield
Example: Select and place beside the listed events the letter of the period that shows when the listed events occurred.

(a) 1560-1700, (b) 1700-1750, (c) 1750-1800, (d) 1800-1850

1. Crozat's grant
2. Louisiana Purchase
3. Founding of Fort Maurepas
4. Louisiana transferred to Spain
5. Donaldsonville became the Capital of Louisiana

In the evaluation of geographic concepts, the use of "map-correlation" questions is appropriate. With this type of test item the pupil has before him a map or maps and questions to be answered. Duplicated, textbook, or other maps may be used.

Example: Look at the reference map(s) and respond to the following by placing the letter of the correct responses in the spaces provided.

1. Which area is hilly? (a) Claiborne Parish, (b) Cameron Parish, (c) East Baton Rouge Parish, (d) Lafayette Parish.
2. Which area has climate most suitable for growing wheat? (a) Mississippi, (b) Florida, (c) Kansas, (d) Massachusetts.
3. Which one has the densest population? (a) Maine, (b) Wyoming, (c) Pennsylvania, (d) Louisiana.

Example: Look at the reference map(s) and respond to the following:

1. Mark the portion of the outline map to show where you would most likely find hardwood forests.
2. Where would you most likely find the locations of antebellum plantation homes? Why were they located as they were?
3. Why are Monroe, Shreveport, Baton Rouge, and New Orleans manufacturing centers?
If there is a clearly thought-out overall evaluation design and if a variety of types of instruments and examination items are used, pupils' skills and understandings of the flow of events, of cause and effect relationships, and of the "how" and "why" of social studies materials can be more effectively represented.

The bibliography of this section suggests some references that include many interesting examples of types of examination items for clearly identified objectives. They are of a variety which may serve as a stimulus to the creative potential of social studies teachers and aid in developing tests that measure what is intended with validity and reliability.
