The curriculum guide for Latin outlines the general and specific objectives and content of the courses to be offered in the Jefferson County (Colorado) public junior and senior high schools. An introductory section describes the district's comprehensive and second language education goals and philosophy, summarizes the findings of the President's Commission on Foreign Languages and International Studies, discusses psychological and neurological studies, and reports Scholastic Aptitude Test scores concerning second language education. The first section also provides a mission statement, outlines the targeted language and cultural skills, and recommends general instructional strategies. Subsequent sections contain the objectives and behavioral expectations or goals for each course, tests and keys, a verb table, games, activities, teaching strategies for specific areas of linguistic content, and unit reviews and practice guides for some courses. FOREWORD

The Comprehensive District Goals and the goals for second language instruction in the Jefferson County School District R-I provide realistic statements useful for both the district in general and the classroom in particular. The district goals as specified below call for mastery of basic skills, development of responsibility, development of unique talents and a sense of worth, learning to influence change and development of skills necessary for a citizen. The goals for the Board of Education, Superintendent and Staff are stated below.

Goals For Students:

Master the basic skills for continued learning.

Develop a sense of responsibility — act with understanding and respect toward others.

Develop unique talents and a sense of worth.

Learn to influence change and benefit from it.

Develop skills and attitudes needed to earn a living and contribute to society.

Goals for the Board of Education, Superintendent and Staff:

Act with foresight and responsiveness toward students, constituents, staff and the future.

Understand and promote cooperation among individuals, organizations and institutions.

Acquire, develop and use human, fiscal and material resources effectively.

These district goals and the goals for second language instruction were developed after extensive discussion by board members, the superintendent, the staff, teachers, community representatives and students. While these are realistic goals, they should be viewed as the result of a concerted effort to promote continuous improvement of instruction.

The study of a modern and/or classical language plays a vital role in the acquisition of a high quality education. Second language study not only enables the student to develop proficiency in the target language, but it also serves to broaden the student’s command of English and linguistic principles in general. The senior high and junior high program offerings include French, Russian, and Spanish. High schools also offer German and Latin. These courses are designed to develop the student’s ability to listen to and understand, speak, read, and write the second language. In addition, students acquire knowledge and understanding of the diverse cultures of people for whom the second language was and is the preferred means of expression. This experience enhances career options and affords opportunities to pursue a variety of professional and personal interests.

From the perspective of the teacher, language learning is one of the most exciting adventures in education. The successful teacher watches students pass through several stages. At first, the student realizes that another sound system can represent thinking and abstract ideas. As the student progresses, confidence is gained in all communication skills and awareness of a larger community becomes a reality. The student begins to think in a mode unique to the people whose language he/she is learning to speak, and can recognize that there exist differences and similarities between cultures.

Different types of research emphasize the importance and need for quality second language education in the United States. Such research focuses on four major areas as a rationale for second language study.
These include the economic survival as a nation, diplomatic and strategic needs, cognitive development resulting in student test score enhancement, and the identification of positive characteristics among polyglots via medical research focused on neuropsychological and neurolinguistic differences.

This guide was developed in fulfillment of Colorado statutes and Board of Education policies. These include the Colorado Revised Statutory Law 22-32-109 which empowers School District Boards to determine the educational programs to be carried on in the schools of the district, and to prescribe the textbooks for any course of instruction or study in such programs. School Board Policy 1H states, “It is the expectation of the Board of Education that the approved program will be implemented in all schools.”

According to the Certificated Employees’ Agreement 14-8, “Teachers are expected to follow the approved District curriculum subject matter.”

This guide was originally developed in 1982, and has undergone many editorial revisions as a result of field testing and piloting. In 1986, a final evaluation study was completed, and full faculty meetings were held to discuss document enhancement, curricular content, and strategies. In 1987, this guide was completed and presented to the Board for approval.

This guide is intended for use by all teachers of Latin. It represents the culmination of many years of preparation and stands as a guidepost for the continuous improvement of second language instruction.
PHILOSOPHY

A second language is basic to the development of the well educated person who needs to communicate with linguistic minorities in the community and to interact with citizens of other countries. Knowledge of a second language leads, not only to improved communication, but can and should serve to develop the linguistic skills and cultural knowledge of citizens who, in the future, will come in direct contact with citizens of other countries because of international trade, diplomatic relations and cultural exchanges.

The President's Commission. The President's Commission on Foreign Languages and International Studies addressed the need to improve the foreign language competence of citizens as a necessity rather than as a luxury:

The President's Commission believes that our lack of foreign language competence diminishes our capabilities in diplomacy, in foreign trade, and in citizen comprehension of the world in which we live and compete. Americans' unwillingness to learn foreign languages is often viewed by others, not without cause, as arrogance. The melting-pot tradition that denigrates immigrants' maintenance of their skill to speak their native tongue still lingers, and this unfortunately causes linguistic minorities at home to be ignored as a potential asset. (Perkins 1979)

Psychological and Neurological Studies. In addition to the international and ethnic concerns of the President's Commission, studies on the bilingual brain and on the individual provide another rationale for the study of second languages. Albert and Obler's (1978) conclusions drawn from their research in neuropsychology and neurolinguistics point out the positive characteristics bilinguals may develop because of their linguistic skills. A profile of the bilingual drawn from their statements depicts an individual who, as a young bilingual, demonstrates a normal rate of development in nonverbal skills contrasted with verbal skills which mature earlier. Becoming verbally very skillful as an adult, the bilingual appears to demonstrate greater ability than monolinguals in using abstract aspects of language, greater cognitive flexibility and greater linguistic sensitivity.

Albert and Obler suggest that bilinguals may differ from monolinguals by maturing earlier both in terms of cerebral lateralization and in the acquisition of linguistic abstraction skills. Their enhanced linguistic sensitivity may be due to experience in acquiring a second language since this induces sensitivity to universals of phonetic symbolism. In addition to their observations on the bilingual individual, Albert and Obler found in a series of postmortem studies on polyglot brains that certain brains were especially and markedly furrowed. They noted (1978: 95) that "Postmortem studies of polyglot brains... give evidence that knowledge of multiple languages has anatomical consequences."

College Board SAT Scores. A summary of 1981 SAT scores, published by the College Board Admissions Testing Program, correlates verbal and math SAT scores with the study of specific subjects, including foreign languages (Profiles of College-Bound Seniors 1981). These data indicate that, "The students who had taken two years of foreign language courses (35.5%)... had significantly higher SAT mean scores: 417 on the verbal, 463 on the math — increases of 14% and 13% over the scores of those who had taken no foreign languages... Comparing the SAT mean scores of students who had no foreign language courses with the scores of those who had studied foreign languages for five years reveals increases of 37% for the verbal and 31% for the math."

The College Board summary also compares the scores of students in foreign languages with those in other subjects including English, math, biological sciences, physical sciences and social studies. In brief, "Students who had taken four or five years of foreign language courses also had higher verbal SAT mean
scores than had students who had taken "our or five years of any other subject."

"On both the verbal and math portions of the test, the SAT mean scores of students who had studied foreign languages for three or more years (37.5% of those tested) were higher than the mean scores for the total population of seniors tested, as were the SAT mean scores of students who had studied a physical science for three or more years (23.5% of the total)." These data drawn from an educational perspective lend support to Albert and Obler's neurological findings on cognitive development related to bilingualism.

The greater metropolitan Denver area, including Jefferson County, has been identified as one of the nation's major growth areas (Nesbitt. 1982). Such growth areas will become increasingly involved in targeting linguistic minorities for marketing purposes and in exporting from Colorado-based industries. Business projections, as well as the national needs and neurological findings as supported by SAT scores, all reinforce the President's Commission statement that second language learning is an absolute necessity.

Mission Statement. The mission statement of the Jefferson County School District calls for an intellectual development that is useful and relevant to the society of the next century. An additional district document (Baum 1984:11) reinforces this statement and supports the notion that the district must provide an education that is "future oriented and national rather than provincial in outlook and scope." Teachers involved in second language instruction, as part of the total educational, program must prepare students today to function as citizens tomorrow.

Language Skills. The communication processes are based on the four fundamental skills of listening, speaking, reading and writing. These skills complement and reinforce each other. Classes should be conducted in the target language, should emphasize real communicative skills and should be filled with material drawn from the target culture. A balance must be achieved among the four language skills in such a way that oral proficiency strategies serve to develop real comprehension and speaking skills.

Culture. Culture must be an integral part of all teaching activities. To this end, students should develop an understanding of different and similar codes of behavior relative to American and classical cultures. They should develop an understanding that social class, sex and education play an important role in the way people speak and interact. An awareness of the cultural connotation of words should be developed. Students should also develop the ability to critique cultural generalizations as to their veracity and comprehensiveness.

One's own way of life and beliefs constitute one's culture, and by studying other languages and other ways of life, an individual gains valuable insights into his or her own culture and an increased awareness in dealing with other peoples. The integrating of culture into teaching activities can provide an avenue for developing an interest in the target culture and people thus addressing the national needs outlined by the President's Commission.

Strategies. The importance of speaking, comprehension skills, other language skills and a knowledge of the target culture suggests certain useful strategies.

The following represents a series of suggested strategies for the teaching of second language. The Curriculum Guide provides a leveled framework of linguistic structures. The teacher can select the most appropriate method and means for presentation of the material based upon student interests and needs. However, the instructional focus must be to cultivate oral proficiency. Oral proficiency activities must be supported through a solid foundation of listening, reading and writing activities. Although the structures are presented in a sequential format, the second language must be taught according to a recursive strategy. Linguistic structures must be reviewed and reused in a recursive manner as explained later and shown in the diagram on page xv.
Upper level classes (301-502) must provide students with opportunities to expand their critical thinking skills through the reading and analysis of the classics of literary tradition as recognized by the profession. Selections must be made from the approved reading list based upon the relationship to the curriculum and the appropriateness to the maturity level of the students. Reading of literature is a very important component of any language class. All levels should emphasize reading.

Krashen found that the effects of reading exposure point strongly to the conclusion that reading is of great help in developing language skills. "Reading exposure is the primary means of developing language skills." (Krashen, 1985, p. 109) Based upon a solid reading and composition strategy, the teacher will have material of substance to discuss. Language will serve as a useful tool to achieve communication via this approach.

Writing must be taught as a critical thinking skill.

Writing, because it is output and not input, does not cause language acquisition. As others (for example, Smith 1983) have pointed out, writing serves two purposes — it helps us communicate with others, and, perhaps more important, it helps us clarify our thinking and develop new ideas. (Krashen, 1985, p. 132)

Many traditionally trained teachers believe strongly in teaching second languages through a grammar-translation method. However, "research since 1906 indicates that the formal study of grammar does not contribute significantly to the development of reading and writing ability." (Krashen, 1985, p. 133)

Krashen calls for "comprehensible input" at significant levels prior to language production. For this reason, classes must be taught in the target language, but at a level of student comprehension. He further emphasizes the need for the low anxiety learning situation to establish a healthy "affective filter" for acquiring language. He differentiates "learning" about a language from "acquiring" functional skills of proficiency in a language. The Jefferson County model stresses the importance of student acquisition of a second language. In order for this to occur, classrooms need to be stimulating in a positive manner and reflective of the language and culture being taught. Strategies used should be exciting, success-based and non-threatening to the student.

A typical class plan should include the items indicated in the diagram on the next page.

The orientation and warmup is necessary for students to become acclimated to the demands of the second language phonetic system. It also sets the tone and class expectations. The core presentation must include the four language skills of listening, speaking, reading and writing. Three strategics are particularly helpful for teaching these skills. The materials should be personalized to the interests of the students. Activities centered around the students' points of reference will provide for an interesting and low anxiety base for learning to occur. Skill building (grammar) activities can be woven into the fabric of the class as a natural explanation of language systems. Culture should be taught as an integral component of daily activities. Culture includes both historical and contemporary aspects of the target linguistic group. Contemporary culture can be presented through newspaper and magazine clippings. Foods, songs, poetry, short stories, dances and rhymes should be used at every opportunity. However, these secondary manifestations of culture must not be presented as culture but should be presented as outgrowths of the culture. Culture is the symbolic system that encodes the values of humanity at the levels of language, social structure, and world view. These three levels are represented by the foods, songs, poetry, etc.

An active class is an exciting experience. Total physical response to vocabulary acquisition is a meaningful approach to learning. Furthermore, neurolinguistic and neuropsychological research indicates that "second language might be more easily learned it if were taught through nursery rhymes, dance, or techniques emphasizing visuospatial skills." (Albert and Obler, p. 254, 1978) Research clearly emphasizes

the importance of meaningful language in teaching language. Real life situations should serve as the foundation for all classroom activities.

This approach to a daily lesson plan is consistent with the ACTFL/ETS/ILR Oral Proficiency Interview format. The format consists of establishing a psychological plane of comfort and linguistic orientation. The second phase is comprised of a level of proficiency check and probes for higher level functioning.

The final phase is the wind-down which is intended to make the interviewee feel successful and competent. The suggested format of the class beginning with a warmup, core presentation, and wind-down, using real life situations, is conceptually similar.

Classroom communications should include teacher to student, student to student, teacher to class, student to class and student to teacher communication. Yes/no questions do not provide ideal opportunities for discourse. Preferred question types are

- Choice Questions
- Requests
- Information Questions
- Needs Questions
- Ask and Tell
- Hypothetical Questions
- Descriptive Questions

The curriculum guide provides appropriate structures for each language level. However, it must be emphasized that a hierarchy of language requires that a recursive methodology be used in all classes. The hierarchy of language is illustrated on the following page.
Recursive curriculum refers to an approach to classroom activities in which material previously presented is recycled on a continual basis throughout the language experience.

(Vicki Galloway, ACTFL Workshop on Planning and Teaching for Proficiency)
Classes should be taught in consideration of the level of proficiency of each student. Bloom's Taxonomy provides a solid framework for types of activities for each level.

The level descriptors that provide a thumbnail sketch of the language level descriptors of oral proficiency are listed on the following page.

Many materials are grammatically based and include "drill and kill" exercises focusing on yes/no type questions. For this reason, it is imperative that the instructor adapt the textbook. Four stages (Guntermann 1982) of the planning process for adapting the foreign language textbook are

Following a text, page by page, is not a preferred method of instruction. The teacher should adapt meaningful sections from the text and use supplementary materials as a resource to build upon. The four stages as previously identified should be followed in the adaptation process.

Language as a tool is best taught in context. The text may provide a relevant context. However, if it does not, teachers and students should feel free to construct real life situations that require real life language usage for a purpose. In real life, native speakers do not have all vocabulary for all situations. Therefore, some common communication strategies are

- Circumlocution
- Paraphrasing
- Spelling
- Gestures
- Cognate Formation
- Approximation
- Work Coinage
- Topic Avoidance.

(Vicki Galloway, ACTFL Workshop on Planning and Teaching for Proficiency)

All too often incipient speakers of a second language expend considerable time and energy searching out a particular lexical item. The worst scenario is the student who, for lack of specific vocabulary, will not express himself/herself. It is better for a student to express thoughts and achieve communication, and for the teacher to view mistakes as an essential component of a living language. Modeling is the suggested mode of error correction rather than the more traditional punitive approach of simultaneous correction of pronunciation and form.

Teaching for oral proficiency is a strategy that is

- Realistic — Language is employed in a realistic sense that interlocks with the world the student knows.
- Relevant — Language is relevant to student interests.
- Reductive — Text material is streamlined.
- Reaching — Students' language abilities are stretched, making them reach to greater levels of functioning.
Recognition — Each individual is able to assess more adequately and recognize personal functional levels.

Reception and Re-entry — The curriculum is recursive and promotes retention and development.

Reward — Teacher and student are rewarded by the knowledge of observable performance abilities.

Risk — This approach requires a sense of risk-taking by the teacher and the student to use their language skills for real life communication.

Role — The teacher's role is to evaluate, motivate, facilitate and cultivate. The student's role is to challenge himself/herself with every opportunity to speak.

(Vicki Galloway, ACTFL Workshop on Planning and Teaching for Proficiency)

There are many methods of teaching second languages. Reference should be made to the texts referred to in the bibliography for a more complete treatment of each method. Total physical response, direct method, audiolingual method, grammar-translation, cognitive approaches, natural approach, community language learning, silent way and suggestopedia are all acceptable in the appropriate context and for a specific purpose and level. However, these methods must all be applied under the operational strategy of oral proficiency as described above.

Considerable research has been devoted to learning styles. Teachers must teach in different styles to accommodate the needs of different learners. (For a detailed treatment of learning styles and correlative research see Experiential Learning, David A. Kolb, Prentice-Hall, New Jersey, 1984.) The inductive and deductive approaches to the teaching/learning process must be integrated into the classroom experience. Researchers like Kolb and McCarthy have identified four types of learners: Diverger, Assimilator, Converger, and Accommodator. The same have also been defined as: Supporter, Analyzer, Controller, and Promoter. The ideal class should accommodate the needs of each learning style. The supporter needs group discussion and collaborative activities. The analyzer needs facts, data, and individual work. The controller needs to know exactly what the teacher expects and to be in charge of how he/she will achieve the outcome. The promoter needs personal direction and likes group activities. This treatment is very simplistic and requires further research by the teacher to adequately understand his/her personal style and how to teach in the four quadrants. This introduction is only meant to provide you with an introduction to the subject and encourage you to pursue the information through staff development and in consultation with your program director.
As a final note, classroom arrangement will substantially impact the flow of communication. Savignon has identified ways of arranging a communicative classroom that have worked well.

LATIN 101/102

Objectives

65% of the class period should be devoted to skill building.
25% of the class period should be devoted to translation skills.
10% of the class period should be devoted to culture presentation.

Listening:

To develop an ability to hear and comprehend simple Latin vocabulary and sentence structure as they are spoken or read.

Speaking:

To develop confidence in accurately pronouncing simple, learned, linguistic structures.

Reading:

Students should be able to pronounce Latin sounds correctly and understand any recombination of the vocabulary learned within first level.

Writing:

Students will be able to translate simple sentences from Latin into English and English into Latin.
1. Students will demonstrate an ability to read Latin sentences aloud with reasonably accurate classical pronunciation.

2. Students will exhibit progressive vocabulary skills by giving English derivatives from Latin words.

3. Students will recognize, form, and correctly employ the following morphological and grammatical structures:
   A. Verbs:
      (1) 1st and 2nd conjugation present, future, and perfect tenses of the indicative mood, active voice.
      (2) the irregular verb *sum* in present, future, and perfect tenses of the indicative mood.
      (3) 3rd conjugation present and perfect tenses of the indicative mood, active voice.
      (4) 4th conjugation present and perfect tenses of the indicative mood, active voice.
      (5) singular and plural present imperatives of all conjugations.
      (6) present active infinitives of all conjugations.
      (7) principal uses of all these forms.
   B. Nouns - First two declensions:
      (1) number, gender, cases.
      (2) principal case uses.
      (3) ablatives of place and means.
C. Adjectives - first two declensions:
   (1) number, gender, cases, and agreement.
   (2) principal uses (attributive, predicative).

D. Indeclinables as in the test:
   (1) adverbs.
   (2) prepositions.
   (3) conjunctions.

4. Students will evince continual translation skills by rendering given passages of Latin into literary and standard American English.

5. Students will become aware of Roman culture as it is presented within each lesson or supplemented through teacher lectures and/or audio visual materials on history, religion, daily life, mythology, etc. Also, they should manifest an awareness of the similarities and differences of Roman culture as they pertain to American society.
1. Students will demonstrate an ability to read Latin sentences aloud with reasonably accurate classical pronunciation.

2. Students will exhibit progressive vocabulary skills by giving English derivatives from Latin words.

3. Students will recognize, form, and correctly employ the following morphological and grammatical structures:
   A. Verbs:
      (1) 3rd and 4th conjugation future active indicative.
      (2) imperfect, past perfect and future perfect active indicative of all conjugations.
      (3) all six tenses of indicative mood, passive voice, for all four conjugations.
      (4) the irregular verb *sum* in imperfect, past perfect, and future perfect tenses.
      (5) the irregular verb *possum* in all tenses.
      (6) present passive infinitive of all four conjugations.
      (7) the perfect passive participle.
      (8) principal uses of all these forms.

   B. Nouns:
      (1) 3rd declension masculine and feminine nouns.
      (2) ablative of accompaniment, agent, and manner.

   C. Adjectives - continued use of the first two declensions:
      (1) number, gender, cases, and agreement.
      (2) principal uses (attributive, predicative, and substantive).
      (3) interrogative.
D. Pronouns - forms and principal uses of:
   (1) personal.
   (2) relative.
   (3) interrogative.
E. Adverbs:
   (1) formation of positive degree from adjectives of the first two declensions.
F. Indeclinables as in the text:
   (1) prepositions.
   (2) conjunctions.

4. Students will evince continual translation skills by rendering given passages of Latin into literary and standard American English.

Supplemental activities are strongly recommended, such as:
1. Participation in international days and conventions, both local and national.
2. Enrichment from special student readings, role play, and oral reports.
3. Lectures on aspects of classical culture from key speakers.
4. Field trips to prominent locations of cultural art and antiquity.
5. Involvement in theatre, poetry, exposition, and special activities featuring classical culture.

LATIN 201

1. Students will demonstrate an ability to read Latin sentences aloud with reasonably accurate classical pronunciation.

2. Students will exhibit progressive vocabulary skills by giving English derivatives from Latin words.

3. Students will recognize, form, and correctly employ the following morphological and grammatical structures:
   A. Review of all forms presented in Latin I:
      (1) verbs, nouns, adjectives, adverbs, pronouns, and indeclinables.
   B. Verbs:
      (1) present and future active participles.
      (2) perfect and future active infinitive.
      (3) perfect passive infinitive.
      (4) indirect statement.
   C. Nouns:
      (1) third declension 'neuter and i-stem nouns.
      (2) additional uses of noun cases (e.g., ablative absolute, ablative of respect, time when, and description, etc.)
   D. Adjectives:
      (1) third declension.
      (2) comparison of regular and irregular adjectives of first three declensions (comparative and superlative degrees).
      (3) declension of comparative and superlative adjectives.
E. Pronouns – forms and uses of:
   (1) demonstrative.
   (2) reflexive.
   (3) intensive.

F. Adverbs:
   (1) comparative degree of regular and irregular adjectives of the first three declensions.
   (2) superlative degree of regular and irregular adjectives of the first three declensions.

      (2) gerunds and gerundives and their uses.
      (3) the irregular verbs *fero*, *volo*, *nolo*, *eo*, *fio*.
      (4) deponent verbs.

   B. Nouns:
      (1) fourth and fifth declension nouns.
      (2) additional uses of noun cases as yet presented in the text.
      (3) dative of agent with the gerundive of necessity.

   C. Adjectives:
      (1) no new forms will be introduced.

   D. Pronouns:
      (1) forms and uses of indefinite.

   E. Indeclinables as in the text:

LATIN 301/302

Objectives

40% of the class period should be devoted to skill building.
30% of the class period should be devoted to translation skills.
30% of the class period should be devoted to culture presentation.

Listening:

To develop an increasingly keen ability to discriminate sounds, pronounce them accurately, and determine the syntax from inflectional patterns.

Speaking:

To develop further confidence in correctly pronouncing Latin sentences and identifying their grammatical structures through the principles of inflection.

Reading:

Students should show continual progress in reading Latin sentences fluently and comprehending syntax and meaning. Also, awareness of meter with its accent and stress, as well as some poetry analysis through figures of speech, should be developed.

Writing:

Students should manifest an increased facility in translating prepared and sight passages from Latin into English.
This course covers one year.

At this level the students should have mastered the basics of Latin grammar and be well prepared to embark on a study of the principal Roman authors. Thus, after a brief review, the main concern of the course should consist of exposing the students to the rich world of Roman writers, both in prose and poetry. For poetry, Catullus, Horace, Ovid, Phaedrus, and Martial should provide a variety of genres for the students to study and assimilate; whereas a selection of Caesar's Gallic and Civil Wars, Pliny's letters, and some of Cicero's philosophical treatises and political speeches (especially the Verrines and Catilinarians) should amply complement the prose section.

Also, in addition to these readings in the actual language, the students should ameliorate the development of their vocabulary from these authors. Moreover, they should enrich their own background in Roman literature through oral and written reports of these and other important authors - life and works - such as: Plautus and Terence, Lucretius, Virgil, Tacitus, Juvenal, and Suetonius.

In sum, the focus for this level should center on three major goals: enabling the students to further cultivate skills in translating both prepared and sight passages; constantly encouraging and challenging them to embellish their vocabulary; and, lastly, affording them a broad perspective of Roman literature from which they can better understand these respective writers and genres, as well as their influence upon subsequent literature.
Supplemental activities are strongly recommended, such as:

1. Participation in international days and conventions, both local and national.
2. Enrichment from special student readings, role play, and oral reports.
3. Lectures on aspects of classical culture from key speakers.
4. Field trips to prominent locations of cultural, art and antiquity.
5. Involvement in theatre, poetry, exposition, and special activities featuring classical culture.

Listening:
To develop an increasingly keen ability to discriminate sounds, pronounce them accurately, and determine the syntax from inflectional patterns.

Speaking:
To develop confidence in correctly pronouncing Latin sentences and identifying their grammatical structures through the principles of inflection. Also, to be able to express thoughts orally in correctly structured Latin.

Reading:
Students should show continual progress in reading Latin sentences fluently and comprehending syntax and meaning. Also, awareness of meter with its accent and stress, as well as some poetry analysis through figures of speech, should be developed.

Writing:
Students should manifest an increased facility in translating prepared and sight passages from Latin into English. Students should be able to write in correctly structured Latin.
This course covers one year.

At this level the readings should primarily concern Virgil's epic, the *Aeneid*. Although the students should demonstrate a familiarity with all twelve books, only books I, II, IV, and VI (possibly III and V if time permits) should be required. In addition to a thorough study of these four books, the student should be guided toward an acquaintance with the meter of the epic—dactylic hexameter—image analysis, and a general recognition of some of the more prominent figures of speech as outlined by David Coffin in "Aids and Suggestions for Teaching Latin Poetry" (Scanlan and Coffin. *Beginning an Advanced Placement Classics Course*, Princeton, 1975). This embellishment not only aids the students in the comprehension of the epic, but also elucidates for them how Virgil worked in the grand composition of the *Aeneid*.

Furthermore, the students should supplement their knowledge of Virgil's epic by researching the epics of Homer, the *Iliad* and *Odyssey*. In this regard Homer's use of oral tradition should be investigated, as well as the traditional formulae and value code of the epic; indeed, the students should discern which parts of the *Aeneid* closely resemble the *Iliad*, and which the *Odyssey*. Also, Virgil's purpose in composing the *Aeneid* should be contrasted with Homer's, although perhaps this purpose can be better understood through oral and written reports concerning the key political figures and events of Virgil's time.
Thus the concern should center mainly on Virgil, though again concomitant vocabulary enrichment should be stressed. However, if some teachers prefer to teach Virgil for only a semester or three quarters, selections from Cicero's political speeches (notably the Pro Lege Manilia and Pro Archia) and Ovid's Metamorphoses could easily complement the course.

Supplemental activities are strongly recommended, such as:

1. Participation in international days and conventions, both local and national.
2. Enrichment from special student readings, role play, and oral reports.
3. Lectures on aspects of classical culture from key speakers.
4. Field trips to prominent locations of cultural art and antiquity.
5. Involvement in theatre, poetry, exposition, and special activities featuring classical culture.
TESTING

The testing program for modern second languages and English as a second language must adhere to the general program objective to develop a true oral proficiency. Oral proficiency and the ability to communicate effectively are demonstrated by language which is meaningful, practical, realistic, spontaneous, personal, natural, culturally accurate and representative of human thought. Testing for a true ability to communicate is best illustrated by the American Council on the Teaching of Foreign Language (ACTFL) guidelines for oral proficiency testing. Such testing does not emphasize discrete testing of detailed and specific language features, nor testing of a body of material, but rather attempts to evaluate the level of competence on a scale based on the ability to perform increasingly more difficult tasks as was originated by the Foreign Service Institute. In other words, the ability to manipulate a specific list of grammatical points is not the objective of this type of testing, but rather the intent is to evaluate the true ability of the individual to perform realistic tasks which range from simple to very complex. Thus, tests for levels of proficiency attempt to evaluate real abilities to communicate rather than to identify specific language features or to elicit portions of a corpus of information which has been taught.

Savignon (1983: 256-274), discusses three general types of integrative tests: cloze tests, dictations and oral interviews.
In cloze tests, the student is given passages with "fill-in-the-blanks." The blanks represent words which have been systematically deleted. For beginning students, a list of the deleted words is provided below the passage. Various types of dictations can also be used in a testing program. Evaluation of dictations can be based on specific points or on general comprehension of the material presented. Various types of oral interviews are described by Savignon, 1983, which relate to situations encountered in everyday life, a communicative oral test for beginners and in-class peer evaluation forms.

Teachers should acquaint themselves with both the oral proficiency tests and achievement tests available. Achievement tests are used by the College Board and the professional associations of foreign language teachers for purposes of placement and evaluation of students. The ACTFL proficiency guidelines are used increasingly by universities and school districts to evaluate the ability of teachers and of student teachers. These proficiency guidelines are also being used by industry and private foundations since the ability to communicate in the local language in a foreign setting is of primary concern. Achievement tests can, when combined with oral proficiency tests, be very useful for evaluating student performance.
In Jefferson County schools, the articulation from junior high school to high school or from high school to a university is of great importance. Testing to facilitate this articulation may be accomplished by the appropriate choice below.

1. An Oral Proficiency Interview
2. American Association of French exam
3. District Exam
4. Regent's Exam
5. Advanced Placement Exam

The results of an Oral Proficiency Interview may be viewed in the following manner:

An integral part of the last year of junior high (8th, 9th grade) will include an Oral Proficiency Interview to be held at an appropriate time before registration and again in late May for those students whose language capabilities have radically changed over the spring months. This interview will insure better placement of students in their next level of study. It is also suggested that an oral interview be used to place transfer students in a correct level commensurate with their ability.

a) Translate the passage into good English. (Use the back if necessary) (10)

After fighting this battle, he built a bridge on the Arar so he could pursue the rest of the Helvetian troops and thus led across the army. The Helvetians were disturbed by his sudden arrival, and, since they knew that he had accomplished on one day a feat which they themselves had barely achieved in twenty - to cross the river - they sent envoys to him.

a) Translate the passage into good English. (Use the back if necessary.) (10 points)

Now the ash was falling more thickly upon the ships; now pumice stones and black rocks. Although the helsman kept advising him to turn back he said, "fortune aids the brave." When he had reached shore, he saw a friend. He encouraged him not to be frightened. Then he took his bath and afterward went to dinner, either as a happy man would or seemingly so.

Meanwhile they saw flames shooting in all directions from Mt. Vesuvius. That man, lest the others grow afraid, kept saying that they were fires which farmers had left behind. Then he gave himself to sleep.

b) Identify the grammar of the following: (5)

Games - Fun in a Learning Environment

There are many methods a teacher can employ for review, ranging from a comprehensive coverage of the material with key questions and answers, to simply instructing the students to use this time for their own study. However, playing an informational and enjoyable game, which will involve all the students, provides the teacher with a nice alternative. It is with such an intent that these games are proposed for consideration and further enhancement of Latin study. All games can be accommodated to the students' specific level of experience and expertise.

1. Vinco (Bingo)
   a) Have the students generate a list of forty-fifty items together with their identifications and record both in their notebook. These items should be selected for a prescribed focus of play: vocabulary, derivatives, infinitives, combination of the above, famous characters and figures of Greek mythology or Roman history, etc. This constitutes a good review in itself.
   b) The teacher should make a master copy of these items and number them from 1-50.
   c) Pass out Vinco cards (following) and tell students to select items randomly from their notebooks and place them anywhere on the card, which has twenty-five spaces; thus 50% or more of the review list should be represented.
   d) Cut out pieces of paper and number them from 1-50, mix up, and place in a container.
e) When the students have filled in their cards as directed, start the game by drawing any number from the container, matching the number with its position on the master, and then supplying the students with a proper definition (much like their own, preferably), so as to identify and locate the item. Note, however, that only the definition is given, and the students must associate it with the item and then block it out with the markers provided.

f) Proceed to play "regular," "four-corner," "postage stamp," "picture-frame" or "black-out" Vinco, following the same format for these variations.

g) Give away prizes for the different games, bonus points or candy of some sort with two pieces for the harder games.

2. Medusa

a) Make up matched pairs with a prescribed focus: Latin and English meaning, Latin and derivatives, principal parts of the verb, different inflections for the same noun, nom. (sg) and gen. (sg) of the same noun, etc. The deck should consist of fifty-two cards, or twenty-six matched pairs, with one extra card marked out with the picture of the Medusa.

b) Deal out the deck to the players.

c) Have them draw from each other, noting and compiling the matched pairs in front of them, until the loser is stuck with the Medusa and turns to stone.

3. Cogitatio (Concentration)

This game greatly resembles Medusa, but depends much more on memory.

a) Proceed as directed in Medusa and identify the pool of items for play, but this time all pairs should have a match, and no Medusa is needed.

b) Deal out all the deck - again fifty-two cards is advisable - face down,
and have the students (four or five or grouped in teams) turn them over in each of a matched pair.

c) If successful, they keep the pair and take another turn; if not, they return both cards face down to their place and the play passes to the next player.
d) Whoever accumulates the most cards is the winner.

4. **Imitatio** (Charades)

This works very well for a vocabulary unit review, though the game can also be employed for key figures (gods, goddesses, heroes) of Greek mythology and Roman history.

a) Divide the class into teams and have the students make a list of vocabulary items for their opponents to charade; they should clue each item with the English meaning on one side and Latin on the other.
b) After the two lists have been prepared, have each team cut up the list with one item only per piece of paper. Then place the selected items in a container, one for each team.
c) Choose captains (legati) and have them appoint team members to draw from the opponent's pool and attempt to charade the indicated word. Proceed accordingly until all the items have been charaded.
d) Award points to each team upon a successful endeavor, playing until one team reaches the numerical score specified and wins the prize.

5. **Carnifex** (Hangman)

a) Have students play in pairs and signal Latin words to be identified for the opponent by spelling out the mystery item in blanks:

```
P U E L L A
```
b) The opponent must correctly identify the word by guessing the Latin letter before time elapses (usually ten wrong responses).
c) For variety, divide the class into teams and have each select a name. Play as above, but allow each team alternate chances to guess the letters of the word, filling in the correct responses. Whoever guesses the word first wins.

6. Fausta (Crazy Eights)

a) Make up a deck of fifty-two cards composed of thirteen infinitives from each of the four conjugations and the four parts of esse.

b) Deal out eight cards to each player and then turn one over. Have the first player match the infinitive indicated with another one of the same conjugation or play one of the esse parts, thus changing to another desired conjugation.

c) Each player proceeds in turn, playing the proper infinitive, changing to another conjugation with one of the esse parts, or drawing from the deck, until he can properly follow suit or picks one of the esse forms.

d) Whoever gets rid of all cards first is the winner.

7. Piscare (Fish)

This is especially helpful for the principal parts of the verb.

a) Create a deck of fifty-two cards using the four principal parts of the verb as the prescribed focus.

b) Deal out seven cards to each player and turn one over.

c) Each player then asks the one to his left for a certain verb which he has in his hand. If successful, he gets the card and another request; if not he must piscare for the desired card, and if he gets it, he goes again, but if not, then play passes to the next player.

d) The players arrange the parts of the verb into decks, and the one with the most cards is the winner.
8. Sus (Pig)
   a) Arrange into decks as directed in Piscare, but this time make only as many decks as there are players.
   b) Deal out these cards and have the players lock at them.
   c) Now the captain (legatus) yells pass (tradite) and each player passes one card to player on the left, trying to obtain a deck with four parts of the same verb.
   d) Whoever succeeds first in the endeavor puts his finger on his nose or grabs a spoon, and then the rest must follow. The last player to do this merits an S.
   e) Play again in similar manner until one player is caught and has accumulated all three letters - SUS - thus becoming the pig. (Obviously, there are varieties of this game regarding the procedure after a player secures the desired deck and the animal chosen for the end result.)

9. Conturbitas (Spill and Spell)
   a) Using a Scrabble or Boggle game, shake the letters in a container and toss them on the floor.
   b) Allow two-three minutes for each player to spell as many words - vertically and horizontally - as possible, awarding each the sum recorded by the letters.

10. Quis Sum (Who Am I)
    This is a nice variant of charades, particularly suited to famous persons of Greek mythology and Roman history.
    a) Hand out cards to ten students only, indicating the name of a god, goddess, or main figure of Greek mythology or Roman history.
b) Have the other students question the ten students in turn, until they discover each of their identities.

11. Animalia (Animals)

This game especially lends itself to a comprehensive review of the various inflections for a noun.

a) Form a deck of fifty-two cards using four case-inflections of thirteen different nouns, thus comprising a survey of declensions covered thus far.
b) Have each player choose an animal name and share it with the rest. Then deal out all cards to players face down.
c) Now the captain (legatus) says turn (vertite) and each turns over a card, looking for a match consisting of two inflectional forms from the same noun.
d) Whoever spots the match (more than two players are often involved in the same or another match), must call the player he matches his animal name before the other can retaliate. If successful, he then gives all his cards, which he has previously turned over upon his pile, to the other players.
e) Play proceeds until one player runs out of cards and thus becomes the winner.

12. Mixta

a) Generate a list of 10-20 key Latin words and pass them out to the students, but all scrambled up: elapul - puella.
b) They must unravel them and give the English meaning.
c) For additional interest and enthusiasm, establish a time limit for each "mystery word" to be identified and award points to the first player who succeeds in this endeavor.
13. Litterae
   a) Start the game by providing a word from the recent vocabulary review which begins with an "A."
   b) Now each student follows suit and gives another word in proper alphabetical sequence, until all students have contributed.
   c) For variety, call upon a student to begin the game with a word chosen from any place in the alphabet and then the other students follow in kind.

14. Quaesita et Aenigmata
   a) Check with the computer expert in your school and submit lists of vocabulary words for review.
   b) The expert should easily be able to create word searches or crossword puzzles for the students to solve in reviewing these words. Also, a great variety of either game can be generated on the computer and adjusted to accommodate a specified focus: infinitives, participles, principal parts of verbs, various noun inflections and cases, new grammar concepts, Greek and Roman authors and works, etc.

15. Dolus (Tic Tac Toe)
   a) Compile a list for review: vocabulary, derivatives, morphology, syntax, infinitives, Greek and Roman authors, etc.
   b) Divide the class into teams and have them choose names for the team. Ask the first team a question. If the team gets it right, they play an X anywhere and the other team must counter by answering correctly to post the O; if either falters, play passes to other members of the team until the appropriate X or O is scored.
   c) The first team to score three of each (X or O) horizontally, vertically, or diagonally wins the game and executes the Dolus.
16. Pilametae (Baseball) (An Excellent Review Technique)

a) Compile questions regarding the important morphological and syntactical concepts covered in the most recent unit reviews. These concepts should comprise a comprehensive review of key vocabulary words and their English derivatives, new grammar constructions and patterns, and content material taken from recent translations. Also, if possible, have students create questions too and combine them with those of the teacher; this should provide a representative pool of pertinent questions for the game.

b) Divide the class into two teams and have them choose a captain – _legatus_. Flip a coin to see who will be the visitors, and who the home team.

c) Since each team gets to bat until three outs are made, address questions to the team at bat first. A correct response constitutes a single, but a wrong answer results in an out. Play until one side has made three outs, and carry on similarly with the other team.

d) To spice up the game somewhat, allow players to opt for a double, triple, or home run by successfully answering two, three, and even four questions in a row; however, a mistake in the sequence should be scored as a double or triple play, depending on the player’s declaration.

e) Play as many innings as time permits and award points to the winning team.

(Adapted from the World History Guidebook on “Classical Civilization,” Appendix B, p.41.)

17. Pilapedis (Football) (An Excellent Review Technique)

a) Proceed as directed in “Baseball” (16a and b) to generate questions for a comprehensive review, and select teams and captain – _legatus_ – for each. Again flip a coin to determine who receives the ball first.
b) Now, since each team is allowed four downs in which to obtain a first down, begin the game by asking the receivers questions. Each correct response advances the ball ten yards, and the team with the ball continues until it scores a touchdown or loses the ball through four incorrect replies. Also, after scoring the touchdown, the team captain can only "kick the extra point" by correctly answering two questions; if he misses one, the point is forfeited.

c) To spice up the game somewhat, allow the teams to go for more than ten yards by passing for the desired yardage: twenty, thirty, forty, etc., yards by answering two, three, four, etc., questions correctly in a row, with a miss anywhere in the sequence constituting an interception and possession of the ball by the other team at that spot. Also, using the same procedure, introduce a field goal, but only from the forty-yard line or closer of the opposite team, with any miss in the four questions (for a forty-yarder) addressed, scored as a missed attempt.

d) Play as long as time permits and award points or candy to the victors.

(Adapted from the World History Guidebook on "Classical Civilization," Appendix B, p.41)

18. Pilacanistri (Basketball) (An Excellent Review Technique)

a) Proceed as directed in "Baseball" (16a and b) to gather questions for a comprehensive review, select teams and a captain - legatus - and flip a coin to determine who gets the ball first.

b) Now, since each team has the ball until it scores, misses, or has the ball stolen, address questions to the team which has the ball. Each correct response scores a basket and the team continues until it makes two wrong answers, thus turning the ball over to the other side, who then proceeds accordingly.
c) To spice up the game somewhat, institute the three-point play where a player who answers three consecutive questions correctly scores a three-pointer on his last attempt; however, a miss at any time in this sequence forfeits the ball. Also, after scoring a basket, allow the team a chance for a free throw by having a chosen player correctly answer two successive questions correctly; again, however, a miss automatically gives the ball to the other side.

d) Play as long as time permits and award points or candy to the winners.

1. The Best Form of Government

Source: Ancient Greece and Rome pp 34-35.

Certainly one of the most interesting and provocative debates for us today is that of the ancient historian, Herodotus, regarding the best form of government--monarchy, oligarchy, democracy. Each is represented by an advocate who defines and argues the superiority of his government over the others.

The re-enactment of this debate should prove very illuminating for the entire class and provide an opportunity for vigorous and profitable interaction as well as political stimulus. The following format is suggested for best results in a time frame of about a week.

1. Divide the class into three groups (6-8) and have each choose a form of government for study and presentation. If students can't find a group, or if too many want the same one, the teacher will have to insure equal distribution.

2. Have the groups read the arguments advanced for their government by its advocate and then brainstorm, trying to determine the proper definition and advantage of their cause over the other two.

3. Instruct the groups to research ancient and modern history for government models which either support their position or refute the other two. Possibly, they could enlist the help of the other history teachers so as to reap the benefits of a total historical survey, although this would lengthen the time necessary for the assignment.
4. After the groups have defined their governmental stance and armed themselves with ancient and modern models both pro and con, allow each a 15 minute initial presentation session, during which the other two groups can take notes, but not interrupt.

5. After the opening arguments, allow time for vehement interaction and counter-debate among the groups, as they take turns refuting the salient pros and cons of each other.

6. Perhaps the following could be considered for further enhancement:

   a.) Collaborate in this endeavor with the forensics coach concerning time and proper format for debate of subject matter.

   b.) Have each group draft questions about their position and form a questionnaire which affords the entire spectrum of response: strongly agree, agree, neutral, disagree, strongly disagree. Then administer the form to a random selection of parents, faculty and students. After tabulating the results, ask each group to examine and somehow incorporate them in the debate. This questionnaire would make the activity more complex and hence necessitate the involvement of more teachers to assist the students.

   c.) If class size permits, form another group of students to confer with teachers and compose a list of essential questions to be debated by the other groups in a format similar to a panel discussion.

   d.) Have the media specialist video-tape part or all of the debate.
2. Civic Center and the Capitol

Some of the earliest and most historical buildings of Denver very much reflect the style of Greek architecture. Indeed a field trip for the entire class or a small group would prove worthwhile, if all the arrangements could be made.

Steps to follow:

1.) Before the trip review the three basic styles of Greek architecture—Doric, Ionic, and Corinthian—with illustrative examples of each. Perhaps, a short slide presentation would be nice.

2.) After highlighting the fundamental characteristics, divide the class into groups and assign each group one of the following for careful study: Civic Center itself; the surrounding buildings and the park layout nearby; or the Capitol. If this activity is to be done in small groups, don't divide the groups into fewer than 4 each or keep the entire group together and have them make all three observations and report back to the whole class.

3.) At Civic Center:

a.) Note down the basic structure and a short blueprint to present to the entire class.

b.) Observe and record the essential contrasts between the "Denver" style and structure and that of any corresponding "Greek" temple or building. Note especially the implementation of the pediment here.
4.) At the park and surrounding buildings:
   a.) Name the buildings which exhibit Greek design and comment on this significance.
   b.) Study the outline of the park and write down separately all the Greek features (note especially the rather opportune theatre area) and the lone Roman representative. What is missing in these styles?
   c.) Make an outline of the park for class presentation.

5.) At the Capitol:
   a.) Comment on the make-shift stylobate and its Greek counterpart.
   b.) Identify the Greek style of architecture and contrast with the Parthenon.
   c.) Observe the pediment and discern the motif used here and speculate concerning this particular choice and what it reveals about the city. Again compare and contrast Denver's pediment with the Parthenon in Athens, regarding motif, significance, number of figures employed in the work, and the one egregious omission.

6.) For further enhancement:
   a.) Maybe have all the groups observe the three areas and compare and contrast in a class discussion.
   b.) Have each group photograph their area to show the other group.
   c.) Secure a guided tour of the whole Civic Center and Capitol Area to learn more about the rich history of early Denver.
   d.) Compare and contrast the Capitol in Washington, D.C. with that of Denver and the Parthenon in Athens. (see Greek and Roman Civilization, p.5).
3. **Famous Roman Characters**

In order to provide students with insights into what made Rome so great, select stories about some famous heroes from Livy's early history of Rome: Horatius Cocles, Mucius Scaevola, Cincinnatus, Manlius, and Coriolanus.

Then proceed as follows:

a) As the stories are read, direct the students to write down the noble qualities which they feel were exhibited by each of the heroes.

b) Now recall each hero and have the students share their list of distinct qualities. These should include the following prominent characteristics: loyalty and patriotism, leadership, daring and fortitude, obedience, and ability to respond in emergency situations.

Though indeed much of Livy's history is subject to exaggeration and uncertainty, this exercise should afford students a glimpse of the Roman character, which exerted itself triumphantly against such adversaries as the Etruscans, Gauls, Volsci, Aequi, and other fierce early peoples of Italy.

Two helpful sources for this exercise are:

4. Film Activity  Athens: The Golden Age

Steps to follow:

1. Before the film, instruct the class to observe and note down the three main areas of excellence for later discussion.

2. Now examine these areas individually with questions.

A. Art
   1. Name two different kinds of art: vase painting and sculpture.
   2. Compare and contrast Archaic and Classical sculpture.
   3. Relate the scenes on the vase and comment on their importance for our knowledge of the daily life of the Greeks.
   4. Discuss the goddess Athena and her significance for the Greek artist.
   5. Speculate concerning the appearance of Greek myths on the vases and identify some of the most famous. (Heracles and Odysseus here.)

B. Theatre
   1. What two types of drama began in the Theatre of Dionysus? (comedy and tragedy.)
   2. Where is the Greek theatre in evidence today?
   3. Name modern T.V. shows which exhibit the spirit of Greek drama and give examples where possible.
C. Democracy

1. What does this name mean and to whom did it apply?
2. Compare and contrast democracy in American today with that of ancient Athens.
3. Define representative vs. direct democracy.
4. Debate whether Athens had the most civilized form of government which has ever existed. Cite ancient and modern parallels where applicable.

3.) For further enhancement:

A. Make a collage reflecting the richness of any of the three areas and include some modern counterparts where possible.
B. Compare and contrast with Athens: The Golden Age.
C. Have a guest speaker lecture on the operation of democracy in Athens.
D. Have a special oral report on the theater of Epidaurus, its construction and the drama which takes place there yearly.
E. Have students construct a model or diorama depicting the beauty of the Pan-Athenaeum festival.
5. The Glory of Athens

Source: Thucydides: The Peloponnesian War Trans. by Rex Warner

In 430 B.C. at the height of her power, Pericles, in his renowned "Funeral Speech," bestowed the greatest praise upon his city, Athens, when he proclaimed her an "education for all of Greece." Supreme on the sea, Athens had become a major power in Greece, equalled only by Sparta. In this bold and highly nationalistic speech about the greatness of his city, Pericles details for us why Athens had risen to such a pinnacle of glory and pre-eminence. He pictures for us an Athens which offers her citizens not only all the necessities of daily life, but also instills within them such a love for their city, that they are willing to sacrifice their lives in her behalf. Such devotion and profound patriotism should deeply touch us all today, when the honor, which used to be so inherent in dying for one's country, seems rather questionable.

We can best capture the spirit of this beautiful and powerful speech, as well as the total atmosphere in which it was delivered, by dividing the class into groups and focusing on it from the following perspectives:

1. Choose one group to study and recapture by dramatic reading the highlights of the speech and have these segments video-taped: the definition of democracy and delineation concerning its operation; the comparison with Sparta, especially the unique ways in which each city-state insures military security for its citizens; how the very moment, in which the Athenians died so bravely and patriotically for their city completely erased any previous private harm they had done; and finally, the assertion that one should look daily on the greatness of his city and fall in love with it.
2. Select another group to present a visual report through collage of the building project launched by Pericles: the Propylaea, Odeum, and Parthenon. Though Pericles never mentions these constructions, they were very visible to his audience and further attested to Athens' greatness and magnificence.

3. Have another group present a report, possibly through models or a diorama, of the Panathenaea, the festival held every four years in honor of the guardian of the city, the goddess Athena. This festival also exemplified in the splendor of its many accompanying contests the might, wealth, and pride of Athens.

4. Instruct the final group to study both Pericles' speech and Lincoln's "Gettysburg Address," and compare and contrast in the following manner:

a.) occasion of each.
b.) purpose of each.
c.) description of those who died for their country.
d.) overall feeling of nationalism and how this is achieved.
e.) other pertinent and essential differences.
6. The Greek Alphabet

Today we use an alphabet system based on twenty-six letters. Did you ever wonder where such a combination of vowels and consonants originated? Basically, this alphabet is Greek with some vowel changes introduced by the Etruscans, who passed it on to the Romans, and they in turn passed it on to us.

Learning the Greek alphabet and studying words which come to us from Greek can be lots of fun. Both the letters and actual Greek derivatives are often encountered in modern mathematics, science, and other disciplines. So let's get going and learn the alphabet, along with clues for detecting Greek derivatives in English.

In presenting the Greek alphabet both the capitals and smaller letters are given together with their names and suggested pronunciation. Next, there follows a scheme designed to promote a quicker and more enjoyable assimilation of this material.

THE ALPHABET

1. The Greek alphabet has twenty-four letters:

2. At the end of a word the form α is used, elsewhere the form ι: e.g. κάνα combination.
B. Learning the Alphabet

The strokes are not that hard and can be mastered quickly by the teacher. However, definite drills will make the pronunciation much easier for the students to learn.

1.) Teach all the letters one by one.
2.) Isolate them in the groups of five letters marked out above, and drill one by one focusing on the group.
3.) Now drill the first three in each group quickly and in staccato fashion: alpha, beta, gamma, zeta, eta, theta, lambda, mu, nu, etc. The rhythm will suggest itself, and you can almost dance to the zeta, eta, theta, trio!
4.) Pick up the other two letters of the group and drill in the same way.
5.) Last, drill all over again each letter in succession. The short, fast drill, especially in trios, can be delightful and really get the class involved.

C. Clues for detecting English words which come from Greek (derivatives)

1.) The ending logy means science or study of.

19. Melissa (the honey bee) 25. Vanessa (butterfly)
20. Rita (a pearl)

As you can see, all of the above names are for girls. Can you find their masculine counterpart?
7. Greek Dress for Females

What did the Greek women wear? Here's an opportunity not only to study the dress but to actually make it. Since the boys may be a bit reluctant, perhaps it would be best to pair students male and female, so as to enlist all in the activity.

Steps to follow:

1. For the Dorian Chiton

   An oblong sheet is used, measuring rather more than the height of the wearer, about twice the span of her arms. This sheet is first folded along its upper edge, so that its height is only from the feet to the neck, the overlap reaching to the waist. It is next doubled down the middle in the other direction, with the overlap outside. Then the wearer stands inside the cloth, and, having the open ends on her right, pins the two sides together above each shoulder. This may be sewn or pinned on the side and a string or belt may be tied around the waist.
2. For the Ionic Chiton
   (Did not have the turned down piece)

   The width was about 4 feet, 6 inches and the length twice the span of the arms, i.e., 11 feet. The material was folded and sewn with holes for the head and arms. Ornaments adorned the shoulders and a girdle about the waist allowed it to blouse.

3. Compare and contrast the two different styles with each other and also with modern fashions in vogue for female attire. What do we have today which most approximates the two Greek designs?

4. Have a student prepare an oral report on male dress and present it to the class with possible illustrations. This would form a nice complement to the activity and could proceed or follow it, depending on the intent of the teacher.
To the heroes of Homer's epics undoubtedly no quality was greater esteemed than that of arete, or all attributes by which one excels. The most renowned area of arete was to be a warrior par-excellence. Over and over again Homer extols his chief heroes for their prowess in battle, magnificently portraying their conquests over the foe.

At first sight, perhaps, the world of the Homeric hero seems totally unrelated to us. However, we too admire moments of greatness and highly applaud the achievement of excellence in many sports figures and other celebrities. Also, we ourselves have our own special areas of excellence, in which we shine forth with our arete, just as splendidly as the Homeric hero.

In order to explore the importance of arete for our society and for us personally, the following activity is suggested.

Steps to follow:

1. Fill in the following sports with an outstanding representative of arete:
   a) skiing  g) volleyball
   b) basketball  h) boxing
   c) hockey  i) football
   d) gymnastics  j) running
   e) tennis  k) baseball
   f) polo  l) swimming
2. What about a celebrity for these areas in which the attainment of excellence can be found?
   a) piano
   b) ballet
   c) skating
   d) singing
   e) horseback-riding

3. The actual drama of the action, or vivid portrayal of arete is called aristea. Choose a sports figure from #1 and make a collage to exhibit this aristea.

4. Now have the students write down their own areas of excellence, whether athletic or otherwise. These areas should be those in which they are at their best.

   After they have noted down these areas, instruct them accordingly:

   a) Make a collage showing the area and the student displaying the arete

   b) Write a brief composition in which the student vividly captures the aristea of his own special area of excellence.
9. Pre-Homeric Greece

Source: Minoan and Mycenaean Art has a rich survey of both civilizations.

To the Greeks of Pericles' day the memory of their ancestors from Pre-Homeric times was very hazy and shrouded in uncertainty. There was a strong identification with the ancient hero, Theseus, who had unified the Attica of which Athens was the capital. But this was the same Theseus who had slain the Minotaur and ushered in a sweep of invasions which had led to the fall of Crete a millennium earlier. The Greek of Pericles' time had little if any idea about the magnificence of this once powerful Cretan empire and its successor, the Mycenaean empire in Greece. In the Iliad, Mycenae is described as the most powerful land in Greece, but the later Greeks knew little about this power and nearly nothing of its immense wealth.

Unfortunately, the picture remained this way until the 1850's and the dawn of classical archaeology. Now you can participate in this activity and relive the experience of discovering these mysterious civilizations which flourished before Homer. Check with the University of Colorado Classics Department to obtain an assortment of slides on early Greece and Rome. Challenge your students to identify, infer, speculate, conjecture, and propose various meanings and functions for each slide, and, furthermore, to assemble the slides into two distinct groups, based on significant similarities. Also, the students should ascertain what archaeology can tell us about the history.
and culture of these people, and that mythology often exaggerates or changes the importance of events. Finally, the student should conclude how rich indeed were the finds of Schliemann and Evans and how they have given us more secure grounds on which to establish this early history.
The slides have been arbitrarily selected to display the nature of these earlier people and each has a few suggested details for the students to observe. The teacher can magnify or adjust to suit his purpose, and the students undoubtedly will contribute much with their responses; also, the teacher can vary the order.

1. the bull-leaping events
   a) How can a man jump over a bull and where else is such a sport practiced with a man and bull?
   b) What about the posture of the leapers and what this suggests regarding the performance?
   c) Why would a people have such an event?

2. A Mycenaean dagger-blade
   a) What is this object?
   b) Identify the event on the dagger - a lion hunt.
   c) What does the weapon imply concerning the people who might use it?

3. The minotaurs
   a) Note the line of dancers and describe their dress: 1/2 man, 1/2 bull.
   b) Why do ancient peoples wear masks in their ritual and what might be the purpose here?
   c) Why are they dancing?

4. Mask of Agamemnon or a chief warrior
   a) What color is the mask and what can be inferred about these people?
   b) What could be the significance of the mask here and what other people used masks in a similar fashion?
c) What does the impression of the mask suggest about the station and function of the man?

5. Snake goddess
   a) What kind of a figure do we have here? Why the protuberant breasts?
   b) Identify the ... items in her hands and on her head and again speculate as to their purpose.
   c) React to the lady's dress and what it intimates about her importance.
   d) What religious prominence might be associated with this figure?

6. Lion Gate at Mycenae
   a) Note the supporting structure of the triangle, the lintel. How much does it weigh? About 20 tons!
   b) What animals appear in the triangle and what idea does their posture confer?
   c) Note the size of the bricks and conjecture concerning their construction, bearing in mind their high size.
   d) Comment on the arrangement of the lions inside the triangle.

7. Octopus
   a) Does the animal seem alive and how is this so vividly portrayed?
   b) What does such a motif imply about its people?
   c) Can this motif be related to any of the previous? If so, what do they have in common?

8. Vase painting of Trojan Horse
   a) Identify the motif.
b) Review the myth and again hypothesize as to the nature of the people it would concern.

c) Comment on the movement of the motif.

d) Same as for 7c.

9. Vapheio Cup

a) Identify the motif and speculate as to what is going on here.

b) Relate this to another slide regarding the intensity or vividness of the action.

c) How could this slide be found in Greece when it bears so little resemblance to the others?

10. The Sea-Griffins in the Throne Room

a) Identify the motif.

b) Relate this to another slide regarding the posture of the animals.

c) Contrast with the octopus and examine the possibility of the same people painting both.

After the slide show has been presented, have the students group the slides together which share or belong to similar themes. They should clearly see two different groups: those that love nature, worship the bull, and pay homage to a lady of creation; and those which are far more warlike and devoted to power, which evince a somewhat symmetrical and less imaginative nature in their motifs.

For Schliemann, the latter group confirmed the existence and might of the people of Mycenae, which had been only alluded to in Homer's *Iliad*, while the former supported for Evans a wealthy and powerful people who created the myth of the Minotaur.
Often many written reports, unless specifically prescribed as for a research paper, are copied verbatim from books with very little if any learning. The net result. In addition to the eye fatigue for the teacher who has to read them, this style of report is generally very dull and tedious instead of vigorous and exciting; also, often students never really get to show the teacher how well they know the material.

In order to facilitate the learning and make it far more significant and relevant, not only to the one student doing the report, but also to the whole class, the format of an oral report deserves further consideration. In an oral report students are challenged as in the written counterpart: they have to master or at least concern themselves with a definite subject matter; thus, they must show knowledge of facts. However, it is not sufficient to merely regurgitate or plagiarize what they have read in a book, for now the second challenge is to take the material and really make it come alive. This second step takes the students deeper into the learning and through their own internalization of the facts, they can stimulate and enrich the entire class.

So much for general remarks. What about the specifics and how could this oral report be developed and how would it fit into the class? The following steps should be followed:

1. Have the students select a certain subject which has its own body of facts. For example, in Roman history they might choose one of the following: government, military, religion, dress for either men or women, meals, building styles, writer of drama, history, or philosophy, or different types of entertainment.
2. Have them research the facts. Thus if students select a writer or form of entertainment - chariot races - they will first need to provide the class with the basic facts: for the author, the themes of his works, time and environment in which he wrote, and a short chronology of his life coupled with key influences; for chariot races, a description of the facility, procedure and rules by which the event was conducted, various categories of riders, and crowd approval and disapproval.

3. Now require them to enliven the material in some way. In the above example, for the first choice, students could read parts from key speeches, treatises, or poetical works, striving to capture the spirit of the original with its effect upon the Romans. For the latter they could make a model of the Circus Maximus, describing its various areas, or possibly recreate the race by giving a miniature representation of the event with an appropriate, lively broadcast of its action. Indeed this twofold focus can apply to any topic and it enables the learning to extend beyond the individual and hopefully enlighten the class in an interesting and profitable manner. Thus, if a teacher opts for this style of report, he can easily assign it a certain number of points and incorporate it in the grade. Also, students can and should be encouraged to work in pairs, as this allows more material to be covered and more meaningfully assimilated. A suggested time frame for the presentation would be: one student, 5-10 minutes; 2 students, 10-15 minutes; three students, 15-25 minutes. Moreover, about ten days after the report has been assigned, it would prove beneficial to have the students turn in a brief outline of their intent and the means by which they will enliven their material.
Finally, since the students are afforded considerable latitude in their selection of a topic, the teacher should prepare a broad bibliography to accommodate these many interests. Hence, there follows a suggested bibliography to assist the students with whatever topic they might choose. Also, because a similar procedure could be employed for reports on Greek history, topics and recommended bibliography are also included in this regard.
I. SUGGESTIONS FOR REPORTS FOR ROMAN HISTORY

A. Political Scene

1. Government in Rome
   a. Magistrates - duties and importance in the administration.
      (1) Consul
      (2) Praetor
      (3) Censor
      (4) Quaestor
      (5) Aedile
      (6) Pontifex Maximums

   b. The Senate - composition, term of office and overall effect on the state's process.

   c. Equestrians - who they were and what their importance was in the government process.

   d. Freedman - same as equestrians - origin and function in the government.

      In (a) and (b) good comparisons can be made with modern times, our officials, and government administrators. Wherever possible these comparisons should be drawn and amplified.

2. Government elsewhere in Italy and a comparison with Rome on any of the above a - d.

3. Law courts - procedures, crimes, and penalties.

B. Daily Life in Rome - Social and Economic Scene

1. House and its furniture - various rooms and uses.

2. Food and meals.

3. Clothes for men and women.

4. Slaves and their duties - male and female

d. Engineers
b. Artisans
e. Traders
c. Carriers
f. Bankers

10. Amusements
a. Sports and various games.
b. Dramatic performance at the theater.
c. Circus and chariot races.
d. Gamblers and bookies at the games.
e. Gladiators
   (1) Schools and training
   (2) Weapons and armor.
f. Baths for men and women.

11. Days and hours of Roman calendar.

12. Coinage - different types and uses.

C. Religious Scene
1. Basic tenets of traditional religion - the custom or way of the ancestors (mos maiorum)
2. The upper classes and Stoicism - its main principles.
3. Eastern religion - belief and rites of Isis.
4. Christianity and its influence - Jesus and the eight beatitudes.
   Any two of the above can be discussed and compared.
5. St. Augustine and his City of God - Christ's kingdom upon earth

D. Building Construction and Uses - How and Why
1. Colosseum
2. Amphitheaters
3. Circuses

132
5. Theaters and their side passages.
6. Baths - different levels or arrangements.
7. Rooms in a Roman house of upper class.

E. Problems With the Etruscans
1. Origin - theories
2. Religion and belief in after life.
3. Literature and art.
5. Any aspect touched on or developed in Waltari's fictional novel, *The Etruscan*.
6. Early scholars and their views and theories on any of the above puzzles concerning the Etruscans - especially 1 and 3.

F. Roman Roads - Construction and Purposes
1. Appian
2. Auralian
3. Campana
4. Flaminian
5. Latins
6. Traina

Any aqueducts, bridges, arches, baths, walls, or other construction discussed in Von Hagen's book, *Roman Roads*.

G. Famous People of Roman History - Lives and Importance
1. Scipio Africanus - outstanding Roman general.
2. Gracchi brothers - reformers and champions of the poor.
4. Cleopatra - Egyptian queen, great contriver.
5. Mark Anthony - successor of Julius Caesar - his campaigns and final defeat.

8. Trajan - the good emperor - his generosity.

10. Epictetus - the slave and his philosophy.

III. IMPORTANT AUTHORS OF ROMAN LITERATURE

A. From 240-80 B.C.

1. Plautus and Terence - These two authors were famous for Roman comedy. They took over many of the plots and characters (clever slave, cruel old man, young lover) of Greek comedy, and provided an insight into Roman life then. Plautus, extremely funny, is meant to be read by the common man on the street, whereas Terence is more elevated, pitched to a select class. One of Plautus’ famous plays, the Twins, where two brothers get their identities mixed up and all kinds of humorous situations result, later was adapted by Shakespeare in his Comedy of Errors.

2. Lucilius - active around 150 B.C., he set the stage for those who would follow him in writing satire. Convinced of the poet’s mission to reshape what was wrong in society, he wrote his bitter satires, denouncing what he thought was wrong with Rome. He attacked leading men of the wealthy classes as well as poor men harming the city.

B. The Golden Age of Latin Literature (80 B.C. - 14 A.D.)

1. The Ciceronian Period

a. Lucretius - 99-55 B.C. Upset with people’s fear of the gods and after life, he wrote his On the Nature of Things, urging men to live in perfect harmony with nature and not to fear the gods as they didn’t exist, for all life was composed of atoms. Lucretius urged the best life - a simple life and avoidance of excessive passions and political entanglements.

b. Catullus - This young man is famous for his love toward a wealthy lady - Clodia. In his poetry he achieves a revolution in advancing the woman (for the first time) to a place of equality-spiritual, mental, and physical - in a love relationship. Before him, the woman in love poetry was looked upon mainly as a sexual toy, to be enjoyed and thrown away, with no real feelings.

c. Cicero - Probably the most versatile of Roman authors, his career can clearly be divided into two parts, political in his younger years, and after his daughter’s death, philosophical. He gained his reputation for exposing the corrupt governor Verres and his crimes in the province of Sicily in the Verrine Orations. He also writes in the Cataline how he stopped Cataline in his attempt to overthrow the state in 63 B.C.

Turning to his old age, Cicero wrote his thoughts on the soul, friendship, and the gods.

d. Caesar - famous for his work on the Wars in Gaul. He described the tribes and customs of the major tribes in Gaul. Then he goes into various strategies used in subduing these Gauls.
2. The Augustan Period (43 B.C. - 14 A.D.)

a. Virgil - In his early days he wrote about the country shepherds and songs, and farming. He is famous for his grand epic the Aeneid, in which he traces the descent of Rome from the survivors of the Trojan War. Many of the qualities he gives Aeneas, he means for Octavian (later Augustus Caesar) to have. His work celebrates the beginning of Octavius' reign, establishing him as the descendant of Romulus, and hoping for internal peace in Rome, after almost a century of inner strife, from the Gracchi in 133 B.C. to the death of Mark Antony in 31 B.C.

b. Horace - He wrote his Odes dealing with such topics as youth, death, living for the day, as well as love poetry which fit the general trend before Catullus, concerning attitudes toward the woman.

He is also famous for his Satires. Unlike Lucilius in this type of writing (satire), he attacks the faults in men, not the men. He realizes that all men have their private imperfections, and while exposing them, he laughs at them. No bitter denunciation of character in Horace is found.

c. Ovid - Though he wrote many works on love poetry, he is known for his sixteen books on the changes of human beings - the Metamorphoses. He tells the myth about a god or person and then what happened. Usually, in the end, someone changes his nature: woman into a stone or tree, perhaps a swan or stag.

d. Livy - Wrote 142 books on Roman history from the founding of the city in 753 B.C. down to his own time in 35 B.C. Though much of what he writes was borrowed untested from others, his main accomplishment lies in emphasizing the qualities of the Roman character which made Rome so great in the Republican times. His work in prose, as Virgil's in poetry, also was meant as a guideline for Octavian, upon his assumption of leadership in Rome. As Aeneas was portrayed in Virgil, loyal, honest, god-fearing, etc., so too Livy drew his characters for Octavian to study and imitate.

e. Vitruvius - Around 10 B.C., he wrote a major work On Architecture to be used by Octavian in building temples and other works based on the knowledge of carpentry and engineering. He included not only the directions, but the exact measurements to be attained. This work had considerable influence on Augustus (Octavian) and later emperors after him.

C. The Silver Age - 14-138 A.D.

1. Phaedrus - Important for his fables in which he comments on weaknesses of human beings. He was much influenced in his work, by the Greek Aesop's Tales.

2. Columella - Though others had gone before him, he wrote the major work on Country and Farming in Rome. He describes country festivals and gives long, elaborate rules for proper farming to yield the best harvest.
3. Petronius - Brilliant novelist, in his Satyricon, he captures all the gluttony and vice shown by the upper class, particularly those distinguished for a sudden rise to wealth - the freedmen as opposed to the old blood distinction of the established nobles.

4. Seneca the Younger - Known for his works on philosophy, in which he deals with many different aspects in a human's life. He will also present situations where greed or love for power is blown up, so he can comment on how such an ambition will end, and point out the right way to live.

5. Pliny the Elder - Wrote a monumental work on Studies in Nature where he records and observes much which is important for biology, zoology, botany and other such sciences. He would see something in nature - rock, flower, seed - and describe its process whatever it might be. Other fields he touched upon were the geography of Europe and the world in relation to God.

6. Quintilian - In his work, the Institutes of Oratory, he gives a detailed look at what Roman education was all about. He gives the various exercises and practices, as well as the studies, which characterized the education of the Roman boy and teenager up to age eighteen.

7. Frontinus - About the only major work on Aqueducts was written by him. He deals at length with the existing aqueducts in Rome, their construction, and advantages and disadvantages which they have. (about 90 A.D.).

8. Valerius Flaccus - About 70 A.D. He is famous for his tale of the Argonauts, who under Jason as leader, sailed to Colchis in search of the golden fleece. Many of their adventures are shown in the movie, Jason and the Argonauts: Phineus and the happy birds, the hydra, the skeletons, come to life from the hydra's teeth sown in the ground, and the love of Jason and the Princess Medea.

9. Martial - He is famous for his Epigrams in which he provides a very graphic picture of Roman society under the emperors 60-80 A.D. He particularly attacks those who grab for wealth from old ladies, big shots - both men and women - and poor poets. He has also written some tomb remembrances (Epitaphs), tender poems on people beloved to the poet, who had died.

10. Pliny the Younger - He is known for his description of the empire (85-110 B.C.) which he gives in his Letters. In contrast to Tacitus, he writes about good and kind emperors, and what happens under their rule.

11. Tacitus - In contrast to Pliny, Tacitus attacks the emperors (14-117 A.D.), finding almost nothing good to say about them. He exposes their cruelty, plots against each other and group rivalries, ignoring the prosperity of the empire at that time. His emphasis is on corruption and depravity, blinded by the terrible time he spent under the cruel emperor Domitian. As rumors spread that others were aspiring for power, many groups formed pro and con, around the emperor. This resulted in a purge of all those thought to be against the emperor. This is what Tacitus deals with, leaving out comments on other facets of emperor life.
12. Juvenal - Active around 80 A.D. he is the last heir in Rome to the satire tradition. Using those who had died as examples of what is wrong with Roman society (he couldn't attack those alive for the reason above), he wrote bitter exposes' of Roman society, particularly certain characters. As one critic puts it, he so bitterly attacks people, it's like using a sledge hammer to crack a nut. Deeply convinced of his moral responsibility to society, he labored to correct it by his violent denunciations.

13. Suetonius - Much like Tacitus, Suetonius deals with the emperors (14-138 B.C.), the so-called Twelve Caesars. Though he does mention good points, he is in no way the rigid researcher of facts that Tacitus was (even though he is very one-sided). Also he tends to be a real gossip - catty, snotty, going into the private love affairs (both male and female) of the emperors, and the blazing life about their courts.
II. Oral Report with Derivatives

a) Have students select a favorite hobby or pastime and make it come alive through some kind of collage presentation.

b) Instruct them to generate a list of about twenty-five derivatives (more if they so desire), which pertain directly to their choice.

c) Have them incorporate these derivatives within their collages and thus form a final product which will both inform and entertain the class with its presentation.

d) Save the student reports which seem particularly well done and display them in the classroom or preferably another designated area of the school.
12. Oral Tradition and the Epic

Long before stories were finally put into writing, they were passed down and preserved by word of mouth, or oral tradition. Usually the story was grounded solidly upon the occurrence of a certain event, around which there had arisen a variety of recountings. Thus a very short tale became considerably enlarged, as more and more people cast it into their own version. In some such way as this, the epic was born complete with a warlike environment, gods who join in the action to support their favorite heroes, and mostly a code of honor and bravery which defines the aristocratic aspirations.

In order to obtain some idea regarding the formation of the Iliad and Odyssey the following activity is recommended. Also, the students can quickly see, from only a limited exposure, the shortcomings and disadvantages of oral tradition, before the tale is finally recorded in writing.

Steps to follow:

1. This activity can be done with the entire class, but it takes a long time for each to re-tell the story; hence, it seems better to divide a large class (20 or more) into groups.

2. Start at opposite ends of the group and tell one person in each group the same sentence, clearly setting up an interesting story. For example, "Last week our history class went to Elitch's."

3. Now instruct each member to repeat the same sentence to their neighbor and then add another sentence to the original, keeping the sense.
4. Carry on in the same fashion until all the students in each group have "treated" the story with their contribution. However, at no time can anyone use writing. This really opens up the possibilities and can lead to some very hilarious situations.

5. After each member has gone, then re-tell the story from person to person and note what happened to the "oral tradition:"
   a) Some couldn't remember the previous account, so they remembered what they could and added whatever seemed necessary, or followed naturally from any other part of the story.
   b) Some misheard certain words and drastically changed the story at this point.
   c) Some added so much imagination to the story that many followed this new story which seriously affected the flow of the original.
   d) Some words were most suggestive and occasioned the same as in (c) above.
   e) The basic events of the story were often preserved intact throughout the several recountings, but were often greatly exaggerated or reworked.

6. For further enrichment:
   a) have the entire class participate in the activity, although this can be very time consuming for those awaiting their turn.
b) give it a real authentic twist by restricting the beginning to a heroic battle and setting the stage for the students to add their versions as to how the battle was fought and won. Also, as in the Greek epics, create 3-4 characters with stock epithets - god-fearing, swift-footed, bright - which must adhere to the character whenever he is mentioned in the narrative. Thus the students should discern how both character and epithet are preserved in the epic.

After this exercise has been completed and discussed, the students should again notice the same outcomes. If these outcomes and their subsequent ramifications could be extended over the long time span of 400 years, during which the story was developed, perhaps we could grasp somewhat the way in which the Greek epics were created, preserved and changed until their final written form by Homer.

c) Discuss the advantages to oral tradition in the creation of an epic.

d) Debate whether the epic, based on oral tradition, can truly reflect the history and culture of the times that are embedded within its scope.
13. Role Play

a) Have students choose certain, special scenes of Virgil's Aeneid and present them through role-play of assigned parts. The following scenes offer rich possibilities for such adaptation: the wrath of Juno (Bk. I), narration of the sack of Troy (Bk. II), Dido and Aeneas (Bk. IV), address of Sibyl to Aeneas in the underworld and prophecy of Rome's future greatness (Bk. VI), council of the gods and debate between Juno and Venus (Bk. X), and the final confrontation between Aeneas and Turnus (Bk. XII)

b) Similarly, certain scenes of the Iliad and Odyssey would also lend themselves fruitfully to such dramatic role-play and give the students an insight into how these epics were kept alive through oral tradition. For the Iliad perhaps the students could investigate the quarrel between Achilles and Agamemnon (Bk. I), the valorous conquests of Diomedes (Bk. V), the love between Hector and Andromache (Bk. VI), the embassy sent to secure Achilles' return to battle (Bk. IX), and the final battle between Achilles and Hector (Bk. XXII). For the Odyssey these scenes could be re-enacted: the meeting between Odysseus and Nausikaa (Bk. VI), the perilous adventures of Odysseus on his journey home especially the Lotus Eaters, Cyclops, and Sirens (Bks. IX-XII), the reunion between Odysseus and his son Telemachus and their strategem against the suitors (Bks. XV-XVI), the recognition scene between Odysseus and his nurse Eurykleia (Bk. XIX), the contest
of the twelve arrows and Odysseus' vengeance upon the suitors (Bks. XXI-XXII), and the final meeting of Penelope and Odysseus and the secret of the marriage bed (Bk. XXIII).

For further enrichment regarding these Homeric epics, see Activities # 12: "Oral Tradition and the Epic."

c) Finally, Ovid's Metamorphoses affords an opulent panorama of fabulae, of which the following seem especially suitable for such role-play: Apollo and Daphne, Semele and Zeus, Echo and Narcissus, Niobe and Leto, Pyramis and Thisbe, Daedalus and Icarus, Theseus and Ariadne, Orpheus and Eurydice, and the story of Midas and the golden touch.

Should students choose to dramatize any of the above, Humphries' translation would prove very helpful: Ovid, Ovid's Metamorphoses, trans. with introd. by Rolfe Humphries, Bloomington, 1964.

Also, for further suggestions on role-play, see World History Guidebook, "Classical Civilization," Appendix X, pp. 125-126.
14. **Student Poems and Songs**

a) Encourage students to compose a brief poem in English or bring a song which captures a special moment in their life.

b) Help students to render the poem or song into Latin. If time permits, have the students read their poems or songs in Latin and ask the other members of the class to identify them.
Teaching Strategies

Because most of the strategies employed to teach Latin easily divide themselves into oral drills and written work, this section has been so arranged. First come the oral strategies, although some written work at the board sometimes initiates the drill, and then follow the written drills as prescribed.
1. First Declension (easily expanded to other declensions).
   a) Put the endings of the first declension on the board along with the syntax which these inflections indicate.

<table>
<thead>
<tr>
<th>(sg)</th>
<th>(pl)</th>
<th>syntax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nom.</td>
<td>a ae</td>
<td>S &amp; PN (subject, predicate nominative)</td>
</tr>
<tr>
<td>Gen.</td>
<td>ae arum</td>
<td>Poss (possession)</td>
</tr>
<tr>
<td>Dat.</td>
<td>ae is</td>
<td>IDO (indirect object)</td>
</tr>
<tr>
<td>Acc.</td>
<td>am as</td>
<td>DO (direct object)</td>
</tr>
<tr>
<td>Ab.</td>
<td>a is</td>
<td>OOP (object of preposition)</td>
</tr>
</tbody>
</table>

   b) Now drill this pattern and first declension as follows:
      (1) Give students the ending and have them give the syntax and number; reverse and supply the syntax and number, requesting the endings.
      (2) To these endings add the stem - silv, terr, aqu - which defines the noun and drill as before, until the students grasp the pattern and realize that these endings signal the syntax in Latin.
   c) Expand the concept by adding other nouns to the pattern and have students orally decline them.

2. First Declension - noun and adjective (easily expanded to other declensions and modifiers).
   a) Give one student the noun and a second student the adjective.
   b) Direct them to decline noun/objective in a certain number and have them proceed through all five cases.
c) Switch and do likewise with two more students using a different noun and adjective pair. Continue until all students have been involved and many combinations have been covered.

d) Keep the students on their toes by throwing in the first declension masculine nouns - agricola, nauta, poeta, auriga - and see if they match the modifier.

e) For variation, use whole class and divide into two sides, alternating the noun-adjective pair between sides.

3. First Declension (easily expanded to other declensions and modifiers).

   a) Have students take out half sheet of paper and write down any noun and adjective modifier they choose in any of the five cases, singular or plural.

   b) Now have them exchange the sheets of paper with a neighbor and direct the students to fill in the rest of the cases, keeping the specified number or including both singular or plural, if so desired.

   c) If time permits, have each student read the declined pair; if not, pick a few examples and reinforce the pattern in similar fashion.

4. First Declension (easily expanded to other declensions).

   a) Draw a circle on the board and arrange the endings for the first declension around it:
b) At random, point to an ending and have students identify the
number and case. (courtesy of Seeger and Winch, Teaching First
Year Latin, Ohio, 1938.)

5. First Declension (easily expanded to other declensions).
a) Have students make their own charts of case endings.
b) Use for review and direct students to give each other case,
number, and endings for new vocabulary words.

6. First Declension (easily expanded to other declensions).
a) Send students to the board and give them a noun to decline.
b) Check for mistakes, and after corrections are made, add an
adjective for them to include with their noun.
c) Have students take turns reading their declined forms.

7. First Declension (easily expanded to other declensions).
a) Teacher and class together decline a noun.
b) Individual students decline the noun and lead the rest of the
class.
c) Add an adjective modifier and repeat as above, involving as many
students as possible.

8. First Declension (easily expanded to other declensions).
a) Learn acc. pl. by remembering that the characteristic vowel, "a",
adds an S.
b) Give students nouns and have them form the new acc. case.

9. First Conjugation
a) Put the formula on the board: present stem (second principal
part minus RE) + PE (personal endings).
b) Now drill these PE as follows:
   - o - I
   - s - you
   - t - he, she, it
   - mus - we
   - tis - you
   - nt - they

   (1) Repeat the pattern in threes: o, s, t, - mus, tis, nt. Do this several times until students catch the rhythm and pattern.

   (2) Give students the endings and have them give the indicated pronoun; repeat giving the English and requesting the Latin.

c) Now define the action of the verb by adding the present stem -porta, ama, lauda - to the PE. Recite the entire present tense and have students repeat, noting the contraction of a-ô to o in first singular.

d) Again drill as above, but this time use the entire verb form and its three possible aspects: present progressive (presp.), emphatic (emp.) and common (com.). Drill each aspect separately. (Keep it simple for ease in grasping the concept).

   Cover the verbs in both English and Latin, alternating according to the desired stimulus-response: teacher gives amamus and asks for presp. and students supply - We are loving.

e) To culminate the exercise, have students stand up and follow the teacher in dancing the Mexican hat dance to the tune of the Latin for the first conjugation. Use the verbs covered in the
drill thus far, and then expand and augment the fun as well as the learning.

10. First Conjugation (easily expanded to the other conjugations).
   a) have the students take out half sheet of paper and indicate one verb form in present tense with specified aspect: portamus - we do carry.
   b) Now have them exchange the sheets of paper with their neighbor and direct the students to fill in the rest of the verb, complete with appropriate aspect.
   c) If time permits, have each student read the Latin and then the accompanying aspect; if not, select a few and reinforce the pattern in similar fashion.

11. First Conjugation - Third Principal Part
   a) Give students the infinitive form and have them respond with the first principal part of the verb. Move rapidly and cover all verbs in review.
   b) Focus on these verbs and remind students to add a V to the present stem (except dare and stare) to form the third principal part for first conjugation. Now drill as above, supplying the infinitive again, but this time requesting the first and third principal parts. Finally, expand by providing the English meaning and students respond with all three principal parts.

12. Second Conjugation - Third Principal Part
   a) For second conjugation drill as above with the infinitive.
   b) Then focus on these verbs and point out to the students those verbs which form their principal part in ui, the so called
"UI" family: habui, docui, merui, tenui, terrui, debui, valui and continui. (See section on Verb Table.) Again supply the infinitive and drill this new form.

Next, note the exceptions - auxi, movi, vidi, mansi - and drill as before, employing some memory or other word association to facilitate the learning of these forms. Now drill these verbs, cluing the infinitive and have students respond with both first and third principal parts.

d) Finally, expand as directed above (11b) and request all three principal parts.

13. Third Conjugation - Third Principal Part

a) For third conjugation proceed as directed above (11a).

b) Then assign each student the third principal part of a verb. Now give infinitive and have students respond with the new principal part. Hopefully, the class can begin to learn these new verb parts, hearing them individually rehearsed; also, word, rhyme, or some other memory association works very well in teaching the third principal part of this conjugation.

c) Now drill as above (11b) by giving the infinitive and requesting the first and third principal parts, and finally by providing the meaning. Students respond with all three principal parts.

14. First - Fourth Conjugation - Perfect Tense

a) Have students take out half sheet of paper and fill in one of the six forms in Latin with a designated aspect: reximus - we ruled; they may choose any verb covered from any conjugation.
b) Now have them exchange the sheets of paper with their neighbor and direct the students to complete the other forms for the verb in the appropriate aspect.

c) If time permits, have each student read the Latin and then the accompanying aspect; if not, pick a few and reinforce the pattern in similar fashion. Students should note that all verbs, though they have a different perfect stem, use the same endings and admit the same three aspects for describing the action within the perfect tense.

15. First - Fourth Conjugation - Verb Review (see section on Verb Table).

a) Give the meaning and have the students respond with all four principal parts of the verbs covered thus far.

b) Switch and give a derivative. Students reply again with the four principal parts.

c) Now mix it up: Give them the infinitive and they provide the missing principal parts as well as meaning and derivative; use any of the other parts as stimulus and students must echo the rest.

d) Do this in chorus with the entire class or have individual students identify each principal part of the verb and provide meaning and a derivative.

16. First - Fourth Conjugation - Verb Review (see section on Verb Table).

a) Pick a verb from any conjugation and have students conjugate it together in a designated tense; this helps to fix the pattern in mind and also eliminates embarrassment from individual mistakes.

b) Now choose a verb and give them a particular tense, requesting a specified aspect.
17. First - Fourth Conjugation - Verb Review (see section on Verb Table).
   a) Select a verb and have students give a synopsis of it in a specified person and number for all tenses covered.
   b) Have each student read a verb and thus review tenses as well as their formation.
   c) If time permits, specify a given aspect within a tense and have students respond according to the person and number they choose.

18. First - Fourth Conjugation - Verb Review (see section on Verb Table)
   a) Send students to board to conjugate verbs from different conjugations in a designated tense with a given aspect.
   b) Have students recite their conjugated forms with appropriate aspect for the tense, thus providing a good survey of tenses for various verbs.

19. Vocabulary Review
   a) Use flash cards made for each unit's words and give a group or individual review.
   b) Have students conduct the review by selecting cards and calling each other to answer.
   c) As an alternative, have the students make flash cards upon completion of each unit and quiz each other from their stock.

20. Vocabulary Review
   a) Teacher starts by supplying a noun from the unit(s) review.
   b) Students follow suit by giving another noun of the exact type and gender as specified by the teacher. Keep reviewing the nouns accordingly until the teacher changes focus. Play until a majority of nouns are covered.
c) Switch and proceed in similar fashion to review the verbs. Teacher starts by giving verb in the infinitive form, and students must match the infinitive with another one of the same conjugation. Again, continue until a majority of the verbs have been reviewed.

d) For variety, have the students provide the stimuli, and, following the same procedure, call upon each other for the responses.

21. Vocabulary Review
a) Use flash cards for unit review and divide the class into small groups.

b) Now have the students use the cards to write out sentences illustrating Latin S - M - T (subject, object, verb) order and the importance of inflected endings for meaning; the cards should have Nom. sg. on one side and Acc. sg. on the back, with the verb ending in 3rd sg.

c) Have students read and translate their new sentences.

d) Expand by forming other cards with the nouns in the same cases but with plural endings and the verb in 3rd pl. Repeat as above; this helps the students fix basic patterns in mind.

22. Prescription Drill for Translation
a) Scan a sight translation for interesting syntax and grammar constructions.

b) Have students individually identify a specified area of focus: all the verbs, IDO-DO (indirect object-direct object), abl. of means, vocative exceptions, etc. They should detect these
various items as directed, without attempting to translate the sight passage, relying only upon their previous training and skill for recognition.

c) After identifying these key elements, the students should be ready to translate the sight passage, provided that its level of difficulty does not significantly surpass their prior learning.

23. Enhancing the Translation

a) After concluding the translation, return and examine key ideas by asking questions (preferably in English unless the class can handle the Latin) to test the students' comprehension. Accordingly, the students should respond in the same language as addressed.

b) Focus on salient Latin words and ask students for English derivatives, thus constantly evoking and augmenting vocabulary skills; moreover, this is particularly impressive with verbs whose separate principal parts each have English derivatives from their stems: docere, augere, stare and dare.

c) Study the context of the translation and if possible enrich with a culture glimpse in art or literature. Many translations concern stories of the gods, famous heroes of Greek mythology or Roman history, battles, scenes of daily life in Rome, etc. Thus, the stories easily lend themselves to further expansion which accentuates student interest and involvement.

d) If possible, compare ancient Roman times with modern America regarding the specific area described in the translation.
24. Translation of the Exercises
   a) For the various exercises found in the textbook, have the students take turns reading the Latin sentences. Then have students translate the sentences.
   b) After translating the Latin sentences, have teams of students pinpoint the noun or verb forms of the particular number in question.

25. Tips on Translation
   a) Usually locate the verb at the end of the sentence.
   b) Ask who or what to find the subject (if expressed) and whom or what to determine the direct object.
   c) After focusing on these skeletal elements of the sentence, the passage should reveal its basic meaning rather easily.

26. Latin and Greek Suffixes and English Derivatives
   a) Teach class that English words derived from Latin often end in _ity, _sion, or _tion (process or state of becoming).
   b) Now have students each give English words which have these suffixes. Note their responses and point out how much Latin they already know in this regard.
   c) Inform the class that English words derived from Greek often end in _ogy (the story, account, or science of) and _graphy (the sketch, outline or description of).
   d) Repeat as above in (b) for the English words derived from Greek.
   e) For expansion, have the students make a list of words which they find in newspapers, books, or other media, with these suffixes, and have them note how great a debt English owes to Latin and

166
Greek for the origin of many words.

27. Numbers - 1-20
   a) Teach the students the numbers 1-10 and have them repeat each.
   b) Now in staccato fashion work in threes - unus, duo, tres - and then twos - quattuor, quinque. Repeat in same way for numbers 6-10. Drill until students can easily recite the numbers 1-10.
   c) Show students how the numbers 11-20 are basically the same with the addition of decim and the two changes for 18 and 19. Drill as before, encouraging them to remember that these new numbers consist of the respective old number plus decim.
   d) Now use addition (et), subtraction (minus), multiplication (multiplicata), and division (divisa) and form problems in Latin to which the students respond in Latin.
   e) Repeat with several variations and then have students form questions and call upon each other for the correct response.

28. Perfect Passive Participle and Derivatives
   a) From the list (see section on Verb Table) give students the infinitive of the verb and have them respond with the fourth principal part.
   b) Drill this part only by giving them the Latin and asking for English derivatives (as many as possible) for each verb; this can be a very beneficial and informative exercise.
   c) For variety, have students give the Latin and call upon each other for derivatives; each student should respond with a derivative until all possibilities are exhausted and the majority of verbs have been covered.
29. The Perfect Passive System
   a) Send students to the board to put up the double forms (periphrastics) for the perfect, past perfect, and future perfect tenses in the passive voice.
   b) Now focus only on the auxiliary verb and have them respond with the correct English translation for each auxiliary provided: eramus - we had been; eritis - you will have been; sunt - they were. Reverse and supply the English verb phrase and have students give the Latin auxiliary verb and name the designated tense.
   c) After this concept is understood, add different past participles from verbs they know (see section on Verb Table) to complete the presentation.
   d) Drill as above in (b).

30. Perfect Passive Participle and Its Meaning
   a) Give students the perfect passive participle and have them supply the literal meaning in English - having been + past participle.
   b) Now instruct them to drop the having been, but always to remember its essential presence in the translation. Drill as above.
   c) After students are responding quickly and accurately, mix up the routine, and have them give Latin for English and English for Latin as directed regarding the participle.

31. Relative Pronoun
   a) Construct a basic sentence on the board: the man lives across the street.
b) Separate this sentence and concentrating on the subject man, add five dependent clauses around it as follows:
The man, (1) who loves fish, lives across the street.
(2) whom we know, " " " 
(3) to whom the girls gave the dog, " " .
(4) whose brother found the marble, " " .
(5) about whom the class learned, " " .

c) Now take each separate dependent clause and have students give other examples, until they begin to understand the pattern of the subordinate clause. They should discern the signals in English so as to facilitate transfer to Latin: who (subject), whom (direct object), to whom (indirect object with verb of giving), whose (possession), and about whom (object of preposition); also, they should be able to relate the syntax of the dependent clause to that comprising the five principal cases. From each example the students should observe that, though the syntax varies, the antecedent "man" remains the same.

d) Change the sentence and use a neuter noun such as: the town had many streets. Then repeat as directed above (b-c), until the pattern has been grasped.

e) After perceiving that the antecedent stays the same in number and gender, but the relative pronoun takes its syntax from its own dependent clause, the students are ready to focus on the corresponding Latin forms.

32. Ablative Absolute

a) Put several examples of ablative absolute on the board using in
b) Direct students to translate this construction as "with the noun having been + past participle."

c) After they have demonstrated a control over these phrases, practice by having them translate each more smoothly into a different subordinate, adverbial clause: time (after, when), cause (because, since, as), concession (although), condition (if), and coordinate - an independent clause joined by "and" to the main clause.

d) Now focus on each type of adverbial clause separately and have students give several examples, depicting the circumstances in which the main verb happens; this separate focus should enable students to grasp the essential differences in meaning among the various clauses.

e) Finally, have them repeat as above, but now they should complete the sentence, thus displaying the ablative absolute in its many facets. Indeed, from this drill students should easily understand why the original name for this construction was the "ablative of attendant circumstances."

33. Perfect Infinitive - Active and Passive Voice (see section on Verb Table).

a) Give students the infinitive and have them respond with the third principal part of the verb. Review verbs covered so far, and write down several responses on the board.

b) Show them how to form the perfect infinitive - perfect stem + isse - to have + past participle.
c) Again provide the infinitive, but now ask for the perfect active infinitive with appropriate translation.

d) After they have grasped this concept, switch to passive voice and proceed as above (a-c), only focusing on the fourth principal part with its formation - participial stem + esse - to have been + past participle.

e) Finally, give the infinitive and have students supply the perfect infinitive in both active and passive voice with appropriate translation.

34. Irregular Adjectives (r and lis) - Comparative and Superlative

a) Review with students the form for the comparative adj. - stem + ior (M & F) and ius (N).

b) Give students only r adjectives (both those which drop and keep the "e") and request the comparative form. Similarly, give them some of the six oddballs in lis - humilis, gracilis, difficilis, facilis, similis, dissimilis - have them give the comparative form.

c) Now inform them that r adjectives form their superlative by adding rimus a um to the mas. sg. nom. Drill by supplying the new comparative of an r adjective and requesting the superlative.

d) Switch to the lis adjectives above, and, after showing the superlative form as stem + limus, a, um for these six adjectives only, drill as before until students can do this easily.

e) Now put it all together and give the positive of these adjectives and have students respond with the new comparative and superlative forms. After students demonstrate proficiency
with these irregulars, throw in some regular adjectives and thus illustrate the spectrum; also, students should perceive that these irregular adjectives only behave in such a manner in superlative, but follow the rules in their comparative.

35. Irregular Adjectives (bonus, malus, magnus, parvus and multus) - Comparative and Superlative

a) Give the meaning for each and have students give the familiar positive form. Review each Latin adjective again by having students supply derivatives (as many as possible).

b) Now focus on the comparative form and write it on the board: ma - major. Ask students to give an English derivative - major, majority, etc. Treat each irregular adjective similarly and have students note the derivatives for these words.

c) Proceed as above (b) with the superlative.

d) Now mix it up and request a derivative for a specified form. Cover all three forms and provide an atmosphere for many derivatives which should help the students remember these irregular forms in comparative and superlative.

e) Finally, give the meaning and students respond with all three forms.

36. Enhancing Latin Comprehension (Advanced Classes)

a) Give students an English sentence and have them translate into Latin; they should employ basic skills learned in this endeavor, and the sentence should not exceed their level of study.

b) Have some students put their Latin sentences on the board for comparison, while the rest of the class observes the key.
elements of each sentence and the basic difference between English and Latin word order.

c) Using the sentences on the board, have the students suggest corrections until by combination the sentence reaches the proper Latin translation. Answer any questions students may have.

37. Clues for New Words

a) Upon encountering words which are new for the students, provide them with some clue and invite them to guess the English meaning before looking it up. Such clues could be: pantomime or use of props, English derivatives which students can easily identify from the Latin, imitation of the key sounds in the new word or some creative rhyme scheme, and a combination of the above.

b) After the students correctly define the word, have them provide a derivative and then properly use this new word in their own sentence.

38. Verbs - (see section on Verb Table).

a) Assign students a verb and have them write down the four principal parts. Then for homework instruct them to conjugate the verb in both active and passive voice, indicative mood only.

b) Next day, send them to the board and have them put up the verb and then recite in Latin.

c) If time permits, interject different aspects for these tenses and have students respond as directed in either active or passive voice in all six tenses of the indicative mood.

39. English to Latin (For Advanced Classes)

a) Pass out a list of ten sentences in English and have students
convert to Latin; these sentences should review previous syntax structure and vocabulary.

b) Review the key skeletal elements of the sentence and make sure students understand the S, M, T pattern. (subject, direct object, verb).

c) Guide students and together come up with the proper Latin rendering for each of the ten sentences. Finally read the Latin.

40. Retests

a) If students fail a test, it often helps to allow them another try.

b) Have them review thoroughly what they missed, and, when they're ready, administer the retake. This test should be comparable to the first regarding its scope, questions, and level of difficulty.

c) Ask them to review the problem areas as revealed by both tests. If failure results again, help the student with the identified trouble-sections and proceed as above (b).

1. THE DECLARATION OF INDEPENDENCE

In Congress, July 4, 1776

PREAMBLE

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitles them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

A NEW THEORY OF GOVERNMENT

We hold these truths to be self-evident: that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness.

That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly all experience hath shown that mankind are more disposed to suffer while are sufferable than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security.

REASONS FOR SEPARATION

Such has been the patient sufferance of these colonies; and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these states. To prove this, let facts be submitted to a candid world.

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained; and when so suspended, he has utterly neglected to attend to them.
He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of representation in the legislature, a right inestimable to them, and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly, for opposing, with manly firmness, his invasions on the rights of the people.

He has refused, for a long time after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the state remaining, in the mean time, exposed to all the dangers of invasion from without and convulsions within.

He has endeavored to prevent the population of these states; for that purpose obstructing the laws of naturalization of foreigners, refusing to pass others to encourage their migration hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice, by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers to harass our people and eat out of their substance.

He has kept among us, in times of peace, standing armies, without the consent of our legislature.

He has affected to render the military independent of, and superior to, the civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution and unacknowledged by our laws, giving his assent to their acts of pretended legislation:
- For quartering large bodies of armed troops among us;
- For protecting them, by a mock trial, from punishment for any murders which they should commit on the inhabitants of these states;
- For cutting off our trade with all parts of the world;
- For imposing taxes on us without our consent;
- For depriving us, in many cases, of the benefits of trial by jury;
- For transporting us beyond seas, to be tried for pretended offenses;
- For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarging its boundaries, so as to render it at once an example and fit instrument for introducing the same absolute rule into these colonies;
- For suspending our own legislature, and declaring themselves invested with power to legislate for us in all cases whatsoever.
He has abdicated government here, by declaring us out of his protection and waging war against us.

He has plundered our seas, ravaged our coasts, burned our towns, and destroyed the lives of our people.

He is at this time transporting large armies of foreign mercenaries to complete the works of death, desolation, and tyranny already begun with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the head of a civilized nation.

He has excited domestic insurrections among us, and has endeavored to bring on the inhabitants of our frontiers the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes, and conditions.

In every stage of these oppressions we have petitioned for redress in the most humble terms; our repeated petitions have been answered only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant is unfit to be the ruler of a free people.

Nor have we been wanting in attention to our British brethren. We have warned them, from time to time, of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity; and we have conjured them, by the ties of our common kindred, to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too, have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity which denounces our separation, and hold them, as we hold the rest of mankind, enemies in war, in peace, friends.
A FORMAL DECLARATION OF WAR

We, therefore, the representatives of the United States of America, in General Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the name and by authority of the good people of these colonies, solemnly publish and declare, that these united colonies are, and of right ought to be, free and independent states; that they are absolved from all allegiance to the British crown, and that all political connection between them and the state of Great Britain is, and ought to be, totally dissolved; and that, as free and independent states, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which independent states may of right do. And, for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor.

2. LINCOLN'S GETTYSBURG ADDRESS

Four score and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting place for those who here gave their lives that this nation might live. It is altogether fitting and proper that we should do this.

But, in a larger sense, we cannot dedicate - we cannot consecrate - we cannot hallow - this ground. The brave men, living and dead, who struggled here, have consecrated it far above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us - that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion; that we here highly resolve that these dead shall not have died in vain; that this nation, under God, shall have a new birth of freedom; and that government of the people, by the people, for the people, shall not perish from the earth.

8. respect  - denotes that in respect of which -
   e.g. - noble birth - nobilis genere - usually an adj. and then the noun the adj. refers to.
Once upon a time, there was a country that was very small, and on the whole very good. Its citizens were proud and independent and self-reliant, and generally prosperous. They believed in freedom and justice and equality, but above all, they had faith. They had faith in their religion, their leaders, their country and themselves, and of course, they were ambitious. Being proud of their country, they wanted to make it bigger. First, they conquered the savage tribes that hemmed them in. They fought innumerable wars on land and sea with foreign powers to the east and west and south. They won almost all of the battles they fought, and conquered foreign lands.

It took many generations, but at last the good little country was the richest, the mightiest nation in the whole wide world, admired, respected, envied and feared by one and all. "We must remain the mightiest nation," said its leaders, "so that we can insure universal peace and make everyone as prosperous and decent and civilized as we are."

At first, the mightiest nation was as good as its word. It constructed highways, and buildings, and pipelines, and hygienic facilities all over the world, and for a while, it even kept the peace.

But being the mightiest nation in the world, its leader was the mightiest man in the world, and naturally he acted like it. He surrounded himself with a palace guard of men chosen solely for their personal loyalty. He usurped the powers of the senate, signing treaties, waging wars and spending public funds as he saw fit. When little countries far away rebelled, he sent troops without so much as a by-your-leave; and the mightiest nation became engaged in a series of long, costly, inconclusive campaigns in far away lands. So some disillusioned soldiers refused to obey orders and some sailors mutinied, even though their leader raised their pay. And in some places, the mightiest nation hired mercenaries to do its fighting, and because it was the richest, it worshipped wealth and the things wealth bought.

But the rich grew richer and the poor grew poorer through unfair tax laws. And in the capitol one of five were idle and on welfare. When the poor grumbled they were entertained by highly-paid athletes and the firing of expensive rockets into the air which sometimes fizzled. But the poor often rioted and looted and burned in their frustrated rage. Many citizens lost faith in their old religion and turned to oriental mysticism; and the young, wearing long hair and sandals, became Jesus freaks. Bare-breasted dancers, lewd shows and sex orgies were increasingly common; and the currency was debased again and again to meet mounting debts. Worst of all, the citizens came to learn their leaders were corrupt, that the respected palace guard was selling favors to the rich and sending spys among the people creating fear and distrust.

So it was that the people lost faith. They lost faith in their leaders, their currency, their rockets, their postal system, their armies, their religion, their laws, their moral values, their country, and eventually themselves; and thus, in 476 A.D., Rome fell to the Barbarians and the Dark Ages settled over Western Civilization.

Felis

I
A cat sedebat on our fence,
As laeta as could be;
Her vox surgebat to the skies,
Canebat merrily.

II
My clamor was of no avail
Though clare did I cry.
Conspexit me with mild reprof,
And winked her alter eye.

IV
I had sixshots; dixi, "Ye gods,
May I that felis kill!"
Quamquam I took six of her lives,
The other three sang still.

V
The felis sang with major vim,
Though man's aim was true.
Conatus sum putare quid
In tonitru I'd do,
III
Quite vainly ieci boots, a lamp,  
Some bottles, and a book;  
Ergo, I seized my pistol, et  
My aim cum cura took.

Puer in library,  
Legens a book,  
Vidit puellam  
Dantem sweet look.  
Puer shut text-book  
Magna cum sigh.  
Quod pretty puella  
Clauist one eye.  
"Veni cum me,"  
Sic dixit puer;  
"Veni ex libris,--  
Have some fresh air."

VI
A scheme advenit in my head;  
Scivi 'twould make her wince--  
I sang! Et then the hostis fled  
Non eam vidi since.

Itaque ex porta  
Exit the two,  
Puella et stultus,  
Sub caelo Blue.  
Ac non legit puer  
Nec Latin nec Trig;  
Itaque he got  
A gradun not big.  
Sed quoque receipt  
Osculas three,  
Et quamquam he flunkit,  
Risit cum glee.

Fill in the spaces below with the three required "Latin" words. Can you tell what they mean? If your imagination doesn't fail you, you will be able to see that these are not really three Latin words, but four English words. The first is the word "to." Fill in the rest.

TO ___________________________ ___________________________

1. If Pluto was king of the Underworld, put the letter in spaces 1, 3, 11; otherwise put B.

2. If Vergil wrote the Galic Wars, put the letter G in space 10; otherwise put S.

3. If Venus was the goddess of Beauty, put an L in space 8; otherwise put D.

4. If videbo is the future active, indicative, first person singular of video, put U in space 7; otherwise put D.

5. If agricola means sailor, put A in space 6; if not, put M.

6. If the imperative plural of porto is portate, put E in space 5 and 9; otherwise put H.

7. If ego means you, put U in space 4. If ego means I, put I in space 4

8. If this is the most exciting day of your life, put O in spaces 2 and 12. If it isn't put in spaces 2 and 12 the letter O.

The above is what is known as a fake Latin inscription. This particular one is supposed to have been used in Colonial times in hitching posts.

Here is another fake Latin inscription which was sometimes found in cattle pastures. What does it really mean?

'Courage!' he said, and pointed toward the land,
This mounting wave will roll us shoreward soon.
In the afternoon they came unto a land
All round the coast the languid air did swoon,
Breathing like one that valley stood the moon;
And, like a downward smoke, the slender stream
Along the cliff to fall and pause and fall did seem.

A land of streams! some, like a downward smoke,
Slow-dropping veils of thinnest lawn, did go;
And some thro' wavering lights and shadows broke,
Rolling a slumbrous sheet of foam below.
They saw the gleaming river seaward flow
From the inner land; far off, three mountain-tops,
Three silent pinnacles of aged snow,
Stood sunset-flush'd; and dew'd with showery drops,
Up-climb the shadowy pine above the woven copse.

The charmed sunset linger'd low adown
In the red West; thro' mountain clefts the dale
Was seen far inland, and the yellow down
Border'd with palm, and many a winding vale
And meadow, set with slender galangale; -(plant with aromatic roots)
A land where all things always seem'd the same!
And round about the keel with faces pale,
Dark faces pale against that rosy flame,
The mild-eyed melancholy Lotos-eaters came.

Branches they bore of that enchanted stem,
Laden with flower and fruit, whereof they gave
To each, but whoso did receive of them
And taste, to him the gushing of the wave
Far far away did seem to mourn and rave
On alien shores; and if his fellow spake,
And deep-asleep he seem'd, yet all awake,
And music in his ears his beating heart did make.

They sat them down upon the yellow sand,
Between the sun and the moon upon the shore;
And sweet it was to dream of Fatherland,
Of child, and wife, and slave; but evermore
Most weary seem'd the sea, weary the oar,
Weary the wandering fields of barren foam.
Then some one said, 'We will return no more,'
And all at once they sang, 'Our island home
Is far beyond the wave; we will no longer roam.'
These materials should prove especially helpful for those teaching multiple levels or individualized or program learning.

UNIT REVIEW AND PRACTICE GUIDE 7-8-9

General instructions. Go over all the test information items at the end of your text book unit. Be sure to include a careful review of vocabulary. Check yourself on the review questions and drill which are given below. If you are unable to answer any questions, ask the teacher for assistance.

Unit 7
Quis and quem are parts of speech called
The meaning of quis is __________; and of quem is __________.
An intensifier, such as etiam, is used in a sentence to __________.
It is one form of a part of speech called an __________.

Unit 8
Define derivative. Why are they so important in your study of Latin?
Give 3 Latin words and their English derivatives as examples.

It is/is not possible to expand a sentence by using 2 kernels: A sentence may also be expanded by having __________ added.

To ask a yes-or-no question the signal __________ is added to __________.
A yes answer is given by __________, A no answer is given by __________.
The word an means __________.
The answer to a question containing an will be ____________________.
In a Latin sentence the most emphatic word comes __________.

An antonym is a word that means __________ of another word.

Mark the structure (s-m-t): Diem nox premit, dies noctem.

An, et, and sed are types of words called __________________________.

Translate to English:
Habetne unus capillus suam umbram?
Quis crudelem medicum facit?
Cognoscitne fur furem?
Regitne Fortuna an Sapientia vitam?

Unit 9
In this lesson you learned a new case of a noun: __________ case.
You also learned a new part of speech which comes before a noun and causes it to modify some other word in the sentence; it is called a __________.
Three Latin examples of this type of word are __________, __________, __________.

Groups of nouns which change ending in the same pattern are called __________.
There are how many of these?
Ablatives of 1st declension end in the letter __________
Ablatives of 2nd declension end in the letter __________
Ablatives of 3rd declension end in the letter __________
Ablatives of the 4th declension end in the letter __________
Ablatives of the 5th declension end in the letter __________.
These ablative endings also furnish the characteristic vowels of each declension. Write the paradigm for these NEW words (you can predict the endings).

\[
\begin{array}{ccc}
\text{casa (house)} & \text{carrus (car)} & \text{finis (end)} \\
\hline
\text{ } & \text{ } & \text{ }
\end{array}
\]

\[
\begin{array}{ccc}
\text{ } & \text{ } & \text{ }
\end{array}
\]

While English uses the preposition "by means of," Latin expresses the same idea using only \_. The grammatical term for this is ABLATIVE OF MEANS. Translate these 3 words: leget = 
pecunis = 
die = 

Two vowels, such as o+e sounded together are called a\_

Write an English derivative for each of these Latin words:

\[
\begin{array}{ccc}
\text{nox} & \text{juvenis} & \text{poena} \\
\text{femina} & \text{mus} & \text{canis}
\end{array}
\]

Complete the paradigm of quis: quis What declension should quis belong to?

\[
\begin{array}{ccc}
\text{ } & \text{ } & \text{ }
\end{array}
\]

What case is quo? When will this form be used in sentences?

Translate to English.

Quis vitam regit?

Manetne infans cum femina?

Femina cum juvæne stat.
GENERAL INSTRUCTIONS. Go over all the test information items at the end of your textbook unit. Be sure to include a careful review of vocabulary. Check yourself on the review questions and drill which are given below. If you are unable to answer any question, ask the teacher for assistance.

Unit 10
The ablative form showing characteristic vowel of the 4th declension is _______. The variant for the characteristic vowel of 3rd declension adjectives is ___________.

In quo loco means ___________. It is answered by using the preposition + ___________. Cum quo means ___________. Quo means ___________.

Write these short sentences in Latin:
Who is with the frog?
In what place is the monkey?
The young man is on the step.
The man is having a quarrel with the woman.

ABLATIVE OF MEANS = the word in the ablative case alone. It will normally be a non-personal word. Give the translation of the ablatives of means:
die = ______________________________ veste = ______________________________
laude = ______________________________ manu = ______________________________

Also see pp. 51-55 in your textbook.

Write the paradigms:
Nouns
vulpes
effigies

Adjectives
facilis
hilaris
canis

The names of 4 Latin authors whom you should recognize were: ___________, ___________, ___________, ___________.

Unit 11
If a verb ends in -t, it means that the subject ___________.
This kind of verb is called ___________.

If a verb ends in -tur, it means the subject is having the action ___________.
This sort of verb is called ___________.
The ending for an active verb is the letter _______. The ending for a passive verb is the letters _______. "Lavat" means ___________; "lavatur" means ___________.

ABLATIVE OF AGENT is used with the passive to show who acts. It consists of the Latin preposition + the noun in _______ case. There are 2 spellings of this new preposition. Explain the difference in usage for the 2 spellings. The question phrase a quo means ___________.
Translate and answer these questions.
Quis in re incerta cernitur?
A quo saepe tenetur aper?
Quem canis saepe tenet?

Separating an adjective from the noun it modifies has the effect of______.

Write the paradigms for practice:
res facilis
----------------

hilaris juvenis
----------------

Change this sentence from active to passive.
Canis canem cognoscit. = ____________________________

Unit 12
A personal noun is one that names___________________________.
A noun that does not name living things is called_______________.
The question word for a non-personal subject or object is_______________.
This form is called ambiguous because it___________________________.
Ambiguous forms (do/do not) show a contrast between the nominative and accusative cases. Give the paradigm of the personal question pronoun: __________________

Give the paradigm of the non-personal question pronoun: __________________

Think of 3 ways in which you can figure out whether quid is a nominative or accusative form. (This also works on ambiguous nouns.)

Non-personal nouns form 1 part of the 2nd declension. They are called "ambiguous" because:___________________________.
Write the paradigm of any ambiguous 2nd declension noun: __________________

There are also ambiguous forms in a part of 3rd declension. This means the 2 forms, ____________ case and ____________ case, are similar. Write the paradigm of the 3rd declension ambiguous noun that you have just learned: __________________

Another important question form is qualis. It has the forms of_______________. This word is what part of speech?_________________. Therefore, the answer to qualis? will be what part of speech?_________________. Qualis means_______________.

235.
259
Transform to passive: Quercum taurus videt.
Translate your version to English.

Unit 13
An important new concept in this lesson was the idea that an adjective will agree with the noun it modifies in 3 respects: ________ and ________. However, an adjective and the noun it modifies (do/does not) have to be identical declensions.

In order to modify any noun, each adjective must be able to be ________ (how many) genders. GENDER is another word to indicate whether a word is M-F or N.

There are 2 groups of adjectives: those which belong to the ________ declension, and those in ________ declension. Using bonus, bona, and bonum write the correct spelling of the adjective for each of these words:

- opus
- vestem
- mente
- corpus
- judex
- mens
- vita
- tauro
- regnum
- renda
- judice
corpore

Bonus, -a, -um, spans both 1st and 2nd declensions. The other type of adjective is 3rd declension. Practice the paradigm of:

omnis
omne
crudelis
crudele
qualis
quaie

The form crudefis is both ________ and ________ genders. Crudefle is ________ gender.

Select the correct form of qualis for each noun given below.

- vitium
- vinum
- mente
- equus
- re
- femina
- equum

Practice the paradigm of 2 new 3rd declension neuter (ambiguous nouns:)

corpus

genus

Quid agit? is a new question form that means ________?

Give the meanings of these review question words.

- quis?
- qua?
- quid?
- cum quo?

Another new question form is the absolute quantus? Quantus, quanta, and quantum ask ________?
Practice the adjective sanus, -a, -um in the following paradigms:

<table>
<thead>
<tr>

When a subject is singular, an active verb ends in the letter ______, to indicate "he, she, or it," or it may end with the letters ______ to show passive voice. When the subject is plural, the active verb of a sentence ends in _________ (meaning "they") or with ______ as passive form.

You now should know the plural of quis?

Mark the s-m-t of these questions; then translate each.

Quid non agunt lacrimae?
Quale consilium capiunt feminae?
Quos non capiit aquila?
A quo muscae non capiuntur?
Review the paradigms in frames:

How would you answer these questions in Latin?

What does a sound mind possess?

What sort of body has an unsound mind?

Quaïl in corpore est mens insana?

Qualem datorem diligit amicus?

Qualis vir blandà oratione capitur?

Quali a fonte defluit aqua impura?
Unit 15

More plurals! In 3rd declension accusative -em changes to _______ to form the plural. In 4th declension -um changes to plural _______. In 5th declension accusative -em changes to plural _______.

Write a full paradigm of:

res bona ____________ anus blanda ____________

__________________ _______________ _______________ _______________

__________________ _______________ _______________ _______________

fons purus ____________ magnus dens ____________

__________________ _______________ _______________ _______________

When ambiguous forms such as mures occur in a sentence there are several clues which can be used to determine whether you have a nominative or accusative form on your hands. Can you recall these means? If not, see frames 142-173.

Complete this paradigm. quis ________________

Est means _______. Its plural is ________________, meaning _______. How does the subject of the sentence determine whether est or sunt will be used?

mark the s-m-t of each question. Translate.

A quibus muscae capiuntur?
Ex quibus asinus cognoscitur?
Timentne stulti an sapientes Fortunam?
Quales viri Fortunam ferunt?
Quantos aures asinus habet?

Unit 16

Neuter plurals. As you have found out this is a complicated chapter. Work slowly as you review and see the teacher with any questions.

The signal for neuter plural of nouns and adjectives is _______. This form if found in both _______ case and in _______ case. (Remember ALL neuters are ambiguous.)

Write a full paradigm of:

auxilium bonum ____________ animal cautum ____________

Recall from Unit 15 the 3 ways to tell whether an ambiguous form is nominative or accusative case. Write them:
1. ____________________________
2. ____________________________
3. ____________________________

Participles are forms of _______ used as _______. Participles have tense or time designations. Currens is an example of a _______ (tense) participle. Currens translates as _______. How many genders are used? _______. How many spellings are there for a present participle in the nominative case? _______. Write the paradigm of:
   M-F sing. & Pl. N sing. and plural
   metuens. ________ ________ ________ ________
   ________ ________ ________ ________

How would you translate metuens?

videns ________ ________ ________ ________

Provided below are forms of INTERROGATIVE PRONOUNS (question words). Extra blanks are given to add remaining forms you will learn later. Be sure to know these forms and to be able to translate them.

WHO?
   (Singular) M-F N
   quis quid
   quem quid
   quo quid

WHO?
   (Pl.) M F N
   qui quae quae
   quos quas quas
   quibus quibus quibus
There is also an INTERROGATIVE ADJECTIVE. (WHAT?--as in what animal?, what book?, what time?) Note the M-F-N each have separate forms; this makes it possible to modify nouns of any gender.

The plural forms of the adjective are exactly the same as the pronoun on the preceding page. You will know it is an adjective if it modifies a noun; it is a pronoun if it is used as a noun (that is, it stands alone).

You should also recall 2 other interrogative adjectives:

_______ = how big, how much? _________ = what kind of?

Notice that these adjectives follow regular 1st-2nd or 3rd declension form.

Paradigm practice. Do these orally or write on the back of the page. Do as many as you feel you need to practice.

fortis animus

UNIT 17 REVIEW AND PRACTICE

I. You have learned 3 sentence structure types: ________, ________, and ________. The fourth type presented in this lesson was _________.

Transition verbs are verbs which take _________.

Intransitive verbs are those that do not or cannot have an _________.

The new sentence structure (s-s-est) consists of these parts: ________ and _________.

These sentences are ambiguous; that is, you can't tell _________.

The verb est means ________; sunt means ________.

II. Word endings. What is a suffix?

-tia as an ending means ________. It becomes the ending ________ in English. -tas means ________. In English it is becomes ________. -or means _________.

The endings make ________ out of adjectives.

III. New vocabulary.

Ille and his are parts of speech called demonstrative ________. Ille means ________; hic means _________.

Question words--review these as listed in Units 15 and 16 practice guide.

IV. Practice these paradigms:

<table>
<thead>
<tr>
<th>mos</th>
<th>homo</th>
<th>facilis res</th>
<th>facile vitium</th>
</tr>
</thead>
<tbody>
<tr>
<td>______</td>
<td>______</td>
<td>______</td>

</tr>
<tr>
<td>______</td>
<td>______</td>
<td>______</td>
<td>______</td>
</tr>
<tr>
<td>amor</td>
<td>______</td>
<td>______</td>
<td>______</td>
</tr>
</tbody>
</table>

V. Review other paradigms in your book. Go over vocabulary and Basic Sentences.
UNIT 18 REVIEW AND PRACTICE

I. Forms such as currens are called ______. Currens is ______ tense. This form shares features of both a ______ and ______ tense. We know participles are adjectives because they ______. A second form of participle is ______ tense. Write one example: ______; give the English meaning: ______.

II. Word formation.
The past participle stem may be used as a base to which suffixes are added to create ______ out of adjectives.
The suffix -or is added to mean ______; -io means ______; -us means ______; and -tas means ______.

III. Numbers.
The word for 1st is ______; 2nd ______; 3rd ______; 4th ______. These words are what part of speech? ______. They fit the full paradigm of ______ and ______ declensions.
The question word quotus, -a, -um, means ______.

IV. Know your vocabulary and Basic sentences. You will be asked 5 review sentences.

Unit 19

I. Numbers.
Write the ordinal numbers from 1 to 10. Remember--these have the same adjective forms as bonus, bona, bonum.

Give the paradigm: secundus vir ______

_______ ______ ______ ______ ______.
II. Sentence structure.
Four types of sentence structure are: ____________, ____________, ____________, and ____________. To analyze the structure of a sentence and find the correct verb check out these items:
A. Is there an (M) form? It must be s-m-t.
B. Are there 2 (S) forms? It must be s-s-est (or sunt).
C. Is there only an (S)? It needs an intransitive verb (T) or (-tur). A and ab signal a -tur verb.
D. NOTA BENE: A plural (S) needs an -nt or -ntur verb.

III. Adverbs. THEY'RE EASY!
Adverbs are parts of speech that modify ____________ and tell ____________ something is done or happens. The question word ____________ asks for an adverb answer. It means ____________.
The ending ____________ signals an adverb in English. In Latin there are 2 main types of adverb. They are formed by putting a new ending on ____________.
Adjectives that end in -us, -a and -um (like cautus) form adverbs by removing the ending ____________ and replacing it with ____________.
Now the meaning is ____________.
Adjectives that end in -is (like hilaris) remove the ____________ and add ____________ to form adverbs. The adverb of hilaris is ____________, meaning ____________. Practice making adverbs with these familiar and unfamiliar adjectives.
avarus ____________
eloquens ____________
acris ____________
gravis ____________
fortis ____________
verus ____________
Note: 2 irregular adjectives with special adverbs are ____________ and ____________.

IV. Vocative case.
Latin uses a special case (calling form) where a man's name is spoken directly to him. The ending -us (2nd declension nominative) changes to ____________.
Call Marcus: ____________! Call Quintus: ____________!
V. Sentences may contain more than one clause. These may be two equal kernels, or, if one is more important than the other it is called a __________ clause. A clause must contain a __________, a __________, and perhaps a __________.

In English subordinate clauses often begin with words such as __________, __________, __________. These words are called __________. The word cum has a new meaning: __________. It introduces a subordinate __________. Translate this sentence: Canis timet cum vir crudeler agit. __________.

VI. Relative pronoun. Refer to your Unit 16 sheet and fill in the new forms of qui, quae, quod. Note that the same forms function both as the interrogative adjective and as the new pronoun. This word means __________. Does it ask a question? Please ask for assistance in going over the use of the relative pronoun.

VII. Prefixes. Give the two meanings of in as a prefix.

__________ and __________.

Unit 20

I. Dative case. Say or write the new dative endings for each declension. Write them in on your Noun Case sheet. Know them.

The new question word which asks for dative is __________. It means __________ or __________.

II. Uses. There are 2 major uses for dative case in this lesson. Dative is usually translated as TO or FOR.

A. A number of adjectives are naturally completed by the idea of "to." Proximus means __________ (and several others with the idea of kind, friendly, near, pleasing, hostile, or dear TO)

B. As an indirect object with verbs meaning give, show or tell. The Latin word for give is __________.

Ask for any assistance you may need.
Unit 21 PLURAL DATIVE

I. Write the forms of the dative singular and plural:

Declension I II III IV V

S | PL | S | PL | S | PL | S | PL | S | PL |

II. Cross out the 1 word in each line which cannot be dative case. Try not to look at the above forms.

1. beneficio, mortes, miseris, rebus
2. puellae, rationi, liberis, artis
3. navibus, patriae, similia, fini
4. casus, mulieri, sui, animo
5. animali, corporibus, facti, orationi

III. Grammar. Dative case use and translation.

1. Dative is used to indicate an indirect object or equivalent prepositional phrase. This usage usually occurs with English verbs meaning 

   You have used the dative with these Latin verbs: ____________________________

   and as indirect objects. Dative is usually best translated by the English prepositions __________________ or __________________.

   Translate: Vir feminae florem dat. __________________________________________

2. Dative is also used with special adjectives. Similis and proximus are two of them. Similis means __________________; proximus means __________________. (Other adjectives -- kind, friendly, near, pleasing, hostile, dear -- are completed with the dative case.)

   Translate: Rana similis ranae est. ____________________________________________

   Canis proximus equis est. _________________________________________________

3. Certain special verbs also are completed with the dative case. In this chapter you used:

   Latin: Simple meaning: Extended meaning:

   ________________________________________________________________

   ________________________________________________________________

   ________________________________________________________________

   ________________________________________________________________

IV. Study basic sentences, paradigms, and vocabulary. Practice paradigms of:

   finis res miser puella bonum
I. Grammar.

Genitive Case. The genitive case is used to make one noun (or depend on) another _____________. The two common translations for the genitive case are ____________ and _____________.

A. Genitive is often used to name the whole to which a part belongs. (This is known as "partitive genitive.") The Latin noun for part is _____________. "Part of the time" would be expressed in Latin as _____________.

B. Genitive also shows possession; so pictura feminae could be translated as ____________ or ___________. In this example the noun ____________ depends on the noun ____________.

II. New forms.

A. You learned a new intensive pronoun or adjective which means him/her/itself. The word is ____________, ____________, ____________.

B. The new genitive case singular form of the question pronoun is _____________. It means ____________ or ___________; therefore, the question cujus casus? translates as: _____________.

Write and translate each case of the singular paradigm:

III. Basic Sentences and Vocabulary. Study.

IV. Mirabile dictu!! Now you know ALL THERE IS TO KNOW ABOUT NOUNS. ES SAPIENTISSIMUS/SAPIENTISSIMA.
I. Infinitives are forms of used as of gender. The infinitive (in English) is the verb plus the little word . Tacere means ; timere means .

Mark the s-s-t of this sentence: Difficile est taurum morsu necare.

"Facile est" translates as . "Difficile est" translates as . "Magna res est" translates as .

Infinitives will be your clue to distinguishing the four different conjugations. The last 3 letters of a 1st conj. infinitive are ; for 2nd, ; for 3rd, ; for 4th, .

You must know the infinitive in order to form verb inflections. So--memorize!!!

II. Pronouns.
1st person is the person speaking. 2nd person is the person spoken to. 3rd person is the person or thing spoken about. Because of the verb inflections in Latin, pronouns are not necessary in most sentences. When used, they show emphasis.

1st person - ego = 
2nd person - tu = 
3rd person *+++++ + he, she, it

Write the pronoun you would use with each of these verbs:
timeo: tenes: pereo:

III. Present tense endings. (#2 tense)

Take the infinitive of video. Remove the -re. Add the letter -o to signal "ego"; add the letter -s to signal "tu"; add the letter -t to signal he, she, or it, or to agree with a noun. (E.g., The woman sees = Femina videt.)

Example:
vide = I see, I do see, I am seeing
*vide = you see, you do see, you are seeing
vide = he, she, it sees, does see, is seeing

*Note macron only in second person.

IV. Review the basic sentences #98-101.
Unit 2E

I. Calling form. (Frame 399 on) -- easy things first!

When a man's name is used to address, the spelling changes.
(Women's names take the form.) Names ending in -us change to e, and names ending in it -us and add a macron to the "."
Grammatically, this is known as "vocative case."

Practice calling: Brutus ________ Julius ________
Lucius ________ Furianus ________

II. Nouns: Cujus casus et numeri sunt:

1. poena ________ 6. beati ________
2. doloris ________ 7. Martinus ________
3. necessitatum ________ 8. sereno ________
4. animorum ________ ________
5. difficile ________ ________

III. OK! Let us courageously tackle verbs.

A. Verbs have -person (1st, 2nd, 3rd, I, you, he, we, etc.)
-number (singular or plural)
-tense (past, present, or future)

For now, we are concerned with person, number and present tense only.

</tbody>
</table>

Present tense is written with 1 form in Latin; it has 3 English translations.
Example: tenet -- he, she, it holds; is holding; does hold.

B. The conjugation of a verb begins with the infinitive (2nd principal part).

1. Find the PRESENT STEM by dropping the -RE from the infinitive.

<table>
<thead>
<tr>
<th>1st conj.</th>
<th>2nd conj.</th>
<th>3rd conj.</th>
<th>4th conj.</th>
</tr>
</thead>
<tbody>
<tr>
<td>stem a lauda/re</td>
<td>stem e tene/re</td>
<td>stem e mitte/re</td>
<td>stem i servi/re</td>
</tr>
</tbody>
</table>

2. Add -o -mus to the stem
-s -tis
-t -nt
Examples:

1st Conjugation  numera/re
*numero numeramus
numeram numerates
*numerat numerant

*Note that the a is dropped before the o, and there is no macron on the vowel before a final -c or -nt.

2nd Conjugation  debe/re
*debeo debemus
debis debetis
*debet debent

*Short e before -o, -t, and -nt.

3rd Conjugation  mitte/re
*mitto mittimus
mittis mittitis
mitit mittunt

*Caution: Weak e is dropped before -o and changes to i or u in remaining forms.

4th Conjugation  audi/re
*audio audimus
audis auditis
audit audiunt

*i is short before -o, -t, -nt.

3rd Conjugation 10 verbs  capere
*capio capimius
capis capitis
capit capiunt

* -io verbs always show -i in all forms.

C. Practice conjugating: Also translate the 1st pl. of each 3 ways.

erro, errare

peto, petere

audio, audire

Irregulars -- some verbs are not conjugated regularly;
You should note esse, to be, and posse, to be able.

sum, esse (irregular)

IV. Also study new vocabulary and learn sentences #459 to 466.

I. OBJECTIVES

- review of standard noun and verb forms
- review of principal parts of verbs
  (frames 43-47, 51-56)
- practice of verb synopses
  (frames 58-62)
- new verb form - deponent - to learn
- learn paradigm of reflexive pronoun - "himself, herself, itself"
- develop "word sense" for readings
- learn the principal parts and meanings of new verbs

II. FORMS

Deponent verbs are unusual because they are written in the ______ voice but are translated in the ______ voice.
List the 6 new verbs in this category (and learn them!).

Deponent = English Deponent = English

1. _______ _______ 4. _______ _______
2. _______ _______ 5. _______ _______
3. _______ _______ 6. _______ _______

Now practice again the synopses of frames 189-200 and 328-335. Pay special attention to tenses 4, 5 and 6 and the form of the participles.

Translate these deponents:

mirantur ________ sequitur ________
veriti erant ________ sequuntur ________
secuta est ________ mortui sunt ________
verebantur ________ moriuntur ________
loquebatur ________ locuta est ________

III. Memorize the new vocabulary and sentences and be familiar with the readings.
UNIT 2 PRACTICE AND REVIEW

I. OBJECTIVES
- to learn the structure and use of indirect statement (VS-M-RE)
- to recognize and analyze use of poetic devices - rhyme, emphasis, alliteration
- to introduce use of the ablative case to date a year

II. FORMS TO LEARN
A. Know the principal parts and meanings of these verbs:
   - cedo (26)
   - disco (91)
   - doceo (92)
   - juvo (99)
   - nito (102)
   - ardeo (105)
   - leci (348)
   - soleo (173) - Note: semi-deponent
   trans. = "is accustomed to"
B. Paradigm  iste (133)

III. Ask for a study sheet on indirect statement - if you don't have one already.

IV. Learn remaining vocabulary, new sentences and readings.
UNIT 3 REVIEW

I. OBJECTIVES
- to learn the new verb, solet (is accustomed to)
- to learn the forms of passive infinitives and those of deponent verbs
- to distinguish between nouns and verbs ending in i
- to learn 8 basic sentences and 2 readings

II. DRILL

Form the passive infinitive of each verb. Translate.
(Remember: long vowel infinitives go to -ari, -eri, -iri, and short -ere
changes to just i.)

</tbody>
</table>

Translate these deponent infinitives:

mentiri = sequi =
loqui = vereri =
mirari = nasci =

Know the principal parts of: (meaning, too!)

aud-o, ere, ausus sum
cado, cadere, cedidi, --
moneo, monere, monui, monitus
patitur
puto, putare, patavi, putatus
queritur

From what vocabulary words do these derivatives come?

funeral
admonition
appropriate
patiently
dispute
cadence
querulous
culpable
UNIT 4 REVIEW

I. OBJECTIVES:
- to learn about the subjunctive mood—its forms and reasons for use:
  - forming the 8 present subjunctive using the signal -a- in 2nd, 3rd,
    and 4th conjugation and signal -e- in 1st conjugation.
  - using this form in an independent clause to show a wish,
    possibility, or an obligation—"I wish that," "I should," or "I
    may," or "Let me,"
- to review vocative case, singular and plural.
- to learn the irregular present indicative (8) and present subjunctive
  (8) forms of fio.
- to study the derivatives of cedo and its compounds.

  ruo, ruere, rui -

II. Practice. Write the present subjunctive of:
   cedo, cedere
   rapio, rapere
   praeparo, -are

Form the vocative singular and plural of each:
   amicus
   servus

III. Translate these sentences; note carefully whether subjunctive mood is
  used.
1. Ignem igni ne addas.
2. Gaudeamus igitur.
3. Requiescat in pace.

IV. Note these derivatives. Which new vocabulary word does each derive
  from? What does each mean?
   acceptable
   equanimitiy
   equator
   equation
   alias
   culpable
   interdependent
   desideratum

   elation
   fiat
   pacification
   rapture

UNIT 9 REVIEW

I. OBJECTIVES

- to know the meanings of the terms positive, comparative and superlative
- to form and translate adjectives of the comparative and superlative degrees
- to use quam or the ablative case to compare 2 things
- to learn comparative and superlative forms of ADVERBS
- to find suggestions on how to "attack" a Latin reading
- to learn to form and translate the construction called ablative absolute
- to learn the forms and meanings of IRREGULAR ADJECTIVES - nullus, alius, alter, neuter, solus, totus, unus, uter
- to learn the principal parts of the verbs in fram 476. DO IT!
- to know seven basic sentences and seven readings (I will indicate the most important ones, if you wish.)

II. FORMS

A. COMPARATIVES
Latin adjectives of comparative degree end in _________ (m. or f.) or _________ (n.). English meanings are _________ or _________. They are fully declined in _________ (what number) declension. Following a comparative, the word quam means _________.

Write the comparative in all cases for:
M-F gratus, -a, -um N M-F levis, leve N

B. Superlatives.
To form superlative the ending _________ is added to the base of an adjective. Superlatives are translated to English as _________ or _________ or _________. Write the superlative for

clarus = _________ English = _________ or _________
gravis = _________ English = _________ or _________
C. ADVERBS. The comparative adverb has the same form as _______ in _______ gender.
The superlative adverb uses the signal letter _______ to replace the -us, -a, -um case endings of the superlative adjective.

Form and translate these degrees of the adverbs:

from novus = _______ comp. _______ superl. _______ English
from fortis = _______ comp. _______ superl. _______ English

D. IRREGULAR ADJECTIVES. These 8 adjectives (list them) _______, _______, _______, _______, _______, _______, _______, _______ are irregular in the _______ and _______ cases of the singular declension. The genitive form is _______ and the dative is _______.

Practice with the singular form of nullus. (Plurals are regular.)

M. _______ F. _______ N. _______

III. ABLATIVE ABSOLUTE. GRAMMAR. Ask for a special guide on this construction. Ablative absolute is most often formed from 2 parts: a _______ and a _______ both in the _______ case (naturally!). This construction may be translated literally, or by using WITH, or even better, by transforming it to an English adverbial clause starting with subordinating conjunctions such as _______, _______, _______, or _______ according to the sense of the sentence or paragraph.

IV. Try these translations—_____

1. Melior est canis vivus leone mortuo.
2. Parens iratus est cruelissimus.
3. Graviora sunt remedia periculis.
4. Bruto consule . . . .
5. Marco interrogato, . . . .
6. Canibus yisis, . . . .
7. Libellis scriptis, . . . .
UNIT 10 REVIEW

UNIT 16 REVIEW

I. OBJECTIVES

- to use subjunctive #9 (past perfect) in contrary to fact conditional sentences
- to review ablative absolute as used in dating events
- use of "double dative" (with the words derisus, auxilium, & praesidium) (ask for explanation, if needed)
- use of the adjectives patiens, peritus & expers with genitive case
- use of negative commands (noli + infinitive)
- use of the deponent verb frui with ablative case
- use of the new verb parcere with dative case
- to review verbs patternning with dative or ablative case (frames 132-33)
- to read 6 new Basic Sentences & 6 new readings
- to learn the new vocabulary

II. Practice of forms and syntax (grammar).

A. Review the past perfect subjunctive by writing the #9 forms, active and passive of evoco, evocare:

<table>
<thead>
<tr>
<th>Active</th>
<th>Passive</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

B. Noli (plural: nolite) meaning don't (do not wish) patterns with an infinitive to give a negative command (imperative mood). Give the same order, singular and plural form:

Don't run!

Don't hurt the rabbit!

Don't come.

Note that vocative case often occurs with the imperative.

C. Double dative. Try these common expressions:

The army was the defense for the city.
Caesar sent the leaders to aid the ships.

D. Ablative absolute may be used to date events. (Remember, this construction has a noun & participle, 2 nouns, or noun & adjective in the ablative case.)

Ex: Cicerone consule = "Cicero (being) the consul" or "when Cicero was consul." Write these:

When Caesar was consul =

With Julius as a companion =
E. Each of these verbs patterns with either dative or ablative case. Arrange them after the correct case.

frui, parcare, placere, nocere, uti, nubere, servire, imperare

- with dative:

- with ablative:

F. Contrary to fact conditional sentences use the subjunctive mood to show that both the condition (if) and the conclusion are untrue. Imperfect (#7) subjunctive shows present time & past perfect (#9) shows past time. Translate these 2 examples:

Si Caesar hic esset, in periclo esset.________________________

Si Caesar hic fuisset, in periclo fuisset.________________________

G. Study frames 39-48 and the 3 adjectives peritus, expers & patiens- which pattern with the __________ case.

III. REMINDERS

A. Study all vocabulary for the unit.
B. Go over the summary, review of forms and pretest.
C. Review Sentences and Readings of both Units 11 and 16.

IV. Derivatives. What does each word mean and to what new vocabulary word does it relate?

affliction
impetuous
saline
derivative
contend
refrigeration
prequisite
suppliant
exit
pressure

grace
expurgate
venial
sepulcher
statute

horrendous
rodent
verbose
opera

UNIT 17 PRACTICE AND REVIEW

I. OBJECTIVES
- to introduce Caesar's De Bello Gallico
- to read chapter I of Caesar
- to learn devices for connecting sentences in Latin prose
- to learn formation of the gerundive-future passive participle
- to use gerundive to show a) necessity, b) purpose
- to review 4 ways of showing necessity
- to review all 4 participles of the verb
- to study 5 Basic Sentences using the gerundive

II. FORMS AND PRACTICE

A. The gerundive (future passive participle) is formed using the _______ stem of a verb plus the signal _______ plus the adjective endings of the _______ & _______ declensions.

Form and translate the gerundives of:
- appellare: _______ = _______
- continere: _______ = _______
- describere: _______ = _______
*despicere: _______ = _______
*(an io verb uses ie as a base).

B. Using the gerundive

1. The gerundive used as a predicate adjective with a form of sum shows necessity. The ending (case, no. & gender) of the gerundive agrees with the subject of the sentence.

Write:
- Carthage must be destroyed: _______
- The war must be prohibited: _______
- The times must be changed: _______
- The Gauls have to be conquered: _______

2. The gerundive may be used in a phrase beginning with ad (for the purpose of). It will modify whatever noun or pronoun is the object of ad in the accusative case.

ad latrones capiendos
ad muscas capiendas
ad flumen videndum
ad Galliam vincendam
to see the horses
to sit on a branch
to eat the cheese

3. Four ways of showing necessity-(see frame 9)-list and explain each:
   1. ________________________________
   2. ________________________________
   3. ________________________________
   4. ________________________________

4. Review the 4 participles of the verb. (Frames 17-21) Write and translate the participles of specto.
