Finding Information about Standardized Tests. ERIC Digest No. 2.

THIS DIGEST WAS CREATED BY ERIC, THE EDUCATIONAL RESOURCES
INFORMATION CENTER. FOR MORE INFORMATION ABOUT ERIC, CONTACT
ACCESS ERIC 1-800-LET-ERIC

Finding the right standardized achievement or aptitude test can be quite difficult. You
need to identify a variety of potentially useful tests, collect and review technical
materials, and identify and evaluate the practical considerations of using these tests.
This section is designed to help you with the first step--identifying useful standardized tests. In it, we describe

The printed sources are available in most academic libraries. They only contain brief information about individual tests; they do not contain copies of the tests themselves. You'll probably want to contact test publishers for more detailed information.

BOOKS THAT DESCRIBE AVAILABLE TESTS

The following books have basic, non-evaluative information about a wide range of available tests. All include statements about intended audience, publication date, scoring, author, publisher.

Tests in Print describes more than 2,400 published tests. It also contains more than 16,000 references about specific tests, a cumulative name index for each test that covers all references in TIP III, a directory of test publishers with all the tests of each publisher listed, a title index that covers all tests in print and all out-of-print tests once listed in Mental Measurements Yearbooks (MMY), a name index to authors of more than 70,000 documents (tests, reviews, excerpts, and references) in the nine MMYs and TIP III, a scanning index for quickly finding tests that are designed for particular populations, and serves as an index to the MMY series in general.

This book concisely describes more than 3,100 published tests in a "quick-scanning, easy-to-read" format. It gives a brief description and information about the population targeted by the test, the purpose, and administrative and publication information.

The Educational Testing Service Test Collection Catalog, Volume I: Achievement Tests

This catalog gives information about more than 2,000 achievement tests in the ETS Test Collection. It indexes tests by author, title, and subject category.

This book describes 450 computer-based products used in psychology, education, and business. Most products go beyond simple test scoring and involve administration and report generation. The book has five indices: Test Title, Product Category, Product Application, Service, and Supplier.

While somewhat dated, this reference gives you leads to Italian, Navajo, Portuguese, Spanish, and Tagalog. The instruments listed in this guide were designed for use with students in K-6 and were normed with students in the U.S. Descriptive, technical, cultural, and linguistic information is given for about 400 tests.

TEST REVIEWS

Several major books give in-depth, candid reviews of available tests. The best-known books are:

The Yearbooks, published periodically since 1932, are a comprehensive source of factual and evaluative information about commercially available tests. The Tenth Mental Measurement Yearbook, contains information about 396 tests and includes 569 reviews by 303 different authors. In addition to descriptive information and test reviews, this book has bibliographic references to studies and articles about specific instruments, and a current directory of test publishers.

Test Critiques emphasizes the practical aspects of test administration. Each review in this series has an introduction, practical applications, technical aspects, and an overall critique of the test.

ONLINE INFORMATION RETRIEVAL SYSTEMS

Identifying and searching test information can be done quickly and efficiently through the online database system managed by Bibliographic Retrieval Services (BRS), 1200 Route 7, Lantham, New York, 12110, (800) 468-0908. BRS provides sophisticated search routines and access to databases that contain test information. You or your librarian can search by test title, parts of a title, subject, purpose, availability, grade level, or any combination of these and other descriptors. The following testing databases are available:

The Educational Testing Service File (ETSF)--This is an online index to the tests contained in the Educational Testing Service (ETS) Test Collection. Developed to support the work of ETS test development staff, the ETS Test Collection has more than 14,000 commercial and unpublished tests. More than 8,000 tests that are currently available are in the ETSF.

Mental Measurements Yearbook Database (MMYD)--This is an online index to 1,400 tests and reviews covered in the Mental Measurement Yearbooks. Although considerably smaller than the ETSF database, the MMYD has more detailed information about each test and more information that can be searched.

OTHER SOURCES FOR TESTING INFORMATION

Other sources for testing information are described in:

This is a guide to more than 150 books, journals, indexes, and computer-based services and organizations that provide information about student assessment. It also includes a subject index.

Developed as a guide to the extensive measurement resources available to patrons of the Humbolt State University Library (Arcata, CA), this report identifies a wide range of books, reports, and journals about tests. It includes an extensive listing of references.
within specific disciplines, such as special education, counseling, and early childhood.

This publication was prepared with funding from the Office of Educational Research and Improvement (OERI), U.S. Department of Education, under contract RI-88-062003. The opinions expressed in this report do not necessarily reflect the position or policy of OERI or the Department of Education. Permission is granted to copy and distribute this ERIC/TM digest.
