Nursing Graduate Follow-Up, Catonsville Community College.

College Graduates; Community Colleges; Employer Attitudes; Employment Patterns; Nurses; Nursing Education; Outcomes of Education; Participant Satisfaction; Program Evaluation; Questionnaires; Salaries; Two Year Colleges; Vocational Followup

In 1989, a study was conducted at Catonsville Community College (CCC) to determine the post-graduation experiences and attitudes of the students who had graduated from the nursing program between June 1987 and December 1988. Of the 113 graduates surveyed, 24 responded to the questionnaire. In addition, 10 employers returned questionnaires concerning the preparation of the CCC graduates. Study findings included the following: (1) 88% of the respondents indicated that they had worked full-time as a nurse since completing the CCC program; (2) 79% had worked as registered nurses for more than six months; (3) 63% were employed as staff nurses, and 21% were employed as charge nurses on evening or night shifts; (4) 90% listed their salaries as over $22,000; (5) all of the respondents had received an orientation at their first job, and the majority found it helpful; (6) experiences at CCC were rated by the majority of the respondents as either "superior" or "above average," and faculty were perceived as helpful and concerned about students; (7) only 42% of the respondents indicated that they would definitely still choose nursing as a career, though only two people said they probably would not; and (8) none of the respondents had completed a bachelor's program, but almost one-third were currently enrolled in or planned to enter such a program. The survey instruments are included. (ALB)
NURSING GRADUATE FOLLOW-UP

CATONSVILLE COMMUNITY COLLEGE

1989
NURSING GRADUATE FOLLOW-UP

In the spring of 1989 the nursing graduates of four different classes were surveyed to determine experiences since graduation and opinions in retrospect about their experiences in the nursing program at Catonsville Community College. There were 36 graduates of June, 1987; 32 in December, 1987; 30 in May, 1988; and 15 in December, 1988. All were mailed surveys. Of the 113 surveys mailed, six were returned as non-deliverable; and twenty-four were returned with responses, giving a 22% return rate.

Along with a questionnaire for the nursing graduate was a questionnaire to be given to employers. The employers returned ten of these.

RESULTS

The vast majority of the respondents have worked or do work full-time for more than six months as registered nurses. Most are staff nurses with the next largest group charge nurses on evening or night shifts.

The survey did not discriminate well on salary with almost 90% of the respondents listing their salaries in the open-ended top category of over $22,000. All had received an orientation in their first job, and most found it helpful.

All of the questions asking the graduates to rate facets of their experiences at Catonsville drew the majority of responses in the "superior" or "above average" categories. Faculty were perceived by all as available for help, and most viewed their teachers as concerned about students.

Interestingly, less than half said that they would still definitely choose nursing as a career; but only two people said that they would probably not. Three-fourths would still go into an AA program, and most would recommend CCC.

None have completed a BSN program, but almost one-third are either currently enrolled or planning to enter such a program. Graduation from CCC is probably too recent for these graduates to have completed such a program.

There were so few employers responding that the only generalization that can be made is that the areas of clinical competence were all rated at the average to superior levels.

The results of both questionnaires are attached.

Catonsville Community College
Office of Institutional Research
April, 1989

Dear Nursing Graduate:

As part of the continuing evaluation of the Nursing Program, the nursing faculty surveys graduates and their employers periodically. In addition the Nursing Curriculum Committee meets with graduates to discuss the educational program as preparation for employment. We would appreciate your assistance with this evaluation project.

Please complete the enclosed surveys according to the directions. The meeting with graduates is scheduled on Thursday, May 17, 1989 at 7 p.m. in the K Building, Faculty Dining Room. If you can attend please call the Nursing office (455-4570) by May 15. Thanks so much for your help. We are looking forward to seeing you again.

Sincerely yours,

Patricia A. Lavenstein
Chairperson
Department of Nursing and Health Studies

NAME AND ADDRESS OF AGENCY  
WHERE YOU ARE CURRENTLY EMPLOYED:

n = 24

Agency

Agency Address

CAPACITY OR POSITION:

Please write on the line the number of the response you choose which most clearly corresponds to your situation or most accurately answers the question asked.

_____ 1. Since completing the nursing program at Catonsville Community College, I have:

4% 1. Never worked in the capacity of a nurse
88% 2. Worked full-time as a nurse
8% 3. Worked part-time as a nurse
21% 4. Interspersed full-time and part-time employment in nursing

_____ 2. Currently my occupational status is:

88% 1. Nursing, full-time
4% 2. Nursing, part-time (my choice)
8% 3. Nursing, part-time (agency requirement)
8% 4. Not employed at this time (my choice)
8% 5. Not employed at this time (seeking nursing position)
79% 6. Employed in non-nursing position

_____ 3. I have worked as a Registered Nurse a total of:

21% 1. Less than six months
79% 2. More than six months

_____ 4. If you are employed in nursing, which of these categories most closely describes your position?

63% 1. Staff nurse
4% 2. Permanent team leader
21% 3. Charge nurse, evenings or nights
8% 4. Head nurse
4% 5. Other; please specify

-1-
5. If you are currently working in nursing, your current salary based on full-time employment is:

4%
1. Below $18,000 per year
2. Between $18,000 - $19,000 per year
3. Between $19,000 - $20,000 per year
4. Between $20,000 - $21,000 per year
5. Between $21,000 - $22,000 per year
88%
6. Over $22,000 per year

6. If you are currently not working in nursing, the reason for this decision relates to:

50%
1. Family responsibilities
2. Stress inherent in nursing
3. Dissatisfaction with nursing as an occupation
50%
4. Other: __________________________

7. Did the first agency in which you were employed as a nurse provide an orientation program?

100%
1. Yes
2. No

8. If your answer to #7 was 'yes', the orientation was designed for:

29%
1. All personnel new to the agency, professional, non-professional, and clerical
71%
2. All registered nurses beginning employment in the agency
3. Associate degree graduates only

9. If your answer to #7 was 'yes', did this program meet your needs as a beginning staff nurse?

29%
1. It was very helpful.
67%
2. It was helpful.
4%
3. It was of little benefit to me.

10. During your initial work experiences in nursing (first three months of employment), was adequate supervision available to you?

46% 50% 4%

11. Supervision was provided by:

21%
1. Head nurse
13%
2. Supervisor
21%
3. In-service education staff
46%
4. Other: __________________________

Please specify.
12. To what degree do you feel that the nursing program at Catonsville Community College provided you with the knowledge necessary to provide care to patients with commonly occurring health problems?

25%  1. To a superior degree
42%  2. To an above average degree
33%  3. To an average degree
4. To a below average degree
5. To a very poor degree

13. To what degree do you feel that during your Catonsville Community College program you had the opportunity to develop the basic skills necessary to become an effective practitioner of nursing?

21%  1. To a superior degree
38%  2. To an above average degree
38%  3. To an average degree
4. To a below average degree
5. To a very poor degree

14. In reflecting on the organization and presentation of nursing content courses at Catonsville Community College, as compared to other courses taken, I would classify nursing content courses as:

17%  1. Superior
54%  2. Above average
29%  3. Average
4. Below average
5. Very poor

15. Faculty in the nursing curriculum generally impressed me as being:

88%  1. Concerned about students and their problems and available to provide help
12%  2. Unconcerned about students and their problems but available to provide help
3. Concerned about students but not available to provide help
4. Unconcerned about students and not available to provide help

16. Would you still choose nursing as a career?

42%  1. Definitely yes
50%  2. Probably yes
8%   3. Probably no
4. Definitely no
If your answer is #3 or #4, please explain: ____________________________

23. Are there comments you would like to make that were not covered in this questionnaire?
SURVEY OF NURSING GRADUATES - COMMENTS

Q. 4 If you are employed in nursing, which of these categories most closely describes your position?
Occasionally evening charge nurse.
Acting chg nurse.

Q. 6 If you are currently not working in nursing, the reason for this decision relates to:
Other:
Pregnancy.

Q. 11 Supervision was provided by:
Other:
Head nurse, Supervisor, In-service education staff.
Preceptor.
Preceptor.
Fellow staff nurse who I worked with during orientation - kind of like a buddy system.
Charge Nurse.
Head nurse, RN3, RN2
Preceptor; clinical nurse III
Staff preceptor.
Staff Nurse
Preceptor Program

Q. 15 Faculty in the nursing curriculum generally impressed me as being:
Some faculty did not appear concerned.
Some Psych teachers unconcerned about students and not available to provide help.

Q. 16 Would you still choose nursing as a career?
Probably no, high pressure for money.
I would rather not work in a hospital.
Q. 18 Would you recommend the nursing program at Catonsville Community College? If you answer #3 or #4, please explain:

Only because for extra money and about 1 year more you can receive your Baccalureate degree you may as well go on.

But would advise against having certain techers.

Definitely yes with description and level of difficulty.

Q. 19 Have you continued your education in college since graduating from Catonsville Community College? List where.....

UMBC

Q. 20 Are there areas in the program that you feel should have been included in the program or should have receive greater emphasis?

Assessment is most crucial tool the nurse uses, this should continue to be strongly emphasized.

Another course in med-surg instead of just three.

Less emphasis should be on care plans and more towards actual learning of concepts.

Greater emphasis on nursing skills and less time on busy work in care study.

Some consideration may be given to the geriatrics population since this age group demands a lot of hospital beds. Also, a class on burnout. With the Nsg shortage a lot more responsibility is placed on the nurse for quality pt care.

IV therapy should be a part of RN training. If we can give IM injections, we should be able to learn to start IV's after proper instruction.

CUP lines, IV's, Maternity and Fetal Monitoring.

More clinical application on skills and practice in mock tests.

Yes, I feel that psychiatric nursing clinical should have been longer and took place clinically in a private as well as state hospital.

AIDS education.

Nutritional aspects of nursing.

Pharmacology, Nutrition.

Many times I was too intimidated to practice in fear my instructor would embarrass me or comment I was incompetent. Hands on training should be increased without an increase in tension between student and instructor.
More on emergency care. Less lecture and more lab time in advanced courses.

Yes, the independence a nurse must have in order to be efficient and organized the students do not get the opportunity for decision making, until the last semester.

Bedside nursing, need to have situational exams. Talk to UM+1 they have 100% pass boards.

Death and Dying course should have been broader.

Q. 21 The College has an active continuing education program in nursing. What topics would you like to see included in the coming year's offerings?

How the role of nurse is changing. Any information in legal aspects of nursing, this seems to be a worry among all nurses.

More on gerontology and med-surg topics.

Assessment skills in chest.

Drug Therapy. Vascular problems, Geriatric emergencies.

Some courses related to psych nursing.

Nursing shortage and what can be done to improve the shortage and help keep RN's that are not currently working interested in working and find out reason for the shortage.

Cardiac nursing (CCU)

Basic EKG interpretation.

Too broad a question, my specialty is Post-partum and post-op. Maybe something along those lines.

Emergency care, Dysrhythmia course, chemotherapy.

I receive the CE prog. at work.

How to better organize when doing charge duties.

Review of medications and new ones on the market. Any new illness - signs and symptoms.
Q. 23 Are there comments you would like to make that were not covered in this questionnaire?

The transition from student to graduate was much more difficult that I had anticipated.

I felt more time should have been spent at the hospitals rather than in the classroom, hands-on time and skills review provide a better tool for learning than lecture and tapes.

With the nursing shortage your teachers should make an effort to encourage nursing as a profession. Some teachers allow their personal likes and dislikes of students override their scholastic ability.

I feel the nursing program was very good. The majority of instructors were great but the Psych instructors were not helpful and treated us like children. I felt that the nursing care plans were too lengthy and that there should of been a greater amount of points for them.

I feel cheated by the training and help received in the Mental Health Program. I feel it was a waste of time and it was very pressured; not learning experience.

COMMENTS:
I have been a preceptor for five years and CCC students are consistently better organized, more able to prioritize and more conscientious than any other two or four year program with the exception of only two graduates. (May be slightly biased as I am a proud CCC graduate.)
