This guide is divided into 11 sections, each containing a number of questions and suggestions for conducting successful folklore and oral history interviews. Section 1, "Settlement and Dwellings," deals with the physical environment, local inhabitants, houses and outbuildings, and public buildings. Section 2, "Livelihood and Household Support," contains questions about local industry, crops, and women's work. Section 3, "Communications and Trade," addresses travel by land, air, and water; spreading news and information; and business and commerce. Section 4, "The Community," deals with people, work, clothes, social intercourse, family relationships, religion, education, fire fighting, and legal administration. Section 5, "Human Life," looks at birth, marriage, death, and the return of the dead. Section 6, "Nature," explores beliefs about the sky, the atmosphere, plants, birds, mammals, fish, insects, and snakes. Section 7, "Medicine," addresses doctors, dentists, non-professional medical help, home remedies and treatment, and veterinary medicine. Section 8, "Time," examines the seasons and holidays. Section 9, "Entertainment: Sports and Pastimes," deals with games, music, dancing, storytelling, reading, phonographs, radio, and television. Section 10, "Personal Comments," allows interviewees to add their own opinions or speculations. Section 11, "Historical Tradition," questions what interviewees consider to be historically significant in their local area. This guide has a clear orientation toward interviewing older people in a rural setting about how things used to be. Questions can be adapted to suit other needs. (GEA)
A General Interview Guide

by Edward D. Ives
This project is sponsored by the University of Maine and the Northeast Archives of Folklore and Oral History and funded by the Maine Humanities Council and Champion International Corporation.
A GENERAL INTERVIEW GUIDE

What follows is in no sense exhaustive or complete. I started from O'Sullivan's *Handbook of Irish Folklore* (that's where the basic structure comes from), and then I adapted it to the scene here in the Northeast by adding some questions and changing others. For any one of the aspects covered here, you can get more suggestions by looking at O'Sullivan's work.

I don't recommend trying to work straight through this guide with an informant. Nor do I particularly recommend interviewing with "guide in hand", and I'm dead against it for the first interview. Read the Guide through a few times before you go out. Then, when you go back for further interviews, you can use this guide to help you work up good questions. And don't forget to probe, to follow up, to get fuller explanations ("Did that ever happen to you?"
"Can you give me an example?"
And, of course, "Who, what, where, when, why?").

You will notice that this Guide has a clear orientation toward interviewing "older" people in a rural setting about how things used to be. That orientation is a function of my own lifelong historical interests. If you are more interested in present than remembered culture, you can adapt the questions to suit yourself.

The compiling of a Guide like this is an on-going thing. Some of the questions will turn out to be absurd or even (God save the mark) counterproductive. And there are good questions that should be asked that aren't in here. The whole thing is also very uneven. Some aspects of experience are covered rather thoroughly while others are barely suggested. Let us know how we can improve this guide. Meantime, here is something for those many people who have asked, "What do I say then?"
