To better coordinate the work of the 16 ERIC Clearinghouses with that of other information service providers, the Office of Educational Research and Improvement (OERI) conducted a survey that defined and described the clients and services of 100 public and private education-related clearinghouses. For the purposes of this survey, a clearinghouse is defined as a place: (1) where organized databases are maintained and continuously updated; (2) which maintains an extensive set of resources in a specific education-relevant area; (3) where information from the databases is available to the general public; (4) where staff actively share information with their constituents (e.g., through newsletters); and (5) which describes itself as a clearinghouse, resource center, information center, or information service. This directory provides basic information about each of the clearinghouses surveyed. Each entry contains the following information: clearinghouse name; address; contact person; telephone number; federal funding information; legislative authority; involvement with larger projects; projects within the clearinghouse; government monitor name and telephone number; content focus; key users; types of information provided; coordination with other clearinghouses; database names; type of accessibility; number of items in database; responsive user services; total annual requests; dissemination activities; number on mailing list; technical assistance; and compatibility with ERIC (Educational Resources Information Center). Both an alphabetical list of clearinghouses (table of contents) and a subject index are provided. (SD)
DIRECTORY OF EDUCATION-RELATED CLEARINGHOUSES

June 1989

In early 1990 ACCESS ERIC will replace this directory, which is based on a survey of 100 education-related clearinghouses, with an expanded "user-friendly" directory. The new directory will be available in both paper and computer versions from ACCESS ERIC, 1600 Research Boulevard, Rockville, Maryland 20850.
Directory of Education-Related Clearinghouses

The Educational Resources Information Center (ERIC), administered by the U.S. Department of Education’s Office of Educational Research and Improvement (OERI), collects, indexes and disseminates educational materials. While ERIC’s 16 Clearinghouses attempt to cover all of education, many other public and private organizations also provide similar services.

To better coordinate the work of ERIC with that of other information service providers, we recently conducted a survey which identified and described the clients and services of 100 education-related clearinghouses. For more information about survey results and methodology, see "How Can the Federal Government Help Education-Related Clearinghouses Provide More Cost-Effective Services?" (Klein, 1989).

This directory provides basic descriptive information about each of the 100 clearinghouses in our survey. For this directory, education-related clearinghouses are defined as follows:

- A place where organized databases are maintained and continuously updated.
- A place which maintains an extensive set of resources in a specific education-relevant area.
- A place where information from the database(s) is available to the general public, possibly with minimal database search or document cost-recovery charges.
- A place where staff actively share information with their constituents, e.g., through newsletters, fact sheets, bibliographies, research syntheses, or directories.
- A place which describes itself as a clearinghouse, resource center, information center or information service.

Excluded from this clearinghouse definition are:

- Associations which do not clearly indicate that they operate a comprehensive public information service, clearinghouse, or databank.
- Information centers which limit their databases to materials produced by specific organizations.
- Specialized information services which deal mostly with non-education information.
Large national libraries or distribution services such as the Library of Congress, the National Library of Medicine, or the National Technical Information Service.

The Clearinghouse directory forms are arranged according to their record number as shown in the "Table of Contents." This is followed by a "List of Education-Related Clearinghouses in Alphabetical Order." For additional convenience in locating clearinghouses according to their content foci, a "Content Index" organized by "Special Populations," "Types of Education," and "Education-Related Areas" precedes the actual directory forms.

We realize that this directory could be improved with additional editing, but hope that you find it useful. Since it is in the public domain feel free to use the material as you wish.

A new ERIC system contractor, ACCESS ERIC, will be developing a "user-friendly" computer-based file and a printed director/ of education-related information centers and clearinghouses. These should be available to the public by the end of 1989. Since ACCESS ERIC plans to include more than the 100 clearinghouses in the file, the coordinator of this ACCESS ERIC activity would appreciate your suggestions on additional clearinghouses. Please contact ACCESS ERIC at 1600 Research Boulevard, Rockville, MD 20850, telephone 301-251-5786 or 1-800 USE-ERIC.

Information Services staff Joyce Benton, Alberta Jett, Nancy Krekelor, and Joyce Lowery helped transform and update this database. Robert Stonehill suggested this interesting assignment and supported the work. Other staff from ERIC, and the clearinghouses in the survey, reviewed the accuracy of the information and provided insights and advice on the entire project.

This was originally started as a referral service on jobs and housing for convicted felons. More recently it was expanded to literacy. Most of the information in this survey is for their literacy rather than criminal justice activities, but in addition to small DOL support, they receive support for their hot line from the Bicentennial Commission through the DOJ. Their total budget is $1.5 million and they received 7.15% federal funding in 1988 which will be increasing to 18% in 1989.

NOTES:
They would be willing to help ERIC acquire some docments if it didn't take too much staff time. This would really help with their long documents which they lend. They used to have the microfiche, but gave it away and have not done much recent searching of the ERIC database although they used to do it daily. They need to hook up to online legislation search systems, such as the system SEARS uses. They requested information on ERIC today and may be interested in exploring advantages of becoming an adjunct clearinghouse.

Has a Human Resource Bank, a directory of family specialists willing to be contacted by the general public. It also has work in progress file, an organizational file and a major section of the bibliographic database concerned with legislation and family policies. It does not pull information from other databases, most of which are copyrighted, but instead creates its own family oriented abstracts of journal articles and provides content type info. on books.
