Based on the premise that literacy research and instruction is becoming more focused on connections between reading and writing, this FAST Bib contains selected references from 1985 to 1989. The 31-item annotated bibliography is organized into four sections: (1) overview; (2) research; (3) integrating language arts; and (4) classroom applications. (NKA).
Literacy research and instruction is becoming more focused on connections between reading and writing. This FAST Bib, based on entries to the ERIC database, contains selected references from 1985 to 1989. The bibliography is organized into four sections: (1) Overview, (2) Research, (3) Integrating Language Arts, and (4) Classroom Applications. The entries in these sections should help teachers understand the relationships between reading and writing and identify ideas for implementation into classrooms.

Two types of citations are included in this bibliography—citations to ERIC documents and citations to journal articles. The distinction between the two is important only if you are interested in obtaining the full text of any of these items. To obtain the full text of ERIC documents, you will need the ED number given in square brackets following the citation. For approximately 98% of the ERIC documents, the full text can be found in the ERIC microfiche collection. This collection is available in over 800 libraries across the country. Alternatively, you may prefer to order your own copy of the document from the ERIC Document Reproduction Service (EDRS). You can contact EDRS by writing to 3900 Wheeler Avenue, Alexandria, Virginia 22304, or by telephoning them at (800) 227-3742 or (703) 823-0500.

Full text copies of journal articles are not available in the ERIC microfiche collection or through EDRS. Articles can be acquired most economically from library collections or through interlibrary loan. Articles from some journals are also available through University Microfilms International at (800) 732-0616 or through the Original Article Tearsheet Service of the Institute for Scientific Information at (800) 523-1850.

Overview
Braun, Carl. “Facilitating Connecting Links between Reading and Writing.” 1986. 27p. [ED 278 941]

Emphasizes the learning process and involves demonstrations of learning by the teacher. Suggests that the following classroom strategies can be employed to help students make reading/writing connections: (1) teacher-student conferences, which allow teachers to gain insight into their students’ interests and needs while sharing insights about the learning process and stimulating further engagement, (2) group talk, such as a listening response or a discussion of a text; (3) group cloze procedures that emphasize semantic mapping, which represents visually the link between spoken and written texts.

Supports the argument that reading and writing ought to be taught together, and seeks to persuade the reluctant teacher by giving reasons for interweaving composition and literature seamlessly.

Corcoran, Hill; Evans, Emrys, eds. Readers, Texts, Teachers. 1987. 264p. [ED 279 012]

For uses on the need to offer and encourage the experience of reading literature in elementary schools. Explicates the range of theory known as...
reader-response criticism. Argues its distinctive relevance to the needs of young, developing readers. Indicates how classroom practices might be changed to accommodate the insights offered by reader-response theories.

Stresses Piaget's postulate that cognitive development is linear—that children progress through stages of development whereby tasks are mastered at certain levels of cognitive understanding. Examines the stages of children's writing processes (prewriting, composing, revising), as well as language development, drawing, and reading.

Shows what can happen when teachers and parents realize that every child can write. Tells the story of children who have discovered the joys of writing and of the parents and teachers who have helped them make that discovery.

Focuses on encouraging students to take responsibility for their own learning and giving them a sense of control over their efforts. Explores how the response approach to writing instruction can be put to good use in teaching children to read.

Presents a hypothetical situation of an elementary school principal's concern for students' writing during reading time, and offers a possible teacher's response with information about the direct tie between writing and reading improvement.

Stresses the notion that children become literate by trying to read and write in a supportive atmosphere with interesting books, rather than being instructed in isolated language skills. Offers ideas for using children's literature and related activities as an alternative to basal readers to make learning language skills enjoyable for children.

Proposes seven instructional principles based upon research on the reading-writing relationship, and suggests specific techniques for each principle.

Notes that both comprehension and decoding are used by effective readers and that both processes should be taught. Focuses on effective strategies for reading instruction. Includes a list of recommended comprehension instruction activities, such as correlating reading and writing, discussing key concepts and vocabulary, using semantic mapping, and providing students with objectives. Emphasizes the use of strategies for teaching word identification and comprehension to foster increased reading ability and a love of reading.

Sternglass, Marilyn S "Instructional Implications of Three Conceptual Models of Reading/Writing Relationships," *English Quarterly,* v20 n3 p184-93 Fall 1987.

Notes that varying the conceptual models of the relationship between reading and writing processes as parallel, interactive, or transactional has influenced instructional practices.

Research

Jagger, Angela M.; and others. "Research Currents: The Influence of Reading on Children's Narrative Writing (and Vice Versa)," *Language Arts,* v63 n3 p292-300 Mar 1986.

Illustrates how all of the language arts are used by teachers and students to uncover the imaginative potential of language and their creative potential. Models ways of thinking about and investigating how instructional experiences affect learning.

Studies the knowledge required and the thinking involved in both reading and writing. Presents theories that both reading and writing are mean-
ingful composing processes, and that experience in one process has an impact on the other. Suggests that there are some benefits from teaching reading and writing together, provided instruction is given in both with the intent of building on their similarities.

Suggests a theoretical framework and a task-specific procedure for integrating reading and writing. Supports the notion of using writing as an orienting task prior to reading.

Pickens, Alex L. “Literacy Instruction,” Educational Perspectives, v24 n1 p26 1986. [ED 285 156]

Presents five articles focusing on the creation of a literate society where people appreciate literature and can use reading to enrich their lives.

Whyte, Sarah S. “The Connection of Writing to Reading and Its Effect on Reading Comprehension.” 1985. 28p. [ED 278 940]

Cites specific writing activities that enhance reading comprehension. States that reading and writing mutually affect learning; educators should teach reading and writing together within a contextual framework.

Integrating the Language Arts

Proposes integrated language arts as tools for learning in all content areas. Notes that the core of this new curriculum is to help students make sense out of a piece of literature by moving into, through, and beyond a text.

Describes a successful literature-based program, and offers suggestions on how any elementary classroom can benefit from a transition from skill-oriented basal texts to literature-based whole language programs.

Scott, Diana; Piazza, Carolyn L. “Integrating Reading and Writing Lessons,” Reading Horizons, v28 n1 p57-64 Fall 1987.

Describes a cooperative endeavor between university and public school professionals in integrating reading and writing lessons. Describes the Developmental Reading and Writing Lesson program's prereading/prewriting, guided silent reading and revising, skill development and editing, and independent follow-up activities.

Tway, Eileen. Writing Is Reading: 26 Ways to Connect. 1985. 56p. [ED 253 877]

Suggests integration of the skills of writing and reading at an early age. Discusses research concerning the cognitive processes and acquisition of reading and writing skills, and presents teaching methods and resources to help young children make the connection.

Reviews materials from the ERIC system and other sources on providing natural learning situations in which reading, writing, speaking, and listening can be developed together for real purposes and real audiences in the self-contained elementary classroom.

Classroom Applications

Describes the concepts underlying the “whole language approach,” and then examines some of the problems facing intermediate-grade teachers as they teach the writing process in their classes. Outlines the developmental writing needs of intermediate-grade students, and how writing can aid in identity building.

Describes various activities designed for use in the reading classroom, including (1) cooperative learning activities, (2) reading and writing activities, (3) ways to improve comprehension, and (4) ways to encourage independent reading.

Describes a Language Experience Approach (LEA) dictation given by sixth-grade remedial
readers, and discusses some weaknesses in using LEA to teach remedial reading. Explains how LEA can be modified to produce a more effective model for reading comprehension and writing instruction.

Provides a rationale for content area writing, and suggests ways it can be used for social studies instruction.

Suggests that learning the reasons for and uses of literacy is important for beginning readers. Describes a series of activities, based on practices used in adult literacy programs, that were designed to make first graders aware of the reasons for reading and writing.

Emphasizes the importance of developing a social classroom climate. Addresses the organization of the reading/writing classroom.

Contains 30 articles written by teachers of elementary school students designed to provide insights into the way students learn to write and to encourage teachers to examine their own theories and perceptions of writing and writing instruction.

Presents a transcript exemplifying principles used with beginning readers who may be unable to learn to read from traditional reading instruction. Claims strategies which allow children to communicate through written language enable them to make important discoveries about reading without knowledge of phonics or other metalinguistic skills.

Suggests that writing helps reading comprehension only if the writer is aware of the relationship between reading and writing and if the writing is purposeful. Presents three purposeful writing activities.

Presents three principles for working with poor readers in the upper elementary grades: (1) bring the class together as a literate community, (2) integrate reading and writing instruction, and (3) provide instruction on specific skills.
