This competency-based curriculum guide is a handbook for the development of tourism education programs. Based on a survey of Alaskan tourism employers, it includes all competencies a student should acquire in such a welding program. The handbook stresses the importance of understanding the principles associated with the various components of the tourism industry. Units begin with definitions of terms and principles so that students will have conceptual frameworks upon which they may develop a complete perspective for working in the field. The handbook is organized in these seven sections: (1) the concept of competency-based curriculum and the role of vocational educators in curriculum planning, implementation, and evaluation; (2) the scope of tourism competencies; (3) competencies and tasks for the following subjects—Alaskan studies, geography and culture, industry structure, economics, marketing, communications, customer service, employability skills, travel planning services, accommodations, and international tourism; (4) course descriptions to assist school districts in developing their vocational programs; (5) curriculum analysis matrices to be used to determine competencies for specific tourism courses; (6) a sample skills card for evaluating and recording student progress; and (7) information on resources and specific materials available in Alaska and the rest of the nation. Foreword

The hospitality and tourism industries are among the fastest growing in Alaska, as well as the rest of the United States. The Alaska Visitor Industry is a billion dollar business. According to the Alaska Division of Tourism, the total number of out-of-state visitors to Alaska in 1987 was 744,000 with 533,100 of those visitors arriving during the summer months. These figures represented a 13% increase for the years 1985 to 1987. In 1986, the growth rate was 13 percent over the previous year. The annual growth rate, historically, has been a steady 3 to 5 percent. The demand for professional employees exceeds the supply by more than five years. A study done in 1985 showed that 19,000 people worked directly in full-time year round jobs associated with the travel industry in Alaska. Another 38,000 people were indirectly associated with the industry. The economic importance of tourism in Alaska continues to grow every year.

This competency-based curriculum is designed to be a handbook for the development of tourism programs. It includes all competencies a student will acquire in a tourism education program. Development of this handbook began with a survey of Alaskan tourism employers. Their priorities regarding the skills and knowledge students need to acquire to survive and thrive in the industry form the basis of this handbook.

The handbook stresses the importance of understanding the principles associated with the various components of the tourism industry. Units begin with definition of terms and principles so that students will have conceptual frameworks to which they may develop a complete perspective for working in the field. The eleven units are fundamental to understanding the tourism industry. The competencies and tasks are presented so that instructors have the prerogative to determine which aspects they want to teach in basic and advanced level courses.

The handbook is organized in seven sections:

Section I introduces the concept of competency-based curriculum. The role of vocational educators in curriculum planning, implementation, and evaluation is also included.

Section II provides the scope of tourism competencies.

Section III presents the curriculum including the competencies and tasks for tourism instruction.

Section IV contains course descriptions to assist school districts in developing their vocational programs.

Section V provides curriculum analysis matrices to be used to determine competencies to be included in specific tourism courses.

Section VI contains a sample skills card for evaluating and recording student progress.

Section VII lists information on resources and specific materials available in Alaska and the rest of nation.

It is recommended that all students participate in career awareness and exploration experiences to help them understand the connection between school and work and make career plans.

A task force of Alaskan educators in tourism helped to define the units, competencies, and tasks. The task force which met to finalize this handbook deserves a great deal of credit for their hard work and valuable input:

Jennifer Deitz, The Travel Academy, Anchorage
Judy Demers, The Career Center, Anchorage
Marcia Snyder, Hutchison Career Center, Fairbanks
Edith Taylor, Alaska Pacific University, Anchorage

Special appreciation is expressed to Carin Smolin who coordinated the preparation and completion of this handbook, and to Mark Hanson, Associate Director of the South East Regional Resource Center, who administered this project.

Special thanks are due South East Regional Resource Center employees Ginger Murar and Dave Wood who designed the graphics for the handbook.

Thanks also go to the National Network for Curriculum Coordination in Vocational and Technical Education (NNCCVTE) and participating states for providing resource materials which improved the quality of this handbook and saved months of work.

Finally, Verdell Jackson, Curriculum Specialist for the Office of Adult and Vocational Education, must be recognized for designing the curriculum development process and for participating in every step of the handbook's development ensuring that it is a model Alaskan curriculum of the highest quality.

Introduction to Competency-Based Curriculum
Competency-Based Curriculum

Vocational education should be directed toward the skills, knowledge, and attitudes needed for successful employment. Tourism educators need to continually update their curriculum in order to prepare students for competition in the job market.

An effective method for delivering vocational education is through a competency-based curriculum. This curriculum is based on a task analysis of the key occupations in tourism. Once a competency-based curriculum is set in place, student performance must be measured on levels of proficiency in those competencies. Thus, the critical features of competency-based education are:

1) validating competencies to be included in the curriculum; and
2) evaluation of student competency levels.

This curriculum handbook sets direction for local curriculum developers. It provides a framework for developing courses of study and lesson plans in local schools.

Curriculum Based On Competencies

Competence refers to the adequate performance of a task. The task may be evaluated according to the performance or process, the service, or both.

Competency-Based Vocational Education consists of programs that derive their content from the tasks performed in each occupation/job and assess student performance on the basis of preset performance standards.

Learning materials define the competencies the student is to master, the criteria by which the student will be evaluated, and the conditions under which the evaluation will occur.

Competency-based instruction places emphasis on the ability to do, as well as on learning how and why. Student performance and knowledge are individually evaluated against the stated criteria, rather than against group norms.

The competency process utilizes a checklist of attitudes, knowledge, and skills that are commonly needed by entry-level employees in tourism occupations. In developing this curriculum handbook, a cross-section of tourism professionals were asked to respond to a survey on the basis of needs within their own establishments. The survey results were summarized to determine which attitudes, knowledge, and skills were important to firms in Alaska.

Student Performance Assessment:

A curriculum becomes competency-based when students are assessed on the basis of their competence. Sample skill cards are provided in this guide for teachers who wish to use them in assessing the competency levels of their students. The card has four levels of proficiency which allow continued development of skills. The card can be used to monitor students' progress as they move between tourism classes, between teachers and grade levels, and between school and work. The completed skills card is an important part of a placement portfolio when students begin their job searches.
Curriculum Delivery Systems

Vocational Student Leadership Organizations

Some of the competencies in this curriculum guide cannot be fully met in traditional classroom and lab settings. The Distributive Education Clubs of America (DECA) is a delivery system which can be integrated into the regular school program. Human relations skills as well as job skills will be enhanced by student participation in DECA. DECA activities should complement instruction in the tourism classroom and lab. They should be integrated as a curriculum delivery system and not allowed to become an extracurricular activity.

Cooperative Work Experience

Some of the competencies identified in this guide cannot be fully developed at a school site. A work station in the community offers realistic experiences in fulfilling the program goals in career development and human relations. Cooperative Work Experience offers an excellent vehicle for the delivery of instruction. With well developed training plans, teachers and employers can cooperate to prepare students for employment. Cooperative Work Experience extends the instructional program beyond the availability of equipment and instructor time at the local school. Teachers and employers must maintain regular communications to assure that students are receiving a high quality experience.

The Rural Student Vocational Program (RSVP) provides a two week fulltime work experience for students from rural areas where job stations are limited or non-existent.

The Job Training Partnership Act (JTPA) provides on-the-job experience to disadvantaged youth in both urban and rural areas.

Role of Instructor in Curriculum Planning, Implementation, and Evaluation

The vocational instructor fulfills many roles which include the following responsibilities:

- Prepares a written vocational program plan.
- Develops and maintains a written program philosophy with objectives that support the philosophy.
- Maintains a written list of competencies identified as needed for the program area.
- Devises and maintains a classroom management system for implementing the curriculum materials provided for the program area.
- Evaluates the curriculum content periodically to determine curriculum changes and updates. This includes the involvement of the students (present and former), advisory committee members, and other personnel.
- Selects units of instruction and plans lesson plans based on the competencies of the occupation.
- Provides appropriate instructional materials, supplies, and equipment for the students to use.
- Provides school guidance counselor with information and updates regarding implementation of the specific curriculum.

- Reviews the instructional materials to assure that they are free from sex bias and sex role stereotyping.

- Works with an advisory committee.

- Assists and/or serves as an advisor to the appropriate student organization related to the vocational program area.

- Plans and arranges an appropriate classroom learning environment. This involves assisting students of different abilities to work at their own pace and in cases where remedial instruction is needed, securing additional help for those students.

- Reinforces basic skills of reading, communication (written & oral) and computation through vocational education experiences.

- Helps determine what objective(s) should be established for handicapped students as a part of the individual educational plan (IEP) development.

- Uses a grading procedure that is made available to all students at the beginning of their training.

- Sets an example for grooming and dress that is generally found in the occupational area in business or industry to enable students to establish appropriate standards.

**Benefits of the Competency-Based Curriculum**

Competency-based vocational education offers several benefits to students:

1. The competencies/tasks are directed to the student and provide measurable criteria for determining when the student has acquired the necessary knowledge and skills.

2. Students receive realistic training for the job. They become competent in tasks that are relevant to the occupation.

3. Students know what is expected of them throughout the course. The competencies are made available to them at the onset. They know what they will be doing and how well it must be done.

4. Each student is individually responsible for completing each competency attempted in the curriculum.

5. The basic thrust of the competency-based program is to evaluate students according to their accomplishment of tasks as they work up to individual capability. Students are not compared with other students in their accomplishments because each is expected to work according to employment standards. Because of the various evaluation policies of different school systems, the ideal of not comparing students in determining grades is not always possible.

Program Development
Program Development

The format of this handbook was selected to aid administrators and teachers in concentrating on the skills needed for vocational training. It will assist in selecting the array of units and the delivery system which fit the school. This provides the flexibility of varying the course content to include the most valuable skills as appropriate for the scope and sequence. The primary importance is that students are able to secure foundation skills. Schools can vary their delivery systems to maximize student opportunities by:

1. Offering courses on alternate years or other planned sequences
2. Offering two or more courses in the same class
3. Providing individualized materials and instruction

A matrix is included in this guide for use in planning the courses to be offered and the content of each course.

The following chart shows the scope of tourism competencies.
III

Competencies and Tasks
Competency: Understand geography and topography of Alaska

Tasks:
Describe the four regions of Alaska:
   a. southeast
   b. southcentral,
   c. far north/interior
   d. southwest

Locate and describe:
   a. the major cities/communities in each region
   b. visitor destinations

Locate the topographical formations and other land features in Alaska including:
   a. rivers
   b. mountain ranges
   c. glaciers
   d. lakes
   e. inlets
   f. oceans
   g. sounds/fjords
   h. islands
   i. volcanos
   j. archipelago
   k. moraines
   l. muskeg
   m. bays
   n. desert
   o. tundra
   p. permafrost

Use resources for identifying geography and topography of Alaska such as:
   a. maps
   b. charts
   c. milepost

Explain how geographic features influenced settlement and development in Alaska

Competency: Understand climatic conditions in Alaska

Tasks:
Explain climatic conditions/patterns of each region such as:
   a. maritime climate zone of the southeast/southwest
   b. transitional climate zone of the southcentral
   c. continental climate zone of the interior
   d. arctic conditions of the far north

Use resources to recognize and identify climatic differences such as:
   a. Alaska Geographic
   b. Alaska Division of Tourism publications
   c. National Weather Service
   d. Milepost
   e. Alaska Almanac
   f. personal experience
   g. media

Explain how climatic conditions affect lifestyles, vegetation, and development of each region
Competency: Understand Alaskan history

Tasks:
- Trace the historical development of:
  a. local areas
  b. the state
  c. tourist destinations in the state

  c. human resource
  d. non-renewable
  e. renewable
  f. capital resource
  g. natural resource
  h. preservation
  i. exploitation
  j. agricultural development
  k. wilderness area
  l. historic area
  m. potential resources
  n. allocation
  o. land freeze
  p. Alaska National Interest Lands Conservation Act
  q. Permanent Fund
  r. infrastructure
  s. conveyance
  t. Environmental Impact Statement
  u. recreation area
- Explain the development of Alaska's natural resources including potential, problems, and issues of:
  a. timber
  b. fishing
  c. agriculture
  d. oil
  e. gas
  f. mining
  g. tourism
Describe the types of federal and state-protected and managed areas including:

a. National Forest
b. National Monument
c. National Wildlife Refuge
d. National Preserve
e. State Forest
f. State Park
g. State Refuge
h. Wild and scenic rivers

Describe the unique features of each of Alaska's regions including:

a. Plants, flowers, and trees
b. Fish species
c. Wildlife species

(A) Describe the motivation behind early federally protected and managed areas

(A) Describe the land management and natural resources development and preservation role of Alaska Native corporations

(A) Predict the social changes in Alaska which are likely to result from further development in Alaska (economic, political, cultural)

(A) Explain the issues of development versus conservation

Competency: Understand characteristics of visitors to Alaska

Tasks: Profile the visitor to Alaska by:

a. Demographics
b. Psychographics

Describe seasonal visitor attractions and activities such as:

a. Fishing
b. Hunting
c. Sports
d. River trips
e. Hiking
f. Boating
g. Sightseeing
h. Natural phenomena
i. Skiing
j. Dog mushing
k. Organized events

(A) Identify cultural differences of domestic and international visitors

(A) Describe the educational aspects of organized travel

Competency: Understand transportation modes in Alaska

Tasks: Describe transportation modes unique to each region in Alaska including:

a. Marine Highway System
b. Alaska Railroad
c. Highways
d. Air transportation systems

Explain how each of the following affects transportation in Alaska:

a. Climatic conditions
b. Geography
c. Traditional transportation modes of the different cultures
d. International, federal, and state regulations
North American/World Geography and Culture

(A) Indicates advanced competency or task

Competency: Understand geography and topography

Tasks: Explain terms and principles associated with geography and topography such as:
   a. mountains                     e. continental divide
   b. coastal geography            f. deltas
   c. plateaus                      g. islands
   d. plains                        h. deserts

Describe the regional areas of the:
   a. United States
   o. Canada
   c. Mexico
   d. Caribbean
   e. Europe
   f. Africa
   g. Asia
   h. South America
   i. Oceania
   j. Antarctica

Locate and describe:
   a. the major cities/communities in each regional area
   b. visitor destinations

Locate unique topographical formations and other land features
Use resources for identifying geography and topography features
Explain how geographic features influenced settlement and development

Competency: Understand climatic conditions

Tasks: Explain terms, principles, and patterns associated with climate of North American and Worldwide regions
Explain how climatic conditions affect lifestyles, vegetation, and development

Competency: Understand U.S. and World History

Tasks: Trace the historical development of:
   a. local areas
   b. regional areas
   c. tourist destinations
Relate foreign influences on North America's development and demographics
Describe different cultures found in regions of the world
(A) Relate foreign influences on national development
(A) Predict social changes which are likely to result from further development
   (economic, political, cultural)
Competency: Identify natural resources

Tasks: Explain terms, principles, potential, problems, and issues associated with the development of natural resources. Describe the unique features of North American and World regions including:
   a. plants, flowers, and trees
   b. fish species
   c. wildlife species

(A) Explain the issue of development versus conservation.

Competency: Understand characteristics of visitors

Tasks: Profile the inbound and outbound traveler by:
   a. demographics
   b. psychographics
Describe seasonal visitor attractions and activities
(A) Identify cultural differences of domestic and international visitors
(A) Describe the educational aspects of organized travel.

Competency: Understand transportation modes

Tasks: Describe transportation modes for regions in North America and the World. Explain travel patterns to and from various regions in North America and the World. Explain how each of the following affects transportation:
   a. climatic conditions

- Visa/passport
- Air Transport Services Agreements

Explain how international agreements are established between countries:
- Diplomatic recognition
- Commercial agreement
- Consular rights and responsibilities
- Visa agreements

Explain how internal government regulations control the movement of foreign tourists:
- Helsinki Accord
- Developmental Role of Governments
- Political influence
Economics

(A) indicates advanced competency or task

Competency: Understanding principles of economics

Tasks:
- Use resources to gain economic information
- Explain the role of:
  - competition in the American economy
  - risk and profit in the American economy
  - the consumer in the American economy
- Diagram the flow of products from producer to final sale
- Identify the effects of the Gross National Product Index (GNP) on:
  - Consumers
  - Business firms
  - Government

Competency: Understanding economic systems

Tasks:
- Define free enterprise
- Explain the major contributors to the Alaska economy
- Explain the four types of economies:
  - Market economies
  - Direct economies
  - Traditional economies
  - Subsistence economies
- Relate the importance of tourism to the Alaska economy
- Explain why profit is the driving force behind free enterprise
- Describe the:
  - capitalistic economic system
  - socialistic economic system
  - the communistic economic system
- Define problems common to economic systems

(A) Explain types of business ownership

Competency: Understanding economics of tourism

Tasks:
- Explain economic terms and principles associated with tourism including:
  - benefit-cost ratio
  - multiplier effect
  - cash flow
  - critical mass
  - travel deficit
  - export industry
  - balance of payment
  - market saturation
  - buyers market
  - opportunity cost
  - social tourism
  - perishability
  - demograph trends
  - product
  - expenditures
  - leakage
  - direct effect
  - host community
  - secondary effect
  - supply/demand
  - quotas
  - tariffs
  - import propensity
Describe the distribution of spending by tourists

Explain how certain costs and liabilities of tourism affect public facilities and services such as:
   a. immigrant/migrant workers
   b. transportation access

Course Descriptions
Course Descriptions

These brief course descriptions provide a conceptual framework for the design and implementation of a balanced program in tourism education. Teachers can use these descriptions to organize course offerings in tourism. These descriptions are examples of content organization and are too brief for purposes of program approval. Local schools will need to provide more definition regarding the content of their courses than is reflected in these course descriptions.

Course: Tourism I
Length: One semester or year
Grades: 11-12

This course provides introductory knowledge and basic skills in the tourism industry. This course covers Alaskan Studies, North American/World Geography and Culture, Industry Structure, Economics, Marketing, Communications, Customer Service, Employability Skills, Travel Planning Services, Accommodations, and International Tourism. Students must successfully complete Tourism I before they can participate in Tourism II.

Course: Tourism II
Length: One semester or year
Grades: 11-12

This course provides students with advanced knowledge or training in the tourism industry. This course builds upon Tourism I and provides students with an opportunity to apply Tourism I competencies by working directly in the industry or advanced study.

Curriculum Analysis Matrices

Identified Competencies by Course Offerings

This competency checklist should be used by teachers in identifying competencies to be included in specific classes in tourism education. This checklist is a curriculum analysis tool for use by teachers in assigning responsibilities for the competencies of a total tourism education program.

All courses taught in the tourism education program are identified in the columns at the top of the matrix. The individual competencies can be allocated to specific courses. One method for analyzing the competency list is to assign letters where the competency will be introduced (I), taught (T), or mastered (M). Curriculum sequences can be organized through this approach.

To assist tourism teachers to reinforce basic skills instruction, competencies have been cross-referenced with the following academic areas:

- Math (M)
- Science (S)
- Social Studies (SS)
- Language Arts (LA)

This will assist local school districts in awarding cross-credit (academic credit) for participation in vocational classes they deem appropriate.

The following checklists are also cross-referenced with the Job Training Partnership Act pre-employment competencies and student leadership competencies. The Job Training Partnership Act provides funds to train economically disadvantaged youth to enter and succeed in employment. Each Private Industry Council responsible for administering these funds adopted youth pre-employment competencies as one of the measures for positive termination for program participants. The other measures are attained through unsubsidized employment, or through another training program.

The following categories of work-related knowledge must be evaluated and measured in the course of a participant's enrollment in a JTPA program:

1. Pre-Employment Competencies, which require the participant to demonstrate the skills and knowledge necessary to identify career objectives, seek and obtain employment and understand job performance.

2. Work Maturity Competencies, which require the participant to demonstrate the ability to apply skills in a training position.

3. Educational Skills Competencies, which require the participant to demonstrate basic computation and communication skills necessary to enter the labor market.

4. Occupational Skills Competencies, which require the participant demonstrate proficiency in those skills necessary to maintain employment in a specific occupation or occupational cluster.

The pre-employment and work maturity competencies have been specifically cross-referenced in this curriculum so that tourism instructors could specify where these competencies are integrated into the curriculum.
Student leadership programs are designed to be an integral part of the curriculum. The competencies are reinforced by student participation in approved student organizations such as Distributive Education Clubs of America. The student leadership competencies have been cross-referenced in this handbook to assist the tourism instructor in identifying specifically where these competencies will be taught.

Distributive Education Clubs of America

Distributive Education Clubs of America (DECA) is an organization whose program of leadership, personal development, and career encouragement is designed specifically for students enrolled in marketing, merchandising, and management studies.

DECA activities focus on four themes, symbolized by the four points of the group's diamond-shaped emblem:

Vocational Understanding
DECA members are well prepared to take their places in the business world. They acquire first-hand knowledge of merchandising, management, and the opportunities available in their chosen careers.

Civic Consciousness
Students learn to recognize their obligations to the communities in which they live by studying local needs and planning community betterment.

Social Intelligence
Through social events, DECA members are given opportunities to develop the attitudes and behaviors necessary in our society. Additionally, they become aware of their social environment and the need for cooperative effort among all elements of society.

Leadership Development
DECA activities give students opportunities to participate in many activities designed to teach them to be a leader and also a follower.

The national organization, headquartered in Reston, Virginia, was established in 1946. Today it has about 5,000 chapters with some 17,000 members—including high school, college, and professional people.

Sample Skills Card

This section of the guide provides teachers with an example of an instrument for evaluating the effectiveness of instruction. The skills record allows teachers to assess competency at four levels of proficiency. Teachers are encouraged to construct their own skills performance record using the competency lists in the curriculum section of this guide.

Instructions for Use

The list of vocational skills/traits was developed from a task analysis of a tourism competency.

<table>
<thead>
<tr>
<th>Level</th>
<th>Code Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Introductory Level: Can do simple parts of task. Needs to be told/shown how to do most of the task. Needs extremely close supervision.</td>
</tr>
<tr>
<td>2</td>
<td>Minimum Level: Can do most parts of the task. Needs help only with most difficult parts. Needs close supervision.</td>
</tr>
<tr>
<td>3</td>
<td>Average Level: Can do all parts of task. Needs only spot-check of completed work. Meets local demands for speed and accuracy. Needs moderate job entry supervision.</td>
</tr>
<tr>
<td>4</td>
<td>Proficiency Level: Can complete task quickly and accurately. Can direct others in how to do the task. Needs little supervision.</td>
</tr>

Suggested Resources

This section identifies specific resources and sources for finding instructional materials and supplies for tourism education.

The following source lists have been characterized by media type to facilitate teacher use: resource libraries, publishers of texts and instructional materials, state resources, associations, periodicals, special books/pamphlets, and media.

The Alaska Department of Education has not formally reviewed nor approved all the resources listed in this section. Teachers are encouraged to preview materials before using them in the classroom.
