In response to a federal mandate stating that a drug program must be in place at institutions receiving federal funds, several representatives from Mission College attended a privately sponsored 2-day substance abuse workshop in which the Student Assistance Program (SAP) model was presented. The SAP model provides confidential, professional, and voluntary assistance and support to students regarding alcohol- and drug-related personal problems that are adversely affecting their academic performance. Workshop attendees decided to form a larger Core Committee which would receive more extensive training in order to implement a viable program at the college. A consortium was formed with neighboring colleges to cover the costs of an intensive 4-day substance abuse training workshop. Workshop participants were introduced to the PLISSIT (P=Permission, LI=Little Information, SS=Some Suggestions, IT=Intensive Therapy) Model, a method for one-on-one student counseling. One of the first committee activities was the development of a student questionnaire on alcohol and drug use. To gain more expertise and guidance for the committee, a member of the district police department, and a counselor from the Santa Clara County (California) Drug Abuse Bureau were invited to join the group. A presentation on SAP was given to all faculty members, special activities were conducted during Alcohol Awareness week, and an Alcohol and Drug Awareness Event was held in October, 1988. Programs and flyers from SAP activities, a SAP brochure and fact sheet, program evaluation forms, and student and faculty handbooks are appended. (JMC)

"STUDENT ASSISTANCE PROGRAM"

by

Rosalyn Chan, RN, PHN, MS
Mary Moore, RN, MS

I. BACKGROUND/DESCRIPTION OF MISSION COLLEGE

Mission College is a two year community college, located in the "heart of Silicon Valley". We have an enrollment of over 11,500 students. The college serves a population that is more than 60% evening, 45% ethnic minority and 20% immigrant. Mission's athletic program has three sports. We emphasize the holistic approach in the education of our students at Mission.

II. RATIONALE - WHY DID WE GET INVOLVED?

During the Fall, 1987, a federal mandate was in effect, which stated that a "drug program" must be in place at institutions which receive federal monies, such as financial aid. In the Fall, several of us attended a two day substance abuse workshop led by Heitzinger and Associates. Although the workshop was focused on drug use and the athlete, we were impressed by the Student Assistance Program Model Heitzinger described.

What is a Student Assistance Program or SAP? A Student Assistance Program provides confidential, professional, and voluntary assistance and support to students regarding alcohol and drug related personal problems that are adversely affecting their academic performance. Recognition is given to related issues such as emotional problems, family difficulties, health/physical problems, financial and legal problems and eating disorders.

It was apparent that our limited attendance at this workshop would not produce great results back at the college unless more faculty members got involved. Thus, we did what was recommended to us by Heitzinger; we had a group of "key" employees attend a substance abuse training workshop in order to create a core committee that would develop a viable program. In order to acquire the intensive, four-day training, but at the lowest possible cost, a consortium with neighboring colleges was created (West Valley, DeAnza, Foothill Colleges).
To start, the coordinators of the Student Health Centers at Mission and DeAnza colleges met with the administrative deans of Foothill and West Valley colleges. Together, we discussed what we wanted to learn from the workshop, the financial arrangements, how many employees from each campus should attend, and where the training would be held.

Back at Mission, a steering committee, consisting of two assistant deans and the Student Health Center coordinator, was created to develop the selection process of potential trainees. Deliberate attention was given to the wording of the invitational memo. In it, we included a statement regarding a commitment to assist students in areas of drug abuse after the faculty or staff member received training. We also asked the participant to indicate why he had an interest to receive training.

Since only 10 individuals could attend the training workshop the invitation memo was sent to select groups of faculty and staff members to assure a broad representation of disciplines. Each response was reviewed by the steering committee. Together we decided who could attend.

We had representatives from Nursing, Psychiatric Technician, Marriage & Family, EOPS, Counseling, and the Student Health Center. Since the workshop dates fell during instructional days, Student Services paid for needed substitutes as well as the training, which was $1,500.00 per college. In some instances the Instructional Programs were supportive enough that their budgets paid for substitute help. Substitute cost was about $2,000.00.

III. FORMATION OF THE STUDENT ASSISTANCE PROGRAM

At the workshop, we learned about substance abuse problems. The Student Assistant Program model was explained: Referrals may come from the individual with a substance abuse concern, or from an individual, e.g. an instructor who is concerned about possible substance abuse by another individual. Assessment/consultation should not exceed three meetings.

As members of the Core Committee, we were expected to have some training, but not enough to serve as drug counselors. At our workshop, the PLISSIT* MODEL was identified as a method as we meet with students one-on-one. *PLISSIT stands for P-Permission, LI-Little Information, SS-Some Suggestions, IT-Intense Therapy.
The actual formation of the Student Assistance Program started during the last hour and a half of the workshop. We were asked to come together as a college group or the newly formed core committee. We listed our goals and objectives and established a mutual meeting time. As was planned from the beginning, administrators from each of the colleges were invited to attend the last hour of the workshop to listen to our objectives. While not all the administrators were able to come, the Mission College Student Services Dean did come. Her remarks were very supportive and strengthened our plan to forge ahead.

For the remainder of the Spring Semester that year, 1988, our meeting times were spent on planning for the start of the program in the Fall, 1988. We struggled with issues of commitment and focus. There were a few individuals who expressed concerns about the amount of time they would have to devote to the program. Some felt that without release time, they couldn't contribute any extra effort. However, the majority of members felt that our purpose in coming together and putting a program together was ultimately to benefit the students.

To lead the charge, the Student Health Center coordinator took the initiative and used whatever resources she had at her disposal through the Student Health Center. Because the group did not want to meet more than once a month and then only for an hour our time together was limited. In order to maximize the use of our time, much of the "foot work" was done by the Health Center staff. "Drafts" would be presented to the committee for discussion, change and/or approval. As with any new group, there were some challenges with getting the group organized and motivated.

As the process developed, more and more responsibilities were given to the group members. A few members actually felt skeptical about the development of a program. One said, "This is a tremendous risk we are taking. We're either going to be successful or laughed at by others on campus."

One of the first committee activities was the development of an Alcohol and Drug Questionnaire. The questionnaire provided a baseline of information on our students' drug usage. This was not meant to be a scientifically designed study, nor are we drawing any conclusions from it. One interesting statistic was that approximately 12% of the 279 students who completed the questionnaire indicated they would drink until they got drunk/blasted/passed out. This figure correlates to the Heitzinger model of troubled individuals comprising 8-10% of a general student population.
The recommendation was given to divide the members into three main groupings: (1) education, (2) referral, and (3) publicity/network. For a variety of reasons, that has been less than successful and in the end, individuals still performed in overlapping ways.

To gain more expertise and guidance for the committee, several individuals were invited to join the group. This included a member of the District Police Department, a counselor from the Santa Clara County Drug Abuse Bureau, and several other faculty members who were not yet trained, but a promise of training was given to them in the near future.

Many of the meetings were spent agreeing on a philosophy and adopting a brochure for students and employees. We also developed the concept for an advertisement poster and one page flyer. The illustration used on the poster and brochure was drawn by a Mission College advertising and design student and later adopted as our logo.

In order to start the publicity on the forthcoming program, members were encouraged to talk up the SAP at any group function or meeting they attended. The SAP was formally presented at the Student Services Annual Retreat during June.

We also gave a presentation to all faculty on the SAP during Fall Semester Development Day. Our workshop's focus was to explain the SAP and a little bit of the problem of drug use in general. Attendance was good.

At our June, 1988 meeting, information was received from the National Collegiate Alcohol Awareness Week headquarters. We were encouraged to participate in prevention activities during October. The SAP agreed to sponsor the event as it would increase visibility of the program.

Much of the planning and organization for Alcohol and Drug Awareness Week was done during the summer. By the first meeting in September, we revealed what the week's activities looked like and the group felt pleased to support it. At that point members were asked to volunteer for tasks. Several of the instructional faculty members volunteered to have guest speakers in their classes or gave drug related lectures themselves. Several local businesses financially supported the event. Some of the activities included Open House, Fun Run and community resources exhibitors. The event was very successful. As a matter of fact, the event was awarded national recognition by the sponsoring organization, National Association of Student Personnel Administrators.
IV. CURRENT SITUATION

We are continuing the program. Much more needs to be done. We have come up with our Statement of Philosophy.

We sponsored another Alcohol and Drug Awareness Event in October which was disrupted by the earthquake. Because this was our second year, and the event was successful last year, more committee members volunteered to organize certain aspects of the event.

We continue to seek opportunities to increase student/staff awareness of the Student Assistance Program in order to offer assistance to students to reach their potential.
PHILOSOPHY STATEMENT

The Student Assistance Program believes students are entitled to develop their fullest potential. To facilitate this process, the members of the group are trained to serve as advisors for referral to appropriate sources of assistance, maintaining confidentiality in their communications.

STUDENT ASSISTANCE PROGRAM PERSONNEL

The Student Assistance Program committee is comprised of a group of volunteer staff and faculty. The advisors receive special training and education to help in the identification, assessment, and referral of student problems. A listing of the advisors is included in the back of this handbook.

MISSION COLLEGE
STUDENT ASSISTANCE PROGRAM

STUDENT ASSISTANCE PROGRAM

The Mission College Student Assistance Program provides confidential, professional, and voluntary assistance and support to students regarding personal problems that are adversely affecting their academic performance. Assistance is given in particular to students with alcohol/drug problems. We recognize that related problems such as emotional problems, family difficulties, health/physical problems, financial and legal problems, and eating disorders may exist. Referrals will be made to appropriate community resources.

ACADEMIC PERFORMANCE INDICATORS

Indicators which may be used in the evaluation of a student's academic performance include:

- Personality/emotional status (e.g., depressed, extremely irritable, hostile without reason, giddy)
- Social interaction/difficulty in intimate relationships (e.g., isolation, difficulty making change in relationship)
- Motivation level (e.g., losing interest, sleeping in class)
- Health status/physical appearance (e.g., loss of appetite, respiratory problems, weight loss, tired)
MISSION-WEST VALLEY
COMMUNITY COLLEGE
ALCOHOL/DRUG POLICY

Student alcohol and drug usage and behaviors that require action include:
- The sale of illegal drugs
- Possession and/or observed use of illegal drugs
- Driving while intoxicated
- Abuse
- Under influence of drug

As representatives of Mission College, it is important for student personnel to be aware of California laws with regard to drunk driving and abuse. The Student Health Center has free pamphlets describing the California Drunk Driving laws.
Please come to Room W1-303 or call 408/988-2200, ext. 1718.

HOW THE STUDENT ASSISTANCE PROGRAM WORKS
STUDENT PROCEDURES FOR SEEKING INFORMATION/ASSISTANCE

Contact a Student Assistance Program Advisor directly for assistance. A list of advisors is included in the back of this handbook. If you are not able to reach the advisor of your choice, call 988-2200, ext. 1718 or ext. 1779.

The advisor will discuss the situation with you and the referral source (if any) to assess and evaluate the problem.

The student and advisor will then outline a plan in regard to the problem. This plan may include a referral to the appropriate source of assistance such as: alcohol/drug treatment agencies, counseling centers, education and community programs and on-campus services.

The advisor and referral sources will provide any assistance and follow-up until completion of the recommended plan.
FAMILY AND PEER
PROCEDURES FOR SEEKING
INFORMATION/ASSISTANCE
ON BEHALF OF A STUDENT

If a family member or student is concerned about problems that may be interfering with a student's academic performance, assistance may be sought on behalf of the student.

Discuss the situation with the student and suggest the Student Assistance Program.

or

Contact an advisor and allow him/her to confidentially contact the student.

Maintain contact with the student throughout the program process to offer support and encouragement.

If a family member or student is concerned about problems that may be interfering with a student's academic performance, assistance may be sought on behalf of the student.

Discuss the situation with the student and suggest the Student Assistance Program.

or

Contact an advisor and allow him/her to confidentially contact the student.

Maintain contact with the student throughout the program process to offer support and encouragement.

COLLEGE STAFF PROCEDURES FOR SEEKING INFORMATION/ASSISTANCE ON BEHALF OF A STUDENT

The student Assistance Program does not alter the college’s disciplinary or control measures. It is an alternative source of assistance to help insure the successful academic development and well-being of students.

If concerned about a student’s academic performance or inappropriate behavior, staff should carefully observe and document the situation and possible performance indicators.

Discuss the situation with the student if a problem is indicated. Review the observed and documented performance deterioration or inappropriate behavior. Explain the consequences if the situation does not improve and offer the help of the Student Assistance Program. Assist in contacting an advisor at the student’s request.

or

Contact the advisor directly and present your observations and documentations. Then allow the advisor to confidentially contact the student.

Maintain contact with the student throughout the Student Assistance Program process to offer support and assistance.
STUDENT ASSISTANCE PROGRAM GUIDELINES

To insure the Student Assistance Program's student and protect student's rights, the following guidelines govern the program:

THE ACADEMIC STATUS OF THE STUDENT WILL NOT BE JEOPARDIZED BY THE STUDENT SEEKING ASSISTANCE.

The decision to use the program must be voluntary.

If the student rejects a suggestion to seek assistance, it is the student's responsibility to remedy the performance problem or face appropriate action.

The program will protect the privacy of the student by employing strict confidentiality measures. Any details of communication between students and advisors may not be disclosed to any source without the prior written consent of the student.

Unless the student consents otherwise, the person making a referral to a source of assistance at a student's request may disclose only the following information:

- the student's name, address, phone number
- how the student was referred to the Student Assistance Program
- the reason for the referral

Records are made of program referrals only with the written consent of the student. The student will not be denied assistance for refusing consent.

Bradshaw on: The Family

In this acclaimed series, noted author, counselor, and lecturer John Bradshaw presents a profound and compelling view of how dysfunctional families foster compulsive behavior. Focusing on family systems and how family rules and attitudes become encoded in each family member, Bradshaw offers insight as well as hope for remediying some of the most critical issues of our time.

Monday, October 16
4:30pm-5:30pm **The Family in Crisis**
Gives an overview of what constitutes a family in crisis.

Monday, October 16
5:30pm-6:30pm **The Healthy Family**
Examines how a healthy, functional family operates.

Tuesday, October 17
4:30pm-5:30pm **The Unhealthy Family**
Analyzes the characteristics of the dysfunctional family.

Tuesday, October 17
5:30pm-6:30pm **The Compulsive Family**
Explores how incorrect belief about the self leads to compulsive behavior, the core of all addictions.

Wed., October 18
4:30pm-5:30pm **The Most Common Family Illness**
Reveals America's most common and unrecognized addiction - co-dependency, the giving up of one's own wants and needs to live for other's wants and needs.

Help for the Family
Details the positive community resources available for helping families heal their wounds.

Health for the Family
Shows how to overcome denial of problems, and how to intervene successfully to lead a family member or friend to help and health.

Hope for the Family
Bradshaw defines hope as the power to heal ourselves—therefore the world.

All programs are approximately one hour video presentations which will be shown in the Mission College Main Lobby, Main Building.

MISSION COLLEGE STUDENT ASSISTANCE PROGRAM

The Mission College Student Assistance Program provides confidential, professional, and voluntary assistance and support to students regarding personal problems that are adversely affecting their academic performance.

Assistance is given in particular to students with alcohol/drug problems. We recognize that related problems such as emotional problems, family difficulties, health/physical problems, financial and legal problems, and eating disorders may exist. Referrals will be made to appropriate community resources.

HOW THE STUDENT ASSISTANCE PROGRAM WORKS

STUDENT PROCEDURES FOR SEEKING INFORMATION/ASSISTANCE

Contact a Student Assistance Program Advisor directly for assistance by calling 408-2200, ext. 1718 or ext. 1779.

The advisor will discuss the situation with you and the referral source (if any) to assess and evaluate the problem.

The student and advisor will then outline a plan in regard to the problem. This plan may include a referral to the appropriate source of assistance such as alcohol/drug treatment agencies, counseling centers, education and community programs and on-campus services.

The advisor and referral sources will provide any assistance and follow-up until completion of the recommended plan.

FROM: Dan Matarangas, Assistant Dean
Student Development

SUBJECT: Substance Abuse Prevention Project

Mission College has been working to develop a formalized approach to the problem of substance abuse. In this regard, a steering committee has been operating since last May in developing awareness as well as strategies. In collaboration with Foothill, De Anza, and West Valley Colleges, we have established a consortium for training.

During the four days from February 29 through March 3, 1988, ten people from each of the four campuses will be trained in substance abuse awareness for the purpose of being trainers as well as interveners. The planning committee will work with the training committee to develop a substance abuse program for 1988-89 academic year.

We are looking for faculty and staff volunteers to commit to this ongoing activity. Your commitment will be to:

1. Participate in a four-day intensive substance abuse training program from February 29 through March 3, 1988. (Must attend all four days.)

2. Participate in monthly meetings (3 hours per month) to plan and advise about the substance abuse program.

3. Be responsible for conducting or assisting in a minimum of two substance abuse classes/programs per semester.

4. Be willing to serve as an intervener/referral/contact person for substance abuse.

Selection will be done by the steering committee.

Please complete the following requested information for consideration. Return to Rosalyn Chan, PHN, Student Health Center, Room W1-303 (ext. 1718) by February 10, 1988.

_________ Yes, I would like to be considered for Substance Abuse Prevention Training. I commit to train others at Mission upon completion.

Evaluation Form

PROGRAM NAME ___________________________ Date ____________

EVALUATOR ___________________________ (Optional - Name of speaker/community resource agency)

INSTRUCTIONS: Please evaluate our program on the basis of the factors listed below. We are particularly interested in your comments concerning those program elements which you feel should have been within our control. Also, we would like to have your constructive suggestions for future improvements in our program. Please return this form as noted below.

1. PRE-PROGRAM DETAILS MAILED TO REPRESENTATIVES (timeliness of mailing; completeness of arrival instructions and program details)

2. ARRIVAL ARRANGEMENTS (parking availability and access to program area)

3. PHYSICAL ARRANGEMENTS (program times; suitability of location and facilities, including student access to program area; adequacy of program set-up, i.e., tables, signs)

4. HOSPITALITY (providing "creature comfort" services to representatives)

5. ATTENDANCE (students, faculty, general public)

6. EVIDENCE OF STUDENT PREPARATION (based on questions asked by students)

7. OVERALL PROGRAM RATING

   ______ Excellent   ______ Good   ______ Fair   ______ Poor

8. RECOMMENDATIONS FOR FUTURE PROGRAMS

We appreciate your input. Please hand to one of the following:

STUDENT ASSISTANCE PROGRAM
(ALCOHOL and DRUG PROBLEMS)
MISSION COLLEGE

FACT SHEET

WHAT? The Mission College Student Assistance Program provides confidential, professional, and voluntary assistance and support to students regarding personal problems that are adversely affecting their academic or athletic performance.

Assistance is given in particular to students with alcohol/drug problems. We recognize that related problems such as emotional problems, family difficulties, health/physical problems, financial and legal problems, and eating disorders may exist. Referrals will be made to appropriate community resources, as appropriate.

WHEN? Starting the Fall Semester, 1988, students may call (408) 988-2 00 ext. 1779 Counseling or ext. 1718 (Health Center) and ask for an Advisor in the Student Assistance Program. Specific individuals and their telephone extensions are listed on the back of this sheet.

WHERE? After telephone contact is made, a mutually agreed upon meeting place, on campus, will be established for both student and Advisor.

WHO? Any registered student is eligible to receive assistance. Faculty may refer students to the Student Assistance Program or students may refer themselves.

WHY? According to the National Institute on Drug Abuse, the number of Americans using illegal drugs has grown from 4% to 33% in the last twenty years. Alcohol is America's #1 drug problem among college students. Alcohol is twice as popular among college students as the next leading drug, marijuana, and more than 5 times as popular as cocaine.

About 10,000 sixteen to twenty-four year olds are killed each year in alcohol related accidents, including drowning, suicides, violent injuries, homicides and injuries from fire.

Children of alcoholics have four times greater risk of developing alcoholism than children of non-alcoholics.

Alcoholism is a chronic, progressive and potentially fatal disease. It is sure to lead to psychological and physical dependency as well as damage to the body, often irreversible.

Indicators which may signal problems are changes in 1) personality/emotional status, 2) social interaction/difficulty in intimate relationships, 3) motivation level, 4) health status/physical appearance.

HOW DO YOU KNOW IF THERE IS A PROBLEM? Because we care about our students. All visits are held in strictest confidence.

WHEN ARE WE DOING THIS?...
