This collection of statistical data on the 90 Highland Lao communities in the United States is designed to help members of those communities and people working in refugee-serving agencies to better assist this refugee group. Information was provided by community leaders, state refugee coordinators, and county human resource officials in 1988. Profiles of 71 Hmong communities in 30 states include the estimated size of the population and information about jobs held by refugees and services available to them. The following other Highland Lao populations, residing in 19 communities in eight states, are also profiled: (1) Iu Mien; (2) Khmu; (3) Lahu; (4) Loa Lue; and (5) Lao Tinh. The following national findings are reported: (1) the estimated total population of the Hmong communities was 105,253 and the estimated total population of the other communities was 12,777; (2) most of the highland Lao live in California, Wisconsin, and Minnesota; (3) the self-sufficiency rate nationwide (the percentage of families who do not receive cash assistance) for the Hmong was 37 percent, and the rates for the other groups varied greatly; (4) generational problems, mental health, juvenile delinquency, marital problems, cultural adjustments, and drug abuse were the most frequently cited problems; and (5) drug abuse was mentioned only in the largest urban communities. Statistical data are presented in seven tables and one graph.

PREFACE

This collection of data on the Highland Lao communities of the United States was designed to help members of those communities, and others working in refugee-serving agencies, to better serve America's Highland Lao Refugees. The project was originated by, and guided by, the Office of Refugee Resettlement's project officer, Toyo Biddle. We enjoyed working with her on it.

The authors are also grateful to the scores of refugee leaders who provided the data for this study, to numerous helpful people in the offices of the State Refugee Coordinators and the regional ORR offices, and to our supportive employer, John Coffey, of CZA, Inc.

The reader should be alert to the fact that the data presented herein are uneven; some of the population figures are precise counts, others are informed estimates and still others are guestimates. Nevertheless this document does provide some insights on where the Highland Lao live, and what they are doing.
I. SCOPE OF THE STUDY

The purpose of this document is to provide up-to-date information on Highland Lao communities in the United States. In each of the 90 community profiles which follow, certain standardized data are presented: the name of the community, the estimated size of its population, and information about jobs held by refugees and services available to them. These profiles reflect the situation in the summer of 1988 and are based largely on information supplied by community leaders; in many instances state refugee coordinators and county human resource officials were consulted as well.

A. Hmong Communities

A total of 71 Hmong communities in 30 states are covered by profiles. Generally these are communities of twelve or more families but in instances where a small Hmong community was found many miles away from other Hmong settlements (such as the handful of families in Sioux Falls, South Dakota) it was included among the profiles. In two instances, in Wisconsin and Illinois, scattered small Hmong communities in each of those states have been grouped together in single profiles.

B. Other Highland Lao Communities

Five other Highland Lao populations are covered in the same manner as are the Hmong. These are the Iu Mien, Khmu, Lahu, Lao Lue and Lao Tinh. A total of nineteen communities were identified in eight states; of these, eight are Iu Mien, seven are Khmu, two are Lahu, and one each are Lao Lue and Lao Tinh.
II. METHODOLOGIES USED AND DATA LIMITATIONS

As this project began, the authors examined previous data collection efforts and studies of the Highland Lao in the United States, including several sponsored or conducted by ORR. They also relied heavily on Mr. Yang’s first-hand knowledge of the distribution of the Hmong population. Leaders of known Highland Lao communities were contacted, not only for data on their own communities, but also for leads to other communities. In addition, in all states where Highland Lao communities were not thought to exist, the authors called regional ORR offices and state refugee coordinators to check on the possible presence of such communities; in many states where Highland Lao communities were known to be present, the coordinators were called to secure leads about other communities, and for confirmation of some of the larger population estimates.

The authors believe that there are no sizeable communities (twelve families or more) of Highland Lao in the United States not covered in the community profiles. (If this is incorrect, please send information on missed communities to Ms. Toyo Biddle, Office of Refugee Resettlement, Family Support Administration, 6th Floor, 370 L’Enfant Promenade, S.W., Washington, DC, 20447.)

For those who focus on such matters, the following is a discussion of some of the techniques used in gathering and estimating the data.

The data collected are the best estimates (and in some instances counts) available to the best-informed data sources the
authors could find. In most cases these sources are listed in the profiles, and most of these are directors or presidents of Mutual Assistance Agencies (MAAs).

In some situations where the number of families was known, but not the number of persons, the number of individuals had to be estimated. In California, Wisconsin and Minnesota the usual family size estimate was 6, in other states it was usually a slightly smaller number.¹

Most Highland Lao refugees who work do so on a full-time basis, but in some of the high-welfare benefit states (California, Minnesota and Wisconsin) there are part-time workers as well. When this is known, it is reported in a footnote.

In all cases the average annual gross incomes for full-time, one-worker families were calculated by multiplying the average hourly wage for men by 2080 -- or 40 hours a week. In the case of multiple-worker families the assumption was that there was one man and one woman working in these families, and that they were each earning the average wage for their sex in that location. Similarly, the authors assumed full-time, year-around employment, but no overtime, for each of them.

Host community population sizes are from the 1980 Census,

¹ In the course of this work some listings of cash assistance cases in Milwaukee and Marathon Counties, Wisconsin, were secured which cast some light on the average family size in AFDC cases. In Milwaukee County there were 124 cases bearing one of three frequently encountered Hmong names; there were 23 cases bearing one of the three same names in Marathon County. These 147 families had 834 members, or an average of 5.67; the average was 5.52 in Marathon County and 5.70 in Milwaukee County.
and unemployment data are for the area in question during the year 1987 and were provided by the U.S. Bureau of Labor Statistics (BLS). It should be noted that these are the unemployment rates for the general population -- not those of the refugees in those cities.

While the BLS data are routinely accepted, the refugee-specific information in this document should be used as rough benchmarks of the size, composition and economic status of the refugee communities listed.

While it is clear, for example, that Hmong refugee communities in Illinois are both smaller than, and more prosperous than, those in nearby Wisconsin, data included in the community profiles must be treated with caution. Further, the concept of average hourly wages was a new one to some of the informants (there is, for example, no word in Hmong for "average") and the averages shown are often the mid-point on a range rather than the true average or mean. Finally, the data on services available to refugees is often uneven, being the subjective reaction of the informants. In some cases more and better services may be available than noted, and in other cases the reverse may be the case.

Despite these caveats, however, the material may be helpful to refugee community leaders, to service providers, and to individual families seeking to improve their economic condition.
III. NATIONAL FINDINGS

A. The Highland Lao Population.

The estimated total population for the 71 Hmong communities is 105,253. The estimated total for the nineteen communities of the other five Highland Lao populations is 12,777. This is broken out as follows:

<table>
<thead>
<tr>
<th>Community</th>
<th>Population</th>
</tr>
</thead>
<tbody>
<tr>
<td>Iu Mien</td>
<td>10,288</td>
</tr>
<tr>
<td>Khmu</td>
<td>1,713</td>
</tr>
<tr>
<td>Lahu</td>
<td>436</td>
</tr>
<tr>
<td>Lao Tinh</td>
<td>220</td>
</tr>
<tr>
<td>Lao Lue</td>
<td>120</td>
</tr>
</tbody>
</table>

Thus, in the summer of 1988, these 90 communities reported a total Highland Lao population of 118,030.

How do these national totals compare with other data on the Highland Lao in America? Generally, although quite different counting and estimating techniques are used, the two sets of data are reasonably close to each other. Other estimates of the United States-wide Highland Lao populations are based on two sources: a count of arriving refugees and an estimate of births to refugees in the United States. (Neither of these data sources sort out different kinds of Highland Lao refugees, so one must group the Hmong and the other Highland Lao together for these purposes.) The most recent national estimate based on these sources is 110,456 -- close to the collective estimates of the Highland Lao community leaders. Before the end of the war in Indochina, there were only a few Highland Lao living in the United States. U.S. Department of State records indicate that about 72,000 Highland Lao, have been admitted to the United States from Southeast Asia.
in recent years. The arrivals have been as follows:

<table>
<thead>
<tr>
<th>Year</th>

**Total** 72,394

source: Bureau for Refugee Programs, U.S. Dept. of State

In addition to these arrivals, it is estimated that there were more than 37,000 Highland Lao births in the United States during the period 1975 to June 30, 1988. Thus this indicates

2 In the last six months of FY88, an additional 6,576 Highland Lao refugees were admitted to the United States.

3 This 37,000+ estimate is based largely on "Fertility and Adaptation," Ruben G. Rumbaut and John R. Weeks, International Migration Review, Vol. 20, Summer, 1986. Rumbaut and Weeks conducted extensive, detailed studies of fertility among several Southeast Asian communities in San Diego. They reported that by September 30, 1985, there had been 57,376 Hmong arrivals nationally and they estimated that, up to that point, there had been 22,847 Hmong births in this country. (It is assumed that these figures should be applied to all Highland Lao, not just Hmong, because the State Department does not keep statistics on the separate communities among the Highland Lao.)

In order to estimate the number of Highland Lao births between September 30, 1985, and June 30, 1988, the following approach was used. Rumbaut and Weeks reported that Hmong women in their study had a remarkably high child-woman ratio. Typically for every ten American women, aged 15 through 44, there are 3.09 children under the age of four; the ratio among the Hmong studied was 17.69 such children, or more than five times the average U.S. rate. Although continued contact with the U.S. probably had somewhat reduced fertility rates, it was assumed (for the period in question) that Highland Lao women had four times the crude birth rates of American women. Since U.S. birth rates at the time were 15.7 births per thousand residents per year, the estimated Highland Lao birth rate was 62.8 per thousand per year, remarkably high, but not unreasonable considering the
that there were about 110,000 arrivals and births in this period. Since the number of non-refugee Highland Lao arrivals (mostly immigrants who had first settled in France) is probably about equal to the number of deaths in the U.S. this would suggest a total Highland Lao population in the 110,000 neighborhood in the summer of 1988.

It had been anticipated that there would be a gap between the collected community estimates and the national totals of arrivals and births. First, there was the question of timing; many post-April 30 arrivals from the camps were included in the community estimates but not in the 110,000 national totals. Then too, community leaders, be they in the Chamber of Commerce or the local MAA, tend to round their numbers upwards. Further, while the estimates of the numbers of families are probably reasonably sound, those of individuals are less so. Often the local source

San Diego findings. The 62.8 rate was then applied to an average base Highland Lao population of the nation (in 1985-1988) which was calculated at 88,116. This produced an estimated 15,215 births to Highland Lao families in the U.S. This provides:

<table>
<thead>
<tr>
<th>Total 1975-1988 arrivals:</th>
<th>72,394</th>
</tr>
</thead>
<tbody>
<tr>
<td>1975-1985 births:</td>
<td>22,847</td>
</tr>
<tr>
<td>1985-1988 births:</td>
<td>15,215</td>
</tr>
<tr>
<td>Total Highland Lao:</td>
<td>110,456</td>
</tr>
</tbody>
</table>

This estimating technique is not without its problems, but it does reflect the unusual fertility of the Highland Lao.

Notice, in Exhibits One and Two, the frequency with which the number of families is divisible by 10, 50 and 100. The laws of chance would suggest that a little less than one response in 100 would be an even hundred in a survey of 90 communities, particularly since many communities reported that they had fewer than 100 families. There were, in fact, 23 such estimates.
would simply use a multiplier to get from his family count or estimate to the total estimate of the population. In the survey no effort was made to impose a standard family definition, and some of the large families reported may be extended, rather than nuclear, families.

While some of the factors noted above might tend to swell the estimates of the Highland Lao populations there were forces working in the other direction as well. Undoubtedly some small Highland Lao communities were not included in this survey, thereby reducing the national totals.

B. Distribution Among the States.

As to the geographical distribution, most of the Highland Lao live in three states, California, Wisconsin and Minnesota. That distribution is summarized below, and shown in more detail in Exhibits One and Two:

<table>
<thead>
<tr>
<th>Principal States</th>
<th>Hmong (individuals)</th>
<th>Other Highland Lao (individuals)</th>
<th>Totals</th>
</tr>
</thead>
<tbody>
<tr>
<td>California</td>
<td>58,976</td>
<td>9,623</td>
<td>68,599</td>
</tr>
<tr>
<td>Wisconsin</td>
<td>16,456</td>
<td>0</td>
<td>16,456</td>
</tr>
<tr>
<td>Minnesota</td>
<td>13,700</td>
<td>265</td>
<td>13,965</td>
</tr>
<tr>
<td>all other States</td>
<td>16,121</td>
<td>2,889</td>
<td>19,010</td>
</tr>
<tr>
<td>U.S. Totals</td>
<td>105,253</td>
<td>12,777</td>
<td>118,030</td>
</tr>
</tbody>
</table>

These data indicate that 56% of the Hmong are in California, 16% are in Wisconsin, and 13% are in Minnesota. This leaves 15% of the Hmong population scattered in 27 other states. As for the

Source: survey of Highland Lao community leaders by CZA, Inc., as described in the text.
other Highland Lao refugees, 75% of them are in California, 2% are in Minnesota, none in Wisconsin and 23% in six other states.

The three largest Hmong communities are those of Fresno (24,000 individuals), Minneapolis-St. Paul (13,450) and Merced (7,500).

The largest of the other Highland Lao communities is the Iu Mien community in the San Francisco Bay area; it is estimated at 4,800 people.

C. Indications of Self-Sufficiency.

Exhibits One and Two also show self-sufficiency rates nationwide and for each population and for each state. (A self-sufficient family is defined as one that does not receive cash assistance.)

The self-sufficiency rate, nationwide, for the Hmong, is 37%; these rates vary widely for the other Highland Lao groups but the average rate for them is 31%.

There are significant differences state by state. The Hmong rates are 28% for California, 27% in Wisconsin, 38% in Minnesota, but are between 43% and 79% in five states, between 80% and 97% in thirteen states, and are at 100% in nine others. Expressed another way, while the states other than California, Minnesota and Wisconsin have about 15% of the Hmong population, they have 33% of the self-sufficient Hmong families, a two-to-one ratio. (See Exhibit Three.) Similarly, self-sufficiency rates for the non-Hmong Highland Lao also vary from state to state, following
Exhibit Three
Distribution of Self-Sufficient Hmong

Total Families
- Minnesota: 2,386 (16%)
- Wisconsin: 2,862 (16%)
- California: 9,439

Self-Sufficient Families
- Minnesota: 907 (33%)
- Wisconsin: 746 (12%)
- California: 2,643
- Other States: 2,118

Source: Exhibit One
the same patterns noted for the Hmong (such as low rates in California.)

There are also significant differences within at least some of the states. Some of the newest, most rapidly growing Hmong communities in Northern California, Eureka, Redding and Yuba, for example, have much lower self-sufficiency rates than older settlements, such as Santa Ana and Santa Barbara. (See profiles for these communities.)

Exhibits Four and Five show four other indicators of economic adjustment -- the number of families reporting ownership of homes and businesses, and the numbers of individual college students and graduates.

About one Highland Lao family in ten owns its own home. More than 2,000 persons, close to 2% of the population, are attending college, and another 500 have a degree of some kind, including a scattering of Ph.Ds, MDs and at least two law degrees. Further, close to 200 of the Highland Lao own their own businesses -- these tend largely to be groceries, restaurants, video stores and rental-housing operations.

These favorable indicators are not spread evenly among the states. Those living outside the three principal states of concentration are much more likely to own a home or a business or to be a college graduate than those in California, Minnesota and Wisconsin. For example, only one Highland Lao family in 19, living in one of the three high-concentration states, owns its own home; while this is true of one family in three living

* In other words, of all the Hmong families in the nation, 54% live in California, but only 28% of the homeowning families and 48% of the business-owning families, nationwide, live in that state.

Note: This table, unlike the previous one, deals with Hmong only, and does not include data on other Highland Lao groups. Some percentages do not add because of rounding.

Source: CZA Survey, 1988
elsewhere.

Most working refugee families have two or more workers; 3,754, or 56% of the working Hmong families, are in this category; they are doing well financially, earning an estimated $24,024 per year on average. There is a similar percentage of multiple-worker families in the other Highland Lao populations and they earn a comparable amount, an estimated average of $23,890 per year.

There are fewer one-worker families than two-worker families, and they earn considerably less money. The Hmong one-worker families earn $13,038 per year on average, while the non-Hmong Highland Lao families with a single worker earn $13,760.

The number of two-, at least one-, and no-worker families for each of the population groups is shown below:

Data are incomplete on 959 families (all Hmong) in the "at-least-one-worker" category; in those cases it is known that someone in the family has a job, but it is not known if more than one family member works. As a result, the incidence of two-worker families shown above is, to some unknown extent, an understatement.
D. Problems Reported by Community Leaders

In the course of the conversations with the community leaders they were asked open-ended questions about problems and concerns facing the communities. In many cases, particularly in the smaller, more self-sufficient communities, it was said that there were no problems, or as one man expressed it, "just the usual tensions, nothing unusual." A number of the informants, however, did cite one to several problems that were worrying them. These responses were grouped into several categories:

<table>
<thead>
<tr>
<th>Problem Cited</th>
<th>Number of Times Cited</th>
</tr>
</thead>
<tbody>
<tr>
<td>generational problems</td>
<td>9</td>
</tr>
<tr>
<td>mental health</td>

<td>1</td>
</tr>
<tr>
<td>MAA salaries are too low</td>
<td>1</td>
</tr>
<tr>
<td>Male-female numerical imbalance</td>
<td>1</td>
</tr>
</tbody>
</table>

There was a lot of overlap among the generational, delinquency and drug responses, but there were different distributions as well. Drugs were mentioned only in the largest of the Hmong concentrations: Fresno, Twin Cities and Sacramento, and in the Iu Mien communities in the Bay Area and in Seattle. With the exception of the last-named community (which has 152 families) the drug problem was reported only in communities with
more than 600 families each. The problems of delinquency, and of generational conflict were reported in a broader array of communities. The need for vocational (or technical training) was mentioned by a couple of sources, as was the need for training in "living" or coping skills.

In addition to the problems reported explicitly by the community leaders, the authors also noted:

- the special problems of some of the smaller ethnic groups among the Highland Lao.
- the fact that the most self-sufficient of the communities (other than those in the PSR* program) appeared to be the ones with the most rapidly-shrinking populations;
- the fact that a couple of the fastest-growing communities were those where employment was rare to non-existent.

The Non-Hmong Highland Lao. For example, one community leader spoke of what he regarded as many serious problems:

"mental health problems are a major concern...drinking is also a serious problem... marital problems and violence are other worries...no one wants to take any leadership..."

Given the small size of many of these communities (such as the Khmu, Lahu, Lao Lue and Lao Tinh) supportive services are usually not provided in the group's own language.

The shrinking communities. The high employment ratios and incomes reported for the Hmong in places like Indianapolis, Salt Lake City, and Tulsa contrast with the fact that the populations of these places are declining -- while steady gains are reported in most California and Wisconsin cities.

* PSR stands for Planned Secondary Resettlement, a federal program; it is described in the Atlanta community profile.
Fast-growing communities. On the other side of the same coin was that the fastest-growing of the communities appeared to be in rural to semi-rural northern California counties where welfare dependency is the norm.

These specific patterns are reflected in the national data on the changing distribution of the Hmong population. Exhibit Six shows the geographical location of the Hmong outside California in 1983 and in 1988; the Hmong population in Wisconsin and Minnesota has more than doubled in the last five years, while the Hmong population in states other than California, Wisconsin and Minnesota has dropped by several thousand. This decline in the population of the other states has taken place despite the overall rapid growth of the national Hmong population.

Sources: 1983 data, from the files of the Highland Lao Working Group, Office of Refugee Resettlement; 1988 data, from survey of Hmong community leaders by CZA Inc. as described in the text.
IV. THE COMMUNITY PROFILES

A. GUIDE TO THE PROFILES

The balance of the report consists of a series of 90 one-page community profiles; these are presented in two groups, first those for the Hmong, and then those for the other Highland Lao communities. Within each category, the profiles are arranged alphabetically by state, and then by communities within the states. The one-page profile on the Hmong community in Syracuse, N.Y., one of the first to be collected, follows as an example of how each of these profiles are organized. (See Exhibit Seven)

The heading for the profile gives the name of the principal city (Syracuse), the state (New York) and the county (Onondaga) where it is located and the language used by the community (Hmong). In some locations, such as Visalia, California, where there are refugees living in a number of nearby locations, the names of these smaller communities are noted on the upper right hand section of the page. In situations, such as Dallas, Texas, where there are several Highland Lao communities, there is a separate page for each linguistic group.

The number of families and the number of individuals are shown near the top of the page.

Next, for the Hmong communities, the largest clans are listed, with the largest ones followed by other significant ones. If a large majority of the refugees belong to a single clan, as is the case in Chicago (Xiong) then only one clan is listed.

Under "Employment" the total number of families with at
Exhibit Seven

SAMPLE COMMUNITY PROFILE

Hmong Syracuse, New York
Community (Onondago County)

Number of Families: 57
Number of Individuals: 300
Largest Clans: Lee, Her, Yang, Lor, Thao, Vue, and Xiong

Employment:

Total number of families with workers: 49
Families with one worker: 9
Families with two or more workers: 40
Common jobs for men: factory production, maintenance, human services, engineer
Common jobs for women: factory production, housekeeping
Average hourly wage: men: $7.00 women: $6.00
Average annual income, single worker families: $14,560
Average annual income, multi-worker families: $27,040
Number of families with private medical insurance: 40

Welfare utilization

Number of families on welfare 8

Other indicators

Number of families who own homes 16
Number of Hmong-owned businesses 1
Number of current college students 11
Number of college graduates 14

Hmong population trends

There has been an outmigration of 15 families in last three years but 25 families have arrived, 18 from overseas.

MAA Status

Refugee services are provided by Refugee Family Program, 408 East Willow Street, Syracuse, N.Y. 13203

Host Community

Syracuse is a city of 170,000 near Lake Ontario in upstate New York. The unemployment rate is 6.1%, below the national average.

For more information: Robert Huss, Refugee Family Program, (315) 425 4982 or Tou Lee, Refugee Family Program, (315) 425 4667 (o)
least one worker is noted first, then the number of families with just one worker, and then those with two or more workers. Then the most common jobs for men and women are listed followed by an estimate of the average hourly wage for each sex.

The average wage is the total amount of money earned per hour by all the male workers (for instance) divided by the number of such workers. In most communities there are some workers making more than the average wage, and some making less.

The hourly wage data are followed by estimated annual incomes of one-worker and multiple-worker families. Also noted is the number of families with private medical insurance.

The extent of welfare utilization is shown by the number of families on cash assistance (which includes Refugee Cash Assistance (RCA), Aid to Families with Dependent Children (AFDC), General Assistance (GA) and Supplemental Security Income (SSI). Receipt of Food Stamps, housing subsidies and public medical insurance are not defined as welfare utilization. The number of families on cash assistance (8 in the case of Syracuse) can be compared to the total number of families in the community (57.) In this instance there is a relatively low use of cash assistance, and, as in many other communities, a high incidence of economic self-sufficiency.

"Other indicator." show some other numerical clues to how well the local community is doing in its adjustment to the United States.

The population trends item shows whether the community is
growing, shrinking or remaining stable.

The MAA status item tells of the existence of a mutual assistance association, or not, and whether or not it has any government funding. The availability of services for refugees is noted in this item as well; the services covered are refugee-specific and do not include routine services available to all Americans, like public schools and the State Employment Service. The services listed are those mentioned to the authors by the local source of information, and reflect that person's sense of what is available in the community to that refugee community.

The "host community" information provides a quick summary of the size and location of the community, and its unemployment rate. The rate of unemployment (in 1987) is shown, and it is compared to the national average (6.2% that year.)

If a reader wants more information about a specific community a local source of information is noted; in most instances this is an official of the local MAA.

Several abbreviations are used in the profiles, in addition to the familiar MAA (mutual assistance association):

<table>
<thead>
<tr>

Other indicators:

- Number of families who own homes: 5
- Number of Hmong-owned businesses: 0
- Number of current college students: 3
- Number of college graduates: 1

Hmong population trends:

Population has been shrinking in recent years.
Number of new families from overseas since May 1, 1985: three, but they all have left the area.

MAA Status and Refugee Services

No MAA or refugee-specific services

Host Community

Little Rock, the state capital of Arkansas, is a city of 159,000. The general unemployment rate is 7.1%, or a little above the U.S. average.

For more information: Thai Lor, 3121 W. 13th, Little Rock, Ar, 72204, (501) 664 4160 (r)
Hamong Community
(Riverside and San Bernardino Counties)

Number of Families: 130
Number of Individuals: 780
Largest Clans: Yang, Vang, Moua, Lee

Employment:

- Total number of families with workers: 65
- Families with one worker: 50*
- Families with two or more workers: 15

Common jobs for men: machine operator, assembly
Common jobs for women: assembly, sewing

Average hourly wage: men: $5.00, women: $4.75
Average annual income, one-worker families: $10,400**
Average annual income, multi-worker families: $20,280
Number of families with private medical insurance: 20

Welfare utilization

- Number of families on welfare 91

Other indicators

- Number of families who own homes 13
- Number of Hamong-owned businesses 1 (grocery)
- Number of current college students 10
- Number of college graduates 8

Hamong population trends

- Population has been growing slowly.
- Number of new families from overseas since May 1, 1985: 30

MAA Status and Refugee Services

- A funded MAA provides ESL, vocational training and employment services.

Host Community

- Banning is a community of 14,000 in the desert some 90 miles east of Los Angeles. The unemployment rate for the Riverside-San Bernardino labor market is 5.6%, less than the U.S. average.

For more information: Hai Lee, Executive Director, Lao Family Community, Inc., Suite F, 22700 Alessandro Blvd., Moreno Valley, California, 92388, (714) 653 1181 (o)

* about half of these are part-time workers, who probably are in cash-assistance families.

** for those working full time.
Hmong Community 
Rureka, California 
(Humboldt County)

Number of Families: 75
Number of Individuals: 700
Largest Clans: Thao, Her, Yang, Vang

Employment:

Total number of families with workers: 6 - 12*
Families with one worker: 6 - 12
Families with two or more workers: 0

Common jobs for men: car washer
Common jobs for women: clerk
Average annual income, one-worker families: n.d.
Average annual income, multi-worker families: n.d.
Number of families with private medical insurance: 0

Welfare utilization

Number of families on welfare 75

Other indicators

Number of families who own homes 0
Number of Hmong-owned businesses 0
Number of current college students 25
Number of college graduates 0

Hmong population trends

Population has been growing rapidly since Hmong community was founded in 1985.
Number of new families from overseas since May 1, 1985: 5

MAA Status and Refugee Services

No MAA and no refugee-specific services

Host Community

Eureka is a city of 24,000 on the Pacific Ocean, some 250 miles north of San Francisco. It is in a lumbering area in which the general unemployment rate is 7.5%, which is above the U.S. average.

* The employed Hmong are all below the age of 25; there appear to be 6 - 12 young men employed by car dealers as car washers, and during the summer three Hmong teenagers (one woman and two men) worked in a summer program for the County Welfare Department. None of this employment, apparently, has eliminated any families from the cash assistance rolls, though it does decrease the amount of Food Stamps payments.
Hmong Community 
Fresno, California  
(Fresno County)

Number of Families: 4,200
Number of Individuals: 24,000
Largest clans: Vang, Her, Yang

Employment:

Total number of families with workers: 1,357
Families with one worker: 392
Families with two or more workers: 965
Common jobs for men: human services, laborer; cook, farm labor; assembly, janitorial
Common jobs for women: human services, service work; restaurants, hotels; clerical work, teaches aide
Average hourly wage: men: $5.00, women: $4.85
Average annual income, one-worker families: $10,400
Average annual income, multi-worker families: $20,488
Number of families with private medical insurance: 1,065

Welfare utilization

Number of families on welfare 2,843

Other indicators

Number of families who own homes 250
Number of Hmong-owned businesses 37
Number of current college students 350
Number of college graduates 66

Hmong population trends

Population has been growing slowly. Number of new families from overseas since May 1, 1985: 350

MAA Status and Refugee Services

Funded MAA provides resettlement, immigration, employment, vocational ESL, vocational training, health promotion, legal assistance and social services.

Host Community

Fresno is the principal city (of 217,000 population) of Fresno County, which is the nation's most productive farming county; it lies some 200 miles north and west of Los Angeles. The general unemployment rate is 10.7%, or well above the U.S. average.

For more information: Tony Vang, Executive Director, Lao Family Community, Inc., 3121 E. Olive Ave., Fresno, California, 93702, (209) 264 4080 (o) See list of other Fresno Hmong organizations on the next page.
More information on Fresno

Other organizations active in Fresno include the following:

Hmong National Council, President, Neng Zoua Vang, Executive Director, Pheng Vue, 3224 E. Mayfair Blvd, Fresno, CA, 93703, (209) 237 6647

Hmong-American Women's Organization, President, Mrs. Ch'ng Yang, c/o of Lao Family Community (LFC), address and phone on previous page

Lao Hmong Family Relief Association, President, Nao Lee Xiong, Apt. 101, 540 N. Fisher, Fresno, CA, 93702, (209) 237 6234; this is a sunshine society

Lao Ethnic Association, President, Paul T. Moua, 3233 E. Mayfair Blvd., Fresno, CA, 93703, (209) 233 6528

Hmong Student Club, Fresno City College, President, Neng Her, 1101 E. University Ave., Fresno, CA, 93704 (no phone)

**MAA Status and Refugee Services**

- Funded MAA provides employment and central intake unit services; Modesto Junior College provides ESL and vocational training.

**Host Community**

- Modesto is a fast-growing city of more than 100,000 about halfway between Fresno and Sacramento in the Central Valley of California; there are farms and factories in the area. The general unemployment rate is 12.1%, or about twice the U.S. average.

**For more information:** Moua Thao, Project Director, Lao Family Community, Inc., 142 N 9th St., # 9, Modesto, CA, 95350, (209) 572 1244 (o)

*Two groceries and a used car dealer*
Hmong Community
Redding, California
(Shasta County)

Includes: Red Bluff

Number of families: 38
Number of individuals: 298
Largest clans: Thao, Xiong, Lee, Yang

Employment: (there is limited employment data available; the two working families mutually own and operate a restaurant)

- Total number of families with workers: 2
- Families with one worker: 0
- Families with two or more workers: 2

- Common jobs for men: restaurant work
- Common jobs for women: restaurant work
- Average annual income, one-worker families: n.d.
- Average annual income, multi-worker families: n.d.
- Number of families with private medical insurance: n.d.

Welfare utilization

- Number of families on welfare: 36

Other indicators

- Number of families who own homes: 0
- Number of Hmong-owned businesses: 1 (restaurant)
- Number of current college students: 2*
- Number of college graduates: 0

Population trends

The Hmong population has been growing since the community was founded in 1985. New families from overseas since May 1, 1985: 1

MAA Status and Refugee Services

ESL is provided by the community college; it is not clear to what extent other refugee services are available; there is no MAA.

Host Community

Redding is a fast growing community of 42,000 some 200 miles north of San Francisco, in a rural region. The general unemployment rate is 9.3%, which is much more than the national average.

For more information: Nhia Vang Thao, 4012 Oasis Rd., Redding, CA 96003 (916) 244 0521 (r)

* in addition, there are 15 adults in an ESL program provided by the community college.
**Hmong Community**  
*Sacramento, California*  
(Sacramento County)

**Number of Families:** 678

**Number of Individuals:** 5,000 *

**Largest Clans:** Yang, Vang, Khang, Vue, Thao

**Employment:**
- Total number of families with workers: 220
- Families with one worker: 110
- Families with two or more workers: 110
- Common jobs for men: landscaping  
  teacher's aide
- Common jobs for women: nursery labor  
  janitor
- Average hourly wage: men: $5.50  
  women: $4.25
- Average annual income, one-worker families: $11,440
- Average annual income, multi-worker families: $20,280
- Number of families with private medical insurance: 100

**Welfare utilization**
- Number of families on welfare: 475

**Other indicators**
- Number of families who own homes: 35
- Number of Hmong-owned businesses: 1 (grocery)
- Number of current college students: 150
- Number of college graduates: 10

**Hmong population trends**

Population has been growing. Number of new families from overseas since May 1, 1985: approximately 25

**MAA Status and Refugee Services**

Refugee services are provided by the funded MAA and other local agencies, such as the County Department of Social Services, Catholic and Lutheran agencies and IRC.

**Host Community**

Sacramento, a city of 275,000, is located in the Central Valley of California (a farming region) about 80 miles north and east of San Francisco. It is the state capital. The general unemployment rate is 6.0%, just about the U.S. average.

**For more information:** Yia B. Yang, Executive Director, Lao Family Community, 5840 Franklin Blvd., Sacramento, CA 95824  
(916) 424 0864 (o).

* other estimates for the Hmong population were, 3,500, 6,000, and 7,000. In September, 1986, the local Human Resources agency counted 2,902 Hmong individuals on the case assistance rolls; this is not inconsistent with the estimate of 475 current cases.
Hmong Community
(San Diego County)

San Diego, California

Includes: El Cajon

Number of Families: 333
Number of Individuals: 2,500
Largest Clans: Yang, Vue, Vang, Lee

Employment:

- Total number of families with workers: 130
- Families with one worker: 50*
- Families with two or more workers: 80

Common jobs for men:
- human services
- assembly
- electronic technician

Common jobs for women:
- assembly
- sewing
- human services

Average hourly wage:
- men: $8.00
- women: $5.00

Average annual income:
- one-worker families: $16,640
- multi-worker families: $27,040

Number of families with private medical insurance: 80

Welfare utilization

- Number of families on welfare: 210 (1,185 individuals)

Other indicators

- Number of families who own homes: 12
- Number of Hmong-owned businesses: 1 (grocery)
- Number of current college students: 15
- Number of college graduates: 3

Hmong population trends

- Population has been shrinking.
- Number of new families from overseas since May 1, 1985: 80

MAA Status and Refugee Services

- Funded MAA provides employment, social and vocational training services, and work orientation.

Host Community

- San Diego, a city of 875,000 is on the Pacific Ocean near the Mexican border; it relies on tourists, industry and the Navy base to support its economy. The general unemployment rate is 4.5%, or well below the U.S. average.

For more information: Chu Yang, Indochinese Mutual Assistance Association, 5511 El Cajon Blvd., San Diego, CA, 92115 (619) 583 9811 (o).

* 20-25% of those with jobs work part time, and some of these workers continue to receive cash assistance.
Hmong Community
Santa Ana, California (Orange County)
Includes: Garden Grove, Huntington Beach, Westminster, Fountain Valley

Number of Families: 500

MAA Status and Refugee Services

A variety of placement and social services are provided by the funded MAA, including relocation assistance under the Planned Secondary Resettlement (PSR) program. PSR helps eligible refugees (those unemployed and/or on welfare) move, finds them housing (and helps pay for it at first), and finds jobs. It is one of five agencies providing PSR services in the nation.

Host Community

Most of the Hmong live in Decatur and Stone Mountain, east of downtown Atlanta. That fast-growing metropolitan area has a wide range of economic activities, services, manufacturing and corporate headquarters. Its general unemployment rate, 4.6%, is well below the U.S. average.

For more information:  Siong Koua Vangchiasong, Executive Director, Lao Family Community Assn., 4336 Covington Hwy., Suite 103, Decatur, GA, 30035, (404) 288 4381 (o)

**Hmong population trends**

This community was founded in 1987. Most residents work for a boot factory, owned by McRae Industries. No families have come to the area from overseas. McRae reimburses new families of workers for actual moving expenses (up to $500), provides free housing for three months, and then helps families buy a mobile home on a tract of land.

**MAA Status and Refugee Services**

There currently is no MAA in the area and what services are provided are those offered by other Hmong, as volunteers.

**Host Community**

Mt. Gilead is a town of less than 2,000 people, about 50 miles east of Charlotte, N.C. The general unemployment rate in the area is 4.1%, which is less than the U.S. average.

MAA Status and Refugee Services

Milwaukee is one of the rare cities in which there is more than one funded Hmong MAA. See the next page for the names of these agencies and the services available to refugees in this city.

Host Community

Milwaukee, the largest city in Wisconsin, had 717,000 people in 1980. It is on Lake Michigan about 120 miles north of Chicago, and is a manufacturing center. The general unemployment rate is 5.3 %, a little less than the U.S. average.

For more information: contact MAAs listed on the next page.

* This is an MAA estimate; the authors found 212 (not 300) Hmong names on a printout of cash assistance cases for the County in May, 1988.
Additional Information on Milwaukee

Services Available

Several organizations provide services to refugees in this city. Resettlement of refugees as they first arrive is provided by the Catholic and Lutheran agencies and by the International Institute, among others. (The latter also provides naturalization courses.) As in other Wisconsin cities, the state-supported technical colleges provide vocational training to refugees.

Social services, including outreach, transportation, translation and other services are provided by the two agencies listed below.

MAA Status and Refugee Services

The funded MAA provides a wide variety of refugee services, including a special program for the elderly; ESL is available and vocational training is provided by Lakeshore Technical Institute.

Host Community

Sheboygan is a city of 50,000 on Lake Michigan, some 60 miles north of Milwaukee. There are factories in the city, and farms surrounding the city. The general unemployment rate is 5.3%, a little less than the U.S. average.

For more information: Song Yang, Executive Director, Sheboygan Hmong MAA, 901 Superior Ave., Sheboygan, WI, 53081 (414) 458 0808 (o) or (414) 459 7651 (r)

* About 10% of the women's jobs are part-time
The Smaller Hmong Communities in Wisconsin

Number of Families: 108
Number of Individuals: 647
Largest Clans: n.a.

In addition to the twelve medium-sized to large Hmong communities described on the previous pages the Wisconsin State Refugee Coordinator's office reports that smaller groups of Hmong (and other former residents of Laos) are located in 21 other Wisconsin counties. The number of Hmong refugees known to the Coordinator's office are as follows:

<table>
<thead>
<tr>
<th>County</th>
<th>Population</th>
</tr>
</thead>
<tbody>
<tr>
<td>Washington</td>
<td>116</td>
</tr>
<tr>
<td>Dunn</td>
<td>91</td>
</tr>

</tr>
<tr>
<td>Green</td>
<td>22</td>
</tr>
<tr>
<td>Jefferson</td>
<td>22</td>
</tr>
<tr>
<td>Chippewa</td>
<td>20</td>
</tr>
<tr>
<td>Eleven other counties</td>
<td>134 *</td>
</tr>
<tr>
<td>Total of these counties</td>
<td>647</td>
</tr>
</tbody>
</table>

* The number of refugees in each these eleven counties ranges from three to nineteen; some are Hmong and some are Lowland Lao.

Note: Assuming that the incidence of welfare utilization in these 21 counties is about the same as elsewhere in Wisconsin, C7A estimates that 78 of the 108 families are receiving cash assistance.

Number of families who own homes 0
Number of Iu Mien-owned businesses 0
Number of current college students 1
Number of college graduates 0

Population trends The Iu Mien population has been growing.
Number of new families from overseas since May 1, 1985: not known; it is estimated that 20 families have arrived during 1988.

MAA Status and Refugee Services Refugee services are provided by Lao Family community, which has an Iu Mien staff member, and by a local Mien church and the Iu Mien Community Temple.

Host Community Merced is a city of 36,000 some 60 miles north and west of Fresno. There are both farms and factories nearby. The general unemployment rate is 11%, above the U.S. average.

For more information: Lao Family Community, 855 W 15th St., Merced, CA, 95340, (209) 384 7384 (o); Kaoseng Saechao, Chair, Iu Mien Community Temple, 741 M. St., Merced CA, 95340, (209) 723 3346 (r), or Saengwang Saelee, 264 E 11th St., Merced, CA, 95340, (209) 723 6534 (r).

* There were different estimates of the number of families; the County social services agency had 159 Iu Mien cash assistance cases; LFC said that there were 117 families, and other sources said 150 families. We used LFC’s 6.7 persons per family to estimate the total population. There are also some 20 Iu Mien families in Fresno on whom we have no detailed information.
** Although there are 15 workers, mostly young males, apparently they belong to families on cash assistance.
**Iu Mien Community**

Sacramento, California  
Includes: North Highland  
(Sacramento County)

**Number of Families:** 188

**Number of Individuals:** 1,500

**Largest Clans:**

Saechao, Saephan, Saelee

**Employment:**

(Employment information is incomplete)

- Total number of families with workers: 15

* Few, if any, Iu Mien women work in this community
Iu Mien Community Portland, Oregon (Multnomah County) Includes: Aloha Hillsboro Salem

Number of Families: 200
Number of Individuals: 1,500
Largest Clans: n.a.

Employment:

| Total number of families with workers: | 130 |
| Families with one worker: | 31 |
| Families with two or more workers: | 99 |

Common jobs for men: factory work assembly
nursery work machine shop

Common jobs for women: electronic assembly sewing

Average hourly wage: men: $6.00 women: $5.00
Average annual income, one-worker families: $12,480
Average annual income, multi-worker families: $22,880
Number of families with private medical insurance: 92

Welfare utilization

Number of families on welfare 70

Other indicators

Number of families who own homes 66
Number of Iu Mien-owned businesses 1 (restaurant)
Number of current college students 30
Number of college graduates 10

Population trends

The Iu Mien population has declined substantially since 1980. Number of new families from overseas since May 1, 1985: 80

MAA Status and Refugee Services

Refugee services, such as ESL and vocational training, are provided by several voluntary agencies, including the International Refugee Services Center. There is an Iu Mien MAA but it apparently is not funded.

Host Community

Portland, the principal city in Oregon, has 370,000 population and is in the north-west corner of the state. The general unemployment rate is 5.3%, which is less than the U.S. average.

For more information: Sanseng Saephan, President, Yiu-Mien Association of Oregon, 3105 NE 108th Ave., Portland, OR, 97220 (503) 252 8709 (o)
Iu Mien Community

Seattle, Washington
(King County)

Note: The two Iu Mien communities in this city asked to be listed separately; the community in this profile consists of people from the southern part of Laos, who follow the traditional religion.

Number of Families: 75
Number of Individuals: 278
Largest Clans: n.a.

Employment:
Total number of families with workers: 30
Families with one worker: 10
Families with two or more workers: 20
Common jobs for men: service work maintenance
Common jobs for women: housekeeping sewing
Average hourly wage: men: $4.50 women: $4.50
Average annual income, one-worker families: $9,360
Average annual income, multi-worker families: $18,720
Number of families with private medical insurance: 12

Welfare utilization
Number of families on welfare 45

Other indicators
Number of families who own homes 5
Number of Iu Mien-owned businesses 0
Number of current college students 0
Number of college graduates 0

Population trends
The Iu Mien population has declined sharply in recent years. Number of new families from overseas since May 1, 1985: 50 - 60 but many of these subsequently left for California.

MAA Status and Refugee Services
When asked about provision of refugee services this group named the community temple, (address shown below). Refugee services are also provided by voluntary agencies in the area.

Host Community
Seattle, a city of 494,000 is in the north west corner of the state, and is located on an arm of the Pacific Ocean. The general unemployment rate is 6.1%, roughly the U.S. average.

For more information: Saeng Ching Saepheurn, President, Mien Community Temple, 2811 19th Ave. S, Seattle, WA 98144 (206) 322 9267 (r)
As indicated on the previous page, the two Iu Mien communities in this city asked to be listed separately. This profile covers people from the northern part of Laos, a Christian group.

Number of Families: 77
Number of Individuals: 478
Largest Clans: n.a.

Employment:

- Total number of families with workers: 57
- Families with one worker: 20
- Families with two or more workers: 37
- Common jobs for men: teacher’s aide, maintenance services
- Common jobs for women: nurse’s aide, services
- Average hourly wage: men: $6.00, women: $5.50
- Average annual income, one-worker families: $12,480
- Average annual income, multi-worker families: $23,920
- Number of families with private medical insurance: 31

Welfare utilization

- Number of families on welfare: 20

Other indicators

- Number of families who own homes: 19
- Number of Iu Mien-owned businesses: 2 (laundry, restaurant)
- Number of current college students: 6
- Number of college graduates: 0

Population trends

The Iu Mien population has been declining. Number of new families from overseas since May 1, 1985: 15

MAA Status and Refugee Services

This community is served by an unfunded MAA, and other refugee services, such as ESL and vocational training, are provided by voluntary agencies.

Host Community

Seattle, a city of 494,000 is in the north west corner of the state, and is located on an arm of the Pacific Ocean. The general unemployment rate is 6.1%, roughly the U.S. average.

- **Average annual income, multi-worker families:** $23,920  
- **Number of families with private medical insurance:** 23

#### Welfare utilization
- **Number of families on welfare:** 0 (one individual on SSI)

#### Other indicators
- **Number of families who own homes:** 0  
- **Number of Lao Lue-owned businesses:** 0  
- **Number of current college students:** 0  
- **Number of college graduates:** 0

#### Population trends
The Lao Lue population has been growing. Number of new families from overseas since May 1, 1985: 3. There may also be Lao Lue communities in the San Francisco Bay area and in Colorado but we could secure no detailed information on them. There are 17-20 Lao Lue living in Rochester, Minnesota; that community consists of four two-worker families, their children, and two older people.

#### MAA Status and Refugee Services
A variety of placement and social services are provided to Lao Lue and other refugees by the Hmong American Planning and Development Center of Grand Prairie, Texas, including relocation assistance under the Planned Secondary Resettlement (PSR) program. PSR helps eligible refugees (those unemployed and/or on welfare) move, finds them housing (and helps pay for it at first), and finds jobs. It is one of the five agencies offering PSR services in the nation. There is no Lao Lue MAA.

**Host Community and For more information:** See these sections of the profiles of Hmong and Khmu communities in Dallas-Fort Worth earlier in this document.
