This program is designed to teach students the concept of personal responsibility and its relationship to successful behavior. It is based on the assumption that a systematic presentation of the concepts and skills of personal responsibility will improve individual conduct and have a positive effect on school climate. The program is organized into 180 daily lessons associated with the social studies curriculum. Each lesson is taught to the entire class and should take 10 minutes or less. The lessons have been developed for systematic presentation. The introductory lessons build the concepts and awareness of school and classroom codes of behavior. Some of these lessons are followed by enhancement activities that reinforce the skills necessary for success. (DB)

INTRODUCTION

How To Be Successful In Less Than Ten Minutes A Day is based on the assumption that a systematic presentation of the concepts and skills of personal responsibility will improve individual conduct and have a positive effect on school climate. The program is organized into 180 daily lessons. Each lesson is to be taught to the entire class and should take ten minutes or less. The lessons have been developed for systematic presentation. The introductory lessons build the concepts and awareness of school and classroom codes of successful behavior. Some of these lessons are followed by enhancement activities that reinforce the skills necessary for success.

WHEN SHOULD THE PROGRAM BE TAUGHT?

The best time for How To Be Successful to be presented is during homeroom, record room, or advisory period. However, in schools that do not have a period set aside for homeroom, the staff can designate ten minutes at the beginning of a specific period or subject to be used for this instruction.

HOW DO STUDENTS LEARN TO BE SUCCESSFUL?

Learning to be a successful and productive citizen should not be left to chance. In the complex society youngsters face today, there are many competing elements that form the personality, values, attitudes, and behavior of individuals. Children's perception of the world, their views of right and wrong, their acceptance or rejection of responsibility for their own behavior, respect for self and others, and their skills for setting goals for the future are all affected by the media, role models, peers, teachers, family and community. Unfortunately, much of what today's youth learn about ethically responsible behavior is learned by chance rather than through systematic instruction.

DOES SYSTEMATIC INSTRUCTION IN ATTITUDES PRODUCE RESULTS?

Yes! For example, one of the ways teenagers develop their views of the consequences of violence is through television. There is ample evidence to suggest that the more television they watch, the less sensitive they are to the consequences of using violence as a problem-solving technique. Yet, if children who see significant amounts of violence on television are also given systematic instruction in the effects of violence, there is a corresponding increase in their understanding of the consequences of violent behavior. Systematic instruction in attitudes does work.
WHAT ELEMENTS OF SUCCESSFUL BEHAVIOR DOES THE PROGRAM TEACH?

One of the fundamental objectives of How To Be Successful is to teach, in a systematic manner, the concepts of personal responsibility and its relationship to successful behavior. This objective corresponds to the two essential characteristics found in all truly successful human beings -- sound ethical principles and a strong self-concept. Properly defined, ethical principles are the practical foundation of success because they are consistent with our basic needs. Since we are not successful in isolation, but are successful only in our contribution to others, a sound code of ethics is essential for the success of individuals and society. Finally, the program teaches students how to develop a strong self-concept which helps them realize that they have the ability to successfully meet the challenges of life.

HOW DOES THE PROGRAM AFFECT SCHOOL CLIMATE?

In addition to the focus on teaching students the important concepts and skills of personal responsibility, How To Be Successful has a second, yet equally important, function. By involving the entire student population in the systematic teaching of these 180 lessons, the entire school community develops an awareness of responsibilities to others and school-wide positive attitudes which lead to success-oriented behavior.

WHAT IS THE ROLE OF LANGUAGE IN BECOMING SUCCESSFUL?

Vocabulary development is a primary ingredient in the learning of any discipline. To successfully learn mathematics, one must first understand the vocabulary of mathematics. This is true of the sciences, computer programming, sports, photography, or any other discipline. It is also true of learning to be a responsible, successful individual. In developing a school atmosphere which operates on the basis of individual and collective responsibility, respect for others, attention to assignments, and success-oriented behavior, there needs to be a school-wide awareness of the vocabulary of responsible behavior. If educators expect children to be responsible, respectful, honest, and successful, then students must be taught the words, concepts, and skills that are common denominators related to these behaviors. How To Be Successful teaches, in a daily systematic manner, the language, concepts, and skills for students to be individually responsible and for the school to collectively reap the benefits of success-oriented behavior.

WHAT IS THE ROLE OF REPETITION IN LEARNING ABOUT SUCCESS?

Prior to 1984 the word "venue" was primarily used in a legal context, and the general population was not aware of the broader meaning of the word. However, following the 1984 Olympic Games in Los Angeles, the word "venue" was understood in a different way. It was the repeated use of the word by the media that changed "venue" from a rather obscure legal term to one known by young and old alike. This program uses the
same principle of learning to teach the words that lead to the concepts of success and, ultimately, to success itself.

WHAT LEARNING MODALITIES DOES THE PROGRAM EMPLOY?

Because students learn in different ways, the lessons have employed many learning modalities. Throughout the year students will be required to discuss, listen, read, write, think critically, and make decisions. Additionally, they will be asked to review and evaluate not only what they have written, but also their level of success with changing or enhancing specific behaviors.

HOW DOES THE PROGRAM EVALUATE STUDENT PROGRESS?

Students will develop a notebook during the program which the teacher will be able to review to evaluate progress. In addition, there are several quiz days throughout the year for students and teachers to use in assessing student retention of the concepts. Other variables of the school climate, such as attendance and discipline referrals, may also be used for evaluation.

WHAT DOES THE SUCCESS OF THE PROGRAM DEPEND UPON?

The How To Be Successful In Less Than Ten Minutes A Day program is simple, basic, and practical. The program is designed so that any student can benefit. Success does not depend upon a specific level of education or intelligence. The benefits received depend, instead, only upon the seriousness with which the program is pursued.

Personal Responsibility
and
Drug Abuse Prevention

"In recent years, myriad concerns by the public about today's youth have begun to merge into a call for renewed attention and response to the building of character and ethical behavior in the schoolchildren of this nation. Increasingly, the consensus is that principles which should be learned from preschool age in the home, the church, and other community institutions as well as the school, are not being adequately transmitted to the younger generation. These concerns have arisen because of a constellation of factors which deserve the serious attention of school boards throughout the country.

TRIGGERING CONDITIONS AND PROBLEMS

Over the last few decades, certain statistics that measure serious problems affecting the nation's youth have shown alarming increases. For example, the life expectancy in the U.S. has improved over the past 75 years for every age group except the 15- to 24-year-old American, whose death rate is higher today than it was twenty years ago. Currently an American teenager commits suicide nearly every ninety minutes. Group or "pact" suicides are an especially disturbing recent phenomenon.

Another warning sign is the steady increase in the use of drugs by high school students through the 1970's. Nearly two-thirds of high school seniors, since 1980, report having used an illicit drug. As recently as 1985, thirteen percent of high school seniors had used cocaine in the past year - the highest level of use ever observed, and more than twice the proportion in 1975. Although American young people may be using fewer drugs now, they nonetheless use more than the young people of any other industrialized nation. The use of alcohol is a particularly critical problem."

Many substance abuse prevention programs provide factual information about drugs and their adverse physical effects on the user. However, the persistent abuse of drugs and alcohol suggests that this approach is not enough. To accomplish the goal of demand reduction, curricula must also include the teaching of attitudes and skills that can be used by youth to say "No" to drugs and alcohol this year, next year and beyond.

Our program provides lessons in the skills and attitudes vital to demand reduction. Some of these are self-esteem, personal responsibility, decision making, understanding peer pressure and perception.

With the appropriate knowledge of the personal, social and physical effects of substance abuse and the skills of personal responsibility, students will be better able to successfully cope with pressures to become involved with drugs and alcohol.
HOW TO BE SUCCESSFUL IN LESS THAN TEN MINUTES A DAY

WHY TEACH PERSONAL RESPONSIBILITY?

People everywhere are concerned about the behavior and attitudes of children. Youth today need a process by which they can make sound decisions, set goals, and learn to become responsible for their actions.

One need only read the newspapers to feel the full impact of the confusion faced by our youth. Some find the pressures of young adult life too difficult and lose hope. They turn to drugs, sex, alcohol, violence, and even suicide.

Learning to be a productive, successful person should not be left to chance. Unfortunately, many of our children learn what they think is appropriate behavior from negative sources. Rather than leave the learning of personal responsibility to chance, this program offers young people an opportunity to systematically develop the concepts and skills used by successful people.

Skills which must be acquired for vocational preparation clearly lie outside the definition of general education as "common learning experiences." However, before we pass over this area too quickly, we should note that the most consistent research findings reveal that the amount of knowledge one acquires in the specific content area is generally unrelated to even marginally acceptable performance in an occupation. These startling findings lead us to ask, "What abilities and traits are viewed as important by industry?"

Representatives from the world of work consistently tell us that the development of specific cognitive skills is only part of a holistic education. In fact, employers rate entry-level job skills below ten other traits as a predictor of job success:

1. Be honest and dependable.
2. Be reliable and punctual.
3. Get along well with people.
4. Cooperate with supervisors.
5. Accept and handle responsibility.
6. Be willing to undergo further job skill training.
7. Think of self as worthy person.
8. Communicate orally and listen effectively.
9. Work with minimum supervision.
10. Solve personal and professional problems.
11. Possess entry-level job skills/knowledge.
12. Read with understanding.
13. Understand required mathematics.

One could reasonably expect vocational or occupational education to prepare a student for the eleventh priority. Perhaps we should look to general education to help develop the other twelve traits and abilities. Nothing intrinsic to general education requires it to be impractical. In fact, Levine (1978) contends that general education might be the best economic value in the long run. Those positive affective behaviors that predict career and life success can and should be developed through the curricula.

THE TWELVE STEPS TO SUCCESS

1. **BE CONFIDENT.** Successful people believe in themselves. They know their actions make a difference in their lives and the lives of others. They work at trusting themselves and others.

2. **BE RESPONSIBLE.** Successful people choose to respond with appropriate behavior and accept the consequences of their actions. They take credit for their successes and learn from their mistakes.

3. **BE HERE.** Successful people go to work regularly. Once there, they are both physically and mentally present. As a student, going to school is your work.

4. **BE ON TIME.** Successful people are prompt. They get to where they are going on time. Others count on them to be on time.

5. **BE FRIENDLY.** Successful people accept the differences of others. They build friendships by helping one another rather than hurting each other. Unsuccessful people destroy by doing physical or spoken violence.

6. **BE POLITE.** Successful people show courtesy. They know that other people help them to be successful, so they treat others with respect. They are polite by waiting their turn, listening when others are talking, and considering the feelings of others.

7. **BE PREPARED.** Successful people have their materials when needed. They keep their tools and supplies in good condition. Successful people plan ahead.

8. **BE A LISTENER.** Successful people listen to instructions and follow directions. Because they listen to what others need, they can cooperate to achieve success.

9. **BE A DOER.** Successful people do their work to the best of their ability. They know the more they do, the more capable they will become. For example, good baseball players become better baseball players because they practice.

10. **BE A TOUGH WORKER.** Successful people keep trying. They keep working toward their goals even when things get difficult.

11. **BE A RISK TAKER.** Successful people have courage and are willing to run the risk of failure. They know that sooner or later they will reach their goals if they keep trying.

12. **BE A GOAL SETTER.** Successful people plan for the future. They use goals as a personal road map to guide them where they want to go. By setting goals, people are able to realize their dreams.

UNIT I
INTRODUCTION

UNIT GOAL: To introduce the How To Be Successful program.

DAY 1: Introduce the program.

DAY 2: Define the word "success." (See Appendix.)

DAY 3: Teach reasons why people want to be successful.
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

DAY 1: I AM SUCCESSFUL.

In order to be successful this year at home, in school, and in life, I will learn about myself and the basic guidelines for success.

II. LESSON: To introduce the How To Be Successful In Less Than Ten Minutes A Day program.

A. Read the notebook entry to the students and have them copy it.

B. Read the following instructions to the class:

Each day this year we are going to spend ten minutes learning about the laws or rules of success. Everything in this world follows certain laws or rules. For example, water flows downhill because that is the law of gravity. "Three strikes and you're out" is the rule in baseball. All of us want to be successful, but many of us have not been taught the laws and rules for becoming a success.

You are going to develop a notebook in class that will be your guide to success. You will record the steps and guidelines to success and other information about yourself and the kinds of successes you want. If you follow the simple steps of this program, you will have the most successful year you have ever had.

Each day you will head your notebook page with a positive statement called an affirmation. Although you will be learning a great deal more about affirmations later in the program, it is important to know that if affirmations are used repeatedly with conviction, they will give you the power to help you make positive changes.

C. Notebooks:

1. Organize an easy method for handing out and collecting notebooks daily.
2. If the school is supplying the notebooks, hand them out and tell the students to put their names on the cover.
3. If students are supplying the notebooks, read the following:

Your homework assignment for tonight is to bring a sturdy notebook with at least 100 sheets of paper to class tomorrow. This is not to be a section of another notebook. You will leave this notebook in the classroom. It will be handed out each day. Make sure you put your name on the cover. Your notebook will be checked periodically.
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

DAY 2: I AM A SUCCESS.

1. SUCCESS is BEING the person I am capable of being.
2. SUCCESS is DEVELOPING my talents and skills.
3. SUCCESS is FULFILLING my dreams.
4. SUCCESS is ACCOMPLISHING my goals.
5. SUCCESS is FEELING good about myself.
6. SUCCESS is LEARNING from my mistakes.

II. REVIEW: Discuss this question/statement with the class.

What will you learn in the How To Be Successful program this year?

III. LESSON: To define the word "success."

A. Read the notebook entry to the students and have them copy it.
B. Have students circle the definition of success they like most and tell why they like it.

IV. ENHANCEMENT ACTIVITY: Skywriting Message

Students will copy and complete the following skywriting message using the definition they circled or a definition they write for themselves.

(Sample skywriting message available in appendix.)

BE A LISTENER as I read the Lee Iacocca story to you in order to BE PREPARED for tomorrow's question about it.

Lee Iacocca, the president of Chrysler Corporation, is the son of Italian immigrants. You have probably seen him doing Chrysler car commercials on television. Because his family was from Italy, he was teased by classmates for being different. His father, however, taught him to love America because of the freedom we have here to become anything we want if we are willing to work for it. When Lee was seven years old, his family lost all its money in the Depression, but his father taught him that the sun always comes out after the storm.

In 1946 Lee got an engineering degree and began working at the Ford Motor Company as a student engineer. He continued to work for Ford for 32 years, including eight years as its president. He was earning $970,000 a year when, all of a sudden, he was fired by Henry Ford.

Iacocca was angry. He had never worked anywhere else. He thought about retiring because he was 54 years old. He decided he could stay angry or turn some of that anger into energy to do something useful. Strong determination and help from his friends encouraged him to live up to his full potential.

In 1978 he took a job with Chrysler, a company on the verge of closing its doors. He was confident that he could save Chrysler. He held meetings, did his homework, made decisions, asked for help from the government and his employees, promised to save 600,000 jobs, and reduced his salary to $1 a year saying that he would do what was needed to be done to save Chrysler.

By 1983 Chrysler showed the best profit report in its history. Unbelievably, Iacocca paid back the government loan guarantees seven years early. When asked for the secret to success, he tells people to get all the education they can, apply themselves, set goals, and make things happen. In other words, be confident—believe in yourself. Know that your actions make a difference.

C. Have students list reasons why they want their friends, parents, and teachers to be good listeners. (Students will share their answers tomorrow.)

IV. ENHANCEMENT ACTIVITY: Mental Math Games

A. I Can Guess The Answer

Think of any number.  15 + 16 = 31  100 + 101 = 201
Add the next highest number to it.  31 + 9 = 40  201 + 9 = 210
Add 9 to the sum.  40 / 2 = 20  210 / 2 = 105
Divide this by 2.  20 - 15 = 5  105 - 100 = 5
Subtract the original number.
(The answer is always 5.)

B. The Magic Age Number

Multiply the number 9 by any other number lower than 9.
Subtract this product from 10 times your age.
If the difference is two digits, add them to find your age.
If the difference is three digits, your age will be the first two digits plus the last digit.

EXEMPLARY:

9 x 5 = 45  9 x 3 = 27
10 x 11(age) = 110  10 x 15(age) = 150
110 - 45 = 65  150 - 27 = 123
6 + 5 = 11  12 + 3 = 15

BE A LISTENER as I read the Wilma Rudolph story to you in order to BE PREPARED for tomorrow's discussion.

Wilma Rudolph weighed only 4 1/2 lbs. and was lucky to survive when she was born in 1940. She caught double pneumonia and scarlet fever at age 4. These illnesses resulted in severe weakness in her legs. Wilma's mother encouraged her by continually telling her, "Never give up." Her mother and 17 family members took turns massaging her legs day and night for many years. Even though her legs could barely carry her at age 11, she pushed herself to play basketball. Shortly afterwards, she grew to love track. Because of her health problems at age 18, Wilma was too ill to compete at Tennessee State College, but she didn't quit the track team. At age 19 she pulled a muscle in an important track meet against a Russian team, but she wouldn't give up. At age 20 she had to have her tonsils removed; however, that didn't keep her down long. She remembered her mother's words: "Never give up."

In 1960 Wilma became known as the fastest woman runner in the world. She was the first U.S. woman to win three gold medals in track and field in the Olympics.

BE A LISTENER as I read the John Goddard story to you in order to BE PREPARED for tomorrow's lesson.

John Goddard made a list of goals for himself in 1940 when he was a young man of 15. This list, 127 items long, contains some very unusual challenges - explore the Nile River, climb Mt. Everest, swim in Lake Victoria, type 50 words a minute, etc. The amazing thing is that he has accomplished 107 of the 127 items.

John Goddard's philosophy has remained that one must not 'regret' living. He believes in not looking back and wishing he had his life to live over again. Still going strong and working toward completion of the 127 items, Goddard is a man who doesn't give up on his plan to reach his goals.

Next, he decided to try track and practiced hard. When the coaches saw how fast he was, they urged him to go out for football, and he listened to their advice. Later in his professional football career, O.J. was the first N.F.L. runner to total over 2,000 yards in one season. He also broke the record for the most touchdowns in one year. He was called the fastest football player ever.

Even though she was a year younger than most of the other students in her high school class, she was one of the top six graduates. She went to college and became a doctor of astrophysics. As one of the few chosen out of the 8,900 applicants for the NASA astronaut training program, she studied very hard and became a pilot. It is easy to think of examples of famous people who are successful because we learn so much about them from television, radio, and magazines. Although we hear a great deal about their successes, we seldom hear about their struggles and failures. This is how we get the idea that success happens by magic. One way to learn about how to be a success is to think about those people in our lives who have struggled, failed, and later succeeded.

After getting a better job, she saved $400 and bought a one-room tortilla factory. She persisted in her day-to-day factory work until she had turned it into a 5 million dollar-a-year business. Later on, she established the first bank to serve the East Los Angeles Mexican-American community. She ignored those who told her she was not qualified and wouldn't make it. How do you think my mother felt years later when she was appointed by the President to be the 34th Treasurer of the United States?

III. LESSON: To introduce a role model who achieved success through use of his imagination.

   A. Have students check yesterday's daily-to-do list and prepare today's.
   B. Read the notebook affirmation to the students and have them copy it.
   C. Read the story of Walt Disney to the class:

   At age 18 Walt Disney formed his own company to produce cartoons. Three years later he was forced to close his doors because he was broke. Walt was not the kind of young man to dwell on failure, so he set up a table in his uncle's garage and started drawing cartoons. He steadily built his second studio until, in less than a year, he had a staff of seven.

   Mr. Disney's first successful cartoon was about a character named Oswald, the Lucky Rabbit. Unfortunately, another cartoonist stole the idea for the lovable rabbit, together with some of Disney's employees. At age 26 Disney was disgusted but not discouraged. He knew he would start over again. He had faith in his own abilities.

   He remembered a mouse he had once tamed when he was younger. He had named the mouse Mortimer. He now used his imagination to dream up a personality for Mortimer, and Mrs. Disney changed the mouse's name to Mickey.

   Mr. Disney said that his plan always began in his imagination and took form step by step with plenty of hard work. That is the clue to the success of Walt Disney - from his cartoons to his films, to his amusement parks, and to his vision of the future at Epcot Center.

"Without the imagination no creative work has ever come to birth."
- Carl Jung, Psychologist-

II. REVIEW: Discuss this question/statement with the class.

What did Mr. Walt Disney say was the secret to his success?

III. LESSON: To teach that use of the imagination increases creativity.

A. Tell the students that their daily-to-do lists are designed to help them accomplish their long term goals. Have the students read over their lifetime goal on Day 74 and their yearly goal on Day 80 before they check yesterday's list and prepare today's.

B. Read the notebook entry to the students and have them copy it.

C. Ask the students what they think the quote from Carl Jung means. (Answer: We should develop our imaginations in order to be more creative.)

D. Read the following story to the class about an invention:

Imagine a feather. It can be any kind of feather. People have been looking at feathers for a long time, but one man used his imagination as he noticed how you can separate the sides of a feather and use your fingers to smooth it out again. His creative thinking about the feather led to an invention that made him a millionaire. Draw a picture of a feather or what you think he invented.

(Answer will be given tomorrow.)
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

DAY 134: I USE MY IMAGINATION TO ACHIEVE SUCCESS.

3. Now change that color to another color.
4. Now change the color again.
5. Write the names of the colors on your paper.
6. Did you see the colors, think about the colors, or have a general sense of the colors?
7. Have students share the colors they imagined.
8. We all have special ways of using our imaginations. It does not matter whether we saw the colors, thought about them, or felt them. Whatever way we imagine is perfect for us.

I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

DAY 135: I RELAX IN ORDER TO BETTER USE MY IMAGINATION.

"I'll do all right as a hitter as long as I don't get outside myself." -Wally Joyner of the Angeles, during his very successful rookie season.

II. REVIEW: Discuss this question/statement with the class.

Refer back to Day 80 to reread your yearly goal statement. How are you doing on accomplishing your goal? Use your imagination to picture the success as if it has already happened.

III. LESSON: To teach that relaxation is an important step in using the imagination.

A. Have students check their last to-do list and prepare today's.

B. Read the notebook entry to the students and have them copy it.

C. Ask the students what they think the quote from Wally Joyner means. (Answer: As long as he didn't let things outside himself distract him, he would be a good hitter. Relaxing and concentrating on what he was doing each moment would keep him inside himself.)

D. Read to the students:

Relaxing is a form of STOPPING, just like in the STAR process. In order to stop, we pay attention to our breathing because it shifts our awareness from around us to inside us. Baseball and basketball players, dancers, and golfers all concentrate on their breathing to help themselves prepare to successfully complete their activities.

1. Quietly become aware of your breathing. Notice the air as it moves in and out of your body.

2. Do you notice yourself shifting your attention from things outside of you in the room to an increased awareness of yourself? Like Wally Joyner, you are shifting your awareness from "outside yourself" to "inside yourself."
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

1. Yesterday we learned that relaxation is an important step in using your imagination. Let's relax before we begin today. You may close your eyes if you wish. Quietly become aware of your breathing.

2. Today we are going on an imaginary trip to the ice cream store. Picture each step of your trip.

   - Walk to the door of an ice cream store.
   - Open the door and go inside.

There was a little boy who was just plain trouble. He caused problems in school because he had difficulty learning. He failed, and the teacher told his mother that he was stupid. The boy left school when he was seven and never returned. His mother believed in him, however, so she taught him at home. In his teen years he became partially deaf, but never let his deafness defeat him. He said that it just kept him from hearing things that didn't matter and made it easier for him to keep his mind on his work. AND WORK HE DID! The name of this boy is ________.

(Any guesses on this boy's name?)

The boy was Thomas Edison. Edison failed and succeeded many times with inventions. He knew that his failures plus persistence would lead him to success. His motto was

SUCCESS IS 2% INSPIRATION AND 98% PERSPIRATION.

(Did Edison focus on being called "stupid"?)
(Did Edison dwell on the negative side of his hearing loss?)
(Did Edison concentrate on his inventions that failed?)
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

A. Have students check their last to-do list and prepare today’s.

B. Read the notebook affirmation to the students and have them copy it.

C. Read to the students:

All of us have the ability to imagine things that have not yet been completed. Some examples of this ability are the following: the artist who imagines the finished work of art, the writer who imagines the finished book, and the carpenter who imagines the finished cabinet.

Imagine that it is the year 2000, and you have just received a letter addressed to your home, your place of business, or your favorite vacation spot. Picture one of those three right now. You might want to refer back to your lifetime goal on Day 74 for ideas. Tomorrow you will record an imaginary address (on an envelope) of your home, place of business, or favorite vacation spot.

There was a teenage girl who decided to treat her 2 younger brothers to a snack at a fast food restaurant. The teenager told her brothers that they could order one item each. One of the young fellows was hungry and thought he made the wisest choice by ordering a junior hamburger; the other brother loved french fries and thought he was the smartest by ordering a large bag of fries; the teenage girl was thirsty and thought she made the best choice by ordering a large soft drink. All three were very happy with their selections. Each perceived him/herself as being the happiest.

As a successful person, I know it is my responsibility to use as many senses as possible to gain a clear perception of a situation and see all sides of a story. (Remember ACT of the STAR process: I Am Choosing To use as many senses as possible.)

II. REVIEW: Discuss this question/statement with the class.

Think back to yesterday's story about the student who was 20 minutes late arriving home. What do you imagine his father's perception of the tardiness was? Do you think the father used at least two senses, sight and hearing, before he spoke to his child?

What do you imagine the student's perception of the situation was? Do you think the student used at least two senses, sight and hearing, before he made his decision to be late?

What do you imagine Mr. Scone's perception of the situation was? Do you think he used at least two senses, sight and hearing, before he thanked the youth?

III. LESSON: To teach the students that it is their responsibility to use as many senses as possible to gain a clear perception of a situation and see all sides of the story.

A. Have students check their last to-do list and prepare today's.

B. Read the notebook entry to the students and have them copy it.

C. Have the students tell the class how they think the Mr. Scone story ended and/or how they would have liked it to end.

IV. ENHANCEMENT ACTIVITY: Perception Exercise

Students will connect the 9 dots using 4 straight lines. Mention to the students that the reason it is so difficult to do this exercise is because we don't often change our perception of how to draw lines other than in a simple square.
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

B. Read the notebook affirmation to the students and have them copy it.

C. Read the story of Helen Keller to the class:

Helen Keller was blind and deaf from infancy. She could not rely on her senses of sight or hearing to perceive things. She did rely heavily on her senses of touch, taste, and smell in order to form opinions and feelings about her likes and dislikes. She was so perceptive about the world around her that she became an author/lecturer. Helen Keller not only helped herself succeed through the daily use of her senses, but she helped many other blind and deaf people succeed as well through her service on the first State Commission for the Blind.

DAY 157: I HAVE EMPATHY FOR OTHERS.

3. As a witness, you are able to see both sides of the story or "walk in both pairs of their shoes." What is your perception (attitude or feeling) of the situation?

Imagine you have just watched a student help a classmate with a difficult assignment.
1. How do you think the classmate felt?
2. Do you think the student had empathy for the person he/she helped?
3. As a witness, you are able to see both sides of the story or "walk in both pairs of their shoes." What is your perception (attitude or feeling) of the situation?
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

DAY 158: I HAVE EMPATHY FOR OTHERS.

PERCEPTION EXERCISE
(Do not tell the students that you have drawn the 2 lines the same length.)

II. REVIEW: Discuss this question/statement with the class.

Define the word "empathy."

III. LESSON: To reinforce that empathy will give us a clear perception of the world around us.

A. Have students check their last to-do list and prepare today's.

B. Read the notebook entry to the students and have them copy the perception exercise.

C. Read to the students:

Is the A/B line longer or is the C/D line longer?
(Answer: Both lines are the same length, but it is interesting how differently we perceive the things we see.)

D. Read the following empathy exercise to the class:

Think of a person you don't particularly like. Keep the name a secret. Do not write it down. Do not tell anyone the name. Imagine yourself as that person. (Wait 10 seconds.) Think about how you feel as that person. (Wait 10 seconds.) Think about the good qualities you have as that person. (Wait 10 seconds.)

PERCEPTION EXERCISE

(Make sure you draw the center figure carefully.)

I can change my perceptions by changing my goals, values, attitudes, or awareness.

II. **REVIEW:** Discuss this question/statement with the class.

Define the word "empathy."

III. **LESSON:** To teach that perceptions constantly change, we change our goals, values, attitudes, and awareness.

A. Have students check their last to-do list and prepare today's.

B. Read the notebook entry to the students and have them copy the perception exercise.

C. Read to the students:

What do you see? Do you see A B C or 12 13 14? Because we have different perceptions of what we see, some of us will see A B C in an alphabet context and others will see 12 13 14 in a numbering context. Neither group is wrong.

It is easy to change your perception, however, once you have an awareness of new facts. For example, if you perceive yourself as a failure, you can change your attitude and perceive yourself as a success. It's almost as easy as changing your view in today's exercise.
I. NOTEBOOK ENTRY: Write this information on the chalkboard/overhead.

DAY 160: I HAVE A POSITIVE PERCEPTION OF MYSELF AND OTHERS.

A. Have students check their last to-do list and prepare today's.

B. Read the notebook affirmation to the students and have them copy it.

C. Read the story of Margaret Knight, inventor, to the class:

One of the most famous women inventors is Margaret Knight. She designed her first invention at age 12 after witnessing an accident in a cotton textile mill. Margaret, called Mattie, developed a device that would prevent workers from being injured. No one ever suggested that she patent her invention; no one encouraged her to keep inventing.

Later Margaret worked in a factory that produced paper bags. The owners had been attempting, unsuccessfully, to produce a square-bottomed paper bag. Mattie tackled the problem! After many hours of trial and error, she invented a machine to do this job.

Mattie did not have an education, and she encountered a great deal of resentment and jealousy. She persisted, however, because she had a positive perception of her ability to invent. Mattie continued to develop at least 25 other inventions, including a machine to cut shoes and another to make window frames.

He was defeated in 1848. In 1855 he ran for the Senate and lost; he ran again in 1856 and lost. But in 1860 Lincoln ran for President of the United States and won the election.

How many losses did you count for Lincoln? (Answer: 9)
How many victories did you count for Lincoln? (Answer: 3)

Joe quickly dived in, but he could not locate the young man in the dirty water. On Joe's third attempt, he found the young man stuck upright 10 feet below the surface of the water, no longer breathing. Joe thought the young man was dead. A fourteen year old boy named Martin helped the other two get the 185 pound victim out of the water so they could begin CPR.

The three young men are credited with saving the youth's life. They received the state's Award for Bravery and Heroism from the governor of North Carolina. They were also honored by the Boy Scouts of America for unusual heroism in saving a life at considerable risk to themselves.
