This manual is designed to assist the indexers and inputters of the Oregon Index, which is an online index to Oregon's major newspapers and journals. The Index provides dial-up access to a database of citations and is available at hundreds of points around Oregon, including libraries, schools, newspapers, and government offices. The database has been built up by public, state, special and college libraries whose names are listed in this manual. Following the list of participant libraries are a description of the characteristics of index entries; an overview of the 11 "field labels"; the formats of the macros; indexing examples; and anniversary and obituary examples. The next section of the manual describes the standards, recommendations, and formats of the Index for the following areas: the 11 fields; the scope of the indexing; abbreviations; abbreviations in square brackets; acronyms; geographic names; spelling; equipment; creating files; and sending records to the Oregon Index. Five appendixes present lists of the Index's standard abbreviations and acronyms; the state-wide holdings of newspapers listed in the Index and a directory of the newspapers and journals listed; and a "cheat sheet" of some commonly used Library of Congress subject headings. An index to the manual is provided. (MAB)

Index to the Manual 72
Introduction

The Oregon Index began in 1987 as an online index to Oregon's major newspapers and journals. The Index provides dial-up access to a database of citations and is available at hundreds of points around the state, including libraries, schools, newspapers, and government offices. A consortium of Oregon libraries has undertaken to index newspapers and journals for the Index, which is administered from the State Library in Salem. The Index is part of a larger online information system known as OPAC, which is also administered from the State Library. By distributing the task of indexing amongst a range of libraries, the burden of contributing to the building of the Index is spread more evenly throughout the state. In 1989, about a dozen libraries are contributing to the database, and many hundreds of users throughout the state are using this expanding source of current information, which now includes many thousands of citations. This manual is designed to assist the people who are building the database - the indexers and inputters in the participating libraries.

Participant libraries

In 1989, the following public, state, special and college libraries were active participants in building the Oregon Index:

- Astoria Public
- Driftwood, Lincoln City
- Eugene Public
- La Grande Public
- Leno Community College
- Medford Mall Tribune
- Multnomah County
- Newberg Public
- Oregon Historical Society
- Oregon State
- Oregon State University
- Salem Public

These libraries comprise an informal consortium called the Oregon Index Interest Group, which represents the interests and concerns of the indexing libraries, cooperates in establishing standards and procedures, and helps to promote and expand the Index. Anyone interested in further information should contact the Oregon Library Foundation.

Characteristics of entries in the Index

consistency

The manual attempts to provide the indexer and inputter with formats and structures which are consistent. By following the guidelines in the manual, every entry in the Index should look similar in structure, so that users of the system can expect to see information which is familiar and understandable.

completeness

In the same way that a catalog card describes a book, an entry in the Oregon Index should give a complete but concise image of the contents and origin of
the article. The entry will mention the author, title and other bibliographic information about the article, and will also assign subject headings which most accurately reflect what the author is describing.

**relevance**

Conversely, it is important to include only the information which is relevant. Each entry should reflect the essential detail of the article while remaining concise and to the point.

**timeliness**

Many users of the Oregon Index are looking for current information from recent news stories. The manual aims to provide a system which is quick and efficient for indexers to use, so that entries can appear in the database as soon as possible.

**accuracy**

Entries in the Index need to demonstrate a high degree of spelling and factual accuracy in areas such as correct dates, names and places. This enhances the usefulness of the system for the patrons.

### Field labels - an overview

Each entry in the Oregon Index is built around a series of "field labels". The field labels are simply descriptive headings for each element in the article. They provide a framework or skeleton, from which the indexer builds up a complete and consistent description of each item in the Index. By providing this complete and standardized description, the indexer helps the user of the system, much as a good catalog helps the user of a conventional library. There are a total of 12 field labels, although usually only 8-10 are used for any one article. The field labels always appear in the following order:

1. **-HEADLINE-**
   The headline is the title or caption of a newspaper or journal article, usually set in larger type. In the Index, this is the first element in each entry.

2. **-TITLE-**
   The title field is only used for indexing books, and is not used for newspaper or journal articles.

3. **-AUTHOR/AGENCY-**
   The author/agency field describes the person or organization responsible for writing the piece.

4. **-OBITUARIES-**
   Obituaries are a specialized form of newspaper item, noting the death of an individual. The Index provides this field as a means of accessing names of those who have died.
5. **ANNIVERSARIES**

Anniversaries are a specialized form of newspaper item, noting a 50th or greater wedding commemoration.

6. **SOURCE**

The name of the newspaper or journal from which the item is taken. In the specialized case of an item indexed from a book, the source is the publisher.

7. **YR/MO/DA**

This stands for the year, month, and date of the source of the item. The year, month and date are always expressed in this order, and in numerals rather than abbreviations.

8. **CALL/NUMBER**

The call number is any Dewey, LC, SUDOC, ORDOC or other classification number assigned to the source of the item by the local indexing library.

9. **YEAR**

The year of publication of the source.

10. **PAGE**

The complete page number where the item appears in the source. In newspapers, this field also includes section designation and (optionally) the column number.

11. **SUBJECT**

This field includes the Library of Congress and other supplementary subject headings which the indexer assigns to the item.

12. **END**

Every record always includes -END- as the final field label.

**Macros**

The field labels provide the basic skeleton for each record. Most newspaper articles will include only 8 field labels, but this will vary depending on the record and the library. In most cases, the easiest way to enter field labels is to set up macros on the computer used for indexing. Macros will bring up the preset field labels automatically, so that the inputter only needs to add the unique information for each record.

When setting up macros, note the format for each field label: a hyphen, the name of the label in capitals, followed by a second hyphen. There is no spacing between the hyphen and the letters. Although the field labels are capitalized, note that the information entered into each field is in standard upper and lower case letters.
The following are examples of how macros would be set up for the various kinds of entries likely to be encountered while indexing.

For each record use only those field labels which are appropriate, e.g. if there is no author don't include -AUTHOR/AGENCY- in the record. If there is no call/number don't use -CALL/NUMBER- To reiterate: the only field label which must be present in each record is -END-. 
Some examples of indexing

This is a typical example of a newspaper article appropriate for indexing:

Hatfield blamed for timber pressure

Environmentalists say memo shows senator muscling Forest Service

By LANCE ROBERTSON
The Register-Guard

Environmentalists on Monday released a memorandum that they say proves that Sen. Mark Hatfield, R-Ore., has pressured the U.S. Forest Service to make sure it can sell enough timber to meet legislation that Hatfield is sponsoring as a short-term solution to the Northwest log supply crisis.

Hatfield "for years has been asking the Forest Service to produce the volume of timber that it knows it can't produce" on a sustained-yield basis, said Wendell Wood, a spokesman in Eugene for the Oregon Natural Resources Council.

"This agency is supposed to be making a decision based on information from the ground, not based on Hatfield's feeling about what kind of harvest level there should be," he said. "So the memo's been pressed to support Hatfield's pending legislation.

Saltsgiver said the memo was leaked only to urge the Forest Service to be consistent and to tell Hatfield what harvest level is achievable. Although he didn't attend the subsequent meeting between Hatfield and Robertson, Saltsgiver said "there was absolutely no pressure" exerted by Hatfield to force the chief into agreeing to a particular cut level.

Hatfield and Sen. Brock Adams, D-Wash., are sponsoring legislation that would temporarily resolve the region's impending timber supply crisis. The legislation would guarantee a Forest Service harvest level of 8 billion board feet over two years, protect large blocks of old growth timber and free up billions of board feet of timber that's been blocked by environmental lawsuits.

On Sept. 7, a day before Hatfield's meeting with Robertson, new Northwest Regional Forester Jan Butruille said the agency can meet the target level called for in the Hatfield-Adams rider.

The memo demonstrates that Hatfield has been using his influence "to make sure the chief never lets his people be candid again," said James Monteth, executive director of the ONRC.

"He's implied that we can't have any more of this honesty coming out again."

Saltsgiver, Hatfield's aide, said Monday that the memo was written on the evening that Butruille indicated the agency could achieve the 8 billion board foot sales level, so there was no need to pressure the agency.

"After all the flipping around by the Forest Service, the (memo's) recommendation was to try to find out what was achievable, to get something that was consistent from both the region and the chief," Hatfield aide Bill Calder said.

Lea Carey, a spokesman for Robertson in Washington, D.C., said "the chief is committed" to the 8 billion board foot level. Robertson "has staked his sense of commitment" with "Butruille and forest supervisors, but has not pressured other Forest Service managers to keep quiet about the harvest level," Carey said.

"We may not always be comfortable with what surfaces from some of our people in the field, but we are not a monolith," Carey said.

And this is how the indexed article would appear in the Index:

Willamina levy defeat forces layoff of award-winning drug counselor

By Barbara Millikan
The Statesman Journal

WILLAMINA — Protesting parents and an award-winning student drug resistance program did not keep the school board from laying off the district drug and alcohol coordinator Wednesday.

The layoff was part of a package of cuts enacted by the board after voters turned down a $199,200 one-year operating levy. Tuesday's vote dropped the district into the state safety net for the second year in a row, Superintendent Gerry Elstun said.

The safety net allows districts to fall back on previous levies when levy elections fail.

More than 60 people showed up for the school board meeting Wednesday to ask the board to spare the drug counselor.

Board members expressed regret at the cuts but said $200,000 must come out of the budget somewhere.

The board went on to axe programs, teachers, supplies and repairs to reduce the budget to the 1987 level, the year the last levy was approved.

With two exceptions, the reductions were those announced by the board at the beginning of September. After much protest from district residents, the board agreed not to cut the wrestling program. And changing enrollment prompted the board to cut a first-grade teaching position rather than a fourth-grade job.

To remove the $199,200 from the budget, the board:
- Laid off the drug counselor and a teacher.
- Cut eight coaching positions.
- Increased sports user fees.
- Cut more than $50,000 from maintenance and supplies.
Vote sought on trucks hauling garbage in gorge

By MARK KIRCHMEIER
of The Oregonian staff

Historian E. Kimbark MacColl has asked the Oregon Supreme Court to order a regional referendum on garbage truck hauling in the Columbia River Gorge.

The Metropolitan Service District has a $208 million contract to truck Portland-area trash to an Arlington landfill, starting in January. MacColl asked the court to order Secretary of State Barbara Roberts to authorize a referendum on Metro's contract with Jack Gray Transport Inc., Garion, Ind.

The Salem attorney said the 40,449 standard was unconstitution-al because it required more signatures than the Oregon Constitution required for a referendum. Metro opponents gathered 23,000 signatures, in excess of the 16,000 signatures that the constitution requires.

Wasson recently filed a peremptory writ of mandamus on MacColl's behalf. The litigation also asked for dismissal of a preliminary injunction ruling that Metro's action was not referable. Multnomah County Circuit Judge Donald H. Londer issued the injunction last spring at the request of Jack Gray's attorneys.

"I feel that Metro has miserably mishandled this issue by choosing trucks," MacColl said. "There should be means for the public to vote on this," he said. Rena Cusma, Metro executive officer, has maintained that trucking is the least expensive way to transport waste.

Patricia McCaig, Roberts' executive assistant, had no comment on the merits of the MacColl suit. "Our job is to enforce election law," she said, "it's up to the courts to interpret it."

Chester and Hazel Smith

Chester F. and Hazel M. Smith of Salem will celebrate their 70th wedding anniversary Sunday at Carol’s Loving Care Home with other residents, friends and their cousin, Olive O. Laing.

Chester F. Smith and Hazel M. Thomas were married Sept. 10, 1919, in Cleveland, N.D. He was a farmer and she was a schoolteacher. They have lived in Salem since 1933.

-END-
A memorial service was held Sunday for Helen Chase, the wife of a former partner in Chase Gardens and a nurse who pitched in to help ease the shortage of medical personnel during World War II.

Chase, 87, died Thursday. She was born July 28, 1902, in Atha, British Columbia, to Frank and Baltic Wostell. She grew up in Gresham and moved with her family to Eugene in 1922.

She married Merle David Chase on March 19, 1928, in Eugene. That same year, she graduated from Pacific Christian Hospital Nursing School in Eugene. During the shortage of nurses during World War II, she worked at Sacred Heart General Hospital and also volunteered for the American Red Cross.

In the late 1950s, she was a partner in a gift shop in Honolulu with Charles and Edith Brown of Cottage Grove.

Chase was known for having a "terrific sense of humor," which she displayed by telling jokes and making plays on words, said a friend, Leone Jensen of Eugene.

She was a member of the First Baptist Church of Eugene, a past president of the Eugene Business and Professional Women's Club, a member of the Oregon Lewis and Clark Daughters of the American Revolution and a member of the Nydia Temple Daughters of the Nile.

Survivors include two sons, Frank Neil Chase of Redmond and Norman Chase of Eugene; three granddaughters, one grandson and three great-granddaughters.

Burial was at Rest-Haven Memorial Park. England's Eugene Memorial Chapel was in charge of arrangements.
Contents of each field

This section of the manual describes the Project's standards, recommendations and formats for entering information in each field.

1. **-HEADLINE-**

a. Transcribe the headline exactly as it appears, including all the acronyms, abbreviations, or typos. Do not alter it in any way. If a spelling error occurs in the headline, include the corrected version in the subject field. Note: one possible way to indicate an error in a headline is to add the standard term [sic] after the word...this indicates that you are aware of the error, but have nevertheless transcribed the word as it appears.

b. If the article is an editorial, add [Ed] after the headline.

   -HEADLINE-
   Let's support Oregon school funding initiative [Ed]
   -SOURCE-
   The Register Guard
   -YR/MO/DA-
   1988/04/12
   -YEAR-
   1986
   -PAGE-
   2A
   -END-

c. When citing photographs where there is no accompanying story, add [Photo only] after the headline. The level of indexing of photo-only items is entirely a matter for local discretion. See also section 3(e).

d. Include all subtitles or subheadings. Separate headlines from subtitles with a colon and two spaces. Do not capitalize the initial letter of the subtitle unless it is a proper name.

   -HEADLINE-
   Superintendent faces huge task: tackles Linn County funding issues

e. Do not end the headline with a period.

f. Do not indent a second line if it wraps around, e.g.:

   -HEADLINE-
   Governor opens state fair: Goldschmidt realizes boyhood dream of being first to walk down fairway

g. Do not underline any words.
2. **-TITLE-**

This field label is used only for items indexed from books.

3. **-AUTHOR/AGENCY-**

a. Enter the personal or corporate author if one exists.

b. Enter personal names in inverted order: Surname, Given name Middle initial.
   
   e.g. Smith, John A.

c. If there is no middle initial, do not put a period after the given name
   
   e.g. Smith, John

d. For more than one author, list names vertically
   
   e.g. Smith, John
   Brown, Janet L.

   e. If a photograph constitutes the story, or a major part of it, then list the photographer in the -AUTHOR/AGENCY- field. See also sec. 1 (c).

   f. Do not include titles and forms of address in this field
      
      e.g. Goldschmidt, Neil
      
      not Goldschmidt, Gov. Neil

   g. Include nicknames and abbreviated names with discretion.
4. -OBITUARIES-

a. Enter information for the -OBITUARIES- field in the following way:

```
-OBITUARIES-
Anderson, Kiki
Stromdahl, Jeremy
Johnson, Wihemina N.
Tenfjord, Ragnar
-SOURCE-
Oregonian
-YR/MO/YA-
1988/03/31
-YEAR-
1988
-PAGE-
2B, C3-4
-END-
```

b. Enter personal names in inverted order, as in the example.

c. Some obituaries will also include a headline. In these cases, enter the head-line in the -HEADLINE- field.

d. Some libraries choose to add the ages and names of spouses in parentheses or brackets after the names of the deceased.

5. -ANNIVERSARIES-

a. Enter information for the -ANNIVERSARIES- field in the following way:

```
-ANNIVERSARIES-
Johnson, Emily [50th wedding]
Johnson, Paul
Enge, John [60th wedding]
Enge, Signe
-SOURCE-
Statesman Journal
-YR/MO/YA-
1988/06/01
-YEAR-
1988
-PAGE-
1C, C3-4
-END-
```

b. Enter names in inverted order, as in the example.

c. Only 50th or greater anniversaries are noted.

d. Include both names of the anniversary couple.

e. If preferred, names can be listed horizontally rather than vertically.
e.g. Johnson, Bill; Johnson, Emily A. [50th wedding]

f. Add nicknames and shortened names in quote marks after the names.
   e.g. Long, Fred A. "Shorty"

6. **-SOURCE-**

Use the list of names in Appendix D for the correct form of periodical name.

7. **-YR/MO/DA-**

a. Enter year, month and day in that order.

b. Type four characters for the year, and two each for the month and day.
   
   e.g. August 24, 1989 will appear as 1989/08/24.

Note that single-digit months and days will appear as e.g. 08, 02, etc.

c. Only use this field when the information is actually cited on the journal. Often a journal will use volume and issue numbers only - enter these in the -CALL/NUMBER-field.

d. Many Oregon journals and magazines covered by the Index are published at widely differing frequencies: weekly, monthly, quarterly, seasonally, semi-annually, annually, or even biannually. In addition, the frequency is cited on the journal in widely varying ways. The Project recommends the following formats to meet these varying forms of date citation:

weekly: there are two options for entering dates for weeklies

i. enter the entire week covered by the issue

   e.g. YR/MO/DA
   1988/01/07-14 for 7-14 January 1988.

ii. enter the date of first publication

   e.g. YR/MO/DA
   1988/01/07

If the weekly spans the end of one month and the beginning of the next, e.g. July 27-August 3, we recommend the second option.

semi-weekly (every two weeks): the same options as for a weekly
monthly: enter year and month only.

e.g. YR/MO/DA

bi-monthly (every two months): enter year and both months only.

e.g. YR/MO/DA

quarterly (every three months): enter year and three months only.

e.g. YR/MO/DA

seasonally (cited according to the season): enter the abbreviation for the season.

e.g. YR/MO/DA

The other abbreviations are: Wint, Summ, Fall. Note that no periods are used for these abbreviations.

seasons spanning two years

e.g. YR/MO/DA

semi-annually (twice a year): enter the months covered, or enter the month first published.

e.g. YR/MO/DA
1988/01-06 or 1988/01 for January to June 1988

annually: enter the year only.

bi-annually (every two years): enter both years.

8. -CALL/NUMBER-

a. Enter a call number from a classification system such as Dewey, Library of Congress, ORDOCS, SUDOCS etc. in this field, if your library uses these identifiers.
b. If the citation is to a particular issue of a journal, include the volume and number in this field.

9. **-YEAR-**

Enter four characters for the year, e.g. "1988." Include the year in each record, even if you also include the YR/MO/DA. Information for this field can usually be preprogrammed into your computer to be entered automatically.

10. **-PAGE-**

a. Enter the page number (column information is the choice of the indexer). If the article continues on a second page, so indicate, e.g. "1A, C3-4; 6A, C5-6".

b. Enter page information in the following formats:

i. journal article format
   - article on one page
   - 3; 5 article on page 3; continued on page 5
   - 3 - 5 article on pages 3 through 5
   - This format is also used for newspaper articles where columns are not cited.

ii. newspaper article format [columns cited]
   - 1B, C3 - 6 article on page 1 of section B, columns 3 through 6
   - 1B, C3 - 6; 6B, C5 - 6 same as above, except that article is continued on page 6, section B, columns 5 through 6.

11. **-SUBJECT-**

Selecting the appropriate subject headings can be one of the most challenging aspects of indexing. The use of correct and meaningful subject headings can greatly enhance the usefulness of the Index.

a. Examine the document. Much of the essential information is in the lead paragraph and the conclusion.

b. Identify the indexable concepts. Avoid simple word indexing - instead focus on the concept. This is particularly important when the headline is misleading, e.g. "Trout madness " (an article on flyfishing). In some cases a particular concept will be expressed informally in the text of an article, e.g. "Mountain climbing," and more formally in the LC Subject Headings - in this case, "Mountaineering." Use the Library of Congress subject heading.

c. Avoid overindexing.
d. Ask these questions:

Would the searcher be disappointed at the amount of information the document contained on the indexed concept?

Would a searcher interested in a particular concept be satisfied to retrieve this document?

Does a phrase constructed of the subject headings you have selected reflect the content of the article?

e. Index at the level of specificity of the document. Choose the most specific subject possible which adequately describes the article. If it talks about frogs - use the subject heading "Frogs," not "Amphibians."

f. Index at both the general and specific level when the document discusses the concept at both levels ... the item discusses both frogs and amphibians, so index both.

g. Although Library of Congress subject headings are always preferred in the subject field, there are Project "cheat sheet in Appendix E for commonly-used non-LC subject headings. These are especially useful for local political issues, controversies etc. which may not be adequately addressed in the LC headings.

h. Include personal names as subject headings where appropriate. Preferably, enter the full name, including a middle initial...this is particularly important to distinguish between different people with the same first and last names. Add nicknames and shortened names in quotation marks at the end of the entry.

However, the entry of names is very much a matter for the discretion of the indexer. The Index does not have name authority files. Therefore, for frequently appearing names, we recommend you check other entries to see how the name has already been entered; you may well choose to simply follow the prevailing form of the name in the Index, or adapt it as you see fit.

i. Titles of books, plays, exhibits, operas, ships, animals etc. appearing in the -SUBJECT- field should appear as:

-SUBJECT-
A Tale of Two Cities (Book)
The Taming of the Shrew (Play)
Madam Butterfly (Opera)
A Nation of Readers (Exhibit)
Carib Cannibal (Ship)
Lassie (Dog)

j. Articles which are part of a series should be noted in the -SUBJECT- field:

-SUBJECT-
From Japan With Yen (1st of a series of 6) or (1st of a series)

k. Include citations to portraits and illustrations in the subject field. Use [Por] for portrait and [Il] for illustration whenever one or more pictures appear in the article. Por is used for pictures of people. Il is used for pictures of places or things.

For example, an article on Governor Goldschmidt opening the state fair, together with a captioned picture of his cutting the commemorative ribbon, would be cited in the following way:

-HEADLINE-
Governor opens state fair
-AUTHOR/AGENCY-
Easterling, Jerry
-SOURCE-
Statesman Journal
-YR/MO/DA-
1988/07/21
-YEAR-
1988
-PAGE-
1A, C3-6
-SUBJECT-
Oregon State Fair
Goldschmidt, Neil; Goldschmidt, Margie; Goldschmidt, Rebecca [Por]
-END-

In a group portrait, the indexer has the choice of entering the data by:

i. listing the names and separating them by semicolons, followed by [Por], as in the example above

ii. listing each name vertically, each followed by [Por], as in the following example:

-SUBJECT-
Goldschmidt, Neil [Por]
Goldschmidt, Rebecca [Por]

I. Do not include titles of address, honor, or nobility when listing a name in the subject field.

-SUBJECT-
Packwood, Bob
not Packwood, Senator Bob

Exception: do include the title if it is a part of the person's name.

-SUBJECT-
Elizabeth Ann, Sister
Teresa, Mother
Jonathan, Brother
m. The Oregon Index does not generally use Oregon or (Or.) as a qualifier in subject headings, as would normally be found in LC subject headings, e.g.:

Portland
not Portland (Or.)

Fishing
not Fishing. Oregon.

However, do use Oregon when the subject heading is the name of a company or agency, e.g.

Oregon Paper Specialists
Oregon Library Association
Oregon. Dept of Education

n. In line with LC subject headings, the Project recommends that the term United States appear in full in subject headings, rather than U.S., e.g.:

United States. Forest Service
not U.S. Forest Service

United States. Olympic Committee
not U.S. Olympic Committee

o. Note that subject headings and their subdivisions in the Oregon Index are separated by periods, not hyphens as in regular LC format. The reason for this is that hyphens are already used to delimit field labels, and this will confuse the Index software program.

12. -END-

The last element in every entry is the field label -END-. Do not make any further additions to the record in the space after -END-, and always make sure it is present in every record.

Scope of indexing for the Oregon Index

What do you include in the Index? The Index is defined as a subject, biography and current events citation index to information about Oregon and Oregonians. Therefore, our scope is primarily local, county and state news. Some national news stories with a local slant, or which will have local impact, may also be indexed.

Various types of newspaper item are indexed either exhaustively, selectively, or not indexed. Below are some types of news stories, and their degree of indexing. To index exhaustively is to index every occurrence of the
event; to index selectively is to use caution and discrimination about including the item.

a. Advertisements: index very selectively.

b. Anniversaries: index only 50th and above.

c. Awards to youth groups etc.: index selectively - Eagle scouts, Future first citizen etc.

d. Ballot measures, senate and house bills etc: index exhaustively.

e. Business: index selectively - new business enterprises, new presidents etc.

f. Centenarians' birthdays: index exhaustively.

g. Church affairs: index selectively.

h. Local politicians, city and county officers: index selectively.

i. Club meetings and speakers: index very selectively - a person of note or a special occasion.

j. Columns (gardening, politics etc): index very selectively.
   Do not index gossip columns.

l. Editorials: index selectively.

m. Fires, accidents: index selectively.

n. Honor rolls, graduations etc: index selectively. At the very least note the existence of such lists in the subject field.

o. Letters to the editor: index selectively - a person of note or topic of significance.

p. Marriages and engagements: index very selectively; include those conducted under special circumstances.

q. Military news: index selectively.

r. Neighborhoods: index selectively.

s. Obituaries: index exhaustively.
Performing arts: index selectively.

Photographs: index selectively, typically when they are of local interest and/or accompany an article.

School programs: index very selectively.

Sports: index very selectively.

Transportation schedules, timetables: do not index.

Voter registration: do not index.

Weather: index only if especially significant.

**Abbreviations**

1. Use of abbreviations is entirely up to the discretion of the indexer. However, if you do use them, use the abbreviations found in Wilson’s Readers’ Guide as the authority list. There is also an authority list of common Oregon Index abbreviations in Appendix B.

2. Abbreviate state names according to AACR 2 (2nd ed.) Appendix B.14. Note that periods are used in these state abbreviations. Do not use the postal abbreviations.

3. Apart from state names, periods are not used in Oregon Index abbreviations.

Note: Never change the headline

Never abbreviate LC subject headings except as indicated in the LCSH manual

**Abbreviations in square brackets**

A number of useful abbreviations are used in the Index to follow subject headings, authors, and headlines. These include:

1. [Ed] : use at the end of a headline to label an editorial

2. [Por] : use at the end of a subject to denote a picture of a person. Can also be used in other fields where appropriate.

3. [II] : use at the end of a subject or other field to denote a picture of a place or thing.
4. [Proposed]: useful in the subject field to describe any concept which is under consideration, such as legislation, buildings etc.

5. [Comm]: use at the end of a subject or author for a commentary.

6. [Photo only]: use at the end of a headline whenever citing photographs which have no accompanying story.

7. [Guest opinion], [Graph] and [Map] are also useful.

8. If combining two of these elements, use only one set of square brackets, eg. [II, Map]

**Acronyms**

For acronyms, the Project has developed a recommended acronyms list. Use this as the authority list. It is important to use acronyms in preference to full names if the acronym appears on the recommended list. The reason for this is to increase the searchability of the Index. For example, the Oregon Public Employees Union is a name made up of four generic terms, and will cause a large number of false hits when a user searches the Index - bringing up material on public libraries, credit unions etc. In contrast, OPEU is unique. Remember: never change the headline. For the list of recommended acronyms, see Appendix A.

**Geographic names**

If geographic name verification is a problem, use Oregon geographic names by Lewis McArthur as the authority.

**Spelling**

Each participant is responsible for submitting records which are correctly spelled. Spell check each floppy disk with the spelling correction function of your word processing program before submitting it to the Project.

**Equipment**

1. **Hardware**
   1. Macintosh
   2. IBM or IBM Compatible
2. Word processing software

<table>
<thead>
<tr>
<th>SOFTWARE</th>
<th>PRICE</th>
<th>HARDWARE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Microsoft Word (3.01)</td>
<td>$395.00</td>
<td>with Macintosh</td>
</tr>
<tr>
<td>MacWrite (4.6)</td>
<td>$99.00</td>
<td>with Macintosh</td>
</tr>
<tr>
<td>Word Perfect (4.1 or higher)</td>
<td>$495.00</td>
<td>with IBM/MSDOS</td>
</tr>
</tbody>
</table>

Note: MacWrite does not permit the creation of Macro keys. To create Macros, MacWrite must be used in conjunction with "Macro" software, e.g. Tempo @$79.99 and Quick Key @$79.00. Either software package will facilitate the creation of Macros on Microsoft Word also.

3. Discs

We recommend using double-sided, double-density discs. High density discs are not recommended.

4. Telecommunications software

<table>
<thead>
<tr>
<th>SOFTWARE</th>
<th>PRICE</th>
<th>HARDWARE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Red Ryder (10.3)</td>
<td>$65.99</td>
<td>with Macintosh</td>
</tr>
<tr>
<td>MicroPhone II</td>
<td>$125.99</td>
<td>with Macintosh</td>
</tr>
<tr>
<td>Procom Shareware Avail. from OSL</td>
<td>with IBM/MSDOS</td>
<td></td>
</tr>
</tbody>
</table>

Creating files

When creating files for the Oregon Index, it is necessary to save them in the machine-readable language known as ASCII. Follow the procedures below to save your text in ASCII.

1. Microsoft Word - save your records in the following way:

Select SAVE AS from the File Menu.
Select FILE FORMAT: TEXT ONLY WITH LINE BREAKS.

Records in Microsoft Word should be in Courier 12 Point with 7 1/2" margins.

2. Word Perfect 4.1 or 5.0 - save your records in the following way:

Hit Control key and F5 simultaneously.
Menu choices will appear. Choose #1, which is:
- Save current documents as a DOS text file [4.1] or
- Save as DOS text [5.0].

In 4.1, a message will appear: Document to be saved: [name of file].
Hit return.
You will be asked if you want to replace that document; answer yes or no [usually no unless you have made changes to the document].
Program will respond with saving message.

In version 5.0, a menu will appear at the bottom of the screen. Choose #1: save.
Message: Document to be saved (DOS text): [name of file].
Hit return.
Message: Replace [name of file].
Answer yes or no [usually no unless you have made changes to the document].

After records are saved, the program will return to the document screen. Select F7 (exit).

The program will ask you if you want to Save document. Answer NO. If you answer yes, the program will save records in Word Perfect and override the steps you have just taken to save in ASCII. The program will ask if you want to Exit WP. Answer yes or no.

3. MacWrite.

These records will be converted to Microsoft Word files when they are received at the Oregon State Library.

We recommend about 20 days worth of newspapers per disc. This should represent about 10 documents per disc, and about 2 days worth of indexing per document. Be careful not to overfill discs.

**Sending records to the Oregon Index**

When a disc is ready to send to the Index, we recommend the following:

1. always keep a backup

2. label each disc with
   a. the name of your library, and the newspaper or periodical indexed
   b. the dates covered
   c. a running number/identifier of your own choosing

3. include a printoff of your directory with the disc.

4. maintain your own logs of discs sent, dates indexed, dates uploaded etc.

5. mail discs, well protected, to: Oregon Index Project
   State Library Building
   Salem OR 97310

Appendix E: Library of Congress and other subject headings used in the Oregon Index

This list has developed from "cheat sheets" of commonly used subject headings which have been put together in the past to shorten the process of consulting the LC subject headings books. Each of the headings listed here can be used where appropriate, even when they may not be formal LC headings. Many of the headings are peculiar to Oregon, or to local topical events in this state. We encourage indexers to add to this list and to develop additional local lists as new situations become newsworthy in the state.

Key

When two or more subject headings are listed one after the other (without a space between) assign all subject headings given

Field burning
Prescribed burning

<Explanatory text, not a part of subject heading>

(Part of subject heading as assigned in LC)

* May Subd Geog - the geographical subdivision, if assigned, is placed between the subject heading and the subdivision

Electric utilities. Polk County. Rates

<NEW> Subject headings taken from Weekly Subject Heading List from the Library of Congress and the cumulative list from LC Cataloging Service Bulletin...most headings are not in LC 11th edition

Numerical headings

2% kicker

5th Congressional District

14th Senate District <Oregon Legislature>

23rd Legislative District <Oregon Legislature>

911

USE Emergency communication systems <may Subd Geog>
Telephone. Emergency reporting systems
Abandoned children <may Subd Geog>

Abortion. Law and legislation <may Subd Geog>

Accidents. Statistics
Oregon. Officials and employees. Accidents
Work related injuries <Assign to articles about incident rates of state employee on-the-job injuries>

Acquaintance rape <may Subd Geog>

Acquittals <may Subd Geog>

Act of God

Adoption agencies <may Subd Geog>

Adult bookstores
Sex oriented businesses

Adult child sexual abuse victims <may Subd Geog> <NEW>

Adult communities

Adult day care centers
USE Day care centers for the aged <may Subd Geog>

Adult only housing

Advertisement

Advertising, Fraudulent <may Subd Geog>

Aeronautics. Accidents. Date <Year>

Affirmative action programs. Law and legislation <may Subd Geog>

Aged <may Subd Geog>

Agricultural products
USE Farm produce or Produce trade <whichever is appropriate>
<Both of these headings may Subd Geog>

AIDS (Disease). Law and legislation <may Subd Geog>

AIDS (Disease) in pregnancy <may Subd Geog>

AIDS (Disease) in the workplace <OSL 690 field not LC>
AIDS phobia <may Subd Geog>

AIDS vaccines <may Subd Geog> <NEW>

Air pollution
USE Air. Pollution <may Subd Geog>

Air. Pollution, Indoor
USE Indoor air pollution <may Subd Geog>

Airlines <may Subd Geog>

Airlines. Rates. Law and legislation <may Subd Geog> <NEW>

All terrain vehicles <may Subd Geog>

Alternative education
Non-formal education

Animal control programs

Animals, Treatment of. Law and legislation <may Subd Geog>

Anti-crime budget <Governor's budget>

Anti-crime initiative <Denny Smith's initiative>

Anti-smoking movement <may Subd Geog>

Annual reports, Corporate
USE Corporation reports

Aphids
Aphididae

Appeals
Appellate procedure <may Subd Geog>

Arbitration and award <may Subd Geog>

Arraignment <may Subd Geog>

Arrest <may Subd Geog>

Arson investigation <may Subd Geog>

Artificial insemination <may Subd Geog>
Assault
USE Assault and battery <may Subd Geog>

At-risk students
High school dropouts
Socially handicapped youth. Education <if appropriate>

Attorneys-general
USE Attorneys general <may Subd Geog>

Attorneys general's opinions <may Subd Geog>
