Computer Software; Databases; Geriatrics; *Health Education; Medical Libraries; Microcomputers; *Nurses; Online Searching; *Patient Education; Psychology; *Reference Materials; Rehabilitation

This bibliography contains 468 citations to journal articles and monographs on the role of the nurse in educating the patient or care provider for more involved self-care. Self-care is defined as the deliberate, voluntary practice of activities by individuals in the interest of health maintenance and promotion. A variety of National Library of Medicine (NLM) online files from January 1983 through November 1990 were included in the search of the literature (e.g., MEDLINE, AVLINE, BIOETHICSLINE, CANCERLIT, CATLINE, HEALTH, POPLINE, AND TOXLINE). Selected items have been categorized into the following subject areas: (1) Assessment; (2) Education; (3) Geriatrics; (4) Models; (5) Psychology; and (6) Rehabilitation. A citation appears under only one category. Also included in this bibliography is a sample search strategy for the MEDLINE database and a key to understanding the citations. An order blank has been included for GRATEFUL MED, the microcomputer-based software that provides a user-friendly interface to most NLM databases. (MAB)

SERIES NOTE

Current Bibliographies in Medicine (CBM) is a continuation in part of the National Library of Medicine’s Literature Search Series, which ceased in 1987 with No. 87-15. In 1989 it also subsumed the Specialized Bibliography Series. Each bibliography in the new series covers a distinct subject area of biomedicine and is intended to fulfill a current awareness function. Citations are usually derived from searching a variety of online databases. NLM databases utilized include MEDLINE®, AVLINE®, BIOETHICSLINE®, CANCERLIT®, CATLINE®, HEALTH, POPLINE™, and TOXLINE®. The only criterion for the inclusion of a particular published work is its relevance to the topic being presented; the format, ownership, or location of the material is not considered.

Comments and suggestions on this series may be addressed to:

Karen Patrias, Editor

Ordering Information:

Current Bibliographies in Medicine is sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. To order the entire CBM series for the calendar year 1990 (20 bibliographies), send $52.00 ($65.00 foreign) to the Superintendent of Documents citing GPO List ID: CBM90. For your convenience an order blank is given inside the back cover. Orders for individual bibliographies in the series ($2.50, $3.00 foreign) should be sent to the Superintendent of Documents citing the title, CBM number, and the GPO List ID given above.

Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through September 30, 1991.
PATIENT EDUCATION FOR SELF-CARE: THE ROLE OF NURSES

Growing concern with health in the general population has resulted in increasing interest in wellness and self-care. Self-care may be defined as the deliberate, voluntary practice of activities by individuals in the interest of health maintenance and promotion. A learned behavior, self-care focuses on purposeful actions initiated and performed to maintain life, health, and well-being. The concept of self-care includes care of dependent members (infants, ill, aged) of the caregiver’s group, which is specifically referred to as dependent-care.

In nursing practice, the theories of self-care guide the nurse in the assessment of the patient’s self-care demands. Once an assessment has been made, a scheme to enhance self-care activities is designed and implemented. The nurse is guided by theories of self-care to determine whether a self- or dependent-care program is in effect. Ensuring that requirements for care are met is an essential part of providing nursing care.

This bibliography contains citations to journal articles and monographs on the role of the nurse in educating the patient or care provider for more involved self-care. A variety of online files from January 1983 through November 1990 were included in the search of the literature. Selected items have been categorized into six subject areas; a citation appears under only one category.

Thanks are extended to Dr. Doris Bloch and the staff of the National Center for Nursing Research (NCNR) for discussions leading to the selection of this topic.
A variety of online databases are usually searched in preparing bibliographies in the CBM series. To assist you in updating or otherwise manipulating the material in this search, the strategy used for the NLM's MEDLINE database is given below. Please note that the search strategies presented here differ from individual demand searches in that they are generally broadly formulated and irrelevant citations edited out prior to printing.

SS 1 = MODELS, THEORETICAL OR NURSING THEORY
SS 2 = (TW) ALL KING# OR ALL OREM#
SS 3 = SELF CARE OR ACTIVITIES OF DAILY LIVING
SS 4 = PATIENT EDUCATION
SS 5 = 1 OR 2
SS 6 = 3 OR 4
SS 7 = 5 AND 6

GRATEFUL MED®

To make online searching easier and more efficient, the Library offers GRATEFUL MED, microcomputer-based software that provides a user-friendly interface to most NLM databases. This software was specifically developed for health professionals and features multiple choice menus and "fill in the blank" screens for easy search preparation. GRATEFUL MED runs on an IBM PC (or IBM-compatible) with DOS 2.0 or a Macintosh, and requires a Hayes (or Hayes-compatible) modem. It may be purchased from the National Technical Information Service in Springfield, Virginia, for $29.95 (plus $3.00 per order for shipping). For your convenience, an order blank has been enclosed at the back of this bibliography.
SAMPLE CITATIONS

Citations in this bibliographic series are formatted according to the rules established for *Index Medicus*®. Sample journal and monograph citations appear below. For journal articles written in a foreign language, the English translation of the title is placed in brackets; for monographs, the title is given in the original language. In both cases the language of publication is shown by a three letter abbreviation appearing at the end of the citation. Note also that a colon (:) may appear within an author's name or article title. The NLM computer system automatically inserts this symbol in the place of a diacritical mark.

National Library of Medicine
Reference Bibliography Series

- AIDS Bibliography • $48 per year (12 Monthly issues)
  Individual issues $4 per copy
  List ID: AID90
  Previously published quarterly. Each issue consists of about 700-900 recent references to journal articles, books, and audiovisuals on AIDS.

- Current Bibliographies in Medicine • $52 per year (Approx. 20 Titles/yr.)
  Individual issues $3 per copy
  List ID: CBM90
  A continuation of the Library's Literature Search Series, which ended in 1987. Topics will continue to be chosen for their current popular interest in distinct subject areas of biomedicine (excluding AIDS).

*Subscribers receive all issues for a given calendar year without regard to the date of order.
