The reader is cautioned against making generalizations about the equivalence of different versions of a computer-assisted career guidance (CACG) system when substantial content and process changes have been made. Features that were or were not effective in one version of a CACG system may not be retained in revised versions. In situations where CACG system content or process changes have occurred, practitioners need to evaluate the issue of equivalency either through existing research, or at a minimum, conducting a thorough comparison of system features.

This bibliography is organized as follows: Systems, Theoretical Foundations, Evaluation and Research Reports, Program Descriptions, and Supporting Materials.
