A Resource Compendium of Assessment Instruments Which Can Be Used To Help Schools in the Education of LEP Students.

Test instruments designed for limited English proficient (LEP) students from pre-school through adult are reviewed in this annotated bibliography. The assessments cited have been evaluated for reliability, validity, and equity, the latter being an emerging criterion in the process of evaluating assessment instruments. The tests most commonly used in bilingual education environments are represented, but it is noted that there is no 100% reliable instrument that is tailored to individual LEP student needs. The tests are grouped under the following categories: achievement tests (17 tests); language proficiency (23 tests); tests of aptitude, general ability, intelligence or cognitive development (13 tests); vocational, career, and attitudinal inventories (four inventories); and personality inventories (two inventories). Each citation includes a description, author, grade level, administration time, type of administration, language(s) assessed, and publisher. (LB)
A Resource Compendium of Assessment Instruments Which Can Be Used To Help Schools in the Education of LEP Students

Norma C. Iribarren, Ph.D.

Upper Great Lakes Multifunctional Resource Center

Wisconsin Center for Education Research
The School of Education
University of Wisconsin-Madison

1988
PREFACE

The Upper Great Lakes Multifunctional Resource Center (MRC) is funded under contract with the U.S. Department of Education with funds provided by the Office of Bilingual Education and Minority Language Affairs (Contract No. 300860050). Administered by the University of Wisconsin-Madison, the MRC has a threefold mission:

1. the provision of inservice training technical assistance to parents and educational personnel participating in, or preparing to participate in, bilingual education programs or special alternative programs for limited English proficient students. (PL 98-115, Section 741, a, 5).

To this mission have been added two ancillary mission statements. The first is meant to specify the content of the MRC's services; and the second is derived from the MRC's assigned area of specialization:

2. to base Center services upon the interpretation of developing research and practice which, when broadly construed, have implications for the education of LEP students.

3. to provide national and regional leadership in the mathematics and science education of LEP students.

In the process of providing services, the MRC staff must—from time to time—review extant research and other literature on a specific topic. We have all received the request to recommend a test; usually something like: "I need a test." Of course, the standard response and the follow-up technical assistance/training to such a question are focused upon the information needed from that test and the process by which one adapts or selects a test in light of that need. Yet, without a set of candidate tests on which to apply those processes, the client's original need of finding a test will be unmet.
This compendium of commonly used tests represents an effort to provide one possible set for such a review. It will be made available for dissemination through the National Clearinghouse for Bilingual Education (NCBE) and through the Educational Resources Information Clearinghouse (ERIC) system in order that others not duplicate Dr. Norma Iribarren's efforts.

A word on those efforts is in order. This is a compendium of commonly used tests. Producing this compendium entailed drawing upon: the corporate knowledge of the MRC staff, of bilingual project directors, and of previous bibliographies, produced by Vasquez, J. A., Gonzales, S. E., Pearson, M.E., (1980), and Center for Bilingual Education Northwest Regional Educational Laboratory (1978). Selected tests were reviewed and updated for more recent versions or in light of new information. Finally, the tests were classified into broad categories and are described in as nontechnical, yet factual, a manner as possible.

The inclusion or exclusion of a test in this compendium should not be interpreted to indicate endorsement or criticism. Excepting the catalog of ships in Homer's Iliad, biblical genealogies and other similar efforts, most lists exclude more than they include. Missing from here may be recently developed standardized tests which are in use elsewhere. A conscious decision was made to exclude non-standardized assessment procedures such as informal assessments, pragmatic protocol analysis, diagnostic testing and experimental tests for things like higher order thinking. Each of these latter assessment procedures could be used and would be important parts of the overall educational program of LEP students. Each of these alternative methods of assessment should be considered for its own unique purposes.
We would appreciate comments and suggestions for revisions and updates of this list. Please let us know about factual errors, new tests, and the usefulness of this effort. Finally, I would like to thank Dr. Norma Iribarren for her effort in compiling this list and Jeanne Burris Eloranta for helping to edit it.

Walter G. Secada
Director, Upper Great Lakes Multifunctional Resource Center
Wisconsin Center for Education Research, School of Education
University of Wisconsin-Madison

## A. ACHIEVEMENT TESTS

These tests are intended to assess intellectual skills that are important in adult life and provide the basis for more advanced learning. They include a battery of tests and single-skill measures such as: Reading; Writing; Mathematics: Geometry, Algebra; Language and Science.

1. Bilingual Science Test | 3
2. California Achievement Test (CAT), 1970 | 4
3. Comprehensive Test of Basic Skills (CTBS), 1974 | 5
4. Inter-American Series: Test of Reading & Prueba de Lectura | 6
5. Iowa Tests of Basic Skills (ITBS), 1985-86 | 7
6. Kraner Preschool Math Inventory (KPMI), 1982 | 7
7. La Prueba Riverside de Realizacion en Espanol, 1984 | 8
8. New York State Mathematics Test | 9
10. Prueba de Aprovechamiento en Matematicas, 1960 | 10
11. Prueba de Aprovechamiento en Ciencias, 1962 | 11
12. Prueba de Biologia Moderna, 1968 | 12
13. Prueba de Lectura en Espanol, 1968 | 12
15. Reading Comprehension Test, 1961-62 | 14
17. The 3-Rs, Achievement Edition, 1982 | 15
B. LANGUAGE PROFICIENCY

The tests included in this section are excellent instruments for identifying Spanish-Speaking students' English language proficiency. They identify those students who can or cannot participate in English-speaking classrooms and some of them also provide a comparable measure of their communication skills in Spanish.

1. Bahia Oral Language Test (BOLT), 1977
2. Bilingual Syntax Measure (BSM), 1975
3. Bilingual Syntax Measure II (BSMII)
4. Comprehensive English Language Test (CELT)
5. Diagnostic Test for Students of English as a Second Language
6. Degrees of Reading Power
7. Dictation
8. English as a Second Language Placement Test (EPT)
9. English Language Test, 1962
10. Examination in Structure
11. Ilyin Oral Interview Test
12. The John Test, 1976
13. Language Assessment Battery (LAB), 1976
14. Language Assessment Scales (LAS), 1977-78
15. Spanish Assessment of Basic Education (SABE), 1987
16. The Maculaitis Assessment Program, 1982
18. Michigan Test of English Language Proficiency
20. Structure Test English Language (STEL) 34
21. Test of Aural Comprehension 34
22. Test for Auditory Comprehension of Language (TACL), 1973 35
23. The Ber-Sil Spanish Test, 1972-77 36

C. TEST OF APTITUDE, GENERAL ABILITY, INTELLIGENCE OR COGNITIVE DEVELOPMENT

These tests assess students' verbal, quantitative, and nonverbal abilities. They provide some measurement of an individual's cognitive abilities.

1. Test of Ability to Subordinate 37
2. Barranquilla Rapid Survey Intelligence Test (Barsit), 1956-68 37
3. Cartoon Conservation Scales, 1977 38
4. Clerical Aptitude SRA: Short Test of Educational Achievement 39
5. Culture Fair Intelligence Test 40
6. Differential Aptitude Test (DAT) 41
7. Modern Language Aptitude Test (MLAT) and Elementary Modern Language Aptitude Test (EMLAT) 42
8. Prueba Colectiva Puertorriquena de Capacidad Mental, 1958 43
9. Test of General Ability (Inter-American Series) 43
10. Test of General Ability 44
11. Test of General Ability (TOGA) 45
12. Test Puertorriqueno de Habilidad General, 1962 45
13. Wechsler Intelligence Scale for Children (WISC) and Escala de Inteligencia Wechsler (Spanish version), 1974 46
D. INVENTORIES: VOCATIONAL, CAREER, AND ATTITUDINAL

These inventories are designed to survey the various attitudes and competencies that take place in making decisions about vocational goals and career development.

2. Career Maturity Inventory (CMI), 1978
3. Inventario de Intereses Vocacionales, 1954
4. Survey of Study Habits and Attitudes (SSHA)

E. PERSONALITY INVENTORIES:

These inventories can be used for diagnosing students' personality disorders.

1. Cuestionario Sobre Personalidad, 1960
2. Junior Eysenck Personality Inventory (JEPI), 1969-70
This annotated Assessment Bibliography reviews test instruments that are designed for limited-English-proficient (LEP) students from pre-school through adult. The *Ninth Mental Measurements Yearbook* (Mitchell, 1985), Volumes I and II, and *Tests in Print* (Mitchell, 1983) have been extensively and carefully reviewed prior to the compilation of this bibliography. The Buros Yearbook contains test evaluations completed by competent reviewers and technical advisors, Vasquez, J. A., Gonzales, S. E., Pearson, M.E. (1980) and Center for Bilingual Education Northwest Regional Educational Laboratory (1978). The assessments mentioned have been evaluated for: reliability, validity, and equity. Today, test equity is an emerging criterion in the process of evaluating assessment instruments. Numerous tests are presently on trial in courts of law as people plead test-discrimination. Consequently, it is crucial for test users to closely examine test equity, as well as reliability and validity.

The tests most commonly used in bilingual educational environments are represented in this bibliography. However, test administrators should be aware that presently there is no 100% reliable instrument which is tailored to individual LEP students needs. Assessment is a global process, and thus additional techniques can be utilized, such as: interviews; spontaneous conversations; observations; and criterion-referenced or classroom tests. The utilization of these supplementary assessment tools would assist teachers and test users to obtain more reliable and valid assessment information.
Before the final test selection process is completed, test administrators should determine: 1) if their test purpose is the same as the test description; and 2) if the LEP students to be tested are of appropriate age, ethnicity, and language background as intended by the test. Above all, test administrators should be conscious of the test norms and consequently should examine the test for the following biases: racial, ethnic, linguistic, gender, and socioeconomic.

The tests mentioned in this bibliography are written either by commercial publishers or by local school districts. The tests are organized into the following categories:

A. Achievement Tests.
B. Language Proficiency.
C. Test of Aptitude, General Ability, Intelligence or Cognitive Development.
D. Inventories: Vocational, Career, Attitudinal.
E. Personality Inventories

Within each of these categories the tests are arranged alphabetically by title.

Each test entry includes:

1) types of skills measured
2) author(s)
3) grade levels
4) administration time
5) type of administration (individual or group)
6) language(s) assessed
7) publishers and their addresses
A. ACHIEVEMENT TESTS

1. Bilingual Science Test

a. Description:

Designed to measure science achievement, the 5-6 grade test indicates general science knowledge. This test is a research product of the New York City Closed Circuit Television Study. It was funded cooperatively by the NYC Board of Education and the Fund for the Advancement of Education. The 7th grade test assesses chemistry knowledge. The 8th grade test measures advanced general science knowledge. The test items are all multiple-choice. Both tests were produced by the Science-Spanish Research Project of NYC's Bureau of Educational Research. Also available is a report entitled, "Science Instruction in Spanish for Pupils of Spanish-Speaking Background." This report contains the tests and the test results for experimental and control group students.

b. Author: Dr. C. Sanguinetti

c. Grade levels: 5-8

d. Administration time: 40 min.

e. Type of Administration: Groups

f. Languages assessed: English and Spanish

g. Publisher: Curriculum Bureau, Board of Education
131 Livingston Street, Room 610
Brooklyn, NY 11201
2. **California Achievement Tests (CAT), 1970**

a. **Description:**

   Designed to assess student achievement in: reading, mathematics, and language, the CAT contains five levels with A-B-C and D. The batteries at each level measure: vocabulary and reading comprehension; mathematics computation, concepts, and problems; and language mechanics usage, structure, and spelling. There are 318 items in Level II and 343 items in Level III. Students respond by marking separate answer sheets. Answers can be machine or hand scored. The CAT yields: percentile rank; grade equivalent; achievement development; and stamina scores. "Debiased" norms and scoring keys are available. There is a reviewed edition for: Cuban, Mexican-American, Puerto Rican, Chinese, and Navajo ethnic groups.

b. **Authors:** Ernest W. Tiesg and Willis W. Clark, 1977

c. **Grade levels:** K-12.9

   - Level I: Grades K - 2.9
   - Level II: Grades 2 - 4.9
   - Level III: Grades 4 - 6.9
   - Level IV: Grades 6 - 9.9
   - Level V: Grades 9 - 12.9

d. **Administration time:** Varied. Complete battery up to 2 hours 48 minutes.

e. **Type of administration:** Groups

f. **Language assessed:** English

g. **Publisher:** CTB/McGraw-Hill
   Del Monte Research Park
   Monterey, CA 93940
3. **Comprehensive Test of Basic Skills (CTBS), 1974**

a. **Description:**

Consisting of overlapping levels, the CTBS is designed to assess:
pre-reading and reading comprehension skills; language mechanics;
spelling; and mathematics computation, concepts, and applications. Level
A has 168 items, Level B has 174 items, and Level C has 266 items. The
Level I has 337 items; and Level II has 336 items. The items are read
aloud by the test administrator or silently by the students. For Levels
A-C and Level I, students respond by marking in machine or hand-
scorable booklets. Separate answer sheets are available for Levels I-IV.

The target ethnic group recommended is general; however, it has
been reviewed for: Cuban, Mexican-American, and Puerto Rican students.

b. **Author:** CTB/McGraw Hill

c. **Grade levels:** K-12

- Level A: Grades K - 1.3
- Level B: Grades K.6 - 1.9
- Level C: Grades 1.6 - 2.9
- Level I: Grades 2.5 - 4.9
- Level II: Grades 4.5 - 6.9 (reviewed for K-6)
- Level III: Grades 6.5 - 8.9
- Level IV: Grades 8.5 - 12.9
  (Level IV is not available in Spanish.)

d. **Administration time:**

- Levels A and B: 3 hours
- Level C: 3 hours 15 minutes
- Levels I and II: 4 hours
3. **Comprehensive Test of Basic Skills** (continued)

   e. **Type of administration:** Groups

   f. **Languages assessed:** Spanish and English (Level IV is in English only.)

   g. **Publisher:** CTB/McGraw Hill
      Del Monte Research Park
      Monterey, CA 93940

4. **Inter-America Series:** Test of Reading and Prueba de Lectura

   a. **Description:**

      A series of reading tests which have parallel forms in Spanish and English, this test provides pre- and post-test forms which measure the same skills but use different items. It is designed to measure reading achievement.

   b. **Author:** Guidance Testing Associates, San Antonio, TX

   c. **Grade levels:**
      Level 3: Ages 9-11, Grades 4-6
      Level 4: Ages 12-14, Grades 7-9
      Level 5: Ages 15-18, Grades 10-12

   d. **Administration time:**
      Variable for Levels 3 & 4
      Level 5: 52 minutes

   e. **Type of administration:** Group

   f. **Languages assessed:** Spanish and English

   g. **Publisher:** Guidance Testing Associates
      St. Mary's University
      One Camino Santa Maria
      San Antonio, TX 78224
5. Iowa Tests of Basic Skills (ITBS), 1985-86
   a. Description:
      The newest edition of the ITBS, Forms G and H (1985) comprises a
      program to assess student progress in the basic skills. It consists of:
      a) Primary Battery and b) Multilevel Edition Forms G and H, each designed
      for comprehensive measurements of the available in a Basic Battery only.
      Level 5 includes Listening, Word Analysis, Vocabulary, Language, and
      Mathematics. Level 6 includes all the tests of level 5, plus Reading.
   b. Author: A. N. Hieronymus, H. D. Hoover, and E. F. Lindquist
   c. Grade levels: Primary Battery
      Grades K-3. Levels 5-8
      Multilevel and Separate Level Editions
      Grades 3-9. Levels 9-14
   d. Administration time: The Multilevel Edition Complete Battery in 5 hours
      and 20 minutes
   e. Type of administration: Groups
   f. Languages assessed: English
   g. Publisher: The Riverside Publishing Company
      8420 Brym Mawr Avenue
      Chicago, IL 60631

6. Kraner Preschool Math Inventory (KPMI), 1982
   a. Description:
      This inventory is designed to measure the mathematics concepts of
      counting, cardinal numbers, quantities, sequence, positional, directional,
6. **Kraner Preschool Math Inventory** (continued)

and geometry/measurement. The Criterion-Referenced Test (1976) measures only mathematics concepts norm-referenced test (1977) was derived from the original KPMI to measure mathematics and language development: numeral recognition, numeral comprehension, comparisons sequence position, direction, geometry, measurement, and total.

b. **Author:** Robert E. Kraner
c. **Grade level:** Ages 3.0-6.6; 1976 (KPMI Criterion-referenced; no scores)
   Ages 5.6-6.6; 1977 (KPMI Norm-referenced; 8 scores)
d. **Administration time:** Variable
e. **Type of administration:** Individuals or Group
f. **Language assessed:** English
g. **Publisher:** DLM Teaching Resources
   P.O. Box 4000
   One DLM Park
   Allen, TX 75002

---

7. **La Prueba Riverside de Realización en Español**, 1984

a. **Description:**

It is an achievement test for bilingual students. It is designed to measure capitalization (Alphabetic); grammar; language skills; literacy; mathematics; punctuation; quantitative tests; reading; reading comprehension; science; social studies; Spanish; Spanish literacy; spelling; study skills; vocabulary. Skills of children in elementary and secondary level.
7. **La Prueba Riverside de Realización en Español** (continued)
   b. Author: Nancy S. Cote and others
   c. Grade levels: K-9 (Levels 6-14)
   d. Administration time: Approximately 2 hours
   e. Type of administration: Groups
   f. Language assessed: Spanish
   g. Publisher: Riverside Publishing Company  
      8420 Bryn Mawr Avenue  
      Chicago, IL 60631

8. **New York State Mathematics Test**
   a. Description:
      Administered in Spanish and English, the New York State Mathematics Test is designed to measure achievement in mathematics as well as the general effectiveness of a school’s math programs. This instrument can also be used by teachers to help in planning classroom instruction and in evaluating individual student progress.
      Three areas of mathematics are assessed: concepts, computation, and problem solving. In the 3rd grade version, the answers are recorded directly in the test booklet. The 6th and 9th versions have separate answer sheets. A manual contains technical data.
   b. Author: New York State Department of Education
   c. Grade levels: 3, 6, and 9
   d. Administration time: 50-60 minutes
   e. Type of administration: Group
8. **New York State Mathematics Test**

f. Languages assessed: English and Spanish

g. Publisher: New York State Department of Education
   The University of the State of New York
   Albany, NY 12224

9. **Prueba de Algebra Elemental, 1964**

a. Description:

   Designed to measure student knowledge of elemental algebra, this test consists of 65 items and takes about 70 minutes. A separate answer sheet is used.

b. Author: Oficina de Evaluación, Departamento de Instrucción Pública,
   Hato Rey, Puerto Rico

c. Grade levels: Advanced level, Grades 10-12

d. Administration time: Approximately 1 hour 10 minutes

e. Type of administration: Group

f. Languages assessed: Spanish and English

g. Publisher: Oficina de Evaluación
   Departamento de Instrucción Pública
   Hato Rey
   Estado Libre Asociado
   Puerto Rico

10. **Prueba de Aprovechamiento en Matemáticas, 1960**

a. Description:

   Designed to measure mathematical achievement in grades 7-12, this assessment consists of three subtests: General knowledge section-29
10. **Prueba de Aprovechamiento en Matemáticas** (continued)

   items; Basic skills-41 items; and Reasoning-20 items. A separate answer sheet is used.

b. **Author:** Oficina de Evaluación. Departamento de Instrucción Pública, Hato Rey, Puerto Rico

c. **Grade level:** Intermediate level, Grades 7-12

d. **Administration time:** Approximately 1 hour 30 minutes

e. **Type of administration:** Groups

f. **Languages assessed:** English and Spanish

g. **Publisher:** Oficina de Evaluación
   Departamento de Instrucción Pública
   Hato Rey
   Estado Libre Asociado
   Puerto Rico

11. **Prueba de Aprovechamiento en Ciencias,** 1962

a. **Description:**

   Designed to measure science achievement, this instrument contains 150 items. It is appropriate for intermediate level students. A separate answer sheet is utilized.

b. **Author:** Oficina de Evaluación. Departamento de Instrucción Pública, Hato Rey, Puerto Rico

c. **Grade level:** Intermediate level, Grades 7-9

d. **Administration time:** Approximately 1 hour 45 minutes

e. **Type of administration:** Group

f. **Languages assessed:** Spanish and English
11. **Prueba de Aprovechamiento en Ciencias, 1962**

   g. **Publisher:**
      Oficina de Evaluación
      Departamento de Instrucción Pública
      Hato Rey
      Estado Libre Asociado
      Puerto Rico

12. **Prueba de Biología Moderna, 2968**

   a. **Description:**
      
      This test measures the science ability of high school level students.
   
   b. **Author:** Oficina de Evaluación, Departamento de Instrucción Pública,
      Hato Rey, Puerto Rico
   
   c. **Grade level:** Advanced level, Grades 10-12
   
   d. **Administration time:** Approximately 50 minutes
   
   e. **Type of administration:** Groups
   
   f. **Languages assessed:** Spanish and English
   
   g. **Publisher:**
      Oficina de Evaluación
      Departamento de Instrucción Pública
      Hato Rey
      Estado Libre Asociado
      Puerto Rico

13. **Prueba de Lectura en Español, 1968**

   a. **Description:**
      
      Designed to measure reading ability in Spanish, this measurement has
      four levels covering grades 1 to 12. Each level consists of two parts:
      Vocabulary and Comprehension. There are two forms: A and B.
13. **Prueba de Lectura en Español** (continued)

b. **Author:** Oficina de Evaluación, Departamento de Instrucción Pública, Hato Rey, Puerto Rico  
c. **Grade levels:** 1-12  
d. **Administration time:** Approximately 60 minutes  
e. **Type of administration:** Groups  
f. **Language assessed:** Spanish  
g. **Publisher:** Oficina de Evaluación  
   Departamento de Instrucción Pública  
   Hato Rey  
   Estado Libre Asociado  
   Puerto Rico

14. **Prueba de Lectura en Inglés,** 1968

a. **Description:**  
   Designed to assess reading ability in four levels of difficulty for grades 3-12, this test consists of two parts: Vocabulary and reading comprehension. Norms are classified by: sex, grade, and district. Technical data is included.

b. **Author:** Oficina de Evaluación, Departamento de Instrucción Pública.  
   Hato Rey, Puerto Rico  
c. **Grade levels:** 3-12  
d. **Administration time:** Approximately 60 minutes  
e. **Type of administration:** Groups  
f. **Language assessed:** English  
g. **Publisher:** Oficina de Evaluación  
   Departamento de Instrucción Pública  
   Hato Rey  
   Estado Libre Asociado  
   Puerto Rico
15. **Reading Comprehension Test, 1961-62**

a. **Description:**
   Designed to assess reading comprehension, this instrument is appropriate for students in grades 7-9. Students use answer sheets that are separate from the test booklet.

b. **Author:** Oficina de Evaluación, Departamento de Instrucción Pública, Hato Rey, Puerto Rico

c. **Grade level:** Intermediate level, Grades 7-9

d. **Administration time:** Approximately 1 hour 20 minutes

e. **Type of administration:** Groups

f. **Languages assessed:** Spanish and English

g. **Publisher:** Oficina de Evaluación
   Departamento de Instrucción Pública
   Hato Rey
   Estado Libre Asociado
   Puerto Rico

a. **Description:**
   Designed to provide pre-instructional information about student achievement level in basic skills, this instrument involves the student in self-appraisal of his/her learning. It also assists the teacher in the preparation of an instructional program which meets the student's needs. Post-instructional growth is also identified. A Locator Test is used as a screening instrument, and identifies the appropriate student TABE level. The Locator Test helps the teacher determine the level of TABE-76 that is likely to yield the most useful information about the achievement of each student, in the basic skills.
16. **The Tests of Adult Basic Education** (continued)

b. Authors: Ernest W. Tiegs and Willis W. Clark

c. Grade levels:
   - Level E: Grades 2.5 - 4.9
   - Level M: Grades 4.5 - 6.9
   - Level D: Grades 6.5 - 8.9

d. Administration time:
   - Level E: 1 hour 47 minutes
   - Level M: 3 hours 9 minutes
   - Level D: 2 hours 51 minutes

e. Type of administration: Group

f. Language assessed: English

g. Publisher: CTB/McGraw-Hill
   Del Monte Research Park
   Monterey, CA  93940

17. **The 3-R's, Achievement Edition**, 1982

a. Description:

   The 3-R's Test is a short assessment program that provides reliable information about students' development in basic reading, language, and mathematics skills and abilities. It is available in three different editions: the Achievement Edition for levels K-12 (levels 6-18); the Achievement/Abilities Edition for 3-12 (levels 9-18); and the Class-Period Edition for K-12 (levels 6-18). Both, the Achievement Edition and the achievement portion of the Achievement/Abilities Edition measure students' readiness skills and the mathematics, reading, and language skills. The Class-Period Edition measures achievement in the most basic skills. The Abilities Edition measures basic verbal and quantitative reasoning abilities.
17. **The 3-R's.** (continued)

b. **Authors:** Nancy S. Cole, E. Roger Trent, Dena C. Wadell, Robert L. Thorndike and Elizabeth P. Hagen

c. **Grade levels:** Varied

d. **Administration time:**
   - Achievement Edition: Grades K-12: 95 minutes
   - Grades 3-12: 130 minutes
   - Achievement/Abilities Edition: 190 minutes

e. **Type of administration:** Groups

f. **Language assessed:** English

g. **Publisher:** The Riverside Publishing Company
   8420 Bryn Mawr Avenue
   Chicago, IL  60631
1. **Bahia Oral Language Test** (BOLT), 1977
   a. **Description**:
      
      The BOLT contains 20 item types which measure oral syntax. It is a comprehensive intermediate and secondary English language proficiency test; which assesses oral language skills ranging from understanding simple sentence patterns to using complex syntactical forms. It is broken down into four levels of item types which measure oral syntax.
      
      The test kit consists of: a manual, a booklet, 30 answer sheets, and a class record book. A technical report is also available.
   b. **Authors**: S. Cohen, R. Cruz, and R. Bravo
   c. **Grade levels**: 7-12
   d. **Administration time**: Variable
   e. **Type of administration**: Individual
   f. **Languages assessed**: English and Spanish
   g. **Publisher**: BAHIA, Inc.
      P.O. Box 9337
      North Berkeley Station
      Berkeley, CA 94709

2. **Bilingual Syntax Measure** (BSM), 1975
   a. **Description**:
      
      The Bilingual Syntax Measure is designed to assess the oral syntactic proficiency of K-2 children in English and/or Spanish by using natural speech as a basis for making judgments.
2. **Bilingual Syntax Measure** (continued)

b. Authors: Marina K. Burt, Heidi C. Dulay, and Eduardo Hernandez-Chavez
d. Grade levels: K-2
    d. Administration time: Variable
e. Type of administration: Individual
f. Languages assessed: Spanish and English
g. Publisher: The Psychological Corporation
   555 Academic Court
   San Antonio, TX 78204-0952

3. **Bilingual Syntax Measure II** (BSMII)

a. Description:

    Designed to measure oral proficiency in English and/or Spanish grammatical structures, by using natural speech as a basis for making judgments, the BSMII encourages students to freely express their thoughts and opinions. Important indicators for structural proficiency are student syntactic structures.

    The Bilingual Syntax Measure II is designed primarily for students 10 years or older, who are enrolled in grades 3 to 12. In order to elicit natural speech, simple questions are asked about cartoon-type pictures to promote student conversation. An analysis of student speech patterns gives a numerical indicator and a qualitative description of structural language proficiency. This ranges from Level I (student neither speaks nor understands language of test), to Level V (student has native language proficiency).
3. **Bilingual Measure II** (continued)

   The Bilingual Syntax Measure is available in English (BSM-E) and Spanish (BSM-S). The Picture Booklet contains seven cartoon-type pictures which can be used for BSM-E or BSM-S. There are two answer booklets which contain specific directions to the examiner, as well as the questions with corresponding space for the students' answers. The supplementary technical material contains the rationale and the technical data which are available to researchers.

4. **Comprehensive English Language Test** (CELT)

   a. Description:

      Designed to assess the English language proficiency of non-native speakers, the CELT provides a series of easy-to-administer tests. It is appropriate for intermediate and advanced high school and adult ESL programs.
4. **Comprehensive English Language Test** (continued)

The CELT consists of three multiple-choice tests: Listening, Structure, and Vocabulary. These may be used separately or as a complete battery. All tests use a separate answer sheet and a reusable test booklet.

The Listening Test measures the ability to comprehend short questions, and dialogues as spoken by native English speakers; it contains 50 items and takes about 40 minutes. The Structure Test measures the ability to manipulate grammatical structures occurring in spoken English; it has 75 items to be answered in 45 minutes. The Vocabulary Test assesses the lexicon in advanced English reading; it contains 75 items and an administration time of 35 minutes. Norms and other data are available in a Technical Manual.

   330 West 42nd Street
   New York, NY 10036
5. **Diagnostic Test for Students of English as a Secondary Language**

   a. **Description:**

   Designed to measure English language structure and idiomatic vocabulary, this test contains 150 multiple-choice questions. It can be used to determine: if special instruction is needed; where to place students; or how to prepare lesson plans. It contains test booklets and answer sheets. The instruction sheets describe the scoring and interpretation procedures.

   b. **Author:** A. L. Davis

   c. **Grade levels:** High school - adults

   d. **Administration time:** 60 minutes

6. **Degrees of Reading Power**

   a. **Description:**

   The descriptors are: Cloze Procedure; Context Clues; Culture Fair Tests; Elementary Secondary Education; Nonfiction; Postsecondary Education; Prose; Reading Comprehension; Reading Diagnosis; Reading Tests; Student Placement. Identifiers: Power Tests. It measures a student's ability to process and understand nonfiction prose written at different levels of difficulty. Test items are formed by deletion of words
6. **Degrees of Reading Power** (continued)

from each passage. For each deletion, five single word options are provided. The DRP consists of a PA series, broad-based tests for use at the elementary-secondary grade levels, and a CP series for use in student placement at the postsecondary level. Raw scores can be converted to identify independent, instructional, and frustration reading levels. See also New York State Preliminary Competency Test in Reading-Degrees of Reading Power (TCO 10959).

e. Type of administration: Group
f. Languages assessed: English and Spanish
g. Publisher: The College Board
   888 Seventh Avenue
   New York, NY 10106

7. **Dictation**

a. Description:

The Dictation test is an integrative test that can be administered in several ways. The passage selection should be extracted from general reading materials which are used in class, or from general interest readings. The length of the passage should be sufficient to provide enough information to assess student performance (with reading material that is too long, students may become bored and lose interest).
7. **Dictation (continued)**

Evaluation can focus on: spelling, word omissions, grammatical errors, and punctuation errors. The final score is reported as a general score on a scale of 1-5.

b. **Author:** Suggested administration procedure of dictation tests from *Teaching English as a Second Language: Techniques and Procedures* (1976) by Christina Bratt Paulston and Mary Bruder.

11. **Ilyin Oral Interview Test**

   a. **Description:**

   The Ilyin Oral Interview is designed to assess student ability to use oral English in response to hearing it in a controlled situation. The interview may be used to place incoming students in an appropriate level ESL classroom. It also shows achievement gains in pre-/post-test situations, and correlates individual oral proficiency with test performance which requires reading or writing skills.
11. **Ilyin Oral Interview Test** (continued)

    The interview consists of 50 items which progress from simple to complex. Each item is scored for accuracy of information and structure. The structure score includes: Word order; verb structure and other grammatical structures. Fluency and pronunciation are not scored.

b. Author: Donna Ilyin
c. Grade levels: 7-12 and adults

13. Language Assessment Battery (LAB), 1976
a. Description:

LAB is designed to assess student ability in: reading, writing, listening comprehension, and speaking in English and Spanish for K-12 students.

The reading section is designed to measure: 1) recognition of morphological and syntactical structures; and 2) comprehension of English and Spanish in graphic forms. The writing assesses recognition of the grammatical signals of the language in graphic forms.

b. Author: Board of Education of New York City
13. **Language Assessment Battery** (continued)

c. Grade levels:  
   - **Level I:** Grades K-2  
   - **Level II:** Grades 3-6  
   - **Level III:** Grades 7-12  

d. Administration time:  
   - Test 1: Approximately 8 minutes  
   - Test 2: Approximately 20 minutes  
   - Test 3: Approximately 8 minutes  
   - Test 4: Approximately 5 minutes  

e. Type of administration:  
   - Level III: Tests 1, 2, and 3 are group administered. Test 4 is individually administered.  

f. Languages assessed: English and Spanish  

g. Publisher:

   - Geneva, IL 60631  

14. **Language Assessment Scales** (LAS), 1977-78  

a. Description:  
   
   The LAS in Spanish and English is designed to measure:  
   1) the phoneme production; 2) the ability to distinguish minimal sound pairs (sound discrimination); 3) the oral lexical production; 4) the comprehension of the aural syntax (sentence); 5) the oral syntax production; and 6) the ability to use language for pragmatic ends (communication proficiency through story retelling).  

   It is composed of an additional Writing Assessment for Level II. The LAS provides an overall picture of children's linguistic ability by
14. **Language Assessment Scales** (continued)

separately assessing the component parts of the language system. A supplemental test provides games and activities which help students learn the specific weak behaviors indicated by the test scores. LAS may be used to determine classroom placement and to facilitate entry/exit decisions. Pre-LAS is a downward extension of LAS that is designed to measure oral language proficiency of preschool, kindergarten, and first-grade children. It measures expressive and receptive abilities in three linguistic areas: morphology, syntax, and semantics.

The 1981-82 LAS Editions are designed for Grades K-5, 6-12, and over, it covers 6 or 7 sections: minimal pairs, lexical phonemes, sentence comprehension, oral production, total observation of pragmatic language, which is optional.

b. Authors: Edward A. DeAvila and Sharon E. Duncan; Linguametrics group

c. Grade levels: Pre-LAS: Ages 4-6
   Level I: Grades 2-5
   Level II: Grades 6-12

d. Administration time: Level I: 20 minutes
   Level II: 15-20 minutes

e. Type of administration: Individual

f. Languages assessed: Spanish (1981) available for form A, and English

g. Publisher: DeAvila, Duncan and Associates
   P.O. Box 770
   Larkspur, CA 94939
15. **Spanish Assessment of Basic Education (SABE), 1987**

a. **Description:**

The SABE is a new battery in Spanish designed to assess basic reading and mathematics skills. It will be equated to the Comprehensive Tests of Basic Skills, Forms U and V (CTBS U and V), as well as to the California Achievement Tests, Forms E and F (CAT E & F) Word Attack tests at grades 1-3 based on a syllabic approach.

SABE has a pretest of language dominance which helps determine whether a student should be tested with SABE or an English-language achievement battery. Grades 1-6 tests provide practice for students who have had limited test-taking experience.

18. **Michigan Test of English Proficiency**

a. Description:

   The Michigan Test consists of three parts: Grammar, vocabulary and reading comprehension. It can be used as a placement test or as a post-test. The test consists of 100 items: 40 in grammar; 40 in vocabulary; and 20 in reading comprehension. It is a nonverbal test.

b. Author: University of Michigan

c. Grade levels: High school-Adults

d. Administration time: 1 hour 15 minutes

e. Type of administration: Groups

f. Language assessed: English

g. Publisher: English Language Institute
   2001 N. University Building
   University of Michigan
   Ann Arbor, MI 48109

a. Description:

Designed to place students in one of five levels of the Orientations in American English Series, the questions and structures tested correspond to the various levels of texts in the series.

The Aural/Oral Test is composed of two parts. In each part the student is asked to answer questions in complete sentences. The sentences are evaluated and scored as in the Written Test. The Written Test, which is administered to groups, is composed of three parts. In Part I, there are 7 oral questions; students write their responses. Part II uses illustrations with written questions; students must write their answers. Part III is a reading section; there is a brief passage and 1 or 5 follow-up comprehension questions; students must write their answers. The manual has a final student placement rating system with 5 levels.

23. **The Ber-Sil Spanish Test, 1972-77**

a. **Description:**

   It is composed of: a) Elementary level (1976) revised edition, and b) secondary level, experimental edition. (a) Elementary level, 4 scores: vocabulary, response to directions, writing, geometric figures, draw a boy or a girl. (b) Secondary level, 4 scores: vocabulary, dictation of sentences, draw a boy or a girl, and mathematics.

b. **Author:** Marjorie L. Beringer

c. **Grade levels:** Ages 5-12; 13-17

d. **Administration time:** Varied

e. **Type of administration:** Individual/Group

f. **Language assessed:** Spanish (Cantonese, Mandarin, Korean, Persian, Ilokano, and Tagalog editions are also available.)

g. **Publisher:** Ber-Sil Co.
   3412 Seaglen Drive
   Rancho Palos Verdes, CA 90274
C. TESTS OF APTITUDE, GENERAL ABILITY, INTELLIGENCE, OR COGNITIVE DEVELOPMENT

1. Test of Ability to Subordinate
   a. Description:
      A writing test suitable for students at the intermediate and advanced levels, this test is an easily scoreable objective test. It measures student ability to manipulate particular subordinate grammatical structures, such as: participles, gerunds, prepositional phrases, and noun, adverbial and relative clauses.
   b. Author: David M. Davidson
   c. Grade levels: High School - Adult
   d. Administration time: 35 minutes
   e. Type of administration: Groups
   f. Language assessed: English
   g. Publisher: LINC Publications
      2112 Broadway, Room 515
      New York, NY 10023

2. Barranquilla Rapid Survey Intelligence Test (BARSIT), 1956-68
   a. Description:
      Designed as a mental ability measurement, this test is used with appropriate grade levels, as well as with Spanish-speaking adults who have a basic education. This assessment should be administered by a trained test administrator or under the supervision of a psychologist. A manual contains norms from Venezuela; they are classified by grade level or by years of education (for adults).
2. **Barranquilla Rapid Survey Intelligence Test** (continued)

      304 E. 45th Street
      New York, NY 10017

3. **Cartoon Conservation Scales**, 1977
   a. **Description:**
      Cartoon Conservation Scales are designed to measure Piagetian concepts. Level I is comprised of 30 cartoon form items: 6 subscales measuring identity, number, length, substance, distance and egocentricity concepts. Level II also is comprised of 30 cartoons.
   b. **Author:** Edward A. DeAvila
   c. **Grade levels:**
      - **Level I:** Grades K-3
      - **Level II:** Grades 4-6
   d. **Administration time:** 30 minutes
   e. **Type of administration:** Either
   f. **Languages assessed:** Spanish/English
   g. **Publisher:**
      Linguametrics Group
      P.O. Box 454
      Corte Madera, CA 94925
4. **Clerical Aptitude SRA: Short Test of Educational Achievement**

a. **Description:**

   Designed to estimate educational ability in a short, easily administered format, the Short Test of Educational Achievement has parallel editions in English and Spanish. Levels I and II, for grades K-3, are primarily pictorial and are administered orally. Levels III, IV, and V, for grades 4-12, are read by the students. The subtests include: What Would If; How Would You; Spatial Relations; Verbal Meaning; Number Series; Arithmetic Reasoning; Letter Series; and Symbol Manipulation.

   In the Spanish edition, the test directions and items are read orally by the teacher and are annotated with Southwestern, Cuban, and Puerto Rican versions.

   In order to determine whether the Spanish edition was equivalent to the English, both versions were administered to bilingual children in the Southwest. In grades K-3, the performance of the children was very similar. As a result, the manual explains, along with cautionary notes, that the Level I and II norms developed for the English edition may well be applied to the Spanish edition. However, Levels III, IV, and V should only be used with students who have had at least two years of formal education in Spanish or who have demonstrated an ability to read Spanish with some facility.

5. **Culture Fair Intelligence Test**
   
a. **Description:**

   Relatively independent of school achievement, social advantages, and other environmental influences, this test is a nonverbal measure of general ability. It has two editions with scales to use for students from prekindergarten to grade 12. Edition one, the IPAT Culture Fair Intelligence (1933-73), has three scales. Edition Two, the Cattell Culture Fair Intelligence Test (1970-61), has only two scales for ages 4-8. The IPAT has 8 subtests: symbol; coping; classification of pictures; mazes; identification of similar drawings; selecting familiar objects when name; following directions; identifying what is wrong with pictures or familiar objects; and riddles. Scales 2 and 3 of both the IPAT and the Cattell have 4 subtests: series, classifications, matrices, and conditions. CFIT was formerly called Culture Free Intelligence Test.

b. **Authors:** R. B. Cattell and A. K. S. Cattell (Scales 2 and 3)

c. **Grade levels:** Scale 1: Ages 4-8 and mentally retarded adults (1933-6)  
   Scale 2: Ages 8-14 and average adults (1949-73)  
   Scale 3: Grades 9-16 and superior adults (1950-73)

d. **Administration time:** 20-60 minutes
5. **Culture Fair Intelligence Test** (continued)
   
e. **Type of administration:** Individual

   f. **Language assessed:** English, Spanish (scales 2-3), and German

   g. **Publisher:** Institute for Personality and Ability Testing  
      1602 Coronado Drive  
      Champaign, IL  16820

6. **Differential Aptitude Test** (DAT)
   
a. **Description:**

   A battery of tests designed for educational and vocational guidance
in grades 8-12, the DAT measures student ability in 8 areas: Verbal
reasoning (30 minutes); Numerical ability (30 minutes); Abstract reasoning
(25 minutes); Space relations (25 minutes); Mechanical reasoning (30
minutes); Clerical speed and accuracy (6 minutes); Language usage-spelling
(10 minutes); and Language usage-grammar (25 minutes).

   The fourth edition of the manual provides norms for the English
version and other information data. The test in the Spanish version is
called "Test de Aptitud Diferencial."

b. **Authors:** G. K. Bennet, H. G. Seashore, and A. G. Wesman

c. **Grade levels:** 8-12 and adults

d. **Administration time:** 6-30 min.

e. **Type of administration:** Groups

   f. **Languages assessed:** English and Spanish

   g. **Publisher:** CHESS and Associates  
      2759 Steeple Chase Lane  
      Diamond Bar, CA  61766
7. **Modern Language Aptitude Test** (MLAT) and **Elementary Modern Language Aptitude Test** (EMLAT)

a. **Description:**

   Designed mainly to indicate an English speaking individual's probable degree of success in learning a foreign language, the MLAT consists of five sections: Number learning; phonetic script; spelling clues; words in sentences; and paired associates.

   The EMLAT is an outgrowth of the MLAT. It predicts how easily and rapidly children in grades 3-6 could learn a foreign language. It consists of four sections: Hidden Words; Matching Words; Finding Rhymes; and Number Learning. A tape recording must be used to administer both MLAT and EMLAT.

   A manual is available for each test, which provides information about: 1) norms; 2) classification of sex and grade; 3) validity data; and 4) reliability data.

b. **Authors:** I. B. Carroll and S. M. Sapcn (1959, 1967)

c. **Grade levels:** 3-6, 9-12, and Adults

d. **Administration time:** 60-70 minutes per session approximately (20 or more sessions necessary)

e. **Type of administration:** Groups

13. Wechsler Intelligence Scale for Children (WISC) and Escala de Inteligencia Wechsler (Spanish version), 1974

a. Description:

A standardized test for children between the ages of 5-15, the WISC requires a technically trained examiner. The Spanish edition, developed in Puerto Rico, is an authorized Spanish-American translation and adaptation of the Wechsler Intelligence Scales for Children. It contains 12 subtests divided into two subgroups: Verbal Scales and Performance Scales.

The Verbal Scales comprise the: Information, comprehension, arithmetic, similarities, vocabulary, and digit span sections. The
13. **Wechsler Intelligence Scale for Children (WISC) and Escala de Inteligencia Wechsler (continued)**

Performance Scales have the following sections: Picture completion, picture arrangement, block design, object assembly, coding, and mazes. All these sections yield an IQ based on scaled scores for each age level.

The Spanish manual includes: the questions used in the verbal subtests; the directions for administering the Verbal and the Performance Scales; and the technical data.

b. **Author:** D. Wechsler
c. **Grade levels:** K-10

2. Career Maturity Inventory (CMI), 1978
   a. Description:
      Designed to survey the attitudes and competencies important to
      career decision-making, this inventory contains an Attitude Scale and a
      Competence test. The Attitude Scale indicates student attitudes and
      feelings toward career choices and entrance to the world of work. The
      Competence Test indicates knowledge relative to occupations. Five areas:
      self-appraisal, occupational information, goal selection, planning, and
      problem solving. It was formerly called Vocational Development
      Inventory.

4. **Survey of Study Habits and Attitudes (SSHA)**

a. **Description:**

   Designed to identify students whose habits and attitudes may prevent them from taking advantage of their educational opportunities, this survey yields a 7 part profile: Delay avoidance; Work methods; Study habits; Teacher approval; Educational acceptance; Study attitudes; and Study orientation. These scores can be used by counselors to assist students in the necessary areas.

   The original version was called: Brown-Holtzman Survey on Study Habits and Attitudes. The Spanish version of the SSHA, "Encuesta de Habitos y Actitudes Hacia el Estudio," is an authorized Spanish-American edition which was prepared in Mexico to assure its suitability for use in other Hispanic-American countries. Norms are available for high school and first-year college students in Mexico.

b. **Authors**: William F. Brown and Wayne F. Holtzman
