This report contains validated task inventory listings for accounting occupations. An introductory report in brief outline form gives background of the work of the technical committee that identified the duties and tasks. This is followed by four attachments which make up most of the document. Attachment A has two parts: (1) an accounting skills inventory for 10 duties and corresponding tasks, ranked as entry, retention, or advanced; and (2) a tools, equipment, and work-aid list, indicating the frequency with which each is used on the job (low, medium, or high). Attachment B lists six assumptions of the technical committee project. Attachment C contains job descriptions for bookkeeper, accounting clerk, and nondegree accountant. Attachment D, the largest of the four, begins with a list of basic skills for the accounting clerk, nondegree accountant, and bookkeeper occupations. Next, a chart cross-references duties and tasks with performance guides for five accounting occupations: accounts payable clerk/supervisor; accounts receivable clerk/supervisor; fixed assets clerk/supervisor; general ledger clerk/supervisor; and payroll clerk/supervisor. The remainder of the guide lists the tasks for each of the 10 major duties, ranked as entry/retention (maintain files; process transactions; correct errors; prepare reports; resolve problems; communicate with outsiders) or advanced (audit records; establish policies; execute policies; supervise and instruct). Each task is presented on a separate page that provides information under the following headings: performance objectives, enabling objectives, tools and equipment, performance guide, teaching strategies, and instructional materials/resources. (NLA)
I. Background and Summary of Activities:

A. Background

A group of people from business and industry were selected to serve on the State Technical Committee for Accounting to meet federal law requirements. Business and industry participants were asked to validate task inventory listings performed by entry-level, retention level, and advanced level by an initial mailing to be completed as an activity prior to the first committee meeting (see attachment A).

B. Summary of Activities

1. On August 19, 1986, the committee met as a group to:

a. Compare the assessment of skills and produced a validated task inventory listing with an equipment and tools list needed for the performance of the task.

b. Validated performance guide to match validated task.

2. The committee met on October 20 and 21, 1986, and used the validated task inventory to:

a. Identify occupational title, duty, task, and performance guide.

b. Validate performance objective with performance guide

c. Adopted Arizona State employability skills at three occupational levels in the three areas of math, communicative arts, and reasoning.

3. The committee met on November 15, 1986 to revise and complete the rough draft copy of task inventory, performance guide, employability skills, and essential knowledge needed for entry, retention, and advanced levels of the occupational titles identified.
II. Identification of the Occupations Studied

A. Occupational Titles

1. The initial assessment of skills inventory was taken from the following vocational titles:
   - Accounts Receivable Clerk
   - Accounts Payable Clerk
   - Billing Clerk
   - Credit Clerk
   - Purchasing Clerk
   - Accounts Payable Supervisor
   - Accounts Receivable Supervisor

2. The committee identified that in most organizations there are five major accounting jobs:
   - Accounts Payable Clerk
   - Accounts Receivable Clerk
   - Fixed Assets Clerk
   - General Ledger Clerk
   - Payroll Clerk

3. The committee based the performance guide on those five jobs. In addition, ten major duties, which include the task inventory, were identified as six for entry level, six for retention level, and four as advanced level.

   The six entry and retention level duties are:
   - Maintain records: "maintain files"
   - Journalize and post: "process transactions"
   - Correct errors
   - Prepare business forms: "prepare reports"
   - Resolve problems
   - Communicate with outsiders

   The four advanced duties are:
   - Audit records
   - Establish policies
   - Execute policies
   - Supervise and instruct

B. Labor Market data and trends

1. Projected employment for 1991 for the accounting occupation include: CIPS Title Classification and Data
   - Accountants and Auditors 7,461
   - Accounting Clerk 12,125
   - Bookkeeper Hand (1 & 2) 12,820
   - Payroll Clerk 2,246
   - Billing Clerk 1,529
   - Cost Estimator (Purchasing Clerk) 1,492
2. The current trends for the accounting occupation are an increase in job opportunities in all areas of the profession. Employed women in the accounting area is on the rise and will continue to increase. Computer applications related to accounting procedures and manipulation of data will continue to improve the efficiency of the accounting field.

III. List of Competencies

Each occupational title is cross referenced to its duties and specific tasks. The tasks have been numbered using the number on the corresponding performance objective.

- Initial task inventory - Attachment A
- Duty, Task, Performance Objective - Attachment B

IV. Employability, Essential Learning, and Basic Skills

A. Employability Skills

The committee adopted the "Arizona Employability Study" is Math, Science, Communication and Responsibility. They suggested Oregon adopt and use these skills in their statement of required competencies. (Attachment C)

B. Part of the Employability Skill list was cross referenced to Oregon's essential learning and basic skill. (Attachment D)

V. Attachment A

Comments:

Business and Industry participants worked together in a dedicated and enthusiastic effort to produce the attached documents. The preface to the performance guide clearly states their intent and purpose for classification of job titles and format.

Assumptions to Project--Accounting

1. In most organizations, there are five major accounting jobs that must be done. We have chosen to approach these jobs by first naming the specific accounting position, then the duties, tasks, performance objectives, tools, performance guide and teaching strategies relating to the position.

The five accounting positions are:

- Accounts Payable
- Accounts Receivable
- Fixed Assets
- General Ledger
- Payroll

2. In addition, of the 10 major duties as outlined by V-Tech for which there is a task inventory, we have identified six that we believe to be entry level and four we believe to be higher level. In naming the positions, we have called the lower level "clerk" and the higher level "supervisor."

The six entry level duties are:

- "Clerk"
  - Maintain records: "maintain files"
  - Journalize and post: "process transactions"
  - Correct errors
  - Prepare business forms: "prepare reports"
  - Resolve problems
  - Communicate with outsiders

The duties we identified for the higher level job are:

- "Supervisor"
  - Audit records
  - Establish policies
  - Execute policies
  - Supervise and instruct

3. Each job position is cross-referenced to its duties and specific tasks. The tasks have been numbered using the number on the corresponding performance objective. Because, once this matrix was established, all job positions and duties did not have tasks written for them in the original documentation, we have added numerous tasks. Any task numbered #106 or higher is a new task description as of today (October 18, 1986). None of these tasks are in the higher level duties or supervising level positions, but we have also added tasks for payroll clerk and fixed asset clerk.
4. The terms used in this document generally reflect those commonly used in industry. It is suggested there be a general awareness that these are changing and are reflective of the broadening scope of the tasks required for each position.

5. As a statement of philosophy, we of the business/industry portion of this task force believe that the skills as listed on the "Arizona Employability Study" in Math, Science, Communication and Responsibility are appropriate for entry level (Arizona "Accounting Clerk") and higher level (Arizona "Bookkeeper") and are well written. We suggest Oregon adopt and use these skills in their statement of required competencies. (See attachment)

6. Although the vocational technical document refers to entry, retention and advancement levels, we have decided that entry and retention skills are, for our purposes identical. There would be only a minimal elapse of time before an entry level person would have to exhibit proficiency in the tasks outlined in order to be retained. We expect, however, that for advancement, a higher level of proficiency; the ability to make judgments and to supervise and instruct others, would have to be achieved.

It is important to remember today that most functions that used to be entry level rote tasks, are now performed by computers. Employees must perform the tasks of evaluation, quality control, and analysis and must make correct and critical judgments in order to stay employed, to advance and to succeed in their work. Employees will have to understand the workings of the computer as well as the general accounting process.

TASK: Proof End-of-Month General Ledger

102. PERFORMANCE OBJECTIVE

Given a computer printout, manually prepared records, an on-line file, tools and equipment, audit end of month general ledger computer totals. All discrepancies must be corrected, authorized and filed or entered by date.

ENABLING OBJECTIVE

Identify month-end closing procedures.

TOOLS/EQUIPMENT

Computer printout
Ledgers, trial balance, subsidiary records
Data entry form
Journals
Form for errors
Calculating device
Document retention media, i.e., file cabinet, computer

PERFORMANCE GUIDE

1. Obtain computer printout of monthly totals or calculator tape.
2. Identify errors
3. Correct clerical errors
   a. Compare printout of the general ledger to subsidiary records
   b. Obtain authorization/approval for changes
   c. Correct data entry information
   d. Submit corrected data entry to data processing
   e. Obtain corrected printout
4. Correct data processing error
   a. Complete data processing "Problem Notification Form"
   b. Send form to data processing to make corrections
