This committee report identifies the skills and knowledge required by employees in the marketing occupational area. It also provides performance objectives from which competencies and instructional objectives may be developed. Introductory materials include a list of committee members, statement of the marketing committee, information on marketing as a profession, background for the report, a list of the fundamental employment skills and attributes for marketing occupations, and task inventory with rankings. The tasks are grouped into 13 duties: cash register/terminal operations; selling merchandise; performing clerical duties; displaying merchandise; performing receiving functions; performing stockkeeping functions; performing merchandising/maintenance activities; communicating information; performing sales promotion activities; applying human relations skills; managing store functions/physical plant; managing store functions/operations; and managing store functions/people. Each duty is divided into 2 to 16 tasks. Each task is presented on a separate page that provides a performance objective (which identifies the industry standard), performance guide (which lists the steps required to accomplish the task to meet the industry standard), and a list of tools and equipment. A complete equipment list is appended. (YLB)

INTRODUCTION

The Carl D. Perkins Vocational Education Act (PL 98-524) requires that each state establish at least two technical committees per year. The purpose of these technical committees is to identify the skills and knowledges required for occupations for which training is provided for in the state.

The technical committees are composed of members from business, industry, professional associations, and labor, as well as persons with special expertise. In addition, there is one ex officio representative from each of the following areas:

- State Advisory Council for Career and Vocational Education
- Secondary vocational programs
- Community college vocational programs
- Teacher education/higher education

The committees identify the skills and knowledges required in the occupation at three levels.

1. Entry--The skills necessary to obtain the job.
2. Retention--The skills necessary to retain the job beyond the probationary period.
3. Advanced--The skills necessary to advance in the occupation; i.e., journeyperson level.

This work will be used to determine the competencies required in each vocational program and to improve the existing curriculum statewide.

This report reflects many hours and a strong commitment to educational excellence on the part of the committee members. The Department appreciates the work of the committee.

HOW TO USE THE REPORT
OF THE
TECHNICAL COMMITTEE

The Technical Committee has identified the skills and knowledge required by employees in a certain occupational area. They have also identified the industry standard (in the performance objective) and the steps that are required to accomplish the task to meet the industry standard (performance guide). Many times there are several ways to competently perform a task, the one given is a suggestion.

The report does not differentiate between skills that can be taught at the secondary or postsecondary level. It is a picture of the occupation and the skills an employee must be able to perform. Thus this document is not a curriculum guide. It is the first step of developing your curriculum or program. Each local advisory committee should review the tasks to determine if they meet local needs. Many times there will be additional tasks that the local committee will identify as being necessary.

Each skill in this report is ranked as being Entry (needed to get the job), retention (needed to keep the job), or advanced (needed to advance in the job or be considered fully responsible in the job).

Once a local committee has reviewed the tasks and the performance objectives, the teacher needs to identify which of these skills are appropriate for each level of instruction. (The statewide education committee will also be doing this and their recommendations can be used as a guide.)

Once the skills have been identified for which instruction will be provided, resources need to be identified and evaluated. Again the statewide education committee will be doing this and recommending 3-4 excellent resources. The teacher/instructor will need to review the material also to determine if additional skills as recommended by their local committee are adequately covered.

Again, this document is not a curriculum; it provides the necessary skills for employment as identified by industry. It also provides performance objectives from which competencies and instructional objectives may be written.

STATEMENT OF THE MARKETING COMMITTEE

The Marketing Technical Committee used data and materials for other states and from the Vocational Technical Education Consortium of States (V-TECS) work as a starting point. We then chose 13 major duties with a carefully defined task inventory for each duty. Each task was then matched with each job category, using the following coding:

- **E** = Requirement to get the job (entry)
- **R** = Must do to keep the job (retention)
- **A** = Required for advancement
- **N/A** = Not applicable or not a specific function for that job
- **M** = The specific task is not required as an entry skill but will probably be needed as a part of the job sometime in the future. In many cases these are presumed skills.

The terms used in this document generally reflect those commonly used in marketing today.

Some of our committee members felt strongly that even more job categories should be added to our matrix. The basic idea being that marketing in the 1990's and beyond should include virtually all employees in every business... not just those who come in contact with customers on a regular basis. Every job function somehow relates to the customer and their needs. However, in the final analysis, we chose to limit our matrix to the more traditional job categories but felt the users of this document should have some exposure to our philosophy that it is everyone's job to market what their employer sells.

Marketing job categories within these businesses were arranged into three experience levels:

- **Level 1** = Entry
- **Levels 2 and 3** = Retention and advanced levels for promotion opportunities

Employability Skills
There is a difference between marketing and retailing. All retailing is a form of marketing, but not all marketing is a form of retailing! Selling the public consumer is only one very small part of the total marketing scene. In fact, business-to-business marketing is the fastest growing part of marketing. Marketing should relate to those activities where someone (person or business) is offered ideas, services, and/or products to those who buy for:

- In-house use or self-use
- Resale or giving (Those who pass it on to a third party in some manner)
- Conversion and then for either of the above

Students need to transfer the skills they are learning in their courses to reflect the opportunities in marketing or skills students learn in their classes are transferable in any marketing situation.

Marketing can, and is applied from:

- Maker/creator to the end-consumer
- Maker/creator through an agent to the end-consumer
- Maker/creator through agencies to the end-consumer
- Maker/creator through agencies and their agents to the end-consumer.

The end-consumer may be an individual or a business or organization, just as the maker/creator may be an individual or a business organization. The agent, agencies and their agents may be any person(s) or firm(s) that handle the flow of the idea, service, or product between the maker/creator and the end-consumer. There is marketing at all the levels between the maker/creator and the end-consumer.

Some areas there may be more steps between the maker/creator and the end-consumer, but that becomes a technical point only appropriate to that particular industry, business or product, service or idea.

One of the problems is that marketing should not be a cluster in itself. Marketing is what is done with all the other clusters. All the other clusters should have marketing as part of their curriculum. One thing is to do what one does, but if the output of that work is not marketed successfully to someone else, then the work is useless.

Before someone creates and/or asks someone to perform service or make a product, they had better understand how it is going to be used and marketed by the next two levels, otherwise they may very well be doing something that cannot be used and hence the marketing efforts will be for naught.

Marketing education is meant to include:

- Identifying prospective users and the methods that might be used in reaching them.
- Deciding who the consumers are, at which level(s) of the distribution system they are at, and which method(s) to use to reach them.
- Performing the distribution tasks.
- Performing the business tasks needed to accomplish the above three steps.
Background for the Marketing Technical Committee Report

A group of business and industry people were chosen from the Marketing profession to serve on a Marketing Technical Committee in August 1988. The committee met five times during the fall of 1988 and produced the following documents: Occupational Pyramid; Employability Skills; Task Listing With Rankings; Performance Objectives and Guides; and an Equipment List.

The expertise of the committee and the hard work that was demonstrated during the committee meeting is reflective in the committee report and documents produced.

Occupations Studied/Labor Market Information

Occupations studied for the basis of the task inventory are reported in three experience levels:

- **Level 1:** Cashier, Sales Clerk, Outside Sales Representative, Stock Person/Warehouseman
- **Level 2:** Lead Person, Assistant Manager
- **Level 3:** Manager

Level 1 includes entry level positions. Levels 2 and 3 include retention and advancement levels for promotion opportunities.

Basic employability skills and job related skills were required for an entry level position.

Labor Market information for the state of Oregon is very promising for the Marketing profession. Employment projections to 1991 are:

- **Level 1:** Sales Clerks 21,982, Cashier 19,044, Sales Representative 50,162, Stock Clerk/Warehouseman 21,430
- **Level 2:** Lead Person/Assistant Manager 19,020
- **Level 3:** Manager 14,754

In analyzing employment opportunities in Marketing for high school and community college graduates, the committee decided the following business categories would be generally acknowledged to be provider of jobs at the retail, wholesale, and manufacturing occupations:

- Retail: Grocery/Variety/Drug stores, General multi-department merchandise, Specialty stores
- Food: Fast food/other restaurants
- Automobile: New and used car dealers
- Electronics: Copy/Office products, telephones/pagers (commercial)
- Hotel/Motel Services

Marketing students should be aware of additional marketing job opportunities that are available in industry other than those mentioned above.
In analyzing employment opportunities in Marketing for high school and community college graduates, our committee decided that there are many opportunities for employment in businesses that sold tangible products and provided the services that go with those products: manufactures, wholesalers, and retailers, who's outputs were sold to their customers for in-house/self-use, resale/giving, or conversion and then for in-house/self-use or resale/giving.

1. These firms could offer multi-category (department/general merchandise) products or could be single category (though not singular product) in scope, and they could be from quite small local firms to very large regional firms.

2. There are many specialized fields where many of the skills needed are the same as we have listed here, but were not necessarily in our thinking: fast food/restaurant, new and used cars, consumer electronics, office and communications products.

3. There are also many opportunities in the "service" (nontangible) area, and many of these same skills are needed, but they were not in our thinking: health care, financial, legal, accounting, education, government, the sciences, etc.

DUTY A: PERFORMING CASH REGISTER/TERMINAL OPERATIONS

TASK 1: Ring up the correct price of the merchandise.

1. PERFORMANCE OBJECTIVE

Given an item, ring up correct price of merchandise using appropriate calculations for multiple-price items, cents-off, or percentage-off sticker price items.

PERFORMANCE GUIDE

1. Read the price marked on the merchandise.

2. If the item is price-marked with a multiple price and there is only one or two of the items, divide the grouped price by the number of marked units and the result will be the cost of a single unit.

3. Multiply the single unit price times the number being purchased.

4. If the item is sticker priced with a multi-price:
   a. There is one or two divided, the grouped price by the number of units to determine individual price.
   b. Multiply that by the number being purchased.

5. If the item is cents-off the sticker price: Subtract the cents off the sticker price to determine the price to ring up.

6. If the item is percentage-off the sticker price, then either:
   a. Multiply the sticker price by the percentage-off to arrive at an amount that is then subtracted from the sticker price to arrive at the price that will be rung up, or
   b. From 100 percent, subtract the percentage-off to arrive at a percentage rate that is then multiplied by the sticker price to arrive at the price that will be rung up.

7. If given Canadian currency, convert to American value using approved rate of exchange.

DUTY A: PERFORMING CASH REGISTER/TERMINAL OPERATIONS

TASK 2: Make change.

2. PERFORMANCE OBJECTIVE

Given a total cost for an order of merchandise and the amount of money submitted by customer, make change to the customer.

PERFORMANCE GUIDE

1. For change-calculating cash registers:
   
   a. State the total cost of the order of merchandise.
   b. State the amount that the customer remits.
   c. Place the customer's money on the cash register change plate.
   d. Orally count back to the customer the amount of change due, beginning with the largest denominations (bills) and closing with coins.
   e. Place customer's money into cash drawer after they have acknowledged receiving the correct change.

2. For nonchange-calculating cash registers:
   
   a. State the total amount of purchase.
   b. State the amount of customer's remittance.
   c. Place customer's remittance on cash register change plate.
   d. Silently count starting at the total cost of the purchase and add up to the amount remitted, as you are obtaining cash from the cash drawer.
   e. Use the largest denomination of coins and bills available for change.
   f. Count aloud starting at the total cost of the purchase as you are returning change to customer, starting with lowest coinage through the largest bill.
   g. Place customer's remittance into cash drawer only after customer has acknowledged receiving correct amount of change.

3. Convert Canadian exchange to American value using approved rate.

TASK 3: Ring up orders of merchandise on the cash register/terminal.

3. PERFORMANCE OBJECTIVE

Given merchandise, ring up orders of merchandise on cash register/terminal to complete the sale, using correct cash register operation techniques.

PERFORMANCE GUIDE

1. Arrange merchandise on counter, put like items with like items.
   a. Arrange merchandise in a logical order, such as:
      • large to small items
      • taxable and nontaxable
      • hard and soft (perishable/fragile) items
   b. Make sure that you can see all the items.

2. Ask customer if they have any coupons for any of the items chosen.

3. Enter each item, quantity, price on the register.
   a. Some registers use a wand or reader to enter item on the register. Every item must be entered separately or multi-packed items if priced separately will have to be entered by hand.
   b. Verify prices on unmarked or illegibly marked items with price list or other employee.

4. Move each category of merchandise to another part of the counter as it is entered on the register. Check the physical count as you move it with the count on the register.

5. Check to see that all items have been entered on the register.

6. Total taxable and nontaxable items separately.
   a. Calculate tax or refer to tax chart, enter the tax on the register.
   b. Total nontaxable items.
   c. Subtotal taxable items, tax and nontaxable items.

7. Subtract any credits for coupons/returns and enter the amount on the register.

8. Total the transaction: purchases less credits.

9. Tell the customer the amount of the merchandise.

10. Follow the procedure for receiving customer's money and making change, receiving and processing customer's check, or using credit card. (See A-1, 3, 4, and 6, and B-9 and 11.)

DUTY C: PERFORMING CLERICAL DUTIES

TASK 1: Close out cash register.

23. PERFORMANCE OBJECTIVE

Given a cash register with the day's receipts, transaction forms, daily balance forms, and money bags, close out the cash register following company procedures.

PERFORMANCE GUIDE

1. Manual system:
   b. Enter the following information on the daily balance form:
      1) Count and total each denomination of coin and currency.
      Before entering total, return the specified amount of coins and currency to the cash drawer to be used as the next day's cash fund.
      In some firms, all cash is turned-in and the next day's cash fund is received from the office each day.
      2) Total and record the amount of the checks in the cash drawer.
      3) Total these two sums.
   c. Total all paid-out and cash refund slips, subtract this figure from the total of cash and checks.
   d. Compare this figure with the audit reading from the register close-out procedure.
   e. Mark the daily balance form "cash proved," "cash over," or "cash short" as appropriate.
   f. Insert all monies, checks, over-rings, under-rings, voids, refunds, paid-outs, and the register reading and daily balance form into the money bag, close and lock (if store policy) and send or take it to the accounting department.
      Some registers have more than one cash drawer for use by separate shifts/cashiers. In some cases, each is closed-out as the shift ends, others are all done at the end of the day. If it is the latter, then each drawer should be closed-out separately. This is usually dictated by policy.
   g. If the next day's cash fund is left in the register, close cash drawer and lock the register. If all funds are turned-in, the drawer could be left open as an indication that the register has been cleared.
   h. Secure the register key as per policy.

2. Automated system:
   a. Insert daily balance form into the register imprinting slot following register instructions.

DUTY E: PERFORMING RECEIVING FUNCTIONS

TASK 1: Receive incoming merchandise.

33. PERFORMANCE OBJECTIVE

Given a freight bill and/or packing slip or purchase order, receive incoming merchandise. Discrepancies and damages, if any, are recorded on the freight bill or bill of lading and signed by the driver.

PERFORMANCE GUIDE

1. Allow only authorized delivery persons inside the firm's premises, as outlined by company policy.
   a. Ask for identification and bill-of-lading.
   b. Receive bill-of-lading from delivery person.
   c. Inspect every package for signs of outside damage.
   d. Have delivery person—or do it yourself—indicate on the bill-of-lading any package damage before signing for the shipment.
   e. Count the number of boxes/packages for agreement with the count on the bill-of-lading.
   f. Sign for the shipment only after "dande" has been completed.
   g. Arrange boxes/packages in a neat form and attach bill-of-lading (or a copy) in a prominent place.
      1) Deliver shipment to stock room/warehouse if that is your assigned task.
      2) Notify stock room/warehouse of shipments arrival.
      3) Notify parties in stock room/warehouse of any outside damage.

TASK 2: Unpack a shipment.

34. PERFORMANCE OBJECTIVE

Given an incoming shipment, unpack shipments, check contents for proper count, note inside damage and arrange items in a logical order, usually determined by the stock room/warehouse supervisor/policy:

PERFORMANCE GUIDE

1. If the shipment is from one supplier:
   a. Open each box carefully one at a time!
      1) Remove staples with staple removal tool.
      2) If nailed, pry boards to release nail heads and completely remove nails.
      3) If taped, cut tape with the proper type of knife. Do not bury the knife into the package as this may damage the contents. (In shipping, items can work their way toward a point where they could be damaged in opening.)
   b. Open box/package carefully.
   c. Remove packing slip. Note how many of each item are listed on the packing slip. There should be two counts: one on the quantity ordered, the other done by the packer. Note where the two figures do not agree. In some cases the packing slip may be on the outside of just one box. In others, it may be in just one box or each box will have its own packing slip. If there is just one packing list, it may indicate which item(s) are in which box.
   d. Remove each item carefully and place in a safe place (as instructed by supervisor) so the further process of unpacking can be done without damaging the items.
   e. Place packing materials in a container provided for same.
   f. Arrange goods in a logical order (as listed on the packing slip, numerically, item, etc.) as instructed by supervisor/policy.
   g. After each box has been unpacked, check carefully to make sure all contents are removed.
      1) Some items are wrapped individually and the number or name is usually written on the outside. If you are instructed to unwrap each item, be sure to attach the number to the item, if it is not on the item itself.
      2) Sometimes items are to be left wrapped/boxed until the next step. Arrange items so that the name/number is easily visible.
   h. Verify the actual and packing slip count:
      1) If the packers count and the number of items you unpacked do not agree, go back through the cartons and packing materials carefully for the missing items. If the item cannot be found, note on the packing slip that the shipment is short these item(s).
DUTY E: PERFORMING RECEIVING FUNCTIONS

TASK 2: Unpack a shipment.

PERFORMANCE GUIDE

The guidelines of etiquette, and of making introductions, are to take unfamiliar situations and make them familiar to everyone involved in the particular situation.

1. Always speak clearly, slowly, and loud enough so both persons can hear what you are saying.

2. Whenever possible, it is best to use first and last names for both people. When you are introducing your peers (those about your same age), you need not precede their names with titles or Mr., Mrs., Miss, Ms.

3. When making an introduction, if either one's job, firm, or place of residence are important, this information should be included after the first person's name and either before or after the second person's name.

   a. When women are introduced to men, the woman is mentioned first. Ms./Miss/Mrs. _____, please meet Mr. _____.

   b. When either two men are being introduced to each other, or two women to each other, the one of higher position, or the eldest if their positions are of equal ranking, should be mentioned first.

   c. If one of the two is very much younger than the other, the eldest person is introduced first.

   d. When one person is being introduced to two people, the person(s) mentioned first are either older or of higher position. Make sure that you indicate what the relationship between the two people being introduced is: Mr. & Mrs. _____, both work for/in, your relationship to whomever any of the parties involved, etc.

   e. If there is a reason for making the introduction, other than just making each familiar with the other, be sure to give the reason why you wanted them to meet. You can even bring up some of the previous conversations you have been having with the party you are escorting.

   f. If the conversation between the two parties is to be short, then stay with those you have been escorting so that you can continue to introduce them to others or so they are not left stranded.

   g. If the conversation between the two parties is going to be an extended one, it is permissible to excuse yourself for a few minutes, but you should indicate that you will return and approximately when.
