This catalog lists resources available from projects federally funded by the Early Education Program for Children with Disabilities. This discretionary grant program supports a variety of innovative service, training, and research projects in early intervention and early childhood special education. Information is organized by type of project: demonstration, experimental/research, information systems, inservice training, outreach, research institutes, research on early childhood features, and the technical assistance center. For each project, the following information is provided: project name, director, address and telephone number, funding period, major goal, titles of written materials or other products available from the project, and topics that the project's staff can consult in and issues they are willing to discuss on the telephone. Project materials listed include assessment materials, curricula, training materials, model intervention strategies, and research reports. (JDD)

PREFACE

This document was originally developed to facilitate networking and sharing of resources among projects funded under the Handicapped Children's Early Education Program (HCEEP) of the Office of Special Education Programs, US Department of Education. This discretionary grant program, now called the Early Education Program for Children with Disabilities, supports a variety of innovative service, training and research activities in early intervention and early childhood special education. The name change for this grant program was required by the recent reauthorization of the Education of the Handicapped Act (EHA), now called Individuals with Disabilities Education Act (IDEA), to reflect the current preference in language.

We at NEC*TAS felt that state planners involved in planning and implementing services under PL 99-457 will also be interested in reviewing this extensive collection of available assessment materials, curricula, training materials, model intervention strategies, and research. Therefore, NEC*TAS has disseminated this document to you - - the coordinators of the Section 619 and Part H grants and the Chair of the Interagency Coordinating Council in every state and jurisdiction.

We invite you to share this information widely with agency personnel, trainers, service providers, parent groups and others who would be interested in materials or consultant resources. As state service systems expand and evolve to meet the requirements of PL 99-457, the Early Education Program grantees offer a range of exemplary service models, training approaches and consultants with experience in meeting such implementation challenges as: providing individualized, family-centered services, coordinating interagency services, supporting families in transition, using less restrictive educational environments, coordinating developmental and health care services, and applying technology to meet individual needs as well as training needs.

Project information in this document is organized and color-coded by type of project: demonstration, experimental, information systems, inservice training, outreach, research institutes, research on early childhood features, and the technical assistance center. Within each project type (color) projects are arranged alphabetically by state, then city.

We appreciate the HCEEP projects' willingness to share their resources with others. Persons interested in specific project resources should contact the listed project staff.

Joicey Hurth,
Associate Director of TA Services

David Tollerton,
Technical Assistant

PROJECT DIRECTOR: Betsy Gibbs

STREET ADDRESS: Clinical Genetics and Child Development Center
Dartmouth-Hitchcock Medical Center
Hanover, NH 03756

TELEPHONE: (603) 646-7884

FUNDING PERIOD: 1988-91

MAJOR GOAL: To design and implement a model that links the medical and developmental/psychoeducational fields and provides specialized support and information services to families and primary caregivers (medical, developmental, and educational) of children with genetic and prenatally determined disorders (GPDDs).

TITLES OF WRITTEN MATERIALS OR OTHER PRODUCTS CURRENTLY AVAILABLE FROM THIS PROJECT:

PURPOSE: To assist states and designated jurisdictions in developing multidisciplinary, comprehensive, coordinated services for young children with special needs, birth through age 8 years and their families; and to provide technical assistance to projects in the Early Education Programs for Children with Handicaps (EEPCD).

ACTIVITIES:
NEC*TAS has three goals:
- To help community agencies and other entities develop their capacity to provide high-quality comprehensive services for children with special needs and their families;
- To help states and designated jurisdictions develop and implement policies and practices that will improve and expand services; and
- To facilitate the national exchange of information.

Technical assistance is provided through:
- On-site visits
- Group meetings
- Resource referral
- Consultations
- Telecommunication linkages
- Print products (contact NEC*TAS for a publication list)
- National conferences

NEC*TAS draws on the expertise of multidisciplinary professionals and parents in providing nationwide technical assistance.

The NEC*TAS system consists of:
- The Coordinating Office at the University of North Carolina at Chapel Hill
- An Advisory Group of nationally recognized professionals
- Georgetown University Child Development Center
- The National Association of State Directors of Special Education (NASDSE)
- The National Center for Clinical Infant Programs (NCCIP)
