The purpose of this handbook is to show how planning and implementing an arts education program can be organized and systematically undertaken. Two alternative planning models are outlined. The first model works for larger schools and involves eight stages carried out by three committees—organizers, planners, and implementers. The alternative model is suitable for smaller schools and has one committee to perform four major roles—advocating and organizing, assessing and planning, supporting and implementing, and evaluating and modifying. An 'ideal' model program is described based on effective features common to successful arts programs. A checklist is provided to help site-level administrators understand their roles in partnership planning. The appendices provide outlines for model curriculum guidelines, inventory forms, a chart of a 7-year curriculum implementation cycle, sample budgets, and resource and instructional material lists. Foreword

In July, 1989, the California State Board of Education adopted a policy which identifies the visual and performing arts as an integral part of basic education for all students kindergarten through grade twelve. This historic document undergirds the efforts of educators and arts advocates to make visual and performing arts instruction a reality for all children in California.

The Handbook for Planning an Effective Arts Program has been developed for teachers, administrators, parents, students, board members, artists and community members. Its contents may be used to enhance an already well-developed arts curriculum, to begin an arts education program from scratch, or to determine where the arts programs in your school fall between those two extremes.

The County/State Steering Committee (CSSC) is a committee of the California Association of County Superintendents of Schools. CSSC works in partnership with the State Department of Education in efforts related to curriculum and instruction in California. The California State Staff Development and Curriculum Leadership Conference is one of those partnership efforts. This Handbook is a product provided by CSSC, initially as part of the conference materials for participants.

This Handbook is designed to be used in conjunction with the Visual and Performing Arts Framework and other documents relative to arts education that are available from the State Department of Education.

The County/State Steering Committee is grateful to Billye Wilcoxson and Patty Taylor who coordinated the development of this document and the other writers for their care, diligence and expertise.

And special thanks to—

Peter Hodges
Principal, Reyes Elementary School
Merced City School District
CHAPTER 1: WHY PLAN?

The Importance of Planning

The School Site Council meeting has adjourned, and the parents and staff on the committee have a very positive feeling about their annual School Accountability Report Card. But the principal, three parents and the district's elementary music teacher linger in the parking lot to talk about some of the areas not addressed at the School Site Council meeting. They are particularly worried about the arts programs in their school. There are no visual arts teachers, no dance/movement classes, and the music teacher is shared with four other schools. The classroom teachers do not feel they are knowledgeable enough in the area of visual and performing arts to plan drama activities as part of their regular language arts program. Currently, student drama experiences are limited to occasional short monologues inserted into the annual concert.

The district's professional development office has arranged very few workshops in the arts, and no information has been shared regarding the Visual and Performing Arts Framework for California Schools: Kindergarten Through Grade Twelve. Artists have not worked in the schools. The principal mentions that there is a State Board of Education Policy on Arts Education and recommendations in the statewide plan for arts education, Strengthening the Arts in California Schools: A Design for the Future. However, there have been no discussions regarding the adoption of a similar policy or recommendations for the district.

Some parents feel strongly that something should be done to improve the state of arts education in the district. The music teacher reports that many elementary teachers agree. The principal points out that teacher training often neglects adequate preparation for teaching the arts. The district has a high school music teacher and an art teacher,
but both have large classes and many demands on their time. School 
administrators agree that the arts are an important part of the 
curriculum, but there are financial constraints which prevent adding 
personnel or materials to the budget.

One of the parents on the School Site Council who has just moved 
into the area describes the high-quality arts programs his children 
enjoyed in the district they previously attended. That district established 
an excellent visual and performing arts program five years ago. With 
sound planning and the collaboration of very committed parents and 
school staff, a good program continues and becomes even better.

One person suggests a meeting to gain support for the arts and to 
decide on an effective course of action. A parent asks, “What is the 
next step?” Of course, the next logical step is to determine a strategy 
to develop or improve the school’s arts programs. As in any group, 
a skeptic comments that planning groups often spend a lot of time 
talking. But the principal points out how much the School Site 
Council has accomplished in the past two years as a result of planning 
and commitment. One parent—a very busy professional woman—
states firmly that planning is the only efficient way to establish goals, 
use resources effectively and improve the existing conditions. She 
is supported by a second parent who adds that planning is just as 
important to improving an arts program as it is in organizing the 
family vacation or launching a satellite. Everyone agrees that arts 
education programs face increasing competition for limited time and 
funds. This makes careful planning especially important when 
developing new programs.

The purpose of this Handbook is to show how planning and 
implementing can be organized and systematically undertaken, as 
well as to provide some suggestions for implementing quality arts 
programs. The appendices at the end of this Handbook are an 
integral part of the document. The readers should stop and check 
each reference as it appears in the text in order to fully understand 
the planning and implementing process described. A rationale for 
school arts programs, arts curriculum development, and teaching
strategies are covered in other documents such as the Visual and Performing Arts Framework for California Public Schools: Kindergarten Through Grade Twelve; Model Curriculum Guide for the Visual and Performing Arts, Kindergarten Through Grade Eight; and Model Curriculum Standards, Grades Nine Through Twelve, Visual and Performing Arts. (Appendix I lists the state documents as well as recent California reports on arts education.)

Many successful arts education planning models are available and reflect commonalities in the planning suggestions. An effective planning process:

- focuses on improvement of the education of young people through instruction in the arts
- requires an accurate survey of existing local conditions
- develops effective program solutions
- has short-term and long-range goals which are clearly stated and are attainable
- includes a timeline
- makes effective use of interested people and existing resources
- includes a financial component
- involves dedicated school and community members who can help implement the plan's recommendations

A Planning Model—Three Committees With Different Roles

The planning and implementing model used in this document involves eight stages:

1. getting started with an Organizing Committee
2. gathering information on what exists through an assessment of the current program
3. setting goals for the arts programs (Planning Committee)
4. determining needs based on the program assessment (Planning Committee)
5. developing the long-range plan (Planning Committee)
6. Implementing the plan with an Implementing Committee
7. Monitoring the implementation (Implementing Committee)
8. Revising and expanding the plan

As you will see in the table of contents and in the pages that follow, this Handbook focuses on the three-committee model with eight stages for program planning and implementation. Planning may occur at the county, district or school level. A three-committee process is suggested using an Organizing Committee, a Planning Committee and an Implementing Committee.

- The **Organizing Committee** is a small, dedicated group which identifies the vision for arts education, begins to determine needs, and builds an advocacy group.
- The **Planning Committee**, an expanded group which may include members of the Organizing Committee, completes an assessment of the current program; determines specific goals, needs and priorities; and develops a long-range plan.
- The **Implementing Committee** may include members of the former committees as active or advisory members, and involves those who are directly responsible for program implementation such as district-level staff, classroom teachers, arts specialists, students, school administrators and arts providers.

As part of planning, each committee develops a timeline which considers:
- What is the overall goal for this group?
- What can be done today?
- What needs to be done next week?
- What can be accomplished next month?
- What do we want to complete by next year?
An Alternate Model—One Committee With Various Roles

Schools or smaller districts may choose an alternate planning model that uses one committee for organizing, planning and implementing the arts education program. In this model, at different times during the process, a core committee would involve additional people as needed. For example, more district staff are involved in curriculum writing and professional development during the implementing phase, while more parents and community members are involved with advocacy and initial planning. The overall tasks to accomplish would remain the same as in the three-committee process. The four major roles of the one-committee model would be:

- advocate and organize
- assess and plan
- support and implement
- evaluate and modify

As the planning process begins, remember that no one model is best for all situations. Committees need to stay flexible and adapt where needed. Then, as the process for planning and implementing nears completion, don't close the curtain. There is never a final act in this planning drama. There are actors waiting in the wings to add their own special talent and author future rewrites. Each audience is different, so keep evaluating the script as you revise and improve your plan for arts education.
The Process is an ever-widening spiral of involvement. A larger program involving more students, teachers, schools, administrators and parents, or encompassing more of the arts (dance, drama/theatre, music, visual arts) in greater depth, complexity and intensity.

**YOUR JOB** . . . *KEEPING THE PROCESS MOVING!*

**REEVALUATE OFTEN!**
CHAPTER II: WHAT DO WE WANT?

The “Ideal” Program

A quality visual and performing arts program, or the “ideal” arts program, will vary with each school and community since each has its own unique goals, resources and needs. However, planners will want to study the concrete descriptions provided in the California State Department of Education Quality Criteria: Planning, Implementing, Self-Study and Program Quality Review documents for high school, middle school and elementary school. Their visual and performing arts criteria portray central features of a high-quality program.

The following features are some that are common to effective and successful programs in the arts:

- have curriculum and instruction based on the components of the Visual and Performing Arts Framework and the guidelines or cornerstones of the Model Curriculum Guide and the Model Curriculum Standards (Appendix II)
- have a comprehensive, written, sequential visual arts and performing arts curricula for all students K-12, which includes those students with special needs
- provide ample instructional time for the arts
- focus instruction on each of the arts (dance, drama/theatre, music, visual arts) as discrete areas of study
- integrate the four arts with each other and correlate the arts with other subject areas, when appropriate, to strengthen and enrich learning
- provide students opportunities to pursue one of the arts with in-depth instruction
- have ways of assessing students’ levels of arts literacy
- provide teachers with adequate time for planning, preparation and professional development for arts instruction
- have strong financial and philosophical support from the school board and administration
handbook for planning an effective visual and performing arts program

- have appropriate class size based on the type of arts activity
- provide studio work space and performance space designed for visual and performing arts instruction
- develop unique aspects and characteristics that tailor the arts programs to the particular district and school
- have a strong and enthusiastic support group composed of teachers, administrators, parents, and other community members
- involve students in planning the program whenever appropriate
- involve community artists and arts providers, such as museum docents or performing groups, who are trained to work in the classroom
- include student exhibits and performances for the school and community

the administrator's role in partnership planning

the site-level administrator is crucial to the planning and success of the visual and performing arts program at the school. When the administrator is also an advocate for the arts, decisions are made which result in the kinds of resources and opportunities for professional development needed for a quality program.

the arts are required to be part of the core curriculum for all students. To assure the arts are an integral part of the school's curriculum, the principal will want to spend time reflecting on the current school program. This should be followed by focusing on the "what," "why," "how" and "by whom" of implementing program change. A difference in the case of the arts may be the level of awareness, experience, and/or knowledge the administrator has, relative to the content of visual and performing arts education.

The "what" of the arts is contained in the Visual and Performing Arts Framework, Model Curriculum Standards 9-12, Model Curriculum Guide K-8 (to be published in 1990-91) and the Program Quality Criteria published by the State Department of Education (Appendix I). By referring to these documents, an administrator will...
gain knowledge of what an arts curriculum should encompass, what the criteria are for determining the quality of arts programs, and some strategies for teaching the content of the four arts disciplines: dance, drama/theatre, music and the visual arts.

The "why" of the arts is contained in the policy adopted by the State Board of Education, the Framework and the documents recently produced by three task-force groups interested in improving arts education in California (Appendix I).

Education Code Section 51210 addressing the Course of Study, Grades One to Six, includes under Areas of Study, "...(e) Fine Arts, including instruction in the subjects of art and music, aimed at the development of aesthetic appreciation and the skills of creative expression...." Additionally, there is a high school graduation requirement legislated in 1983 (Senate Bill 813) that requires one year of a visual or performing art or foreign language.

The "how" includes curriculum, methodology, and advocacy for arts education. Advocacy means:

- supporting instruction in the arts for all students
- making commitments to staffing for arts instruction
- scheduling the school day to accommodate the arts along with the rest of the core curriculum
- making budget decisions that support the needs of a comprehensive arts education program
- providing time and resources for professional development

Information on "how" to deliver the content of the arts to all students is included in the Framework and is available through the California Arts Project, mentor teachers, county offices of education, and the professional arts education associations, etc. (see Resources in Chapter V).

The "by whom" places the school principal in a central role for providing an arts program at the school site. He or she builds a support team for the arts that includes teachers, other school and district administrators, professional development providers, board members, students, parents, arts providers, university arts and
teacher education faculty, and community members. It is often through the personal interest and intervention of these individuals that corporate and philanthropic support is made available to arts education in the schools. For example, parents, art museum and performing arts organization personnel, and other community members can provide strong support for arts instruction at the school through their advocacy for the arts to the school board and in the broader community.

It is not necessary for an administrator to be an expert in the visual and performing arts in order to support arts in education. It is necessary for the teaching staff to know that the site administrator values the arts as an integral part of the education process. All teachers who are responsible for providing the core curriculum to their students should be expected to include the arts in their instruction. In addition, when they are available, specialists in each of the four art disciplines teach their art form in the elementary program. Trained dance, drama/theatre, music and visual arts education specialists provide instruction at the middle and high school levels.

Support for planning an effective visual and performing arts program is provided by the site and school district administrators. It is through the attention of individual administrators, and through the support teams they build, that all students in California will experience a well-planned and implemented visual and performing arts program throughout their school years. The following administrator's checklist helps to focus on four areas in which the administrator provides support and leadership for the arts education programs.

Whatever vision is shared concerning the school’s or district’s arts program, it is important for the Organizing Committee to be flexible, keep everyone involved, and listen to each other so the program develops into a concert that brings all voices together in harmony.
ADMINISTRATOR'S CHECKLIST

A. Provide active leadership to support arts education
   □ Initiate a board of education policy in support of arts education
   □ Include the visual and performing arts as part of the core curriculum
   □ Provide curriculum specialists in the arts
   □ Designate a staff member as liaison for visual and performing arts
   □ Support the development of a sequential, written curriculum based on the
     visual and performing arts curriculum resource documents
     □ Visual and Performing Arts Framework K-12
     □ Model Curriculum Standards 9-12
     □ Model Curriculum Guide K-8
   □ Develop a plan to provide comprehensive arts education programs at the
     school(s)
   □ Allocate the resources necessary for high-quality, comprehensive arts education
     □ Adequate instructional time
     □ Arts specialists
     □ Curriculum materials
     □ Facilities
     □ Supplies and equipment

B. Provide staff development opportunities on value and content of arts education
   □ Contact the California Arts Project for information and assistance
   □ Utilize teachers from the California Arts Project
   □ Utilize district, county and regional professional development resources in the
     arts
   □ Disseminate information to staff on professional development opportunities in
     the arts
   □ Provide release time for teacher participation in professional development
     activities in the arts

C. Collaborate with other agencies to support arts education
   □ Local arts councils and commissions
   □ Community Colleges
   □ California State Universities
   □ Museums and other cultural institutions
   □ Community arts providers
☐ Identify community resources to support arts education
  ☐ Artists
  ☐ Performing arts groups
  ☐ Arts providers

☐ Utilize community resources in the arts
  ☐ Artists
  ☐ Performing arts groups
  ☐ Arts providers

☐ Identify funding sources available to support arts education
  ☐ California Arts Council
  ☐ Foundations
  ☐ Businesses and corporations

☐ Utilize professional state arts organizations
  ☐ California Art Education Association
  ☐ California Music Educators Association
  ☐ California Theatre Educators Association
  ☐ California Dance Education Association

☐ Enlist the Business Volunteers for the Arts

CHAPTER III: HOW DO WE GET STARTED?

The Organizing Committee

The people with the vision of a comprehensive, planned visual and performing arts program for all students will need to consider some important questions as an Organizing Committee is formed. These questions may be the agenda for the Organizing Committee’s first meeting:

1. What is the goal?
2. What tasks are involved?
3. What problems may surface?
4. How long will it take?

An Organizing Committee may be composed of supportive administrators and teachers, along with parents and community advocates, who are dedicated to the arts and to providing arts education for all students. An interested board of education member will be an asset to the committee and will provide important insights for fellow board members when the visual and performing arts program plan is presented for adoption. It is important to keep this committee small to maintain the focus.

The Goal

Provide a comprehensive, quality visual and performing arts education program for all students that includes:
- instruction in dance, drama/theatre, music and the visual arts
- written, sequential curriculum based on The Visual and Performing Arts Framework
- community resources [e.g., museums, cultural organizations, artists]
The Organizing Committee's vision for a visual and performing arts program that implements the goal may begin with a school site, several schools or the entire district. The vision encompasses the philosophy of the State Visual and Performing Arts Framework and considers the recommendations in the report published by the California State Board of Education in 1989, Strengthening the Arts in California Schools: A Design for the Future. A summary of these recommendations is provided on the following page.
STRENGTHENING THE ARTS IN CALIFORNIA SCHOOLS:
A DESIGN FOR THE FUTURE

This report, as stated in its executive summary, contains recommendations which reflect the concerted thinking of hundreds of individuals committed to arts education. The report is intended to contribute to the realization of a larger vision that comprehensive and sequential instruction in the visual and performing arts is an essential part of the educational development of all young people in the state.

THE RECOMMENDATIONS ARE:

1. POLICY
   The State Board of Education shall adopt a policy endorsing arts education.

2. CURRICULUM
   The State Department of Education shall develop, publish, and actively promote curriculum resource documents in the visual and performing arts.

3. STAFF DEVELOPMENT
   Ongoing professional staff development shall be provided by the State Department of Education, county offices of education and school districts.

4. RESOURCES
   School districts shall provide the resources necessary for a comprehensive arts education program.

5. ASSESSMENT
   Assessment of student achievement in the arts and evaluation of arts programs shall be carried out in a rigorous and comprehensive manner.

6. COLLABORATION
   The State Department of Education shall collaborate with other agencies and organizations to strengthen arts education.

7. TEACHER TRAINING
   Institutions of higher education shall strengthen course offerings in visual and performing arts for prospective teachers.

8. LEADERSHIP
   The State Department of Education shall provide and encourage leadership in strengthening arts education.

9. RESEARCH
   Arts education research in such areas as curriculum, assessment, and teaching practices should become a funded priority of the public university system.

10. ADVOCACY
    The State Department of Education shall develop an arts education advocacy program to build public and legislative support.
The Organizing Committee accomplishes the following tasks:
- becomes familiar with the California State documents on the visual and performing arts (Appendix I)
- adopts a rationale for the arts program for all students
- builds a strong advocacy group
- promotes the adoption of a board policy on arts education that aligns with the policy adopted by the State Board of Education (provided at the end of this chapter)
- discusses what administrative assistance will be needed
- establishes the larger Planning Committee
- reports their work to the Planning Committee

Organizing Committee Advocacy

The advocacy task of the Organizing Committee involves building support for the cause and influencing opinions and decisions for change. One of the first advocacy tasks for the Organizing Committee is to request that the local board of education adopt a policy on arts education similar to the one adopted by the California State Board of Education in July, 1989. (The policy follows at the end of this chapter.) The committee will need to build advocacy for the policy in the school community so that all of the board members will support both adopting and implementing the policy.

With the stated goal for arts education, the board policy, and a rationale for an arts education program for all students in hand, the Organizing Committee keeps those who are already supportive of their plan informed and also begins educating those who may become involved in making changes that will help implement the visual and performing arts program. Advocates come from many sectors. Parent and community advocates communicate to the school board and to district and site administrators how highly they value arts education. Board of education members become advocates as they set policies that include the arts in the school program. District administrators advocate for the arts in the allocation of resources to the arts education program. Site administrators are arts advocates as they encourage the delivery of the arts curriculum to all
students by providing necessary resources, time and professional development. Teachers show their support of the arts through the instructional activities in which their students are involved.

All of these people are essential to the successful planning and implementation of arts programs. From the beginning of the planning process, advocates from all these groups are a necessary component for success and must be constantly informed of the committee's plans and progress. They form a team and a network to call upon for assistance and support.

The Organizing Committee will be gathering support and making some preliminary decisions about the programs; they paint the large background for the Planning Committee to complete. It is like a choreographer or a designer giving the dancer or the graphic artist a theme or vision on which to build a work of art.
It shall be the policy of the State Board of Education that

Arts education, which includes dance, drama/theatre, music and visual arts is an integral part of basic education for all students kindergarten through grade twelve;

Districts should develop a policy, allocate resources, and carry out a plan to provide a high quality comprehensive arts education program for all students, based on the adopted visual and performing arts curriculum resource documents.

In support of this policy, the California State Board of Education urges the implementation of the remaining recommendations in *Strengthening the Arts in California Schools: A Design for the Future.*

In further support of this policy, the State Board of Education recognizes the 'Concepts for Strengthening Arts Education in Schools' published by the American Council for the Arts.

Adopted July 1989
In support of their policy on visual and performing arts, the State Board of Education recognizes the 'Concepts for Strengthening Arts Education in Schools' published by the American Council for the Arts, which states that

1. The arts should be taught as disciplines to all students. This includes student involvement in creating, studying, and experiencing the arts.

2. Regular instruction in the various arts must be a basic part of the curriculum in all elementary and secondary schools; such instruction must be integrated with the highest quality arts experiences both in schools and in theaters, concert halls, and museums; such experiences must be integrated with instruction as part of comprehensive curricula.

3. Arts curricula should be for the development of skills in and knowledge of the arts. In addition, learning about and experiencing the arts can develop critical and creative thinking and perceptual abilities that extend to all areas of life. These benefits are best imparted through instruction in the basic skills in and knowledge of the arts.

4. The arts relate naturally to much of the content of the total educational curricula. For this reason, all teachers should be encouraged to incorporate arts skills and knowledge into their instruction in order to enliven, broaden, and enrich all learning.

5. The curricula of teacher education programs in general should have a stronger arts component as part of the pedagogical preparation of all teachers.

6. Pre-service and in-service training of both teachers and artists should be augmented to include significantly greater experience of one another's working methods. Arts education benefits when arts teachers have high levels of artistic skill and knowledge of the arts, and when artists develop teaching abilities and knowledge of child development.

7. Resources are often available through individuals and arts organizations and in elementary, secondary, and postsecondary education to form the foundation for quality arts education programs in each local community. These resources must be identified, integrated, utilized and expanded.

8. The local focus for decision-making about arts services and arts education, including local control over curricula, must be respected. Within this framework, ways must be found at the local level to meet or exceed the goals and standards established by professional arts education associations and accreditation authorities. This should include criteria for school programs, certification of personnel, the participation of arts organizations, and arts and teacher preparation programs.

9. Arts education programs, which are designed to increase cultural literacy, will build audiences and strengthen community volunteer and funding support for cultural visual and performing arts organizations and institutions. Therefore, these organizations should allocate significant resources and efforts in support of arts education.

10. We must establish for arts education a coordinated policy-making process that includes the arts and arts education communities. Over time, this will vastly increase our ability to affect the policies of others whose support is needed to make the arts and the study of the arts more central to the educational mission of communities.

11. Basic research, model projects, and advocacy efforts are critical to establishing a consistent and compelling case for increasing the economic base of support of arts education in schools and in the community at large. While the primary responsibility for increasing budget allocations in support of education programs rests with local school boards and administrators, we all must recognize our share in this responsibility.

CHAPTER IV: HOW DO WE PLAN?

The Planning Committee

At this stage there is a board policy, broad general goal, a rationale for a visual and performing arts program and an advocacy group. Now the Organizing Committee needs to be enlarged into a Planning Committee in order to assess current arts programs, determine needs and develop program plans. This committee should be balanced to include school personnel, district personnel, parents, students and arts community members. The advice of arts consultants, additional district or school staff, university arts education professors, and community arts professionals will be particularly useful. An existing nonprofit community organization, such as the community arts council, may be called upon for advice or to administer part of the plan in concert with the school district.

The Planning Committee accomplishes the following tasks:
- reviews the report from the Organizing Committee
- selects a committee chair
- defines the group’s goals, tasks and timeline
- completes an assessment of the current arts program
- determines specific arts program goals, needs, objectives, and priorities based on the program assessment
- identifies people who may be needed as resources as the plan is developed
- develops a written long-range plan for an arts education program which:
  - includes an implementing timeline
  - identifies people responsible for implementing
  - includes budget implications

Before getting started in planning, take a look at what you already have. Talk to school staff, students and parents while gathering facts and opinions. Complete a formal assessment and record informal
discussions. The identified needs, goals and plan for arts education will be based on these vital steps of information gathering.

Members of the Organizing Committee complete the formal assessment of the current arts programs by using the forms in Appendix III or developing their own. The program assessment included in the appendix is based on the contrast statements and exemplars used in the California State Department of Education Program Quality Review documents. The forms provide for numerical scale ratings, as well as for narrative statements of observations. The scale scores and narrative statements will be used by the Planning Committee for developing arts programs. Additional needs assessment information can be gained by using the district-level, county-level, professional development, and community arts resources inventory worksheets in Appendix IV.

Additionally, statistics are needed that verify the number and types of arts teachers currently employed and the funding presently allocated for equipment, supplies and expenditures. Most of these facts are not line items in the typical school budget and must be solicited through personal interviews with school and district administrators and arts teachers. People from the business office may be invited to a meeting to explain the district’s budget process.

Just as artists assemble a portfolio to show examples of current work, the Planning Committee is gathering information which shows what currently exists. This is the information on which the visual and performing arts program plan will be built.

**Developing the Plan**

A form has been provided at the end of this chapter which can be used for the visual and performing arts program plan. Before proceeding, the committee would benefit from reviewing the sample arts program plan included as Appendix V. The sample plan
represents a district’s effort to assess, plan and implement a more effective visual and performing arts program.

After the entire Planning Committee has an opportunity to brainstorm and prioritize needs and goals based on the assessment, one or more of the committee members or the selected plan writer prepares a first draft of the long-range plan. The plan can be written to be implemented in several phases, each phase taking one or more years. Review the State Department of Education Curriculum Review, Seven-Year Curriculum Cycle for the Visual and Performing Arts (Appendix VI) for ideas in phasing in curriculum improvements. All reports and surveys, as well as material and human resource inventories, are taken into consideration while drafting the arts plan.

Budgeting sharpens all programming concepts, and the Planning Committee should consider both income and expense items when drafting a planning budget. Make a list of all potential funding sources and realistic estimates of the funding available from each. The beginning of a more extensive budget funding resource list is included as Appendix VII. Don’t forget the value of in-kind services and include their estimated value in both the income and expense columns of the budget. During the planning process, financial realism may require the revision of some program priorities.

The first draft of the visual and performing arts program plan is reviewed by the Planning Committee for refinement and approval. The draft form of the plan is then shared with district administration and school and community leaders for reaction and input.

Before completing the final program plan, the Planning Committee chair should discuss and develop major program ideas with the groups and individuals directly affected, such as school principals, teachers and arts specialists. Their support will be needed when the final visual and performing arts program plan is proposed to the board of education for adoption. Just as in a theatre production involving a “cast of thousands,” keeping everyone informed, involved and committed to the final production is the key to success.

District or School ___________________________ Date ___________________________
CHAPTER V: MAKING IT HAPPEN

The Implementing Committee

When the planning stages are over, it's time to start implementing. Remember—the means for making your plan happen have largely been worked out during the previous planning stages.

For example:
- Key persons from the school district and community have been involved from the beginning, and their roles and responsibilities have been identified and reinforced.
- The Planning Committee has developed a prioritized plan and timeline that is specific and "do-able."
- Administrators and the school board are informed of the plan and will be kept informed of the progress.
- The school board has adopted a policy in support of arts education in your district.
- A budget-making process has determined the funds needed to meet program goals, and some funding sources have been identified.

At this stage, efforts will need to be redirected from planning to implementing as you begin the task of making the plan happen. Although the original planning group may be used, members may need to be added or some of the original committee may wish to take a less active role. Now that the committee's functions and responsibilities are changing, the group is reorganized into the Implementing Committee.

The Implementing Committee includes site administrators, teachers, professional development staff, other district administrators, a member of the superintendent's cabinet, a member of the board of education, and community artists or representatives from arts groups who are part of the plan.
Consider including some new people who are very important in making the plan a reality. Perhaps your plan calls for trying out an aspect of the program at one specific site or at a certain grade level at many schools; include as many people from these sites as possible. Everyone may not be able to serve on the Implementing Committee, but there are subcommittees which can utilize people for specific tasks. Include parents, students, artists, and community members on these subcommittees.

The primary responsibility of the Implementing Committee is to make every aspect of the arts education plan a reality. The committee will be involved in some major tasks, such as:
- supporting the selection or development of curriculum
- activating the staff development portion of the plan
- identifying resources
- continuing advocacy for improved arts education

Continue to make good use of those people who have been energetic supporters in the past. Some may serve on an Advisory Committee, useful as a sounding board when trying new ideas or when discussing future plans. Some people will be particularly helpful in finding additional resources and in building advocacy for the arts education program. As an example, an Advisory Committee which was successful in providing support for implementing an arts education plan in a large, suburban school district identified the following three points as their function:
1. to facilitate two-way communication between the school community and the school district
2. to provide a support group for visual and performing arts activities in the district
3. to provide written/oral presentations to board-appointed committees, school councils, community organizations and the school board when requested by the community arts committee or the school district

The group was composed of members who represented a balance among the arts disciplines (dance, drama/theatre, music, visual arts); geographic areas of the district; community support groups (e.g.,
junior music sponsors, arts support groups, junior symphony league, art museum); and the demographics of the community. Members included parents, community organization representatives, district/school administrators and teachers.

The Tasks

Curriculum

Part of making your arts plan happen includes looking at what is being taught. One of the major responsibilities of the Implementing Committee will be to facilitate the selection or development of curriculum. Here is where the California State Framework, the Model Curriculum Guide, and the Model Curriculum Standards for the Visual and Performing Arts will be essential. Many county offices of education and professional arts education organizations also have documents or information which will help in the curriculum development process.

The Implementing Committee supports the formation of a curriculum subcommittee that includes teachers, district/county coordinators, arts specialists and administrators. This group selects or develops the curriculum and reviews and evaluates available instructional materials. After the curriculum is determined, this group will select or develop criteria for assessing textbooks, teacher's guides and packages of written and audiovisual materials. A sample "Checklist for Evaluating Instructional Materials" is included as Appendix VIII.

The State Board of Education adopts textbooks and instructional materials for kindergarten through grade eight. Districts that are examining the arts curriculum will want to look at the instructional materials in music and art which are available for preview at designated sites. (See Appendix IX for the location of the Instructional Materials Display Centers.) Although instructional materials in drama/theatre and dance are not adopted, many quality materials
are available and should be considered. Included in Appendix X are lists of sample resources for each of the four arts disciplines.

**Professional Development**

Many school districts already have professional development (sometimes called staff development) plans, and have combined resources with other local districts or are using the services of their county office of education, regional consortium and the state's subject-matter projects. Representatives from these groups can be a resource at every stage of planning arts programs.

The content and focus for professional development activities will be included in the arts plan. The Implementing Committee works out a timeline, suggests a structure, and taps available resources such as the California Arts Project, regional arts agencies and summer institutes (see the resource section included in this chapter). Of particular importance is legislation carried by Hart-Morgan as SB 1882 (see Chapter 1362, statutes 1988, Education Code Section 44670.1 et seq.). Through this legislation, the California Arts Project will conduct summer institutes and academic year follow-up activities at regional sites. Districts are encouraged to support their teachers' participation in these institutes. The Project will also be involved with the regional consortia established by SB 1882 in efforts to link district needs with the services of the Project. The funding provided by SB 1882, as well as other professional development funding, can be used to support the costs of district and school-level involvement in professional development activities offered by the California Arts Project.

The plan should consider varied methods of meeting the need for professional development of staff including institutes, staff meetings designed to deal with particular arts issues, workshops, demonstrations and observations of colleagues. Cultural experiences, such as seminars with museum personnel, planned meetings with recognized artists, and study at an arts center are beneficial.
Comprehensive professional development is essential to the success of all arts programs. Research shows that teachers change in direct proportion to their personal involvement in staff development. Specific activities that include follow-up for teachers, administrators and artists need to be challenging and well-planned. A skillful blend of theory and content, as well as opportunities for modeling the practice of new skills with feedback, should be designed into all professional staff development activities. Following are some ideas for approaches that can be combined for professional development in the arts.

**Professional Development Activities**

The following examples of professional development can be combined to suit the individual district and school staff needs.

- **Institutes**
  Summer institutes offer an opportunity for in-depth training in the content of each of the arts disciplines along with classroom instructional practices. Long-term training with follow-up support during the school year provides a substantial basis for improved instruction in the visual and performing arts.

- **Teachers Teaching Teachers**
  Instructors in the arts at the secondary level have skills and expertise to share with other teachers. Some schools regularly utilize their arts teachers to conduct workshops for their peers. The Mentor Teacher Program has provided a way to identify master teachers as mentors. Another resource is the California Arts Project, a statewide group of educators who have been trained to provide professional development services in the arts.

- **Peer Observations**
  Many teachers can benefit from observing others in their profession. Some schools have arranged schedules so that days designated for staff development are staggered in such a way that teachers are free to observe at other schools. Another way of arranging for
peer observation is to build substitute teacher time into the budget so that teachers can visit classrooms in neighboring districts.

- **Arts Education Specialists**
  Educators specifically trained in one or more of the arts can be especially helpful with the training of teachers. The services of arts specialists can often be arranged through county offices of education.

- **Continuing Education for Arts Teachers**
  A professional development plan for arts educators includes an opportunity to continue their own artistic development in a variety of ways, such as peer observation, discussions/lectures with recognized artists, and practice with artists.

- **Higher Education**
  Coursework through the rich learning environment in the arts on California State University, University of California and community college campuses is a valuable resource to be utilized in developing or extending expertise in the art forms.

- **Artists as Resources**
  Artists, architects, musicians, composers, dancers, choreographers, actors and other arts professionals can provide special meaning and depth to the professional development of teachers, administrators and board members. In addition, historians and art critics can provide greater understanding of the four Framework components of arts education.

- **Arts Providers**
  Communities often have arts organizations which provide professional development activities. Arts providers include museums, music groups (such as the opera or symphony), theatre groups, dance troupes, cultural centers, regional arts councils and community arts organizations. In some areas, arts providers which reflect varying ethnicities provide background on the history and culture of specific art forms. Metropolitan areas frequently have
Handbook for Planning an Effective Visual and Performing Arts Program

nonprofit organizations which make available the services of artists who have been trained to work in the classroom.

- **Professional Arts Education Associations**
  Each of the visual and performing arts (dance, drama/theatre, music, visual arts) has a statewide organization for professional educators which provides workshops and training at state or regional conferences.

**Resources**

Effective arts education programs use a wide range of instructional and personnel resources. Although every possible resource cannot be listed in this Handbook, a few are included that should be particularly useful in planning and implementing the district or school arts programs. We hope these will stimulate your own ideas about people, businesses, organizations, institutions and alliances that can be enlisted in your community.

Only the people living in a community can identify its unique resources. The importance of using resources cannot be emphasized enough. At least two purposes are served. One is the rich texture and depth added to what a teacher can do in the classroom. The other is advocacy and improved public relations. The broader the involvement, the stronger the advocacy for improved arts programs.

**Local Resources**

Successful school arts programs make use of community arts resources. Experiences include performances by musicians and dancers in the schools; students traveling into the community to attend theatre, dance and opera rehearsals and performances; visiting museums and galleries; taking walking tours to view art displayed in public places; and sketching neighborhood or architectural landmarks.
Parents and school faculty with artistic talent and/or training may also prove to be a resource to assist with the arts programs. Beyond those directly involved in the schools, the broader community and businesses should be canvassed for contributions of both arts expertise and materials.

**Arts Providers**
Numerous arts providers are willing to support arts education programs. They can give educators information and skills necessary to integrate arts experiences and materials into the curriculum. They may provide demonstrations, hands-on workshops, lectures, and courses that help teachers and/or students understand an art form, arts techniques or special exhibits and performances. Trained docents or artists are often available to make classroom presentations or to lead students on tours at the museum or performance hall. Arts providers may have libraries, slide collections, audio- and videotape collections, technical materials and other expertise to contribute.

The following list is a start in finding local arts providers:
- art museums
- the symphony orchestra
- the opera
- the ballet
- ethnic cultural groups
- dance companies
- regional arts groups
- repertory and other theatre companies
- the theatre center
- the music center
- art galleries
- chamber music groups
- jazz ensembles
- arts festivals
- general cultural or history museums
- the local tourism department
- theatrical agencies
- organizations providing arts experiences for children through direct contact with artists and the arts, such as the Artists in Schools Program (from CAC)
Other Local Resources
To find volunteers, planning assistance, financial assistance for new programs or events, or for artists of all types you may contact:

- local chapters of professional organizations (e.g., architects, designers, historians, musicians)
- service clubs (e.g., Junior League, Kiwanis, AAUW)
- senior citizen organizations
- local recreation departments
- ethnic heritage organizations
- a nearby United States military base
- historical locations, events, celebration committees
- historical societies

Professional Arts Educators
After connecting with those who have artistic talent or expertise on your staff, check with the staffs at other local schools at all grade levels, including community colleges and universities, for professionals to involve in your program. Districts and county offices of education usually have professional staff who are assigned to assist schools in developing and implementing arts education programs.

Professional arts educators have their own expertise to offer, as well as their membership connections to state and national arts education associations. Listed below are some of these professional arts education organizations and resources. Most have publications, conduct conferences and workshops, and provide information that will be of assistance as you plan and implement your program. Contact a Visual and Performing Arts Consultant at the California State Department of Education at (916) 322-3064 for information on how to contact these organizations.

The California Alliance of Arts Education (CAAE)
This alliance is part of a federally funded advocacy network with chapters in every state. It is a coalition of major state organizations concerned with arts education, as well as individuals representing
divergent interests from the public sector, private sectors of business and industry, artists and educators. Its purpose is to develop, promote and maintain quality arts education programs for all the arts for every student. The members of CAAE promote activities to increase community support of arts education and encourage the development of programs in the arts not yet provided in the schools.

Organizations devoted to specific art forms include:
- The California Art Education Association (CAEA)
- The Legislative Action Coalition for Arts Education (LACAE)
- The California Music Educators Association (CMEA)
- The California Alliance for Physical and Health Education, Recreation, and Dance (CAP-IERD)
- The California Educational Theatre Association (CETA)
- The California Dance Educators Association (CDEA)
- The California Humanities Association (CHA)

The State Department of Education
The History-Social Science and Visual and Performing Arts Unit of the California State Department of Education in Sacramento is a resource for information on curriculum, professional development and technical assistance. Unit consultants can suggest nearby school districts with successful arts education programs. The Department sponsors and cosponsors workshops and conferences, and coordinates the development and publication of curriculum support documents. Visual and Performing Arts consultants may be reached at (916) 322-3064.

The California Arts Project
The California Arts Project, established by SB 1882 in 1988, is the state's subject-matter professional development project in visual and performing arts. The Arts Project exists to strengthen teachers' subject-matter knowledge in dance, drama/theatre, music and visual arts, and to enhance instructional strategies in these disciplines.

The Project and its regional sites function on two levels. Project sites conduct intensive summer institutes and follow-up activities for
classroom teachers, arts specialists and administrators. These activities focus on arts content and the Framework, Model Curriculum Guide and Standards, as well as professional development activities and related classroom applications and strategies.

The Arts Project also exists as a subject-matter resource to provide assistance to local schools and districts as they form their professional development plans. The Project is a resource available to regional agencies and consortia established by SB 1882 as they assist local schools, districts and county offices of education in their efforts to implement curriculum improvements.

For additional information, contact the California Arts Project at (415) 499-5893.

The University Connection
University art instructors can serve as scholars in the arts, and many are involved in teacher preparation. They can be a resource for professional development, may wish to volunteer in a classroom, or may host a workshop on the university campus. They may also provide teachers with access to university resources such as concert halls, libraries, slide collections, and technology for making slides and videos.

The California Arts Council
The California Arts Council (CAC) is both an advocate for the arts and a funding agency for arts institutions and artists. Its purposes are to encourage artistic awareness, participation and expression; to help independent local groups develop their own arts programs; to promote employment of artists and craftsmen in both the public and private sectors; to provide for exhibition of artworks in public buildings throughout California; and to enlist the help of all state agencies in the fullest expression of our artistic potential. One project category in the CAC Arts in Education Program is "Artists in Schools." These are projects funded for three to nine months for grades K-12.
Call the CAC Arts in Education staff at (916) 445-1530 for answers to questions such as:

- Who are the arts providers in our area?
- Do you know of any arts groups in our area who work in the schools?
- Can you give me information on your Artists in Schools program?

Local Arts Councils
Numerous community arts councils and commissions have been formed throughout the state through the California Arts Council State/Local Partnership Program. They provide links between individual artists, arts institutions, schools and the public. Some provide grants, technical assistance or information networks. Some have arts education committees that need and/or provide volunteers. There may be an existing arts resource directory available at your local arts council. A telephone call to the California Arts Council at (916) 445-1530 will tell you where the nearest local arts council is located and what other services might be available, such as visiting artists who function well in a school environment, information on art exhibits in public places, speakers on arts administration or other arts careers.

National Reports and Resources
Appendix XI provides a list of national reports and national arts education resources. This list is not meant to be inclusive, but is a beginning for locating resources and research material that may benefit the planning and implementing of a comprehensive arts program.

Advocacy
Advocacy is the process of actively advancing a cause, and lobbying is the action of a group with a common interest to influence opinions and decisions for change. The participants in the arts education program planning process have been involved in both advocacy and
lobbying. The desire to provide a quality visual and performing arts program for all students in the district or school has evolved from an idea into a plan. Advocacy has continued as the Implementing Committee members influenced prime decision makers and built support through the involvement of teachers, administrators, parents, students and the community.

Don't stop now. Too often support groups stop short. The arts programs seem to be off to a good start, then the administration changes. The district changes the focus of budgeting, the professional development office takes a new direction, no arts teachers apply to be mentor teachers, the parent that always spoke for the arts at the board meetings moves, or new district graduation requirements leave little time for students to take a course in the arts. These are the kinds of factors that can inhibit the progress of arts education programs.

One source for advocacy is an Advisory Committee to the Implementing Committee. These involved people can be an active advocacy group, as can all of those who have been involved in the planning process. The key is to keep everyone informed and active. Following are a few suggestions for advocacy:

- **Keep the vision clear.** Remember, the students are the primary consideration. Look at the total visual and performing arts program when you monitor and evaluate. Be specific concerning what you want. Continue to get input from all sources. State the vision over and over in one or two sentences so everyone remembers it.

- **Hook into what is already there.** Investigate and stay in touch with the educational process at all levels—state, county, district, community and school. Check on the cycles for curriculum evaluation, planning, allocation of resources and implementation. Keep in touch with the state government by getting to know your legislators. Follow and support the legislative bills that benefit the arts. It is well-known that calls from ten constituents can influence a legislator's vote.
• Welcome the assessment and evaluation teams. Use the state, district or school evaluation process to your advantage. Point out what you still need, as well as what you already have. If there is no assessment that includes your arts programs, plan your own and show the results to key decision makers.

• Continue to access all the resources. Big or small gifts and contributions form a bond with the giver, and one contribution often leads to another. Show your appreciation and give recognition over and over again. Look near and far for new resources.

• Educate new advocates. Gather advocates from all segments of the community—don't just concentrate on those already considered supporters of the arts. The news media can give the program a high profile. Keep your arts programs in the spotlight through:
  • large and small student exhibits and performances
  • workshops and demonstrations for potential supporters
  • newsletters
  • special events and benefits in the community that may involve legislators, the mayor, councilpersons, the general public
  • arts students volunteering to help others
  • events and awards ceremonies that give recognition to those who have helped the program

• Become a permanent fixture. Be part of the educational decision-making process of the district and school by volunteering to serve on committees that may have an effect on the arts programs such as curriculum, graduation requirements, school site council or budget.

• Adjust and reevaluate on a regular basis. Always bring the vision into focus, know when to focus the attention on your successes and when to focus on your needs, and prune off the unnecessary off-shoots.
Making it happen is an ongoing process, much like the process of being an artist in any of the art forms. An artist’s skills and style are always under refinement and, when one work of art or performance is complete, there is always another in progress or existing as an idea yet to be realized.
Advocacy—Arts in Education

Advocacy is an essential element in planning the arts curriculum—an element in planning which evolves in focus along with the growth of the program.

Advocacy is strategic and incremental, based on a reasonable appraisal of curricular need and organizational capacity. Small and steady gains may be more beneficial than large, episodic displays in terms of solidifying an ongoing, sequential curriculum.

Strategic advocacy begins with a review of the Visual and Performing Arts Framework and an assessment of local curricular needs. These needs may vary from an initial awareness of the necessity of including the arts in the core curriculum, progress to strategies for managing the time and activities of such a program, move toward the exploration of sophisticated strategies to build enriching collaborations, or refine the components of a well-established curriculum. Local experience will shape the strategic agenda for advocacy.

Advocacy requires a dedicated cadre of supporters. Parents may be valuable advocates in the values which they communicate to their community boards of education and site-level staff about the content of the local school's curriculum. Boards of education set policy which persuasively advocates curricular direction. Local administrators are advocates in the expectations which they convey about the core curriculum in their priorities as instructional leaders, in the human and material resources which they facilitate, and through the supervision and evaluation structures which exist in the school and district. Teachers demonstrate advocacy in the instructional decisions which they make and the time allocation priorities that they implement. Networks of advocates may include the professional arts organizations for art educators, members of the county Regional Arts Council (affiliated with the California Arts Council) and organizations which bring visual and performing artists to local schools. Each has a role to play; and, when strategically orchestrated, such a network of advocacy can be a powerful influence on the development of the school curriculum.

The commitment and advocacy offered by those who recognize and value the arts, both as discrete disciplines and for the illumination which they bring to related disciplines, are a vital force in realizing the vision of the Visual and Performing Arts Framework.

Merced City School District
CHAPTER VI: MAKING IT BETTER

Evaluation/Reassessment

Now the arts education program is implemented and it is time to consider making some changes and additions. There has been feedback from teachers, students, parents and administrators about the new or improved arts programs. The next stage will be easier because there are experienced committee members who believe that arts really count in the total education of all students. It has been demonstrated that arts experiences improve the education of students.

As the structured, ongoing evaluation of your visual and performing arts program continues, a general profile of what is still needed and what would revitalize the program will become evident. There are two areas to consider in making the arts programs better: 1) evaluation/reassessment, and 2) revision and expansion.

The Implementing Committee monitors the arts programs and keeps the superintendent and board of education updated on its progress. As evaluations are completed, questions to ask may include:

- What has been effective and successful?
- Has a second program assessment been completed (using the first assessment as a baseline for comparison)?
- What factors contributed to the success of the program?
- What ideas have not succeeded as well as expected?
- Are all parts of the initial plan as effective as hoped?
- Which people/resources have been particularly effective?
Revision and Expansion

As both the positive and negative aspects of the program are assessed, areas in which revisions and expansions are needed will become evident.

Questions to ask as you determine areas that need revision and those that need to be expanded may include:

- Is the program firmly in place so that you are ready to move on to the second cycle of planning?
- Have all four arts disciplines been addressed through all four Framework components at all grade levels for all students?
- Will expansion now strengthen or dilute the current program?
- Have changing demographics in your district created a need for changes in the arts programs?
- Does your professional development program reflect any changing needs?
- What new financial and human resources will be needed and are available to expand the program?

After conducting a second assessment and considering questions such as those above, additional program goals and tasks will become evident. Members of the Implementing Committee may be called upon to form a new Planning Committee and the cycle begins again. A new plan and a new timeline for implementation are developed. Even as you expand and revise, you continue to focus on the original goal of providing a quality visual and performing arts program for all students. As stated in the foreword to the Visual and Performing Arts Framework, 1988:

"The unanimous conclusion is that the arts are essential in the education of our children. The stage is set, the cue has been given, and it is time for the arts to play center stage."
Appendix I

State Documents Containing Information Regarding the Arts

VISUAL & PERFORMING ARTS FRAMEWORK FOR CALIFORNIA PUBLIC SCHOOLS: KINDERGARTEN THROUGH GRADE TWELVE

Fundamental components of all instruction in the arts:

- **AESTHETIC PERCEPTION** — heightened perception provides stimulus for imagination and creativity and has an impact on all learning.

- **CREATIVE EXPRESSION** — expression in the arts includes originating, creating, performing and interpreting.

- **ARTS HERITAGE** — the study of the arts within cultural contexts develops a broad base for understanding creative artists, their works, their evolution and their effects on society in the past and future.

- **AESTHETIC VALUING** — development of aesthetic values enriches life as awareness and response to beauty in all of its forms increase.

GOALS, OBJECTIVES AND TEACHING ACTIVITIES FOR EACH OF THE DISCIPLINES ARE TO BE ORGANIZED AROUND THESE FOUR COMPONENTS.
MODEL CURRICULUM STANDARDS
FOR THE
VISUAL & PERFORMING ARTS:
GRADES NINE THROUGH TWELVE

I. The arts teach students a common core of knowledge

The arts, like other areas of the curriculum, possess the content of discrete disciplines. They also reflect and transmit a core of knowledge that transcends subject areas.

1. Students are learning that social, political, economic and technological events have influenced the development of artistic styles.

2. Students are learning that the arts provide a means of nonverbal communication.

3. Students are developing insights into how the arts have been used to express universal concepts.

4. Students are experiencing important styles in dance, drama/theatre, music and visual arts in the Western and non-Western traditions.

5. Students are learning that the arts enhance and reinforce concepts and ideas in other subject areas.
II. The arts connect students to their cultural heritage

The arts transmit an understanding of ourselves, our common heritage and our diverse cultural traditions.

1. Students are gaining deeper insights into the role the arts have in the development of world cultures.

2. Students are learning that the arts contribute to the ceremonies and celebrations of the world's cultures.

3. Students are learning that artists reflect the ideals and values of their own cultures.

4. Students are learning to appreciate that American culture is influenced by the artistic contributions of various ethnic groups.

5. Students are learning that their own ideals and values can be communicated through the arts.
III. The arts develop and refine students' sensibilities

The arts have, as a primary focus, the education of students' sensibilities leading to improvements in the aesthetic quality of life.

1. Students are expanding and refining skills, concepts and knowledge that enable them to make aesthetic judgments.

2. Students are developing and refining kinesthetic, aural, tactile and visual sensibilities through artistic processes.

3. Sensory responses of students are being intensified to such an extent that they can more fully appreciate and enjoy works in the arts.

4. Students are learning that the arts communicate expressive content and elicit a related emotional response.

5. Students are using higher-order thinking skills as they observe unique interrelationships in art and nature.
IV. The arts enable students to express their own creativity and experience exaltation, satisfaction and accomplishment

The arts provide a means for students to express their own creativity and opportunities for nurturing aesthetic experiences. As students engage in the study of the arts, they master skills and techniques that make possible the self-expression and creativity that can bring moments of exaltation to their lives, as well as satisfaction and feelings of accomplishment.

1. Students are engaging in creative activities that help them achieve personal insight, emotional satisfaction and spiritual nourishment.

2. Students are learning to value their own efforts to think imaginatively through experiences in the arts.

3. Students are engaging in creative activities which enable them to transform personal and group experiences into original artworks.

4. Students are engaging in activities directed toward the refinement and mastery of artistic skills and performance/production techniques.

5. Students are engaging in activities which promote their understanding of the arts for lifelong involvement, including the potential for careers.
MODEL CURRICULUM GUIDELINES
FOR THE VISUAL AND
PERFORMING ARTS

I. Aesthetic Perception

Instruction in the arts extends and strengthens students' awareness of aesthetic qualities in their world. Students use aesthetic perception as a basis for understanding and creating visual and performing arts.

Guidelines:

1. Students increase their perception of sensory qualities through visual, tactile, auditory and kinesthetic experiences.

2. Students identify and use appropriate vocabulary to describe each art form.

3. Students become aware of and respond to the communicative potential of the arts.

4. Students use perceptual skills to experience, create, understand and evaluate the arts and the environment.

5. Students use general thinking skills, such as categorizing and decoding, to heighten perception.
II. Creative Expression

The arts provide avenues for students to express their own creativity and to experience satisfaction, accomplishment and joy. Artistic expression includes originating, creating and interpreting. Knowledge of the structure, language, and skills of the arts are fundamental for artistic communication and expression.

Guidelines:

1. Students develop and expand the skills and knowledge necessary for expression and communication in the arts.

2. Students are involved in expressive arts experiences which promote personal insight and satisfaction, as well as increased appreciation of their own and others' accomplishments.

3. Students engage in purposeful arts activities which require creative problem solving and often result in unique solutions.

4. Students examine and create works in the arts based on three sources of inspiration: observations of the world, remembered experiences and imagination.

5. Students transform ideas, feelings and values into artistic forms.
III. Arts Heritage

The arts reflect and record the past and present, convey diverse cultural traditions, and facilitate understanding of one's cultural heritage.

Guidelines:

1. Students increase their knowledge as they examine, compare, recognize and investigate the arts and artists, past and present.

2. Students learn that the arts are a vital part of ceremonies, rituals and celebrations of world cultures.

3. Students recognize the role of artists and the arts in reflecting and recording their times and in shaping world views.

4. Students learn that the culture of the United States is influenced by the artistic contributions of men and women of all ages and many ethnic groups.

5. Students discover that the arts of diverse cultures have dealt with common themes throughout the ages.
IV. Aesthetic Valuing

Instruction in the arts develops aesthetic values and provides criteria for making informed responses and judgments about the arts, nature and objects in the environment.

Guidelines:

1. Students employ thinking skills such as observation, discrimination, comparison and imagination in making judgments.
2. Students use objective criteria for analyzing form, content and technique in the arts.
3. Students interpret the meaning of artworks based on aesthetic characteristics and subject matter in relation to personal, community and cultural values.
4. Students investigate and recognize the purposes of works in the arts.
5. Students develop values which lead to lifelong involvement in the arts.
Appendix III

VISUAL AND
PERFORMING ARTS
PROGRAM ASSESSMENT
FORMS FOR DISTRICT OR
SCHOOL USE

These forms include seven categories for assessment, each with a scale for scoring. They include curriculum, instruction, staff development, resources, program support and implementation, and program evaluation. The observer is provided with effective and ineffective examples within each category. At the end of each category, there is a space provided to complete a narrative of the program observation which details specific strengths or areas of need.

Note to Observers: Base your assessment of the current arts programs (dance, drama/theatre, music, and visual arts) in your school(s) upon the content and curriculum outlined in the California State Department of Education Visual and Performing Arts Framework for California Public Schools: Kindergarten Through Grade Twelve; the Model Curriculum Standards Grades Nine Through Twelve, Visual and Performing Arts; the Model Curriculum Guide for the Visual and Performing Arts, Kindergarten Through Grade Eight; and the Program Quality Review Criteria for Elementary, Middle and Secondary Grades.
### VISUAL AND PERFORMING ARTS PROGRAM ASSESSMENT FORM

### Curriculum

**District or School Name**

**Grade Levels**

**Observer's Position**

<table>
<thead>
<tr>
<th>EFFECTIVE</th>
<th>INEFFECTIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>The visual and performing arts curriculum is aligned with the State Framework and includes aesthetic perception, creative expression, historical and cultural heritage, and aesthetic valuing.</td>
<td>The arts curriculum is developed for music and visual arts only and is based solely on production/performance.</td>
</tr>
</tbody>
</table>

| The arts are part of the core curriculum for all students. | The delivery of the comprehensive, written, sequential arts curriculum to all students is optional and depends on teacher interest.                                                                       |

| The comprehensive, written, sequential visual and performing arts curriculum for each arts discipline is systematic and articulated through the grade levels. | The arts curriculum consists of lessons that are not sequential and comprehensive in terms of the Framework, 9-12 Model Curriculum Standards, or K-8 Model Curriculum Guide. |

| Dance, drama/theatre, music and the visual arts are taught both as discrete disciplines, as well as integrated with each other and correlated with other subject areas. | The arts are taught only as separate disciplines with no connection to other arts disciplines or other curricular areas. |

| Students expand their cultural literacy through the four arts components as they study and interact with works in the arts and great artists from throughout the world in each of the disciplines. | Encounters with great works in the arts and artists are incidental to the curriculum and draw primarily from Western European works. |

## Phase I: September 19 to June 19

### GOALS

Human and financial resources should be made available to enable visual and performing arts programs at each of the three levels—elementary, intermediate and secondary—to be effective.

Visual and Performing Arts inservice training for K-12 arts teachers and K-6 classroom teachers should be a high priority.

Resources to improve and enhance teaching of the visual arts should be available to all arts teachers.

Horizontal and vertical articulation at all levels should be strengthened.

The quality of teaching should be developed and improved in the visual and performing arts.

### IMPLEMENTATION TASK

Continue all district visual and performing arts programs and events with adequate financial support.

Continue to provide inservice training for visual and performing arts teachers (K-12) and classroom teachers (K-6) in the following areas:
- new technology
- computer graphics
- video animation
- software programs for music theory
- arts curricula and in-depth subject-matter training
- integrating and correlating the arts to other subjects
- model curriculum standards / 9-12, Guide K-8
- arts teachers providing peer inservice
- career units
- artist workshops for art teachers (7-12)

Establish and expand a permanent home for the Arts Bank:
- music resource library
- art slide bank
- VCR's and other media material
- props, costumes, lighting equipment for drama (K-12)
- surplus arts material exchange

Refine and expand the current articulation process, 6-7 and 8-9, for all arts teachers to include the development of video presentations and counselor awareness.

Contact the California Arts Project.

## FOCUS
- Create awareness of value and importance of visual and performing arts education and the Framework.
- Attend Framework conferences.

## ACTIVITIES
- Identify committees, participants.
- Collect data via surveys, interviews, etc.
- Establish arts curriculum.
- Select instructional materials.
- Determine staff development needs.
- Attend local/county/state staff development conferences.
- Align district curriculum with state documents.
- Develop mission and goal statement.
- Adopt mission and goal statement.
- Collect data via surveys, interviews, etc.
- Implement planned instructional program.
- Continue ongoing staff development.
- Continue curriculum refinement.
- Identify program evaluation process.
- Adjust program as needed to meet goals.
- Plan monitoring activities for years 6-7.
- Continue to implement instructional program.

## RESPONSIBILITY
- **State Department of Education**
- **Superintendent**
- **Site principal**
- **Key teachers**
- **Arts specialists**
- **Arts mentors**
- **Resource and support staff**
- **Arts providers**
- **Interested parents and students when appropriate**
- **Principals**
- **Teachers**
- **Resource and support staff**
- **Mentor Teachers**
- **Arts specialists**
- **Arts providers**
- **Local community arts resources**
- **Principals**

CHECKLIST FOR EVALUATING INSTRUCTIONAL MATERIALS FOR THE VISUAL AND PERFORMING ARTS

Title of Material ___________________________ Grade Level _________
Reviewer ___________________________ Grades Taught _________

This checklist is designed to help teachers, schools and districts evaluate instructional materials in the visual and performing arts. Materials may come in many forms: textbooks, teacher's guides, packages of written materials and prints, films/filmsstrips, etc. Although this form has been designed primarily to assist in the evaluation of materials developed by publishers, it can also be used to evaluate curriculum materials developed by districts.

Indicate by circling the appropriate number to what extent the following statements apply to the instructional materials being reviewed.

4 = Strongly Agree  3 = Agree  2 = Disagree  1 = Strongly Disagree  0 = Do Not Know

A. PHILOSOPHY, GOALS AND OBJECTIVES, CONTENT

1. There is a clear statement of philosophy that is consistent with the district's. 4 3 2 1 0

2. The instructional materials reflect the goals, components and guidelines found in the Framework for the Visual and Performing Arts and the Model Curriculum Guide. 4 3 2 1 0

3. The materials provide opportunities for students to express their own creativity through originating, creating and interpreting. 4 3 2 1 0

4. The materials involve students in problem-solving activities that result in unique solutions. 4 3 2 1 0

5. The role of artists and performers in shaping and reflecting culture is presented as meaningful and significant. 4 3 2 1 0

6. The history of the arts in the United States is a strong component in the materials. 4 3 2 1 0

7. The artistic contributions of men and women of all ages and many ethnic groups are evident throughout the materials. 4 3 2 1 0

8. There is evidence of a systematic development of skills and concepts which spiral from simple to more complex throughout the levels. 4 3 2 1 0

9. The instructional activities match the objectives. 4 3 2 1 0

10. The directions are clear and appropriate for the age of the students. 4 3 2 1 0

11. Appropriate vocabulary to describe ideas and concepts in specific art forms is used throughout the materials. 4 3 2 1 0
Appendix VIII, continued

12. Lessons and units review previous learning, introduce new learning and integrate the two in meaningful applications. 4 3 2 1 0

13. The materials promote the use of objective criteria for analyzing form, content and technique in the arts. 4 3 2 1 0

14. The materials encourage observation, discrimination and comparison in making judgments. 4 3 2 1 0

15. The materials contribute significantly to the understanding of the purposes of works in the arts. 4 3 2 1 0

16. The materials present (throughout the text and illustrations) the major periods, movements and trends found in the arts. 4 3 2 1 0

17. The extraordinary people who have made significant contributions in the arts are portrayed in the materials. 4 3 2 1 0

18. The materials encourage appreciation of the student's own and others' accomplishments in the arts. 4 3 2 1 0

B. PHYSICAL CHARACTERISTICS

1. The quality of the materials is such that they will stand up to prolonged use and wear. 4 3 2 1 0

2. The table of contents and index are detailed enough and useful in locating parts of the program. 4 3 2 1 0

3. The student edition uses a typeface and type size that are suitable for the age of the children using the text. 4 3 2 1 0

4. The illustrations contribute to the understanding of the content. 4 3 2 1 0

5. The teacher's edition is well-organized and convenient to use. 4 3 2 1 0

6. The format for lessons and units is consistent, with essential parts clearly labeled and identified. 4 3 2 1 0

7. The instructional materials include quality supportive materials such as:
   a. instructional visuals 4 3 2 1 0
   b. replicas or reproductions 4 3 2 1 0
   c. audiotapes or records 4 3 2 1 0
   d. videotapes 4 3 2 1 0
   e. overhead transparencies, slides 4 3 2 1 0
   f. computer-assisted instruction 4 3 2 1 0
   g. other 4 3 2 1 0

   (total the numbers circled above in number seven and divide by seven to establish an average) (average)

Total the numbers from each of the twenty-five items in Sections A and B. Perfect score would be 100. TOTAL

excellent source for visual art education books and pamphlets including research, curriculum and advocacy, instruction
**Appendix XI**

**NATIONAL REPORTS**

This report to Congress is based upon extensive research. It calls for renewed commitment at national and local levels for a significant effort, over the next 10 years, toward the improvement of education in the arts.

**Academic Preparations in the Arts: Teaching for Transition from High School to College.** The College Entrance Examination Board, 1985.

The College Board identifies the visual arts as an academic subject. Studies in art and intensive preparation in an art form enhance basic skills and provide for important learning.

A collection of 51 research findings indicates what works in education. Research suggests that children who are encouraged to draw at an early age learn to compose more easily, more effectively, and with greater confidence than children who are not encouraged.

An assessment of elementary education in the United States includes observations and recommendations for improvement. Instruction in art is recommended as an integral part of every elementary school program.

Creative leaders are needed to meet the challenges of the future. Thinking and creative skills developed in the arts are identified as essential.

This paper recommends the arts as an important part of the elementary, secondary, and college curriculum and lists five reasons that support the arts in education.

This report on art education in the United States contains specific recommendations for improvement of instruction in the visual arts. It includes suggestions to establish standards of minimum knowledge and skills, reform curriculum, develop instructional resource materials, and conduct comprehensive evaluation of art programs and student achievement. Additional suggestions are to strengthen certification requirements, expand art education research, and develop visionary leadership.
# NATIONAL RESOURCES

<table>
<thead>
<tr>
<th>Alliance for Arts Education</th>
<th>National Endowment for the Arts AIE</th>
</tr>
</thead>
<tbody>
<tr>
<td>A joint project of the John F. Kennedy Center for the Performing Arts and the U.S. Office of Education. It assists state and local AAE organizations by providing a conduit for information and a forum for cooperation. CAAE is the state organization. For further information on the AAE, including copies of its free newsletter, <em>Interchange</em>, contact:</td>
<td>The National Artists in the Schools program is now called the National Artists in Education program. It provides monies for artists to work in educational settings.</td>
</tr>
