The School to Employment Program (STEP) provided job placement, training, counseling, and remediation for economically disadvantaged youth aged 14-21 who were at risk of dropping out of school or who had dropped out and were unprepared for employment. Its two major components were in-school and out-of-school programs. Youth in both programs were enrolled in educational activities and were assured of opportunity for work experience or on-the-job training. The 1991 program enrolled 2,700 disadvantaged youth in its 44 projects that operated throughout New York State: 1,417 in the in-school component and 1,283 in the out-of-school component. Sixty-nine percent of participants were minorities; 36 percent were welfare recipients. One-third of the out-of-school participants attained unsubsidized employment after the program; 14 percent of them obtained their General Educational Development diploma. Over 75 percent of in-school participants either remained in school or graduated. Participants in both components showed significant reading and math achievements. Over 95 percent of participants reported they planned to continue working, pursue additional training, or return to school. All employers indicated they would participate in the STEP program in future years. (Appendixes amounting to over two-thirds of the report include a listing of program sites, testing procedures and formats, and individual program descriptions.) (YLB)

</table>
Clearly, the retrenchment of federal commitments to Human Resources Programs during the eighties has placed a heavy burden on State and Local Governments to fill the gaps. On one hand we have an increasing national awareness that our current and future labor demands will not be met unless drastic action is undertaken to train our workforce in the skills needed to enhance our competitiveness in a global economy and on the other hand there isn’t a comprehensive national policy in place to accomplish this task.

New York State has been and remains in the forefront in its efforts to train its workforce, especially its youth, to meet the demands of today and the years to come. One initiative, the School To Employment Program (STEP), which is the subject of this report, has, as is the case with the other youth efforts in New York State, demonstrated that it is a proven vehicle in preparing our disadvantaged youth for their transition to the workforce.
INTRODUCTION
AND
EXECUTIVE SUMMARY

1991 STEP PROGRAM

The School to Employment Program (STEP) addresses the needs of disadvantaged youth aged 14-21 who are either deemed at risk of dropping out of school or those who have already dropped out and are unprepared for employment. By combining a work experience with a learning experience, STEP seeks to increase employment readiness, basic skills and the likelihood that those still in school will complete their education. The youth are employed part-time in partially subsidized or unsubsidized jobs which give them income and increase their career awareness and work maturity while they also spend half days in remedial educational programs.

The STEP program has two major components: In-School and Out-of-School.

SCHOOL TO EMPLOYMENT PROGRAM (STEP) IN-SCHOOL

The School to Employment Program (STEP) In-School is an early intervention work/school program designed to provide economically disadvantaged "at-risk" in-school youth with job placement, basic educational skills, vocational skills, counseling, remediation and the motivation to succeed. This program is based on a mutually developed work/school agreement between the program and the participant, which will also include the participating employer.

The goal of the STEP In-School program is to increase the participant's career awareness and work maturity, while encouraging them to remain in school.

The targeted population are youth who are:

- enrolled in school
- 14 to 21 years of age, and
- "at-risk" of dropping out of school, and
- economically disadvantaged.

Programs are encouraged to focus job placement efforts in the private sector. The work component must be geared toward an occupational area of interest for the participants, where possible. The work component may involve work experience, unsubsidized employment or occupational skills training. The design also emphasizes participant improvement in:

- basic educational skills
- vocational skills
- job seeking capabilities
- work maturity
The School to Employment Program (STEP) Out-of-School is a job program designed to serve economically disadvantaged out-of-school youth with employment and training activities which will assist the youth in obtaining unsubsidized employment or return to school.

The primary function for the out-of-school program is to facilitate the placement of the participant into a job which is supplemented with basic skills remediation and/or GED preparation and/or existing occupational skills training, where appropriate.

The targeted population are youth who:
- are 16 to 21 years of age
- are school drop-outs
- are economically disadvantaged

SIGNIFICANT FINDINGS:

--- The 1991 STEP Program enrolled 2,700 disadvantaged youth in its 44 projects which operated throughout the state. There were 1,417 participants in the In-School component and 1,283 participants in the Out-of-School component.

--- Sixty-nine percent (69%) of the participants were minorities, and all participants were economically disadvantaged.

--- Thirty-six percent of the participants were welfare recipients.

--- Other participant characteristics included:
  - 90 were homeless,
  - Single parents numbered 140;
  - 367 participants were handicapped; and
  - 148 were ex-offenders.

--- One-third of the out-of-school participants attained unsubsidized employment after the program.

--- Fourteen percent or 181 Out-of-School participants obtained their GED.

--- Over seventy-five percent of In-School participants either remained in school or graduated.
Both In-School and Out-of-School participants showed significant reading and math achievements while in the STEP Program.

Eighty-eight percent of the participants reported that they had either developed or were developing a career plan as a result of their participation in the STEP Program.

Over ninety-five percent of the participants reported that they plan to either continue working, pursue additional training or return to school.

Four percent of the participants plan to enter military service.

All employers indicated they would participate in the STEP Program in future years.
THE REPORT
SECTION ONE

STEP ACTIVITIES
STEP ACTIVITIES

The School to Employment Program (STEP) provides job placement, training, counseling and remediation for economically disadvantaged youth. The program has two major components: In-School and Out-of-School. Youth in both programs are also assured of the opportunity for work experience or on-the-job training. The In-School and Out-of-School components of STEP also require participants to be enrolled in educational activities. Specifically, In-School youth are required to remain in an educational program leading to a high school diploma, while Out-of-School youth must participate in academic or GED preparation. The In-School program model requires that participants maintain satisfactory school performance and attendance standards to be eligible for jobs which are provided part-time during the school year and full-time during the summer. The Out-of-School programs also include on-the-job training, counseling, and remediation, with emphasis on basic educational skills, vocational skills and work maturity.

The following programmatic approaches were used to increase the employment potential and/or school retention of the economically disadvantaged youth participating in the STEP program.

Work Maturity - Courses were designed to assist youth in adapting to the work environment. Included in the courses were such areas as: the proper way to prepare for an interview, how to communicate on the telephone, job search techniques, resume writing, letter writing, and lastly, how to find and hold a job; including attendance, punctuality, communications, interaction, and respect for others.

Basic Skills Remediation - Courses are designed to improve the participant's reading, writing, and math skills pertinent to securing employment and keeping the job. In addition, improving these skills is vital in achieving a GED, a positive outcome of the out-of-school program.

Vocational Skills Training - Training in skill areas is provided by some out-of-school program operators.

Support Services - Participants are frequently in need and provided one or more support services such as: day care, transportation, and counseling to enhance their chances of success in the program.

One goal of STEP is to have private employers serve as the primary source of program worksites; to promote that goal the program can provide a 50 percent subsidy of participants' wages. It should be noted, however, that the program is permitted to use public sector agencies as well. The Federal Targeted Jobs Tax Credit (TJTC) program is often available to employers who hire STEP participants.
SECTION TWO

PARTICIPANT CHARACTERISTICS
PARTICIPANT CHARACTERISTICS

The 1991 STEP Program enrolled 2,700 youth in the 44 projects which operated throughout the State. Of this total, nearly seventy percent were minorities, thirty-six percent were welfare recipients, fifty-two percent were female, and all were economically disadvantaged.

As in past STEP cycles, Blacks accounted for the largest block of STEP enrollees. For the Out-of-School component, the Black enrollment level was at 48 percent, Hispanics accounted for 32 percent, Whites were at 19 percent and Asians, American Indians and others made up one percent.

For the In-school component of STEP, Blacks enrollees accounted for 45 percent of total enrollees, White participants represented 41 percent of all In-school enrollees while Hispanic enrollees comprised 13 percent of this segment of the STEP program.

The Out-of-School programs were administered by community-based groups which concentrated on the more disadvantaged inner-city youth. The In-School programs, run by local Job Training partnership Act program operators, operated in some areas with a much lower minority population density. Undoubtedly, this accounts for the ethnic enrollment differences such as the wide differential in Hispanic enrollments in the two STEP components of the STEP program.

It was interesting to note that Hispanic participation in the STEP program reversed its declining trend of the past several years. Overall, twenty-two percent (22%) of all participants were Hispanic in the 1991 program year compared with nineteen percent (19%) last year.

With the Hispanic population showing the largest growth rate among ethnic groups in New York State and statistics indicating that four-fifths of Hispanic youth do not finish high school, there certainly is justification for an expanding Hispanic role in the STEP Program.

Other significant characteristics of note include:

- Thirty-six percent of all enrollees were welfare recipients;
- Single parents numbered 140;
- There were 367 handicapped enrollees; and
- 148 offenders were STEP participants;
- 90 participants were homeless.

SECTION THREE
PARTICIPANT OUTCOMES
AND
MEASURES
PARTICIPANT OUTCOMES AND MEASURES

The School to Employment Program (STEP) addresses the needs of disadvantaged youth aged 14-21 who are either deemed at risk of dropping out of school or have already dropped out and are unprepared for employment. By combining a work experience with a learning experience it seeks to increase employment readiness, basic skills and the likeliness that those still in school will complete their education. The youth are employed in partially subsidized or unsubsidized jobs which gives them income, and increases their career awareness and work maturity. The majority of jobs are in the private sector.

The effectiveness of the STEP program is measured by the extent program activities meet stated objectives such as participant improvement in educational competency and employability skills. Specific performance measures for the STEP program include:

**STEP In-School**
- improvement in basic academic skills
- high school retention
- attainment of high school diploma
- enrollment in a post-secondary educational program
- attainment of unsubsidized employment
- improvement in work maturity skills

**STEP Out-of-School**
- improvement in basic academic and vocational skills
- return to high school
- attainment of a GED
- enrollment in a vocational skills training program
- attainment of unsubsidized employment
- improvement in work maturity skills

The forty-four STEP Program Operators enrolled 2,700 youth participants against a planned enrollment of 2,413 for 1991. While the 2,700 STEP participants in 1991 represented a decline of 274 youth from the preceding year, the 1991 accomplishments become even more significant when measured by the fact that there was $1 million less dollars available to serve our disadvantaged youth this year in the STEP Program.
IN-SCHOOL RESULTS INCLUDED:

- Seventy-five percent (75%) of In-School participants either remained in school or graduated.

- 75 participants obtained additional post-STEP training or entered a post secondary program.

- 329 or twenty-three percent (23%) of STEP In-School youth obtained unsubsidized employment.

- In-School participants achieved a 1.6 grade level rise in reading abilities while math skills reflected a grade gain of 1.3 year.

1. Unsubsidized employment was obtained after the completion of the STEP program.
OUT-OF-SCHOOL RESULTS INCLUDED:

- Four hundred twenty-nine youth (34%) attained unsubsidized employment after their tenure in the STEP program.
- Eighteen percent (18%) or 226 youth went on to additional training in another program.
- 181 participants, fourteen percent (14%), passed the GED. This, as in past year, is a conservative estimate as many youth were still awaiting results at this writing.
- Seventy-two (6%) participants returned to school.
- Over fifty percent were categorized as achieving a youth competency or achieving a program objective.
- Participants obtained an impressive post-test math gain of 1.4 grade levels with the gain in reading abilities nearly equaling the math achievement.

1. A term used to indicate a wide range of learnable outcomes which can include skills such as typing, repairing a carburetor, or filling out a job application; knowledge such as an awareness of the nature of job duties and requirements in important occupational cluster; attitudes such as regard for others, respect for authority; and behavior such as persistence on the job.
BASIC SKILLS ACHIEVEMENTS

TABE READING AND MATH GAINS

The Tests of Adult Basic Education (TABE) was the standardized instrument employed in this STEP Program evaluation. The TABE is a norm referenced test designed to measure achievement in reading, mathematics, language, and spelling -- the subject areas commonly found in adult basic education curricula. Because the tests combine the most useful characteristics of norm-references and criterion-referenced tests, they provide information about the relative ranking of examinees against a norm group as well as specific information about the instructional needs of examinees.

PROCEDURE

Each program site administers, scores and reports the results of the pre and post test to the Department of Labor.

FINDINGS

A sample of in and out-of-school participants' pre and post test scores showed substantial improvement in reading and math after exposure to the program.

Table 3

<table>
<thead>
<tr>
<th>No. of Participants</th>

</tbody>
</table>

As shown in Table 4, Out-of-School participants exhibited an average reading and math grade gain of 1.4. The Grade Gains for these "at risk" youth becomes even more significant when viewed against the environment these participants must contend with each day of their lives.
PARTICIPANT SATISFACTION

How did participants' rate their experience?

Seven hundred and fifty-five participants from the in-school and out-of-school programs responded to survey questions relating to the kind and quality of program service they received while in the STEP Program. Overall, participants expressed a very favorable response to their STEP Program experience.

Satisfaction Ratings

Basic Education

Seventy-three percent of the participants were either fairly satisfied or very satisfied with the educational component.

Counseling

Eighty percent of the participants indicated that they were either fairly satisfied or very satisfied with the counseling component.

Career Education

Eighty-three percent of the participants were either fairly satisfied or very satisfied with the Career Education Component.

Work Experience

With regards to the Work Experience component, seventy-two percent of the participants indicated that they were either fairly satisfied or very satisfied.

Participant Problems

Regarding potential problems they may have encountered while in the program, ninety-one percent of the participants reported no problem with any aspect of the program, moreover; external factors such as child care or transportation did not hinder their program participation. Of those participants who did report having some problems, work experience was reported as the most problematic followed by education, transportation, scheduling and child care.

In response to the question "who worked with you on this problem(s)," the project counselor, followed by the program instructor and work site supervisor were the individuals most often cited as those who help participants with the problem(s).
Career Plans

Eighty-eight percent of the participants reported that they had either developed or were developing a career plan as a result of their participation in the STEP Program.

Over ninety-five percent of the participants reported that they plan to either continue working, pursue additional training or return to school.

Four percent of the participants plan to enter military service.

General Satisfaction

Ninety-four percent of the participants stated that they would recommend the program to their friends.
STEP Employer Survey Results

According to work site supervisors, eighty-two percent of the participants exhibited either excellent (no absences) or good attendance (fewer than 3 per month) at the beginning of the program. Participant punctuality remained fairly consistent throughout their work experience. It should be noted that while both participant punctuality and attendance declined moderately over the span of time at the work site, given the multiple barriers to employment experienced by these "at risk" youth, the high percentages for attendance and punctuality at the end of the program must be viewed as a positive accomplishment. Moreover, supervisors indicated that participants showed significant improvement in their attitude towards work. Overall, Supervisors observed the greatest improvement in the area of vocational skills. Eighty-three percent of the participants showed either great improvement or some improvement in vocational skills.

Lastly in response to the question would you participate in this program again, all employers said "yes".

Table 5

1) At the beginning of the program, how was the participant's attendance at the worksite?

<table>
<thead>
<tr>
<th>Attendance Level</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Excellent (No Absences)</td>
<td>35.5</td>
</tr>
<tr>
<td>Good (Fewer than 3/month)</td>
<td>46.4</td>
</tr>
<tr>
<td>Fair (3-5 per month)</td>
<td>15.3</td>
</tr>
<tr>
<td>Poor (More than 5/month)</td>
<td>2.8</td>
</tr>
</tbody>
</table>

2) At the end of the program, how was the participant's attendance?

<table>
<thead>
<tr>
<th>Attendance Level</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Excellent (No Absences)</td>
<td>29.1</td>

APPENDIX B
REPORTING FORMATS
AND
TESTING PROCEDURES

September 1991
TEST GUIDELINES/REPORTS FOR PROGRAM OPERATORS

TABE LOCATOR TEST

Prospective program participants must meet a Legislative requirement before enrolling in a YEET Program. For example, in the Youth Work Skills program it specifies that all participants must have Reading skills at or below the fifth grade level. The Locator Test is used to determine the Reading levels of all prospective participants in order to establish program eligibility.

- The TABE Locator Test for Math and Reading is to be administered prior to enrollment. Participants’ total score on the locator test is used to assign a TABE level. This procedure is described in the test administrator’s manual.

TABE

TABE tests are administered to all YEETP participants to determine the grade levels of their Math and Reading skills and to find where their weaknesses lie. They also provide information on the achievement levels of the participants by comparing the pre- and post-test scores. This evaluation determines program effectiveness.

- TABE pre-tests for Math and Reading are to be given during the assessment phase, within two weeks after enrollment.

- Answer keys are available to grade the pre-tests. Correct answers are to be summed for both tests to determine the Raw Scores for each. These Raw Scores then need to be converted into Scale Scores. The procedure for this conversion is described in the Norms Book. The Scale Scores are to be entered on the pre-test Testing Records for each participant.
• TABE post-tests for Math and Reading are to be administered upon completion of the program year, commencing in May and ending by June 30. Programs operating several cycles should, of course, conduct post-tests at each cycle’s close. The results of the post-tests are to be entered on both post-test Testing Records and final Testing Records. Final testing records will contain testing results for the entire program year.

**JOB CORPS WORLD OF WORK TESTS**

Three subtests are included in the World of Work tests. These include Occupational Knowledge, Consumer Economics, and Survival Skills/Community Resources. World of Work tests are used to determine the participants' knowledge of basic work skills necessary in everyday life. Pre- and post-tests are administered in order to evaluate the participants' progress from the beginning to the end of the program year.

• World of Work pre-tests are to be given during the assessment phase, within two weeks of enrollment. There is a choice of two tests (A & B) for all three sections. Either A or B may be administered for each section, assuring that a total of three are given.

• The pre-tests then need to be graded. Answer sheets are provided for each test available. Correct answers of both tests are to be summed to determine the Raw Scores. These scores are to be entered on the pre-test Testing Records for each participant.
Post-tests are to be administered to all participants at the end of the program year, commencing in May and ending by June 30. For all three sections, give the test (A or B) that was NOT used for the pre-test. The Raw Scores should be marked on the post-test and final Testing Records.

ALL TESTING RECORDS, PRE, POST, AND FINAL, FOR TABE AND WORLD OF WORK TESTS ARE TO BE DUPLICATED AND SENT TO BOTH THE APPROPRIATE PROGRAM COORDINATOR AND THE ACCOUNT EXECUTIVE AT THE RESPECTIVE COMPLETION TIMES.

PERIODIC REPORTS

Periodic reports are completed in order to follow the progress of all participants and to determine whether intervention is required of the Program Coordinator.

Program Operator Quarterly Reports on all participants are to be completed and submitted to both the appropriate Program Coordinator and the Account Executive on the 15th day of October, January, April, and July. Quarterly Reports are available for each applicable program. These Quarterly Participant Reports are cumulative. That is, the October submittal covers three months data, the January reports covers six months data, the April report covers nine months data, and the July (Final) report covers 12 months data.

SURVEYS

Surveys are completed at the end of the program year to determine overall satisfaction with the program on the part of the participants, the employers, and the Program Operators.
The Projet Director, a sample of the program staff, and a selected sample of participants will receive a structured interview to determine the effectiveness of the program.

All YEET participants will complete a Participant Questionnaire Survey at the end of the program year.

ALL SURVEY RESULTS ARE TO BE DUPLICATED AND SENT TO BOTH THE APPROPRIATE PROGRAM COORDINATOR AND THE ACCOUNT EXECUTIVE UPON COMPLETION.
THE FOLLOWING ITEMS SHOULD BE PURCHASED FOR EVALUATION PURPOSES*:

For Each Student Utilizing TABE

1 practice Exercise and Locator Test Book
1 practice Exercise and Locator Test Answer Sheet
1 Reading and 1 Math Test Book
1 Reading and 1 Math Test Answer Sheet
1 Reading and 1 Math Individual Diagnostic Profile and Analysis of Learning Difficulties.

For Each Program Operator

1 Examiner’s Manual for Math and Reading
1 Test Coordinator’s Handbook
1 Technical Report
1 Norms Book

* These can all be purchased from McGraw-Hill

Contact Number: 1-800-538-9547

If further information is required, Robert P. Starr, Ed.D., is the consultant in New York State.

TEST TAKING ENVIRONMENT FOR THE YEET AND WORK SKILLS PROGRAMS

TEST ENVIRONMENT

Several pre- and post-tests are administered to the YEETP Program participants and Work Skills Programs. Due to the nature of these programs and the target population involved, the test taking procedure can be a much more stressful event than it would be for the average student. A positive test taking environment will both contribute greatly to the success of the participants on these tests and assure that the participants take the tests seriously.

The physical test taking atmosphere is of utmost importance. The room should be well lit. Students should be comfortably seated. Proper ventilation is a must and the temperature of the room should be as comfortable as possible. If possible, 'Do Not Disturb' signs should be posted on all entrances to reduce outside distractions. Breaks should be provided upon completion of each section and restrooms should be easily accessible.

The needs of the examinees must be considered in all respects. To that end, program operators need be sensitive to these needs and should, to the best of their ability, provide an orderly yet relaxed, atmosphere. The following suggestions provide ways of achieving this atmosphere for the examinees.

The tests should be described as a measure of basic skills that are used in everyday life. They may serve as preparation for General Educational Development (GED) tests and help direct their educational goals. Participants should be told that no pre-test preparation is required on their part.
Participants should be told in advance that they will probably not be able to provide answers to all questions due to lack of experience, not knowledge. This will reduce frustration. Time should be of little consequence for the participants. They should be reassured by telling them that they should attempt to answer all items but move on if they become frustrated. Educated guesses should be encouraged.

Examiners need to fully understand the tests being administered. Therefore, the Program Operators are to be the only ones administering all tests. They need to be familiar with the questions and be able to provide rationales for the answers. Procedures need to be adhered to in order to insure the validity of the test scores.

Instructions for the examinees should be described in entirety prior to beginning the test. This will reduce the probability of questions arising during the test that everyone may need to know the answer to, thus wasting time in providing answers. Therefore, the examiners must be sure that complete instructions have been provided to the participants to increase confidence all around.

These guidelines should help the examinees feel more confident and relaxed during the test. If the examiners take these procedures seriously, so will the examinees. This will lead to more valid data for the evaluation process in determining overall program success.

STEP Director Signature
Worksite Ranking Scale - we're trying to do a better job of helping STEP participants' to increase their employment potential. To achieve this goal, we need your help. Please check the response to the following questions that best represents your observation of the participant at the worksite.

1) At the beginning of the program, how was the participant's attendance at the worksite?
   - Excellent
   - Good
   - Fair
   - Poor

2) At the end of the program, how was the participant's attendance?
   - Excellent
   - Good
   - Fair
   - Poor

3) At the beginning of the program, how was the participant’s punctuality?
   - Excellent
   - Good
   - Fair
   - Poor

4) At the end of the program, how was the participant’s punctuality?
   - Excellent
   - Good
   - Fair
   - Poor

5) In the first two weeks, how would you rate the participant’s work attitude?
   - Excellent
   - Good
   - Fair
   - Poor

6) In the first two weeks, how would you rate the participant’s vocational skills?
   - Excellent
   - Good
   - Fair
   - Poor

7) At the end of the program, did you observe any improvement in the participant’s work attitude?
   - Great Improvement
   - Some Improvement
   - Little Improvement
   - No Improvement

8) At the end of the program, did you observe any improvement in the participant’s vocational skills?
   - Great Improvement
   - Some Improvement
   - Little Improvement
   - No Improvement

9) Would you participate in this program again?
   - YES
   - No

10) Please explain in the space

Return completed survey to:

Please give us your honest opinions concerning your experience in the School to Employment Program (STEP) by checking the rating closest to your opinion. Your responses will improve the program in future years. NOTE: DO NOT WRITE YOUR NAME ON THIS SURVEY. YOUR RESPONSES ARE CONFIDENTIAL.

1) Not Satisfied (1) Fairly Satisfied (2) Very Satisfied (3)

Counseling  
Basic Education (reading/math)  
Career Education  
Work Experience  

Did you have a problem regarding any of the following? If YES, tell us by checking under how well you were able to solve the problem.

Not at All (1) To some Extent (2) To a large Extent (3) Completely (4)

Education  
Work Experience  
Child Care  
Transportation  
Scheduling  
Other:  

Who worked with you on this problem(s)?

Program Counselor  
Teacher  
Work Supervisor  
Other  

How would you describe the supervision on your job?

Adequate (1)  
Inadequate (2)  

Has the program helped you to develop or improve your career plans?

Hasn’t helped at all (1)  
Hasn’t helped very much (2)  
Yes, I’ve been working on a plan (3)  
Yes, I now have a definite plan (4)  

I now plan to:

Enter military Service  
Find/continue a job  
Go on to post (after) high school education  
Return to or continue in high school  

Would you recommend this program to your friends?

Definitely Not (1)  
Probably Not (2)  
Probably (3)  
Most Definitely (4)  

In the space provided below, add any other comments you wish to make regarding other aspects of your experience in the program (i.e., physical facilities, the amount of pay you received.)

JOB SITES:
Not-for-profit and private-sector worksites in the following occupational areas: stock clerk, nursing home attendant, fast foods, clerical (school districts), office assistant, and salesperson.

METHOD OF PAYMENT:
Differs among subcontractors, primarily directly by employer.

CONTACT WITH PARTICIPANTS:
Weekly counseling sessions on employability training, including career exploration, readiness and remediation.

CONTACT WITH SCHOOLS:
Referrals from SDA's school systems, specifically guidance offices. Services were provided in home schools.

INTERAGENCY LINKAGES:
Local school guidance officers, Youth Bureau and participants' high school or local BOCES. Lastly, County Department of Social Services and Probation. Staff (inkind) time was utilized from school districts, guidance offices, and the County Youth Bureau.
STEP IN-SCHOOL 1991

PROGRAM: Buffalo and Erie County Private Industry Council; Inc. (Buffalo)

FUNDING LEVEL: $300,000

TOTAL PARTICIPANTS PLANNED: 240
TOTAL PARTICIPANTS ENROLLED: 268

TARGET POPULATION:

Economically disadvantaged, in-school youth, aged 16 - 18, with preference to youth receiving public assistance.

PROGRAM COMPONENTS:

1) Program Startup
   - outreach
   - recruitment
   - eligibility certification
   - enrollment
   - assessment
   - scheduling of activities

2) Pre-employment skills instruction

3) School/employment
   - job development
   - placement into OJT

4) Program Evaluation and Follow up

YOUTH COMPETENCIES:

Yes.

JOB SITES:

Job slots in private sector, in the following occupational areas: welder, service station attendant, telephone surveys, dietary aide, computer maintenance assistant, stock person, office clerk, sales clerk and data entry clerk.

METHOD OF PAYMENT:

Youth paid by employer, who is reimbursed 50% for OJT by program operator.

CONTACT WITH PARTICIPANTS:

Weekly counseling/training meetings between teacher/coordinator and participant.
Buffalo and Erie County (cont.)

CONTACT WITH SCHOOLS:

Buffalo Vocational Technical Center - Vocational Skills Training
Erie BOCES #1 Centers - Occupational education

INTERAGENCY LINKAGES:

Established linkages with human service and educational agencies. Linkage agreements signed between PIC and the Division for Youth of the City of Buffalo and Towns of Tonawanda and Cheektowaga. Outreach and recruitment coordinated effort between schools, the Erie County Department of Social Services and the Service Delivery Area. When warranted, participants were referred to CBO's.
STEP IN-SCHOOL 1991

PROGRAM: Chemung, Schuyler, Steuben
Private Industry Council

FUNDING LEVEL: $58,000
TOTAL PARTICIPANTS PLANNED: 50
TOTAL PARTICIPANTS ENROLLED: 50

TARGET POPULATION:

Economically disadvantaged youth ages 16-18 at risk of dropping out of school. Preference is given to youth receiving public assistance and homeless youth.

PROGRAM COMPONENTS:

Primary program activities are on-the-job training, counseling and educational activities including remediation where necessary. Program design includes emphasis on participant involvement in basic educational skills, vocational skills, job seeking capabilities and work maturity.

YOUTH COMPETENCIES:

PIC approved pre-employment and work maturity competencies are used.

JOB SITES:

Public and private worksites are used.

METHOD OF PAYMENT:

Employers are reimbursed for 50% of participants' wages and pay participants directly.

CONTACT WITH PARTICIPANTS:

Program counselors meet with each participant on a bi-weekly basis and meet with worksite supervisor at least monthly.

CONTACT WITH SCHOOLS:

The BOCES and twenty-four school districts are involved in recruitment, monitoring time and attendance, making remediation assignments and doing monthly evaluations of participants' progress.

INTERAGENCY LINKAGES:

Special arrangements have been made with the Chemung County Youth Bureau, the Probation Department and the Division for Youth. The PIC has long-standing linkages with a wide variety of state and local agencies. Job Service staff assist in recruitment and placement.
STEP IN-SCHOOL 1991

PROGRAM: Genesee County Job Development Bureau

FUNDING LEVEL: $83,000
TOTAL PARTICIPANTS PLANNED: 60
TOTAL PARTICIPANTS ENROLLED: 62

TARGET POPULATION:

The program operator has established extensive criteria to describe "at risk" youth.

PROGRAM COMPONENTS:

Recruitment, orientation and assessment, career exploration, pre-employment and work maturity skills development, job club, work experience, on-the-job training, basic education and vocational skills training.

YOUTH COMPETENCIES:

No.

JOB SITES:

Participants work in private sector positions for a maximum of 20 hours per week.

METHOD OF PAYMENT:

Participants are paid by the worksites, which are reimbursed for 50% of participants' wages.

CONTACT WITH PARTICIPANTS:

One counselor is assigned to work with participants on an on-going basis for the duration of the program.

CONTACT WITH SCHOOLS:

The program operator works closely with the schools throughout the program.

INTERAGENCY LINKAGES:

The SDA has existing linkages with a wide variety of state and local agencies. In addition, local schools and the BOCES.
STEP IN-SCHOOL 1991

PROGRAM: Jefferson-Lewis SDA (Watertown)       FUNDING LEVEL: $44,000

TOTAL PARTICIPANTS PLANNED: 72
TOTAL PARTICIPANTS ENROLLED: 73

TARGET POPULATION:

Economically disadvantaged, in-school youth aged 16 - 18. The SDA intends to serve forty percent (40%) public assistance recipients.

PROGRAM COMPONENTS:

Work Experience in conjunction with:

- remediation
- vocational assessment/career exploration
- job-getting/labor market orientation
- counseling

YOUTH COMPETENCIES:

None.

JOB SITES:

Work experience sites in both private and public sectors in the following occupational areas: building maintenance, receptionist, clerical assistant, teacher aide, retailing and service station attendant.

METHOD OF PAYMENT:

SDA handles payroll and payment to participants.

CONTACT WITH PARTICIPANTS:

Counseling as it relates to the vocational aspects performed on an as-needed basis. Educational counseling addressed by the school districts.

CONTACT WITH SCHOOLS:

The Jefferson-Lewis school districts heavily involved due to past linkages with STEP activities.

INTERAGENCY LINKAGES:

Established linkages with educational, community, and human services agencies and the Private Industry Council.
STEP IN-SCHOOL 1991

PROGRAM: New York City Department Of Employment
        New York, New York

FUNDING LEVEL: $1,000,000
TOTAL PARTICIPANTS PLANNED: 466
TOTAL PARTICIPANTS ENROLLED: 504

TARGET POPULATION:

Economically disadvantaged youth, 16 - 18, enrolled in regular or alternative schools and at risk of dropping out of school. Thirty-five percent (35%) enrolled will be from families on public assistance, in addition to homeless youth.

PROGRAM COMPONENTS:

1) Outreach and Recruitment
2) Selection of Eligibles, Certification, and Enrollment
3) Employability Development Plans
4) Orientation
5) Supportive Services
   o basic remediation
   o pre-employment/work maturity
   o counseling
6) Vocational skills
7) Job Development OJT slots

YOUTH COMPETENCIES:

None.

JOB SITES:

On-the-job training slots were developed in private sector and public sector. Participants placed in the following occupational areas: library and teacher aid, receptionist, messenger, office aid, assistant bookkeeper, cashier, fast food preparer, building maintenance, sales clerk.
