National Career Development Guidelines; *South Carolina

This document presents a model Comprehensive Career Development Program for grades K-12 developed for the state of South Carolina. The model provides the framework for local school districts to evolve a program that will meet the specific career development needs for their district's students. The model is planned to organize, expand, and extend competency-based career development strategies, activities, and experiences in order to assist students in making realistic career goal plans and apprise them of how to use the public school's curriculum and experiences to further their career goals. The program is presented in the following format for grade levels K-3, 4-5, 6-9, and 10-12: (1) an overview describing characteristics and needs of students regarding career development; (2) stated career development objectives; and (3) competency-based planned activities involving counselors, teachers, parents, community, and administrators. Five appendixes provide the following: a sample student needs assessment survey for career exploration in middle and junior high schools; a curriculum plan for high schools; a list of occupational education programs in six areas (agriculture, business, health occupations, home economics, marketing, and trade and industrial education); a list of nonoccupational education programs (consumer and homemaking, industrial technology, prevocational education, and mechanical drawing) and applied and related courses (applied biology or chemistry, communications for the workplace, mathematics for the technologies, and physics for the technologies); and a list of four curriculum resource guides and six videotapes on careers. (KC)
THE SOUTH CAROLINA COMPREHENSIVE
CAREER DEVELOPMENT PROGRAM FOR GRADES K - 12

Dr. Barbara Stock Nielsen, State Superintendent

"The mission of the South Carolina Department of Education is to create a vision of what schools can be. Our major focus is to provide the leadership and services needed to achieve educational equity and excellence for the people of South Carolina without regard for creed, race, sex, age, disability, or economic circumstance."

Dr. Barbara Stock Nielsen
State Superintendent of Education
The primary purpose of this project is to present a model Comprehensive Career Development Program for grades K-12. This model will provide the framework for local districts to evolve a program which will meet the specific career development needs for their district's students. It is the intent of this model program to organize, expand and extend competency-based career development strategies, activities and experiences in order to assist students in making realistic career goal plans and apprise them of how to use the public school's curriculum and experiences to further their career goals.

Career Development (pre K-12) helps all students by:

... enabling them to set realistic career goals.
... encouraging the development of positive work habits and attitudes.
... providing opportunities to become aware of their individual abilities, interests, and aptitudes.
... providing activities which will involve problem-solving and which will develop decision-making skills.
... encouraging them to consider careers which are in concert with their interests, aptitudes, and abilities regardless of gender.
... showing the need to develop academic skills which are essential to successful employment.
... deepening an awareness of the dignity of all work.
... expanding their knowledge of educational and skill training available through the school curriculum and beyond graduation.
... making school subjects and other learning experiences relevant to their present lives and to their future career goals.
... encouraging them to develop positive attitudes toward work.

"We'll reach the pinnacle of excellence when teachers, principals, parents, and the community come together to address educational needs unique to their children."

Carroll A. Campbell, Jr.
Governor of South Carolina
THE FIFTH BASIC SKILL

Education opportunities for all students are made available through the public school curriculum with the core areas of learning identified as the **Basic Skills**. These four basic skills are identified as Language Arts, Mathematics, Social Studies, and Science. Competencies developed through these curricula are sequential and developmental and will prepare individuals to effectively use their knowledge in the performance of many tasks. Basic skills are, therefore, identified as the fundamental abilities one needs in order to function adequately in a society. The ultimate goal of education is to provide each student with the academic knowledge and skills needed for further education and/or training for the eventual purpose of successful entry into the work force.

Career Development is the Fifth Basic Skill that all students need in order to prepare themselves for constructive participation in society and the realization of a desired life style. Career development begins at an early age with basic information and experiences and continues in a developmental manner which includes a series of transitions involving individual growth and environmental changes. Career development gives the individual the opportunity to explore self and career options, secure an understanding of occupations, acquire decision making skills, develop a positive work ethic, clarify an understanding of work, and make realistic career plans necessary to enter an occupation.

The Comprehensive Career Development Program provides students, K-12, with the information and experience necessary to develop competencies which will help students make realistic career plans and prepare them with the career development skills necessary to successfully enter the global workplace.
The Comprehensive Career Development Program evolves around three interrelated domains: Self-Knowledge, Educational Development, and Career Planning. The domains remain the same throughout the model; however, the competencies are developmental at each grade level.

**SELF-KNOWLEDGE**
All students will acquire and demonstrate competencies in effective interpersonal relationships and recognize their potential contribution to society and the world.

**EDUCATIONAL DEVELOPMENT**
All students will acquire and demonstrate competencies in developing an educational program that prepares them for a career goal.

**CAREER PLANNING**
All students will acquire and demonstrate competencies in planning and preparing for a career that relates to their assessed aptitudes, interests and abilities.
Students will begin to show a preference for the direction their high school and postsecondary education will take.

The sequential order of career development is: awareness, exploration, and preparation.

**Awareness** - The initial process of career development requires the students to become knowledgeable of their aptitudes, interests, and abilities and how these relate to occupations. They will begin the process by career clustering and understanding the importance of learned skills to occupations.

**Exploration** - This segment of career development involves in-depth investigations of occupations through research and experiential activities.

**Preparation** - The preparation phase includes planning for and acquiring the educational and skill training necessary for entry into an occupation or further education/training experience in colleges, the military, apprenticeships, or proprietary schools.

The graphic depiction of this process illustrates the grade levels at which each of these steps can be presented in a sequential, developmental Career Development Program.
NATIONAL CAREER DEVELOPMENT GUIDELINES
CAREER DEVELOPMENT COMPETENCIES BY AREA AND LEVEL

The primary purpose of developing the National Career Development Guidelines was to provide a framework for states to follow when designing their own guidelines. Therefore, the Comprehensive Career Development Program embraces some content from the National Career Development Guidelines and includes features from other programs such as the Missouri and New Hampshire models.

THE COMPREHENSIVE CAREER DEVELOPMENT PROGRAM

The Comprehensive Career Development Program is based upon South Carolina Career Guidance Guidelines for Program Development (K-12) as mandated in Section 33 of the 1976 Education Code which is part of the Target 2000 initiative of the South Carolina Department of Education.

TARGET 2000

Section 33. The 1976 Code is amended by adding: "The State Department of Education is directed to develop guidelines to include career guidance as part of the general guidance program in the schools of the State."

CAREER GUIDANCE GUIDELINES

Career Guidance should:
.... be part of all general guidance programs.
.... have planned objectives that are sequential and developmental with expected student outcomes and activities to bring about these stated outcomes in grades K-12.
.... enhance the stated mission of the South Carolina Department of Education by providing appropriate opportunities to prepare the youth of South Carolina for constructive participation in society and immediate employment or further education.
.... evolve around three interrelated domains: Self-Knowledge, Educational Development, and Career Development.
.... actively involve counselors, faculty and staff, parents, community, business/industry, and administrators in the career development of students.
.... provide students with up-to-date career and labor market information through resources such as those contained in Library/Media Centers, those accessed through the South Carolina Occupational Information System (SCOIS), practitioners, and career publications.
.... utilize a variety of approaches including classroom activities, elective courses, infusion, shadowing, experimental programs, and other innovative strategies, depending upon the grade level and maturity of the students.
.... provide activities that involve "Applied Academics," thus enhancing the relevancy of learned Basic Skills to careers.
CAREER GUIDANCE GUIDELINES

Career Guidance should:

... utilize personal experiences as well as assessment instruments, when appropriate, to determine individual aptitude, interests, and needs as related to career development.

... prepare students with decision making skills necessary in choosing effective alternatives throughout life in planning and preparing for career goals.

... provide students with up-to-date information regarding postsecondary career development options including College/University, Military, Apprenticeships, On-The-Job Training, Technical Colleges, Private Vocational Schools, and other pathways to achieving career goals.
A quality career development program requires the interaction and collaboration of administrators, counselors, faculty and staff, parents, and representatives from business/industry.
ADMINISTRATOR

The administrator must be genuine and overt in his/her support of a Comprehensive Career Development Program. The administrator’s enthusiasm will engender within the school district and the community the willingness to lend active support to the successful implementation of a comprehensive career development program.

THE ADMINISTRATOR

.... provides leadership and support necessary to integrate career development into the instructional program.
.... encourages the participation of staff members in career development programs.
.... plans staff development activities in order to develop the level of understanding of career education concepts.
.... supports the establishment of a career development advisory committee.
.... defines staff and administrative responsibilities to encourage career development.
.... provides adequate facilities, materials, and time for career development programs.
COUNSELOR

The counselor acts as the facilitator of a career development program; however, effective delivery of the program will depend on teaming with groups such as other staff members, parents, administrators, and community business/industry representatives. Counselors need to keep up-to-date on a variety of career development materials and to participate in professional experiences to improve their skills and knowledge related to career development.

THE COUNSELOR

... provides leadership for initiating efforts to design a Comprehensive Career Development Program K-12 for his/her district.

... involves teachers, peers, business/industry, parents, and community resource persons.

... plans student learning experiences and competencies for use in classroom settings.

... includes volunteers, special needs staff, school health nurses, paraprofessionals, and other students.

... assists students to investigate career options and plan pathways to careers through individual and group career development activities.
FACULTY AND STAFF

Career development activities should be integrated into all subject areas and grade levels. This strategy will give new life and meaning to course content as well as add relevancy to the world of occupations.

THE FACULTY AND STAFF

.... plan classroom career development activities with the counselor.
.... utilize infusion strategies which integrate career development activities into all subject areas and grade levels.
.... plan activities utilizing technological resources such as the South Carolina Occupational Information System (SCOIS).
.... make available materials that provide current occupational and career information.
.... act as resource people by sharing interests and experiences with students.
PARENT

The family structure and environmental surroundings have a dynamic impact on the development of a child. Career development can be most effective when there is support from the home and family structure. It is vitally important that the home and family be actively involved, whenever appropriate, in career planning activities. Parents (life partners) and other family members strongly influence the perspectives students have of work and the demands placed upon them by society. Perceptions of work communicated to children by those in the home environment either greatly hinder or promote their concept of work.

THE PARENT

.... maintains an active interest in and support of career development activities.
.... displays positive attitudes about the concept of work.
.... provides opportunities for and encourages the expression of his/her child's individual aptitudes, interests, and abilities.
.... will learn which career options will be available for his/her children in order to prepare and plan for the time when they will enter the global marketplace.
.... explores all educational/training options and financial aid available.
COMMUNITY, BUSINESS AND INDUSTRY

The community is an integral part of a career development program. Business and industry depend upon the youth in communities to supply present and future human resources for their many jobs, as well as to prosper through employment and become consumers of their products and services.

THE COMMUNITY

.... provides students with occupational information.
.... participates in the Adopt-A-School Program.
.... provides settings in which students can gain actual work experience.
.... supports career development programs through fraternal organizations, community service organizations, and interest groups.
THE FORMAT

The Comprehensive Career Development Program follows a sequential, developmental plan of objectives with expected student outcomes and activities to bring about these outcomes for students in K-12. The program is presented in the following format for grade segments K-3, 4-5, 6-9, 10-12.

* An overview describing characteristics and needs of students regarding career development.
* Stated career development objectives.
* Competency-based planned activities involving counselors, teachers, parents, community, and administrators.
ELEMEN TARY CAREER DEVELOPMENT OVERVIEW

The primary goal for career development at the elementary school level is aiding children to begin mastering the competencies which are essential for achieving a productive and rewarding way of life. The Elementary Career Development Program is concerned with increasing an awareness of self, recognizing the importance of education, and extending knowledge of career options. The program is not intended to encourage children to make premature career choices; rather, it focuses on the awareness of career choices and the various pathways in achieving individual career goals. The program emphasizes how careers, based upon their relationship to individual personal characteristics, can be satisfying and rewarding. Students will become more aware of how they are unique and how they can use school experiences to explore and prepare for the future.

ADDITIONAL ACTIVITIES:
Early adolescents are slowly moving from seeking and meeting adult expectations to that of seeking and meeting their own expectations through friendships and interaction with their peer groups. Excitable, easily motivated, creative, inquisitive, and eager to explore, students require a learning environment that is participative and action oriented. Educational achievements will be maximized to the extent that the school program responds to and acknowledges these traits. The sequential order of the career development process is applicable throughout life whenever one chooses to change or venture into a new career direction. The Career Development Program at the middle/junior high school level must be designed as an integral part of the school curriculum and must address the needs of these young people, allowing each student opportunities to explore various educational and career interests and to express an individual developing self.

Career development should begin in the elementary school and progress sequentially as do the basic skills. The developmental approach continues throughout a student's years in school and beyond. A Career Development Program should present information and challenging activities which encourage students to become aware of all alternatives open to them in harmony with their abilities, interests, aptitudes, and desired life-style.

## ADDITIONAL ACTIVITIES:
HIGH SCHOOL CAREER DEVELOPMENT OVERVIEW

The high school years represent a critical time in the lives of students. For some students, this includes preparation for entry into postsecondary education; for other students, it includes direct entry into the work force or the military. For some students, it may be a challenging and frustrating time, resulting from little or no career direction. The peer pressure encountered during these years can influence future success or failure academically, socially, and occupationally. Career development programs must respond to individual needs, readiness, and motivation and must help all students prepare for the transition into the adult world. Students need to develop competencies that will enable them to make important choices that they will face during their high school years and develop the skills they will need as they mature in their own career development.
### CAREER DEVELOPMENT OBJECTIVES
#### HIGH SCHOOL (10 - 12)

<table>
<thead>
<tr>
<th>EDUCATION</th>
<th>SELF-KNOWLEDGE</th>
<th>CAREER PLANNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Recognize the relationship between academic/occupational achievement and career planning.</td>

This survey is conducted to help us plan a career development program that will be helpful and valuable to you. There are no wrong answers. We would like to know what information should be included in your career development program. We appreciate your cooperation and your honest opinion. Please use the following key for your responses. Circle one response for each item.

The types of help I need:

1. To understand how the courses I am now taking are important to various occupations
2. To get information about job opportunities.
3. To know how to apply for a job.
4. To know how to get "on-the-job" experience.
5. To have access to information about careers.
6. To have information about occupational courses offered in our school district.
7. To get a part-time job.
8. To know how my interests, abilities, and aptitudes relate to careers.
9. To know how to involve my parents in career planning.
10. To know what jobs are available in my community.
11. To know what salary I can expect in various careers.
12. To know how to choose my high school courses in order to help me reach a career goal.
13. To know more about military careers.
14. To know how to choose a career that will meet my needs for money and security.
15. To know what resources in my school provide career information.

(A) Definite Need | (B) Some Need | (C) Do Not Need

Please answer the following items:

1. My career goal is to become a(n) _________________________________.
2. I plan to enter ________________________________ (college/university, military, technical school, apprenticeship, or proprietary school) after graduation from high school.
3. I plan to work as a(n) ________________________________ after graduation from high school.
APPENDIX II

PLANNING A HIGH SCHOOL CURRICULUM

Planning a curriculum of study with a career in mind is of utmost importance in preparing for the future. High school occupational programs teach skills that can qualify a person for entry level positions in today's challenging and demanding job market. Either work bound or college bound, having an occupational skill can be an asset to every young person in South Carolina.

There are six occupational education programs offering one hundred different courses in South Carolina's public schools. All occupational courses are not offered in every school; many are regionally and/or industrially oriented, i.e., textiles and marine maintenance. An assessment of local businesses/industries' needs for employees determines to a large extent what courses are offered. The skills and education required through these programs, if successfully completed, will qualify a young person for entry-level employment or he/she may continue education/training in postsecondary institutions.

CURRICULUM PLAN

MIDDLE/JUNIOR HIGH

SEVENTH GRADE
1. Language Arts
2. Math
3. Social Studies
4. Science
5. Introduction to Careers/PE
6. Keyboarding

EIGHTH GRADE
1. Language Arts
2. Math
3. Social Studies
4. Science
5. Introduction to Careers/PE
6. Keyboarding

TECH PREP PROGRAM

NINTH GRADE
1. English I
2. Math . . . Technologies/Pre-Algebra or Algebra I
3. Physical Science
4. Health/PE
5. Social Studies
6. (Elective)

1. Language Arts (Required)
2. Math (Required)
3. Science (Lab Required)
4. Foreign Language (2d year; Required)
5. Career Planning (1/2 credit 1st Semester)
6. (Elective)

ELEVENTH GRADE
1. Language Arts (Required)
2. Math (Required)
3. U.S. History (Required)
4. Career Planning (1/2 credit)
5. (Elective)
6. (Elective)

TWELFTH GRADE
1. Language Arts (Required)
2. Economics/American Government (Required)
3. (Elective)
4. (Elective)
5. (Elective)
6. (Elective)
### APPENDIX III

#### OCCUPATIONAL EDUCATION PROGRAMS

#### AGRICULTURAL EDUCATION
- Agricultural Chemicals
- Agricultural Production and Business Mgt.
- Agricultural Products
- Agricultural Sales and Service
- Agricultural Science (9)
- Agricultural Technology (10)
- Aquaculture
- Environmental & Natural Resources
- Farm Diesel Technology
- Floriculture
- Forest Products Harvesting
- Forestry
- Livestock Management
- Ornamental Horticulture
- Turf and Lawn Management

#### HEALTH OCCUPATIONS EDUCATION
- Health Occupations Education I & II
  - Health Care Assisting
  - *Postsecondary
- Practical Nursing - 12 mo. program
  - *Postsecondary
- Practical Nursing - Phases I & II (Sr. year)
  - *Postsecondary

#### HOME ECONOMICS EDUCATION
- Child Care Services
- Clothing Services
- Food Services
- Housing and Home Furnishings Services
- Institutional and Home Management Services

#### MARKETING EDUCATION
- Entrepreneurship Program
- Fashion Merchandising Management Program
- Hospitality, Travel, and Tourism Management Program
- Hotel-Motel Management Program
- Marketing Management Program

#### BUSINESS EDUCATION
- Accounting Program
- Administrative Support Program
- Business Administration Program
- Data Processing Program
- Intensified Business Program
- Word Processing Program

#### TRADE AND INDUSTRIAL EDUCATION
- Air Conditioning and Heating
- Automotive Body Repair
- Automotive Mechanics
- Automotive Services
- Building Construction Cluster
- Cabinetmaking
- Carpentry
- Commercial Art
- Commercial Garment and Apparel Construction
- Communication Electronics
- Computer Electronics
- Cooling and Refrigeration
- Cosmetology
- Diesel Engine Mechanics
- Drafting
- Electricity
- Facility Maintenance
- Graphic Communications
- Industrial Electronics
- Industrial Maintenance Mechanic
- Machine Tool Operator
- Major Appliance Repair
- Marine Maintenance
- Masonry
- Metal Fabrication
- Sheet Metal
- Small Engine Repair
- Tailoring
- Textile Production
- Tile Setting
- Welding
APPENDIX IV

NONOCCUPATIONAL EDUCATION PROGRAMS

CONSUMER AND HOMEMAKING

Child Development
Clothing and Textiles
Consumer Education
Education for Parenthood
Family Life Education
Foods and Nutrition
Housing and Home Furnishings
Human Sexuality

INDUSTRIAL TECHNOLOGY EDUCATION

Industrial Technology Education is a course developed to provide manipulative operations and experiments with tools, materials, processes, and products directly related to four occupational clusters. The major objective is to provide students with a foundation in safety and the use of tools, equipment, and materials, and familiarity with occupationally specific nomenclature. The program also serves as an orientation to enable students in grades 9-11 to make informed decisions as to their interest and compatibility with occupational areas requiring technology knowledge and competence.

PREVOCATIONAL EDUCATION

Schools are required to provide prevocational education as an elective in grades 9 or 10. The units of instruction should include five occupational areas plus the World of Work.

MECHANICAL DRAWING

This course provides 9th and 10th grade students the opportunity to investigate technical graphics (drafting) as a vocational option and provides an understanding of basic blueprint reading. Students enrolled in this course study technical lettering, multi-view drawing, basic dimensioning, and visualizing. Mechanical Drawing is an excellent course for students who plan to enroll in occupational Trade and Industrial Education courses and for students who would like to develop basic understandings of the language of industry.

APPLIED/RELATED COURSES

APPLIED BIOLOGY-CHEMISTRY

Students will explore basic concepts and principles of biology and chemistry and apply them to issues in the workplace, in society, and in personal life experiences. The course may be offered as an alternative science course or it may be used in conjunction with existing occupational or science courses. However, it is not intended to replace traditional biology, chemistry or occupational courses.

COMMUNICATIONS FOR THE WORKPLACE

These courses, designed to serve as Levels III and IV language arts courses for high school juniors and seniors, provide connections between abstract concepts and concrete experiences—making English classes more relevant to students.

MATHEMATICS FOR THE TECHNOLOGIES

This is a two-semester course designed to develop mathematical problem-solving and computational skills. Numerous practical applications of mathematical principles are provided as the core of the learning activities.

PHYSICS FOR THE TECHNOLOGIES

This course is designed to be both academically rigorous and practical for students in grades 11-12 planning technical careers. It includes 14 units of instruction, each of which deals with one principle as it applies to the four energy systems—mechanical, fluid, thermal, and electrical—that make up both simple and complex technological devices and equipment. The units will include the mathematics needed to understand and apply the principles.
