This document describes a project conducted to develop and use a curriculum of basic skills as applied to life coping areas. The target group were students of adult basic education (ABE) who lacked basic survival skills. Within the project year, 27 students participated in the program with the curriculum that was created. The document consists of the final report of the project, an introduction to the curriculum and a bibliography of books related to each of the Everyday Basic Skills Modules. The seven modules cover the following topics: everyday basic skills, everyday mathematics, everyday English, social skills reasoning skills, employability skills, and life skills and parenting. Modules include the following: learning activities; information sheets; self-assessment questionnaires; teaching strategies and techniques keyed to skills, assessment, and materials needed, and references. The Tuscarora Intermediate Unit 11 is an equal rights and opportunity educational service agency and will not discriminate on the basis of race, color, national origin, ancestry, sex, handicap, age, or religion in its activities, educational and vocational programs or employment practices as required by Title VI of the Civil Rights Act of 1964, Title IX of the 1972 Educational Amendments, Section 504 of the Rehabilitation Act of 1973 and the Pennsylvania Human Relations Act of 1955 as amended. For information regarding civil rights or grievance procedures, contact Jacqueline Vocke, Equal Rights and Opportunity Coordinator, at Tuscarora Intermediate Unit 11, RRI, Box 70A, McVeytown, Pennsylvania 17051-9717. Telephone 814-542-2501 or 717 899-7143.
Acknowledgments

We wish to thank the Pennsylvania Department of Education for funding this project and especially Dr. John Christopher, Ed.D., Director, Bureau of Adult Basic and Literacy Education for his support of our programs.

We also extend gratitude to PDE Special Projects Advisor, Dan Partin, for his technical assistance and guidance. Funding for "Everyday Basic Skills" has allowed us to enhance and develop our programming and delivery of much needed services to our area's adults.

As always we value the support of the Tuscarora Intermediate Unit Board and our Executive Director, Dr. Dale Heller. The Intermediate Unit continues to recognize our unique contribution to the total organization.

Lesson Plans Under Separate Cover
Title: Everyday Basic Skills

Director: Carol Molek

Address: TIU Adult Education and Job Training Center
1020 BelleVernon Avenue
Lewistown, PA 17044

Phone No.: (717) 248-4942

Federal Funding: $12,170

Duration of Project:
From: 7/1/91 To: 6/30/92

Number of Months: 12

Objectives:
- To research commercially produced materials and previous 310/353's and evaluate their effectiveness.
- To develop life skill exercises that emphasize basic skills and produce a comprehensive curriculum for literacy and ABE level participants.
- To utilize the curriculum with approximately 21 students.
- To disseminate the product.

Description:
This project's goal was to develop and utilize a curriculum of basic skills as applied to life coping areas. The need for this program is extensive. Many of our students cannot proceed with training in academic areas of basic skills or for their GED or other goals because they lack self management skills in their everyday lives. By addressing these needs we open the door to further advancement for our students. We are empowering our students to meet challenges and overcome many of the barriers they face everyday.

Target Audience:
The target group are students of the literacy or ABE level who lack basic survival skills. The curriculum will be transferable to be used across the state by others who serve similar clientele. Within the project year, approximately 27 students made use of the curriculum.

Product:
A curriculum and a final report.

Method of Evaluation:
Successful evaluation is based on:
- Production of the comprehensive curriculum
- Using the curriculum with 27 ABE students (21 planned) and documenting the results of this usage
- Disseminating the product
"Everyday Basic Skills" addressed priority F11 - development of curriculum for counseling/life coping needs. Our goal in this project was to develop a comprehensive life skills curriculum for literacy and ABE level individuals with an emphasis on the basic skills needed to meet everyday survival issues.

The need for this curriculum to be established and implemented in our area was, unfortunately, very obvious. We have many students in our programs who are distracted from academic work and hindered in their academic achievement by a lack of the most basic skills: survival life skills. By addressing these needs in our participants, we are opening the door to progress in more advanced basic skills which allow our students to reach the more extended goals of attaining a GED diploma, employment, or further training. Also, while the content area of the life skills curriculum is survival issues, the skills needed to achieve in the life skills areas are the same skills needed in the academic areas. That is, while our students work on nutrition, housing, or parenting issues they develop their basic reading and math skills as they apply to these areas.

Other 310/353 projects have addressed some life skills issues. Bob Zellers did a project on home safety and first aid. The Lutheran Settlement House did a personal care area as part of a science curriculum. And the Philadelphia School District did a project ('88 - '89 - 98 - 9021) "Coping and Learning" that was specifically for single parent youth. To begin our project we
instead of the planned seven months. We enrolled and worked with students beginning in July even though no formal curriculum was in place. We felt strongly that needy students should not be put off and found we could provide services while the project was developing.

The project director was Carol Molek. Ms. Molek directs programs at the TIU Adult Education and Job Training Center. Ms. Molek has over eight years experience coordinating adult programs for the Intermediate Unit and developing curriculum. Ms. Molek directed the project, supervised the other personnel involved, was responsible for maintaining the planned time frame, recruited program participants and reported to and communicated with the Department.

Curriculum developer for the project was Dr. Barbara A. Woodruff. Dr. Woodruff has 15 years experience in adult education and curriculum development. Instructor for life skills was Penny Willard. Ms. Willard has been training adult basic education students and SPOC clients in life skills for four years.

The audience benefiting most from this project are adult basic education students needing life skill training. This lack of necessary survival skills creates a barrier for students' academic progress.

The audience for this report are ABE administrators and instructors who feel their program needs more intensified life skill training.

Permanent copies of this report can be obtained from:
"Everyday Basic Skills" was administered by the Tuscarora Intermediate Unit No. 11. The TIU is a local education agency which provides educational and management services to 9 school districts and 3 area vocational technical schools in Fulton, Huntingdon, Juniata, and Mifflin Counties.

The Intermediate Unit operates or oversees all Adult Center programs at the TIU Adult Education and Job Training Center. Center programs have included 306/321 ABE and GED programs; ACT 143 Program; the GED Alumni Association; various JTPA Programs; Carl Perkins project for single parents and displaced homemakers and thirty 310/353 special projects.

"Everyday Basic Skills" was based at the TIU Adult Education and Job Training Center at the Juniata-Mifflin Area Vocational Technical School in Lewistown, Mifflin County. The Adult Center is the home of a wide variety of adult education programs meeting the needs of adults in Juniata and Mifflin counties. February '92 marked the Adult Center's 8th year of successful operation.
Statement of Problem

"Everyday Basic Skills" represents the natural evolution of our adult basic education programming. We have found through our years of service that our instructional base has expanded greatly. Eight years ago we began with a small part time GED level program. The longer we operated the more we found that our students had many more needs outside of the strictly academic areas. Within our adult basic education level curriculum, we found that more and more of our students lacked self management skills needed for their academic progress. Our experience this year in developing and implementing "Everyday Basic Skills" has convinced us that this area of training will be a permanent part of our program offering.
Goals and Objectives

The goal of "Everyday Basic Skills" was to develop curriculum and deliver training in life skills areas in order to allow students to grow personally and academically.

Objectives for the project were:

1) To research commercially produced life skills materials and previous 310/353's and evaluate their effectiveness.

2) To develop life skills exercises and materials emphasizing basic skills to meet the life coping needs we have identified and to produce a comprehensive curriculum for literacy and ABE level participants incorporating the two objectives above.

3) To utilize the curriculum with approximately 21 students during the project year (15 in our Center and 6 in an outside agency).

4) To disseminate the above curriculum statewide.
Procedures

The general design of "Everyday Basic Skills" was in four stages.

(a) The first stage was for project personnel to examine and evaluate a wide range of commercially produced life skill texts and materials. Also 310/353 projects that address some aspect of life skill training were examined. A bibliography was developed to be incorporated into the curriculum.

(b) Our staff then designed the framework of our curriculum and exercises and activities within that structure. The curriculum was developed including our own exercises and activities.

(c) We used the above curriculum with approximately 21 participants who are functioning at the high literacy or ABE level. These students were recruited from our ABE programs or were referrals from other service providers and social service agencies. As was anticipated, most of the participants were women between the ages of 25 and 45 with children. In addition to the training at our center we had planned to use the curriculum with at least 6 participants from an outside agency. Instead of delivering this training ourselves, we were requested to share the developed curriculum with another agency for their staff's use. Both Skills, Inc. (sheltered workshop) and Head Start have received and utilized this curriculum with their clients.

We are very fortunate in our community that agencies work cooperatively in order to help meet our mutual clients' needs. For a variety of reasons we are finding more and more of our clients with
serious deficiencies in basic life skills. Since we have had long waiting lists for any life skills training offered in the past, we knew recruitment would be no problem. This is why we chose to serve as many students in-house as possible; the need is great. The goal for the students involved was to have them improve their life skills and their basic skills as they apply to survival skills and in so doing prepare them for future training (ABE, GED, employment, or other).

(d) The last stage of the project was to disseminate the above curriculum and the results of its useage as documented in this final report to other practitioners in the state. This dissemination will be done through the T.I.U., AdvancE and Pennsylvania Department of Education.

Content of the curriculum areas addressed follows as an attachment. In each area basic skills needed to achieve competency were stressed. For example, in home management, we teach how to read instructions on materials to be used in the home, how to read advertising critically to see the real picture, how to use math in comparison shopping. Because we have seen the lack of basic everyday math skills as a major problem area for our participants, this area was treated separately as well as being integrated throughout the curriculum.

Methods in the project included researching other work done in this area and commercially produced materials; developing activities and exercises that come under the framework of the project. Methods of instruction involved individual and small group
work with the 21 participants who initially made use of this curriculum.
Results

Objective # 1

To research commercially produced life skills materials and previous 310/353's and evaluate their effectiveness.

Objective # 1 was met. Commercial materials were reviewed. Those most appropriate were included as resources for the curriculum.

Objective # 2

To develop life skills exercises and materials emphasizing basic skills to meet the life coping needs we have identified and to produce a comprehensive curriculum for literacy and ABE level participants incorporating the two objectives above.

Objective # 2 was met. Life skills exercises and materials were developed. A structured curriculum was formed stressing basic life skills as they relate to personal and workplace skills. The format within each life skill module was:

Skill - Assessment - Materials - Teaching Strategy and Techniques

The curriculum was divided into the following modules:

- Basic Skills
- Everyday Math
- Everyday English
- Social Skills
- Reasoning Skills
- Employability Skills
- Life Skills
Objective # 3

To utilize the curriculum with approximately 21 students during the project year (15 in our Center and 6 in an outside agency).

Objective # 3 was somewhat redesigned. The total planned number of participants (21) was exceeded (27). Over 600 instructional hours were delivered. However, because of the great demand for services within our program site, all these students were served in-house. The plan to work with 6 clients of another agency was abandoned because 1) the other agencies (Head Start and Skills, Inc.) wanted to utilize the curriculum on their own by their own staff and 2) we maintained a waiting list in-house throughout the year.

Objective # 4

To disseminate the above curriculum statewide.

Objective # 4 is being met currently by disseminating the report and curriculum through the Tuscarora Intermediate Unit, Pennsylvania Department of Education and AdvancE.
Evaluation

We feel that "Everyday Basic Skills" met and exceeded all its goals. This successful evaluation is based on:

- The production of a comprehensive curriculum including exercises and activities and bibliography developed by project personnel.

- Utilization of the above curriculum with 27 literacy or ABE level participants (21 planned).

- Dissemination of final report and product.
Dissemination

This project will be available for dissemination through:

Bureau of Adult Basic & Literacy Education Programs
Pennsylvania Department of Education
333 Market Street
Harrisburg, PA 17126-0333

and

AdvancE
Pennsylvania Department of Education
333 Market Street
Harrisburg, PA 17126-0333

Specific questions should be directed to:

Carol Molek
Adult Education and Job Training Center
1020 BelleVernon Avenue
Lewistown, PA 17044
(717) 248-4942
Conclusions/Recommendations

"Everyday Basic Skills" was an extremely useful project for our Center's current participants, for our future programming, and for other practitioners statewide. The curriculum offers both structure and flexibility. The modules allow instructors to prescribe individualized areas of concentration as well as classroom instruction. We're excited to have this new tool to add to our resources in our programs.

We recommend expansion of "Everyday Basic Skills" in the future. Specifically, we would like to see computer assisted instruction added to this curriculum. Basic computer skills and familiarity are essential for today's ABE students. The computer is an influence in so many facets of today's life, from the watches our students wear to the cars they drive and the appliances they use in their homes.

Students needing life skill instruction often suffer from low self esteem and feel out of the mainstream of contemporary education. By offering life skill instruction supported by computer usage, we will be further enhancing our students' self worth and empowerment. In addition, we would recommend several additional modules for the curriculum that this project could not include: non-traditional occupations, legal and civic issues, and technical work-world math.

Our very positive experience with "Everyday Basic Skills" this year has made us more aware of our student's needs and how we can best meet those needs in an effective, productive manner.
The Tuscarora Intermediate Unit 11 is an equal opportunity educational service agency and will not discriminate on the basis of race, color, national origin, ancestry, sex, handicap, age or religion in its activities, educational and vocational programs or employment practices as required by Title VI of the Civil Rights Act of 1964, Title IX of the 1972 Educational Amendments, Section 504 of the Rehabilitation Act of 1973 and the Pennsylvania Human Relations Act of 1955 as amended. Introduction to Everyday Basic Skills Modules:

A. Introduction to Everyday Basic Skills
   An explanation of the Everyday Basic Skills for instructors and administrators begins this unit which also includes an itemized list of books and manuals suggested for use in the rest of the project.

B. The Everyday Basic Skills Modules.
   A brief overview of the Everyday Basic Skills Modules giving the salient points of each module.

C. Bibliography of Books
A. Introduction

Welcome to the Everyday Basic Skills Project

Everyday Basic Skills is a basic educational training package for life skills instruction of Adult Basic Education students.

Everyday Basic Skills consists of seven (7) complete and free standing modules that permit flexibility of delivery by classroom, small group instruction, and independent instruction. The program is tailored to individual class needs and can be implemented using instructor lesson plans which incorporate recommended educational texts and activities in a step-by-step organization featuring an easy to read format. Reading levels are maintained at 4th to 8th grade levels which permits faster absorption of information. The format consists of the skill being taught; assessment of skill development; materials recommended; teaching strategy and techniques. The open format lends itself to incorporation of existing materials currently available, as well as a gradual acquisition of suggested materials (as funding permits), as a complement to the activities end worksheets provided in each module.

The curriculum matrix guide can be used as a "roadmap" for the instructor to help the student develop an individualized program of instruction. The instructor can easily merge information presented in class with a variety of resources at a level appropriate for the student. Some students, especially some learning disabled adults need to work alone, or in a atmosphere that reduces the sense of failure they may have acquired in previous unsuccessful learning experiences. For these students, the flexibility of the instruction materials allows remediation of selected weak areas prior to inclusion in regular classroom activities. Additionally, the instructor can narrow the wide range of skills and abilities found in the average adult classroom, by selective use of materials and handouts.
The program covers a wide range of individuals having varying levels of education, training and life skill knowledge. Everyday Basic Skills modules permit changing reading levels in the program by changing the books and manuals. The current reading level centers between 4th and 8th grade level, the same level as a newspaper. All books, worksheets and manuals are adult-oriented, featuring subject material geared towards career, family and household interests. It is expected that due to the varying skills and abilities of the Basic Skills participants, not all the modules may be used. Selection of appropriate modules as well as individual skills contained within the modules are therefore to be left to the individual instructor.

The recommended procedure for Everyday Basic Skills participants is as follows:

- Assessment/intake is done for the student and a determination made of the required skills such as life skills, math, English, etc. Testing of the student is recommended.

- A determination of the student's job interests can be done at intake or this can be completed at a later time.

- Assessment of student educational needs and the available programs at the site should determine the assignment of the student to a particular instructor/class.

- The amount of time a student spends working on the modules is decided by the instructor, based on student needs. The instructor can help transition a student into programs by providing classroom and small group instruction until an impending program is available, or until the student makes sufficient progress to ensure his/her successful entry into advanced level programs.

- The lesson plans should be used as a basis for the individual classes. Instructors can determine the amount of time each individual student needs to spend on each of the skills based upon his/her accomplishment of the skills as determined by the assessment given in the lesson plans.
B. The Everyday Basic Skills Modules.

1. **Everyday Basic Skills**
   Introduces student to learning how to learn. Six units are included in this module essential to student understanding. This unit builds the foundation for the student to learn his/her learning style.

2. **Everyday Math**
   Brushup of basic math skills and introduction to the use of calculators are the units contained in this module. Number skills unit includes addition, subtraction, multiplication, division of whole numbers, fractions and percentages.

3. **Everyday English**
   Basic skills of vocabulary, speaking, listening and reading can be made occupation specific by the selection of manuals. Additional materials from handouts are also included in this module. Communication skills in this module assist in preparation of applications and techniques for job interviews.

4. **Social Skills**
   Three types of social skills commonly encountered in the work environment are the framework of this module. Units are: initiating social skills which includes making telephone calls, asking for information and situations requiring the student to begin the interaction; personal social skills which includes cooperating with others, dependability, telling the truth, courteousness, responsibility and maintaining grooming; responding social skills which includes following instructions, responding to peer pressure and responding to others. Interviewing skills are included. Hygiene and clothing selection which can be extremely sensitive areas are handled in a discrete manner that permits the student to learn with no loss of self esteem. This is a major advantage for older students who have led restricted lives and are not comfortable discussing certain subjects in public.
5. **Reasoning Skills**

This module emphasizes making estimates of time and money, classifying people, objects, information and locating and using information sources. These areas are essential for the future employee to use in deciding which task to do first, or how to determine how long a particular task may take to complete. Planning work goals and projects focuses on using the skills of time and money estimates and classification of people, objects and information to develop useable workplace reasoning skills. Problem diagnosis and troubleshooting teaches the student to think through how equipment operates by observation and reading operator's handbooks to determine how to correct simple problems such as a photocopier in need of paper or use of telephone equipment.

6. **Employability Skills**

There are two units in this module: Job Search issues and job retention issues. The first unit focuses on how to find job leads, preparation of resumes, filling out job applications and conducting oneself during an interview. Job retention deals with keeping a job by learning to function successfully in the job environment. Learning the various types of bosses, ie. autocratic, democratic, etc., and how to deal with problem co-workers can make the difference between job satisfaction and dissatisfaction. Students can develop a resume and cover letter. Other handouts help improve self management skills, help students in goal setting and develop good assertive skills.

7. **Life Skills/Parenting**

There are three units in this module. The first, personal development, deals with issues related to the individual (for example, appearance, self esteem, life goals, health and individual value systems). The second unit covers home life issues including budgeting, grocery shopping, living in an apartment, comparison shopping skills and parenting. Using handouts and classroom interaction the student develops a greater coping ability with home life situations. The third unit concentrates on the world away from individual and homelife, the world of work. Included in this unit is material on how to manage your own company. Some individuals may have a desire to start a business of his/her own. This unit helps the student to develop a business plan suitable to begin a business. Balancing self, home, and work can be a difficult problem and emphasis is given to this area.

Everyday Basic Skills Module One

#1.

Types of Goals

Long range goals are goals that cover the next 1-5 years. They are concerned with the overall life you wish to live; including the type of job you want, whether or not you wish to be married; and the general situation in which you wish to live. The "Perfect Day" is an example of a long range goal 5 years from now.

Medium range goals cover the next 6 months to one year. They cover the particular kind of training or education that you are seeking or the next step in your career. Taking the 5 year goal of one "Perfect Day," you can decide what needs to be done each year to accomplish the 5 year goal.

List the things in each area separately:
- work responsibilities;
- where you want to live;
- what you will be doing;

Complete the work responsibilities section first, then at some later time you can complete the other sections.

Short range goals are the goals for the next 1-6 months. These are very specific. These goals should include a specific time frame for completion. For example: I want to work on computers (in 5 years.) I need to take courses on how to operate the computer (1-2 years.) I need to take a course to learn to type so I can work on the computer courses. A typing course might take 10 weeks. This is almost 3 months, so you will need to take a typing course in the next 6 months. A short range goal is to take a 10 week course in typing.

Mini-goals are those from now to one month. What do I need to do to reach my short term goal. List the action you can take now and within the month to get you on your way.

Example: Short term goal is to learn to type.

       Mini-goal is where can I go to learn to type?
#2. **Action Step in Goal Setting**

Breaking down goals into action steps is necessary in order to achieve goals by specific dates. Select one specific area of long term goals and answer the following questions:

1. What is the long term goal? (5 years.)  
   Example: Work on computers.

2. What is the medium goal? (1 year.)  
   Example: Learn computer software programs.

3. What is the short term goal? (1 to 6 months.)  
   Example: Learn to type.

4. What is the mini-goal? (from now to one month.)  
   Example: To find a place that teaches typing and to enroll in the course.

Questions to be answered in setting up action steps:

1. What do I want to do?  
2. How long will I need to do this?  
3. Where will I need to do this?  
4. What are the steps I will need to follow?  
   (These are actually mini-goals.)  
5. Are there any problems I might have in doing this?  
6. How will I overcome these problems?  
7. What time schedule should I set to achieve my mini-goal? Be very specific.
Action Steps in Goal Setting

This exercise helps you to break down the achievement of your goals into specific steps. Use the following format. In relation to your three life goals, consider what would be the action steps required in order to achieve those goals.

1. Goal:

   I believe the following action steps will help me reach that goal:
   a.
   b.
   c.

2. Goal:

   I believe the following action steps will help me reach that goal:
   a.
   b.
   c.

3. Goal:

   I believe the following action steps will help me reach that goal:
   a.
   b.
   c.
The Rock Race

Goals, like heavy rocks, take a lot of energy to move from one place to the next. The Rock Race helps you to look at how those rocks (goals) can be achieved. Follow the directions to complete this exercise.

Directions: The Rock Race suggests that you appoint one rock for each goal that you want to achieve. Place them on the starting line. (See chart below).

To move that rock closer to the finish line, you must carry it there by first stating and acting on an objective that will, when you complete it, bring you closer to your chosen goal.

There may be one or two objectives that will bring you to the realization of your goal, or there may be many objectives. In the case of stating a goal that has many objectives, it is useful to break down that goal into several small goals. You may use another piece of paper to break down the goal into several smaller goals.

Write the objectives into statements that are realistic and able to be achieved. For example: a goal statement of becoming a secretary. This goal would have several parts: you would need to be able to type and perhaps to use a computer. You might also need specialized training; for example, if you were to become a medical secretary. This is an example of a realistic and achievable goal. Stating the time frame during which you plan to achieve this goal is also suggested. The more specific your objectives (and goals) are, the better you will feel about them. You won't be overwhelmed and become discouraged because your objectives and goals seem too large to be completed.

Make a chart, like the one below, of your goals. As you achieve the objectives that reach towards the final goal, cross them out and move that rock closer to the finish line. Remember to reward yourself in some positive way for every achievement.

When you complete one goal, you can then put another one in its place.

THE ROCK RACE

FINISH LINE (GOAL ACHIEVED)

1. 

OBJECTIVES

1. 

2. 

3. 

4. 

5.
Obituary Exercise

This exercise asks that you think through your goals and then look at what your life would be like if those goals had been reached.

Do the following steps:

1. Assume that you will realize all the goals you had when you first decided to take this class.

2. Assume that you will live to be 100 years old.

3. Write your obituary. Be sure to include cause of death, life’s accomplishments and persons who will survive you.

4. Share your obituary with your group or class as your instructor directs.

Use the bottom of this page to write your obituary.
From General to Specific

Directions for instructor: Give each participant 9 sheets of paper. On the top of each paper list the following titles. Allow 45-60 minutes for completion of each page. Have them share the results in groups of three or four persons.

1. Lifetime goals as you see them today.
2. How would you like to spend the next 5 years?
3. If I know I have only 6 months to live, what would my goal be?
4. A narrow list of goals to about 9 goals or less which are important to me at this time.
5. Determine 3 long-term goals out of the 9 or less already selected.
6. Define activities towards reaching the goals.
7. Cross off any activity you will not spend at least 5 minutes on during the next week.
8. Participants should now have a list of goals on which they are willing to spend time during the next seven (7) days.
9. Finally, use a weekly planner to assign a date, time and prioritize the list of goals in the way they need to be achieved.
Plan of Action

Learning to be very specific about what steps to take in accomplishing your goals is important. In order to help you to focus on the action steps to take, answer the following questions.

1. What occupation would you like to work towards at this time?

2. In order to accomplish this goal, what changes would you have to make at home?

3. What changes would you have to make on your job? (If you have a job now.)

4. Can you do this on your own or do you need help? Specify what type of help you would need. (Example: money, additional education.)

5. Where can you get this help? If you do not know where to get the help, where would you look?

6. Consider these changes that you would have to make as immediate goals. What is your most important immediate goal?

7. Are there any hindrances to prevent you from beginning to make these changes? If so, what are they?

8. What can you do to overcome these hindrances?

9. What action do you plan to take? When do you plan to start?
Who Am I?

Directions: Below you will find a series of statements which complete the sentence, "I am a person who..." Read each statement and decide how much it describes you. In making your decision, compare yourself with the majority of people your own age. Just write a number from 0 to 10 to describe how much the statement describes you. A "0" would mean that the statement does not describe you at all. A "10" would mean that the statement describes you perfectly.

Example: I am a person who... really likes to cook.

This would describe someone who has little interest in cooking.

Be honest in your answers. This is not a test.

I am a person who...

1. gets tired at what I am doing.  
   _____

2. is, usually, satisfied with myself.  
   _____

3. is as good looking as most people.  
   _____

4. doesn't talk much in social situations because people might laugh at me.  
   _____

5. can learn things about as quickly as others can.  
   _____

6. has a number of good abilities.  
   _____

7. at times, I think I am no good at all.  
   _____

8. has a lot of things I would change about my looks.  
   _____

9. is fun to be with.  
   _____

10. has difficulty paying attention in classes.  
    _____

11. is able to do things as well as most other people.  
    _____

12. can be depended upon.  
    _____

13. who is not too tall or too short.  
    _____

14. tends to be what other people expect me to be rather than who I really am.  
    _____

15. can usually remember things I hear in class.  
    _____

16. has good ideas about some things.  
    _____

17. has a pretty mixed up life.  
    _____

18. worries a lot about my health.  
    _____

19. is as popular as most other people.  
    _____
20. gets upset when teachers ask me questions in class.
21. can't solve puzzles or story problems easily.
22. is not usually bothered by things.
23. is not too thin or too fat.
24. other people pick on a lot.
25. usually gets upset when I have to take a test.
26. has trouble thinking good things about myself.
27. has a pretty low opinion of myself.
28. is too small and not very well built.
29. feels that I make friends easily.
30. usually gets my work done on time.
Everyday Basic Skills Module One

Scoring
There are five scales on this questionnaire. To obtain your scores add the numbers you gave each positive and negative item in each scale.

<table>
<thead>
<tr>
<th>Positive Questions</th>
<th>Self-Concept Scale</th>
<th>Negative Questions</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ques. 2,12,22 P</td>

<td>Class &amp; Studying</td>
<td>10,20,25 N</td>
<td>P-N = ___</td>
</tr>
</tbody>
</table>

Add the columns to obtain a total self-concept score

Total = ________

Our self-concept is the way we feel about ourselves. The total score shows your thoughts and feelings about yourself. The higher your score, the higher your opinion of yourself in that area. The highest possible score on any of the columns is 30. The highest possible total score is 150. A low overall score might be 60 or below. A low score on any one of the columns might be 10 or below.

Thinking positive (good thoughts) or negative (unhappy thoughts) about different areas is to be expected. Not everyone feels the same about everything. Self-concepts are important to understand because they may be the reason why we do many of the things we do and make the choices we do. A person who has a low self-concept in physical appearance probably would not enter beauty contests. However, these scores are only to be used as guides to understanding ourselves. Just because a score may be low is not a reason to be upset with yourself. How you were feeling today when you scored how you think and feel about yourself has an impact on how high you may have placed the score. Tomorrow you might feel differently.

Self-concept is not the same as abilities. You may be able to do something quite well, but at the same time have a very low opinion of yourself in that area. For example, you may play a musical instrument very well, but you are not happy to play in public. It depends upon what experiences you may have had when you did play music in public.

Read back over the questionnaire items to find the areas you might want to change. Ask your friends who know you very well if they would agree with the way you see yourself. Sometimes other people see us differently. If your scores are very low, talk to the instructor for additional information on how to improve your scores.

*Developed from 1981 Educational Media Corp. Box 21311, Minneapolis MN 55421.*
Problem Solving Style

Directions: The purpose of this questionnaire is to give you an opportunity to determine your problem solving style. For each of the following situations, choose the statement which most closely fits the manner in which you would act. There are no right or wrong answers. Sometimes all three answers would describe your behavior.

1. When faced with finding a solution to a challenging task...
   A. I have extreme difficulty being satisfied with my solutions.
   B. I feel compelled to try a number of different solutions before deciding on one answer.
   C. I seek a solution and usually find one as quickly as possible.

2. When faced with a complicated problem...
   A. I seek a large number of possible solutions.
   B. I examine a number of solutions, but then settle on the one or two best solutions.
   C. I usually find one solution quickly and stick with it.

3. When faced with a problem...
   A. I let my mind wonder about all the possible ways of solving the problem.
   B. I look many ways, examine all I know to solve the problem and decide.
   C. I attempt to solve the problem quickly by applying my knowledge to the problem.

4. If "something" is running smoothly...
   A. I am likely to tinker with its operation.
   B. I am likely to continuously look for ways in which it might be improved.
   C. I am likely to leave it alone.

5. When faced with a real crisis...
   A. I usually find that I can separate myself and not get too involved in it.
   B. I usually feel torn between being detached from the situation and being involved in it.
   C. I usually involve myself in the situation until it is solved.

6. When someone presents me with a personal concern...
   A. I usually keep my distance and let the person solve the problem.
   B. I share my ideas, listen to other people's ideas, and insist that all ideas are considered.
   C. I usually believe that my ideas are better.

7. In solving problems...
   A. I usually wonder if I can arrive at a satisfactory solution.
   B. I usually wonder if I can solve the problem then know that I can solve the problem.
   C. I usually know that no problem is too large for me to find some solution.

8. In new learning situations...
   A. I am usually very relaxed.
   B. I am relaxed but attentive to what is happening.
   C. I am very attentive to the point of sometimes being upset.

9. When I am working with other people to solve a problem...
   A. I share my ideas but willingly go along with the others.
   B. I share my ideas, listen to other people's ideas, and insist that all ideas are considered.
   C. I usually believe that my ideas are better.
Everyday Basic Skills Module One

Scoring

To find your score, count the number of A's circled and multiply by one. Count the number of B's circled and multiply by two. Count the number of C's and multiply by three. Add the three scores to find your problem solving score.

Number of A's = ________ times 1 = __________
Number of B's = ________ times 2 = __________
Number of C's = ________ times 3 = __________
Total = __________ = Problem Solving Score

Locate your problem solving score on the scale below by circling the number which is the same as your total score.

Open Approach 9 10 11 12 13 14 15
Reflective Approach 16 17 18 19 20 21
Focused Approach 22 23 24 25 26 27

People attempt to solve problems in many different ways. Those people who use an open approach attempt to see all possible solutions. People who seek answers as quickly as possible are using a focused approach. The reflective approach is the examination and evaluation of a number of possible solutions and alternatives. Most of the time, the situation will decide which approach is best to use. For example, if your house is on fire, you would not sit down to study which would be the best approach to put out the fire, you would use an fast solution--call the fire department. However, if you were deciding upon where to live, or what job you might want, a reflective problem solving style is recommended.

*Developed from 1981 Educational Media Corp. Box 21311, Minneapolis MN 55421
CREATE
Creativity Remains Exciting and Teaches Effectively.

Directions: The purpose of this exercise is to help you to create study aids. As you go through this exercise, you will use words to develop memory aids. You should try to write as many sentences as you can using the letters of each of the given words.

Examples: FOIL - Free Oil Is Likely; Fancy Old Isabel Laughed.
Day - David Always Yells; Daffodils Are Yellow.

Try to find words for each of the letters in the following words:

1. SAD
2. LIP
3. TEN
4. CANE
5. MIST
6. TAPE
7. FIRST
8. GROWTH
9. DOG
10. CAT
How Do You Learn?

Directions: The purpose of this inventory is to help you assess your learning style. There are no right or wrong answers. For each question, put the number that best describes your answer on the line in front of the number.

1. I like using my hands when learning about something.
2. I like seeing how a task is done before I try it.
3. I would rather learn about the news listening to the radio than reading about it.
4. I listen to the tone of the speaker's voice for the meaning.
5. When someone is talking, I get a lot out of how that person uses gestures.

6. When people introduce themselves, I try to visualize their names.
7. I would rather participate in an activity than watch others do it.
8. I tune a radio more by sound than by the numbers on the dial.
9. When someone gives me a complicated problem, I prefer to see it on paper rather than hear about it.
10. I prefer classes in which I am actively doing something.

11. For me, doing is learning.
12. For me seeing is believing.
13. I choose my clothes by the way they feel on me.
15. I depend upon the radio for keeping up with what is happening in my community.

16. I like to explore objects by feeling their texture, shape, etc.
17. I would rather watch an athletic event than participate in it.
18. I learn best when I can discuss my ideas with others.
19. I learn best from teachers who have distinctive voices, speaking and lecturing styles.
20. I can tell more about persons from hearing their voices than from seeing them.

21. I like reading books that have pictures better than books with no pictures.
22. I enjoy classes in which teachers use many visual aids.
23. I would rather listen to cassette tapes than read.
24. I like classes that have planned activities and experiments.
25. I am interested in sounds.

26. Listening to music is one of my favorite things to do.
27. The things I remember best are things in which I have participated.
28. In trying to remember where I left something, I visualize where I placed it.
29. Learning only has meaning for me if I get a chance to try it.
30. When learning, I like to sit back, listen and absorb what is being said.
SCORING

Each of us has different ways of learning. Some people like to learn by watching others and seeing how a task is done. [Visual] Other people prefer to listen and then talk about the task. [Auditory] Still other people prefer to learn by trying to do things by themselves. [Kinesthetic] You can learn more about your learning style by transferring the numbers to the chart below and then totalling the columns.

<table>
<thead>
<tr>
<th>Visual</th>
<th>Auditory</th>
<th>Kinesthetic</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>28</td>
<td>30</td>
<td>29</td>
</tr>
</tbody>
</table>

TOTAL   ____  _______  _______  

Look at the totals in the three columns above. The highest number shows your learning style. If two numbers are close together, that means you have two styles of learning and then have a multi-sensory learning style. With a multi-sensory learning style, you can learn using visual or auditory methods. This can be useful when you have to study; you can use your learning style to help you study. For example: if you know that you have an auditory learning style and a visual learning style, you can study by reading the material into a tape recorder and listening to the tape. This method will use both of your learning styles.

Discuss with the class other ways of taking advantage of your learning style.
How Do You Study?

Directions: This questionnaire will help you learn how you study. This is not a test. There are no right or wrong answers. Read each question carefully and put the number on the line in front of the question number that best describes your answer.

1. I study on a regular basis.
2. I take good notes in class and while studying.
3. I am careful on tests.
4. I think about other things when I am studying.
5. I am a fast reader.
6. I complete my written assignments on time.
7. I keep up on my reading assignments.
8. I am satisfied with the amount of time I spend studying.
9. I review my notes after a class.
10. I go into tests well prepared.
11. Every little noise bothers me when I'm studying.
12. I understand what I read.
13. I keep up to date with my assignments in class.
14. I go to classes well prepared, having done the assignments needed.
15. I set time goals to complete certain assignments within a certain time when I study.
16. I take notes without any difficulty.
17. I try to determine which questions might be asked on a test when I study for the test.
18. I daydream in class.
19. I use the books and other items in the library to help me when I study.
20. I study even when I don't have a specific assignment.
21. I make outlines of what I need to do before I begin a project.
22. I make good use of my study time.
23. I can easily keep up with class discussions.
24. When I have to write an essay, I mentally outline what I want to say before I write it.
25. I have a problem keeping my attention on studying.
26. I remember most of what I read.
27. I plan my study time.
28. I study regularly rather than just before exams.
29. I use some of my free time to review lessons or to read ahead in classes.
30. I frequently go over my class notes.
31. I test myself on class material to make sure I know it.
32. I feel that my study time does not accomplish anything.
33. I like to read and find it exciting.
34. I have a certain way I like to review my class notes.
35. I stay with my studying until I understand the lesson.
SCORING

There are seven different characteristics of studying: Time Usage; Note Taking; Test Preparation; Reading; Organization; Persistence; and Concentration. If you have a high score [between 5 and 25] on the first 6 characteristics, this indicates strength in these areas. On the seventh characteristic, Concentration, a low score [below 10] indicates strength. Transfer the numbers to the chart below and total the columns to get your score.

<table>
<thead>
<tr>
<th>Time Usage</th>
<th>Note Taking</th>
<th>Test Taking</th>
<th>Reading</th>
<th>Organization</th>
<th>Persistence</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td>5</td>
<td>6</td>
<td>7</td>
</tr>
<tr>
<td>8</td>
<td>9</td>
<td>10</td>
<td>12</td>
<td>13</td>
<td>14</td>
</tr>
<tr>
<td>15</td>
<td>16</td>
<td>17</td>
<td>19</td>
<td>21</td>
<td>20</td>
</tr>
<tr>
<td>22</td>

#11 Humorous Step By Step Description of My Morning.

I awoke this morning to the smell of burning coffee. Leaping to my feet, I ran down the hall to the kitchen where I found the automatic coffee maker merrily bubbling hot coffee all over the counter. Before I went to bed last night, I had placed the coffee pot in position to catch the freshly brewed coffee as it poured out. However, sometime during the night, the coffee pot had leaped into the air and landed on the floor leaving the freshly brewed coffee no place to go but on the counter and onto the floor in search of the coffee pot. Since I knew that coffee pots do not fly, I immediately suspected a conspiracy by my cat to drive me crazy. And, as I looked down, there was my cat, quietly watching the coffee drip onto the floor. From the look of happiness on his whiskered face, I knew who had assisted the coffee pot in its leap onto the floor. I turned and reached for the cabinet where I kept the dish towels, all the while thinking of revenge on the cat. Suddenly, I heard a yelp, a thud, and a loud MEOW. Turning back around, I saw that the cat had received his just punishment. The cat had tried to jump up upon the counter in order to get away from the spreading brown liquid that was rapidly filling the floor of the kitchen. His paws slipped in the liquid and his claws were useless to dig into the shiny countertop. For a brief moment, the cat hung suspended in air over the growing puddle of coffee. Then, with paws wildly swinging in all directions, the cat began his descent into the large puddle of the dark murky liquid. Splash! went the cat into the coffee. "MEOW!" he said as he peeled himself off the kitchen floor and went off to repair his wet fur. Serves him right, I thought. I got out the mop and began wiping up my pre-breakfast surprize.
#12  

How Do I Think?

**Directions:** The purpose of these questions is to give you an opportunity to learn about how you think. For each of the statements, decide whether the statement is like you or unlike you. Place an X on the line that best describes you. There are no "right" or "wrong" answers. For best results, be honest in answering the questions.

<table>

Scoring

Count the number of X's in the "Like Me" column for odd-numbered questions. [Questions: 1, 3, 5, 9, 11, 13, 15, 17]. Place answer on this line. ANSWER: ____________
This is your drawing together score.

Count the number of X's in the "Unlike Me" column for even-numbered questions. [Questions: 2, 4, 6, 8, 10, 12, 14, 16, 18]. Place answer on this line. ANSWER: ____________
This is your drawing apart score.

Plot your score on the matrix below. Locate the "Draw Together" section. This section runs from left to right. Find the number you put in the first answer line and circle the number. Then look, at the "Draw Apart" section. This section runs from bottom to top. Find the number that is the same as your answer to the second answer line.

Draw Apart

People think about problems in two ways. "Drawing Together" thinkers look for answers from the "Here and Now" focusing on drawing together what they know in order to develop special solutions to particular problems. The "Drawing Apart" thinkers look for answers from the "There and Then" focusing away from what they may know to what someone else knows in order to develop several answers to a problem.

Most of the time people tend to combine these types of thinking to arrive at answers to problems. People will consider what they know, then talk to other people to find out other opinions.
There are four different types of thinking patterns. Each of the corners of the matrix represents a different pattern of thinking.

**Imagining Thinkers.**

People who score in the top left part of the matrix are considered *imagining thinkers* who think about a lot of possible solutions but without any concern for the best solution and being able to put it to use.

**Creative Thinkers.**

People who score in the top right part of the matrix are considered *creative thinkers* who carefully think about many solutions in a step-by-step pattern that discards parts of ideas that are unusable and add new parts until a workable solution is obtained. An example of this type of person is one who will think of an idea, then try it out, changing the idea as needed to eliminate problems until it works.

**Opposing Change Thinkers.**

People who score in the lower left of the matrix are considered *opposing change thinkers*. This person will often be against any new ideas if it will cause changes to occur. An example of this type of person is one who may refuse to accept sorting garbage for recycling because it changed the way he/she disposes of trash.

**Concern with Needs and Results Thinkers.**

People who score in the lower right of the matrix are considered *concern with needs and results thinkers*. This person will consider the needs first, and then use a solution that gets the results that are necessary. This person would consider the need to get rid of the garbage first, and would use the first available solution.
The percent circle is used to find the formula needed to solve percent problems. By covering the symbol of the number you are trying to find, the remaining symbols will show the formula you need to use.

For example: If 25% of your $800 paycheck is used to pay rent, how much is your rent? In this problem, you are looking to find a part of the paycheck. Cover the P on the top with your finger. The formula "% X W" [which stands for percent, times, whole] remains uncovered and is the method used to solve the problem.

Let's use this formula to solve the problem: What is 25% of $800?

\[
\begin{align*}
25\% \text{ multiplied by } $800 &= \\
.25 \times 800 &= $200. \text{ Your rent is } $200.
\end{align*}
\]

Now try to solve these problems by covering different parts of the circle.

A. If $250 of your $800 paycheck is used to buy food, what percent is spent on food?
Step One: What are you trying to find?
Step Two: Cover the symbol of what you are trying to find.
Step Three: Use the remaining formula to solve the problem.

B. If you buy a used car and make a 10% down payment of $250, what is the price of the car?
The percent circle is used to find the formula needed to solve percent problems. By covering the symbol of the number you are trying to find, the remaining symbols will show the formula you need to use.

For example: If 25% of your $800 paycheck is used to pay rent, how much is your rent? In this problem, you are looking to find a part of the paycheck. Cover the P on the top with your finger. The formula "% X W" [which stands for percent, times, whole] remains uncovered and is the method used to solve the problem.

Let's use this formula to solve the problem: What is 25% of $800?

\[
25\% \text{ multiplied by }$800 = \\
.25 \times 800 = $200. \text{ Your rent is }$200.
\]

Now try to solve these problems by covering different parts of the circle.

A. If $250 of your $800 paycheck is used to buy food, what percent is spent on food?
Step One: What are you trying to find?
Step Two: Cover the symbol of what you are trying to find.
Step Three: Use the remaining formula to solve the problem.

Instructor: You are trying to find a percent. What percent is $250 of $800?
Cover the % symbol and the X [times] symbol. Note: when covering either the % or the W symbol, ALWAYS cover the X also.

The formula remaining is: \[ \frac{P}{W} \]
The division line separates the Part from the Whole.

To solve the problem, divide the part ($250) by the whole ($800)
250 divided by 800 equals .3125. Move the decimal point two places and add a percent sign.
31.25% or round off the percentage to 31%.
Therefore, 31% of your paycheck is spent for food.
B. If you buy a used car and make a 10% down payment of $250, what is the price of the car?

Step One: What are you trying to find? You are trying to find the Whole price of the car.

Step Two: Cover the symbol of what you are trying to find. Cover the W. Remember to also cover the X.

Step Three: The formula remaining is \( \frac{P}{\%} \)

Divide $250 by 10%. First, change the percent to a decimal by removing the % sign and counting two places from the right.

\[
\frac{250}{0.10} = 2500.
\]

Therefore the whole price of the car is $2500.
Credit Information Fact Sheet

Borrowing money to buy items can cost more than you may know. When you are using a credit card to buy items, you are actually borrowing money. Do you know how much extra you pay for the item when the credit card finance charges are added?

Let's use an example of a credit card purchase to learn about how to find the real price of items charged on a credit card.

You find a beautiful coat ($200), suit ($125), dress ($69) and blouse ($35). The salesperson says that you can buy all of this merchandise for only $10 per month. You decide that this is really great, and you buy all of the items. The first statement arrives, as shown below.

<table>
<thead>
<tr>
<th>New Balance</th>
<th>Finance Charge on unpaid balance</th>
<th>January Balance</th>
<th>Payment Due</th>
</tr>
</thead>
<tbody>
<tr>
<td>$429.00</td>
<td>$6.44</td>
<td>$435.44</td>
<td>$10.00</td>
</tr>
</tbody>
</table>

Finance charge of 1.5% is calculated on the unpaid balance as of the 20th of the month.

1. Is the beginning balance correct? Add up $200 + $125 + $69 + $35 = $429.

2. How is the finance charge calculated? $429 times .015 equals $6.435 which the store will round up to the nearest cent. So the finance charge is $6.44, for January. The credit card company will calculate the finance charge on the unpaid balance, and add this figure to your account before they subtract the payment. This is the interest on your loan.

3. You decide to pay $10 for the first payment. How much is the principal reduced? _____.

4. Calculate out the payments of $10.00 per month. Be sure to add 1.5% (.015) interest to the unpaid balance at the beginning of each month before subtracting the $10 payment. You may want to use a calculator.

5. How long will it take to pay off the balance? ________________.

6. How much is the total finance charge? ________________.

7. What is the total amount paid? ____________________.

8. What percent of the final cost was interest? ____________________.

9. Use the percent figure calculated in problem #8 and add the interest charges to each item.

Coat $200 + _____ percent interest  real price of coat___________.
Suit $125 + _____ percent interest  real price of suit___________.
Dress $69 + _____ percent interest  real price of dress___________.
Blouse $35 + _____ percent interest  real price of blouse___________.

Class discussion: Answer the following questions briefly and be prepared to discuss them in class.

Would you have purchased these items at the real price which included the interest on the loan?
If so, why?

If not, why?

How could you reduce the finance charges?

Credit Information Fact Sheet

Let's use an example of a credit card purchase to learn about how to find the real price of items charged on a credit card.

You find a beautiful coat ($200), suit ($125), dress ($69) and blouse ($35). The salesperson says that you can buy all of this merchandise for only $10 per month. You decide that this is really great, and you buy all of the items. The first statement arrives, as shown below.

<table>
<thead>
<tr>
<th>New Balance</th>
<th>Finance Charge on unpaid balance</th>
<th>January Balance</th>
<th>Payment Due</th>
</tr>
</thead>
<tbody>
<tr>
<td>$429.00</td>
<td>$6.44</td>
<td>$435.44</td>
<td>$10.00</td>
</tr>
</tbody>
</table>

Finance charge of 1.5% is calculated on the unpaid balance as of the 20th of the month.

1. Is the beginning balance correct? Add up $200 + $125 + $69 + $35 = $429.

2. How is the finance charge calculated? $429 times .015 equals $6.435 which the store will round up to the nearest cent. So the finance charge is $6.44, for January. The credit card company will calculate the finance charge on the unpaid balance, and add this figure to your account before they subtract the payment. This is the interest on your loan.

3. You decide to pay $10 for the first payment. How much is the principal reduced? $3.56

4. Calculate out the payments of $10.00 per month. Be sure to add 1.5% (.015) interest to the unpaid balance at the beginning of each month before subtracting the $10 payment. You may want to use a calculator.

5. How long will it take to pay off the balance? 6 years and 10 months

6. How much is the total finance charge? $268.55

7. What is the total amount paid? $697.55

8. What percent of the final cost was interest? 62.6% (.626 or 62.6%)

9. Use the percent figure calculated in problem #8 and add the interest charges to each item.

Coat $200 + 62.6% percent interest ($125.20) real price of coat $325.20
Suit $125 + 62.6% percent interest ($78.25) real price of suit $203.25
Dress $69 + 62.6% percent interest ($43.19) real price of dress $112.19
Blouse $35 + 62.6% percent interest ($21.91) real price of blouse $56.91

Discussion: Would you purchase these items at the real price paid?

Guidelines for Active Listening

Learning how to listen takes practice. There are seven steps that can help improve your listening. Read each one carefully. Then, as you listen to your instructor, or someone else speaking, practice these step by step guidelines to better understanding. Start by using only a few of the guidelines. After you are comfortable using one or two of the guidelines, begin to use the next guideline also. Then, continue to add each additional guideline until you are using all seven.

1. Focus attention on the speaker.
   Resist daydreaming. Ignore persons or activities that may be distracting. This may require concentrating and practicing on ignoring things going on around you. Don't concentrate on the speaker's habits or appearance, but only on the message.

2. Identify the topic.
   Concentrate on what the speaker wants you to know or to do.

3. Use your background knowledge.
   Think about what you already know and how this information fits. This is a way of learning new information, by comparing it to information you know.

4. Grasp the main idea.
   Listen for the key points of the message. Cue words are: "My point is..."; "What I'm saying is..."; "What the problem is..."; "What I mean is...". The speaker may also repeat or restate important areas, raise or change his/her voice to emphasize these areas.

5. Visualize the message.
   Form mind pictures to see what the speaker is describing. This will help you to remember the ideas if you associate them with a mental picture.

6. Check your understanding of what is said.
   If you do not understand the main point, ask questions. Try to summarize the main ideas in your mind after the speaker has finished speaking.

7. Take notes about the key points.
   This helps you to remember them because you use both your visual sense and your tactile sense. If you know you are an auditory learner, you may want to read your notes to yourself aloud to help you remember the key points.
#2. Group Decision Making Guidelines

1. Know purpose of the meeting.
   Was the meeting called to solve a problem, plan an activity, or for some other purpose?

2. Be prepared for the meeting.
   Gather information such as materials, thoughts and ideas that may be needed.

3. Support your opinion and give reasons or evidence for your viewpoint.
   For example: If you do not think the suggestion for a project is good, explain why. Don't just say, "I don't like it."

4. Be open to the points of view of other people.
   Listen to their opinions and compare their point of view with your own. How alike or unalike are they? Can you compromise somehow to bring your opinion and that of another person closer together?

5. Avoid arguing with other people.
   This accomplishes nothing but to develop hard feelings. If an argument breaks out, try to reach a compromise between the viewpoints. Try to understand why the other person feels as he/she does about the subject.
# Staff Meeting Guidelines

1. **Prepare for the meeting.**
   Find out in advance what the topics will be. Prepare your opinions and gather information to support your opinions whenever possible.

2. **Arrive on time.**
   This avoids disrupting the meeting if it is already in progress.

3. **Follow discussion closely.**
   Listen carefully and take notes on key points. Consider new ideas. Do not stop listening if a speaker's viewpoint differs from yours.

4. **Show courtesy to other group members.**
   Do not interrupt them while they are speaking. Do no talk to the person next to you while the speaker is talking. Do not make joking remarks about the speaker's topics to persons around you while the speaker is talking.

5. **Plan your comments.**
   Speak clearly and make your main point with as few words as possible. Keep to the issue being discussed. Do not ramble on. Do not make comments to those around you while waiting for your opportunity to address the entire group.

6. **Know what is expected of you when the meeting ends.**
   If you are to do something such as preparation of a report, know what is expected and when it is to be done. If another meeting is scheduled, write down the date and time.
# 4

## Listening Self Evaluation

To Student: Answer these questions. When you have finished, check the number of yes and no answers. Turn to the next page and read the section: "What do the scores mean?"

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Do you find yourself daydreaming or distracted by people or other activities around you while someone is speaking to you?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Do you interrupt the speaker while he/she is speaking?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. If the speaker says something you don't understand, do you feel uncomfortable asking for more information?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. Do you look away from the person who is speaking to you?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. Do you perform other activities while someone is speaking to you?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. Do you pretend to pay attention to the speaker?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. Do you stop listening when what is being said becomes too confusing?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8. Do you ignore a speaker whose behavior or appearance upsets you?</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
What do your scores mean?

Listening is a demanding activity that must be practiced and efforts made to develop good skills. Look over your answers. You probably answered yes to some questions. And, that is okay. Many of us have different listening skills that may need improvement. Look at the areas in which you answered yes. These are your weak listening areas. Becoming aware of your weak listening areas is the first step to correcting these areas.

Write down below the questions to which you answered yes. Write down what you can do to correct each area. Set up a chart like the one below showing the areas that you need to work on. Work on only one area each week. Check yourself, or have a friend check you each week to see how you have improved. Reward yourself for each improvement.

Chart for Improving Listening Skills.

SAMPLE MEMO

MEMO TO TWO AWL EMPLOYEES:

There have been many accidents here. All employees must read this memo about first aid.

First Aid is emergency treatment given to the sick or injured while waiting for medical aid to arrive. A working knowledge of first aid can help save lives and prevent further injury.

Follow these general procedures when applying first aid:

Act quickly and calmly. If there is more than one injured person, decide who gets attention first. First help those who have stopped breathing, are bleeding heavily, or show signs of poisoning. Avoid moving injured persons or touching open wounds or burns. Do not give liquids to unconscious persons.

Two get a clear idea of an injury, you may need to remove some of the victim's clothing. Because of the possibility of fractures, rip or cut the clothing along the seams. The victim should be kept comfortable and covered, if possible. Try to keep a person from seeing his or her injury.

Let the victim know he or she is being taken care of and that the proper medical attention is coming.

To Student:

After you have read this memo, correct all the spelling. Use a dictionary or a word speller book to look up words that you think may be misspelled.

If you received this misspelled memo at your job, what would be your impression of your employer?

If you were the head of the company and you found this memo on your desk, what would you think?
# 6

Planning for Effective Speaking:
The Job of the Speaker

1. Decide what you want your listener to know or to do. Choose the topic. Be sure the topic is appropriate for the situation.
For example: You are attending a meeting at work. The purpose of the meeting is to plan how to reduce the time wasted moving equipment to various locations. You would not discuss the annual staff Christmas party, or talk about your family problems at this meeting. Instead, you would discuss only things that were related to the topic of eliminating wasted time moving equipment.

2. Consider the people in your audience. Think about what do these people already know about the subject?
Think about any past experiences or conversations or other events you may have shared with members of the audience that may increase the listeners knowledge of the subject. Understanding your listener helps you to choose the words and examples you will use to match the listeners' knowledge.

3. Plan the message.
Decide what key points that need to be made. Decide in what order these points should occur. If there as many points, or if the key points are very detailed, you may want to make notes to use.

4. Send the message clearly.
Do not rush through the message. Speak clearly and loudly enough to be heard easily by the listener. This helps the listener to do his/her job. Look directly at the listener, so the listener knows you want him/her to hear and understand the message. Give the key points special attention by repeating, pausing or using cue words (such as: "The main point is . . ."); "It's important that . . .") Look at the facial expressions of your listener and his/her gestures to determine whether the message is being received and understood. Answer any questions clearly and without showing impatience.

5. Look for the listener to answer.
The answers can be verbal, for example, when they ask questions or make comments. These answers can agree or disagree with you. The answers can also be non-verbal. For example, the listener nods and smiles which may mean agreement or the listener may look upset and shake his/her head to indicate no agreement.
This chart shows how the roles of the speaker and the listener interact with each other. Ordinary conversations with family and friends do not need to be organized around this chart. However, when on the job, a person is judged by his/her ability to communicate clearly. Therefore, this chart maybe helpful in understanding how to organize the message.
# 8

Reading Strategy:  
Reading for Understanding

Learning to read and understand different types of materials takes practice. Organize yourself to read and understand what you read by using this five step procedure:

**Step One: Define purpose for reading.**  
Before reading anything ask yourself what is your purpose for reading? The purpose is often stated in the title or heading. Good examples are a newspaper or a chapter heading in a book.

**Step Two: Skim text quickly to find needed information.**  
It is not always necessary to focus on every line of text. Some paragraphs are more important than others. Therefore, it is necessary to look through the text to find the information quickly, rather than take time to read every word.

**Step Three: Read carefully the parts that relate to your purpose.**  
You may want to underline or use a highlighter to mark the key parts that are important to your purpose for reading the article.

**Step Four: Summarize the information.**  
A summary is a short statement that tells the main idea. This helps you to understand the information. You should rewrite the important points in your own words so you may understand them more easily.

**Step Five: Evaluate the interpretation.**  
Re-read your summary and decide whether or not you achieved your purpose for reading the article. If the information in the summary does not match the purpose you had for reading the article, the problem could be a misunderstanding of the information presented. The summary may need to be changed.

Use this reading strategy to help you understand the important things to remember when reading through articles.

Reading Procedures on a Flow Chart.

Sometimes procedures are written on flowcharts. The symbols stand for the steps. Arrows tell you in which order to follow the steps.

Joining the Basic Skills/Job Training Program

2. Complete an application.

3. It takes two weeks to find out if you are qualified to be a part of the program. We will mail you a letter with the results.

4. First time participants will meet with a counselor to plan a program that fits your needs.

5. Attend your classes, workshops, and/or job training.
Guidelines for Responding to Criticism

1. Apologize for your mistakes.
We all make mistakes, or do things we later regret. When this occurs, it is often better if we admit we were wrong as quickly as possible before anger and resentment has begun to develop.

2. Watch your non-verbal behaviors.
Non-verbal behaviors are those things you may do without even thinking about it, but which sends a message to the other person about how you are feeling. Examples of negative non-verbal behaviors are: frowning; avoiding eye contact; rolling your eyes; hanging head down; folding arms across chest. If you are receiving criticism, avoid using these non-verbal angry or hurt signals which will only build up anger.

3. Don't respond defensively when criticized.
It is difficult not to respond when someone is being critical of something you have done. Examples of defensive responses are: "Oh, you're just out to get me"; or "You never like anything I do." Neither of these responses will change the criticism. Instead, think about what the person was saying. Then, consider if the criticism was unfounded (not true). If you feel you have been unjustly criticized, wait until an appropriate time when anger is not present and calmly explain your position.

4. Don't change the subject.
Changing the subject is a way to get out of being criticized. For example, "Yeah, I know I forgot to put stamps on the letters, but I'm never late for work." The two subjects have no relationship to each other. It is better to admit your mistake and then try to fix the problem.

5. Ask questions if you don't understand the criticism.
For example, if someone says "You never do anything right." Your response could be "Could you give me specific things I've done wrong, rather than you don't like my work? I could then change those areas where I may be making mistakes." This is a positive approach and usually is successful in reducing misunderstanding between people. This response also shows that you really want to do a good job, but may need more directions.

These are only a few ways to respond to criticism. You may know of other ways that work for you. If possible, share these other ways with the class.
Rules for Attendance

WHY?   Why are you absent? Is this a good reason to miss work?

WHEN?  When should you tell your employer that you will be absent? Have you given your employer enough time to find a replacement for you?

WHO?   When you call in, to whom do you speak? Is this the correct person?

HOW?   How do you explain to your employer what the reason is for your absence.

There are two types of reasons for missing work:

1. Emergency - illness, accident.

2. Special Occasion - these you would know about long in advance. Examples are: moving, doctor's appointment, surgery.
How do you treat a customer well?

A friendly greeting is important. The customer must feel that you are happy to have him/her in the business. If they feel welcome, they will continue to come back to your business instead of going to another business. If they do go to another business, your company will lose money and your job could be lost. Therefore, the more you can do for your company, the better your usefulness to the company will be. The more useful you are, the more your boss will want to keep you working for the company.

A friendly greeting has three parts:

1. Start with a smile.

2. Give a friendly greeting
   "Good Morning" or "Hello"

3. Add a few words that make the customer feel welcome and special. An example is:
   "How are you today" or "How may I help you."

A greeting that is not friendly, or employees who ignore customers, make people feel that you don't care if they come back. These people could also feel you do not want them there at all.

An unfriendly greeting could be no greeting at all. It could be: "Okay, next. What do you want?" Another example of an unfriendly greeting is two employees talking together when the customer arrives and neither employee stops talking to wait on the customer. A customer who experiences this type of greeting will not feel welcome and may not return.
# 4

## How Am I Doing In Treating Customers Well?

This chart will help you find out how well you treat customers on the job. Check (✓) the column that best describes the way you act with customers. Ask your boss to read your answers and check the ones with which he/she agrees. If you don't have a boss yet, practice greeting customers using other students in the class as customers. Then have your instructor fill in the column.

Guidelines For Receiving Telephone Calls

1. Answer telephone promptly.
Do not let it ring while you complete another task. If you must return to an interrupted task
(such as waiting on another customer, or talking on another extension line) ask the person to
"please hold a moment." Then complete the first telephone call quickly, or have some one else
help you handle the second telephone call.

2. Identify yourself immediately when answering the telephone at work.
Tell the caller the name of your workplace (or department) and your name.
For example: "Smith's Grocery, Sandy"

3. Be considerate to the person and provide help, or information the caller
requests.
If you do not know the answer, offer to find out and return the telephone call. If the person has
called the wrong number, do not respond in anger, but briefly assist them, if possible, to find
the correct agency or telephone number.

4. Listen carefully and be prepared to take notes.
Write down the message and repeat back names or numbers to make sure the information is
correct.

5. Use polite language and a pleasant tone of voice.
Even if you are rushed and very busy, try to relax and answer the telephone call pleasantly.

6. Do not eat or chew gum while talking on the telephone.
This is very distracting and often makes your answers hard to understand. Even eating a breath
mint while on the telephone can cause you to speak less clearly.

7. Keep the conversations brief.
The business telephone should be kept for business calls. Personal chit chat will tie up the
telephone and may cause customers to take their business somewhere else.
Recommendations for Guest Speaker.

To the instructor:

Teaching good grooming can be embarrassing to some adults. In some cases, home situations may prevent the individual from bathing or washing clothes as often as may be required. Clothing budgets may not permit replacement of outdated or worn clothing. Stress that clothing need not be new, but should be clean and mended. Missing buttons replaced, hems re-sewed, zippers replaced and torn seams or rips repaired when possible.

Some students may appreciate assistance in selecting clothing or hairstyles. Some students may not. Use discretion when dealing with appearance. The person's self esteem is often affected if they are made to feel inadequate in appearance.

The use of guest speakers can provide a change of pace from classroom discussion. Be sure to choose sensitive speakers who can relate to your students and their problems. Avoid expensive stores or products that your student may not be able to afford to purchase after the demonstration is over. Some students would appreciate the luxury of an expensive hair styling, cosmetics or article of clothing, and others may not.

Some suggestions for guest speakers are:

1. A local cosmetology school or beautician to do a "make over" for the student. Demonstrator would restyle hair or apply cosmetics.

2. Cosmetics demonstration for men and women. Students could obtain samples of products and see recommended uses taught. This could be a local cosmetics demonstrator such as Avon, or Mary Kay or others.

3. Wardrobe consultant to demonstrate the selection of wardrobe colors based upon skin tones and hair coloring of the individual. Note: check local Penn State Cooperative Extension office that may be able to provide assistance in this subject.

4. Demonstration by local Home Economics teacher in clothing care. Program could include stain removal; cleaning; and repair of clothing.
Self Evaluation of Appearance

You appearance is an important part of how people will respond to you. If you are careless in appearance with soiled or torn clothing, or uncombed hair, dirty fingernails or other problems, people will not want to be with you. Sometimes, we are so busy that we forget to take time to attend to our appearance. This checklist can remind you to check yourself over before you leave home. No one will see your answers, only you. Be honest. If you find yourself checking sometimes or never, these are the areas you should concentrate on improving.

<table>

Guidelines For Handling A Disagreement

Disagreements if left unresolved, can lead to increased stress and eventually avoidance of the person with whom you have had a disagreement. Resolving the conflict as quickly as possible is usually the best approach. The following guidelines explain some ways of dealing with disagreement. There may be other methods that you have used that may also work. You might wish to discuss some methods of handling disagreements that have worked for you with other members of your class, if your instructor provides discussion time.

1. Treat each other with respect.
Avoid personal attacks and instead have the other person tell you why you disagree. Personal attacks are statements about the other person, such as "You're so stupid that you don't understand." "You always want your own way." These remarks serve only to upset the other person and settle nothing.

2. Find something that you do agree about.
Even if there is disagreement on every subject, there is usually something with which you can agree. For example: you and a friend are planning to go shopping over lunch time. You want to eat first, and then go shopping. Your friend wants to go shopping first, and then eat. You can agree that you both want to go shopping, so you must resolve when eating will take place.

3. Ask questions to be sure you understand.
Repeat back what you think you heard. Make sure you are responding to what was actually said not what you think you heard. This might be useful in the conflict over shopping during lunchtime. Perhaps your friend intends to eat downtown.

4. Try to feel comfortable about disagreeing.
Some problems do not get resolved right away. Be honest and try to think about possible ways to change the problem. In the example given above, you might choose to eat downtown. You might have a snack earlier than lunchtime and eat later. Your friend might not realize how much it bothers you not to eat before going downtown, and you might want to discuss that issue.
# 9

### Applying Your Skills In Your Life

For each problem, quickly list possible solutions. Remember, no idea is too silly or impractical. Write down whatever comes to mind.

1. Both you and your spouse or a friend need to use the car tonight. You have an appointment on one side of town at 7:30 p.m. Your spouse or friend has an appointment at 7:30 P.M. on the other side of town.

2. Both you and your spouse or friend have to be at work today. But your child is sick and can't go to school. You each think the other one should stay home with your child.

### Working Together

Here are some common work-related problems:

1. Drug and alcohol abuse in the workplace. This is a major cause of accidents and absenteeism.
2. Lack of adequate child care. Parents who do not have child care may be forced to miss work.
3. Paternity leave. Sometimes both parents stay home after the birth of a child. Both parents should have the right to be with their child, but this creates problems for the employer.

Work in pairs. Choose one of the problems and make it specific to someone you know. Select a solution and then discuss it with others in your class. If you have another topic you would prefer to discuss in place of these work-related problems, ask your instructor if you may change the topic.
Problem-Solving Techniques

Solving problems may become easier if you use problem-solving techniques. These techniques can assist you in finding a solution.

1. **Explain your actions.**
   In what ways can you explain why you did what you did.
   Example: The department store where you work has a policy that someone must always be on the sales floor during store hours. However, a customer in a wheelchair buys a lot of items in your department and requires help to carry them to her car. This happens over lunch time when there is no one else to cover the department. When you return, your boss is standing there looking angry and asks you "Where were you? Don't you know store rules require that you stay in your department?"

   Explain your actions to your boss, telling him/her why you left the department and what alternative solutions were and why you choose what you did.

2. **WIN-WIN Solutions.**
   This is a technique in which both sides are happy with the solution to the problem.
   Example: You have a lot of materials to photocopy. The person at the next desk also has a lot of materials to copy. You both have two memos to type within the next half hour. In a win-win solution, one person would do all the photocopying and the other does all the typing of the memos.

   Are there other types of win-win situations you might think about?

3. **Brainstorming for problem-solving.**
   This technique means thinking up as many ideas as possible. Everyone participates by suggesting all possible solutions, all of which are written down. The best ideas, or combinations of ideas are then selected which best meets everyone's needs.
A Strategy for Following Instructions

It often helps to have a strategy (a plan of action) to help you understand instructions. On the following pages you'll learn about a five-step strategy that can help you.

Step 1: Define your goal.
A goal is something that you want to achieve. Before you read a set of instructions, ask yourself: What is it that I want to get done?

- Read the set of instructions below. What would be your goal?

To order your free jacket pattern complete the order form: Print your name and address and circle the correct size. Send the form and $1.00 for postage and order processing to:

The Pattern Company
631 Third Street
Hanford, CA 95523

Only one free pattern. You may buy additional patterns for $5.98 each.

Answer: The goal is to get a free jacket pattern.

Step 2. Identify the steps you need to follow.
As you read, look at the steps you need to follow. Underline them or write them out. Then read over the steps. Ask yourself: Can I complete my task by following these steps?

- You would complete two steps to get the free pattern. What are these two steps?

Answer: The two steps are 1) fill out the order form and 2) sent it along with $1 to the address on the advertisement.

Step 3: Name the items you need to finish the task.
The instructions will not always tell you all the items that you will need. But you can use your own experience to tell yourself the other items you would need. For example, you need a pencil or pen to fill out the order, an envelope and a stamp to get the free jacket pattern.

Step 4: Clear up any details that you do not understand.
Make sure that you understand all of the instructions before you actually do the task. If you are not sure of anything, find someone who can help.

Step 5. Evaluate the way you did the task.
You do this after doing the task. Examine the way you did the task. Did you achieve your goal?
Read the instructions. Answer the questions based on four of the five steps:

1. Define your goal.
2. Identify the steps you need to follow.
3. Name the items you need to complete the task.
4. Ask questions about any details that you don't understand.

You want to get a library card. The librarian tells you that you must complete an application form. You must show proof of your address. You can show a driver's license, a passport, a personal check, a bill, or a letter that shows your address. You must pay a $2 fee.

1. You decide to follow the directions. What is your goal?

2. What three things must you do to accomplish your goal?

3. What will you need to accomplish your goal?

4. Are there any details about which you want to ask questions? Which ones are they?
Applying The Plan Of Action To The Job

You will read many written instructions in the workplace. Using this plan of action can help you read any kind of instructions. Read the first four steps of the plan of action.

Step 1: Define your goal.
This is a job order that an office worker might receive.

JOB ORDER
Date: March 11, 1993

Please make twenty-five copies of the report. Copy the pages back to back. Put each copy into a binder and make a label for each binder. Distribute the binders to the employees on the attached list. If you cannot complete this job by Friday, please see me.

Janet Johnson

- What is your goal?

Step 2: Identify the steps you need to follow.
Find someway to mark the steps to follow. Either underline them, or use a highlighter. If the steps must be followed in a certain order, number them.
Number the steps in the memo above.

Step 3: Name the items you need to finish the task.
What do you need to complete the job?

Step 4. Clear up any details that you do not understand.
Are the details clear? Do you know exactly what you need to do? If you have any questions about the job, who would you ask?

Step 5: Evaluate the way you did the task.
After you finish the job, examine the way you did the task. Did you achieve your goal? What could you have done differently?
Applying The Plan Of Action To The Job

You will read many written instructions in the workplace. Using this plan of action can help you read any kind of instructions. Read the first four steps of the plan of action.

**Step 1: Define your goal.**
This is a job order that an office worker might receive.

**JOB ORDER**

Date: March 11, 1993

Please make twenty-five copies of the report. Copy the pages back to back. Put each copy into a binder and make a label for each binder. Distribute the binders to the employees on the attached list.

If you cannot complete this job by Friday, please see me.

Janet Johnson

What is your goal?
Pass out twenty-five copies of a report by Friday.

**Step 2: Identify the steps you need to follow.**
Find someway to mark the steps to follow. Either underline them, or use a highlighter. If the steps must be followed in a certain order, number them.

Number the steps in the memo above. 1) Make twenty-five copies of report. 2) Put the copies in a binder. 3) Make labels for the binders. 4) Pass out the binders.

**Step 3: Name the items you need to finish the task.**
What do you need to complete the job?
The worker needs: the report, a list of employees, binders, labels, copier, and paper.

**Step 4: Clear up any details that you do not understand.**
Are the details clear? Do you know exactly what you need to do? If you have any questions about the job, who would you ask?
The person who sent the memo, Janet Johnson.

**Step 5: Evaluate the way you did the task.**
After you finish the job, examine the way you did the task. Did you achieve your goal? What could you have done differently?
Discuss ways of doing the task: Copy all the reports at the same time, then put in binders and label the binders. OR: Get the binders ready, with labels on, and when the report comes out of the copier, place in each binder. OR: Do ten copies, and then put in binders and label, then do ten more copies and put in binders and label, and then do five copies and put in binders and label. Ask: Why might you choose to use the last method? Answer: if the photo copier is not available to copy for the length of time you need to use it, or if your work space is limited, or if you have other jobs that must get done more quickly than the report.
#3

Making the Best Choice

Use the following step-by-step plan to help you evaluate choices that you may need to make on the job. For instance, suppose you have the task of gathering information about different office suppliers and recommending the best one with which to do business.

Step 1: Identify your purpose.
Describe the result that you must achieve. Be as specific as possible. In the task above, your purpose would be to find the best place to find office supplies.

Step 2: List the requirements.
Make a list of all the requirements that a "perfect choice" should have. Your final choice may not fill all the requirements and you may have to change some of the requirements.

Step 3: Evaluate each choice.
Read the information about each choice. Then evaluate how well a choice meets your needs. This sums up the reasons why you made a particular choice.

Step 4: Select the best choice.
Compare your evaluations. What should you do if none of the choices fill all of your requirements. When this happens, you must decide which requirements are the most important to you. Select the choice that comes closest to filling those needs.

WORK OUT

You are deciding to buy a car seat for your new baby. You go to the store and find the following baby seats:

<table>
<thead>
<tr>
<th>Lullaby Baby Seat</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fits infants up to 15 pounds. Has plastic lined seat padding. Seat can be strapped into car seat belt system. Price $40</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Baby Sit Well Seat</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fits infants up to 20 pounds. Plastic padding has removeable terry cloth covering. Seat connects into car seat belt system. Has quick release button to remove car seat quickly. Price $55</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Rainbow Baby Seat</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fits infants up to 30 pounds. Removeable padding protects young infants. Seat can be disconnected from base easily and used with handle extended as an infant carry seat. Price $65</td>
</tr>
</tbody>
</table>

Which seat would you select and why?
Be sure you write down what your requirements are for an infant car seat. Then compare the three seats. Use the step-by-step plan to make your choice. Give your reasons for your choice.
Finding the time to do all the things we need to do each day is important. Having a routine to follow can help you to plan your daily tasks, and even help you meet your weekly goals. The pattern of a routine is determined by the order in which separate tasks or goals need to be done.

You can establish a routine by making a list of your tasks. Include in the list how much time each task will take to complete. If your tasks are the same each day, you may only need to make one list. If your tasks vary from day to day, you might want to make a chart for each day. This list of tasks can be those tasks you do at home, or it can be tasks that you do at work.

Put the tasks in the order in which they need to be completed. Draw up a chart that has each hour on a different line. Fill in the tasks on the lines. Allow the time required to complete the previous task before writing in the next task. For example: the first task you must do is prepare a report. You know it will take you one hour to prepare this report. Next you must file some folders in the filing cabinet. This should take you two hours. Your chart will look like this:

9:00 - 10:00 Prepare report
10:00 - 11:00 File Folders
11:00 - 12:00 File Folders.

Your chart will help you control your time so that priceless minutes do not drop through the cracks. As you work through the chart, you may want to check off the items as you complete them. If you find you have completed a task earlier than required, you can either go on to the next task or fit something else that was not planned into the chart. By managing daily routines you will be able to accomplish more tasks.

Remember, a routine is a guideline. Do not try to rush through your tasks just to get them done within the time frame. If you notice you need more time to complete a task, try to figure out why. Perhaps you could change how you do the task and save some time. Doing the job well is important. Care and attention to detail makes a job well done. Take time to check your work. This cuts down on mistakes and you won't waste time doing tasks over because of mistakes.

Make a task chart for next week. List your tasks in order of importance from top to bottom. Be sure to put down how long the task will take to complete.
# 5

Getting Organized Exercises

Read through the following exercises and answer the questions in the space provided.

1. Here is a task list for a secretary. Figure out the order in which the secretary should perform each task. Number the tasks in that order.

   - clean desk
   - make plans for office party in two months
   - order new supplies for following month
   - help receptionist with unfinished work
   - rearrange file cabinet
   - type supervisor's letters

2. Each of the following employees has a problem which might be corrected by a change in daily routine. Read each example and suggest a solution.

   A) Deb is a bank teller. She is always the first teller to finish her work everyday. However, her boss says she has a tendency to make errors. What changes in routine would help improve her work performance?

   B) Nancy is a commercial artist. She usually has several projects to work on at once. Everyday, she budgets the same amount of time for each project. She ends up each day trying to put the finishing touches on several projects at once. Suggest a better daily routine.

   C) Jacob is a waiter in a restaurant. He goes home exhausted every night. Here is his routine. First Jacob gives the customers a menu. Then he goes back to their table with glasses of water. After getting his order pad from the kitchen, Jacob returns to the table again to take orders. Obviously, Jacob is wasting a lot of time and energy. Review Jacob's routine. How could he save some time?

   D) Choose a routine that you do daily. Write it down, and put down how long it takes you to complete. Then, imagine yourself doing this task. What could you change to make better use of your time?
Estimating Length

In this exercise you are to estimate the length of the two lines. Do not measure them.

Which line is longer?
#7

Estimating Distance and Travel Time

Learning how to estimate travel time is a valuable tool. For example: you are planning a vacation trip over a three day weekend. You have a particular place you want to visit. How long will it take you to drive there? Will you have time to visit other places along the way?

How would you answer these questions? Let's use a step-by-step plan to estimate distance and time needed to travel. This plan may be similar to other plans you have used.

Step 1: Define your destination and purpose for the trip.
There are different reasons why people travel: to get to work; job-related trips; going to visit someone; and a vacation. Each of these reasons may require different ways of travel. For example, if you are going to work, or are traveling as part of your job, you usually want the fastest route possible to get to your destination. If you are visiting someone, or on vacation, you may not choose to travel the quickest route. You may want to use other routes which bring you to special places you want to visit. Use a road map to plan your trip.

Step 2: Gather important facts about the route, or roads you want to use.
The information you may need includes the following: How many miles must you travel? What type of roads (expressway, two lane, rural country) will you be using? Do you know whether there might be delays due to construction on the route? If the trip must extend over more than one day, how many hours are you willing to travel in one day?
List all the facts you know about the routes. You can tell by looking at the map if you will be traveling through congested urban areas and what types of roads are available. The speed limits for these roads may also be given on the map.

Step 3: Decide what you need to estimate.
You may need to estimate miles to various places. You may need to estimate how much time you have to travel. Use the map and measure the route. Then use the map scale to calculate the mileage. When you estimate mileage remember you must add in the return trip also. A time estimate is based on how much time you have available, and/or how many hours you want to travel in a particular day.

Step 4: Using your estimates to calculate time and distance.
If you know that your destination is 60 miles away, and the speed limit is 55 miles per hour you can estimate that the trip will take more than an hour. If you know that the roads may be under construction, the delays may cause the trip to take longer. For example, on Tuesday, you wish to visit your sister who just moved to Harrisburg. This is 60 miles away. You know that the speed limits are 55 miles per hour. And you know that there are two places where traffic usually is very heavy, especially during early morning rush hours or evening rush hours between Monday and Friday. If you are traveling on a weekday you should then allow extra time for the traffic delays. You estimate that the trip will take about 1 hour and 15 minutes without any delays. Since you are traveling on a weekday and you want to have 5 hours or more to spend with your sister, you know you will be traveling through rush hour traffic, and must allow extra time. You estimate the delay will be 30 minutes. The trip to Harrisburg will then take 1 hour and 45 minutes. Remember, you will also have to drive back from Harrisburg. If you want to arrive by 10:00 in the morning, what time will you have to leave? Round off the 1 hour and 45 minutes to 2 hours travel time. Then subtract two hours from 10:00 a.m. and you estimate that you must leave by 8:00 a.m.

Use the above steps to estimate what time you would arrive home if you spend 6 hours with your sister.
You are an employee in an appliance repair shop. A customer brings in a video tape recorder that needs to be repaired. You follow a step-by-step outline to complete the repair and estimate what to charge the customer.

Step 1: Find out what is the problem with the item.
You look over the video tape recorder and after checking over everything, you find 2 parts that need to be replaced and the machine must be cleaned. The time you spend doing this was 1 hour.
The shop charges the customer $8.00 per hour for your time.

Step 2: Do the repairs.
You replace the two parts and clean the video tape recorder. The parts cost a total of $15.00. You spent 2 hours doing the repairs. Then you cleaned the video tape recorder. The charge for cleaning a video tape recorder is $10.00.

Step 3: Calculating the bill.
Finding out why the video tape recorder does not work. (1 hour)
Cost of parts to repair the video tape recorder
Time spent doing the repairs (labor) (2 hours)
Cleaning the video tape recorder (this charge includes your time)

What is the total charge for the customer?
Everyday Basic Skills Module Five

#8 Answer Sheet

Estimating A Repair

You are an employee in an appliance repair shop. A customer brings in a video tape recorder that needs to be repaired. You follow a step-by-step outline to complete the repair and estimate what to charge the customer.

Step 1: Find out what is the problem with the item.
You look over the video tape recorder and after checking over everything, you find 2 parts that need to be replaced and the machine must be cleaned. The time you spend doing this was 1 hour. The shop charges the customer $8.00 per hour for your time.

Step 2: Do the repairs.
You replace the two parts and clean the video tape recorder. The parts cost a total of $15.00. You spent 2 hours doing the repairs. Then you cleaned the video tape recorder. The charge for cleaning a video tape recorder is $10.00.

Step 3: Calculating the bill.
Finding out why the video tape recorder does not work. (1 hour) $8.00
Cost of parts to repair the video tape recorder $15.00
Time spent doing the repairs (labor) (2 hours) $16.00
Cleaning the video tape recorder (this charge includes your time) $10.00
Total Bill $49.00
Estimating a Report

1. Your boss has a large report that needs to be typed and copied. The report contains: 10 test pages; a table of contents; 1 page bibliography (list of books and magazines used); and 2 tables with 3 columns each. Twenty copies need to be made. How would you estimate how much time you need to complete it? You will be using a computer that you know how to use. Here are the facts you need to make the estimate:

The manuscript is in poor shape. The writing is small and scratched out in places. There are many additions across the tops of sentences and many mistakes in spelling and grammar.

Your abilities:
You know you can produce 8 pages per hour. But, if the manuscript is in poor shape, you can only produce 5 pages per hour. It takes 90 minutes to create a graph on the computer. The bibliography must be put into the correct format and you will need to find a copy of the format which will take an hour. Bibliographies take you the same amount of time as do charts to complete. A table of contents takes 30 minutes to construct and type.

The copier will copy 1 page every 5 seconds. If you start the job at 9:00 a.m. and the boss wants it done by 12:00 noon for a meeting, will you finish in time?

2. Answer the following questions to help you estimate time.

1. How much time will it take to type the text?
2. How much time will it take to type the rest of the report?

Do your calculations here:

3. What is the total amount of time needed to type report?
4. How long does it take to photocopy the report?

Do your calculations here:

5. How long will it take to type and photocopy the report?
6. Will you have it completed by 12:00 noon?
1. Your boss has a large report that needs to be typed and copied. The report contains: 10 test pages; a table of contents; 1 page bibliography (list of books and magazines used); and 2 tables with 3 columns each. Twenty copies need to be made. How would you estimate how much time you need to complete it? You will be using a computer that you know how to use. Here are the facts you need to make the estimate:

   The manuscript is in poor shape. The writing is small and scratched out in places. There are many additions across the tops of sentences and many mistakes in spelling and grammar.

   Your abilities:
   You know you can produce 8 pages per hour. But, if the manuscript is in poor shape, you can only produce 5 pages per hour. It takes 90 minutes to create a graph on the computer. The bibliography must be put into the correct format and you will need to find a copy of the format which will take an hour. Bibliographies take you the same amount of time as do charts to complete. A table of contents takes 30 minutes to construct and type.

   The copier will copy 1 page every 5 seconds. If you start the job at 9:00 a.m. and the boss wants it done by 12:00 noon for a meeting, will you finish in time?

2. Answer the following questions to help you estimate time.
1. How much time will it take to type the text? 2 hours
2. How much time will it take to type the rest of the report? 5 hours

   Do your calculations here:
   Table of contents: 30 minutes (300 minutes divided by 60 = 5 hours)
   Bibliography: 90 minutes
   Tables (2 @ 90 minutes =) 180 minutes

3. What is the total amount of time needed to type report? 7 hours

4. How long does it take to photocopy the report?

   Do your calculations here:
   1 table of contents + 2 charts + 1 bibliography + 10 pages of text = 14 pages.
   14 pages x 5 seconds per page = 70 seconds per report.
   70 seconds x 20 copies of the report = 1400 seconds per report.
   1400 seconds divided by 60 seconds = 23 minutes 34 seconds rounded up to 24 minutes.

5. How long will it take to type and photocopy the report? 7 hours and 24 minutes

6. Will you have it completed by 12:00 noon?
   No.

   12:00 time due
   - 9:00 time started
   3.00 hours

You need 7 hours and 24 minutes to compete the report. Therefore, you will not be able to complete the report in the 3 hours that are available.
#10 Setting Goals

Goals reflect your interest in problem solving. A goal is a purpose or a result from a course of action.

Goal Purpose: To get a job that pays more money.

Desire for more pay

Goal/task to learn to type.

Action: take typing classes

Learned to type.

Goal Result: Better job with higher pay.

There are two kinds of goals: short-term and long term.

A short term goal can be completing small tasks. Examples are: stuffing 2 boxes of envelopes before quitting time, cleaning off desk top each night.

A long term goal can take months or years to complete. Examples are: reorganizing a department; rearranging furniture; having product sales double in volume.

Short term and long term goals can be business-related or personal-related.

What are examples of two of your short term goals?

What are examples of two of your long term goals?
Penny's Perfect Printers, Inc.

Date: April 23, 199_

Please make thirty-three copies of the health care report. Copy pages back to back. Put each copy in a colored binder and make a label for each binder.

Distribute the binders to all the employees who have been absent more than two days last month and are listed on the attached list. If you cannot complete this job by Friday, call me.

Penny Jackson.

To Student:

1. What is the goal?

2. What steps do you need to follow?

3. What resources do you need?
Date: April 23, 199_

Please make thirty-three copies of the health care report. Copy pages back to back. Put each copy in a colored binder and make a label for each binder.

Distribute the binders to all the employees who have been absent more than two days last month and are listed on the attached list. If you cannot complete this job by Friday, call me.

Penny Jackson.

To Student:

1. **What is the goal?**
   The goal is to make thirty-three copies of health care report and distribute to employees by Friday.

2. **What steps do you need to follow?**
   a) Find the correct report.
   b) Ask questions about any unfamiliar terms or unclear instructions. Example: Back to back; what color binder; what should be on the label?
   c) Make thirty-three copies of report
   d) Put labels on each report.
   e) Use the list of employees and distribute each report.
   f) If there is a problem, call Penny Jackson.

3. **What resources do you need?**
   1. Copier or printer.
   2. 33 binders
   3. Hole punch
   4. 33 labels
   5. List of employees
   6. A supply of paper in a quantity sufficient to complete the job.
#12

## Sorting Facts For Problem Diagnosis

There are three important things to know when sorting facts in order to diagnose problems with a machine that may not be working properly.

1. **What does the machine do?**
   When you know what a machine is supposed to do, you can then decide if it is doing what it is supposed to do. The operator's manual that comes with the machine may help tell what the machine does.
   Let's use the example of a light bulb to illustrate this point. The light bulb is supposed to light.

2. **How does the machine do its job?**
   Read the operator's manual or have someone explain how the machine does its job. Using the example of a light bulb, the light bulb uses electricity to heat the filament which glows when heated, giving off light and heat.

3. **What are the parts of the machine?**
   Machines are a system of many parts. Each part has a certain job. All the parts work together so the machine can do its job. We will again use the example of a light bulb. The parts of a light bulb are: the light bulb, which consists of the glass, the filament, and the base which makes contact with the power source. In order for the light bulb to work, it must be connected to a lamp or light fixture which is hooked up the the power source. The light bulb fits into a light socket on the lamp or light fixture. The power source for the lamp or light fixture consists of wires or other hook-up devices to get the power from the power source to the bulb, and a switch to control the flow of power.

Using the above information, you can then begin the check or troubleshoot equipment that may not be working properly. In the case of the light bulb, if the bulb fails to light, it may not be working. Why the light bulb is not working would then have to be checked.

In order to trouble shoot a light bulb that does not work, you would first check the parts of the bulb and ask yourself questions as you checked.

- Is the light bulb in a lamp or light fixture? [Check if bulb is loose.]
- Is the lamp plugged into a power source? [Check for loose wires or connections.]
- Is the switch turned on? [Check if switch is on.]
- Are other lights nearby working? [Check other lights. If not, perhaps the power is off.]
- Does the bulb light in another lamp? [If yes, then check the lamp or light fixture for problems.]

Then you would check other parts of the bulb for problems.
A diagram can explain the parts of a complex machine more clearly. Compare this diagram of the light bulb with the description of the light bulb in Handout #12. Using this diagram, you can see the parts of the bulb and decide which part may not be working.

**Occupational Orientation Matrix**

The following statements describe various things about working on a job. Answer each statement as though you were working now at the job of your dreams. Circle whether you would behave:

(A) Always, (F) Frequently, (O) Occasionally, (S) Seldom, (N) Never.

If I were working today:

1. I would enjoy acting as the leader for my co-workers.
2. I would like to get as much overtime work as possible.
3. I would like to have complete freedom on my job.
4. I would like to know exactly what my job responsibilities are.
5. I would like to be able to use my own judgment to solve problems.
6. I would encourage my co-workers to do their jobs right.
7. I would like to try my own ideas on the job.
8. I would want my co-workers to do their job the way they think best.
9. I would work hard for a job promotion.
10. I would do my work as fast as possible.
11. I would settle disagreements when they occur among my co-workers.
12. I would get swamped by too many details.
13. I need clear instructions from the boss on how and when things need to be done.
14. I want each worker to have a specific job.
15. I want all workers to follow standard rules and regulations.
16. I dislike a boss who encourages competition in getting the job done.
17. I want my co-workers interested in getting the job right the first time.
18. I want to be known as a friendly, cooperative worker.
19. I don't want to work with people with whom I can not be friends.
20. I want to keep learning new and interesting ways to do my job.
21. I do my best when I work with a group of people who get along well.
22. I work best when encouraged to work harder to help company produce more.
23. I think the worst thing is failing to get an important job done.
24. I am disturbed by a lot of bickering and arguing among co-workers.
25. I like a boss who gets the job done.
26. I prefer to spend my leisure time with people rather than hobbies.
27. I would like to have my plans be used to get the job done.
28. I find working with friends more important than getting the job done.
29. I like a boss who is easy to talk to and makes the job a friendly place to work.
30. I want to be known as a fast and accurate worker.
#1 Occupational Orientation Matrix Page 2.

**Scoring**

To score your questionnaire, write a 1 in the columns by **all** the items you circled A or F. Next, circle all the "1's" you have written in front of the underlined items. Count the circled "1's." This is your People Orientation Score. Write the number here_____________________.

Next, count the uncircled "1's." This is your Task Orientation Score. Write the number here_____________________.

Low Task/Low People

High People/High Task

To locate yourself on the Occupational Orientation Matrix, find your People Orientation Score on the horizontal line. Next find your Task Orientation Score on the vertical line and place an X in the quarter that represents your two scores.

People satisfy their needs through work. This can be done by accomplishing things (Task Orientation) and by being with people (People Orientation). A combination of Task and People usually meets our needs. Occupations can be classified into families. The People Family of occupations includes: Service, Business, Entertainment/Education. The Task Family of occupations includes: Technology, Outdoor and Science. These occupation families are general classifications and there are many different variations in each family. For example: under the Service category in the People Family, occupations are: waitress, salesclerk, cosmetology, and nursing.
Everyday Basic Skills Module Six

Service occupations consists of jobs where serving the public in some manner is the primary task. How and what you do for people, depends upon the job. You could sell items, or perform a service such as hair styling. Some of the occupations are: waitress, salesclerk, cosmetology and nursing. There are other occupations included which are not listed here.

Business occupations consists of jobs such as financial (record keeping, statistical analysis), administrative (office managers and personnel interviewing) and communication (reception and information order clerk)

Entertainment/Education occupations are those jobs that involve contact with people doing or learning something such as musicians, teachers, and sports players.

Technology occupations are those jobs where production of goods occurs such machinist, welder, and plumber.

Science occupations include those jobs in the medical profession such as laboratory technicians, health care [for example: dental assistants, X-ray technicians] and electronics.

Outdoor occupations include jobs having environmental concerns such as fish conservation, farmer, forestry/logging.

These are only a few occupational areas. There are many more occupations in each of the categories. Have your instructor recommend a few guides to use to locate other occupations.

Each of the four corners of the matrix represents a different category. These are combinations of people and task involvement. The top of the chart shows high task interests, while the bottom of the chart shows low task interests. The right side (top and bottom) of the chart shows high people interest, and the left side shows low people interests. Each combination has different meanings according to the different occupations that could fall into that area. The definitions of the four corners of the chart are as follows:

Low Task and Low People. [bottom left] Persons in this category could look at occupations having low responsibility for accomplishing things and little involvement with others: unskilled or semi-skilled occupations in the Service and Outdoor families.

High Task and Low People. [top left]. Persons in this category could look at occupations in the Technology, Outdoor and Science families.

High Task and High People. [top right]. People in this category could look at occupations in Entertainment, Teaching and Sales.

High People and Low Task. [bottom right] People in this category might investigate occupations in Service, Business, Entertainment/Education.

Average Task and Average People. This category is right in the middle between all of the above. People in this area might investigate occupations combining Service and Business and Entertainment/Education with occupations demanding an average amount of responsibility for getting things done and people involvement such as secretary, sales clerk, receptionist.

This questionnaire is only an indicator of general patterns of interest for future exploration.
#2.

**Internal or External?**

**Occupational Orientation Survey.**

Directions: Read the series of statements. There are two alternative statements in each question. Decide how much A or B sounds like you. You have 4 points to use between the 2 alternatives. If A sounds like you, and B does not, give all your 4 points to A. Or, if B sounds like you and A does not, give all your four points to B. If you are closer to one than the other, or evenly divided, divide your 4 points to A or B. See example below.

Example: I prefer:

<table>
<thead>
<tr>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>A: In the evening to sit home with a good book.</td>
<td>3</td>
</tr>
<tr>
<td>B: To go out to a party in the evening.</td>
<td>1</td>
</tr>
</tbody>
</table>

[Most of the time I like to stay at home and read, but sometimes I like to go to parties.]

<table>
<thead>
<tr>
<th></th>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. I prefer . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. To have a lot of friends.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>B. To have a few friends with whom I can share ideas and feelings.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. In my free time . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. I'd rather do something with a group of friends.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>B. I'd like to read a book or do a hobby by myself.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. I would . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. be embarrassed if I wasn't dressed the way most of my friends were.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>B. wear clothes that fit the occasion even if I might look different.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. For me . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. I am most happy doing something with friends or family.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>B. I am perfectly happy being alone doing something I am interested in.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. I like . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. to chat with store clerks, bus drivers, waiters or waitresses, etc.</td>

<tr>
<td>8. I would rather . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. work on project with a group of friends.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>B. do the project by myself.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>9. When I have a party . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. the more people there, the merrier.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>B. I prefer just a few friends (2 to 6)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10. A successful person is one who . . .</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A. gets along with everyone and is a leader.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>B. lives up to his/her own standards no matter what happens.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Total each column.
Everyday Basic Skills Module Six

#2 Internal or External Page 2.

Write the total number of points for A and B in the spaces below. Then subtract B from A and add 40 points.

\[ \text{A} - \text{B} + 40 = \text{Internal/External score.} \]

| 0 - 20 Internal | 21 - 59 Balanced | 60 - 80 External |

Find your score on the chart above.

Knowing your personality is important to consider as you are considering a career. There is no one alternative better than another. Knowing whether you are an internal or external person can affect your future satisfaction on the job.

**Internal** oriented persons prefer to do things alone. They tend to be independent and avoid situations where they feel threatened. On the job, they prefer to work alone with little or no supervision. They do not do well as supervisors or managers of other people.

**External** oriented people need others for a variety of reasons. They like the excitement and action of larger groups and the attention which the group provides. They like people and feel more comfortable with other people. On the job they work well with others and develop effective relationships. They do not like to work alone.

**Balanced** oriented people are balanced between being around people and being alone. They can handle either type of situation. On the job they can work well independently and also feel comfortable with others.

Knowing your orientation can help reduce stressful situations such as an internally oriented person being forced to deal with large groups of people, or the externally oriented person being forced to work alone. Consider your orientation when selecting a career. If you already are working, does your present job fit your orientation? If not, is there something you can change?
What are Your Occupational Values?

Directions: Read each statement and circle the number which best represents how the statement describes you.
(1) Strongly Disagree; (2) Disagree; (3) Neutral; (4) Agree; (5) Strongly Agree.

1. It is more important for a job to offer security than opportunity.
2. It would be hard to live with the feeling that others are passing me up in my job.
3. The kind of occupation I have isn't as important as earning enough money for a good living.
4. I want my occupation to provide me the opportunity to acquire new skills and knowledge.
5. A very important part of work is the opportunity to make friends.
6. I want an occupation where I can look forward to a stable future.
7. It is important in an occupation to have the chance to get to the top.
8. Success in a job is judged mainly by how much money I make.
9. I have the right to expect work to be fun and exciting.
10. I would prefer an occupation with an opportunity to work with people rather than things.
11. It is more important that I be able to count on having a job rather than make a lot of money.
12. Success in an occupation is when I have respect and recognition from others.
13. Work is nothing more than a way of making a living.
14. It is important for me to have an occupation that gives me a chance to develop my abilities.
15. It is not right for me to lose friends just to get ahead at work.
16. The most important factor about an occupation is that I can depend upon it being there.
17. Getting recognition for my work and occupation is very important to me.
18. My occupation has to provide me with the chance to make a great deal of money.
19. I want an occupation in which I can work with new ideas, be original and creative.
20. The main satisfaction I can get from work is helping my fellow workers.
21. It is important for me to be reasonably sure that my occupation is fairly permanent.
22. I should try to succeed at work, even if it interferes with other things in life.
23. To be successful in my occupation, I have to care about making money.
24. It is important for me to have enough freedom and responsibility to use all my abilities in my job.
25. It is important for me to have an occupation where I can work with congenial and friendly people.
**Scoring**

Write the number you circled for each of the statements and then add each column to obtain your scores.

<table>
<thead>
<tr>
<th>Security</th>
<th>Status</th>
<th>Financial Reward</th>
<th>Self Expression</th>
<th>Personal Relationships</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
<tr>
<td>6</td>
<td>7</td>
<td>8</td>
<td>9</td>
<td>10</td>
</tr>
<tr>
<td>11</td>
<td>12</td>
<td>13</td>
<td>14</td>
<td>15</td>
</tr>
<tr>
<td>16</td>
<td>17</td>
<td>18</td>
<td>19</td>
<td>20</td>
</tr>
<tr>
<td>21</td>
<td>22</td>
<td>23</td>
<td>24</td>
<td>25</td>
</tr>
</tbody>
</table>

The higher the score you have in a column, the higher the importance you give that personal value. Your scores will vary across all the five values. Knowing what your values are can help you select an occupation that brings you job satisfaction.

The description of the values are as follows:

**Security:** This is an important value for everyone. If your score is high in this area you prefer an occupation that is low risk [stable, permanent and "always there"]. Some jobs that have high security also may have limited opportunity for advancement, and could be lower paying than higher risk jobs. However, you may prefer to always have a job, even if it does pay less, rather than risk being unemployed.

**Status/Recognition:** If you rate this high, you prefer an occupation that has higher social recognition such as teacher or nurse. Status and recognition mean that people see the job and the person who has that job as having power, being socially useful, having higher intelligence and higher salary. Most jobs in this category require college degrees.

**Financial Reward:** If you rate high in this category, you prefer to make money. People in this category change jobs frequently in order to get higher salaries. People having this value work harder than the average person and may be considered a "workaholic" which is a person dedicated to his/her job before anything else.

**Self Expression:** If you rate this category high, you prefer occupations that enable you to use your talents and abilities. You prefer occupations that are interesting, have continued growth and opportunities for more learning and development. Salary and recognition are of lesser importance to you.

**Personal Relationships:** If you rate this category high, you want an occupation in which you have a chance to develop friendships. You want your job to help you develop a network of friends and your social life is usually with those people from your job.

Knowing yourself and what is important to you can help you make decisions about occupations that may bring a greater job satisfaction. If you score evenly across several values, an occupation that combines those values would be more satisfactory for you.
Career Planning Questionnaire

Directions: Read each question and circle either True or False as you think is correct.

1. Community colleges and vocational-technical schools are only for people who want training for a specific job like welding, auto body and repair, and carpentry.
   - True
   - False

2. The majority of jobs require a college education.
   - True
   - False

3. In your lifetime you will spend more of your time working than doing anything else.
   - True
   - False

4. An apprenticeship is one way of earning while learning a job.
   - True
   - False

5. The biggest effect of work on your life is to provide money for the things you want.
   - True
   - False

6. Choosing a job or career means selecting one you like and working hard to get the education or skills needed.
   - True
   - False

7. If you look correctly, you should be able to find the one job that is "right" for you.
   - True
   - False

8. Choosing the right job is important because you will spend the rest of your life in that job.
   - True
   - False

9. People who change occupations usually did not plan correctly in the beginning.
   - True
   - False

10. You should choose a job as soon as possible so that you can get the training needed and not waste time.
    - True
    - False

11. The best way to begin planning a career is to take a test to see what you should do.
    - True
    - False

12. Getting a job and trying it is the best way to find out about an occupation.
    - True
    - False

13. In order to get a job, a liberal arts college graduate must get a graduate degree too.
    - True
    - False

14. Career planning and making a decision about a job can not be reversed.
    - True
    - False

15. Most jobs do not require a particular set of skills or abilities.
    - True
    - False

16. Most people start their careers at about age 20 and go directly to the best career.
    - True
    - False

17. The major field you choose in college will predict the career you will have after graduation.
    - True
    - False

18. There is no set of responsibilities for every occupation.
    - True
    - False

19. In ten years, most jobs will require at least a college degree.
    - True
    - False

20. The more work experience you have the more likely an employer will want to hire you.
    - True
    - False
Everyday Basic Skills Module Six

#4 Career Planning Questionnaire page 2.

DIRECTIONS TO INSTRUCTOR:
Use the questionnaire as a basis for discussion in career planning. After the students have completed the questionnaire have them score the answers as follows:

Questions 3, 4, 15, 18 are True. All other answers are False.

Count up the number of correct answers. A score of 18-20 is Excellent, 15-17 is good, 12-15 is Fair. A score below 12 indicates a need for more information before planning a career.

Answers:
1. FALSE Community colleges and vocational-technical schools offer courses transferable to four year colleges in addition to the occupational training classes.
2. FALSE Employment trends indicate that only about 25% of all job openings require a college degree.
3. TRUE You will spend more time in work related activities than any other type of activity.
4. TRUE Apprentices are paid a percentage of a journeyman’s salary and you get paid for on the job training.
5. FALSE Your job may affect where you live, the kind of friends you have and the kinds of recreation in which you can participate.
6. FALSE Having an interest or desire in a certain job does not mean you will have the required knowledge or skills to do the job. Interests are a good beginning but abilities must be also considered.
7. FALSE The abilities of most people will qualify them for several jobs that may not be similar. Interests also change over time and people can choose different jobs with the same skills and abilities.
8. FALSE The average person will change jobs at least four to six times during a lifetime. This is due to the changing nature of the work force. Jobs will be phased out and new ones created.
9. FALSE The workplace may be changing and your interests may have changed too.
10. FALSE If you are too rigid in your career choice, you have not planned for changes in the labor market, personal interests, and values.
11. FALSE Tests will not tell you what specific jobs are right for you. Interest inventories can compare your interests with certain job families and achievement tests can tell you if you have the skills.
12. FALSE This is very time consuming if you were to investigate several jobs in this way. Other ways to explore job categories would be to talk with someone in the field, or use occupation handbooks.
13. FALSE The majority of liberal arts graduates are employed without advanced degrees.
14. FALSE You can change careers whenever your talents, needs, or the labor market changes. Your talents, skills, needs and interests are constantly changing and growing shaped by your occupational experience. You could transfer these skills and abilities to other occupations.
15. TRUE The majority of jobs except for highly technical ones can be accomplished in different ways by people with differing sets of talents and skills. People are usually hired for their potential to learn and advance.
16. FALSE People and their careers change. The skills and knowledge of one job can often be applied to others. For example teaching skills could be used in real estate, car sales, or insurance sales.
17. FALSE People with education covering many areas find themselves choosing work usually not directly related to the major field of study in college. For example, an English teacher becomes a football coach. [An example: Joe Paterno, Penn State University]
18. TRUE People in occupations having the title often perform tasks using different skills. They may have the same responsibilities but use their own style and talents.
19. FALSE Trends indicate that most jobs will require additional technical training, but less than 25% will require a college education.
20. FALSE Previous work experience is important, however employers look for people who have the potential to learn and grow with the company. Experience is only one factor used in selection.
Types of Goals:

**Long Range Goals:** are goals that cover the next 1-5 years. These goals are concerned with the overall life you wish to live; the type of job you want; whether or not you wish to be married; and the general situation in which you wish to live. These goals usually take a long time to achieve and are accomplished by completing many shorter term goals all related to some part of the long range goal.

**Medium Range Goals:** cover the next 6 months to one year. They cover the particular kind of training or education you are seeking, or a step in your career. These goals could be a part of a long range goal.

**Short Range Goals:** are the goals for the next 1-6 months. These are very specific goals. These goals should include a specific time frame for completion. For example: I want to work on computers (in five years.) I need to take courses on how to operate the computer (1-2 years.) I need to take a course to learn to type so I can work on the computer courses. A typing course takes 10 weeks. This is almost 3 months, so I need to take a typing course in the next 6 months. A short range goal is to take a 10 week course in typing.

**Mini-goals:** are those from now to one month. What do I need to do to reach my short term goal. List the action you can take now and within the month to get you on your way toward accomplishing your goal.

- have a family
- buy a house
- get a degree from college
- get a computer job with higher pay

**Long Range Goal**

**Medium Range Goal**

**Short Range Goal**

**Mini-Goal**
Breaking down goals into action steps is necessary in order to achieve goals by specific dates. Look at the Goal Flow Chart below. Then answer the questions on the bottom of the page.

1. What is one long range goal?

2. Does the medium range goal fit into a long range goal? If so where?

3. Look at the long range goals, then plan another medium range goal using a different long term goal.

4. What would be a short range goal for the medium range goal named above?

5. What could you do right now to get ready for the short range goal?
In setting up action steps to achieve goals it is necessary to ask yourself some questions.

1. What do I want to do?

2. How long will it take me to do this?
Depending upon the length of time, this could be a long range, medium range or short range goal.

3. Where will I need to do this?
This could be a geographic location or it could be a type of job. For example: If I want to grow tropical plants, I could move to a tropical climate, or I could work in a greenhouse and grow them here.

4. What are the step by step procedures I will need to follow to achieve my goal?
These can be mini goals, short range goals or medium range goals, or any combination of these goals. It depends upon which level of goal you are working on. For example: I want a job in Harrisburg. [Long term goal] I want to buy a car. [medium range goal] I need to save a little more money for a down payment for the car. [short range goal] You could get the job in Harrisburg first, and travel with someone who is driving there while you save money to buy the car. Or, you could save money to buy the car and after the car is purchased, then find a job in Harrisburg.

5. Are there any problems I might have in doing this?
Problems might occur at any level, long range, medium range, or short range. It is good to anticipate what possible problems might occur so that you can try to avoid them or deal with them.

6. How will I overcome these problems?

7. What time schedule should I set to achieve my mini-goal?
If you are working on a mini goal which is an immediate goal, how much time are you willing to give yourself to complete this goal? This is a critical area. If you put off doing the small things you can do immediately, then you will put off doing the other goals. After awhile you will look back and find nothing has been achieved.
My Dream Job

Pack your bags and get ready. You have used a magic wand and for one week you can have any job you want. Using what you know about yourself and your career values, select your perfect job. Wave your magic wand and you will automatically have this job in another city or state. Whatever you decide is your perfect job will be yours, but it must be realistic to fit your job values.

Answer the following questions about your new job:

Your job is:

The place where you work is called:

What is your title:

Describe the place you work. What does it look like?

In what city or state is the job located?

How long did you attend school? Did you get a degree?

What kinds of previous experience or other work experience do you need?

List 4 skills you need for this job.

Poof! Now your week has ended and you are back to reality. List 4 skills or experiences you have NOW that could lead to the job that you imagined.

Most people start at the bottom: Then they prove themselves. They get more training and education. Then they move up. Below or on the back of this page describe the kind of job you are qualified for now, or could get today that would give you some experience. Then tell your next steps:

Job I am qualified for now:

Next I would get this type of training or education:

Then maybe I could do:
Deciding what to do when is necessary if we are to achieve our goals. Look at the bottom part of "My Dream Job." Begin thinking about the job you are qualified for now. Think about how it compares with your dream job. What type of education or training do you think would help you get closer to your dream job?

Using the action steps in goal setting begin to think about goals to achieve that dream job.

1. Long range goal (1-5 years)
   I believe the following action steps will help me reach that goal:
   a).
   b).
   c).

2. Medium range goal (6 months to 1 year)
   I believe the following action steps will help me reach that goal:
   a).
   b).
   c).

3. Short range goal (1 month to 6 months)
   I believe the following action steps will help me reach that goal:
   a).
   b).
   c).

What can you do right now to start you on the path to your dream job? (mini goal)
Everyday Basic Skills Module Six

# 8

My Barriers

By now I guess you know that nobody is perfect. Every employer has some things he/she is not proud to have in the workplace. Every job seeker also has things about which he/she is not proud. These are not weaknesses. Instead, they are areas to improve. If you are asked about what your weaknesses are, simply say, "I don't call them my weaknesses, but they are things I want to improve."

Look over the checklist below of possible areas to improve. These are called barriers. These are things that get us down and make us think that no one would hire us. Other people have managed to overcome these problems. Next to the check list are some examples of how others have changed or faced these barriers. You may have also overcome some of these barriers. If so, write down how you did overcome the barrier. Your instructor may want to discuss this in class.

Assume that you find a dream job and will start to work next week. Answer the following questions about transportation to work.

A. How will you get to work?
   1. Public transportation.
      taxi, bus, other.
      What is the cost of this transportation per day? ________________________
      What is the cost of this transportation per week? ________________________
      Does the schedule match your work schedule? ________________________

   2. Private transportation.
      your car, carpool with someone, other.
      What will the cost be per day? ________________________
      What will the cost be per week? ________________________
      Is this transportation available when needed? ________________________

B. If you do not have a driver's license, fill in the information below.
   Do you want to learn how to drive? ________________________
   Where could you find out more information? ________________________
   What would be the cost to learn how to drive? ________________________

C. If you have your driver's license but do not have a car, fill in the information below.
   Do you have a car you could borrow? ________________________
   Do you want to get your own car? ________________________
   Where would you look for a car? ________________________
   Check off which of the following you would do to find a car.
   a) talk to friends and neighbors about available cars. ________________________
   b) use the classified advertisements in newspapers. ________________________
   c) check used car dealers. ________________________

D. How much would it cost to buy a car? Use space below to figure out the amount of money
   Cost of car.
   Down payment necessary.
   Loan interest.
   Monthly payment.
   Insurance payment (per year or monthly).
   Gas/oil.
   Car Repairs.
#10

My Career Goals

Describe your career plans.
1. What are your job goals?

2. What steps would you take on and off the job to achieve these goals?

3. Put your job goals into the following categories:
   Long range goals: Things I would do within 1 to 5 years.
   Short range goals: Things I would do within 6 months to 1 year.

What can you do now to work toward these goals?
Questions for Self Evaluation

Setting and achieving goals takes planning and evaluation. You must set goals for yourself and then after a period of time, evaluate how well you met your goals. Setting goals for yourself to achieve on the job and then reviewing them can let you know whether you are continuing to grow on the job or whether you are at a dead end.

Answer the following questions about your present job. Use your answers as an aid in making decisions about your future on your job.

1. How do I get along with my boss?

2. What are my strong points and capabilities?

3. What are my weak points?

4. How will my supervisor evaluate my work?

5. Can I find out which parts of my job are important?

6. Do I need additional training for this job?

7. Do I need additional training for another job I would like in this company?

8. Where do I want to be in the company in a month? In a year?

9. Will there be chances for promotion after two years if I get the proper skills?

10. Is this job in line with my career goals? If not, what are my plans for reaching my goals?
Work and Home Worksheet I

1. What are some of the parts of your job that you enjoy and look forward to doing?

2. What are some of the parts of your job that you find unpleasant?

3. Are there some ways that you can change your feelings about the unpleasant parts of the job?

4. If you can't change your feelings about the unpleasant parts, what alternatives do you have?
Work and Home Worksheet II

1. Have you ever come to work under the influence of alcohol or drugs?

2. Have you ever had a hang-over at work?

3. Do you have frequent arguments with spouse, parents or children at home?

4. Do disagreements interfere with your job?

5. Do you spend all your money instead of saving part of your paycheck?

6. Do you borrow money from your friends?

7. Do you regularly keep late hours on work nights?

8. Have you ever fallen asleep on the job?

Answering yes to several of these questions may mean your personal life has some problems that may be affecting your work.

What could you do to change the "yes" answers?
Work and Home Worksheet II:

1. How much time per day do you spend on things and concerns in the following areas:

   Work ___________________________ number of hours per day.
   Home ___________________________ number of hours per day.
   Yourself _________________________ number of hours per day.

Include in each section the amount of time spent thinking about one of the categories, as well as time spent in that environment. Add up the categories.

For example:

   You spend 7 hours per day at work. But current problems at home have forced you to pay personal bills on company time or make telephone calls to home or about personal subjects. Therefore, you figure you spend 2 hours at work worrying about things at home. When you get home, your family has things you must do for them, rather than watching a television program you really wanted to see, or going out with friends. What time you do spend per day in each area.

   Work 12 - (Worked late - plus time driving to and from work)
   (Taking care of or thinking about problems at home) = 10 hours work
   Home 6 + 2 (at work) - family things (laundry, cooking, dishes, child care, cleaning, etc.) = 8 hours home
   Yourself 6 (taking a shower and sleeping) = 6 hours yourself
   24 hours

   If you know that you need 8 hours of sleep per night, are you able to get this much sleep?

   Is this schedule evenly divided? What category or categories are short changed?

   What can you do to change this?
Is It Time For A Change?

Before you decide whether it is time to change jobs, ask yourself some questions.

- Do I still have the same career goals I had when I took my present job?
- Do I need to change jobs in order to reach the goals I have?
- Have I explored every chance for moving up at my present company?
- Did I get enough experience to qualify for a better job at another company?
- Do I have the training or skills to get a better job?
- Have I worked at this job long enough to get good recommendations?
- Will a new job give me a chance for more growth and better pay?

If you answered yes to every question, you are probably ready to change jobs. However, if you answered no to several of the questions, reevaluate your plans. Look into training programs, or search for ways to make the job more interesting.
Guidelines For Advancing At Work

1. Decide what your job goals are. List them here.

2. Approach supervisors to request promotion by waiting until it is convenient for them to talk; choosing a private place to talk; selecting the right time to make a request; and being prepared to justify the request by demonstrating extra effort and qualifications. Write down how you would do this.

3. Determine when you have outgrown your present job and should look for a new one. [See Handout #15] "Is It Time For A Change?"

4. Resign from your job in a positive way.
   Briefly give your reasons for leaving in the space below.

5. Use layoffs in a positive manner as a time to reassess your present job and redefine your job goals. If you are on layoff from a job, do you want to return to work at the same company? If yes, why?

   If no, why?
"Who Am I - In The Mirror?"

1. You just looked at yourself in the mirror. You saw a person there. Describe the person you saw. Include as many details about yourself as you need to describe yourself.

2. Change your seat and sit next to someone you do not know and perhaps have not met. Describe this person without talking to them.
"Unhappy Times"

Write down any past unhappy things that may have happened to you in the past. Include times when you felt unhappy or were hurt. Describe as much as you want. No one, except you, will know what is written on this paper. Then fold this paper and await directions.
"Who Am I?"

Read the statements below. Decide how much the statement sounds like you. Put a score from 0 to 5 in the blank. If the statement really sounds like you, score a 5. If part sounds like you, score less. If the statement does not sound like you at all score 0.

I am a person who...

1. gets unhappy at times about what I am doing. 
2. is usually very pleased with myself. 
3. is as good looking as most people. 
4. is very quiet in groups because people might laugh at me. 
5. learns things fast. 
6. has many skills and talents. 
7. thinks I am not a good person. 
8. wants to change a lot about my appearance. 
9. is usually a fun person to be around. 
10. can not concentrate when someone is talking. 
11. can do many things as well as most people. 
12. can be counted on to help. 
13. is of average size. 
14. tries to be what other people want me to be rather than what I am. 
15. has a good memory for many things. 
16. has a creative mind. 
17. has a very confused life. 
18. is very concerned about my health. 
19. is as popular as other people. 
20. is easily upset when I must answer questions in a group. 
21. has problems solving puzzles or figuring out solutions to word problems. 
22. is usually pretty calm about things. 
23. is just the right size. 
24. is usually picked on by other people. 
25. gets very upset when I am being tested. 
26. finds it hard to understand myself. 
27. doesn't think very much of myself. 
28. is not very big and doesn't have a nice shape. 
29. can make friends very fast. 
30. gets things done on time.
### Scoring

<table>
<thead>
<tr>
<th>Positive</th>
<th>Self Concept</th>
<th>Negative</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>2,12,22 P</td>
<td>In General - I am a person</td>
<td>7, 17, 27 N</td>
<td>P - N =</td>
</tr>
<tr>
<td>6,11,16 P</td>
<td>Thinking Abilities</td>
<td>1, 21, 26 N</td>
<td>P - N =</td>
</tr>
<tr>
<td>3,13,23 P</td>
<td>Physical Appearance</td>
<td>8, 18, 28 N</td>
<td>P - N =</td>
</tr>
<tr>
<td>9,19,29 P</td>
<td>Social Relationships</td>
<td>4, 14, 24 N</td>
<td>P - N =</td>
</tr>
<tr>
<td>5,15,30 P</td>
<td>Continued Learning</td>
<td>10, 20,25 N</td>
<td>P - N =</td>
</tr>
</tbody>
</table>

Add the points you gave to each of the statements. Subtract the negative score from the positive score and put the answer in the Score column at the end of the statement.

Add all the answers in the Score column and put the total on this line. __________

The total score indicates your opinion of yourself.

Your opinion of your self is called a self concept. It is how you think about yourself. The five scores in the different self concept categories give you an indication of how you feel about yourself in that category. The higher the score, the higher your self concept. The highest possible score on the scales is 15. The highest possible total score is 75. A low score on any of the 5 categories might be 0. A low overall score is under 20.

This exercise is intended to show you your opinion of yourself. It does not rate your abilities in these areas. Your abilities may be very different from how you think of yourself. Example: you may think of yourself as fat, yet in reality, you are actually 20 pounds below the suggested weight for your height.
Ten Steps To Brighten Your Life

1. Begin the day in a calm and cheerful mood. Say, "This is going to be a good day. I am going to be calm and cheerful right now." Then reach over and pat yourself on the back several times and say "I'm good at: _______.
   (subject or area)

2. Try smiling at others -- make believe your underwear is tickling you. A smile is contagious and you will feel better as others smile at you. Set a goal to smile at the first 5 people you meet each day. Then, the next week increase it to the first 6 people you meet and so on.

3. Count your blessings ---- list them one by one. Did you ever realize the real wealth you have?

4. Enjoy this day with beautiful thoughts and pleasant memories. Live life one day at a time. Write down all the good things that happened to you today. Review this list every week.

5. Be adventurous. Try walking and see new neighborhoods, new buildings and parks, new scenery.

6. Give a friend a phone call or write a letter. Tell them you were thinking about them, encourage them -- encouragement is oxygen to the soul.

7. Be a happy person, see the bright side of life, shun the gloom. Having a cheerful, loving attitude lends itself to your best health.

8. Do a good deed, buy a book or give something beneficial to a loved one.

9. Look at yourself in a mirror and tell yourself "I like you."

10. Do something you enjoy today -- just for you -- give yourself a treat.
Thinking About My Self Esteem

The way you think about yourself affects the way you live:

your actions, thoughts, and feelings about yourself and others.

whether or not you plan and achieve your goals for your life.

High Self Esteem can make you feel:

Competent
Skillful
Loved
Proficient

Low Self Esteem can make you feel:

Incompetent
Worthless
Unloved
Unproficient

You can improve your self esteem. You need to feel good about yourself and tell yourself you are capable of achieving many things. Do not relive past failures but close the door mentally and go to better things.
Personality Profile

Complete the sentences below by writing down your thoughts. This is not a test, there are no right or wrong answers.

The things I like about myself are:

When I have time I like to:

My friends feel that I am a:

I am good at these things:

I wish I could do:

If I had a lot of time I wish I could:

Making an important decision makes me feel:

I know I have made a good decision when:

The type of work that I am really interested in is:

In the future, I would like to have:

My best job was:

What I liked about the job was:

Things I did not like about the job were:
Being a parent makes me feel:

The hardest part of being a parent is:

I would most like to be remembered for:

If I could only save one thing from my house it would be:

The reason I want to save this item is because:
"The Me Nobody Knows"
My secret self

We all have a dream of what we would like to be or what we would like to do. Some of us do accomplish these dreams, especially if it is something we really want to do. However, if our dream involves becoming someone else, these dreams are more difficult to make happen. Knowing what these dreams are can give us some insight into what is important to us.

For example, you may have a dream to be President of the United States. It's unlikely that you will be able to become well known and rich enough to run for the office of President. However, you might look into a career in politics in your town, working on various political committees, or township committees and perhaps running for township supervisor and county commissioner. Or you could look at various state or federal civil service positions that would bring you in contact with political offices.

What is your dream? Think about it and describe it. How long have you had this dream? Why do you think that this job, or person is so interesting?

Describe below your secret dream for yourself or a secret dream you may have for your child.
Personality Mosaic

Read the statements below. If the statement describes you, circle the number.

1. It is important for me to be physically fit.
2. I need to understand things.
3. My moods are dependent upon music, color and pretty things.
4. I like and need to have people around me to give my life more meaning.
5. I really know that I can do many things.
6. I need clear directions when I am trying to do something.
7. I can build or fix many things myself.
8. I can spend hours trying to link things out.
9. I love beautiful places, with pretty colors and nice things.
10. I love to have company.

11. Competition is exciting.
12. I can't work in a messy place, I must first clean up.
13. I love being creative with my hands.
14. I often think about new ideas.
15. I love to find new things to do.

16. I enjoy sharing my personal life with other people.
17. I enjoy leading others.
18. I am very careful about my work and try to work out all the details.
19. Messy hands are just a part of working and I don't mind that.
20. Education never ends since I am developing my mind.

21. I love to try new styles and colors and look different when I dress.
22. People just seem to come to talk to me because I can tell when they need to talk to someone.
23. I love organizing people and projects and having things happen.
24. In order to get jobs done, I need to stick to a routine.
25. I like to be sensible when I buy or make things.

26. Some days I just daydream, work on crafts, or read.
27. My imagination is important.
28. I like taking care of people.
29. I love to be needed to get a job done.
30. When I do a job I am very thorough and complete.

31. Hands on activities are more fun for me.
32. Some subjects really capture my interest and I love to find out a lot about them.
33. I am very creative and love new ideas.
34. In order to solve some of my problems, I must talk them out with someone.
35. Success means having very high goals.

36. I like being responsible for making decisions.
37. When I have made a decision, I don't like to spend time discussing it again.
38. I always think through a problem completely before I act on it.
39. I love to move things around a lot so everything looks different.
40. Friends are important to me when I am unhappy.
#8 page #2 Personality Mosaic.

41. I prefer to do the planning and have others do the work.
42. I like being where I am.
43. I am an outdoors person.
44. Why is important to me.
45. Moods and feelings are expressed on my job.

46. Helping people to care more for each other is important to me.
47. Taking part in making important decisions is exciting.
48. I would rather that someone else was in charge.
49. I don't like fancy surroundings.
50. I like to continue to think about a problem until I have solved it.

51. I enjoy the beauty of nature.
52. I like close friends.
53. I really want to move up in my job.
54. I like doing part of my work each day so that I am always "caught up"
55. I like rules and order because things are less upset that way.

56. A good book is one that I am able to think about afterwards.
57. Art, plays, and films are important to me.
58. I like to know how people are doing especially if I haven't seen them in a long time.
59. Influencing other people is fun.
60. If I say I will do something, then I make sure everything is done.

61. Doing hard physical work is good for you
62. If I am interested in something, I want to know everything about it.
63. I want to be different from other people.
64. Helping people is important to me.
65. You won't get ahead unless you are willing to take chances.

66. When I start something new, I want clear directions and explaining.
67. If I were to buy a car, the first thing I would check is the engine to see if it is well built.
68. People who are intelligent are interesting to me.
69. When I get involved in a new project, I forget everything else.
70. People who need help worry me.

71. I love to teach people new ideas.
72. I like things to stay the way they are without changing.
73. I can keep cool and get things done in an emergency.
74. New discoveries are so exciting that even just reading about them is fun.
75. Creating new things or ideas is fun.

76. When I see someone who is lonely, I try to do whatever I can to help.
77. I enjoy bargaining.
78. If someone in charge doesn't like what I am doing, I won't do it.
79. Sports provides good exercise.
80. I am interested in nature.
#8 page 3 Personality Mosaic

81. Doing or trying something different and unusual is fun.
82. Most people are good.
83. If at first I don’t succeed, I try again.
84. I like to know what I am expected to do.
85. Discovering how things work and fixing them is exciting for me.

86. I can plan things out if I keep calm.
87. Life without beauty would be dull for me.
88. People often talk to me about their problems.
89. When I need to know something, I usually have somebody who can tell me about it.
90. I like plain and simple things to be happy.

Total the amount of each column.

R____ I____ A____ S____ E____ C____

What areas are your three highest scores?

____________  ______________  ______________
#8 page 4 Personality Mosaic

Find the three areas in which you scored the highest. Read the descriptions of that personality type.

R = Realistic Personality
A Thing Person. Attention is focused on own body. Is very independent, strong, maybe pushy. Likes to explore things using hands and eyes. Expresses feelings and solves problems by using his/her body. Is a risk taker, enjoys the outdoors, money, and problems with clear answers.

A = Artistic Personality
An Information/Thing Person. Centered around feelings, body and thinking. Prefer to use logic to decide things rather than asking someone else. Loves change, and difficult problems that have many alternative solutions. Loves to read and explore new ideas.

E = Enterprising Personality
A People Person. Is centered around projects. Is full of energy, lively, confident, and a leader. Likes to deal with people using feelings, words and thinking skills. Loves organization, managing, exciting times, and leading people. Is a risk taker.

I = Investigative Personality

S = Social Personality
People Person. Is a feelings centered person. Is a sensitive leader, responsible and likes helping people. Uses feelings, words and ideas with people. Is less interested in tools or physical activities. Likes close friends, being in charge, has empathy with people, and likes spontaneous activities.

C = Conventional Personality.

Do any of these personality types sound like you? You may be a combination of several of these personality types. Knowing what personality type you have may assist in understanding yourself.
The Perfect Person

Have you ever seen a perfect person? If not, could you imagine what a person person would be like.

Describe the appearance of a perfect person.

How does this perfect person behave at home?

What does the perfect person do at work?

What type of friends does a perfect person have?

In what way could you like a perfect person?

In what way are you different from the perfect person?

Should I act perfect? Will this be a problem?
#10

Truly

If things are true, then it agrees with experience, facts or what is reality.

Read the following statements. If you agree with what it say, do nothing. If the statement is untrue, rewrite the statement to make it true.

You should always be good.

I must always get what I want.

Everything I learn is important.

Expect the worst.

Only one way is correct.

Thinking about mistakes helps you correct them.

In order to have a lot of money, you must work hard.

Things are getting better in the world.

Punishment is correct for those who do wrong things.

Friends will never hurt you.

What are other truths that you believe?
Do You Agree?

Read each of the following statements. Decide whether or not you agree with the statement. If you disagree with a statement, draw a line through the statement. If you strongly agree with a statement, underline it.

ALWAYS BE FAIR AND JUST
PEOPLE CHANGE FASTER FOR FAMILY THAN FOR FRIENDS
IF YOU ARE RIGHT, THEN THE OTHER PERSON IS WRONG
KEEP YOUR PROBLEMS TO YOURSELF, NEVER SHARE PROBLEMS
ALWAYS SHOW TRUST AND CONFIDENCE.
THE GOAL IS TO BE PERFECT
RULES SHOULD BE FEW AND SIMPLE
NEVER SAY HARSH OR UNKIND WORDS
BE KIND AND COURTEOUS
IF ONE FAMILY MEMBER IS UPSET OR DEPRESSED, THE WHOLE FAMILY SHOULD SUFFER.
THINK OF YOURSELF FIRST.
COMPARING ONE FAMILY MEMBER TO ANOTHER IS OKAY
IF AT FIRST YOU DON'T SUCCEED, QUIT
THERE ARE TWO SIDES TO EVERY ARGUMENT, THE WINNER IS THE ONE WHO YELLS THE LOUDEST.
IF SOMEONE NEEDS HELP, HELP THEM FIRST BEFORE YOURSELF.

You Decide

These are four people who live in the same apartment building as you. As each of you goes to the basement to do the laundry, you all talk among yourselves about events in your lives. These are 4 of the stories that could have been discussed among you. Give each one an ending.

Lindsey has lived at home for 19 years. She just finished high school last year. She has gotten along well with her parents, but she is beginning to feel that she wants to go out on her own and have her own apartment. Finally, one day she tells her parents [you fill in what she says.]

Brandon decided that he needed to be making money by the time he was 18. His family had a lot of financial pressures after his father died. His mother had worked to support Brandon and the other two younger children for 2 years while he finished high school. Now Brandon wanted to help relieve some of the financial burden. He decided to look at the options available at the local schools. He had to have some type of marketable skill or be forced to work at common labor jobs with less money. He decided [you finish this story]

Jessica wants to work with blind children. She is now working as a camp counselor at a summer camp for blind children. Jessica feels she cannot wait until she completes college to start working, but she knows that a college degree will open more doors for her. After much thinking and talking to college advisors and friends, she decides to [you tell what she decided]

Justin is very intelligent, loves math and working with numbers. He is very good at repairing machines and cars. College is too expensive for him and his family to afford and Justin doesn’t like the thought of sitting in a classroom for 4 years more. After much thought, and talking with his parents, decides to [you tell what he does]
Wardrobe Analysis

Go through your wardrobe and complete this form. Fill in according to what clothing you already have. Once this is done, it will be easier to decide what you need. When buying new clothing, try to color coordinate the new items with clothing you already own. This will help you to create more working outfits with fewer items thus reducing expenses.

Your Ideal Life

Let's day dream for a little while and think about the things you would really want to have in your life. If you could choose to have certain things in your ideal life, what would you choose?

Describe an article of clothing that you want

Describe the ideal job you want

Your ideal home

Your ideal partner

An ideal place to live

The ideal training to get the job you want

Something else that you want
## Fun Things I like

What things do you like to do to have fun. Is it acting foolish? Is it going to a certain place? Is it being with certain people? Do you find it fun to joke or tell silly stories? Are sports or games fun?

List 5 things you do that are fun. With whom do you do these fun things?

<table>
<thead>

You have worked very hard. Now give yourself a treat. It is something that you have wanted for a long time. Perhaps it is something to eat, or something to wear. Perhaps it is even a place to go.

Your treat may be something that you have wanted but denied giving yourself for a long time. Perhaps you never thought about being good to yourself and giving yourself treats. Now is the time. Be extra nice to yourself. You deserve it.

Some very special treats. These things you would REALLY love:

1. __________________________

A need is not always a material thing. Each of the items listed below is a need for many people, and not one is a material thing.

Some people have greater needs for one or another of the items. Some people have less needs for the items. Decide which level of need you have for each of the items listed. Then decide what you can do to satisfy this level of need.

Circle the level of need you have now for each of the items listed. Then describe how you can best meet this level of need.

Worksheet: Maslow's Hierarchy of Needs

Each of us has needs that we must consider in order to achieve a sense of self worth. Some of these needs are material things. Some are not. Needs can be categorized into different levels that we must complete before continuing onto the next level. If you do not meet all your needs at one level before going onto the next level, you might feel somewhat unsettled or disorganized or too spread out. In order to form a strong base, basic categories of needs should be met before going on the next level. This is similar to building a building by placing one block upon another. Think of these blocks as forming a pyramid, with the strongest most important needs at the bottom and building up to a peak. Goals are set to accomplish the needs at the level in which you are working and then, when the goals are achieved, new goals for the next level can be set.

Look at page #2: "Be A Star!" The needs at the bottom of the pyramid are the basic needs: food, shelter and clothing. Each of us must have these basic needs constantly. The next level builds upon the basic needs by adding additional items such as security and money.

Use Handout # 17 "Common Needs" and decide where on the pyramid you are. Put an X on the level. Tell how you know that you have met the previous levels needs.

__________________________
__________________________
__________________________
__________________________

Can changes in your life cause you to change levels on the pyramid? If so tell how.

Each of us has needs that we must consider in order to achieve a sense of self worth. Some of these needs are material things. Some are not. Needs can be categorized into different levels that we must complete before continuing onto the next level. If you do not meet all your needs at one level before going onto the next level, you might feel somewhat unsettled or disorganized or too spread out. In order to form a strong base, basic categories of needs should be met before going on to the next level. This is similar to building a building by placing one block upon another. Think of these blocks as forming a pyramid, with the strongest most important needs at the bottom and building up to a peak. Goals are set to accomplish the needs at the level in which you are working and then, when the goals are achieved, new goals for the next level can be set.

Look at page #2: "Be A Star!" The needs at the bottom of the pyramid are the basic needs: food, shelter and clothing. Each of us must have these basic needs constantly. The next level builds upon the basic needs by adding additional items such as security and money.

Use Handout #17 "Common Needs" and decide where on the pyramid you are. Put an X on the level. Tell how you know that you have met the previous levels needs.

Students will be at different levels. Some may have achieved parts of several different levels. Place the X at the lowest level that needs to be completed. For example: if the student does not have a stable home environment, the first basic level of food, shelter, and clothing may still need to be achieved.

Can changes in your life cause you to change levels on the pyramid? If so tell how.

Occasionally the structure may crumble due to the loss of a spouse or job. In that case, you must work back through each level to repair the damage, starting at the lowest level needed. For example: if a job is lost, the basic needs of food, shelter and clothing may be threatened. If a spouse leaves or dies, the second level of security may be threatened and well as level three: love.

What goals will you need to set in order to climb higher on the pyramid? List the goals here. Students should evaluate their current situation: Do they have the basic needs met? If not, what steps are necessary. For example: if the student has recently separated and is looking for a place to live, and a means of paying for food, the first step would be to find a means of renting an apartment either through public assistance or sharing an apartment. That would be the first goal.

Are the goals long term, short term, or mini goals?

Depending upon the level, the goals could be mini goals [needing to be completed in a few days or weeks] or long term goals capable of being spread out over a year.

What do you plan to do first?

Answers in this area depend upon the level the student is working on. Obviously if food, shelter or clothing are needed, then this should be the first priority. If security or safety is a problem, then seeking assistance should the the goal.
Be A Star

Free to be Me!
Freedom
Be all you can
Independent
Self Esteem
Praise
Self Approval
Assertive
Aware of Abilities
Family, friends
Love and Respect
Belonging,
Acceptance: by self and by others
Safety and Security:
Trust, security, money
education, realistic goals
encouragement
Survival needs:
Food, Shelter and Clothing
Pyramid of Needs

Freedom
to be me !!!
Independence
to do what you want
within your responsibilities.

Esteem Needs: Approval of yourself
and your goals as important. Feeling good
about yourself. Assertive: Aware of strengths
and weaknesses and accepting them. Understanding
your values and responsibilities and trying to live up to them.

Belonging Needs: A family, friends, community, church, receiving
love and respect from these people or place. Acceptance of you as a person.

able to communicate with others. Able to provide and maintain yourself. Using education
skills. Obtaining money by using knowledge obtained from education. Able to trust that family
and job will be there. Setting realistic goals that can be met. Confident about yourself and trusting.

Survival Needs: Food Shelter, clothing. Answering the basic questions: Do you have a place to live with
heat and water? Do you have food for 3 daily meals? Suitable clothing for the weather and in good repair?

If you do not have all the items mentioned in each of the levels above, then you have not achieved mastery
of that level. Goals should then be set to complete the various levels beginning with the lowest level.

1. What level are you at?
2. Why do you think this is correct?
3. What goals do you need to set to complete that level and move on to the next higher level?
4. What will you do first?
Everyday Basic Skills Module Seven

Organize Your Pocketbook
and
Prevent A Crime

Can you list 7 items found in this pocketbook that should be changed?

1. 
2. 
3. 
4. 
5. 
6. 
7. 

158
Very often it is the little things we overlook that can make the difference in crime prevention. It is not what you do but sometimes what you don't do that is important.

Here is your lucky 7 of what not to do. Were you able to spot them?

1. Bank envelope with large amount of money. Pay by check when possible.

2. Bank deposit slip showing account number which could allow cashing of checks by merely writing bank number on back of check.

3. Keys with full identification of name, address, telephone number. Should have only telephone number and perhaps a first name.

4. Food stamp books with identification card attached.

5. Combination of large bills and coins together in a change purse. Bills can be easily dropped while reaching for a coin.

6. Keys to house and car on the same key ring. Lose the set and you have problems entering your house or apartment.

7. Open unsecured handbag. Items can drop out if upset, even accidentally.
The office is becoming a high crime area. Employees are losing money from their pocketbooks or desk. Personal items such as radios and picture frames are also being taken. Desks are often unlocked, pocketbooks left out unprotected while the employee is busy away from the desk. Lockers may not be properly locked in the employee lounge area.

Some hints to reduce the likelihood of theft:

1. Never leave your pocketbook in an unprotected location such as a desk, open locker or out in the open. Instead, lock your pocketbook in a desk drawer, locker, or file cabinet.

2. Never leave the office open and unprotected while you attend to duties elsewhere. Instead, lock the office if possible, or put away small items such as calculators and lock the desk.

3. Never leave amount of money on the desk or in the top drawer. Instead, place money in an envelope and put it in a drawer capable of being locked.

4. If you work alone over lunch hours or late after office hours, lock your office door. This will reduce the likelihood of unwanted assault.

5. If you bring personal items such as radios, coffee pots, etc., to the office, make sure they are engraved with your name and driver’s license number for identification. This will identify your possessions in case of possible theft or misappropriation by others.

6. When entering or leaving your car, always park in a well lighted area if you work late, and lock the car. Avoid getting into elevators with a stranger. Either use the stairs or wait for a different elevator.

7. Be aware of any strangers hanging around, especially if you work alone frequently. Have the local police telephone number pasted where it is visible at a glance. Call police if you suspect danger.
Supermarkets, the most frequent shopping destinations, are often high-crime locations. Recently several women have had their pocketbooks stolen, or more frequently had wallets stolen from pocketbooks in supermarkets. Two of these women thought they had "misplaced" the wallet at home and had never reported it.

Some hints for supermarket shopping:

1. Never set your pocketbook on a shopping cart - not even for a minute! Keep it on your arm and have the pocketbook closed.

2. If you do lose a pocketbook or wallet in a supermarket, report it at once. Ask the store personnel to help you try and find it. A supermarket robber, in order to avoid keeping incriminating evidence, will remove the cash, and also perhaps the credit cards and driver's license and then discard the wallet.

3. If you lose your pocketbook and it contains keys to your house and identification such as driver's license, change the locks on your home and car. Hardware stores will have new locks or some locksmiths can reset some locks and recut new keys. Car dealers will have lock changes for cars.

4. While paying for your groceries, only remove the amount of money needed. Don't "flash" a lot of money. Better still, pay by check.

5. After paying for groceries, stay with them until you place them in the car. Don't leave the cart parked by the store while you walk down to get the car. Take the cart with you or arrange to have someone watch your cart.

6. Watch while your groceries are being bagged and make sure all bags are placed in your cart. Sometimes several orders are being bagged and the previous customer may take your bag too.

7. Lock your car after placing groceries in the car. Then, return the cart after checking to make sure you have removed all items, including the heavy items stored underneath.

HAVE A SAFE SHOPPING TRIP!!
Each year, many worthy charitable organizations request donations. But, bogus charities and dishonest solicitors swindle millions of dollars. In some cases only a small portion of the donation actually is received by needy individuals.

**Some hints to reduce charity fraud:**

1. Ask for the name of the charity and the name of the solicitor.

2. Find out the address of the organization and if they are registered as a charitable organization in Pennsylvania. Call the Commission on Charitable Organizations to check on the charity - (717)-783-1720.

3. Beware if the solicitor cannot give you the name and address of the charity or can not tell you how the money will be used.

4. If you have never heard of the charity or the name is similar to one you do know, ask to see some identification.

5. If the solicitor refuses to accept check and insists on cash only, or if you are told to give a large specific sum, do not donate the money.

6. Do not let any unknown solicitor into your house for any reason.

7. If you become suspicious of a charity representative who telephones to ask for donations, hang up.

8. Report any unusual behavior or requests by a solicitor to your local police immediately, especially if the charity claims to be soliciting for the law enforcement agency in your town.
Stay alert when driving. Don’t assume you are protected from crime because you are in a car. Recently, women have reported being harassed by other motorists who were trying to stop their car. Other women reported having problems with people asking for a ride.

Some crime prevention tips to help make driving safer:

1. Don’t travel alone at night when you are low on gas or having car trouble.

2. Keep all doors locked and windows rolled up especially when driving in cities or in unfamiliar areas.

3. Don’t leave valuables such as wrapped packages or cassette tapes in plain sight in a locked car. Lock them in the trunk.

4. Park in lots that offer good security, are well lit and close to your destination. If you must leave a key with a parking attendant, leave only the ignition key.

5. Don’t leave gasoline credit cards or car registration in the glove compartment. Never leave coins and bills in compartments in plain sight. Carry these with you.

6. If your car breaks down, get off the road far enough so you won’t be hit by oncoming traffic. Turn on emergency flashers and tie a handkerchief on the door handle. Lock all doors, raise windows and wait for police or other reliable assistance.

7. Carry two sets of car keys with your at all times in case you accidentally lock one set in the car.

HAVE A SAFE TRIP!!
Children often become restless while traveling in a car. Often they may cry or become noisy which can distract the driver. All children under the age of 4 years must be securely belted in a car seat. Children weighing under 20 pounds must sit facing the rear of the car.

Some tips for safer driving:

1. Teach children that they must be buckled in the car seat at all times. Stop often especially with young infants to feed them and to check for soiled diapers.

2. Provide toys or snacks that the children can enjoy while driving. This can help keep them quiet. Talk or sing to the children while driving. If your car has a cassette tape, use children's stories or songs while driving to help entertain the children.

3. Never leave a child in a car, not even for a minute! Always take the child out of the car when you leave. Children have gotten out of car seats and moved gear shifts or started vehicles which resulted in accidents and injuries. Hot temperatures in closed cars can also cause serious danger.

4. Never attempt to discipline a child while you are driving. If a child misbehaves, pull over and park. Then, deal with the child's problem. Reaching over to stop a quarrel or to replace a lost bottle can result in an accident when your attention is drawn away from driving.

5. If a child refuses to remain in the car seat while driving, do not permit the child to roam free in the car. Serious injuries can result from a sudden stop. Instead, stop the car and try to find out the reason for the child's refusal to remain in the seat.

6. Keep the temperature comfortable, not too hot or too cold when traveling with young children. If they become too hot, remove a coat or hat. Cover vinyl car seats with terry towels to reduce sweating in hot weather. Shade the child from the glaring sun by using blankets or pull down screens in hot weather.

7. Help an older child to choose appropriate toys such as soft stuffed toys or books, etc. to play with while you are driving.

HAVE A SAFE TRIP.
Many men when going shopping place their wallets or checkbooks in their back pockets. Still others place their checkbooks in the top shirt pocket. Parents pushing baby strollers hang pocketbooks and jackets on the stroller handles. These habits can result in the loss of checkbooks, wallets and pocketbooks.

Some hints for safer shopping:

1. Never place a wallet or checkbook in the rear pocket, even if the pocket has a button closing. Wallets and checkbooks should be kept in the inside pocket of a jacket. If a jacket is not worn, carry money or a few checks in the front pants pockets.

2. Carry currency securely held together with a clip in the front pockets. Change should be kept in a small change container. Separate the currency and coins in different pockets to prevent the loss of currency while searching for a coin.

3. If a checkbook must be carried and doesn't fit in existing pockets, try using a large belt pouch that can be slipped onto your belt and secured to your waist.

4. Carry car keys in pockets when possible. This prevents accidentally locking a pocketbook in the car containing the car keys.

5. When bringing young children to the mall, do not let them run unattended. Watch children at all times to prevent accidents and protect the child from suspicious persons. Check before leaving a store to make sure a young child has not picked up merchandise that you have not paid for.

6. Teach children that merchandise must be paid for before using. This includes "sampling" candy from open display cases. Children need to know that using merchandise or eating candy without paying first can be considered shoplifting. Shoplifting is a crime. Parents can be charged also if their children are caught shoplifting.

7. Watch young children riding in a shopping cart or stroller. Do not leave them unattended. A child can stand up and fall or pull items down from a high shelf that can cause injuries.

HAVE A SAFE SHOPPING TRIP!
Many vacations are upset when personal belongings are stolen from cars, motel rooms, or when you arrive home to find your home has been burglarized.

Some hints to reduce the likelihood of theft:

1. Install automatic timers in the bathroom and on another light. Have a clock radio play music in the evening or the morning. Have a trusted friend or relative check your home frequently.

2. Turn down telephone bell or chime to prevent an unanswered telephone from alerting someone that there is no one at home.

3. Do not leave cameras or money in the motel or hotel room unattended. Maids often leave the room doors open and unattended while they make the beds when you are away.

4. Bring only the items you will need on the trip. Lock all cameras, souvenirs and other valuables in the car trunk away from sight.

5. Pick up luggage quickly at airports and bus stops and personalize your luggage to make identification easier. Use stickers or other means to personalize your luggage.

6. Do not bring large amounts of cash to the beach. Never hide wallets in shoes or under towels. Instead, wear a pouch on your waist if you must carry money. Bring a spare car key to prevent locking yourself out of your car.

7. Park car in lighted lots and nearest your room when staying in motels. When stopping late at night in roadside rest areas, always lock the car. Lock your pocketbook in the trunk if you do not want to carry it with you.

HAVE A SAFE VACATION!
#20

**Time Management Worksheet I**

List each short term goal. Then place the goals in the order of importance or priority. If you can tell, write down the amount of time needed to complete goal.

<table>
<thead>
<tr>
<th>Short Term Goals (6 months to one year)</th>
<th>Priority</th>
<th>Amount of Time</th>
</tr>
</thead>

</tr>
</tbody>
</table>

Example: A short term goal would be to learn to drive. You know the class will take 7 months to complete. Three months are required for classroom instruction which meets once per week and three months are required for the on-road training. The remaining one month is to be spent practicing for the driving test.

Order of importance:
1) Classroom instruction  3 months
2) Practice for permit test  2 weeks
3) On the road instruction  3 months
4) Practice for driving test  2 weeks

If you start in June, when can you expect to have your license?
Time Management Worksheet II

Look over your diary and evaluate time spent using the following categories:

Preparing for work: [includes: showers, ironing work clothing, making additional lunches]

Work day: [includes: time spent at the job and transportation to and from work. Also any overtime at job.]

Cleaning house: [includes: vacuuming, dusting, making beds, doing laundry, straightening up rooms by putting things away - dishes, clothing and personal items]

Shopping: [includes: clothing and food shopping for yourself and family]

Child care: [includes: bathing, feeding (if separate from family mealtimes) playtime, dressing and transportation time to and from daycare and school]

Hobbies: [includes: reading, crafts, games, television watching and activities you do for fun, visiting, talking on telephone with friend and relatives.]

Sleeping and Self care: [includes: personal hygiene, exercise, relaxation time, and sleeping. Dressing and repair of personal clothing.]

Other categories: [list the category and amount of time needed. Example: education: classes at vo-tech school. 2 hours]

After putting all the time spent in categories, add up the total time spent in each category.

Go on to Time Management Worksheet III.
Answer the following questions:

1. How much time did you spend in each category?

   Work day                  ________ hours per day or week.
   Cleaning house            ________ hours per day or week.
   Shopping                  ________ hours per day or week.
   Child Care                ________ hours per day or week.
   Hobbies                   ________ hours per day or week.
   Other categories          ________ hours per day or week.
   ________ hours per day or week.

2. In what categories did you spend the most time?

3. Why do you think you spend so much time in that category?

4. List all the things that you do that are time wasters in each category.

5. Are there somethings you could do to better use your time in that category?

6. Set a new schedule for yourself to complete all the responsibilities of your day. Try and stick to it. At the end of one week, review how well you succeeded in staying on schedule. Are there somethings you would change. If so, what are they? If you succeeded in staying on schedule, give yourself a reward. This should be a treat of something you would like to do just for you.
## Child Development

### What ages will your child do some things?

"Ages and Stages of Expected Behavior of A Pre School Child."

The Early Months Birth to 8 months:
Newborns recognize the human face and sound. They can recognize the principal caregiver at about 3 week of age. Smiling and cooing are the beginnings of communication. Anticipated being lifted and moves body to assist. Seeks out adults for play. Sucks on fingers or hands. Places hand up as an object comes close to face to protect self. Reaches for toys. Distinguishes friends from strangers. Puts hand or object in mouth. Begins reaching toward interesting objects. Grasps, releases, regrasps, and releases object again. Lifts head, holds head up. Sits up without support. rolls over. Transfers and manipulates objects with hands. Crawls.

Crawlers and Walkers 8 to 18 months:
Acts upset around strangers. Likes to explore object. Tries to have other people do things for him/her. Interested in other children. Shows attention to adult language. Knows own name. Smiles or plays with self in mirror. Uses Me, You, I. Identifies finger, or nose or foot on request. Sits well in chairs. Pulls self up standing by holding onto furniture. Throws objects. Walks when led. Walks alone. Uses marker on paper. Stoops, trots, can walk backward a few steps.

Toddlers and 2 year Olds 18 months to 3 years:
Begins to recognize others have rights and privileges. Will cooperate. Enjoys small group activities. Says "No" to adult requests. Scribbles with marker or crayon. Walks up and down stairs. Can jump off one step. Stands on one foot. Draws a circle. Handles scissors. Kicks a ball. Explores everything. Uses names of self and others. Capable of self evaluation such as good, bad, pretty, ugly. Aware of feelings of others.

Check List of Problems I Am Having With My Child.

____ Talks back to parents or other adults.
____ Will not do bed on time.
____ Keeps room too messy.
____ Repeatedly hits siblings or other children.
____ Wets the bed.
____ Pouts most of the time.
____ Whines when asked to do things.
____ Eats improperly at the table.
____ Will not do assigned chores.
____ Argues when told to do something.
____ Forgets when told to do something.
____ Lies.
____ Cries when he doesn't get his/her way.
____ Tries to avoid going to school.
____ Plays with matches and sets fires.
____ Teases pets.
____ Does not come home on time.
____ Does not pick up after self.
____ Steals.
____ Will not pay attention when told to do something.
____ Starts fights or arguments with others.
____ Will not play with other children.
____ Always telling others what to do.
____ Makes too much noise.
____ Will not get out of bed on time.
____ Breaks toys and other objects.
#26

My Discipline Practices

Put an X in the blanks that apply to you.

The way I usually discipline my child is:

- [ ] Yell and scream
- [ ] Explain reasons calmly
- [ ] Remove privileges
- [ ] Shame my child
- [ ] Show disapproval
- [ ] Ignore behavior
- [ ] Scold
- [ ] Isolate
- [ ] Spank
- [ ] Let the child suffer the consequences
- [ ] Threaten, but don't follow through on the threats
- [ ] Distract
Assertive Discipline For Parents: An Overview

The following are some brief points about assertive discipline practices.

1. Effective parents:
   - Are in charge.
   - Are the bosses at home; run the house (and back up threats with actions.)
   - Provide discipline when necessary.

2. Effective parents have skills:
   - Clearly state to the children what is wanted.
   - Back up the requests with disciplinary actions if the children do not do as requested.
   - Praise and support positive behavior when children behave as requested.

3. Parents who do not have skills react to children's misbehavior:
   - They are non-assertive. Do not clearly or firmly state what they want. Usually the parents beg, plead, promise rewards, etc., to have the child behave.
   - They are hostile. Respond in a manner that verbally or physically abuses the children by screaming, hitting etc.

4. Children who argue receive the following reactions:
   - Non-assertive parent makes threats rather than giving choices to the child.
   - Assertive parent continually repeats the same request using the "broken record" routine until child does what is requested. Applies rules to situations.

5. What stops some parents from being assertive with children:
   - The child learns to control the parents emotionally by using feelings of guilt, "I don't love you"; confrontation/anger "I don't care."

6. Parent needs to learn to anticipate the problems. He/She should know how a child will react when disciplined. Parent must stand firmly, do not give in to child. Be consistent.

7. Implementing a discipline plan has several steps:
   - Development of the plan. What will happen when certain behaviors occur.
   - Decide what behaviors to change.
   - Choose the disciplinary actions or consequences when certain behaviors occur.
   - Choose positive consequences when desired behaviors occur [praise and positive actions]
   - Share the plan with the child.
   - Follow through consistently. If a particular consequence is planned, it must be administered when the behavior occurs.

8. In dealing with school behavior the parent should express concern and support of child. The parent must work with the school by meeting with the teacher to develop a plan of action that includes what the school will do and what the parent will do when certain behaviors occur.
Using Credit

1. List three sources of credit:
   a) 
   b) 
   c) 

2. Explain in your own words what is interest?

3. What are two factors that affect the cost of using a credit card?
   a) 
   b) 

4. List two advantages to the consumer who uses credit.
   a) 
   b) 

5. List two disadvantages or dangers of using credit.
   a) 
   b) 

6. What does it mean to have a "bad credit rating?" How could a bad credit rating affect you?
The following are the answers to the Using Credit exercise.

1. List three sources of credit.
   a) credit card
   b) bank
   c) store

2. Explain in your own words what is interest.
   Interest is the money you pay for borrowing the money from someone else. It is a fee.

3. What are two factors that affect the cost of using a credit card.
   a) annual fee
   b) interest rate

4. List two advantages to the consumer who uses credit.
   a) taking advantage of sales, or the convenience of buying larger quantities or more expensive items and extending the payments over a longer period of time.
   b) safety of not having to carry cash. Establishing a good credit rating.

5. List two disadvantages or dangers of using credit.
   a) danger of overspending. Risk of not being able to make the payments when due and getting a bad credit rating.
   b) paying too much in interest. Failure to make payments results in having the items taken back or repossessed.

6. What does it mean to have a "bad credit rating?" How could a bad credit rating affect you?

When you do not pay your bills on time, the finance company, store, or other location of credit contacts the credit bureau that maintains a file of how quickly you pay your bills. They place in your file a slow pay or no pay record. This record remains in your file for a period of time. Anytime you try to buy on credit, the seller can contact the credit bureau and find out how quickly you paid your current bills. A bad credit rating could make it difficult for you to get credit in the future.
Apartment Rental Worksheet
Factors To Consider When Choosing A Place To Rent.

1. What is the amount of rent?

2. What is included in the rent?
   - cable television
   - electricity
   - gas
   - heat
   - water
   - other (list)

3. Size of the apartment/house
   - How many bedrooms?
   - What size are the rooms?

4. Amount of security deposit required?
   - Is a lease required also?

5. List number of closets and other storage space.

6. Where are the laundry facilities located?

7. What safety features are included?
   - smoke alarm
   - chain lock
   - fire escape
   - deadbolt locks
   - locks on windows
   - outside lighting

8. Where would you or guests park? Is there a charge to park?

9. Noise from street, neighbors, or other apartments.

10. Is there cross-ventilation or air conditioning available?

11. What furnishings such as drapes or furniture or appliances are included? Check for refrigerator and stove.

12. Location of apartment/house. What distance is it from work, shopping, friends, relatives and other considerations?

13. What are the responsibilities of the tenant?
   - Example: mow lawn; shovel snow off sidewalks/driveway or apply skidproof materials (salt, sand) when icy; trim shrubs, trees; replace outside lights when needed.

14. What size yard is available and can flowers or other plants be planted by tenants?
After the house or apartment is selected, the next area to consider is the starting of utilities. Answer the following questions about the utilities in the selected house or apartment.

1. What utilities are required? Examples are: Electric, gas (bottled or city) oil or kerosene, water, cable television, and telephone.

2. What is the name and address of each of these utilities?

3. Where would you go to start these utilities? Can you start utilities by telephone?

4. Is a security deposit required by any one of the utilities? If so, which utility? How much is the deposit and when is the amount due?

5. Where is the location of the meter or tank for some utilities? Is a key required?

6. When will you be billed? What payment arrangements can you make?

7. What are your choices for the telephone company? (Example: buy a telephone, rent a telephone, or other?)

Used Car Check List

Use the following questions as a check list when selecting a used car to buy.

1. What is the overall condition of the car?
   a) Do you think the car has been well cared for?
   b) Are there noticeable problems, signs of wear, or damage?

2. Describe the condition of the tires. How much tread is left?

3. Is there evidence of previous body work?

4. Do the numbers on the odometer line up properly?

5. Does the mileage indicated match your observations about the car's condition?
   a) Do the brake and accelerator pedal show a lot of wear with very low mileage?
   b) Is the upholstery worn and stained?

6. If the car is being sold by the owner, ask why is it being sold? Did the owner tell you of any repairs required by the car?

7. Did you test drive the car? What things did you notice?

8. Does the car start easily?

9. Do the brakes seem to be good?

10. Is the steering okay?

11. Are there unusual noises? If yes, what are they?

12. Does the car shift properly? If not can you explain?

13. Describe the color and clearness of the transmission fluid.

14. Are the front tires worn evenly? If not, describe the uneven wear.

15. Is there indication of front-end wear [looseness, vibration]

16. If the car is being sold by a dealer, was the previous owner local or was the car bought through an auto auction? Can you tell what the trade-in value of the car might be?

17. What is the book value of the car. Check this out through your local public library or a bank by using books which will give you a range of book values for this particular car.

18. If you are serious about purchasing this car, can you have it checked by a mechanic of your choosing? If so, what does the mechanic say about the condition of the car.

19. Compare the asking price and the book value. How close are the two figures?

20. Ask to see the title. Is a lien-holder listed? If so, is it a local lending institution?
Role Expectations

Use this exercise to further understand your ideas of your role and the limitations that may exist. List as many items as you can in each of the statements. All persons answer 4 and 5.

i. Since I am a woman/man:
   I am required to:

   I am allowed to:

   I am forbidden to:

2. If I were a woman/man:
   I could:

   I would:

   I would not:

3. A part of me wants to:

4. The most important thing in life for a man is:

5. The most important thing in life for a woman is:
Women and Non-Traditional Work

Barriers

Barriers inhibiting entry of women into non-traditional training and employment are complex and inter-related.

Social/Cultural
Socialization to traditional female roles.
Unsupportive family and friends.
Negative attitudes of co-workers.
Lack of self-confidence and assertiveness.
Limited experience with tools and mechanical operations.

Educational and Training
Limited information provided about non-traditional options.
Females directed toward traditional classes.
Lack of support for sex equity efforts by instructors and other personnel.
Lack of prerequisite classes such as math and science.
Limited access to on-the-job training and apprenticeships.
Lack of support services-child care, transportation, counseling, etc.

On The Job
Discrimination in hiring, firing, promotion or layoffs on basis of sex, race, age, physical build/ability.
Sexual harassment on-site
Isolation on the work-site
Lack of support from unions
Lack of support services

Sexual Harassment
Women in non-traditional jobs or training are at great risk of sexual harassment which is:
Unwelcome behaviors which can include teasing, jokes, remarks and questions, deliberate touching, letters, telephone calls, materials of a sexual nature, pressure for sexual favors, sexual assault.

Sexual harassment is against the law. Title VII of the 1964 Civil Rights Act has been interpreted through the Equal Employment Opportunity Commission Guidelines of 1980 as prohibiting sexual harassment.
Employers can be held liable for sexual harassment.
Women can take specific steps when faced with sexual harassment:
Tell the harasser to stop the offensive behavior
Document all incidents of harassment
Notify your supervisor, union representative, or other appropriate person of the harassment
Know your company policy on sexual harassment and follow its procedures
Consider filing a formal grievance or complaint if the above steps do not remedy the situation.
Stay on the job.
Find support from family, friends, or other groups to help you through this situation.
Women and Men in the Paid Work Force.

The work force is changing. More non-traditional jobs are found in various occupations. Non-traditional jobs are defined as those jobs in which 75% or more employed are same sex. This means, a male nurse is in a non-traditional job due to the predominance of women in the nursing field. On the other hand, women truck drivers and women carpenters, or electricians are in non-traditional jobs. What does this mean to you?

If you are a woman, consider these factors:

whether or not you marry or have children, you will probably need to work outside the home for a large percentage of your life in order to support yourself, your children or to contribute additional money to the family income. If you do not choose an occupation and receive training or additional education, you may be limited to low-paying jobs that could have a high lay-off rate.

If you are a man, consider these factors:

if you marry, your wife may also need to work to help support the family. You may need to assist by taking on many of the child care, housework, and cooking responsibilities. Opportunities in job areas traditionally held by women may interest you and fit your needs.

Both men and women should consider these factors:

The traditional ideas of "woman's work" inside the home and "man's work" outside the home (supporting the family) are no longer realistic. Both men and women now work outside the home.

The traditional occupations held by men, or traditionally held by women are changing. Both men and women can do most jobs in the work force if they train and prepare for these jobs.

When considering various job opportunities consider the full range of occupations both those that are traditional for your sex and those that are non-traditional. Careers should be selected based on interests, abilities, and needs rather than sex stereotypes.

Investigate educational programs which can prepare you for careers that interest you. Vocational education programs which are not traditional for your sex may be one way to prepare you for a career.

It is your legal right to receive fair consideration for any job or training program for which you are qualified; and although sex stereotyping and discrimination still exist in the work force and in education programs, you can make a difference and help change this. The law is on your side.

It is your legal right to receive fair consideration for any job or training program for which you are qualified; and although sex stereotyping and discrimination still exist in the work force and in education programs, you can make a difference and help change this. The law is on your side.
Changing Attitudes

Traditionally our workforce has divided jobs into "woman's work and man's work." Women's work was associated with working in the home and rearing the children. When women worked outside the home, the work has traditionally been in sales, teaching, nursing, secretarial and clerical areas. Jobs have been low-paying with little chance for advancement and status, not to be considered a lifetime career but merely "something to get by with."

Currently, many women are single parents and the sole support of several children. Limited child support may be ordered by judges but collecting this amount is often difficult. Increasingly women are looking for better paying jobs that suit their interests and abilities. For a woman to consider non-traditional careers, she must first consider her own attitudes, values and opinion. For the woman who is determined to "make it" in a non-traditional better paying field, a sense of confidence and commitment must be a part of the decision. This may require a change in attitude. Planning for change takes careful consideration.

1) Planning for Change:
What are the things that could interfere with the desire to make changes in our lives?
1) Habits
2) Lack of confidence in ourselves
3) Fear of the unknown
4) Our desire to conform to what is normal.
5) Seeing only what we want to see.
6) Lack of information
7) Lack of motivation
What are some other things you can think of?

2) Positive Motivators for Change:
What are the things that will encourage us to change?
1) Readiness to try something new.
2) Experience
3) Advancement, achievement, awards
4) Money
5) Wanting more out of life
What are some other things you can think of?

3) Negative Motivators for Change:
What are the things that will force us to change?
1) Lack of money and the things money can buy.
2) Boredom, or a dull routine in a job.
3) Lay off from present job with no similar positions available.
What are some other things you can think of?
4) Decision Making About Change:
What steps should you consider when deciding about a change?

1) Identify the problem that may be causing you to consider a change is necessary.
   a) Describe the problem in writing.

2) Define the problem:
   a) what is the present situation?
   b) what situation would you like to see in the future?

3. Make two lists:
   a) the factors that would help you change.
   b) the factors that prevent you from change.

4. Compare the two lists.
   Could any factors that would help you change also overcome some factors that would prevent you from change?
   For example: a factor for change would be a lay off from your company that involved your job. A factor that might prevent you from change is that you expect to be called back in the future.
   a) Decide which is the more important factor to you:
      1) being given the opportunity to find another job that could be a higher salary
      2) waiting to be called back to your old job.

5. Determine the most promising action step you could take:
   a) Is it better to change at this time?
   b) What resources are available to you?
   c) What are the advantages of change
   d) What are the disadvantages of change.

6. Review the information and make your decision. Write down your decision and the reasons why you think it is the correct solution.
Tokenism

Tokenism is the presence of a single outsider in a group of people, the majority of which are all similar to each other but different from the outsider. For example: on a job where there is one woman in a group of all men. The problems arise, not because the person is so different from the rest of the group, but rather because there are greater numbers who are the same and fewer numbers who are different. This creates an imbalance because the newcomer does not share the group's attitude and personality. For example: You like to smoke a cigarette after eating. When you begin your new job, you discover that you are the only smoker in the group. You have some choices: you can stay different from the group by continuing to smoke which may cause some problems; or you can stop smoking and accept the anti-smoking attitude of the group which may make you more acceptable to them.

In any group, the newcomer is subjected to a period of testing to see if he/she will "measure up." The testing period can focus on such things as the newcomer's job skills, personality, or ability to quickly adapt to the rest of the group. The passage of time usually erases the newcomer status of a person in a group. There is however, an exception to that. If the newcomer is a woman entering a male dominated group, she will retain the "outsider" label for longer periods of time. Some women can become more like the men in the group (sharing their knowledge and group customs) and in time the continued contact and increased familiarity can reduce the men's concerns over her being "different."

There are three areas that must be overcome for the token woman:

Visibility: Since she is the only one of her kind, everything she does and says becomes public information. She is seen as representing all women. The men in the group will compare her to other women they may know, sometimes favorably, sometimes unfavorably. Any problems the token woman has are usually blamed on her "being a woman" rather than being a newcomer. She must perform her job perfectly because every mistake will be magnified. Women will adapt to this situation in various ways. Some will do their jobs well, but try to stay invisible and out of sight. Other women may flaunt their performances outperforming male co-workers. An alternative is to concentrate as fully as she can on the job at hand and try to ignore the interpersonal areas.

Contrast: The presence of a woman can cause men to become self-conscious about themselves. Men may display more masculine prowess, aggression, and discuss sports, drinking and sex or other subjects that would exclude the token woman. Language and jokes may be followed by comments such as: "Excuse my "French" or "Careful, we can't say things like that any more." The woman becomes the interrupter, the cause of distraction and the reason to not use certain jokes or language. Women can be forced into demonstrating their loyalty to the male group by turning against other women. This is seen when the men make comments about other women, or play pranks and the token woman is expected to "go along with the treatment" against the other women. Failure to do so will lead to social isolation for the token woman. Some women respond to the contrast problems by becoming like the men: going fishing, going drinking with the guys etc. in order to avoid isolation. This creates isolation for her from other women. An alternative is for her to do the job to the best of her ability and to wait. Over time, the men will become less self-conscious and accept the woman for her job-related skills.
The third area that needs to be overcome by the token woman is:

**Role Distortions:** Characteristics of the woman are distorted to fit into a stereotype or image. There are four basic images in which the token woman may be placed.

1) **Mother type:** She is seen as the person to which to tell your troubles. The women in this role are rewarded for service, but not her work. She must "take care of" the male co-workers but not criticize. She may also be expected to "cover up" mistakes without comment.

2) **Seductress:** She is seen as a flirt, even if she is only being overly friendly. Her attempts at friendship are seen as having sexual overtones which creates jealousy towards her. If she develops a friendship toward one man, she is resented. In some cases a man who has high status in the group or company becomes her "protector" by preventing others from criticizing her work. This creates resentment towards him because people wonder "what favors he is getting." She is resented because she has an unfair advantage due to her friendship with this "protector."

3) **The Pet (or Kid Sister):** She is seen as cute, amusing, funny, a mascot, a cheerleader for the displays of masculine prowess. She is not seen as capable and any accomplishments are usually a cause for much praise and being fussed over. This role encourages immature behavior in the woman and prevents her true competence from being seen.

4) **The Women's Libber or Iron Maiden:** She is seen as not wanting to be cast into any of the first three images. She may insist on being treated as an equal, a tough person, and may be considered "sexless." The woman in this role is viewed with suspicion and is treated with elaborate shows of politeness. Men will be friendly towards her but in fact will isolate her.

In those skilled trades where the male dominance is at its strongest, there are other expressions of tokenism towards woman. The following situations are common:

- She may get the heaviest, dirtiest, most unpleasant, boring or meaningless tasks to do.
- She may not get the instructions or information she needs to do her job properly, with the result that she performs it poorly and is left to face the consequences.
- Her machinery or tools may be sabotaged.
- Impossibly high standards may be set for her as conditions for approval and acceptance or for performance and raises.
- There may be a double standard for penalizing her mistakes.

Some suggestions for women entering a macho trade are as follows:

- Be pleasant but not too friendly.
- Don't go "drinking with the boys" or use vulgar language.
- Aim for the midpoint between sexy and sexless.
- Watch the type of clothing that is worn. It should be neither sexy nor masculine.
- Don't try to overachieve and call attention to yourself, nor hide your abilities.
- Do your job and be patient about becoming accepted as part of the group.
- "Be yourself" and let those around you make an adjustment in their attitudes if needed.
Non-Traditional Job Bias
Questions for Discussion

Have guest speakers discuss how they would answer these questions. Then, decide for yourself how you would answer these comments about a job you really wanted.

1. Why do you want to work in this job?

2. This job really isn't for someone like you because it's dirty, smelly, noisy etc.

3. This job really isn't for someone like you because it's more suited for a woman who can type and answer phones.

4. My customers will complain if they have to have you here.

5. You wouldn't feel right in this job working in a man's/woman's job.
Business Plan Worksheet

Use the following questions as a guide. On a separate sheet of paper answer each question as completely as possible. Review your answers with your instructor or other knowledgeable person.

1. What business do you want to start?
2. Why do you want to start this business?
3. How much experience have you had operating this business?
4. Where will the business be located. What will be the hours?
5. Will this business meet the township zoning requirements?
6. Have you checked with Labor and Industry in Harrisburg to determine what laws you must follow? If so, what must you do?
7. How much money will you need to start this business?
8. Fill out a financial plan for your business. Include: estimated start up expenses, and estimated income.
9. Discuss how you will find customers.
10. What would a typical customer be like? Give age, location, and how and why you know this information.
11. What insurance is needed by your business?
12. What problems could occur, and how would you deal with these problems?
13. Do you have any partners or investors? If so who are they and why are they interested in this business?
14. Could you really make enough money to support yourself using this business?
15. Will you actually start this business?

Acknowledgments

We wish to thank the Pennsylvania Department of Education for funding this project and especially Dr. John Christopher, Ed.D., Director, Bureau of Adult Basic and Literacy Education for his support of our programs.

We also extend gratitude to PDE Special Projects Advisor, Dan Partin, for his technical assistance and guidance. Funding for “Everyday Basic Skills” has allowed us to enhance and develop our programming and delivery of much needed services to our area’s adults.

As always we value the support of the Tuscarora Intermediate Unit Board and our Executive Director, Dr. Dale Heller. The Intermediate Unit continues to recognize our unique contribution to the total organization.

And the staff of the Adult Education Job Training Center for their support and assistance in this project.

Module #7 Life Skills/Parenting
Everyday Basic Skills: Module One "Basic Skills"

Subject Area: Learning How To Learn

1. Setting goals.
   - **ASSESSMENT**: Student will set down two goals: 1 short term and 1 long term
   - **MATERIALS**: Handout: #1: "Types of Goals"
   - **TEACHING STRATEGY & TECHNIQUES**:
     1. Use "Perfect Day" exercise to introduce long and short term goals. Have students write a future perfect day to begin five years from now. Write in story format, beginning when you get up in the morning and continuing all day until bedtime. Include: 1. What will you be doing (at home, at work). 2. Where will you be living. 3. What will your work responsibilities be. 4. The things you will have (training and education?).
     2. Have the students evaluate their "Perfect Day" using the following questions: Do the ideas include: 1. Your own desires of what you want to do. 2. Where you want to live. 3. What your work responsibilities will be. 4. The things you will have (training or education?).
     3. Are the ideas really able to be achieved by you?
     4. Have the students readjust any "Perfect Day" exercise to meet these criteria (#1 and #2).

2. Setting objectives.
   - **ASSESSMENT**: Student will understand that objectives are a step by step guide to a goal.
   - **MATERIALS**: Handouts #2: "Action Steps in Goal Setting" #3: "Planning Action Steps in Goal Setting" #5: "From General to Specific "
   - **TEACHING STRATEGY & TECHNIQUES**:
     1. Use Handout # 5 "From General to Specific."
     2. Have the students place title: "5 Years From Now" on top of paper. Use: One part of the "Perfect Day" exercise: "--what will your work responsibilities be." List: What education or training you will need to accomplish this goal. How long will the education or training take to complete? Discuss: How much time will be needed to complete certain tasks as necessary in planning. 3. Have students break down the training required to accomplish job goals into years or months as needed. Think about what will I need to do each year to achieve my goal of training? Discuss: The number of courses or classes to take and when the courses are to be taken. This is an example of a medium range goal.
     4. Have student look at the first year and decide what needs to be done each month to achieve the planned results for one year. Be aware of how long it will take to realistically complete certain classes. For example: typing classes may take 10 weeks to complete.

</tr>
<tr>
<td></td>
<td>Optional: Handout #5A: &quot;Plan of Action&quot;</td>
</tr>
</tbody>
</table>

#### TEACHING STRATEGY & TECHNIQUES

1. **Using Handout #2 "Action Steps in Goal Setting" and #3 "Planning Action Steps in Goal Setting" to help focus on specific skills required to achieve a certain goal.**

   List these skills and discuss: How do you plan to acquire these skills?

2. **Use Handout #2 "Action Steps in Goal Setting" and #3 "Planning Action Steps in Goal Setting"** to help focus on specific skills required to achieve a certain goal.

   Handout #4: "Rock Race"

   Optional: Handout #4A: "Obituary Exercise"

1. **Take one course (for example: typing) and have student set up a schedule to follow over the semester.**

   Show how each section can be further divided into smaller segments of one week and then each week can be further divided into daily segments. For example: I know that this week I must read a chapter and write answers to questions; How much total time do I need to do this work? I may need 2 hours to read and 2 hours to write the answers to the questions. This means that I need 4 hours to complete this work.

   How many days do I have to complete this task? I have 5 days before the deadline.

   Use the following format:

   - **Goal = Complete the week's assignment in 5 days.**
   - **Time = 4 hours.**
   - **Days I have time to work on homework = 4 days.**
   - **Days divided by hours equals 1 hour per day.**
   - **Have students fill out Handout #4: "Rock Race."**

1. **Learning how to learn requires that goals be set.**

   Use: the list of objectives from Handout #4: "Rock Race" in setting up small steps to achieve goal. Objectives should be set in a time frame in order to keep track of progress.

   Discuss: Goals require different amounts of time to complete. Student must select the type of goal format: long; medium; short; or mini goal that is appropriate for the length of time needed.

   Barriers may prevent completion of goals. There are two types of barriers:

   - a) those capable of being overcome.
   - b) those not capable of being overcome.

   Examples: an overcomeable barrier is not having a car.

   This barrier can be overcome by:

   - a) riding with someone.
   - b) taking the van.
   - c) buying a car.
### Subject Area: Information Gathering - About You

<td>Student will use 2 words to create sentences for memory aids</td>
<td>Handout #8: &quot;C.R.E.A.T.E.&quot;</td>
<td></td>
</tr>
</tbody>
</table>

#### ASSESSMENT

| Student will identify strengths and weaknesses. |
| Student will assess his/her own Style." |
| Student will understand that each person can look at some problem and arrive at different solutions |
| Student will create 1 or 2 rebus figures |
| Student will use 2 words to create sentences for memory aids |

#### MATERIALS

- Handout #6: "Who am I."
- Handout #7: "Problem Solving Style."
- Educational Media Corp.: "Examine Your Perceptions"
- Educational Media Corp.: "Developing A Creative Attitude"
- Handout #8: "C.R.E.A.T.E."

#### TEACHING STRATEGY & TECHNIQUES

1. Have student fill out Handout #6 "Who am I." Discuss: The more we know about ourselves, the better decisions we can make. Encourage students to talk about likes and dislikes as it relates to the questionnaire.

2. Discuss: Individuals attempt to solve problems in different ways. There are 3 problem-solving approaches:
   - A. Open-ended: attempt to see all possible solutions. Also called brain storming.
   - B. Reflective: seek the best possible answer through examination and evaluation of a number of possible alternatives.
   - C. Focused: find answers quickly. (Usually best in situations where decisions must be reached quickly.)

   Reflective problem solving style is recommended for most people in most situations. This approach requires the gathering all available information, sifting through it for alternative solutions then selecting the best solution based on advantages and disadvantages of each.

3. Use "Examine Your Perceptions" Educational Media Corp. materials. Have each student tell what solution they use for the problems. Use answer sheet to discuss additional alternatives for each problem. Stress that there is no one perfect answer, but rather many ways of looking at and solving problems. Therefore, never doubt your solution to situations if you have a differing opinion.

4. Have students try and solve the various rebus figures to see what message is being communicated. Purpose is to help develop an open and creative attitude in students. Communication can be very effective when used in a creative manner. Creating a different way of communicating the same old message can make the difference between getting the message across or being ignored. This is a fun activity to enhance creativity.

5. Ask: Did you enjoy creating new rebus words? If so, perhaps you might want to consider other ways of developing your creativity.

6. Use "Rhyming Couplets" for additional activity.
Everyday Basic Skills: Module One "Basic Skills"

Subject Area: Finding Your Learning Style

SKILL
1. Determining which learning style is appropriate.
2. Recognizing characteristics of different learning styles in others.
3. Using knowledge of learning styles of others to adjust communications with them.

ASSESSMENT
1. Student will know four basic learning styles and understand which style is his/hers.
2. Student will define four learning styles and give examples.
3. Student will discuss the learning style of a selected individual and prepare a short message using the learning style of the person.

MATERIALS
- Handout #9: "How Do You Learn?"
- "Help Yourself: How to Take Advantage of Your Learning Styles."
- Pages 14-16.
- Pages 17-24

TEACHING STRATEGY & TECHNIQUES
1. Use pages 14-16 to determine students' learning style. Or: use Handout #9 "How Do You Learn?"
   Define: meaning of terms by demonstrating the meaning of the following:
   - Visual - show pictures or written material. Do not talk while showing pictures.
   - Auditory - use cassette tapes or items that make a noise. Do not use pictures.
   - Kinesthetic - pass a bag of items around for the students to touch and identify without looking.
   - Multi-sensory - display items such as a wool sweater, tell the students about the color or style, and then pass the item around the class so students can feel the texture.

1. Divide class according to student's strongest learning style. Have visual group write a short paper in reaction to a class assignment. Instruct the auditory group to present an oral report. Allow the kinesthetic group to make a shadow box, a model, or a map of a class assignment.

1. Pair up two or more students who have dissimilar learning styles. Have them discuss between themselves who has which learning style. Then, have them select a person from the class and prepare a 2-3 minute message to this person in the selected person's learning style. This could include: a written message, a verbal message, or a skit. This activity could be done in small group situations, or as a larger class project.
### Everyday Basic Skills: Module One "Basic Skills"

#### Subject Area: Study Skills

<table>
<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Knowing individual study habits.</td>
<td>Student will define 4 of 7 characteristics of studying and identify his/her weaknesses in these characteristics.</td>
<td>Handout #10: &quot;How do you study?&quot;</td>
<td>1. Use Handout #10: &quot;How do you study.&quot; Use handout as a guide to discuss 7 different characteristics of studying: (allow 1 class period per topic or less as needed.)</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Time Usage:</strong> How is time spent? What is the usual amount of time spent studying? The amount of time needed to study depends upon the subject being studied. Math may require more time. Familiar, interesting subjects require less studying time.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Goals:</strong> Student should set goals to accomplish in each study period, for example: read one chapter, or finish the new vocabulary for that chapter. Time should be spent efficiently, with no distractions.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Note Taking:</strong> Students with visual learning style can use paper and pencil. Students with auditory learning style may need to use tape recorder and read lesson aloud to record for review. Discuss the student's learning style and how this could affect note-taking.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Examination preparation:</strong> Careful reading of area to be included on exams is important. Practice writing essay questions ahead of time. Outline the major points that might be covered.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Reading:</strong> Reading for understanding, includes looking up definitions of unfamiliar words, marking words, and marking major points in text. Student should select a well-lighted, comfortable chair with no distractions. Practice remembering what is read by using short paragraphs and recalling the subject of the paragraph.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Organization:</strong> Prepare papers or homework on time. Plan ahead when major project is due. Budgeting of study time is necessary. Review notes before class time, especially in an unfamiliar subject.</td>
</tr>
<tr>
<td>2. Attitude toward study</td>
<td>Student will define what their attitude is towards studying</td>
<td>Contemporary Books: &quot;Ready, Set, Study! Building Your Study Skills.&quot; Pages 4,5.</td>
<td>2. Discussion of study characteristics in class:</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Persistence:</strong> Ask: What does persistence mean? Encourage comments such as: &quot;Keep at the task despite problems; seek help as needed; stay up-to-date on lessons; keep regular study times.&quot;</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td><strong>Concentration:</strong> Keep mind on the subject at hand and keep distractions to minimum. Be well-rested when studying. Do not study while hungry or when rushed for time. Discuss reasons why.</td>
</tr>
</tbody>
</table>

1. Have students assess their attitude towards school work using the section "Organizing your courses." Discuss: "Why are they attending classes?" Discuss: "Why they need to study?" Ask: "What they could do to improve weaknesses in attitude towards courses?" Have students complete exercise on pages 4,5. Discuss their responses to the questions.
3. Learning how you think.

Student will define his/her thinking style.

Handout #11: "How do I think?"

1. Discuss: **convergent thinking**: focused on the here and now.
   - **divergent thinking**: focused on there and then.

   Give examples: convergent = contents of the current newspapers.
   - divergent = history book about the Civil War.

   Define: **Creative thinking** - many ideas logically examined for their use.
   - **Pragmatic thinking** - too few ideas to logically examine for use.
   - **Conservative thinking** - limited number of ideas and unwillingness to use available ideas.
   - **Fantasizing** - produces ideas but lacks focus to put best to use.

Discuss: How a combination of these ways of thinking could help in thinking. Combining different types of thinking can be useful in problem solving. Demonstrate how to combine different ways of thinking.
### Subject Area: Building Memory Skills

<table>
<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Determining individual short term memory problems using a checklist.</td>
<td>Student will select the areas which are a problem for him/her.</td>
<td>&quot;Help Yourself: How to Take Advantage of Your Learning Styles.&quot; Page 51.</td>
<td>1. Concentrate on deficient areas shown in the software test. Have students discuss how they would use the suggestions given in the software to improve their memory skills.</td>
</tr>
<tr>
<td>2. Improving memory acronyms.</td>
<td>Student will explain meaning of each letter in AIOP and how it relates to memory.</td>
<td></td>
<td>1. Present the acronym AIOP and define the meaning as follows: A = Attention paid to information being given, I = Interested in the subject, O = Organize the information, P = Practice memory skills.</td>
</tr>
<tr>
<td>3. Using memory words.</td>
<td>Student will remember an entire sentence on presentation of memory word.</td>
<td>Page 60.</td>
<td>1. Discuss using a memory word to help memorize a list. Use the example of a memory word: HOMES to remember the names of the Great Lakes: Huron, Ontario, Michigan, Erie, Superior. Have students develop some memory words for things they want to remember.</td>
</tr>
<tr>
<td>4. Practicing discovery method for information acquisition.</td>
<td>Student will remember facts about a subject of interest.</td>
<td>Page 56-57.</td>
<td>1. Discuss: the principle of discovery as a memory aid. Use a career area or subject of interest to the student. Demonstrate how the student will remember many details in subject areas of interest. Use the example of sports minded persons who will remember statistics about their favorite sports teams.</td>
</tr>
<tr>
<td>5. Remembering technical vocabulary and complex relationships.</td>
<td>Student will use visual, auditory and olfactory senses to write a humorous story.</td>
<td>Page 58. Handout #11: &quot;My Morning&quot;</td>
<td>1. Have students think about what they did that morning to get ready to come to class. Ask them to write down or verbally give a step-by-step description. Prepare a humorous description of how your day began. Give an example of the type of step-by-step description. Prepare a description or use Handout #11 &quot;My Morning&quot; as example.</td>
</tr>
<tr>
<td>6. Use principle of organization as a tool to draw mind maps in order to form associations between information.</td>
<td>Student will recall 80% of information using a mind map.</td>
<td></td>
<td>1. Have students draw a mind map from a chapter they need to read and study for class. 2. Discuss: the use of organization to help remember certain numbers. Use the example of the organization of telephone numbers to remember 10 numbers. [3 digits = area code; 3 digits = local exchange; 4 digits = individual telephone] This is the principle of association. We are accustomed to seeing the telephone numbers in these individual groupings.</td>
</tr>
</tbody>
</table>
### Subject Area: Test Taking

#### SKILL

<table>
<thead>
<tr>
<th>Skill Description</th>
<th>Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Understanding concept of how to prepare for a test.</td>
<td>Student will list 3 things to do in preparation for a test.</td>
</tr>
<tr>
<td>2. Reading directions.</td>
<td>Student will know 3 things necessary before taking the test.</td>
</tr>
<tr>
<td>3. Looking for &quot;clue&quot; words in true/false questions.</td>
<td>Student will list several &quot;clue&quot; words which are often used in true/false tests.</td>
</tr>
<tr>
<td>4. Answering multiple choice questions.</td>
<td>Student will define &quot;all of above&quot; and &quot;none of the above&quot; as used in multiple choice tests.</td>
</tr>
<tr>
<td>5. Answering fill in the blank questions.</td>
<td>Student will demonstrate appropriate answers to the fill in the blank questions using subject-verb agreement.</td>
</tr>
</tbody>
</table>

#### TEACHING STRATEGY & TECHNIQUES

1. Discuss with class:
   - A. What do you think about just before a test-taking session?
   - B. Why should the subject of the test be studied or reviewed before the test?
   - C. Why is the time to take the test always fixed. For example: 1/2 hour or 1 hour for everyone and the test starts at a certain hour, such as 9:00 a.m.

2. Practice reading test directions on sample tests. Point out the following information:
   - A. What kind of test is it? (true/false; fill in blanks; short answer; essay.)
   - B. Where should the student's name be written?
   - C. What should you use a pencil or a pen to write the answers?
   - D. Where are the answers to be written?
   - E. How much time is allowed to complete the test?

3. Discuss: The importance of looking for "clue" words. Practice circling the clue words on the test samples. Show various ways of marking answers to true and false questions. For example: circle word; place a T or F in space indicated; or writing true or false in space indicated.

4. Discuss: Answering multiple choice questions. Select the best answer by eliminating the incorrect answers using careful reading. Practice selecting the best answer as a group and discuss why one answer is the best choice. Give examples of "all of the above" and "none of the above" as choices.

5. Discuss: Carefully reading and thinking about what is being asked in the question.

6. Demonstrate subject-verb agreement and rereading of the question after the answer blank has been filled in.

7. Use practice tests to reinforce learning how to answer various types of test questions.
## Everyday Basic Skills: Module One "Basic Skills"

<table>
<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
</table>
| 1. Following one-step directions. | Student will give examples of one-step directions. | Contemporary Books: "Communication Skills That Work" Book #2. Pages 33-36. | 1. Discuss: One-step directions have 3 forms as follows:  
A) Tell you something.  
B) Tell you not to do something.  
C) Warn you.  
Use examples of road signs or other signs around the building. |
| 2. Following multiple-step directions and understanding numerical sequence. | Student will correctly assemble a project by following multiple-step directions. | Origami project paper: sufficient amount for each student. Directions for paper folding project to be read aloud by instructor. | 1. Discuss the 6 rules for multiple-step directions:  
1. Read directions.  
2. Analyze each step.  
4. Ask questions.  
5. Do the steps in correct order.  
6. Check your work.  
2. Use a simple craft kit to analyze how step-by-step directions are necessary. Origami projects are ideal. |
| 3. Understanding the concept of first, middle, and last. | Student will correctly fill out forms requesting various sequencing of information. | Various forms should be selected for various information in first, middle, and last, sequencing. | 1. Have students fill out forms using different sequencing of name or other information such as: telephone numbers and birth dates. Discuss reasons why various sequencing may be required. Examples are: Last name first may be required by a filing procedure that alphabetizes by the last names. Zip Code first is required because records are kept numerically by zip code for mailing purposes. Year of birth first, then all in numbers for month and date: Files are ordered by age and only numbers are recognizable by the computer program. |
| 4. Using visual and written examples to demonstrate directions. | Student will give written and oral directions to a location. | Contemporary Books: "Communication Skills That Work." Book #2. Page 39. | 1. Have students draw a map to their home or other location.  
2. Have students give directions verbally to complete a project or to operate a computer program. Discuss how the person giving the directions must imagine how long it will take to complete the step and wait enough time for the first step to be completed in order to prevent confusion. Speaking clearly is important. |
### Subject Area: Number Skills

<table>
<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
</table>
| 1. Reading, writing numbers as dollars and cents. | Student will read, write numbers and write numbers as dollars and cents. | Contemporary Books: "Math Skills that Work" Book #1. Page 8. | 1. Ask how many students in class have a checking account?  
2. Ask how do you write a check? Have a student verbally give directions on how to fill in the blanks on a check while the class follows the directions. Do one or two practice checks using large numbers such as $1,927, or amounts less than one dollar. Amounts less than $1 are written "only twenty three cents" and "only 23/100" in numerals. |
| 2. Comparing numbers.             | Student will file 5 folders in numerical order.                            | Page 10, 11, 12-15.                                                      | 1. Page 10 and 11 of the Contemporary Books series are to be used as practice pages. Have students pretend they are working in an office.  
2. Use pages 12-13 to practice filing in numerical order.  
3. Have students pretend they are working for United Parcel Service and they must find certain addresses to deliver packages. Use pages 14 and 15 for simulation. |
| 3. Rounding off numbers.           | Student will round off numbers to nearest ten, hundred and thousand.      | Page 20-22. Additional practice: Page 49. (optional)                      | 1. Explain that rounding off numbers can be used in estimating. Demonstrate the technique of rounding up to nearest ten, nearest hundred, and nearest thousand. Demonstrate the same categories in rounding down. Have students practice using page 22.  
2. Have students pretend they are shopping at the supermarket. If students are seated in rows, have students in row 1 take items 1 to 4 and ask them to estimate how much money they would need at the checkout counter if they bought 2, 3, or all 4 items. Say: "You bought the shave cream and coffee cup, estimate how much money would you need?" Then change the items to: ground beef and scissors and continue as before. Have the students in row 2 (or some other means of selection) use items 5 to 8. Tell the students they are shopping for Christmas presents (or wedding presents, or other occasion). Estimate the amount of money needed to buy 3 or more items.  
3. Page 49 can be used for additional practice on estimating. This is an optional exercise. |
| 4. Reading tables.                | Student will find information using a table.                              | Contemporary Books: "Math Skills that Work" Book #1. Page 42.             | 1. Have students read top of page 42, nutritional information for selected fast foods. Have students pretend they are on a diet and need to reduce calories. Use the practice questions on page 42 and find the lowest calories, highest calories, the most protein, and the food with the most fat. |

**Subject Area: Number Skills**

**MATERIALS**
- Nutritional charts, panty hose, packages showing size charts, or mail order catalogues.

**TEACHING STRATEGY & TECHNIQUES**

1. Read top of page 54. Have students pretend they work at Jerry's Restaurant and must write up sales tickets, and check the amount of money given to them. Use practice examples on page 54 and 55. Develop additional examples if needed.
2. Page 56. Have students imagine they are working at Sears or J.C. Penny taking catalogue orders. Have them fill out catalogue blanks (or use the example in books). Use clothing sizes determined in previous exercise to fill out order form. Or develop new examples to fit the order blank. Include tax from sales tax tables. Total the price figures.
3. Read Page 70. Define: **Gross Pay** - the amount earned. **Net Pay** - amount of pay check (take home pay). **Deductions** - amounts withheld from paycheck by employer. Define types of deductions: **Federal** - an amount withheld for the federal (U.S. Government) taxes. **State** - an amount withheld for state taxes. **FICA** - (Federal Insurance Contributions Act) - an amount withheld for social security. **Medical** - employee's share of medical insurance. **Union** - (only if employee belongs to a union) - employees contributions to a labor union. **Local** - an amount withheld for township taxes. Use page 71 to answer questions about the illustration of a paycheck.
<table>
<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
</table>
| 6.Subtracting dollars and cents. | Student will correctly check the subtraction on a pay stub. | Contemporary Books: "Math Skills That Work." Book #1. Pages 70-71. | 2. Prepare sample paychecks and include mistakes in the paychecks. Have students define the deduction terms on the paycheck. Answer the following questions:  
1. What is the hourly wage?  
2. What is the gross pay amount?  
3. What is the net pay amount?  
4. Are there any mistakes?  
5. How can you calculate the gross pay if you know the net pay and total deductions? |
| 7.Counting change. | Student will calculate change for purchases when bills of varying amounts are given. | Contemporary Books: "Math Skills That Work." Book #1. Pages 82-85. | 3. Interpreting a charge-card statement:  
Define: Statement - the summary of charges, payments, and new balance.  
Have students compute the sum of the previous balances, new purchases, finance charges to obtain the total new balance.  
Have students compute: the sum of payments and credits. Subtract this figure from the previous balance to obtain the total new balance. A credit could be returned items.  
What is the credit limit on the charge-card statement?  
How much can be charged on the card at this time? |
| | | OR: Charge-card statement. | 1. Read top of page 82. Have students pretend they work for K-Mart as a cashier. Using the examples given, have them make change for a $7.49 item from a $20 bill. Give the answer in coins and bills. Have student make change for a $3.49 item from a $10 bill. Have student make change for items totaling $8.88 + $4.29 from a $20 bill.  
2. Demonstrate how to count backwards to make change:  
a) $6.89 item from a $10 bill:  
Say: "$6.89 + one penny equals $6.90 + a dime equals $7.00, + 3 one-dollar bills makes $10.00." Have students practice making change for various amounts.  
Stress that even though cash registers calculate change, it is important to count backwards from the amount of sale to the amount of money given to you by the customer. This will permit you to check that the correct amount of money received was entered in the register. |
Subject Area: Number Skills

8. Balancing a checkbook using addition and subtraction.

ASSESSMENT
Student will balance a checkbook.

TEACHING STRATEGY & TECHNIQUES
1. Have students complete exercise by subtracting each check from the balance and record the answers. Add the deposits as required.
2. Demonstrate how to check the math by adding all checks together, and subtract from the beginning balance, adding deposits together and adding to the beginning balance.

9. Multiplication - two and three digits by one digit.

ASSESSMENT
Student will correctly multiply 3 digit numbers.

TEACHING STRATEGY & TECHNIQUES
1. Use a menu from a local restaurant. Have the students pretend that they work as cashiers for a fast food restaurant. Give sample orders of multiple items. Have students calculate the per item total, and the total of the bill. Look up the sales tax amount from the tax table and add to the total bill. Have students make change from an amount of money.

10. Finding discounts using multiplication and subtraction.

ASSESSMENT
Student will correctly compute discounts and determine the best buy from among 3 items.

TEACHING STRATEGY & TECHNIQUES
1. Set up display of 3 suggested items. Place the prices in front of each item: "Al's Motor Oil - $1.18 per quart, $1.25 discount per case"; "Fred's Motor Oil - $1.09 per quart, (no case discount)"; "Delux Motor Oil - $1.14 per quart, Buy 11, get one free!" Have students calculate the lowest cost and decide which is the best bargain.

11. Extending unit prices on orders and totals.

ASSESSMENT
Student will correctly complete a purchase order.

TEACHING STRATEGY & TECHNIQUES
1. Have students pretend they are stock supervisors at a Kitchen Supply Store. One of their responsibilities is to order items for the store as the shelf supplies run low. Read the practice exercise and complete the math required. Calculators may be used if permitted. Do items 9 and all of item 10.

12. Counting money, by grouping like bills and coins, and multiplying to find total.

ASSESSMENT
Student will correctly count money containing a combination of bills and coins in various amounts, and calculate total amount of money.

TEACHING STRATEGY & TECHNIQUES
1. Have students pretend that they are working in a store office and one of their duties is to count the cash receipts for the bank deposits. Using combinations of bills and coins with multiple amounts of each coin and bills, total the amount of money. Instructor may consider using play money to enhance the realism. Demonstrate sorting by denomination, counting each item in the denomination and multiplying the number of items by the value of the coin or bill.
**SKILL**

   (continued)

13. Division of multiple digits by single digit.

14. Division of multiple digits by multiple digits.

15. Estimate using subtraction and division of whole numbers.

**ASSESSMENT**

   (as given previously)

13. Division of multiple digits by single digit.
   Student will correctly find a unit price.

14. Division of multiple digits by multiple digits.
   Student will correctly calculate 3 division problems.

15. Estimate using subtraction and division of whole numbers.
   Student will correctly calculate gas mileage using odometer readings and gasoline usage.

**MATERIALS: Number Skills**

Pages 124-125.
Option: Pages 126-127
Page 147.
Page 149 or grocery ads from a newspaper.
Pages 154-155.
Page 159.
Optional: Pages 162-163.

**TEACHING STRATEGY & TECHNIQUES**

1. Have students pretend they are running a fast food restaurant like McDonalds or Hardees Say: "In order to be competitive, you must keep your prices low. To make a profit, you must sell lots of sandwiches and not have too many employees."
   Instructor can use example in book; or develop a 7-day list of total sandwiches sold each day (A) and the number of employees working that day (B), which should vary across the week.
   Have students calculate the number of sandwiches sold per employee (C).
   Use the following problem statement: (A) divided by (B) equals (C).

2. Have students complete a form which lists the following information:
   number    total
   $1 _______  $_____
   $5 _______  $_____
   Complete this format for each denomination of bill and coin.

3. Complete the exercises for additional practice of cash receipts deposits.
   Optional exercise if needed.

4. Have student find the unit price of items at a grocery store. For example:
   If 6 ounces of olives = $2.34; what is the price per ounce?
   If ads from several stores are available for use, try and find similar items (examples: soup, vegetables, fruit juice, etc.) Calculate the unit prices for each item.
   Ask students which items are the best buy if comparing similar items from several stores.

5. Have students pretend they are bookkeepers in an office supply store.
   They are to calculate the amount of supplies on hand to determine (A) the average monthly sales; (B) determine the estimated supply remaining in months (C) The problem statement is: (A) divided by (B) equals (C).
   Determine whether or not to order additional supplies. Complete Page 155 if using the workbook.

6. As an employee of a delivery company, the student must keep track of the gas mileage of each of the company's vehicles. Use (A) before and (B) after odometer readings to calculate (C) monthly miles. (B) minus (A) equals (C) Then use monthly gas use of that vehicle (D) and monthly miles traveled (C) to calculate gas mileage (E). (C) divided by (D) equals (E).
   1. Use for additional practice if needed.
Subject Area: Number Skills

MATERIALS
Page 169.
OR: bus, train schedule.
Pages 12-13.
Extra Practice: Page 11.

TEACHING STRATEGY & TECHNIQUES
1. Use a bus or train schedule. Calculate how much time it takes to go from the first stop to the last stop. Demonstrate how to subtract hours to determine elapsed time.
   Ask: how long does it take to go from stop 1 to stop 3. Tell students that the train or bus will be delayed for 45 minutes. What time will the train or bus arrive at the 6th stop.

   1. Ask student how could they estimate how much their gross salary will be if they know their hourly pay rate and the number of hours worked? Demonstrate how to count hours worked, taking into consideration unpaid lunch breaks.
   2. Add the Total number of hours worked using the following format:

      Day of Week | Hours | Minutes
      Monday     | 7     | 25

   Write down each day worked. Then add total number of minutes. Add total number of hours. Demonstrate dividing minutes by 60. Add additional hours to the original hours, and keep the remaining minutes that are less than 60 minutes. Instructor: Make sure the remainder of minutes is 30 (for easier calculation.)
   3. Calculate gross pay using total number of hours worked multiplied by the hourly wage rate.

   1. Use a calendar to count the days worked.
   A) When it is 5:00 P.M. in Los Angeles, what time is it in Hawaii?
   B) When the sun is coming up at 6:00 a.m. in Portland, Oregon, what time is it in Chicago?
   C) If Beth places a call at 1:45 P.M., Dallas, Texas time, to her brother in Miami, Florida what time is it in Florida?
   D) Barbara flew from Seattle, Washington to Boston, Massachusetts. The flight took 6 hours. She left at 9:30 A.M. What time did she arrive in Massachusetts?

   1. Review page 12: "How to reduce fractions to lowest terms by dividing numerator and denominator by largest whole number that evenly divides into each number."
   2. Have student pretend that they work in a hardware store. A shipment of screws arrives from the manufacturing company and must be sorted into 7 bins on the sales floor.
   The bins are labeled: #1 1/8 inch; #2 1/4 inch; #3 3/8 inch, #4 1/2 inch; #5 5/8 inch; #6 3/4 inch; #7 7/8 inch. The manufacturing company gave all the assorted sizes of screws only in 32nds of an inch. These are the screws that arrived: 16/32; 12/32; 4/32; 28/32; 24/32; 8/32; 20/32. Reduce the fractions to lowest terms and sort the screws to bins 1 to 7.

   1. Use for additional practice on simplifying fractions using other examples of sorting screws in the hardware store.
Subject Area: Number Skills

TEACHING STRATEGY & TECHNIQUES
1. Explain: there is no one way to solve work problems. Demonstrate how to separate the multi-step problems into individual problems. Use examples on top of page 27.

2. Discuss: Using "Follow the steps format" to help in problem solving.
   Step 1 asks: What does the problem ask you to find?
   Step 2 asks: What information is needed to solve the problem?
   Step 3 asks: Find the correct expression.
   Step 4 asks: Find the correct solution.

3. Have students read page 32 as an introduction to decimals in the workplace. Demonstrate rounding up with a digit more than 5, and rounding down for digits less than 5 in the tenths place.

4. Use page 35 as a practice exercise for rounding numbers. Explain how rounding a number can be used as an estimating tool.

5. Have students pretend that they work in a machine shop. Demonstrate estimating using leading digits (the first non-zero digit to the right of the decimal point.)

6. Have students pretend that they work as laboratory assistants in a horticulture research laboratory. The growth of the seed samples must be calculated as average growth per month. Use the chart on page 58 and calculate the average monthly growth rate for the 6 seedling samples.

7. Students are quality-control supervisors at a local manufacturing company. A record is kept of the number of defective toys produced by six shifts of employees, both part-time and full-time. Students will need to determine the number of defects per hour per shift. Divide the number of products produced by the number of hours on the shift to obtain the amount of defects per hour. Compare full-time and part-time shifts.
Subject Area: Number Skills

TEACHING STRATEGY & TECHNIQUES

1. Students are preparing to drill holes to run speaker wires for stereo units in their car. The student must select the correct size drill bit to fit the wire size. The wire sizes are given in decimal sizes. Convert the drill bit sizes to decimals. The speaker wire is 0.18 inch diameter. Ask students which drill bit will drill a hole slightly larger so that the wire will pass through?

2. Students are working as health technicians in a hospital. Part of their job requires that temperatures of the patients be recorded every hour. They use a clinical thermometer. The hospital has both Fahrenheit and Celsius scale thermometers. Show the difference between each type of scale. Have students do practice problems B and C on page 48-49.

2. Students work in the meat department of a local supermarket. Customers can order meats and cheeses by the fractions of a pound. (Examples: 1/2 pound, 3/4 pound) The scale is digital. Have the students make a chart to hang by the scale to convert fractions of a pound to the decimal equivalents. Practice weighing items and convert to fractions by looking at the chart.

1. Use the formula: Distance (D) equals Rate (R) times Time (T). (D=R X T) Explain: Distance is the miles. Rate is the miles per hour. Time is the hours. following problem:
   Have students complete the following problem:
   A) How far can a car travel in 5 hours and 30 minutes if the car averages 45 miles per hour? Rate (45 miles per hours) times Time (5.5 hours) equals 247.50 or 247 1/2 miles. Have students complete the rest of the practice problems.

1. The student is working in a factory. The boss tells him to place 30 boxes of books on the pallets. If the boxes weigh 20 1/2 pounds and each pallet can hold the weight of 400 pounds, how many pallets will be needed. (20 1/2 times 20 equals 410 pounds.) Therefore 19 boxes must be on one pallet and 11 boxes on the second pallet. Have students complete the practice problems.

</tr>
</tbody>
</table>

**Subject Area: Number Skills**
Subject Area: Number Skills

SKILL
30. Dividing mixed numbers.
ASSESSMENT
Student will correctly choose a common denominator and correctly calculate 3 of 5 problems.

MATERIALS

TEACHING STRATEGY & TECHNIQUES
1. Have student pretend that they work in a fabric shop. A customer with three children comes into the shop. She buys several large pieces of material. If the children wear size 2, size 6 and size 12, how many dresses, skirts, or blouses can they make from the large pieces of material that were on sale?

31. Changing percentages to fractions.
ASSESSMENT
Student will correctly place percent over 100 and reduce fraction to lowest terms.

MATERIALS
Page 118 (bottom)

TEACHING STRATEGY & TECHNIQUES
2. Use problems on top of page 105 to review skills in multiplication of mixed number skills.

32. Recognizing English and metric units.
ASSESSMENT
Student will correctly measure 5 items using English and metric units.

MATERIALS
Pages 144-145.

TEACHING STRATEGY & TECHNIQUES
1. Demonstrate English ruler with each inch divided into sixteenth inches, eighth inches, quarter inches, half inches. Have student measure various objects.

33. Weighing on a market scale using pounds, ounces, kilograms, and grams.
ASSESSMENT
Student will correctly weigh 5 items in pounds, ounces, and kilograms, grams.

MATERIALS
Page 149-151.

TEACHING STRATEGY & TECHNIQUES
1. Demonstrate a pound scale, and a kilogram scale. Demonstrate an ounce and gram scale. Or use the charts in the workbook.
Subject Area: Number Skills

34. Calculating area.

ASSESSMENT
Student correctly calculate the area of a room.

MATERIALS
Contemporary Books: "Math Skills That Work"
OR: teacher prepared materials.

TEACHING STRATEGY & TECHNIQUES
1. Have students measure a room and calculate the area. Use formula: area equals length times width. The answer is expressed in square feet.
2. Demonstrate how to change to square yards by dividing by 3. This is the measurement that would be used in purchasing rugs.

35. Calculating volume.

ASSESSMENT
Student will correctly calculate the volume of an item.

MATERIALS
Page 158.
OR: teacher prepared materials.

TEACHING STRATEGY & TECHNIQUES
1. Define: volume as a measure of space. To find the volume of a rectangular solid, multiply the length, by the width, and multiply that answer by the height. (Length times width times height.)

Have students pretend the company is building flower boxes for the front of the office building where they work. The carpenter shop has built and installed 4 boxes in front of the building. The boss requested that soil be ordered for the new flower boxes. Telephoning a store reveals that soil is sold by the cubic yard. Therefore, an estimate of the total number of cubic yards of top soil is needed. The boxes measure 6 feet wide and 9 feet long and 3 feet 2 inches deep on the inside.

If the soil will be 2 inches below the top of the box, how many cubic yards of soil are needed?

Volume equals length times width times depth. Using the following steps calculate the amount of cubic yards needed.

1. Convert feet to yards. 1 yard equals 3 feet.
   Width of 6 feet equals 2 yards. Length of 9 feet equals 3 yards.
   Subtract 2 inches from the depth before converting to yards. Depth of 3 feet 2 inches, less 2 inches equals 1 yard.

   Volume equals length of 3 yards times width of 2 yards times depth of 1 yard which equals 12 cubic yards of soil per flower box. There are 4 flower boxes, therefore 48 cubic yards of soil are needed.
**Subject Area: Using a Calculator**

### MATERIALS

- A calculator.

### TEACHING STRATEGY & TECHNIQUES

1. Discuss: Calculators are essential math tools. Use of calculators can reduce math errors. Ask: who has a calculator and do you know how to use it? Do you use a calculator frequently? Many occupations require the knowledge and use of calculators. Which occupations do you think may require the use of a calculator?

2. Use chart on page 30 to define the various keys on the calculators. Have students practice keying in numbers using decimal keys. Point out that a calculator does not have a comma (,) key or dollar sign ($) key. Demonstrate how some calculators may round off the zeroes after the decimal point.

3. Use practice section on page 31. Practice adding, subtracting, multiplying, and dividing one, two, and three digit numbers with no decimals.

4. Review the decimal place values on page 38. Practice rounding off the digits to a chosen place value on page 39.

5. Demonstrate subtraction of decimal numbers and rounding off the digits to a chosen place value. Ask students to imagine themselves as employees of a steel mill and complete the problems on hours.

6. Demonstrate multiplying two or more decimal numbers.

7. Demonstrate dividing two or more decimal numbers. Explain that the calculator carries out the division until there is no remainder or until the display is full. Define: **Terminating decimal** - has a limited number of decimal digits. **Repeating decimal** - has a never ending, repeating pattern or one or more digits.
Subject Area: Using a Calculator

**SKILL**

6. Dividing a larger whole number into a smaller whole number.

**ASSESSMENT**

Student will correctly change 3 fractions to decimals.

**MATERIALS**

Contemporary Books: "Math Skills That Work"
OR: a set of drill bits with fractional sizes marked.

**TEACHING STRATEGY & TECHNIQUES**

1. Have students pretend that they are employees in a factory. As part of their job they must select the correct drill bit to drill holes of a specified decimal size. They must change the drill bit sizes in their drill bit cases to decimals so it will be easier to select the drill bits. Use the drill bit sizes as marked on the drill bits and have students develop a table to show the decimal equivalents of each drill bit.

7. Dividing by a decimal.

**ASSESSMENT**

Student will correctly set up the problem for division on paper, moving the decimal point in the divisor and then move the decimal point in the dividend and solve problem.

**MATERIALS**

A calculator.
Page 66.

**TEACHING STRATEGY & TECHNIQUES**

1. The student is working as a clerk in a rental car agency. A customer comes in and asks to rent a car that gets the best mileage. Use the example given to figure out the number of miles traveled. Divide: the miles driven by the gallons used to determine miles per gallon. Use the first problem in the practice section and calculate the gas mileage on this car. If the customer requests that the gas mileage must be at least 24.9 miles per gallon, as an average, would you recommend this car to him?

8. Multiplication and division of mixed numbers.

**ASSESSMENT**

Student will correctly solve 3 of 7 practice problems.

**MATERIALS**

A calculator.
Page 76-77

**TEACHING STRATEGY & TECHNIQUES**

1. The student works as a clerk in a rental car agency. A customer comes in and asks to rent a car that gets the best mileage. Use the example given to figure out the number of miles traveled. Divide: the miles driven by the gallons used to determine miles per gallon. Use the first problem in the practice section and calculate the gas mileage on this car. If the customer requests that the gas mileage must be at least 24.9 miles per gallon, as an average, would you recommend this car to him?

9. Adding, and subtracting, mixed numbers.

**ASSESSMENT**

Student will correctly determine the common denominator for each problem and calculate the answer.

**MATERIALS**

Page 85.

**TEACHING STRATEGY & TECHNIQUES**

1. The student is building a bookcase. Answer the questions 1 to 6 which require calculation with fractions. Instructor may substitute other building projects as desired.
**SKILL**

10. Finding percentages using division and multiplication.

**ASSESSMENT**

Student will understand the percent circle and use it to determine whether to multiply or divide.

**MATERIALS**

Pages 109, 110.

Handout #1 "The Percent Circle"

**TEACHING STRATEGY & TECHNIQUES**

PERCENT CIRCLE

P stands for part. The part is the number you get when you take a percent of the whole.
W stands for whole. The whole is the number of which you take a part.
% stands for percentage. The % tells you how much of the whole you are taking.
Division line means divided by.

To use the percent circle, cover the symbol of the number you are trying to find.

Example: If 25% of your $800 paycheck is used to pay rent, how much is your rent?

You are looking to find a part of the paycheck. Cover the P on the top. The formula % X W remains uncovered. This is the method used to solve what is 25% of $800.

1. Have students work through problems on the three pages until they are comfortable using the percent circle technique to find the formula and demonstrate knowledge of calculator usage.

Page 115.

1. Have student pretend they are payroll clerks at a local company. Have them calculate the net salary after deductions. Use the 5 types of deductions for taxes, insurance and social security and determine the amount of each deduction. Then find the net salary amount.
<table>

<td>Student will correctly calculate simple interest.</td>
<td>Pages 130 - 133.</td>
<td></td>
</tr>
</tbody>
</table>

**Subject Area: Using a Calculator**

**TEACHING STRATEGY & TECHNIQUES**

1. Demonstrate on the calculator the following:
   - Pennsylvania State Sales tax is 6%. What is the total price of a toaster that sells for $32.50 after the sales tax is included?
   - Identify the formula using the percent circle. Formula is: % times W. Add 32.50 plus key; 6 key; and % key. (Note: some calculators require pressing the = (equals) key also.

1. Have students complete problems on both pages. Discuss the step-by-step approach: what are they trying to find: the whole, the part, or the percent. Then solve the problems.

1. Define: Interest (I) equals Principle (P) Times Rate (R) Times Time (T) and is expressed in dollars. Principal is expressed in dollar amounts. Rate is expressed as a percent. Time is expressed in years.
   - Define: Interest if the amount paid on the principal or received on the principal.
   - Principal is the amount of money borrowed.
   - 2. Work through the practice exercise on page 131. The top of the page covers interest earned.
   - The bottom of page 131 covers interest paid.
   - 3. Do the exercises on page 133. Have the students pretend they are working as a bank loan teller; and next as a furniture store finance clerk.

1. Define: finance charges as the amount of money the company charges for the use of their money. The charge can include interest fees and a service fee.
   - Have the student calculate the finance charge as a percent of the total account balance. Demonstrate how this finance charge actually increases the price on the items purchased using this example: You purchase a winter coat on sale, the total sale is $200. You do not pay off the total of $200 and so a finance charge is added. The finance charge is 1.5% per month. What is the amount added to your account in 30 days? What is the annual percentage rate (APR)? To calculate the APR, change the 1.5% to .015. Then multiply .015 times $200. The answer is $3.00. If you pay the minimum payment of $10 the first month, what is the finance charge? What is the new balance? How much money is really paid on the principal?
   - [$200 plus 1.5% finance charge of $3.00 equals $203 minus $10 payment equals $192. The payment actually reduces the principal by only $7.]
Subject Area: Listening

TEACHING STRATEGY & TECHNIQUES

1. Complete Handout #4: "The Self-Evaluation of Listening." Students will review their own strengths and weaknesses later. Discuss the guidelines for active listening. Use handout #1: "Guidelines for Active Listening." Demonstrate how to use the first two guidelines and have students practice using these guidelines. Then each week have the students add the next guideline until they are using all seven.

2. Read a set of directions and have the students follow them. Use Page 33-34 or another topic. Paper folding (origami) is especially useful. The students can follow your directions and assemble a folded paper item. Use your own source for step-by-step directions for paper folding or other item.

3. Ask students: "Why are good listening habits important?" Answers may include: "To get more information." "Make fewer mistakes." "Save time and money." "Improve work relationships." "Help solve problems."

4. Have two students read "The Disorganized Caller." The students will play the parts of a businessman who repairs photocopiers, and a person calling to report a broken copier. Use the discussion questions given with the exercise.

   1. Discuss: The importance of knowing whether the information being given by the speaker is fact or fiction. Use the following points as the basis of discussion:
      1. Facts can be proven true. When someone is trying to persuade you to agree with their viewpoint, listen carefully to judge whether what they are saying is true.
      2. Opinions are a person’s personal observation about an event or occurrence that may be true or false. Often opinions are biased; that is, for or against someone or something without considering the reasonability of the opinion.

   2. Read page 74 and determine if the statements are facts or opinions.

   3. Read parts of the newspaper articles and decide if they are facts (can they be proved?) or opinions. Then read an editorial that gives the editor’s opinion of an event or occurrence. Show how the editorial differs. Have students look for clue words such as "It is my opinion that ..."; "I think ...".
Subject Area: Listening

TEACHING STRATEGY & TECHNIQUES

1. Begin class by delivering a verbal message that requires one person to receive the message and deliver it to someone not present to hear it. Send a student out of the room, then select a student to receive the message. The message is: "Please go to 718 North Walnut St. and pick up the green box left at the back door. Don't touch the red box next to the green box, that is for Nicole. Call me at 555-7963 when you have the box so I may come and pay you for the candy." If the student begins to write it down, do not slow down giving the message unless asked to do so by the student. Answer all questions about the message. Finish by asking the student: "Are you prepared to deliver the message?" Recall the student and have the message delivered. Do not let the class members assist in the message delivery. Compare what was said to what was delivered. Discuss what could be done to insure correct messages are delivered. Discuss:
   1. Write the message down.
   2. Repeat back what was written.
   3. Ask person to please speak more slowly so the message can be correctly written.

2. Use the exercises in the book on pages 34-37 for additional practice.

3. Have students listen to a radio broadcast. Concentrate on one news story. Ask students: "What do you already know about this topic? What is the main point of the story. Can you visualize the event in your mind?"

1. Discuss meetings that the students may be called upon to attend. What types of meetings could they expect to attend? Answers may be: 1. Community issues; 2. Church committee meetings; 3. Workplace meetings. Tell students that meetings are called to share information and often the meetings involve decision making such as planning an activity and solving a problem.

2. Use handout #2. "Group Decision Making Guidelines."

3. Use handout #3. "Staff Meeting Guidelines."

4. Use page two of "Listening Self Evaluation." Have students complete page two: "What do your scores mean?" Have students make and fill in a chart showing areas in which they need to improve. Have students practice their listening skills in class.
### Subject Area: Vocabulary

#### SKILL

1. **Recognizing terms.**
   - **ASSESSMENT**
     - Student will understand 50% of the basic terms in an occupation of his/her choice.

2. **Interpreting unfamiliar terms and abbreviations.**
   - **ASSESSMENT**
     - Student will correctly define 50% of the terms and abbreviations of his/her selected occupation.

3. **Using reference materials.**
   - **ASSESSMENT**
     - Students will identify and use reference materials to locate information.

#### MATERIALS

- "Vocabulary for the World of Work" Book #1 & #2 (Educational Design).
- Steck-Vaughn Books: "Practicing Occupational Reading Skills."
- Occupation specific: Automotive, Business, Carpentry, Electronics, Health Care, Machine Trades.
- "Practicing Occupational Reading Skills."

#### TEACHING STRATEGY & TECHNIQUES

1. Have student select an occupation in which he/she is interested. Use the Steck-Vaughn book that is specific to the selected occupation if available. Glossary of terms is on back of each book.
2. Use the printed materials in the texts: "Vocabulary for the World of Work" Book #1 and #2. Book #1 includes basic job words. Book #2 includes office and business words.
3. Have students select an occupation, or use the same occupation chosen previously. Assist student in locating information about that occupation, including the duties and responsibilities of that occupation. Student will begin a word list book in which all new terms specific to that occupation are defined. For example: in an office occupation: define: invoice, purchase order, accounts receivable, credit memo.
4. Arrange a tour of work locations. Or have a guest speaker to discuss some occupation-specific vocabulary.
   1. Have students continue using the Steck-Vaughn books in the selected occupation.
   2. Use "Reading Skills That Work" Book #2: pages 18-23 to teach context clues.
   3. Use the newspaper advertisements and have students define terms that you previously marked.
   4. Have students bring in help wanted advertisements and define unfamiliar terms.
   5. Use dictionary to define terms and add these definitions to the student's word list book.

5. Select a book with a table of contents and an index. Choose several pages containing specific information and make a note on where they were located. Show the book to students and ask: "How would you find this information in this book?"
7. Have students name some sources of information about their occupational fields. These could include places such as libraries; professional organizations; persons holding jobs in that occupation; and companies in which that occupation is found.
SKILL: Spelling words correctly.

ASSESSMENT:
Student will spell 50% of words relating to his/her occupation.

TEACHING STRATEGY & TECHNIQUES:
1. Use the glossary of job-related words from the Steck-Vaughn books, or develop a list separately.
2. Read the words to the students and have them write them. Use teacher-generated handouts.
3. Prepare a memo or letter that contains 50% of the words misspelled. Have the students check the spelling and correct all misspelled words.
4. Use Handout #3 “Sample Memo” and have the students correct the misspelled words.
5. Have students develop a list of job-related words for the occupation in which he/she is interested. Add to this list on a regular basis.

MATERIALS:
Steck-Vaughn Books: "Reading for Occupation" and "Reading for Spell" for occupational words.
4. Teacher-generated materials using "Vocabulary for World of Work" and "Vocabulary for World of Work in English.
5. Handout #3 “Sample Memo.”
SKILL
1. Give information or directions orally.

ASSESSMENT
Student will correctly give an oral message or directions to do a task.

MATERIALS
OR: teacher prepared materials.

TEACHING STRATEGY & TECHNIQUES
1. Use "Following Directions" Pages 6-9 in the Steck-Vaugh Books.
2. Use pages in "Communication Skills That Work" as follows:
   1. Page 19 - read and discuss the speaking situations.
   2. Page 20 - discuss occasions for speaking using the reasons given.
   3. Page 21 - read eyewitness account and show how clear organized messages are helpful.
   4. Page 22-25 - discuss and demonstrate the techniques of sending messages; speaking; and listening.

1. Use handout #6 "Planning for Effective Speaking: The Job of the Speaker."
   Discuss the steps in effective speaking from handout #6. Practice the step-by-step procedure.
   Verbally show how you would select the topic (choose your own topic); discuss what you know about your audience (if using the class, discuss what you know about their interests in the topic)
   Tell how you would organize the key points you want to make. Then, give the speech. Watch the audience reaction to the short speech and tell the class what you observed.
2. Demonstrate how a listener would listen to an important message using eye contact.
   [Have a student tell you something while you listen.]
3. Discuss the use of inappropriate topics in meetings. Demonstrate several inappropriate topics.

1. Use handout #7 as basis for discussion of the interaction of speaker and listener. Stress that ordinary conversations with family and friends do not need to be organized around this chart. The chart is helpful at work when the employee will be judged on his/her ability to communicate clearly. The chart is useful in meetings not only on the job but in community organizations too.
2. Have students practice sending and receiving messages. These messages can be directions on how to perform a task, or discussion of current events of interest.
Subject Area: Vocabulary

Teaching Strategy & Techniques

2. Obtain basic facts.

ASSESSMENT

Student will correctly ask questions to obtain basic facts.

MATERIALS

OR: Teacher-generated materials.

3. Using appropriate words with correct pronunciation.

ASSESSMENT

Student will choose appropriate words that are correctly pronounced in making two telephone calls:
1. A personal call and
2. A business call.

MATERIALS

OR: Teacher-generated materials.

A Dictionary.

TEACHING STRATEGY & TECHNIQUES

3. Discuss: how and why to ask specific questions. Use the following format to choose questions.
   1. Pinpoint exactly what you need to know.
   2. Use precise words to get the information you need.

4. Have students pretend to be a policeman/woman arriving on the scene of an accident. Have them ask appropriate questions to the situation:
   "There was an automobile accident on the highway in which two cars were involved."
   What questions would you have? Who would you question?

2. Discuss how the personal telephone call is different from the business call.
   The personal call is more casual. Slang words may be used and joking or teasing may occur.
   In a business call, the conversation is more structured and formal. Slang words or expressions should not be used.
   Demonstrate the differences in the two types of telephone conversations.

3. Have students practice making both types of telephone calls: business and personal. Select appropriate topics for the telephone calls. Use Page 69 to obtain suggested topics.

4. Have students pretend to answer the classified advertisements in two different ways:
   1. A friend of yours placed the advertisement.
   2. A business placed the advertisement and a formal business call is required.

5. Select advertisements from the classified advertisement section of the local newspaper. Have students respond to the advertisements in two ways: as a friend, and in a formal business manner. Stress that conversations at work during business hours should use the formal business format, especially when talking with customers.

6. Discuss the types of vocabulary that are not suitable for use in work situations. Give the following examples: slang words, abusive or vulgar words that should not be used.

1. Discuss: How you would learn how to correctly pronounce an unfamiliar word. Demonstrate how the pronunciation guide in the dictionary can be used to help learn how to pronounce words.

2. Have students select several words from a teacher prepared list and look them up in a dictionary. Practice pronouncing these words.
**SKILL**

1. Identify purpose and meaning of written material.

   **ASSESSMENT**
   
   Student will correctly use a reading strategy to interpret a written article.

2. Identify the main point of an article.

   **ASSESSMENT**
   
   Student will correctly identify the main point of an article.

3. Filling out forms.

   **ASSESSMENT**
   
   Student will correctly read directions and fill out forms.

**MATERIALS**

- Handout #8: "Reading Strategy For Understanding." Demonstrate how you can often find the purpose for a newspaper article in the headline. Ask: "What are other ways of finding out the purpose of the article?" Answers may be: headlines, or titles; comments by the author at the beginning.

- "Reading Skills That Work" Book #1. Pages 34-36.

**TEACHING STRATEGY & TECHNIQUES**

1. Use the Steck-Vaughn books: Automotive, Business, Carpentry, Electronics, Health Care, Machine Trades as appropriate for the student's interests. Pages 30-33 in each book.

   **TEACHING STRATEGY**
   
   1. Discuss: How a reading strategy helps to interpret what you read both at home and on the job.
   2. Use handout #8: "Reading Strategy For Understanding." Demonstrate how you can often find the purpose for a newspaper article in the headline. Ask: "What are other ways of finding out the purpose of the article?" Answers may be: headlines, or titles; comments by the author at the beginning.

2. Have students read page 34 and find the main points. Then, have students complete page 35 and 36 for additional practice.

3. Have students read Handout #9 "Personal Fact Sheet." Review the following information:

   1. What information is being requested?
   2. Do you have all the information necessary to complete the form?
   3. If information is not available, how would you complete the form?
   4. Why is it important to follow directions exactly when filling out forms?

   Expect responses: "The form will be used to do something such as reviewing your qualifications for a job. Certain information is needed so that you may be contacted."
Subject Area: Reading

4. Following diagrams and maps.

Student will correctly find information requested on either a diagram or road map.

Contemporary Books:
"Reading Skills That Work"
Book #1. Pages 51-57.
OR: teacher-generated materials:
Diagram of hooking up a video cassette recorder; or telephone answering machine; or computer and printer.
Road map or map of building.

5. Understanding tables and charts.

Student will correctly find information requested using a table and a chart.

Contemporary Books:
"Reading Skills That Work"
OR: teacher-generated materials
(a table).

Pages 64 - 65.
OR: a troubleshooting table from some electrical appliance or computer. (see also page 67)

TEACHING STRATEGY & TECHNIQUES

1. Discuss: How diagrams can help understand ideas. Point out the labels on the diagram that identifies the parts. Ask: How can looking at the diagram of something help you understand the directions on how to use the item? Possible responses may be: a) the parts are labeled and when the directions tell you to do something with a certain part you will be able to identify the part; b) sometimes the labels help you to follow the directions more easily.

2. Have students look at the diagram on page 52 and complete the questions. The diagram shows a telephone answering machine.

If other diagrams are substituted use the following questions:
1. What is the part that goes into the power outlet called?
2. What is the name of the first part to be connected?
3. What is the name of the last part to be connected?

3. Have students look at map. Ask them to locate various places or roads. Describe a step-by-step path along the map and ask what are the names of the places nearby, or the names of the roads bring crossed.

1. Define: table - a way of organizing information. It may be as simple as two columns or as complex a twenty column table. The number of details about a subject that need to be presented determines the number of columns needed in the table.

Show students a table.

2. Define: key - the definition of the abbreviations or symbols used in the table. A key explains the location of various parts of the table and what they mean.

3. Use page 62 and 63. The table shown is a class schedule table that shows when history classes meet, where, what time, and who is the instructor.

4. A troubleshooting table is often found in the workplace. This type of table lists problems that can happen and ways of solving these problems. Several reasons why a problem might arise could be given in this type of table.

5. Have students complete the questions on page 65. OR: prepare a list of questions pertaining to the chart being used.

6. Use Page 67 for additional practice.
### Subject Area: Reading

</thead>
<tbody>
<tr>
<td>&quot;Reading Skills That Work&quot; Book #1 Page 95-96. OR: teacher-generated materials.</td>
</tr>
</tbody>
</table>

#### TEACHING STRATEGY & TECHNIQUES

1. **Define: line graph** - A means of seeing how something has changed over time. A line graph can show a trend, which is a line of general direction or movement.
   - Display the chart on page 69 and show the trend or direction of the information given.
   - A line graph has two axes - a **horizontal axis** and a **vertical axis**.
     - The **horizontal axis** runs from left to right and shows values such as time.
     - The **vertical axis** runs up and down and shows amounts being measured.
   - Have students find the horizontal axis and the vertical axis on the chart.
   - Demonstrate how to read (or interpret) the chart. Define the units of the chart.
   - Use page 71 and have students answer the questions 1 to 5 on bottom of page.
   - A line graph can be used to show two or more different trends. This permits a comparison of the changes in trends over a given time period. Have students look for the key which will identify the lines. Some charts use a label to mark the lines.
   - Have students complete questions on page 73.

2. **Define: procedure** - A way to do or make something. The directions you follow when building book shelves, or cooking a meal. Businesses use procedure as a way to get things done all the same way (uniformly).
   - The **purpose** of a procedure is the **goal**. What do you want to happen? In order to accomplish the goal, there must be certain steps that must be followed in the right order. These steps to be followed can be numbered 1, 2, 3, 4, 5, etc. The flowchart consists of symbols that sum up a procedure and show what step precedes and follows each part.
   - Have students complete questions on page 89.
   - Discuss the flow chart in Handout #10. This flow chart is a summary of a procedure. The symbols stand for the steps and the arrows tell you in what order to follow the steps.
   - Have students develop their own step-by-step flow chart using Handout #10 as a guide.

3. **Ask:** How would you locate specific information in a book? Discuss the purpose of the index. Have students use textbooks or other books with an index. Give students specific items to locate. For example: "On what page would you find information in this book about Barbara Bush?" (Display the book that contains the information). Have students practice locating the information in the index and turning to the page indicated.
   - Discuss the purpose of a table of contents. Demonstrate the use of a table of contents.
   - Have students practice locating various books containing the indicated subjects.
Subject Area: Writing

SKILL

1. Applying capitalization and punctuation rules in context.
   - Student will correctly use capitals and punctuation in 70% of the practice sentences.
   - Materials: Steck-Vaugh Books: "Developing Writing Skills" Pages 95, 97, 98, 135-158; 180-186.

2. Identify correct plural form of nouns and verb in context.
   - Student will correctly use plural form of nouns and verbs in 70% of practice sentences.
   - OR: teacher-generated materials.

3. Identifying the referent for pronouns and adverbs.
   - Student will correctly use pronouns and adverbs in 70% of practice sentences.

4. Selecting correct abbreviation for a word.
   - Student will correctly use abbreviations in 70% of practice sentences.

5. Identifying correct possessive form of nouns in a text.
   - Student will correctly use possessive form of nouns in a short paragraph.

6. Identifying the basic parts of speech in a simple sentence.
   - Student will correctly identify the parts of speech in 50% of simple sentences.

ASSESSMENT

1. Use Steck-Vaughn, "Developing Writing Skills." Pages 135-158. Punctuation exercises. Have students complete exercises as appropriate.
2. Use "Developing Writing Skills." Pages 180-186 Capitalization. Have students complete exercises as appropriate.
3. Have students write the plural form of nouns from a list of nouns. Have students write the plural form of verbs from a list of verbs.
4. Use Page 95. Write sentences demonstrating singular or plural forms. Discuss keeping the subject and predicate in agreement. If a singular form of noun is used, the verb should also be singular. And, if a plural form of verb is used, the nouns should be plural.
5. Have students practice writing and correcting sentences containing singular and plural nouns and verbs. Use pages 97-98 in "Developing Writing Skills" as appropriate.

TEACHING STRATEGY & TECHNIQUES

1. Define: pronoun - takes the place of a noun. Have students read materials and select the pronouns.
2. Define: adverb - modifies a verb, by adding more information about the verb. Have students read materials and select the adverbs.
3. Have students pretend they are working in an advertising agency and must prepare the advertising copy for some products. Practice using adverbs and pronouns in the advertisements.
4. Use workbook materials. Write abbreviations for common items; phrases; and long names. Define: acronyms - a word formed from the letters or syllables of a series of words. An example of an acronym is T.G.I.F. which may be recognized by the students.
5. Have students translate abbreviations in response to job-related memos requesting information.
6. Have students diagram simple sentences to identify parts of speech. Stress the importance of singular subject and singular predicate agreement and plural subject and plural predicate agreement.
7. Have students practice diagramming by referring to a diagram as a "sentence map". Change singular subjects to plural and plural subjects to singular. Then change the verb form to agree.
SKILL
7. Composing short notes and lists.

ASSESSMENT
Student will correctly compose a short memo list using phrases.

MATERIALS

Pages 103-107.

TEACHING STRATEGY & TECHNIQUES
1. Lists are a way of organizing your time and an aid to remember items. Use the example of a grocery list as a means of remembering what you need and saving time while shopping since the shopper can go directly to the items needed.
2. Discuss: Using a list can help remember complicated or detailed events. Use page 98 of workbook as practice.
3. Demonstrate writing a list using phrases. Use example of how to program a video cassette recorder or other item. Show how using just a few words makes it easier to read.
   1. Have students read page 105. The format of the business memo is given. Review the format:
      TO:
      FROM:
      SUBJECT:
      DATE:
   2. Have students develop a brief message in the memo format. Use check list on page 107 to check the heading of the memo.
   3. Use the following questions to check the format of the memo.
      Is the heading complete and accurate?
      Does the first sentence state the main idea?
      Is the memo clear, concise and well organized?
      Is all important information included?
      Has correct spelling been used?
   4. Use page 109 as a review exercise. Have students choose a partner. One student sends a request memo, and the second student sends a thank you memo. Then exchange memos with the partners and review each other's memo for accuracy.
### Subject Area: Initiating Social Skills

#### SKILL

1. Greeting others; initiating conversation; giving information; joining others in a group.
2. Asking for information, by pinpointing what information is needed.

#### ASSESSMENT

- **Student will introduce her/himself in a group and give information about job interests.**
- **Student will ask specific questions relating to a topic to obtain desired information.**

#### MATERIALS

#### TEACHING STRATEGY & TECHNIQUES

1. Have students read article on page 19. OR: As an alternative: have a student read the article and then turn to page 20 and discuss the "Occasions For Speaking" section.

   - Have students break up into smaller groups. Give each group one of the following to do:
     - A) Share an experience.
     - B) Comment about something you hear, see, touch, smell, or taste.
     - C) Discuss solving a problem.
     - D) Give a report or information about a subject of his/her choice.
     - E) Introduce him/herself and request someone to do something.

2. Discuss the article: "Talking With Co-workers."
   - A) Ask what topics are not appropriate topics of conversation.
   - Use the following examples of inappropriate topics: personal problems; topics that could hurt someone such as discussing the former spouse of a divorced person; and profane subjects.
   - B) Remind students that gossiping about co-workers can damage relationships and cause people to lose respect for you.

3. Practice introducing each other. Divide class into pairs. Have one student introduce a second student to the class. Tell the name of the student and the job field in which they are interested. Then have the second student introduce the first student to the class and tell about his/her job interests. Continue with each pair of students until the entire class has had a chance to introduce someone and be introduced by someone.

1. Use workbook pages 42-44. Have students do practice exercises, pages 44-45.
2. Use Page 46 "Getting Information by Phone." Have students break up into teams of two. Have each group prepare a list of questions to ask to obtain certain information. Suggested subjects:
   - 1) How to get a library card; 2) Information about a car for sale or an apartment for rent. Have one of the team place the telephone call if possible.
   - Use Page 47 "Applying Your Skills" for additional practice.
### Subject Area: Initiating Social Skills

#### ASSESSMENT

<table>
<thead>
<tr>
<th>SKILL</th>
<th>3. Responding to criticism.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Student will select appropriate method to respond to criticism from the list of guidelines.</td>
</tr>
</tbody>
</table>

#### MATERIALS

- Handout #1 "Guidelines For Responding to Criticism."

#### TEACHING STRATEGY & TECHNIQUES

1. Discuss how people respond to criticism. Demonstrate some non-verbal communications such as: anger, hurt feelings, and ignoring criticism. Explain that responding to criticism correctly will help in job retention skills. Work performance evaluations often contain criticisms made by your supervisor. Use Handout #1 "Guidelines For Responding to Criticism" to discuss the appropriate response. Have students practice their responses with each other by developing scenarios that could occur on the job.

2. Use the article "The Difficult Employee" [page 84] as a basis to discuss how to deal with criticism. As an alternative: have students discuss situations in which they have had to respond to criticism and how they responded successfully. Ask for some unsuccessful ways they may have responded and what were the consequences. Then discuss what might have been a better response.
Subject Area: Personal Social Skills

1. Understanding the need for good attendance.
   - Student will define good attendance as being on time and not missing work except in an emergency.
   - "Attitudes on the Job" (Educational Design Inc.) Pages 16-24.

2. Understanding what is meant by being honest on the job.
   - Student will define honesty on the job as being trusted, telling the truth, not stealing either time or things from the job.
   - "Surviving on the Job" (Bennett & McKnight). Page 29. Handout #2 "Rules for Attendance."

3. Being polite and courteous.
   - Student will choose friendly ways to treat customers 6 of 10 times using Handout #4: "How Am I Doing in Treating Customers Well."
   - "Attitudes on the Job." Pages 72-87.

TEACHING STRATEGY & TECHNIQUES

1. Discuss the importance of good job attendance. Use the following topics for discussion:
   a) being late can affect the work of others.
   b) job performance is often based on attendance.
2. Use Handout #2 "Rules for Attendance." Discuss each of the rules and explain why they are necessary for the job.
3. Discuss poor reasons to miss work: Stayed out late the night before; want to go shopping; need to get ready for a big party.
5. Have students use the words in sentences about work.
6. Have students complete page 31 (true and false) as basis for discussion.
7. Use the case problems as small group discussion topics. Then have each group give their answer and use the answer as a large group discussion.

1. Discuss ways people could be dishonest:
   a) Steals time by wasting time or fooling around when he/she should be working.
   b) Takes things from work (could be office supplies; equipment; or other items.) Explain how this increases expenses and affects wages. This is stealing and illegal.
   c) Lies to people. Makes up false excuses for not going to work; makes a mistake or breaks something and blames someone else.
   d) Cheats the company or other people. May charge friends a lower price, or takes tips and commissions belonging to others.

1. Use section 7. "Treating Customers Well." Explain that fellow employees are also entitled to be treated politely. Ask students how they feel when someone treats them politely?
   Discuss: Why is it important to treat customers politely? How do you help customers with special needs? Define: special needs customers: Those customers who have young restless children; elderly persons; persons on crutches or in wheelchairs; persons unable to speak English; blind persons; hard of hearing persons; angry or upset persons.
Subject Area: Initiating Social Skills

ASSESSMENT

3. Being polite and courteous.
   (continued)
   Student will choose friendly ways to treat customers 6 of 10 times using Handout #4: "How Am I Doing in Treating Customers Well?"

4. Grooming.
   Students will complete checklist on appearance.

MATERIALS

"Attitudes On The Job"
[Educational Design]
Pages 72-87.

"Attitudes On The Job"
Pages 73-84.
Handout #5 "Guidelines for Receiving Telephone Calls."

"Surviving on the Job"
[Bennett & McKnight]
Pages 24-28.

Handout #6
"Recommendations for Guest Speaker."

Handout #7 "Checklist on Appearance."

TEACHING STRATEGY & TECHNIQUES

1. Use Handout #5 "Guidelines for Receiving Telephone Calls." Discuss each point.
2. Practice answering the telephone politely. Have two students play parts about receiving a business call - version #1, page 58 and version #2, page 59. Use the guidelines given in the workbook for receiving telephone calls.
3. Have students practice conversations in which they:
   a) Place an order.
   b) Look up some information (can be results of a test or other information).
   c) Are working on a task and the telephone call interrupts the task.
4. Complete pages 83-84 as an evaluation of the unit on politeness.

1. Have students read pages 24-25. Discuss the importance of appearance. Use the case problems on pages 26-28 as basis for discussion.
   Ask: Should an employer tell employees how to dress? Yes/No and why?
2. Have a guest speaker recommend and demonstrate appropriate clothing styles for various occupations. If possible, do a "make-over" on selected students.
3. Have students complete Handout #7 "Checklist on Appearance." Have students self-evaluate their appearance. Do not collect the forms. Begin "dress-up days" immediately after this unit. Dress-up days include good grooming: freshly washed hair, clothing etc. Students could be encouraged to try new hair styles, makeup, or clothing. If possible, students might be able to discuss what they did to get ready for dress up day in a small group situation. Reward the students on dress up day with small token gifts or other items as encouragement.
### Subject Area: Responding Social Skills

#### SKILL

1. **Handling problems.**
   - **ASSESSMENT:** Student will select appropriate problem handling technique when given a situational problem.

2. **Recognizing the feelings of others.**
   - **ASSESSMENT:** Student will choose appropriate response when given a situational problem.

#### MATERIALS

- **Contemporary Books:**
  - "Guidelines For Handling A Disagreement."
  - "Problem Solving Techniques."
  - "Applying Your Skills In Your Life."

- **Handouts:**
  - Handout #8 "Guidelines For Handling A Disagreement.
  - Handout #10 "Problem Solving Techniques."
  - Handout #9 "Applying Your Skills In Your Life."

#### TEACHING STRATEGY & TECHNIQUES

1. **Discuss:** how to handle a disagreement using the 4 guidelines in Handout #8 "Guidelines For Handling A Disagreement." Give examples of each of the guidelines. Have students talk about how they handled recent disagreements. Were they successful? If not, why not?

2. **Discuss:** problem solving techniques using the suggestions in Handout #10 "Problem Solving Techniques." Have students give other examples for each of the techniques.

3. **Use Handout #9 "Applying Your Skills In Your Life" as extra practice if needed.**

4. **1. Have students read page 26, "Rapport with your supervisor." Respond to exercises 1 and 2.**
   - **2. Read top of page 28 "One-on-one with the boss" and emphasize the starred points on how to conduct yourself while meeting with your boss. Discuss exercise #3 as a class.**
   - **3. Have students read "A Boss For All Seasons" [page 29] which discusses the four types of bosses: a) the overly demanding boss; b) the ineffective boss; c) the petty type boss; and d) the know everything type of boss. Discuss the major characteristics of each type. Have students complete exercise 5 on page 32.**
   - **4. Read page 33 in class. Have students discuss exercise 6 using various scenarios as a class discussion. Use brainstorming as one type of discussion. Select the best solution to the three different scenarios.**
   - **5. Have students read "Don't Take It Personally." [page 34] Have students complete exercise 7 page 35. Discuss answers in class.**
<table>
<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Define criteria.</td>
<td>Student will correctly set up requirements or purpose to locate information when given a simulation problem.</td>
<td>Contemporary Books: &quot;Reading Skills That Work&quot; Book #2, Pages 42-45.</td>
<td>1. Have students read page 42 - &quot;Finding information.&quot; Discuss: What kind of information is Ray looking for? How can Ray decide if the magazine contains useful information. 2. Define: evaluation - to determine the worth or value of something. Discuss: How would you evaluate an item if it was something you needed and useful to you? 3. Use Handout #1 page 1 and 2 &quot;A Strategy For Following Directions&quot; to discuss the step-by-step approach to planning how to complete a task. Use page 2 as an exercise to use the step-by-step task completion strategy. Discuss: Using this plan for following directions can be helpful at work if you have multi-step directions to follow.</td>
</tr>
<tr>
<td>2. Comparing details.</td>
<td>Student will correctly select criteria to compare details of a simulation problem.</td>
<td>Handout #2 &quot;Applying the Plan of Action to the Job&quot; (Answer Sheet included.)</td>
<td>1. Use Handout #2 &quot;Applying the Plan of Action to the Job&quot;. Discuss the steps included. This is the same step-by-step plan as discussed in Handout #1. Here the same idea is applied to the work place. Using this task planning method, you can avoid missing a step and when the task is completed, you can decide how to do it better next time. 2. Use Handout #3 &quot;Making the Best Choice.&quot; Discuss: In Handout #2 we discussed the steps in planning a task. &quot;Making the Best Choice&quot; can be used as a plan to help you make comparisons among items. Notice that in Step #2 you must decide what is important to you in choosing among several items. This is setting up requirements. &quot;Evaluating each choice&quot; means comparing it to the requirements you selected in step two. You may have to adjust your requirements if none of the items meets all of your requirements. Rethink what features are really important to you and which you could do without. Then, compare the items again. When you have made your choice, compare your chosen item with the requirements you set for yourself. How does it match up? This is your evaluation of how well you made the choice. 3. Have students do &quot;Work Out&quot; exercise on bottom of Handout #3 for practice in decision making.</td>
</tr>
<tr>
<td>3. Drawing conclusions.</td>
<td>Student will correctly use step-by-step procedure in &quot;Making the Best Choice&quot; (Handout #3) and discuss whether he/she made the correct choice or not.</td>
<td>Handout #3 &quot;Making the Best Choice&quot; Teacher generated materials.</td>
<td>1. Discuss the choice the students made in Handout #3. Was it the best choice? If not, why not. 2. Use advertisements from various stores carrying similar items and have students pretend they are shopping and comparing items they would consider purchasing. Have students choose the requirements for selection. Use one of the following as additional requirements: location of store; price of item; whether or not layaway is available for item; easy payment plan. 3. Have students do exercise on page 44-45 for additional practice.</td>
</tr>

Subject Area: Locate and Utilize Information Sources
Gateway Project Module Five  Workplace Reasoning Skills

**Subject Area:** Classifying People, Objects and Information

<table>
<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
</table>
| 1. Sort Information. | Student will correctly classify items into groups. | Contemporary Books: "Reading Skills That Work" Book #2. Pages 64-65. | 1. Define: **classify** - to assign to a category or class. Use the example of a grocery store as a place where objects are classified by category. 2. Discuss: Advantages of classifying by category: 
   - Advantages are: 1) Easy to find items. 
   - 2) Easy to compare similar items. 
   - 3) Easy to keep a constant supply of items. 
3. Give students lists of various foods and have them categorize the items into following categories: spices; cereals; macaroni products; baking items; and meats. 
4. Review the steps in classifying information. 
   - 1) Identify purpose for categorizing: Size, Color, Type, or other reason. 
   - 2) Define categories. 
   - 3) Classify information according to category. 
5. Use Page 73 "On the Job" as a review. |
2. Discuss: the use of ranking as a means of organizing tasks in the order of importance. 
   - Ask: Can you think of an example of how you would use sequencing to organize a task? 
   - Use examples: a recipe for cooking; changing a tire; building shelves. 
3. Define: **priority** - requiring attention before anything else. Discuss ways of determining what should be done first. 
   - 1. By when the item is needed 
   - 2. By who wants the item (boss, co-worker.) 
   - 3. By how long the task will take. 
4. Demonstrate ranking tasks giving different priorities: based on time; who needs the item; or the amount of work to be done. 
5. Use Handout #4 "Getting Organized." Have students complete the list of tasks and put in a chart. 
6. Have students do the exercises in Handout #5. Discuss the answers on the exercises in class. 
7. Do exercise on page 81 and discuss in class. |

Subject Area: Classifying People, Objects and Information

**MATERIALS**

Handout #4 "Getting Organized".

"Reading Skills That Work" Book #2. Page 81.

TEACHING STRATEGY & TECHNIQUES

1. Define: **classify** - to assign to a category or class. Use the example of a grocery store as a place where objects are classified by category. 
2. Discuss: Advantages of classifying by category: 
   - Advantages are: 1) Easy to find items. 
   - 2) Easy to compare similar items. 
   - 3) Easy to keep a constant supply of items. 
3. Give students lists of various foods and have them categorize the items into following categories: spices; cereals; macaroni products; baking items; and meats. 
4. Review the steps in classifying information. 
   - 1) Identify purpose for categorizing: Size, Color, Type, or other reason. 
   - 2) Define categories. 
   - 3) Classify information according to category. 
5. Use Page 73 "On the Job" as a review. 

1. Define: **sequence** - an order of organization. 
2. Discuss: the use of ranking as a means of organizing tasks in the order of importance. 
   - Ask: Can you think of an example of how you would use sequencing to organize a task? 
   - Use examples: a recipe for cooking; changing a tire; building shelves. 
3. Define: **priority** - requiring attention before anything else. Discuss ways of determining what should be done first. 
   - 1. By when the item is needed 
   - 2. By who wants the item (boss, co-worker.) 
   - 3. By how long the task will take. 
4. Demonstrate ranking tasks giving different priorities: based on time; who needs the item; or the amount of work to be done. 
5. Use Handout #4 "Getting Organized." Have students complete the list of tasks and put in a chart. 
6. Have students do the exercises in Handout #5. Discuss the answers on the exercises in class. 
7. Do exercise on page 81 and discuss in class.
### Subject Area: Make Estimates

#### SKILL

1. Make physical estimates.
   - **ASSESSMENT**: Student will correctly estimate weight or dimensions on distance.

2. Make combined physical estimates.
   - **ASSESSMENT**: Student will correctly estimate and compare 2 physical estimates.

#### MATERIALS

- **Contemporary Books**: "Reading Skills That Work" Book #2. Pages 101-103.
- **Paper grocery bag.**
- **10 small items of various weights.**
- **Handout #6 "Estimating Length."**
- **Road map.**
- **Handout #7 "Estimating Distance and Travel Time."**
- **Teacher-generated materials.**

#### TEACHING STRATEGY & TECHNIQUES

1. **Define**: estimate - a rough calculation of value or worth. Demonstrate how people make estimates all the time. Use the following examples:
   - 1) Ask them how much money would they need to go out to lunch? Give just a rough estimate of the amount of money needed.
   - 2) Discuss: How did you arrive at the amount of money needed?
   - 3) Discuss: In order to arrive at the estimate, you needed certain facts:
     - a) the price of food in various restaurants, and b) the type of food you wanted to eat.

2. Have students estimate how much an item weighs. Use various items such as: a cup; a pencil; etc. **Do not use a scale.** Have students estimate the weight of the item by lifting it.

3. Use a paper grocery bag. Tell students that the bag will hold 5 pounds of items. Have students use the items previously used in estimating weight and estimate how many items they could fit into the grocery bag before the 5 pound weight limit was reached.
   - Then, if possible, weigh the item and see how close the estimates were.

4. Discuss: how experience in knowing the weight of certain items can help us estimate the weight of other items.

5. Have students estimate the dimensions of an item. Use a small figurine, or box and have the students estimate how long or tall it is.

6. Use Handout #6 "Estimating Length." Demonstrate that both lines are the same length but because of the lines on the end, it is difficult to make a visual estimate.

7. Have students estimate how far (in miles) it is to a given location. Use the road map and demonstrate how to estimate distances using a road map. Use a ruler and measure a selected road. Then use the map scale to estimate the miles.

8. Prepare materials for demonstration of estimating size and weight.

9. Show students two items separately: a box and several bags of assorted sizes; OR: an item and several different-sized boxes. Have students select the correct size bag or box using visual estimates. Discuss: there are several things to do to estimate the sizes:
   - 1) Estimate the size of the item or box.
   - 2) Estimate the size of each of the boxes or bags.
   - 3) Compare the sizes to select the correct size.

10. Use screws and nuts, or bolts and nuts and socket wrenches as other examples of estimating sizes. Try to find the correct size socket wrench to fit a particular nut or bolt.

11. Have students read road maps, and estimate distance to a given location. Then estimate how much time it would take to drive to that location. Use Handout #7 "Estimating Distance and Time."
**Subject Area: Make Estimates**

**TEACHING STRATEGY & TECHNIQUES**

1. Review procedures to estimate time. Demonstrate how to calculate the charge to repair items. Have students read Handout #8 "Steps In Estimating a Repair." Students will estimate charges based on time estimates to repair an item and the cost of parts required.

2. Choose a guest speaker from auto repair; crafts; computer word processing. Have them demonstrate how they would make an estimate for a customer.

3. Have students complete the exercise in Handout #9 "Time Estimate To Complete A Report."

---

**SKILL**

3. Make combined estimates of time and cost.

**ASSESSMENT**

Student will correctly estimate time and cost to make or repair an item.

**MATERIALS**

Contemporary Books:
"Reading Skills That Work"
Book. #2, page 106.
OR: Handout #8
"Estimating A Report"
OR: Guest Speaker.

Handout #9 "Time Estimate To Complete A Report."

---

**Subject Area: Make Estimates**

---

---
Subject Area: Planning Work Goals/Projects

SKILL
1. Setting job goals.
   - ASSESSMENT
     Student will correctly prepare short term and long term job goals.
   - MATERIALS
     Handout #10 "Setting Goals"
   - CONTEMPORARY BOOKS

2. Organizing tasks to achieve goals.
   - ASSESSMENT
     Student will correctly put goal-related tasks in priority order.
   - MATERIALS

3. Assigning each task a specific time to complete.
   - ASSESSMENT
     Student will correctly estimate length of time needed to complete task.
   - MATERIALS
     Perfection Form Company "Take This Job and Love It" Pages 15-16.

TEACHING STRATEGY & TECHNIQUES
1. Use Handout #10 "Setting Goals." Demonstrate setting of short term and long term goals.
2. Discuss: Goals - short term and long term and use following examples of each:
   - Short-term goal: to complete the laundry by tonight. Long-term goal: move to a larger apartment.
   - Explain how a desire or a need can be turned into a goal. This goal can be either long or short term.
3. Discuss: Goal setting and have students give examples of short and long term job goals.

1. Discuss: Organizing to complete tasks. Why organization is important. (Save time, eliminate mistakes)
   Define: routine - a prescribed and detailed course of action to be followed regularly; a standard procedure.
   Give the following example of procedure necessary to drive to work:
   1. Use key to open car door.
   2. Sit down on driver's seat.
   3. Close door.
   4. Fasten seat belts.
   5. Put key into ignition.
   7. Drive to work.
   Show how each task was placed in order of when it needed to be done in order to complete goal of driving to work. Starting the car and all the tasks that are associated with this task have become routine or something you do very often.
2. Discuss: The setting up of a routine which will help you to organize tasks and achieve goals.

   1. Estimate how long the tasks will take to complete. The time can then be managed easily since time will not be wasted trying to remember what to do next. Mistakes can be reduced.
   2. Use pages 15-16 to demonstrate organizing tasks to develop a routine. Practice estimating the amount of time needed to complete tasks.
   3. Use "Surviving On The Job" pages 98-101 and have students complete the exercises.
4. Identify resources needed to complete a task.

ASSESSMENT
Student will correctly list items; persons; or information necessary to complete a specific task.

5. Anticipating problems in projects.

ASSESSMENT
Student will review project steps and correctly determine what items are unclear.

6. Evaluating how well the task was done.

ASSESSMENT
Student will review steps of a task and correctly decide if task was properly completed.

Subject Area: Make Estimates

TEACHING STRATEGY & TECHNIQUES

1. Have students pretend they work in a printing company. When they arrive at work one morning a job order is waiting on the desk top to be completed. Use Handout #11 "Job Order Worksheet" and have students answer the questions.

2. Use "Reading Skills That Work," pages 85-87 and have students complete the exercises.

   1. Ask students if they have any questions about the job order. Then ask the following questions:
      1. Do they know what health care report is to be used.
      2. What is meant by "back-to-back" [report is to be printed on both sides of pages.]
      3. What color binder is to be used? [none is given]
      4. Who would you call if you had a question? [call Penny Jackson]

   2. How would you determine the answers to these questions?
      1. To find out which health care report call the author of the memo.
      2. To find out what a printing term means: ask a supervisor, or someone he/she recommends.
      3. You could also look to see what may have been done before and then check with the supervisor to see if that procedure is to be followed again.

   3. Discuss: Why is it good to ask questions before doing a job if you are unsure of what should be done?

   1. Have students read the memo on page 83. This memo was written to workers at a community meals program. Students should complete the two problems which evaluate how well the two employees followed the directions they were given.
Subject Area: Problem Diagnosis/Troubleshooting

SKILL
   \[\text{ASSESSMENT} \] Student will correct decide which facts are important to aid in troubleshooting equipment.

2. Separate symptoms from causes of problem.
   \[\text{ASSESSMENT} \] Student will identify correctly, the symptoms of a malfunctioning machine using a troubleshooting chart.

MATERIALS
Handout #12 "Sorting Facts For Problem Diagnosis."
Handout #13 "Diagram of a Light Bulb."

TEACHING STRATEGY & TECHNIQUES
1. Use "Reading Skills That Work" page 113-114. Have students think of a time when a machine they were using stopped working. Ask: “What did you do?” “Why did you do that?” “Did you know what to do, or did you have to ask someone?” “Did you know what to look for?”
2. Discuss three important things to know. Use Handout #12 “Sorting Facts For Problem Diagnosis.”
   a) What does the machine do? Then you can determine if it is doing what it is supposed to do. The operator’s manual that comes with the machine may help tell what the machine does. An example is a light bulb: the job of a light bulb job is to light.
   b) How does the machine do its job? Read the operator’s manual or have someone explain how the machine does its job.
   c) What are the parts of the machine? Machines are a system of many parts. Each part has a certain job. All the parts work together so the machine can do its job.

   Using Handout #12 examine the parts of a light bulb and discuss how knowing the parts of an item can help locate potential trouble areas.

4. Discuss: how using a diagram can explain the parts of a complex machine more clearly. Compare the written description of a light bulb [Handout #12] with the diagram of the light bulb [Handout #13] Read the explanation of how the light bulb works. Notice how much more easily you can understand the diagrams.

5. Have students complete the questions on the bottom of page 116. Read the explanations of how the vacuum cleaner works. After reading the explanation, answer the questions on the bottom of page 116.

1. Discuss: Ways of locating the problem. Ask the following questions:
   1. Is it is operating the way it should? Reading the manual will show how the machine is expected to work. How is the way it is operating different from how it should operate.
   2. Are you using the equipment in the right way? Discuss: We may expect the machine to do more than it is capable of doing. For example: Using the vacuum to pick up large nails or heavy materials may not work well.
   3. Is something wrong with its parts? Carefully look at any diagrams or graphics to determine what parts may not be working correctly. Some manuals have a troubleshooting chart that lists problems and the potential causes.
### Subject Area: Problem Diagnosis/Troubleshooting

<thead>
<tr>
<th>SKILL</th>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
</table>
| 2. Separate symptoms from causes of problem. | Student will identify correctly, the symptoms of a malfunctioning machine using a troubleshooting chart. | Contemporary Books: "Reading Skills That Work" Book #1. Pages 117-119. Handout #13 "Diagram of a Light Bulb." | 2. Discuss: How simple tests may need to be conducted to determine what the problem might be. Use Handout #13 "Diagram of a Light Bulb." Let’s assume that the light bulb suddenly went out. Ask yourself the following questions:  
1. Is the light bulb operating the way it should? [No.]  
2. Are you using the light bulb in the right way. [You have it in a socket which is connected to a power source. The power source has sufficient power to operate the bulb.]  
3. Is something wrong with the parts of the light bulb. Carefully look at any diagrams of the light bulb and try to determine which of the parts may not be working.  
Have students look at the diagram of the light bulb and decide which parts may not be working.  
3. Discuss how simple tests may need to be conducted to determine the problem. This is called troubleshooting. Ask: What are some of the tests you could do with the light bulb to see why it does not work? [Questions are on bottom of Handout #12]. |
2. Have students develop a troubleshooting chart for a lamp. Or use Handout #14 "Troubleshooting a Lamp." Discuss: Use of a troubleshooting chart can help in determining what the problem might be. |
2. Have student use Handout #14 "Troubleshooting a Lamp" and brainstorm potential causes of a malfunctioning lamp. Review the lamp troubleshooting chart and add any causes that might have been overlooked. Ask students to rank the more probable causes of malfunctioning lamps. Group the causes together:  
1. Power does not flow: check fuses, circuit breaker, switch, plug is in wall.  
2. Wire is broken, bulb is broken. |
Subject Area: Problem Diagnosis/Troubleshooting

SKILL

ASSESSMENT
Student will correctly choose appropriate solution after using troubleshooting chart to assess machine problems.

MATERIALS
Handout #14 "Troubleshooting a Lamp."

Contemporary Books: "Reading Skills That Work" Book #1 page 121.

TEACHING STRATEGY & TECHNIQUES
3. Discuss: There are 2 kinds of solutions to malfunctioning machines:
   1) Replace or 2) Repair.
   If a possible solution is to repair the item, can you do this yourself, or must someone else do it.
   Other decisions when considering repairing the item are:
   1. How much will it cost to repair?
   2. Which is the best solution: repair or replace? Why?
3. Discuss: how could the malfunctioning problem could have been prevented?
   Suggest the following: 1) Change the way it is used; 2) Replace some parts when worn, before they malfunction.

1. Use page 121 as additional troubleshooting practice. Have students select a machine that they use often. Use the instruction manual from that machine to follow a troubleshooting plan.
Subject Area: Job Search Issues

TEACHING STRATEGY & TECHNIQUES

1. Have students fill out Handout #1 "Occupational Orientation Matrix."
   Discuss: Two ways people satisfy needs through work:
   a) by accomplishing things. [task orientation]
   b) interactions with people [people orientation]

2. Discuss: How people combine the both orientations [task orientation and people orientation]
   with an emphasis placed on one or the other. Occupations are classified into families:
   People orientation: service, business, entertainment.
   Task orientation: technology, outdoor, science.
   Have students score their own questions and plot his/her score on the matrix.
   Discuss each of the 5 combinations telling student what this would mean to a person.
   Give some examples of occupations in those categories.

3. Have students use Handout #3 "What are your Occupation Values?" Students will score their own answers. Discuss: The 5 values: security; status/recognition; financial reward; self expression; personal relationships. Stress that there are no wrong answers. Each person is unique. Knowing your own values will assist with career selection.

4. Have students use Handout #2 "Internal vs. External Survey." Discuss: The personality characteristics of internal versus external orientation and types of jobs that would interest each type. Stress that knowing what type of personality you have can assist in selecting a job that can be more enjoyable and cut down on job stress.

5. Have students combine their interest sheets and write a short paragraph about themselves and their job interests. Use example:
   "I am a high task, high people person. The jobs I am suited for could be working with people and getting lots of things done. Security is very important to me since I have a family to support. I have a balanced score on the internal versus external orientation survey which means I can work either alone or with people. The types of jobs that would most likely suit me are: salesperson, personnel manager, teacher, and other occupations similar to these."
   Have students look through occupation lists to choose those careers that most closely match the student.

6. Divide students into small groups using the 5 combinations from the occupational matrix in Handout #1. Have students brainstorm among themselves about possible occupations that would fit their orientation.

SKILL

1. Determining occupation values.
   ASSESSMENT
   Student will correctly determine his/her occupational values and state these values in a paragraph.

MATERIALS

- Handout #1 "Occupational Orientation Matrix"
- Handout #2 "Internal vs. External Survey"
- Handout #3 "What Are Your Occupation Values?"
- OPTIONAL: Handout #4 "Career Planning Questionnaire."
Subject Area: Job Search Issues

TEACHING STRATEGY & TECHNIQUES

   Use pages 57-66: "Making the Right Choice" which deals with choosing between several jobs using various criteria.
2. Use Handout #5 "Types of Goals." Discuss: The types of goals: long range, medium range, short range and mini goal. Give examples of each type of goal. Have students give examples.
3. Have students complete Handout #7 "My Dream Job." Discuss: "What is your dream job?"
4. Use Handout #6 "Action Steps in Goal Setting." Have students use the last two questions on "My Dream Job" and set up long range, medium range, and short range goals.
5. Discuss: Setting up a calendar that will list the dates of completion for each of the 3 goals.
Define: tasks - the steps needed to achieve a goal. Tasks are mini goals that can be completed in a short period of time. Have students break down a short range goal into specific tasks.
Tasks are:
1. Find a place to learn to type.
2. Find out dates of classes.
3. Find out if there is a charge.
4. Check your schedule to see if the typing class will fit.
5. Sign up to learn to type.
Put the completion due dates beside each task. Plan a review of each of these tasks in one month.

1. Define: barriers - things that get in the way of goals. Give examples of internal barriers: "I am too old to change," or "I can't do that." Internal barriers are things within you.
Discuss: What other internal barriers might you have? How would you change that barrier?
2. Give an example of external barriers: a lack of training or education for a particular job.
External barriers are things outside you. Discuss other external barriers. Ask: Can you change them?
3. Use Pages 52-54; 60-65 to identify individual strengths and weaknesses as barriers.
Discuss: Education as a barrier. "What are the internal barriers in education?"
Example: "I'm not smart enough to do that." How could you change that answer? "I'm willing to try and see if I am able to learn to do that."
What are external barriers in education? Example: A job requires a college degree, or technical school training. Can you change this barrier into a strength? Yes, by completing the requirements such as high school, technical training, or college.
Discuss: Internal barriers as walls we build inside ourselves to prevent us from achieving a goal.
Discuss: External barriers as things outside of us set up by others that hinder our progress toward a goal.
Subject Area: Job Search Issues

TEACHING STRATEGY & TECHNIQUES

3. Identify employment barriers and strengths.
   (continued)

4. Discuss how education can be a strength: better jobs, more choices of job, improved self esteem.
   Discuss training as a barrier: "What are the internal barriers in training?" Use example: "I'm too old to learn computer training. Or, I don't understand computers, I can't do that job."
   Discuss other external barriers that the students may suggest. Example: "The location of the training is too far away." Or, "The length of time required for the training is too long."
   Ask: "What can you do to change this barrier?"

5. Discuss personal barriers. Examples of personal barriers are:
   a) You are not sure how to begin an effective job search. Job applications are confusing to you.
      You have no idea how people find job leads. You don't know anybody. You do know that some people get a job because they "knew somebody." You don't know what to say to employers and interviews scare you. You don't look for a job because you are afraid.
   b) You give up looking for work too soon because it seems no one will interview you.
   c) You have weak points in your past that bother you, such as changing jobs a lot.

6. Use Handout #8 "Barriers." Have students check off those barriers that they see in themselves.
   Discuss some of the barriers and ways of overcoming them. Have class discussion about overcoming barriers.

7. Have students complete practice problems on page 93 which compares cost of cars and public transportation.

8. Have students work on pages 110-117: "Checking out a used car" and "Buying car insurance."

9. Have students summarize what they plan to do to get to work.

<tr>
<td>5. Managing child-care.  (optional unit)</td>
<td>Student will identify child care concerns and suggest solutions.</td>
<td>Contemporary Books: &quot;Work-Wise.&quot; Pages 84-86</td>
<td>1. Discuss with students what child care arrangements they have made. There are 3 basic types of child care available: a) care in child's home; b) family child care; and c) child care center. Discuss: Advantages and disadvantages of each type. Discuss: Comparison of child care arrangements: location; cost; flexibility of time; provision in case of illness. 2. Use &quot;Work-Wise&quot; pages 84-86. 3. Have guest speaker from private or government agency to discuss child care assistance for low income families. 4. Have student summarize what choices would be acceptable and give reasons for choice.</td>
</tr>
<tr>
<td>6. Developing good work attitudes.</td>
<td>Student will improve his/her work attitudes using a pre and post test evaluation of job-related attitudes.</td>
<td>Perfection Form Co: &quot;Take This Job and Love It.&quot;</td>
<td>1. Discuss: The desirable attitudes and give an example of each. Have students suggest examples. The desirable attitudes include: motivation, cooperation, responsibility, and self-confidence. 2. Have students work through &quot;Take This Job and Love It.&quot; Select chapters as needed. Chapter 1: Company policy on absences, gossip, listening, habits, and appearance. Chapter 2: Positive attitude, time management, problem solving ability, basic job skills. Chapter 3: Communications, types of bosses. Chapter 4: Job complaints, solutions to boring jobs, repetitive tasks, goals setting for quota achievement, stress management techniques. Chapter 5: Working towards promotion, looking for opportunities for training, and developing leadership qualities.</td>
</tr>
<tr>
<td>7. Evaluating appearance.</td>
<td>Student will assess his/her appearance and set goals for improvement.</td>
<td>&quot;Surviving On The Job&quot; [Bennett &amp; McKnight] Pages 24-28. OR: teacher-generated materials.</td>
<td>1. Use pages 24-28 and discuss appearance on the job. 2. Have a guest speaker to discuss good grooming, clothing care, the principles of style and color, and building a working wardrobe. Have students complete a self-color analysis to determine his/her most flattering colors. 3. Have students do a self-wardrobe analysis and develop a wardrobe plan for work wardrobe. 4. Discuss and demonstrate the difference between interview clothing and a work wardrobe. Use examples of a practical nurse who goes for a job interview dressed in a suit, however the work wardrobe will be the white nurses' uniform.</td>
</tr>
</tbody>
</table>
Subject Area: Job Search Issues

MATERIALS

Steck-Vaughn Books: "How To Get A Job And Keep It." Pages 40-49.

Teacher-generated materials.

TEACHING STRATEGY & TECHNIQUES

1. Use "Getting the Job You Really Want." Have students complete pages 37-41:
   - Filling out applications; answering want ads; going to Job Service; sending out resumes; using private and temporary employment agencies.
   - Discuss the advantages and disadvantages of each of these categories.

2. Pages 43-52. "The Hidden Job Market." These are jobs that are available that have not been advertised.
   - Define: Network - an informal group of people who have something in common.
   - Discuss: The use of a network to find out job openings.
   - Define: Networking - the process used in contacting these people. This can be telephonic calls, personal visits, introductions by friends to these people, and chance meetings.
   - Discuss: How calling one person or company and asking for other companies with possible openings can mount into a large number of opportunities.

3. Use Pages 40-49 to discuss interviewing for a job. Do activities as appropriate.
   - Have students fill out their own job applications. Evaluate the applications for neatness, completeness, legibility, and ability to answer questions appropriately.

4. Conduct mock interviews using the job applications as guidelines. Evaluate students on their appearance and ability to answer questions appropriately.

5. Discuss the following questions that are illegal in an interview:
   1. How old are you?
   2. Are you single or married?
   3. Do you have children or are you planning to have children?
   4. Do you have child care arranged? What would you do if your child was sick on a work day?
   5. Do you live by yourself?
   6. Questions about handicap, race, country of origin, often are requested but should not be discussed during the interview. These questions are only to be used to meet federal requirements.

6. Discuss the purpose of a resume. Show different types of resumes:
   - Chronological: categorized by type of job.
   - Functional: categorized by the type of job.

7. Have students develop their own resumes using guidelines in the book.

8. Discuss the use of a cover letter with a resume. The purpose of a cover letter is to briefly request an interview with a specific job and briefly describe your skills and abilities. Have students write a cover letter and critique each letter in class.

9. Writing a resume.

   4. Writing a resume.
Subject Area: Job Retention Issues

SKILL

1. Setting job goals.
   - ASSESSMENT: Student will set long term and short term goals.
     Handout #10 "My Career Goals"

2. Evaluating your job success attitudes.
   - ASSESSMENT: Student will determine his/her own job performance using questions for self evaluation.
     Handout #11 "Questions for Self Evaluation."

3. Understanding relationships with co-workers and the boss.
   - ASSESSMENT: Student will define "people skills" and tell why these skills are important.
     Bennett & McKnight: "Surviving On The Job." Pages 43-47.
     Perfection Form Co.: "Take This Job And Love it." Pages 25-35.

TEACHING STRATEGY & TECHNIQUES

1. Have students read page 116 and discuss: "What do you want to achieve?"
2. Use the opportunities listed as a basis for discussion.
3. Have students add their ideas of job goals.
4. Use Handout #10: "My Career Goals." Have students complete the questions.

1. Discuss the following:
   1) Advancement in your job requires setting up some guidelines and preparing yourself. 
      a) Do your job well. Be a careful, efficient worker. Ask: What does this mean to you? What does it mean if you were a boss?
      2) Show a sense of responsibility.
      3) Be willing to perform extra duties or work overtime as needed.
      4) Get to know the company and show interest in the company.
      5) Watch for opportunities for advancement.
   2 Discuss the meaning of the following terms as they might be used to describe an employee: Dependability; efficiency; good health; initiative; reliability; promptness; ability; loyalty; persistence; helpfulness; cheerfulness; willingness.
   3. Have students fill out Handout #11 "Questions for Self Evaluation." Discuss their answers in terms of achieving goals and setting goals for the future.
   4. Define: people skills - the ability to get along with others.
   5. Have students work on the exercises in "Attitudes On The Job" pages 49-69 as appropriate.

   3. Discuss the leadership styles of bosses:
      a) overly demanding boss: insists on excellent work from employees with no errors.
      b) ineffective boss: makes many errors but will never admit to them. Resents employees who have more education.
      c) petty type boss: is super critical of others. Doesn’t get along with others. Encourages quarreling among others by showing favoritism or carrying tales about others.
      d) know-everything type: doesn’t trust workers to do anything right. Doubts everyone’s abilities and constantly watches everyone to catch them making a mistake.
   4. Use exercises in "Take This Job And Love It," pages 29-32. Discuss how to respond to the various types of bosses. Have students discuss how they would respond. Discuss whether this is appropriate and what the results might be.

<tr>
<td>3. Understanding relationships with co-workers and the boss.</td>
<td>Student will define &quot;people skills&quot; and tell why these skills are important.</td>
<td>Educational Design: &quot;Attitudes On The Job.&quot; Pages 49-61. Bennett &amp; McKnight: &quot;Surviving On The Job.&quot; Pages 43-47. Perfection Form Co. &quot;Take This Job And Love It.&quot; Pages 25-35</td>
<td>4. Define: <strong>hostility</strong> - a feeling of ill will. Discuss: What kinds of problems may result because of this feeling between co-workers [examples: slow down of work, mistakes, quarreling.] Define: <strong>cooperation</strong> - working together. Discuss: Guidelines to follow in working with others. a) Be courteous and polite at all times. Give examples of this on the job. b) Develop a friendly attitude. Ask: &quot;What is meant by this?&quot; c) Ignore negative statements made by others. Ask: &quot;What are some negative statements?&quot; d) Don't become involved in gossip. This spreads wrong information and sometimes lies. e) Learn to accept other people's faults. Ask: &quot;How do you deal with someone who smokes and leaves ashtrays overflowing all over?&quot; f) Control your temper. Discuss: &quot;Ways of controlling temper.&quot; g) Accept criticism without being offended. Ask: &quot;What is meant by this?&quot;</td>
</tr>
<tr>
<td>4. Managing job and home.</td>
<td>Student will define what is expected of his/her at home and at work and discuss how he/she will cope with the demands.</td>
<td>Contemporary Books: &quot;Work-Wise.&quot; Pages 80-92. Handout #12 &quot;Work and Home Part I&quot; Handout #13 &quot;Work and Home Part II&quot;</td>
<td>1. Discuss: Not all parts of every job are pleasant and happy. Some parts may be boring, repetitive, or done in unpleasant environments. Give examples: <strong>boring</strong> - waiting as a cashier in a store with few customers and having nothing to do. <strong>Repetitive</strong> - Doing the same thing over and over and over many times per day. <strong>Unpleasant environment</strong> - Outside on a cold winter day or a hot summer day or in a high stress atmosphere. Ask: &quot;How would you deal with these areas?&quot; 2. Discuss areas of your personal [off the job] life that can have an impact on how you feel on the job. a) <strong>Social life:</strong> People need to interact with others regularly. It should be balanced—not too many late parties every night, nor never meeting with people except on the job. Have students discuss how social lives off the job can affect your job. b) <strong>Money problems:</strong> If you spend more money than you make, tension of trying to make ends meet can result. How can you deal with this? c) <strong>Family problems:</strong> A parent or child who is ill, child care problems, or other family concerns can affect your job. Example: sick child keeps you awake all night and you arrive late to work and very tired and as a result make many mistakes. 3. Have students fill out Handout #13 &quot;Work and Home Part II.&quot; Discuss answers. Use &quot;Work-Wise:&quot; - A Balancing Act.</td>
</tr>
</tbody>
</table>
Subject Area: Job Search Issues

SKILL

4. Managing job and home.

ASSESSMENT

Student will define what is expected of him/her at home and at work and discuss how he/she will cope with demands.

MATERIALS

Handout #14 "Work and Home Part III"

TEACHING STRATEGY & TECHNIQUES

4. Discuss: How work habits affect home life. Use Handout #14 "Work and Home Part III".
   a) Long hours at work: Always working late reduces time for significant others; long hours can affect health. What can you do to change this?
   b) Competition at work: You are ambitious and always working hard to get ahead of others.
   c) Traveling a lot on the job: Your job requires that you travel and sometimes you must leave at very early hours or arrive home very late in order to meet transportation schedules. What impact will this have on your family? What can you do to cut down on problems?
   d) High on the job stress: Your job is a very demanding job. Everything is done on a tight deadline, or is life threatening in some manner. [Example: an emergency room nurse.] How can you handle this? [Suggest: develop a routine to reduce stress level before going home.]

5. Leaving a job.

Student will give the appropriate responses on how to deal with leaving a job.

MATERIALS

Handout #15 "Is It Time For A Change."

TEACHING STRATEGY & TECHNIQUES

1. Discuss: Leaving a job can occur voluntarily or involuntarily. Examples are as follows:
   Voluntarily leaving - found a new job; look for a new job; attend school; move from area; illness.
   Involuntarily leaving - layoff due to lack of work; fired [dismissed]; place closes down.
   Ask: "What other reasons might cause you to leave a job?"

2. Have students fill out Handout #15 "Is It Time For A Change?" Discuss answers.

3. Ask: "Why would you decide to change jobs?" Answers expected: To advance in a job; to earn more money; move from the area; return to school for more education. Discuss: Why you should never tell people at work about your decision to leave? Answers may be:
   a) "You could lose your present job; create hostility of part of co-workers or supervisor; create an opportunity for gossip."
   Discuss: "Should you quit your job before finding a new job?" Answers: "No." Reasons are:
   a) Because you will not have a paycheck if you quit.
   b) Employers prefer to hire someone who already has a job rather than someone who does not.
   Discuss: What should you do if you decide to resign? Answer: Inform your supervisor as soon as possible. As a rule, try to give two weeks notice before leaving. Write a letter of resignation using the guidelines in "Work-Wise," page 123. Explain why you are leaving.

4. Use Handout #16 "Guidelines For Advancing At Work" Discuss: Importance of knowing your job goals so that you can determine whether they are being met or bypassed.
Subject Area: Job Search Issues

MATERIALS
- Job World: Video: "Your Appearance II: On The Job"
- Teacher-generated materials
- Guest Speaker: clothing consultant.

TEACHING STRATEGY & TECHNIQUES
1. Have students view video tape.
2. Discuss: Your appearance creates an impression about you. Give examples from magazines, or other sources. Demonstrate how impressions about a person are gained from appearance. Use old clothing or other items and dress yourself or others in inappropriate clothing. Discuss the impression this appearance made about your opinion of the person.
3. Ask: "What clothing is appropriate for a secretary or a salesperson who has a lot of public contact? What clothing is appropriate for a factory job? Are the styles different? If so, why?" Point out that the safety requirements of factories may affect the type and style of your clothes.
4. Discuss clothing care and maintenance: sewing torn seams; replacing missing buttons; stain removal and appropriate fit (neither too tight or too loose, or too revealing.)
5. Have a clothing wardrobe consultant as a guest speaker. This could be a department store consultant or other person who could discuss color combinations and wardrobe building techniques.
6. Have students develop a wardrobe plan by listing the following:
   a) What items are in their wardrobe, include colors.
   b) What items are needed to build a flexible wardrobe appropriate for their job.
   Help students analyze the plan and make adjustments as required. Set up a budget to do this.
6. Have a cosmetologist discuss hair care and makeup.
7. Discuss: Determining appropriate clothing by observing co-workers clothing. Unless told differently by a supervisor or manager, dress similarly to co-workers working in your same general location. Stress that employees in factory situations need to consider whether they work in an office area or a manufacturing area when deciding on appropriate clothing.
Subject Area: Job Search Issues

TEACHING STRATEGY & TECHNIQUES

1. Have students examine their health habits in the following areas:
   a) Diet. Eating 3 balanced meals per day. Reducing amount of "junk food." No overeating and eliminate between meal snacks.
   b) Drugs, alcohol and cigarettes. Discuss the effects of these substances upon the body. Have a nurse or doctor or other person present this lesson.
   c) Sleep. The body requires appropriate amounts of rest in order to refresh itself. Discuss the effects of lack of sleep upon your ability to do your job safely and becoming sick often.
   e) Physical checkups. Detecting problems early before serious diseases result. Use the examples of: high blood pressure and cancer which can be fatal if untreated.
   f) Mental Health. Keeping a positive outlook, and reducing stress levels. Maintaining a balanced schedule including work, home and personal time.
   g) Cleanliness. Reducing objectionable body odors by showering, daily brushing and flossing of teeth; using deodorant, breath mints or mouthwash. Hair should be neat, clean [washed often] and combed. Nails should be trimmed and clean, polished as appropriate. Shoes and clothing clean and appropriate for job.
   h) Exercise. Keeps you in shape and reduces fatigue.

Discuss how neglecting these areas can affect promotions and retention.
Subject Area: Personal Development

### SKILL
1. Understanding who I am.

#### ASSESSMENT
Student will correctly identify his/her values, needs and personality.

#### MATERIALS
- Handout #1 "Who Am I"
- Large mirror.

#### TEACHING STRATEGY & TECHNIQUES
1. Bring in a large hand mirror or framed mirror. Have students come forward, one by one, and look in the mirror. Then return to their seat and complete Handout #1 "Who Am I?" Use the following as discussion questions:
   a) How many people included eye color; hair color; age; clothing being worn; size (tall, short, fat, skinny).
   b) How many people began to describe themselves as "single; married; divorced; parent; old; young; or by the job they have (secretary, typist, assembler, mechanic etc.)

   Discuss: There are many parts that make up the total package of who we are. Some things about us can be seen by everyone. For example: whether we are tall or short. This is only one part of who we are: our physical selves. Anyone walking down the street, or coming into this room would see only the physical part of us. You probably did this when you described your classmate. Discuss the differences in the two descriptions: one done by the student, the other by the classmate.

2. Those of you who began to describe yourself by telling us you were: single, a parent, a secretary, a mechanic, were describing yourself by what you have done. These are deeds or achievements that are not visible to anyone unless you tell us. We can't tell by looking at you what mistakes you may have made, or what problems you may have, or even how smart you are. These are deeds that are not visible as we look at each other. This means that no matter what we have done, and no matter what has happened to us in the past, no one can see these things unless we choose to tell them. All of our past does not exist and we can forget. Any past mistakes are gone because no one can use them to describe us because they can't see them.

1. Have students fill out Handout #2 "Unhappy Times" and describe unhappy or unpleasant times. Allow 5 to 10 minutes to complete handout and fold the paper so the writing can't be seen.

   Discuss: We store up things in our minds that no one else can see except us. These are the problems, mistakes, and unpleasant or unhappy memories that we store in our "self-image" box. Sometimes, that self-image box gets so full of bad memories that do not show us as we really are. Then, it is time to clean out our "self-image" box. It's like sorting clothing in our closet that don't fit us because we have changed sizes, or don't like the color. However, we keep stuffing more and more clothing into the closet until there is no more room for new items. So we clean the closet.

   When you wrote down all the unpleasant, unhappy things, you were cleaning out your "self-image" box. All the things that you don't like and may not really describe you are on that paper.

</thead>
<tbody>
<tr>
<td>1. Understanding who I am. (continued)</td>
<td>Student will identify his/her values, needs and personality.</td>
<td>Handout #2 &quot;Unhappy Times&quot; Metal trash can, matches (or lighter) and water.</td>
<td>Let's get rid of these things! Tear those papers into small pieces and place in the metal trash can. From now on, you can only place happy images in your &quot;self-image&quot; box. Happy images are the compliments we pay ourselves. For example: &quot;What a good job I did; I look pretty in this outfit; I'm really creative; My hair looks beautiful.&quot; If someone tries to slip in a negative image of us in our &quot;self-image&quot; box, pull out a happy image instead and mentally pretend to close the lid to help remember to keep out the unhappy things. Remember, people can only see the things on the outside of us.</td>
</tr>
</tbody>
</table>
| Handout #3 "I Am A Person Who..."         |                                                 |                                             | 1. Have students fill out Handout #3 "I Am A Person Who..." and self-score it according to the instructions on the second page. There are no right or wrong answers. Discuss: The way we think about ourselves is called a "self concept." Self concept has 5 categories:  
1) General, which describes you as a person  
2) Your idea of your thinking abilities  
3) Your idea of your physical appearance  
4) Your social relationships  
5) Your image in school and studying  
Each of us has a different idea of ourselves. Sometimes positive or negative depending upon the situation. Understanding how we think of ourselves can explain why we make the choices we do. Self concept does not mean the same as abilities. A person could be very capable in some areas, yet think he/she is not capable in this area. For example: a good cook who thinks she/he can't cook. This is an unrealistic self-image and can lead to problems. An example of the damage an unrealistic self-image can do to a person is the eating disorder anorexia. A person with a self-concept of being over weight (even though this is not true) will stop eating in order to lose weight. However, since the person is unable to see the true image of him/herself; the concept of "too fat" continues even when he/she is really thin. Have student review negative areas on Handout #3 and make plans to change these areas over a period of time. |
| Handout #4 "Ten Steps To Brighten Your Life." |                                                 |                                             | 1. Have students do one of the ten steps each day for ten days. Continue working on the ten steps and keep a journal to record what was done and the results.  
2. Discuss: Why is self esteem important? Use Handout #5 as discussion topics. |

<td>1. Have students complete <strong>Handout #9</strong> &quot;The Perfect Person.&quot; Ask: &quot;Are you perfect? Is anyone perfect?&quot; 2. Have students complete <strong>Handout #10</strong> &quot;Truths.&quot; Stress that in order to be considered <strong>true</strong>, the statement must agree with experience, facts, or reality. If you <strong>believe</strong> the statement is true, do nothing. If you believe the statement is not true, rewrite the statement to fit what you believe is true. 3. Have students complete &quot;Do You Agree?&quot; 4. Have students complete the story endings based on their decisions. Review with the students the dictionary definition of value - a principle, standard or quality considered important. Ask: &quot;Are all values the same?&quot; [Answer: no] Each person determines what values are important to him/herself. Ask: &quot;How can your values affect your job?&quot; Example: You believe that you should never say harsh or unkind words. However, your boss is hostile and angry toward everyone. How would this make you feel? Or: You are expected to do something that you considered wrong such as change records to cover up problems, or discard items you know could be used by someone. How would this make you feel?</td>
</tr>
<tr>
<td>3. Assessing Appearance.</td>
<td>Student will evaluate his/her appearance and suggest changes.</td>
<td>Learning Seed: Video tapes: &quot;Color in Clothing.&quot; &quot;Fashion in your Figure.&quot; &quot;Clothing: An Intelligent Buyers Guide.&quot; Guest Speaker: Hair stylist. <strong>Handout #13&quot; Wardrobe Analysis.&quot;</strong></td>
<td>1. Discuss: How appearance relates to &quot;feeling good&quot; about yourself. Ask: Have you ever worn an outfit you knew looked good on you, and you felt great wearing? Remember how you felt? If you feel good about yourself you will give a more confident &quot;in charge&quot; image and people will notice this. Ask: How would this &quot;good feeling&quot; about yourself affect your home life and workplace image? 2. Use the &quot;Color in Clothing&quot; video tape to demonstrate how color can affect our appearance and how we feel about ourselves. Discuss: Appearance is more than just &quot;how we look at work&quot; it also carries over into our home life too. 3. Discuss: Hair style and appearance. Have hair stylist discuss various styles that would be suitable for members of the class. 4. Have students evaluate their casual &quot;at home&quot; wardrobe. Is it in good repair [no missing buttons, snaps, broken zippers, or rips needing attention]. Ask: What could you change to improve this wardrobe? 5. Have students fill out <strong>Handout #13&quot; Wardrobe Analysis&quot;</strong> and discuss improvements that could be made.</td>

<td>Handout #16 &quot;Treat Yourself.&quot;</td>
<td>3. Have students complete Handout #16 &quot;Treat Yourself.&quot; Ask: How strict are you with yourself before you treat yourself?</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>4. Have students complete Handout #17 &quot;Common Needs.&quot; Discuss: Needs are not always material things, they can also be other things. Give examples of non-material needs: acceptance as an individual by family and friends; love and security in your life.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Handout #17 &quot;Common Needs.&quot;</td>
<td>5. Use Handout #18 &quot;Maslow's Hierarchy Of Needs&quot; as a basis for discussion of how our needs are a step-by-step pyramid. In order to get to the higher levels, we need to form a good secure base.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>6. Use Handout #17 &quot;Common Needs.&quot; Have the students decide where on the pyramid scale a certain need is found. Have students determine whether their needs are low, medium, or high. Categorize as follows: low level = passed that level; medium level = working in that level; high level = have not gotten to that level. Have students determine where they are on the pyramid scale and if they are working on too many levels at once. Discuss: This is scattering your resources and leaves you feeling insecure and anxious. Ask: What level should you be working on now? Answer: The lowest level on the pyramid scale. If you have satisfactorily completed that level, tell why you think that is the case.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>7. Have students set approximate go:is to achieve mastery of the first 2 levels and begin working on level 3 as necessary.</td>

</table>
| 5. Developing good health habits. | Student will apply appropriate hygiene habits. | Bennett and McKnight: "Surviving On The Job," Pages 85-91. [Good Stress/ Bad Stress] Guest Speaker: nurse or doctor. | 1. Have students examine their health habits in the following areas:  
   a) **Diet**: Eating 3 balanced meals per day. Reducing amount of "junk food." No overeating and eliminate between meal snacks.  
   b) **Drugs, alcohol and cigarettes**: Discuss the effects of these substances upon the body. Have a nurse or doctor or other person present this lesson.  
   c) **Sleep**: The body requires appropriate amounts of rest in order to refresh itself. Discuss the effects of lack of sleep upon your ability to do your job safely and becoming sick often.  
   d) **Physical checkups**: Detecting problems early before serious diseases result. Use the examples of: high blood pressure and cancer which can be fatal if untreated.  
   e) **Mental Health**: Keeping a positive outlook, and reducing stress levels. Maintaining a balanced schedule including work, home, and personal time.  
   f) **Cleanliness**: Reducing objectionable body odors by showering; daily brushing and flossing of teeth; using deodorant; breath mints or mouthwash. Hair should be neat, clean [washed often] and combed. Nails should be trimmed and clean, polished as appropriate. Shoes and clothing clean and appropriate for job.  
   g) **Exercise**: Keeps you in shape and reduces fatigue.  
   Discuss: Neglecting these areas can affect your and others opinion of you. |
| 6. Reducing personal danger. | Student will respond with appropriate preventative measures to protect his/her personal safety. | Handout #19 "Lady Beware Series" [A series of 9 fact sheets for protection of self and possessions] Guest Speaker: Police officer. | 1. Set up a woman's pocketbook to contain the following:  
   a) a bank envelope containing a large amount of play money.  
   b) bank deposit slip showing account number which could allow cashing of checks by writing bank number on back of check.  
   c) keys with full identification of name, address and telephone number.  
   d) credit card or food stamp books with identification cards together.  
   e) change purse with bills and coins mixed together.  
   f) keys to car and house on same key ring.  
   g) open handbag, not zippered, or closed. |
| | | | 2. Have students look through pocket book and list 7 items that should be changed. See Handout "Organize Your Pocketbook and Prevent Crime" [Part of the Lady Beware Series]. |
| | | | 3. Discuss: Do not place pocketbook in shopping cart while shopping since it is easy to leave your pocketbook unprotected if you step away to get something off a shelf. Review rest of "Lady Beware in a Supermarket" with the class. Discuss: Why should you follow these steps? If there are men in the class use Handout: "Shopper Beware in the Supermarket." |
| | | | 4. Select other handouts of the "Lady Beware" series as appropriate and use for discussion. |
| | | | 5. Have police officer discuss personal safety, not walking alone very late at night in dark areas. Have recommendations for self protection defense such as mace, whistle, or other suggestions. |
### Subject Area: Home Life Issues

#### TEACHING STRATEGY & TECHNIQUES

1. Have students look at their work life and list responsibilities (demands) at work. Suggested answers:
   - Coming in on time; working required number of hours; doing each task completely and correctly; following directions; learning to take more responsibility; interpersonal relationships.
2. Have students look at their home life and list the demands at home. Suggested answers:
   - Meeting needs of family for food, clothing, and clean home. Taking care of children.
   - Taking additional education courses to meet career goals. Spending time for yourself.
   - Discuss: Time demands required for you each day. Ask: How do you manage to do everything?
3. Have students keep a daily diary over a period of time (2 - 3 days or a week). Diary should list what they did, time started and time stopped. While the diary is being kept, have students develop short term [6 months to 1 year] and long term [over 1 year] goals.
4. Complete Handouts #20; 21; 22 "Time Management I, II, III" Discuss: How you could change things to improve your schedule. For example: give yourself more time in some categories and less in others. Do things differently [more efficiently.] Ask: "Do you have enough time to do personal things and family things? Is there some way you could change this? Do you have time alone to be with an adult friend or must you always have child care responsibilities? How could you change this?"
   - Suggest: sharing babysitting duties with a trusted friend or relative. You would watch their child/children in return for the same opportunity for your child/children. Work it out on an hour for hour basis: one hour opportunity for your child/children to be watched in return for you babysitting one hour.
5. Use Handout #23 "Child Development" as discussion topics.
6. Discuss physical capabilities of children: birth to age 5 and over as needed.
   - Visit a day care center and observe the capabilities of the various ages of children. This is especially useful, if the students are parents of young infants and may be unfamiliar with the physical capabilities of older children.
   - Give students several motor skill milestones or eye-hand skills and ask: "What age could a child be expected to do this?"
   - Ask: How can knowing what a child is capable of doing affect the type of toy you give him/her?

SKILL

2.B. Understanding behavior of children at 6 months to 5 years.

ASSESSMENT

Student will describe ages and stages of what to expect of preschoolers behavior.

2.C. Understanding and planning to change behavior problems.

Student will select areas where behavior problems are a concern and plan how to cope with behavior.

MATERIALS

Handout #24 "Ages and Stages of Expected Behavior of a Preschool Child."

Guest Speaker: doctor; nurse; or other child development specialist.

Guest Speaker: child development specialist.

Handout #25 "The Problems I’m Having With My Child."

Handout #26 “My Discipline Practices.”

TEACHING STRATEGY & TECHNIQUES

1. Discuss: Stages of child behavioral development: Infant [birth to 8 months]; crawling and walking [8 months to 18 months]; Toddlers to 3 year old [18 months to 3 years] 4 - 5 year old.

Explain that knowing how a child acts at different ages can help the parent understand that some annoying behaviors will be outgrown. For example: the 2-year-old behavior of saying “no” many times. He/she may not mean “no” but enjoys saying or motioning “no.”

2. Have the students look at the behavior of their own child/children as though they were babysitting the child. How would the parent change behavior toward the child? Would certain behaviors be overlooked? Ask: “Would you overlook certain behaviors? If so why? If not, why not?”

1. Have students complete Handout #25 “The Problems I’m Having With My Child.” Compare the identified problems with Handout #24 "Ages and Stages of Expected Preschool Child Behavior.”

Discuss: How many of the behaviors are expected and normal for the age of the child?

Have students complete Handout #26 “My Discipline Practices” and put it aside.

2. Define: assertive discipline - a corrective action designed to help teach children more appropriate behavior. Discuss: Discipline does not mean hitting or spanking the children. Discuss: Planning to:

1. Communicate so that your children will listen.
2. Back up your words with actions.
3. Take charge and lay down the law.

3. Discuss ineffective responses to children’s behavior:

1. Questions that cannot be answered. Example: “What am I going to do with you?”
2. Begging. Example: “Please try to behave.”
3. Threatening. Example: “Next time you do that you’re in trouble.”
4. Verbal put downs. Example: “You are a terrible child.”
5. Unrealistic threats. Example: “If you do that again you will wish you didn’t live here.”
7. Physical responses that only release your anger. Example: Screaming or throwing things or ineffective responses that do not clearly state what the parents want the child to do.

4. Discuss: Communicating assertively: a) make eye contact; b) keep calm c) avoid arguing and d) use praise.
2. C. Understanding and planning to change behavior problems.

(continued.)

Subject Area: Home Life Issues

ASSESSMENT

Student will select areas where behavior problems are a concern and plan how to cope with behavior.

MATERIALS

"Assertive Discipline For Parents" Pages 106, 108.
Pages 113-118.
Appendix 2 Worksheets.

TEACHING STRATEGY & TECHNIQUES

5. Discuss: Backing up words with actions. Use guidelines in "Assertive Discipline for Parents," pages 27-43. Guidelines are:

1. Consequences must be something that children do not like but are not physically or mentally harmful. Example: Separation into a non-stimulating "boring" situation: sitting alone.

2. Consequences must be related to misbehavior. Example: A five-year old splashes water and makes a mess while taking a bath. Consequences of misbehavior are that he/she is required to clean up the bathroom. Consequences should be provided as a choice.

Example: "If you choose to splash water all over the bathroom, then you also choose to have to clean it up." The consequence must be provided every time the child misbehaves. If the consequences do not work, change the consequences.

6. Define two types of misbehavior: a) Minor misbehavior - annoying, run-of-the-mill misbehavior such as not doing chores; periodic attention getting outbursts; and sibling rivalry.

b) Serious misbehavior - those behaviors that severely challenge parental authority, or that are dangerous, self destructive, and threaten the well-being of the family unit.

Use page 108. "Disciplinary consequences for serious behavior." Discuss: These are serious misbehaviors and consequences must be chosen for the appropriateness to the child's actions.

7. Review Handout #25 "Problems I'm having with my child" Ask: "Which of those behaviors could be considered minor problem? What consequences would be appropriate? How will you assert yourself and take charge of your child's behavior?" Have students brainstorm about how to deal with specific misbehavior committed by his/her child or children.

8. Discuss: Some of the child's behaviors are good and need to be reinforced. Examples: child cleans up dirty clothes; child comes home on time; child is quiet when you are talking. Ask: "How would you reward these behaviors?" The child should be recognized for the appropriate behavior. Have students decide how they will reward the child for appropriate behavior.

9. Use the discipline plan worksheet to plan which two behaviors of your child must be changed. Discuss with another adult family member which disciplinary consequences to use.

10. Use the positive reinforcement worksheet and have students sit down with their children and ask what the/she would consider rewards, or what activities he/she likes to do. This form is to be filled out for future use in rewarding good behavior. Update the form periodically as the child's interests change.

11. Use Handout #27 "Assertive Discipline for Parents-An Overview" as a review for this unit. Discuss selected topics as appropriate.
### Subject Area: Home Life Issues

**SKILL**

<table>

<tr>
<th>ASSESSMENT</th>
<th>MATERIALS</th>
<th>TEACHING STRATEGY &amp; TECHNIQUES</th>
</tr>
</thead>
</table>
2. Selection of toys can be critical. Ask: "Why do you buy certain types of toys for your child?" Answers expected are: "They like to play with that type of toy. I want them to learn to play with that toy. I liked that type of toy when I was their age."
3. Demonstrate inappropriate toys for very young children. Examples: those toys with small parts; heating toys; those toys firing projectiles; or very heavy items. Explain the dangers of certain toys. Try to find a list of appropriate types of toys for various aged children. The local university pre-school education department may have a list of recommendations.
4. Take a class trip to a large toy store and discuss which toys would be appropriate for what age child and why. Look for toys parents can play along with the child such as dolls or cars and trucks or games.
| | **Materials** | **TEACHING STRATEGY & TECHNIQUES** |
| | Contemporary Books: "Ready To Work." Pages 86-87. | 1. Ask: "Where would you take your child for daycare while you work?"
Discuss 3 basic types of child care:
a) **Care in child's home.** A babysitter comes into your house to stay with the child.
   Advantage: Child is in a familiar surrounding.
   Disadvantage: May have to provide transportation. Having a stranger in your home among your personal possessions.
b) **Family child care.** Child is taken to child care providers home every day.
   Advantage: May have other children there as companions.
   Disadvantage: Must leave early enough to drop off child as well as to pick up child.
   Child is away from familiar surroundings at first.
c) **Child care center.** A center with trained adults located at place of employment or nearby where the child is taken to spend the day.
   Advantage: A trained staff meeting health and adequate staff requirements.
   Disadvantage: Some centers are overcrowded and unpleasant for children.
| | Pennsylvania Commission for Women: "A Day Care Checklist." | 2. Use "A Day Care Checklist." Have students select several day care facilities where they might place their child. Use the checklist and answer each of the questions by calling or visiting the center. Ask: "Are there any concerns you would have in selecting a child care place for your child? If so, what?"
3. Have students select a day care place for his/her child and explain why the place was chosen.
4. Have a child care provider visit and discuss the child care available at this/her location. Visit a day care center, if possible and observe the daily activities.
5. Find out what type of after school care is available for the school-aged child. Have someone as a guest speaker from this type of center. Discuss: Similarities and differences from other centers.
Subject Area: Home Life Issues

SKILL

3. Managing your money.

ASSESSMENT

Student will set up a budget and discuss advantages and disadvantages of using credit.

MATERIALS

Contemporary Books:
"Lifescenes/Life Skills"
Pages 37-41.

TEACHING STRATEGY & TECHNIQUES

1. Discuss: The purpose of a budget. Define: budget - A budget is a plan showing how people plan to spend their money. All budgets must include money for basics such as food, housing, clothes, and transportation. It is a tool to help control your money.

2. Have students develop a budget for themselves. Have them use their income and expenses (such as rent, utilities, transportation, food, and clothing). Use Lifescenes/Life Skills pages 37-41 as a model.

- Fixed expenses - those expenses paid every month such as rent, utilities.
- Variable expenses - occasional expenses such as car insurance or clothing.
- Spending money - reserved for day-to-day expenses such as gasoline for car, entertainment, lunch or vending machine snacks.

4. Discuss: Using credit to purchase large items such as automobiles, houses, and furniture.

There are 3 ways of obtaining credit:

- Loan: money borrowed from a bank, finance agency, credit union, or relative. Payments include interest.
- Credit card: items purchased are charged and then paid either in set amounts each month or total balance the next month after purchase. Balance can include interest if payments are less than total balance.
- Finance through: the seller: the store or dealer arranges financing through a bank or other lending agency. Payments include interest.

B. Discuss: Disadvantages of using credit to purchase items:

1) Increase amount of fixed expenses that must be paid every month.
2) Payments may be too high to fit the budget.
3) Failure to repay on schedule may result in late charges and a bad credit rating.

Define: credit rating - a credit history of your loans and payments. Paying late will make it difficult to obtain credit in the future.

C. Have students complete practice problems on page 88. Discuss the answers.

Ask: "What could you do if you are having problems making payments?"

Suggested answers: Contact credit company and make arrangements to make smaller payments over a longer period of time. Pay only interest one month and then make regular payments afterwards. Not buy things on credit. Get a second job to pay off high debts and give up using credit cards. Contact a credit counselor who could discuss how to manage the payments. Have your paycheck go to the counselor who would make all your payments and give you a set amount of spending money.

D. Complete Handout #28 "Using Credit." Discuss answers.
Subject Area: Home Life Issues

4. Understanding factors to consider when renting a place to live.

**ASSESSMENT**
- Student will select a place to live that meets income and family suitability criteria as defined in Handout #29 “Apartment Rental.”
- Use the individual budgets developed by the students. Have the students discuss how much he/she could pay for rent including heat, gas, and electricity. Have a guest speaker from the electric/gas company to discuss how much an average utility bill could be. Or: Use handouts from these places which give the same information on average costs.

**TEACHING STRATEGY & TECHNIQUES**
1. Use the classified section of the newspaper. Have students select apartments or houses that are within the student's budget range. Use Handout #29 "Apartment Rental" to compare apartments. Write answers on page 49 “Practice Problems Worksheet” in “Lifescenes/Life Skills.”

**MATERIALS**
- Contemporary Books: "Lifescenes/Life Skills"
- Pages 47-59.
- Handout #29 "Apartment Rental."

5. Understanding a lease.

**ASSESSMENT**
- Student will understand the conditions of a lease.

**MATERIALS**
- Contemporary Books: "Lifescenes/Life Skills"
- Pages 50-54.

**TEACHING STRATEGY & TECHNIQUES**
1. Define: **Lease** - contract between landlord and tenant. **Sublease** - an agreement between original tenant and a new tenant who takes over the apartment for the remainder of the lease. **Premises** - place being rented. **Liable** - responsible for damages. **Negligence** - not taking proper care. **Breach** - action that breaks a contract.

2. Discuss: Signing a lease is a legal promise to pay a certain amount of money at a specific time, and a promise to behave in certain ways. Example: tenant may have to shovel snow off sidewalks or stairs; be quiet at certain hours; not have pets; keep apartment clean. If you know you cannot do some of these things (shovel snow, or you have pets) do not sign the lease. Choose another place.

3. Use discussion questions page 51. Discuss the apartment lease on page 53. The questions request information about parts of the lease: Notice to move requirements; security deposit; and what are considered violations of the lease.

4. Discuss: The meaning and purpose of a **security deposit**. Ask: "How will you pay this amount?"
### Subject Area: Home Life Issues

#### ASSESSMENT

6. Starting utilities.
   - Student will find out what is required and where to go to start utilities; whether a deposit is required; and location of meters or tanks on property.

7. Comparing grocery prices.
   - Student will compare prices among various grocery stores and determine which store to shop at and tell why.

8. Buying a used car.
   - Student will examine a used car using a check list. Then, evaluate a car for potential problems and describe these problems.

#### TEACHING STRATEGY & TECHNIQUES

1. If a student is looking for a place to rent, have him/her complete this exercise for his/her apartment when the apartment is rented. If the student already has a place to live, have him/her use the current location. Answer the questions on Handout #30 "Starting Utilities."

2. Have students estimate his/her first month utility bills. Ask: "Will you need to fill a gas or oil tank? How much will you pay?"

1. Have students prepare a grocery list being specific as to product size.

2. Define: unit price: the price per unit of measure of an item. Example: per ounce or cup. Use table of weights and measures [page 64] or dictionary [look up "measurement"]. Define: ounces/pounds [oz., lb.] is a weight measurement; fluid ounces [fl.oz.] is a liquid measurement. Example: Sixteen fluid ounces equals 2 cups. A pint is 2 cups or 16 fluid ounces [fl.oz.]

3. Discuss: What amounts of food are normally used in your home? Example: How much bread would you eat in a week? 1 loaf, 1/2 loaf? How does this affect how much you will buy?

4. Have students comparison shop [by themselves] for prices on various items. Use sale flyers or other ads. Determine which store has the most bargains that week. Discuss: Is it a good idea, in order to buy an item at the cheapest price; to travel to several stores buying one or two items each? Ask: What do you consider when deciding where to purchase some items?

5. Do practice problems on page 64 and 65.

1. Ask: How do you decide which car you should purchase? Discuss student’s answers. Explain that prices alone may not show which car is the best selection.

2. Use Handout #32 "Used Car Checklist." Observe the overall condition of the car. Look at cleanliness; condition of upholstery; mileage on odometer; condition of interior.

3. Discuss: Spot-checking certain areas: check transmission fluid for color which may indicate damage. Check oil and condition of engine [oil covered or with signs of oil or other leakage.] [Check age of battery.]

4. Have an auto mechanic as a guest speaker to discuss how to select a used car. Visit a used car lot and use Handout #32 "Used Car Checklist" to compare cars.

Student will define types of insurance and select appropriate car insurance.

MATERIALS
Guest speaker: Independent car insurance agent. (one who represents several companies).

TEACHING STRATEGY & TECHNIQUES
1. Use "Lifescenes/Life Skills" pages 114-117.
2. Define:
   - Bodily injury liability - responsibility to pay the cost of damage to another person's property.
   - Medical payments - cost of medical treatment for you or other passengers in your car.
   - Uninsured motorists protection - insurance for injuries caused by a driver who has no insurance.
   - Collision insurance - covers cost of repairing your car if it is damaged in an accident regardless of who was at fault.
   - Comprehensive insurance - pays the cost of damage that does not result from a collision with another car. Example: your car is hit by a falling tree.
3. Have guest speaker discuss various types of auto insurance and what are the required types of insurance and the limits of coverage. Use a typical car and pretend to buy insurance for the car. Find out what the insurance will cover and the cost. Ask the insurance agent to define "no fault insurance."
4. Have students compare insurance coverage for a car using different companies. What are the major differences? Discuss: Is cost of insurance always the most important consideration? How would the different insurance companies require payment? What would happen if an insurance company refused to sell you insurance?
1. **Understanding non-traditional careers.**

**TEACHING STRATEGY & TECHNIQUES**

**1. Use Handout #33 “Role Expectations” as a means of introducing sex-role expectations and limitations.**

Give students 2 copies of Handout #33. Have students fill out the first form as follows:

1) As other people (family, friends, neighbors) think you should act.

Use Handout #34 “Women and Non-Traditional Work.” Discuss: Differences in wages in occupations normally held by white men. Discuss: Why might have a different role than someone who is currently held by an opposite sex.

2) As he/she wants or thinks his/her role should be. Do not discuss at this time.

Have students fill out the second copy of Handout #33 “Role Expectations” as follows:

1) As other people (family, friends, neighbors) think you should act.

Use Handout #35 “Women and Men in the Paid Work Force.” Discuss: How times have changed over a period of time with regard to sex roles. Their parents may have done things in a traditional way. Women cooked and did housework; men took care of mechanical repairs etc. Ask: Do women now appear on home repair programs doing various jobs? For example, “Home Time” on Public Broadcasting System. Discuss: Changing roles within families and why this may be happening. In which role are you the most comfortable and the most happy: #1 as society demands, or #2 as you desire?

3. Handout #36 “Changing Attitudes.” Use discussion questions and class exercises.

5. Use software: “Values and the Work Ethic” to find career interest and individual student values.

6. Discuss: Dealing with biased attitudes on the job. Ask: "What are the comments you might hear from people who have a biased attitude about certain jobs?" Example: nurses are women; or truck drivers are men. Discuss: Ways of dealing with biased attitudes on the job or with family and friends.

**MATERIALS**

- Handout #33 “Role Expectations.”
- Handout #34 “Women and Non-Traditional Work.”
- Handout #35 “Women and Men in the Paid Work Force.”
- Handout #36 “Focus: Changing Attitudes.”
- Handout #38 “Non-Traditional Job Bias: Questions for Discussion.”

**ASSESSMENT**

- Student will decide whether or not to seek a non-traditional career and give reasons for decision.
- Handout #33 “Role Expectations” to assess sex-role expectations and limitations.

**Subject Area: The World And Work Issues**
Subject Area: The Work and Work Issues

SKILL
1. Understanding non-traditional careers.

ASSESSMENT
Student will decide whether or not to seek a non-traditional career and give reasons for decisions.

MATERIALS
Handout #37 "Tokenism."

TEACHING, STRATEGY & TECHNIQUES
9. Dealing with "being the token person." Use Handout #37 "Tokenism." Discuss: The atmosphere likely to be found on a job where employees have biased attitudes about jobs. The following are examples of what to expect:
   a) Testing: This occurs with all newcomers to a group, but is especially difficult for the opposite sex newcomer who is often tested longer.
   b) Visibility: High visibility in everything done and everything said becoming public information. This brings high performance pressure to do perfect work which could lead to resentment by co-workers.
   c) Contrast: The opposite sex will begin to discuss subjects unique to themselves in the presence of the newcomer. Examples: men will discuss sports; drinking; masculine prowess; jokes; etc. Women will discuss childbirth; cooking; children; clothing, etc. Expectation is that the newcomer will turn against his/her own sex and join in the new conversations as part of the group.
   d) Role distortions: The characteristics of various roles are often distorted by the newcomer in order to fit in. Read the role distortions in Handout #37 "Tokenism." The distortions by the newcomer are: 1) mother-father role which is seen as constantly helping fix or repair things is distorted by the newcomer into a role of only helping with problems. 2) seducter/seductress role which has an element of sexual competition and jealousy is distorted by the newcomer. Flirting or other forms of alliances are used to develop a "protector" who is usually a high status person of the opposite sex from the newcomer. The "protector" prevents the newcomer from receiving any type of criticism about job performance and assists in getting preferred jobs for the newcomer. This treatment is resented by others. 3) the pet role: which is seen as a cute mascot, whose competence surprises people. The newcomer distorts this as a result of the "protector" who prevents normal job criticism from occurring. This prevents true competence from being seen. 4) iron maiden/man role: which is a virgin aunt or uncle or other untouchable-type who refuses to be categorized into the first 3 roles and who insists on being treated as an equal. This person is seen as tough; frigid; dangerous; and viewed with suspicion. The newcomer in this role is treated politely but isolated from close interaction and is the last to hear about events or meetings at work. Work performance is ignored, or seen as not important and the most unpleasant task are assigned to this role.

In order to prevent assignment to one of the above roles, it is necessary to be constantly aware and try not to be stereotyped. Keep the communication lines open to prevent isolation. Support groups can assist with the assimilation process and should be encouraged.

2. Translate the paragraphs A through I in the contract so that the student understands what is meant by each paragraph and what rights and responsibilities are his/hers as the applicant, and what rights and responsibilities belong to the seller or the other party in the contract.  
3. Have students answer the questions on pages 57; 59; 61; 63; 65; 68; and 71.  
4. Discuss:  
   1) Why should you never sign a contract with blank spaces?  
   2) What should you do if you do not understand the contract?  
   3) Do you need a copy of the contract?  
   4) What information needs to be included in a contract? |

| 3.B. Understanding credit. | Student will discuss what to do if he/she is unable to make payments on a credit account. | Educational Design: "You and the Law." Pages 74-77. | 1. Use "You and the Law" and have students do exercises as appropriate.  
2. Define: repossession - seller taking back merchandise sold to you because of unpaid amounts. Garnishment - legal permission to take bank accounts or property to pay off debts.  
3. Discuss: What should you do if you purchase something and the following happens:  
   1) You think you paid too much money. [Talk to store.]  
   2) You lose your job and can't make the payments. [Contact seller and make arrangements to pay]  
   3) The merchandise delivered is not what you ordered. [See store first, then lawyer if no agreement] |

| 3.C. Understanding what laws are involved in owning a car; driving a car; and dealing with accidents. | Student will discuss how to get a driver's license, what insurance coverage and inspection is required and what to do in case of an accident. | Educational Design: "You and the Law" Pages 89-103. Guest Speakers: Auto insurance agent, state trooper or local police. | 1. Use pages 90-100 "You and the Law"  
2. Discuss learners permits; license requirements; traffic tickets; vehicular crimes. Ask: "What is required for state auto inspection?"  
3. Have state police discuss traffic violations: speeding; passing school bus; driving under influence; and other violations that can affect your driving record. Discuss: What are the penalties? What do you do in case of an accident?  
4. Discuss: Requirements in Pennsylvania to buy and register a car. [car must meet legal mechanical standards (state inspection); and adequate insurance coverage must be carried.]  
5. Have auto insurance broker discuss various types of car insurance coverage: medical coverage; collision coverage; comprehensive coverage; uninsured motorist coverage. |
Subject Area: The Work and Work Issues

SKILL

3.D. Understanding a lease for an apartment or house.

ASSESSMENT

Student will discuss how to read a lease and state what are the responsibilities of a tenant.

4. Understanding how to start a home-based business.

Student will develop a business plan and decide whether or not to start a business and give reasons why or why not.

MATERIALS

Samples of apartment leases from various local apartments.

Contemporary Books: "Lifescenes/Life Skills." Pages 154-175.

TEACHING STRATEGY & TECHNIQUES

1. Use pages 105-115 "You and the Law."
2. Discuss parts of the lease shown on page 106.
3. Complete questions on pages 107, 109, 111, 113, and 115.
4. Discuss:
   a) Special sections of the lease such as security deposit and renewal clauses.
   b) The landlord's duties and the tenant's duties in lease on page 106.
   c) What could cause a tenant to be evicted?

1. Discuss the reasons why people start businesses:
   1) To make money.
   2) To control their work time.
   3) To have "something to do."
   Ask: "Why do you want to start a business? What type of business do you want to start?"
   "Why have you chosen that business? What do you know about running a business?"
2. Discuss: Careful planning is needed to start a business. There are 4 steps to consider when planning to start a business:
   1) What is the consumer demand for your product or service?
   2) How can you tell whether there is a market for your business?
   3) What competition is there for your business?
   4) What other companies do or sell the same thing?
   5) Do you have the skill to start the business that you are planning?
   6) How can you predict how much money it will cost to start this business?
3. Have students discuss how to determine consumer demand for the business they are planning.
   Ask: "What other businesses exist locally that have the same products or service? Who would be your customers? Where do they live? Is this a new product or service in the area? Why do you think there are no other businesses like yours in the area? How would you find your potential customers?"
   indirect competition - alternative businesses or products competing for customers.
   Example: Weis grocery stores and Giant grocery stores.
   Have student answer questions on page 161 and discuss answers.
Subject Area: The Work and Work Issues

SKILL

4. Understanding how to start a home-based business.
   (continued)

ASSESSMENT

Student will develop a business plan and decide whether or not to start a business and give reasons why or why not.

MATERIALS

Contemporary Books:
"Lifescenes/Life Skills."
Page 163.

"Lifescenes/Life Skills"
Pages 164-166.

"Lifescenes/Life Skills"
Pages 168-169.

"Lifescenes/Life Skills"
Pages 170-171.

TEACHING STRATEGY & TECHNIQUES

   Define: financial plan - a plan that estimated the business expenses for the year. For example: rent; utilities; salaries; and supplies.
   The revenue side of the financial plan predicts the amount of money coming in from the sale of goods and services. Have students complete page 163 to practice drawing up a financial plan for the simulated business.

7. Discuss: What happens to the money a business takes in. How much money would you need to start a business of your own? How would you determine the amount of money needed?
   Have students work on practice problem on page 165-166 to estimate revenues and expenses for a simulated carpet cleaning business. Stress that estimates are only "guesses" at costs and earnings. The actual figures may be different.
   Have students prepare the financial plan for their proposed business using as realistic a figure as possible.

8. Deciding whether the business is making a profit or loss is critical. New business may make a profit for some length of time. Define: gross sales - amount of money received for goods or services before expenses for supplies, salaries, utilities are subtracted.
   Discuss: Why gross sales are not a good indicator of a successful business because expenses could be greater. The difference between sales and expenses equals profit.
   Have students work on practice problems on page 169.

9. Discuss: Determining the price of a product or service is critical. Define: overhead - The expenses of the company including utilities, rent, salaries, loan payments.
   The overhead amount is used to calculate prices of goods or service.
   Use practice problems pages 170-171 to calculate how "markup" is figured out.
   Define: markup - adding into the price a part of the costs of utilities, salaries, and supplies needed.
   Stress that estimating the amount of goods and services that need to be sold in order to meet expenses is critical.
   Define: raw materials - the supplies or items needed to produce the product to be sold. Example: if you were selling sweaters, your raw materials would be yarn, buttons, and thread.
   If you know the cost of raw materials, and the cost of overhead, you can calculate markup.
   Ask: What else must you consider when adding markup to your products or service?
   1) your competitors' prices and 2) the amount of money people are willing to spend to buy from your company.
Subject Area: The Work and Work Issues

MATERIALS

“Lifescenes/Life Skills”
Pages 172-174.
Guest Speaker:
Business Insurance Agent.

Handout #39 “Business Plan Worksheet.”

TEACHING STRATEGY & TECHNIQUES

10. Discuss: Insurance protects a business from loss. Read pages 172-174. Discuss the different types of insurance: bonding insurance; liability insurance; and worker’s compensation insurance.

Define:
Bonding insurance - insurance against theft or fraud by an employee.

Liability insurance - protects insured business if the business injures someone or damages property. Example: some trips and falls on your property and breaks a leg.

Workers’ compensation insurance - covers physical injury and disabilities due to injuries of employees on the job.

Discuss: How are each of these types of insurances used in a business?

11. Have students complete a business plan for his/her proposed business.

Use Handout #39 and answer the questions about your proposed business. This format can also be used as an outline in developing a formal business plan. Have students answer the questions. If they are seriously interested in starting a particular business, use the format in this form to develop a formal business plan and have it critiqued by a small business assistance agency.
