ABSTRACT

This statistical brief on microcomputers in Florida public schools includes data on the following: (1) the number of instructional microcomputers from 1987-88 to 1991-92; (2) the number of instructional microcomputers for each school district from 1987-88 to 1991-92, including net change from 1990-91 to 1991-92; (3) percentages of instructional microcomputers by type (i.e., Apple, IBM, Tandy, etc.) in 1991-92; (4) the number of instructional microcomputers by type from 1988-89 to 1991-92; (5) the number of instructional microcomputers by type for each school district from 1988 to 1991; (6) the number of administrative microcomputers from 1987-88 to 1991-92; (7) the number of administrative microcomputers for each school district from 1987-88 to 1991-92, including net change from 1990-91 to 1991-92; (8) percentages of administrative microcomputers by type for 1991-92; (9) the number of administrative microcomputers by type from 1988-89 to 1991-92; and (10) the number of administrative microcomputers by type for each school district from 1988 to 1991. A map of the state showing school districts and reporting regions is included. (ALF)

SERIES 92-06B

## MICROCOMPUTERS IN FLORIDA PUBLIC SCHOOLS FALL, 1991

Florida public schools have reported a total of 162,622 microcomputers being used for student instruction and 27,981 being used for administration during the 1991-92 school year. Microcomputer counts from the four state university laboratory schools are included for the first time.

### INSTRUCTIONAL MICROCOMPUTERS

The 162,622 microcomputers being used for student instruction represent an increase of 30,808 microcomputers (23.5 percent) over the 1990-91 school year plus a total of 447 laboratory school microcomputers. A graphic presentation of the number of microcomputers used for instruction for the years 1987-88 through 1991-92 is given below. Table 1, on the next page, presents the number of instructional microcomputers in each school district for the years 1987-88 through 1991-92, as well as the change since last year.

\*Lab Schools data was not used in comparative growth, since only one year of data was available.

Each type of microcomputer as a percent of the total number of instructional microcomputers is given in Figure 2 below. Figure 3, on page 4, shows state totals for each type of instructional microcomputer over a four year period. Table 2, on page 5, indicates the number of instructional microcomputers by type in each district for the years 1988-89 through 1991-92.

There has been considerable growth since last year in the number of some types of microcomputers used for instruction in Florida public schools. Schools reported using 86,172 Apple microcomputers during the 1991-92 school year, more than double that of any other type of microcomputer. Apple microcomputers now account for 53 percent of instructional microcomputers used in Florida public schools. The number of IBM microcomputers used for instruction increased to a total of 40,748, comprising 25.1 percent of all instructional microcomputers in Florida public schools. Tandy's 21,943 account for 13.5 percent and the remaining 8.4 percent are Atari (1.8), Commodore (1.4) and Other (5.2).

## ADMINISTRATIVE MICROCOMPUTERS

The number of administrative microcomputers has grown 218 percent since 1987-88. The 27,981 microcomputers used for administration represent an increase of 6,119 (28.1 percent) over 1990-91, plus a total of 56 laboratory school administrative microcomputers. Figure 4 below illustrates the growth of administrative use of microcomputers over the last five years. Table 3, on the next page, presents the number of administrative microcomputers in each school district for the years 1987-88 to 1991-92, as well as the number and percent change since last year.

\*Lab Schools data was not used in comparative growth, since only one year of data was available.

Table 4, on page 11, indicates the number of administrative microcomputers by type in each school district for four school years, 1988-89 through 1991-92. Five-year state totals are graphically portrayed in Figure 6 on the next page. The types of microcomputers as a percent of the total number of administrative microcomputers reported by districts for the current (1991-92) school year is indicated in Figure 5 below. IBM (35 percent), Apple (33 percent), Non-PC Compatible (13 percent) and Tandy (11 percent) are the most frequently used types of microcomputers. The remaining 8 percent were reported as Other.
