Under the Idaho state system for curriculum development in vocational education, Technical Committees made up solely of industry personnel are responsible for drawing up task lists for each program. A Technical Committee Report is prepared on completion of the committees assignment. This Technical Committee Report presents a task list that reflects current trends and the skills necessary for an employee to obtain employment as a training provider of services to persons with developmental disabilities (level I). An introduction describes the curriculum development process employed in Idaho. The eight tasks are: discuss an overview of developmental disabilities; investigate employment in the field of developmental disabilities; demonstrate ethical treatment of persons with developmental disabilities; demonstrate building positive behaviors; demonstrate implementation and monitoring of the individual's plan; provide for health and safety needs; recognize and provide opportunity for personal growth of the person with disabilities; and explain the roles and needs of family members and significant others. A curriculum guide lists enabling objectives for each task within each area. Recommendations for conducting training of service providers for persons with developmental disabilities are made in the areas of teacher qualifications, length of course, and textbooks and teaching materials. A list is provided that details teacher experience and occupational background of persons most qualified to teach the course. A chart organizes training materials from university affiliated programs by state. (YLB)

INTRODUCTION

The curriculum development process undertaken by the Idaho Division of Vocational Education involves the active use of industry personnel. Industry personnel who are members of the Technical Committee contribute to the development of Task Lists for each program. A Technical Committee Report is prepared on completion of the Committee's assignment. This publication is a combination of the Technical Committee Report and Curriculum Guide for Training Providers.

The Task List prepared in the Technical Committee Report reflect the current trends and skills necessary for an employee to: 1) Obtain a job in Idaho's industry, 2) retain a job once hired, and, 3) to advance in the occupational field. Task Lists are grouped according to Duty areas generally used in industry settings. Duty areas are used as the basis for modules in the Statewide Curriculum Guide development process. The Technical Committee segment is the single most significant step in the curriculum development process. All future curriculum activities are predicated on the premise that an accurate picture of industry needs are reflected in the Task List.

Instructional personnel are selected to develop the Statewide Curriculum Guide. These instructors write Enabling Objectives for each Task. The committee members prepare all material in a competency-based format so as to have an effective and efficient methodology for determining student progress. The Statewide Guides are designed as the prime determiner of program content. All programs must follow the established Guide in order to be approved for operation. Any deviation from this Guide requires written approval from the respective program supervisor at the Division of Vocational Education. It is not the intent of the Division that all programs be designed to be exactly the same, but assurance is needed to ensure that the program meets the minimum standards for operation, based on the community needs, equipment, and facilities available to the local school or institution.

The Technical Committee Report does not dictate the level of instruction. The Task List developed represents the entire occupational field. Schools and Institutions determine what skills can be taught and what depth of instruction can be provided. They must choose the Tasks to be taught from the Technical Committee Report but are free to determine how many or which ones can be incorporated into their program.

The Technical Committee Report is also used as the primary list for generating Student Profiles. These Profiles are used as a cumulative record of each student's progress. They are printed in a folder format and have levels of performance scales for each Task so that student competence can be recorded for individual skills or tasks. This document will become the main component for Articulation activities in the event that the student desires to go on for additional training or education.
ACKNOWLEDGEMENTS

The Technical Committee process involves personnel from industry who are selected by the Division with assistance from the State Council on Vocational Education. People who serve on the Committees are nominated by local administrators. They generally come from local advisory committees for existing Vocational Education programs or are community representatives in a capacity to provide the necessary information about industry needs. These people serve with the approval of their employers and give their time and energies to the project without cost. The Division provides reimbursement for per diem and travel. We are indebted greatly to these industry representatives and to their employers for the resources so freely given to the pursuit of ensuring that Idaho students receive the most current training and education possible and that which is demanded by industry.

To this end, the Division recognizes the following people who served on the Training Providers of Services to Persons With Developmental Disabilities Technical Committee: Karine Siplon, Twin Falls; Sally Burton, Moscow; Neil Cross, Twin Falls; Martha Gilgen, Boise; Donna Grummer, Boise; Diane Helton, Boise; Karen Hoekstra, Boise; Tom Longhurst, Pocatello; Virginia Loper, Boise; Betty Mangum, Nampa; Pam Mason, Boise; Ann Snodgrass, Boise; and Russ Spearman, Boise.

Your support and assistance was very greatly appreciated. Your patience for enduring the educational process is also noted. The students and instructional staff will be much more able to accomplish their respective goals as a result of your contributions.

RECOMMENDATIONS FOR CONDUCTING TRAINING OF SERVICE PROVIDERS
FOR PERSONS WITH DEVELOPMENTAL DISABILITIES

Teacher Qualifications:

Persons who teach this course in the vocational education system must meet the Division of Vocational Education requirements for experience in providing services to persons with developmental disabilities. (See attached list of experiences.)

In addition, it is highly recommended that the instructor have some course in how to teach adults, such as: a course on methods of instruction, or a train the trainer course, or participation in a self-study course on teaching that is facilitated by an instructor and currently available at each of the area vocational-technical colleges.

Length of the Course:

The length of the course is approximately 40 hours of classroom instruction. It is highly recommended that students participate at a selected work site for a minimum of 16 hours during the course of instruction. This 16 hours can be the student's hours of employment. The primary purpose of this experience is to allow students opportunities to apply what they learn. Students will also have real life incidences to share with classmates while adding enrichment to the instructional content.

Textbooks and Teaching Materials:

Recommended for students: Creating Visions, Direct Care Service Provider Training Manual by Sally Burton, Ed.D; Russell Gee, MS; and Jean Overholt M.Ed. (This manual will be available from University of Idaho Curriculum Dissemination Center, phone number 885-6556.)

Recommended for instructors: Creating Visions, Direct Care Instructor's Guide by Sally Burton, Ed.D. and Ronald Seiler, B.S. (Available from the University of Idaho Curriculum Dissemination Center after September, 10, 1992, phone number 885-6556.)

See also the enclosed list of resources available from University Affiliated Programs (UAPs). Those with asterisks are especially good resources.
