Goals 1990

ABSTRACT

Questions and answers on reaching National Education Goal 6 are presented in this document. The six National Education goals for the year 2000 are stated, followed by the America 2000 strategy. The introduction briefly discusses substance abuse and school violence. The document presents questions and answers on these topics: (1) What is a drug-free school? (2) What is a violence-free school? (3) How can it be determined how severe the drug and violence problem is? (4) How can the use of drugs in school be prevented? (5) What should be included in the school's policy on violence and drugs? (6) Should the policy address alcohol and tobacco? (7) What do teachers need to know to combat alcohol and drug use and violent behavior? (8) How are students best taught about drugs and alcohol? (9) What role should parents play? (10) How should the community be involved? (11) Where can schools be found that have been successful in reducing drug use? (12) How can colleges and universities help? (13) What statistics are available on drug use, school crime, and violence among students? (14) What Federal resources are available for anti-drug and violence efforts? (15) Are there requirements to be met before receiving federal funds? and (16) How will schools measure progress in addressing Goal Six? An appendix lists schools recognized by the Drug-Free School Recognition Program and Regional Representatives of the Secretary of Education. (ABL)

Reproductions supplied by EDRS are the best that can be made from the original document.

SCHOOLS FREE OF DRUGS AND VIOLENCE

Questions and Answers on Reaching National Education Goal 6:

"By the Year 2000, every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning."

This publication is one of a number of resources the Department of Education has put together for schools and communities across \cdot e nation who are trying to meet the six national education goals. Here we present answers to questions we've often heard asked about Goal 6. In addition to the sources listed here, you may also contact one of the Secretary's Regional Representatives (listed at the end of this document) or call the America 2000 phone bank at 1-800-USA-LEARN (1-800-872-5327), in the District of Columbia call 401-3132.

U.S. Department of Education Resource Team on National Education Goal 6 Room 3127 400 Maryland Ave., SW Washington, D.C. 20202

The National Education Goals

In September, 1989, President George Bush and all 50 of the nation's governors gathered in Charlottesville, Virginia for a historic educational summit. There for the first time in the nation's history, they established an ambitious set of six national education goals. The six goals for the year 2000 are:

- 1. All children in America will start school ready to learn.
- 2. The high school graduation rate will increase to at least 90 percent.
- 3. American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter including English, mathematics, science, history, and geography; and school in America will ensure that all students learn to use their minds well so they will be prepared for responsible citizenship, further learning, and productive employment in our modern economy.
- 4. U.S. students will be first in the world in science and mathematics achievement.
- 5. Every American will be literate and will possess knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.
- 6. Every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning.

The America 2000 Strategy

To help communities create the best schools in the world for all our children and to move the nation toward the national goals, President Bush launched America 2000, a national strategy to revolutionize American education, community by community, school by school. America 2000 embraces four revolutionary ideas:

- World Class Standards and a voluntary system of national examinations
- Break-the-Mold New American Schools
- Cutting red tape for teachers and principals
- Giving families more choices of all schools

At the heart of America 2000 is the President's challenge to every town, city, and neighborhood in the nation to become an America 2000 community by:

- Adopting the National Education Goals as their own
- Developing a community-wide strategy to achieve them
- Designing a report card to measure results
- Planning for and supporting a break-the-mold New American School

As of October, 1992, more than 2,000 communities across the nation have joined the movement to transform education for their children.

For more information about how you can get involved in America 2000, call 1-800-USA-LEARN (1-800-872-5327). (in the Washington, DC area, call 401-2000.)

National Goal 6: The Challenge

Schools Where Learning Can Happen

To be able to learn and grow, chil-. dren need to be healthy and secure. Yet many of the nation's youth are victims of substance abuse and violence. While drug and alcohol use among students has steadily declined in recent years, a substantial portion of high school seniors, 17 percent, say they have taken an illegal drug within the last 30 days. Perhaps more significantly, 57 percent report having used alcohol within the last 30 days, and 32 percent said they had consumed five drinks in a row within the previous two weeks.

School has also become less safe for many young children. Thirty-eight percent of high school seniors say they have been threatened at school within the past year; 20 percent were injured. Forty-two percent were the victims of theft, and 29 percent had their possessions vandalized. About a third of all high school teachers feel they have little or no control over students in their classrooms.

Today, however, communities across the nation are mobilizing to rid their schools of the influences of drugs and violence. They are creating communi-

ties where lourning can happen, where children are safe and healthy. While progress is often slow and difficult, these communities have proven it can be done with the enthusiastic and determined involvement of everyone.

The America 2000 strategy, with its four part community challenge, offers a framework through which you can mobilize your community and create your own strategies for achieving Goal 6. We won't tell you what to do, but we will be there to support and encourage you.

What is a drug-free school?

Drug-free schools are those that have eliminated drug use among their students and staff. These schools have successfully:

- Assessed and monitored their drug problem.
- Implemented and enforced a policy against drug and alcohol use.
- Developed and implemented a drug education curriculum.
- Trained teachers and staff to combat drugs.
- Involved and educated parents.
- Enlisted the help of community groups and government agencies.

What is a violence-free school?

While every school will always have discipline problems, violence-free schools are those where students and staff are not subject to physical attacks or threats.

How can we determine how severe our drug and violence problem is?

To evaluate and then monitor their drug problem, schools may want to:

- Conduct periodic, anonymous surveys of students and school personnel, asking them questions like:
 - How often do you use drugs or alcohol?
 - How easy is it to obtain drugs in school?
 - How often have you been a victim of crime?
 - How safe do you feel at school?
- Ask local law enforcement officials what drugs are commonly available in the neighborhood and where they are sold.
- Keep complete records of drug use, drug sales, violent episodes, arrests, and survey results in the school to track your progress. Make this information available to the police and the public.
- Discuss the problem with parents, teachers, health care workers, the police, and judicial officials on a regular basis to gain their insights into the problem.

To evaluate their violence problem, schools may want to conduct a school safety assessment. A comprehensive school safety assessment includes a careful examination of such things as:

 The most common types of vioience and how often they occur.

- How school personnel enforce school policies and deal with violent students.
- How well the school and community cooperate with the police.
- How well students get along with each other and with the staff.
- Social characteristics of the school and neighborhood that contribute to crime.
- Howemployee recruitment, selection, supervision, and training contribute to school safety.
- Contingency plans the school has to respond to emergencies.
- How well the school's educational program and student extracurricular activities contribute to a positive school climate.

To get more information about conducting a school safety assessment, contact the National School Safety Center, listed on page 16.

How do we prevent the use of drugs in our schools?

The way to combat drugs is with a comprehensive strategy:

 First, set goals for the school (for example, drug use will be

- cut in half by the end of the year) and establish ways to measure progress toward them.
- Use every opportunity at each grade level to teach kids that drug use is wrong and harmful. Make drug education an important part of the curriculum.
- Attack the drug problem at its roots by establishing high standards for learning, instilling character and self worth in children, providing them with good role models, involving them in worthwhile activities, and expanding their opportunities for the future.
- Recruit college students and community members to serve as tutors and mentors.
- Provide counseling andform support groups.
- Expand opportunities for the non-college bound by offering apprenticeship and tech prep programs in high school.
- Host drug-free social activities.
- Involve students and others in community service and neighborhood improvement projects.
- Offer alternative education programs for students with drug addictions or behavioral problems.
- Give students a role, too. Allow them to help:

- Develop school policy.
- Plan, organize, and participate in drug and violence free social events.
- Operate drug education and prevention courses.
- Lead student support groups.
- Serve as judges and mediators student disciplinary panels.
- Evaluate your progress on a regular basis. Decide what parts of the strategy are working and which could be improved.

What should we include in the school's policy on violence and drugs?

A good drug policy is a strict no use policy that states that the unlawful possession, use, promotion, distribution, or sale of any amounts of all drugs—including alcohol and tobacco—will not be tolerated on school grounds and at school functions, and that it applies to students, school staff, and anyone attending school functions. Similar language should be included regarding violence. The policy should also include:

- A formal statement that the use of illegal drugs and the unlawful possession and use of alcohol are wrong and harmful (with similar statements about acts of violence).
- The school's goals for reducing

- drug use and violence.
- Definitions of what constitutes a drug offense or a violent act, as well as other key terms.
- Clear statement of when and where the policy applies.
- Mention of who is responsible for implementing and enforcing the policy.
- Sanctions appropriate to the seriousness of the violation, with repeat or more serious offenses subject to increasingly severe measures. Examples include parent conferences, conflict resolution, peer mentor- ship programs, referral to counseling and treatment, mandatory participation in drug education and prevention classes, support groups, or community service, before or after school detention, in school or out of school suspension, placement in an alternative education program, expulsion, termination of school employees.
- Procedures for
 - Documenting and recording all violations.
 - Reporting all violations of the law to the police.
 - Locker searches, drug testing, suspensions, and expulsions consistent with legal requirements for due process, reasonable suspicion, search and seizure, and

confidentiality.

- Notifying parents.
- Drug intervention—and referral for treatment—for students in all grades.
- Informing students, staff and faculty, and parents of the policy;
- Evaluating and updating the policy.

The best policies are those that are developed with input from faculty, staff, parents, students, law enforcement, and members of the community.

Examples of effective school drug and violence policies can be obtained by contacting schools recognized by the Department of Education's Drug-Free School Recognition Program. A list of schools recognized in recent years is included in the appendix.

Should the policy address alcohol and tobacco?

Yes, there is significant evidence to suggest that the use of these drugs at early ages can lead to the use of other illegal drugs. Those who abuse alcohol and tobacco also run the risk of severe health problems. Alcohol is the drug of choice among high school students and its use is illegal in all states for persons under 21 years of age. The use of tobacco is illegal in most states for those under the age of 18.

What do teachers need to know to combat alcohol and drug use and violent behavior?

Dealing with violence

- Classroom management skills, such as:
- Resolving a disagreement peacefully.
- Breaking up a fight.
- Dealing with a weapon-wielding student
- Dealing with a serious habitual offender or gang member.
- Preventing or managing *crisis* situations in the school.
- Recognizing gang activity.
- The *legal rights and duties* of students and teachers.

Combatting alcohol and drug abuse

Teachers should know how to:

- Detect the early warning signs of drug and alcohol use.
- Approach parents about their child's abuse problem.
- Take advantage of community resources.

- Work lessons about drugs into the regular curriculum.
- Develop character in students and encourage positive behavior.

How do we best teach students about drugs and alcohol?

The most important goal of any drug prevention curriculum should be to impress on students that the unlawful use of drugs and alcohol is wrong and harmful. It should also teach children how to say no to drugs and to value and maintain personal health.

Communities may find the following resources from the Department of Education helpful in developing a curriculum:

Drug Prevention Curricula: A Guide to Selection and Implementation

Learning to Live Drug Free: A Curriculum Model for Prevention

Success Stories from Drug-Free Schools: A Guide for Educators, Parents, and Policymakers.

All three are available from the National Clearinghouse for Alcohol and Drug Information (NCADI) by calling 1-800-SAY-NO-TO.

What role should parents play?

Successful drug-free schools involve parents as much as possible. Parents

are crucial to any effort to keep kids drug free and safe.

- Allow parents a role in developing school policy.
- Provide them within formation on:
 - The *effects* of drug use, abuse, and dependency.
 - Ways to *identify drug problems* and how to get people into treatment.
 - Where to go for diagnosis and treatment.
 - Laws and school policies regarding tobacco, alcohol, and other drugs, school disciplinary rules, and the consequences of breaking them.
 - Encourage them to teach a strong anti-drug message to their children, and to set a good example themselves.
 - Help them to reenforce positive behavior and impose appropriate penalties for poor behavior.
 - Create opportunities for parents to share experiences and support one another.

For more information about involving and educating parents, refer to *Growing Up Drug Free: A Parent's Guide to Prevention*, published by the Department of Education and available from the National Clearinghouse for Alco-

hol and Drug Information, 1-800-SAY-NO-TO.

How should the community be involved?

Since children spend 91 percent of their time away from school, keeping kids drug free and safe requires community-wide teamwork. Everyone needs to be involved: parents, teachers, principals, law enforcement and the judicial system, treatment centers, businesses, churches, civic groups, health and social service agencies.

- Police officers can inform school staff about crime and drugs in the community, teach them how to deal with violent students, and suggest ways to make the school safer.
- Businesses can help spread the anti-drug message, provide mentors, and set a good example by making their workplaces drug free.
- Churches, boys and girls clubs, the city park system, and college student organizations can operate before and after school activities to keep children away from bad influences and show they can have a good time without drugs.
- Community service groups and local government agencies can offer counseling, treatment, medical care, nutritional information, and opportunities for for dropouts to finish their edu-

cation.

Where can we find schools that have been successful in reducing drug use?

Each year, the Department of Education recognizes public and private elementary and secondary schools that have effective in reducing student drug use. Awards go to schools that meet specific requirements, determined through written applications and onsite evaluations. The 107 schools recognized in the 1989-90 and 1990-91 school year are listed by state in the Ar pendix. A list of schools recognized in the 1991-92 school year for their effective drug and violence prevention programs will be available in Fall, 1992. Contact the Department's Division of Drug-Free Schools and Communities at (202) 401-1599.

How can colleges and universities help?

Colleges and universities can bring unique talents and resources to the fight against drugs and violence and have a important role to play in setting a good example to young people. Specifically, colleges can:

- Take the lead in forming a community task force to address National Goal Six.
- Offer courses for teachers on drug and violence prevention.

- Help local schools develop drug prevention curriculum and coordinate their own courses with those of local schools.
- Recruit college students and faculty to be mentors and tutors to local junior high and high school students.
- Prohibital cohol and tobacco use and advertising at all university-sponsored events.
- Sponsor alcohol and drug-free events for local schools and for visiting prospective students.
- Offer assistance to college students and employees with drug problems.
- Present a united front with local schools in the community and strictly enforce the college or university's drug and alcohol policy.

What statistics are available on drug use among students? On rates of school crime and violence

The National High School Senior Survey. Includes statistics on drug use and crime. Available from National Clearinghouse for Alcohol and Drug Information at 1-800-SAY-NO-TO.

The Youth Risk Behavior Survey. Data for each state on "high-risk" activities (including alcohol, drugs, and crime) by adolescents. Contact the U.S. Centers for Disease Control at (404) 488-5332 for more details.

Educational Resources Information Center (ERIC) at the Department of Education publishes summaries of studies and statistics on drug use, school security, gangs, and violence. Call them at 1-800-873-3742.

The National Crime Victimization Survey, available from the National Criminal Justice Reference Service at 1-800-732-3277.

National Center for Education Statistics at the Department of Educations is a source for surveys of teacher and principal views on safety, discipline, and drug use in schools, as well as on the effectiveness of programs to deal with them. Contact them at (202) 219-1333.

School Crime: A National Crime Victimization Survey includes student views on the availability of drugs and on the safety of their schools. It may be obtained from the Justice Statistics Clearinghouse/NCJRS, Box 6000, Rockville, MD 20850. Ask for School Crime, NCJ-131645, 9/91.

Statistics from many of these surveys are also available from the National Clearinghouse for Alcohol and Drug Information at 1-800-SAY-NO-TO. Many states and local governments collect these types of statistics as well.

What Federal resources are available for anti-drug and violence efforts?

Grants

The U.S. Department of Education has

two types of grants available. The first type are "formula" grants to state agencies, governors' offices, and school districts for alcohol and drug prevention and education efforts. The second type of grants are awarded to local school districts, colleges and universities, and non-profit organizations on a competitive basis. For more information about these funds, contact the Department's Division of Drug-Free Schools and Communities at (202) 401-1599.

Information

A single point-of-entry for all Federal alcohol and drug clearinghouses is at 1-800-788-2800. The number for the Juvenile Justice Clearinghouse is 1-800-638-8736.

Assistance

Two programs jointly run by the U.S. Departments of Education and Justice help schools undertake efforts to become safe and violence free. Known as "the National School Safety Center" and "Project SMART," they produce manuals, videos, and other resources to be used at the local level. Information about both is available from the Department of Education's Drug Planning and Outreach Staff on (202) 401-3030.

The Department of Education operates Regional Centers for Drug-Free Schools and Communities to help schools in their areas develop assessment tools and plans. They and the states they serve are listed below:

Northeast Regional Center 12 Overton Avenue Sayville, NY 11782 (516) 589-7022 (CT, DE, ME, MD, MA, NH, NJ, NY, OH, PA, RI, VT)

Southeast Regional Center

The University of Louisville Louisville, KY 40292 (502) 588-0052 (AL, DC, FL, GA, KY, NC, PR, SC, TN, VA, VI, WV)

Southwest Regional Center

The University of Oklahoma 555 Constitution, Suite 138 Norman, OK 73037-0005 (800) 234-7972 (AZ, AR, CO, KS, LA, MS, NM, OK, TX, UT)

Midwest Regional Center

1900 Spring Road
Oak Brook, IL 60521
(708) 571-4710
(IN, IL, IA, MI, MN, MO, NE, ND, SD, WI)

Western Regional Center 101 S.W. Main St. Suite 500 Portland, OR 97204 (503) 275-9489

(AK, CA, HI, ID, MT, NV, OR, WA, WY, and American trusts and territories in the Pacific.)

Schools can get help with conducting school safety assessments and implementing programs to combat violence is available from:

National School Safety Center 4165 Thousand Oaks Boulevard, Suite 290 Westlake Village, CA 91362 (805) 373-9977

If school violence has been racially or ethnically motivated, officials may seek help from the Department's regional Desegregation Assistance Centers. They and the states they serve are listed below:

The NETWORK

300 Brickstone Square Suite 900 Andover, MA 01810 (508) 470-1080 (CT, ME, MA, NH, RI, VT)

Metro Center

New York University 32 Washington Place, Rm. 72 New York, NY 10003 (212) 998-5110 (NJ, NY, PR, VI)

Mid-Atlantic Equity Center

The American University 5010 Wisconsin Ave., NW Suite 310 Washington, D.C. 20016 (202) 885-8517 (DE, DC, MD, PA, VA, WV)

Southern Education Foundation

135 Auburn Avenue Atlanta, GA 30303 404) 523-0001 (AL, FL, GA, KY, MS, NC, SC,TN)

The University of Michigan School of Education PEO, Room 1005

Ann Arbor, MI 48109-1259 (313) 763-9910 (IL, IN, MI, MN, OH, WI)

Intercultural Development Research Association

5835 Callaghan, Suite 350 San Antonio, TX 78228 (512) 684-8180 (AR, LA, NM, OK, TX) Kansas State University School of Education Bluemont Hall Manhattan, KS 66506 (913) 532-6408 (IO, KS, MO, NE)

Mid-Continent Regional Laboratory

Equity Division 2550 South Parker Road, Suite 500 Aurora, CO 80014 (303) 337-0990 (CO, MT, ND, SD, UT, WY)

Southwest Regional Laboratory

4665 Lampson Avenue Los Alamitos, CA 90720 (310) 598-7661 (AZ, CA, NE)

INTERFACE

4800 SW Griffith Drive, Suite 202 Beaverton, OR 97005 (503) 644-5741 (AK, HI, ID, OR, WA, AS, GU, NMI, TT)

General information about the centers is available from the U.S. Department of Education at (202) 401-0344.

Weed and Seed

The "Weed and Seed" program combats violent crime, drug use, and gang activity in high-crime neighborhoods by creating partnerships between public agencies, community organizations, and individual citizens. First, law enforcement "weed out" violent criminals and drug traffickers. Then community groups and public agencies move in to "seed" the neighborhood—revitalize it with new economic, educational, and social opportunities.

Weed and Seed relies on community involvement and empowers residents to find solutions to the crime problem in their neighborhoods. In 1992 fiscal year, seventeen cities received funding from the Department of Justice. They are:

Atlanta Los Angeles(two sites) San Diego Boston Madison Seattle Charleston Philadelphia Washington Chicago Pittsburgh Wilmington Denver Richmond Fort Worth San Antonio

In addition, Trenton, Kansas City, and Omaha received funding earlier from the Justice Department to serve as demonstration projects.

For further information, contact the Department of Education's Drug Planning and Outreach Staff on (202) 401-3030.

Are there any requirements we must meet before receiving Federal funds?

Before receiving Federal assistance under the Drug-Free Schools and Communities Act, a state education agency or local school district must certify that it has in place drug and alcohol prevention programs and policies for its students and employees.

Programs for all students must include, at least:

- Activities for all students, appropriate for their age and development, about legal, social, and health consequences of drug and alcohol use and techniques for resisting peer pressure to use drugs or alcohol;
- A statement that the use of illicit drugs and the unlawful possession and use of alcohol is wrong and harmful;
- Standards of student conduct that prohibit, at a mini mum, the unlawful possession, use or distribution of drugs;
- A clear statement of the disciplinary sanctions that will result from any infraction of the policy;
- Information about counseling, treatment and reentry programs available to students;
- Distribution of copies of the standards of conduct and . disciplinary anctions to all students and parents;
- Notification of parents and students that compliance with the policy is mandatory;

16

 Biennial review of the program's effectiveness, including the consistency of enforcement and sanctions.

Employees must be subject to standards of conduct and disciplinary sanctions and be given information about counseling and treatment. They must also receive a copy of of the standards of conduct and sanctions and be told that the standards are mandatory. Employee programs must be reviewed every two years as well.

There are no federal mandates for violence prevention programs at the present time.

How will schools measure progress in addressing Goal Six?

When measuring progress toward Goal 6, the amount of drug use and violence in school is of course the bottom line. The goal will be reached only when drugs and violence have been eliminated from the school. Schools will want to use the same types of measures used to assess their drug and violence problem at the start: student and staff surveys, records of drug confiscations and arrests, incidences of crime and vandalism, and the like.

Progress, however, may not be immediately evident. Therefore, schools and communities will also want to use these objectives to determine whether they are on the right track:

 Have we established clear, specific rules on discipline and on the use, possession, and distribution of drugs and alcohol, as well as *strong sanctions* for violations of these rules?

- Have we developed close relationships between the school, parents, community organizations, and government agencies
- Do we have comprehensive drug and alcohol education programs in place in each grade?

More detailed suggestions for measuring progress toward the National Education Goals can be found in *Handbook for Local Goals Reports*, available from the National Education Goals Panel, 1850 M Street, NW, Suite 270, Washington, DC 20036. (202) 632-0952.
