This ERIC "FAST Bib" provides annotations of ERIC documents and journal articles that address the question of how to balance two opposing forces operating in today's schools, i.e., the forces of change and complacency, to establish an exemplary language arts curriculum that is a reality and not just a theoretical mirage. The 18 annotations presented in the FAST Bib are of materials published in 1990 and 1991 that discuss this question. The FAST Bib begins with an overview section containing articles concerning issues related to curriculum development in the language arts, proceeds to titles in the areas of reading and writing, and concludes with materials on oral communication. (RS)
Curriculum Development in the Language Arts

by John Warren

The curricula of today's schools are under a microscope. On the one hand, we want change; on the other, we want to keep to what we know. Without a doubt, this dichotomy causes stress within our educational system. How can we balance the forces of change and complacency to establish an exemplary curriculum that is a reality, and not just a theoretical mirage?

This ERIC FAST Bib provides references that discuss this question. It is divided into three sections and starts with an overview of the issues related to curriculum development in the language arts. It then proceeds to the areas of reading and writing, and then oral communication.

Abstracts for some of the articles cited here have been abbreviated to conform to the FAST Bib format. Three types of citations are provided in the bibliography: ERIC documents, journal articles, and papers.

Citations of Journal Articles

Full text copies of these journal articles are not available through EDRS collections or from EDRS. Articles are most economically obtained from library collections. Articles from some journals are available through University Microfilms International at (800) 732-0616 or through Original Article Tear-sheet Service at (800) 523-1850.

Overview

Reading educators must ensure that any educational reform reflects what is best for students; that the reformers avoid a top-down approach that ignores input from classroom teachers, from curriculum and reading supervisors, from teacher educators; and that if there is to be a national curriculum, it must be one that works.

Resisting the notion that there is a single English language arts curriculum that all schools can or should follow, this book focuses on processes for designing, implementing, and evaluating curricula suited to the needs of individual schools and students.

Certain events between the late sixties and the eighties were major influences in empowering Australian reading teachers to break the basal habit; these events are described in detail in this document. By the mid-to-late eighties, publishers could no longer market basal readers in Australia; evaluation became increasingly dependent on the teacher's observations, records, and samples of work;
and publishers, teachers, and academics began to collaborate to develop a broad range of valid materials for the classroom. Some reasons why teachers were so willing to break away from dependence on basal texts include the empowerment of teachers through the political acceptance of alternatives, training, a grass roots movement, and cooperative effort.

Intended for teachers, administrators, and concerned others, this model curriculum guide was developed to reflect the strongest possible consensus about the English-language arts content that every student in the State of California should be exposed to before graduating from high school.

Teachers, principals, and supervisors must become very knowledgeable and conversant about different approaches utilized in organizing the language arts curriculum. Thus, the separate subjects approach, the correlated approach, the fused curriculum, and the integrated curriculum represent diverse ways of organizing each of the curriculum areas in the elementary school.

The primary goal of this practicum was to provide opportunities for rich and diverse language activities designed to enhance the kindergarten curriculum.

Information on current trends and issues in English instruction, compiled by the directors of six National Council of Teachers of English commissions, is presented in this report, the seventh annual report by the commissions.

Offers a list of 12 elements that are basic to curricular change. Cites examples that focus on a process approach to writing.

**Reading and Writing**

Discusses the problem of integrating reading, writing, literature, and composition courses. Offers suggestions on new ways to approach literature through writing.

Describes the collaboration between a researcher and the teachers at an elementary school in a curriculum inquiry and assessment process. Discusses putting the process to work, deciding what skills to teach, deciding what revisions to make, and noting the effects of the process on the participants.

Examines the origin of expressive writing, briefly reviewing Britain’s language-across-the-curriculum reform movement and expressive writing’s debt to that movement. Describes a conference where British and American educators exchanged ideas about language and learning. Explains how psycholinguistics has provided the intellectual framework for expressive writing.

Examines the problems in initiating schoolwide reading reform. Argues for the formal establishment of a reading improvement team to negotiate and collaborate on long-range initiatives to improve reading instruction district-wide.

Reports on a month-long visit to South African alternative educational programs which are filling the gap between the official computer curriculum and the potential power of computers for writing and publishing. Describes how progressive South African educators use the computer as a tool for empowerment and to subvert the established curriculum.

Focuses on the development of and research into well-articulated models of reading fluency instruction that make fluency an integral part of the regular reading curriculum.

Examines whether students, when removed from a video-based context, were able to transfer the writing-related objectives taught within a curriculum to similar writing tasks. Subjects were 24 sixth-grade, learning disabled students enrolled in a resource room language arts program, who participated during the first year of a project. Students participated in a news reporting curriculum for 9 weeks. Group pre- and posttests focusing on writing and comprehension were also administered. Although both video and orally presented prompts produced posttest
gains, substantially more students gained on the written/orally presented topic. It appears that the curriculum positively influenced writing when removed from the video context.

**Oral Communication**

This booklet addresses the issue of whether or not students are being taught to communicate effectively, and discusses the following topics: criteria of oral communication curricula; resources and syllabi; and conclusions.

To improve the teaching of listening in schools, it has been suggested that children be trained in three ways: (1) concentrate on body language and gestures; (2) practice techniques to overcome negative attitudes toward listening; and (3) learn to identify important aspects of a speaker's material.

Argues that the confused thinking of the planners of Great Britain's National Curriculum for English is reflected in the relationship between speech and writing. Criticizes the curriculum's view that there is little difference between spoken and written English. Asserts that teachers can encourage in students a creative, flexible, and personal writing style.

Presents a curriculum for speech-language-communication skills which combines the Present Education Level and Individualized Education Program formats for deaf and hearing-impaired students. The curriculum was designed for preschool students, but is adaptable.

**ERIC/RCS publications related to this topic:**

Special Collection Series (articles and annotated bibliographies):

*Writing*—$7.95

*Reading — Elementary*—$7.95

*Reading — Middle & Secondary*—$7.95

*Whole Language and Integrated Language Arts*—$7.95

**TRIED (Teaching Resources In the ERIC Database) Series:**

*Writing Exercises for High School Students*—$14.95

**Remedial Reading for Elementary School Students**—$14.95

**Computers in English/Language Arts**—$14.95

**Language Arts for Gifted Middle School Students**—$14.95
