A partner school simultaneously provides: (1) an exemplary education for a segment of K-12 children, (2) internships and other educational experiences for prospective teachers and administrators, and (3) continuing education for members of the profession. School districts and institutions of higher education are jointly responsible for governance and funding. Partner schools are also known as professional development schools, professional practice schools, and professional development centers. The Center for Educational Renewal at the University of Washington surveyed institutions in California, Connecticut, Colorado, Hawaii, Maine, Massachusetts, New Jersey, Ohio, South Carolina, Texas, Utah, Washington, and Wyoming which are members of the National Network for Educational Renewal, requesting information on the institutions' partner schools. The descriptions provided by the institutions are presented in this directory. The following information is given for each partner school listed: school name; grade levels; address; phone; principal name; school district; name, address, and phone number for university contact person; scope of mission; governance; and funding. A separate list of contact persons for the partner schools, organized by university, is also included. (IAH)

PARTNER SCHOOLS

The Center for Educational Renewal at the University of Washington is working with a number of institutions around the country who are seeking to strengthen their teacher education programs. As a Senior Associate in the Center, I am concentrating on issues which arise when school districts and colleges connect as part of the effort to enhance schools and the education of educators. Recently, experts have been suggesting this point of connection should be in a Professional Development School. We are referring to such schools as Partner Schools.

Professional Development Schools have been given a variety of names such as key schools, professional practice schools, professional development centers, and educational development centers. We are calling them partner schools, partially because "Professional Development School" is a term that is being applied to too many different kinds of institutions. Also, we are using "partner schools" as our preferred term because it is essential in the long run that they be operated by a partnership of the university's school or department of education, the college of arts and sciences, and the schools used for clinical experiences.

DEFINITION

A Partner School is one which simultaneously provides (1) an exemplary education for a segment of K-12 children, (2) internships and other educational experiences for prospective teachers and administrators, and (3) continuing education for members of the profession. Governance and funding are joint responsibilities of participating school districts and institutions of higher education. The clinical experiences in these renewing settings should be carefully planned as integrated parts of the education of educators.

DESCRIPTION OF SURVEY

Teacher educators around the country report they are at work creating such schools. Some of these institutions are similar to the preceding definition, others have either broader or narrower missions. During the summer and early fall of 1991 and 1992, I requested institutions which are members of the National Network for Educational Renewal associated with the Center for Educational Renewal at the University of Washington to provide some basic information about their schools.

They were asked to share the following information for each school associated with their institution:

1. Name of School
2. Grade Levels (e.g. K-5, 9-12)
3. Address
4. Phone
5. Principal
6. School District, City, and State
7. Name, Address, and Phone Number for University Contact Person
8. Describe briefly the scope of the mission: i.e., pre-service, in-service, exemplary program for children.
9. Describe briefly the governance. Who makes the decisions concerning various aspects of the schools operation?
10. Describe briefly the funding. To what extent is their more funding than for other schools in the same district? Who provides it?

The following example was provided to institutions to understand the kind of information I was seeking.

1. Odle
2. Middle School (Grades 6-8)
3. 14401 NE 8th St, Bellevue, WA 98007
4. (206) 455-6211
5. Ian Armitage (PDS Coordinator Chris Val Spinosa)
7. Dr. Nathalie Gehrke, College of Education DQ-12, University of Washington, Seattle, WA 98195, (206) 543-1847
8. Provides location for pre-service teacher interns, provides staff development for other middle schools in the district and in conjunction with other middle schools in the Puget Sound Educational Consortium, provides for exemplary middle school programs (special emphasis on school centered decision making and linking community services.)
9. Program direction provided by advisory council consisting of university, school, school district, and union representatives.
10. Extra staffing provided for supervision of the interns and program development by the district and the university. District provides equivalent of .6 FTE and $25,000 in extra funding. University provides
for professors who serve as resident faculty on short-term basis in addition to normal supervision of interns. Grants from Ford and Carnegie have helped with development.

The attached information consists of responses which were received in the Center for Educational Renewal between August 1992 and November 23, 1992.

8. The Ashford PDC provides clinical experiences for preservice educators. It also serves as a practicum site for graduate students in the school psychology and speech pathology. The PDC promotes its teachers' growth and development by using the resources and the faculty of the University. It also encourages research activities that have potential benefit to teachers and children.

9. Five teachers from the school's Professional Development Committee, the Superintendent, and building Principal comprise a Steering Committee that determines policies and procedures of the PDC in concert with the University coordinator. A building-site coordinator, who is also a member of the Steering Committee, is provided limited release time to confer with clinic teachers, call necessary meetings and to meet with the University coordinator. This person also facilitates the placement of clinic students.

10. The PDC has set aside $2,000/year to provide for substitute teachers as needed by the building-site coordinator and other teachers on the steering Committee.

The University provides a faculty member on a part-time basis to coordinate the work of the PDC and the University. Other University faculty members are usually available as the need arises and as their time allows.

   Storrs, CT 06269-2033
   (203) 486-0286
8. The Coventry Professional Development School has been centered primarily in the elementary schools but is expanding gradually into the middle and high schools. PDC activities began with a focus on teacher preparation and the development of the student teacher seminars, taught largely by Coventry teachers for the university students in their student teaching semester. Coventry has also accepted junior-year students and senior-year methods course students for a more limited clinical experience—approximately six hours per week in the schools during the semester. As our program evolves into a full five year BA MA program, we anticipate 5th year interns will work in Coventry on special projects in such areas as curriculum development and classroom action-research.

   The PDC has recently added an in-service component for the school year 1991-92 including a program on "Teacher as Research." Thirteen teachers interested in initiating and carrying out action, classroom based research activity are taking part in this program.

9. The PDC is governed by a steering committee which includes both university and school coordinators. This committee has set up and helped run the student teaching seminars as well as review the University of Connecticut teacher preparation program. The committee meets several times each semester and recommends administrative arrangements and policy to district and school of education administrators.

   Coordinators serve to assign students to teachers and help administer PDC activities. A coordinating committee of university PDC coordinators (School of Education faculty and administrators) helps to review and integrate decisions between and among PDC districts. Final approval of
policy decisions rests with the school district Superintendents and School of Education Dean.

These formal arrangements are enhanced by a meeting each semester including university and school faculty drawn from the PDC district Steering Committee. Each meeting has a specific topic, the most recent on promoting teacher research, but also includes the opportunity for those involved with PDC's to share ideas and improve their understanding of effective teaching and teacher preparation.

10. There is no special funding for the Coventry PDC. University faculty receive some load credit for their work with the district which might be considered "in-kind" funding.

8. In response to the national challenge to improve the quality of teacher preparation programs, East Hartford Public Schools and the University of Connecticut have formed a Professional Development Center. Eight of the district's eleven schools are currently serving as sites for supervised clinical experiences. These include the district's high school and middle school and six elementary schools. Currently 13 juniors and 1 senior are working in schools at the three levels.

9. The following flow chart depicts the governance structure of the East Hartford PDC. This PDC is a collaborative, and decisions regarding policies and procedures are made jointly.

RESPONSIBILITIES

A. District Committee
   1. Determine goals and policies of program.
   2. Develop formats of clinical experiences.
   3. Select participating schools.
   4. Organize district-wide training, seminars and orientation.
   5. Identify areas of technical/research assistance needed.
   6. Work with district professional development and personnel offices.
   7. Coordinate clinical experiences with university courses and seminars.
   8. Evaluate programs.
   9. Resolve placement conflicts.

B. Building Committee
   1. Develop specific clinical experiences based on needs and resources of the building.
   2. Provide a cadre of teachers to work with UCONN students.
   3. Organize building orientation.
   4. Provide access to materials, records, etc.
   5. Report on activities to district committee.
   6. Evaluate program at building level

C. UCONN
   1. Conduct workshops and seminars.
   2. Provide liaison with district and school committees.
   3. Assist in grant writing for collaborative projects.
   4. Provide consultant services and technical assistance.
   5. Provide incentives for site coordinators and host teachers.

U-CONN -- 7
D. Site Directors

1. Place university students with host.
2. Meet periodically with university students.
3. Attend district committee meetings.
4. Collect evaluations and forward to district coordinator.

U-CONN -- 8
8. The Professional Development Center (PDC) will provide supervised clinical experience to assist in the translation of theory and research into practice. The schools in which a PDC is established will provide an environment where the most up-to-date research-based instructional practices and programs can be observed and experienced by those preparing for professional careers in education.

The Professional Development Center is a collaboration among school/university faculty and students to enhance public education. This partnership is founded on the premise that learners are the focus of our efforts. We seek to achieve the following goals:

- the best possible environment for student academic learning and personal self-fulfillment

- opportunities for pre-service and career-long professional learning and development of teachers

- ongoing access to the best knowledge and talent related to student learning and development.

In order to achieve these goals UCONN shall assign and Mansfield shall accept a mutually agreed upon number of UCONN education students per class year, each to be assigned with a certified Mansfield classroom teacher. UCONN may provide interns in school administration assigned to certified school administrators. In addition, individuals may work in the areas of school instruction development, school psychology, special education, and reading by being assigned to appropriate certified staff members as part of the Professional Development Center program.

9. Each PDC has a steering committee. In Mansfield the committee consists of a school representative (a teacher) from each K-3 schools, two from the middle school, the PDC Coordinator (assistant superintendent) from the school system, and the PDC coordinator from UCONN. For Region #19 the steering committee consists four teachers from different departments of the high school, the superintendent of the region, principal and vice principal of the high school and the two PDC coordinators-high school and UCONN. From these two groups an overall steering committee for Mansfield has been developed. The committees make the decisions concerning the various aspects of the PDC’s operations with the approval of the two boards of education and UCONN administration.

10. No extra funding (above and beyond regular budgets and loads) has been provided for the operation of the centers.

8. The Hartford Professional Development Center is a collaboration among school professionals and university faculty and students designed to enhance public education. It is the intent of the Professional Development Center to move beyond a traditional university-school relationship toward the creation of a partnership dedicated to change within schools and in teacher preparation.

The Professional Development Center (PDC) allows for supervised clinical experiences in the preparation of prospective teachers and other educational professionals. The PDC is an environment in which research-based instructional practices and programs can be observed and experienced by those preparing for professional careers in education. University and school personnel work together to identify educational dilemmas and propose meaningful solutions. Dialogue on
all levels, research on current educational practice, and continual questioning and reflection form the basis for the PDC.

Within this partnership we share a common vision in the revitalization of urban school environments and in the preparation of professionals who will be leaders in these schools. Specifically, we are attempting:

1. to provide the best possible environment for student academic learning and personal self-fulfillment;
2. to provide opportunities for preservice preparation and career-long professional development; and
3. to conduct collaborative research and development activities which will advance theory and practice in urban education.

This partnership was formed four years ago. Since that time teachers, school and university administrators, faculty and students have worked together, shaping the partnership, leading preprofessionals through clinical experiences, and working toward the professional growth of all parties. Conducting research which is viewed as pertinent by both teachers and university faculty is a partnership goal which we are achieving. Additionally, developmental activities which add needed services to this school population are under way.

A partnership agreement was developed with the Hartford Public Schools and signed for a period of five years beginning in January of 1991. This agreement spells out partnership goals as well as responsibilities of both the school and the university. Committees of school teachers and administrators along with university faculty, administration, and students are formed as needed to design, implement, and evaluate special projects as well as coordinate and oversee university student clinical placements.

While the Hartford PDC does not have a base funding source, grant monies and staff support have been procured through community, corporate, and federal agencies. These monies have assisted in research and project development as well as teacher preparation. Funding sources have included: The Travelers Corporation, CIGNA, Apple Corporation, Southend Community Services, and the Office of Special Education—the Department of Education.

It should be stressed that while outside funding is sought to assist in project development, the base support for the Hartford PDC comes from the "in-kind" contributions of university and school faculty who devote considerable time to partnership activities. Currently eight university
faculty spend at least one day per week in the Hartford Professional Development Schools along with the Dean of the School of Education. School teachers contribute much time and effort in working with university clinical students at all levels of their preparation.

The University of Connecticut  
249 Glenbrook Road  
Storrs, CT 06269-2033  
(203) 486-0280

8. Objectives:

To provide the best possible educational environment for ALL students: K-12, and pre-service undergraduate and graduate students.

To provide collaborative opportunities for pre-service preparation and career-long professional development for teachers.

To conduct collaborative research and development projects.

9. The agreement between Tolland Public Schools and UCONN established:

1. A district facilitator from the school system
2. An administrative "Coordinators Committee"
3. A nine-member "Teacher Steering Committee"

10. The program is presently funded as part of the regular university and Tolland school system budgets.

Grant proposals for expanded funding are presently being submitted to various state and federal agencies.

8. The mission of the Willington PDC is to provide clinical settings and professional expertise for University of Connecticut students who are preparing to be professional educators. The Center also carries out joint projects with the School of Education such as the development of grant proposals, inservice education of the PDC staff, review of the University's professional educator program, and serving as a professional resource to the University and vice versa.

9. A five member steering committee composed of the Superintendent of Schools, two building principals and two teachers also serve as building-site coordinators and meet with building clinic teachers approximately once per month.

10. The PDC provides a small stipend to the two building-site coordinators, released time for clinic teachers to meet once per month and other in-kind support. The University provides a faculty member on a part-time basis to coordinate activities between the PDC and University. Other University faculty members are usually available as the need arises and as their time allows.

8. This PDC is unique in that two state universities are collaborating
together with a school district in an attempt to improve the professional
preparation of teachers attending the universities, the education of
students attending the schools in the district, and the professional lives
of the teachers, administrators, and staff who work at the schools in the
district. As such, the following sort of activities are either currently
taking place or are planned for the future: placement of pre-service
teachers from both universities; staff-development experiences for
teachers, administrators, and staff in the district schools; and
opportunities for professionals in the district as well as at the
universities to develop new programs and conduct research.

U-CONN -- 17
9. A steering committee consisting of representatives from the school district and both universities has been established to oversee the activities involving the three institutions participating in this collaboration. Representing the school district are a district administrator, numerous teachers and instructional supervisors, and a union representative (also a teacher). Representing the universities are faculty members who have taken responsibility for this PDC, as well as one dean and one department chair.

10. There is no specific funding for the operation for this PDC. Occasionally, money becomes available from a small state grant or university account to pay for food at meetings of the steering committee, but for all intents and purposes, this PDC runs without additional funds.

7. Antonette Port, 1776 University Ave., CMH 124, Honolulu, HI 96822 (808) 956-7709; and Aiko Oda, 1776 University Ave., WA 121B, Honolulu, HI 96822. (808) 956-7501

8. Provides onsite elementary setting for pre-service teachers in the Master of Education in Teaching (MET) program at the University of Hawaii at Manoa. Seven (7) teachers and their principal have made the commitment to work with students and university personnel in the development, implementation, and evaluation of the program.

9. The governance of the program is currently being developed. Program decisions rest with the Coordinator of the MET program, faculty and staff from the university and respective school sites. Administrative decisions regarding facilities, personnel, budget, scheduling, etc. is mainly with the principal at the school site and/or a designated school council or school/community group. District superintendents have concurred with the selection of the sites in their respective districts. Decision making for support personnel and budget reallocations is also the responsibility of the district superintendent.

10. Funding for this partnership school will be incorporated into existing funds. The Hawaii State Department of Education provided funds for summer contracts for teachers to participate in program development. In addition, preference for staff development funds may be given to partnership school personnel for in-service training and substitute days. The University budget will cover stipends for cooperating teachers based on current rates and consideration will be given to class/research loads for the university faculty members. The Hawaii School/University Partnership will continue to support this effort through materials, facilities, travel for site visitations and/or relevant conferences, consultants, evaluation, etc.

All groups involved in partnership schools will be encouraged to support related proposals for funding at the Legislator for the supplementary
budget year 1992-93. Paid internships in the fourth semester of the program will be a big cost item during the second year of this program.

Six (6) teachers and their principal have committed to work with students and university personnel in the development, implementation, and evaluation of the program at the secondary level.
9. The governance of the program is being developed. Program decisions rest with the Coordinator of the MET program, faculty, and staff from the university and respective school sites. Administrative decisions regarding facilities, personnel, budget, scheduling, etc. is mainly with the principal at the school site and/or a designated school council or school/community group. District superintendents have concurred with the selection of the sites in their respective districts. Decision making for support personnel and budget reallocations is also the responsibility of the district superintendent.
10. Funding for this partnership school will be incorporated into existing funds. The Hawaii State Department of Education provided funds for summer contracts for teachers to participate in program development. In addition, preference for staff development funds may be given to partnership school personnel for in-service training and substitute days. The University budget will cover stipends for cooperating teachers based
on current rates. The Hawaii School/University Partnership will continue to support this effort through materials, facilities, travel for site visitations and/or relevant conferences, consultants, evaluation, etc.

All groups involved in partnership schools will be encouraged to support funding proposals at the Legislature. Paid internships in the fourth semester of the program will be a big cost item during the second year of this program.

U-SO MAINE -- 1
8. The ETEP program is guided by the Mission Statement and Portrait of a Teacher as Learner. The program is focused on the continuing and changing nature of teacher development.

The Portland site and participating schools, in turn, make unique contributions to the scope of the program. Each site in the program develops a theme which highlights the unique features of its schools and programs. Individual school contributions include: (a) Portland High School's English as a Second Language program and recent participation in the Coalition for Essential Schools, (b) a Teachers Academy for Portland and surrounding districts is coordinated each year by a Deering faculty member. King Middle School is a Demonstration School in the Southern Maine Partnership's Network of Renewing Schools. Portland is one of the districts in the Expeditionary Learning project, a New American Schools Development Corporation (NASDC) grant recipient.

9. At the program level, ETEP is coordinated by the teacher education program faculty and Director of Teacher Education. In addition, a teacher education advisory council composed of university education and arts and sciences faculty, school faculty, and other representatives is in the conceptual stage.

At the site level, the Portland site is coordinated by a Steering Committee of school faculty, school administrators, and university faculty. School-based faculty and university-based faculty collaborate in the operation of the program across the site. In addition, each school is in the process of establishing a building-level contact person.

10. The funding is a combination of university, school district, and external support. Each site in ETEP has designated a school-based faculty member as a Teacher Leader who is released half-time to work collaboratively with the university coordinators. This position is supported by a program development grant from the UNUM Corporation. The UNUM grant also provides opportunities for school-based faculty to participate in courses through guest presentations, and cooperative teaching. The university provides for course delivery by faculty and adjunct instructors, site coordination, and intern supervision.

8. The ETEP Program is guided by the Mission Statement and Portrait of a
   Teacher as Learner. The program is focused on the continuing and
   changing nature of teacher development.

   The Teacher Education Elementary Middle Secondary (TEEMS) site and
   participating schools, in turn, make unique contributions to the scope of
   the program. Each site in the program develops a theme which
   highlights the unique features of its schools and programs. K-12
   restructuring is the TEEMS site theme. Wells-Ogunquit has sponsored a
   Teachers Academy each year. The theme of the most recent Academy
   was examining student outcomes and implementing the state of Maine's
   Common Core of Learning. Among individual school contributions is the
   participation of Wells High School in the Nation Education Association's
   Mastery in Learning Consortium.

9. At the program level, ETEP is coordinated by the teacher education
   program faculty and Director of Teacher Education. In addition, a
   teacher education advisory council composed of university education
   and arts and sciences faculty, school faculty, and other representatives
   is in the conceptual stage.

   At the site level, TEEMS is coordinated by a Steering Committee of
   school faculty, school administrators, and university faculty.
School-based faculty and university-based faculty collaborate in the operation of the program across the site.

10. The funding is a combination of university, school district, and external support. Each site in ETEP has designated a school-based faculty member as a Teacher Leader who is released half-time to work collaboratively with the university coordinators. This position is supported by a program development grant from the UNUM Corporation. The UNUM grant also provides opportunities for school-based faculty to participate in courses through guest presentations, and cooperative teaching. The university provides for course delivery by faculty and adjunct instructors, site coordination, and intern supervision. A federal mid-career training grant provides extra support for intern supervision and special projects.

8. The ETEP program is guided by the Mission Statement and Portrait of a Teacher as Learner guide. The program is focused on the continuing and changing nature of teacher development.

The Gorham site and participating schools, in turn, make unique contributions to the scope of the program. Each site in the program develops a theme which highlights the unique features of its schools and programs. Primary education and authentic assessment are the Gorham site themes. The three participating faculties are collaborating on a portfolio process using microcomputer technology. They participate in Harvard University's "Project Zero." The Gorham district has established a "Teacher Scholar" program through which classroom teachers engage in a sabbatical year examining topics such as the evolution of one building as a Professional Development School. Gorham is one of the
districts in the Atlas Schools, a New American Schools Development Corporation (NASDC) grant recipient.

9. At the program level, ETEP is coordinated by the teacher education program faculty, and Director of Teacher Education. In addition, a teacher education advisory council composed of university education and arts and sciences faculty, school faculty, and other representatives is in the conceptual stage.

At the site level, Gorham is coordinated by a district wide steering committee, including representatives from all the elementary and secondary faculties.

10. The funding is a combination of university, school district, and external support. Each site in ETEP has designated a school-based faculty member as a Teacher Leader who is released half-time to work collaboratively with the university coordinators. This position is supported by a program development grant from the UNUM Corporation. The UNUM grant also provides opportunities for school-based faculty to participate in courses through guest presentations, and cooperative teaching. The university provides for course delivery by faculty and adjunct instructors, site coordination, and intern supervision.

We will be adding two new sites in Fryeburg/Lovell, ME and Yarmouth, ME:

   Fryeburg Academy is a private school with its own Board of Trustees.

7. Dr. Lee Goldsberry
   500 Bailey Hall
   University of Southern Maine
   Gorham, ME 04038
   (207) 780-5026

8. The ETEP program is guided by the Mission Statement and Portrait of a Teacher as Learner. The program is focused on the continuing and changing nature of teacher development.

   The Fryeburg site and participating schools, in turn, make unique contributions to the scope of the program. Fryeburg offers an unusual combination of public and private education. Because of the scarce population, the public school district has entered into a contract with Fryeburg Academy to provide secondary education for the district. In addition, the site's location on Maine's rural western border has led to a concentration on the problems and issues of rural education. The Fryeburg site is engaging in community outreach initiatives to more closely connect the schools, community, and teacher education.

9. At the program level, ETEP is coordinated by the teacher education program faculty and Director of Teacher Education. In addition, a

U-SO MAINE -- 9

59
teacher education advisory council composed of university education and arts and sciences faculty, and other representatives is in the conceptual stage.

At the site level, coordination is by a steering committee. School-based faculty and university-based faculty collaborate in the operation of the program across the site.

10. The funding is a combination of university, school district, and external support. Each site in ETEP has designated a school-based faculty member as a Teacher Leader who is released half-time to work collaboratively with the university coordinators. This position is supported by a program development grant from the UNUM Corporation. The UNUM grant also provides opportunities for school-based faculty to participate in courses through guest presentations, and cooperative teacher. The university and schools provide for course delivery by faculty and adjunct instructors, site coordination, and intern supervision.

---

Site level information (Items 6-10) for above four schools:

6. Yarmouth School District, Yarmouth, ME 04096
7. Dr. Nancy Austin
   500 Bailey Hall
   University of Southern Maine
   Gorham, ME 04038
   (207) 780-5088
8. The ETEP program is guided by the Mission Statement and Portrait of a Teacher as Learner. The program is focused on the continuing and changing nature of teacher development.

   The Yarmouth site and participating schools, in turn, make unique contributions to the scope of the program. Each site in the program may develop a theme which highlights the unique features of its schools and programs. Collaborative learning and nurturing communities of learners are Yarmouth site themes. The Yarmouth schools are using a community-based approach to strategic planning for the schools, involving business, school, and resident representatives. Mathematical and language literacy are themes of teacher inquiry in Yarmouth.
9. At the program level, ETEP is coordinated by the teacher education program faculty and Director of Teacher Education. In addition, a teacher education advisory council composed of university education and arts and sciences faculty, school faculty, and other representatives in is the conceptual stage.

At the site level, coordination is by a steering committee. School-based faculty and university-based faculty collaborate in the operation of the program across the site.

10. The funding is a combination of university, school district, and external support. Each site in ETEP has designated a school-based faculty member as a Teacher Leader who is released half-time to work collaboratively with the university coordinators. This position is supported by a program development grant from the UNUM Corporation. The UNUM grant also provides opportunities for school-based faculty to participate in courses through guest presentations, and cooperative teacher. The university and schools provide for course delivery by faculty and adjunct instructors, site coordination, and intern supervision.
MASSACHUSETTS
Wheelock College

1. Martin Luther King School
2. Grades K-8
3. 100 Putnam Avenue, Cambridge, MA 02139
4. (617) 349-6562
5. Mr. Charles Stead, Principal
6. Cambridge Schools District, MA

---

1. Cambridgeport New School
2. Grades K-2
3. 12 Corporal McTernan Street, Cambridge, MA 02139
4. (617) 349-6587
5. Ms. Lynne Stuart, Acting Head
6. Cambridge Schools District, MA

---

7. Dr. Susan Swap, Chair, Department of Professional Studies, Wheelock College, 200 The Riverway, Boston, MA 02215-4176, (617) 734-5200, ext. 193

8. Mission--The goal of each PDS will be to seek a close and continuing partnership over at least three to five years between the school and college-based faculty to:

   1. create communities of learning that support the continuing development and learning of adults and children;

   2. develop approaches to teaching and curriculum that prepare all students to live and work in a multicultural and highly technological democracy;

   3. improve the preparation or new teachers;

WHEELock -- 1

64
4. explore how to "reinvent" the institution of school to support collaboration and continuous learning;

5. seek closer connection with families and community members to support children's learning;

6. define ways of using the school as a base for integrating necessary services for children and families.

The present focus in Cambridgeport is creating a new model of supervision for student teachers that includes a consistent faculty member from the college, joint study of models of supervision and evaluation in use elsewhere, and collaborative seminars for students, teachers, and college faculty. The Steering Committee from the Martin Luther King school is completing a process for identifying an initial focus for our efforts.

9. Governance--The MLK school has a steering committee of 23 persons that includes representatives from the central administration, school administration, all teaching programs, parents, students, community members, and the college. The steering committee is collaboratively run by one representative each from Wheelock, the school administration, the parent community, and the teaching faculty. The steering committee has set up explicit processes for making decision-making open, representative, and interactive with the school community as a whole. It meets once a month to make all decisions related to the partnership.

10. Funding--We are using funds from the CER stipend to support release time for teachers and consultants. The Cambridge system has dedicated a full release day and all afternoon release days during the year to this project, along with about $3,000 for consultants and a stipend for the teacher chair of the steering committee at MLK. We are actively seeking further funding.
NEW JERSEY
Montclair State College

1. Harold Wilson School
2. Middle School; Grades 6-8
3. 190 Mohammed Ali Blvd. Newark, NJ 07108
4. (201) 733-6446
5. Dr. Lourdes Mitchel, Principal
6. Newark, New Jersey Public School District
7. Dr. Nicholas M. Michelli, Dean, School of Professional Studies, Montclair State College, Upper Montclair, NJ 07043, (201) 893-5167.
8. The school opened in September, 1991, this PDS to provide extensive in-service professional development and field experiences for prospective teachers. Plans are based on long-standing collaborative projects and relationships between Montclair State College and the Newark Public Schools, with a continuing emphasis on the theme of teaching for critical thinking.
9. Representatives of the school, school district, teachers' union, and the college are involved in decision making about the project through an Oversight Committee. For 1992-93, the school will also be governed by a Management Committee that will include representation from the College.
10. There is substantial supplementary funding for the Professional Development School, provided by the school district, the State of New Jersey through the Departments of Education and Higher Education and, it is expected, by local foundations and corporations.

In response to your question about partnership schools, we estimate that 40 percent of our students are placed in partner schools for their clinical experiences during a typical academic year. With the exception of the Harold Wilson Middle School for Professional Development, we are defining "partner schools" as an elementary or secondary school within any of our 15 "clinical school districts." Of the 40 percent or approximately 130 students who work in the clinical schools, 10 percent are at the elementary level (i.e., art, music, physical education, home economics, technology education) for one-half of their clinical experience. The balance of their field work takes place in secondary schools. The other 90 percent of our students work exclusively in junior high schools or high schools in the clinical districts.

MONTCLAIR -- 1

67
Miami University

1. D. Russel Lee Joint Vocational School
2. Grades 9-12
3. 3603 Hamilton-Middletown Road, Hamilton, OH 45011
4. (513) 868-6300

   (803) 253-5230
8. Lyon Street Elementary School has an exemplary K-5 program as well as a variety of innovative programs. It has much to offer the College's pre-service teachers. In the Fall 1992, Ed 435 Curriculum and Instruction in the Elementary School II (with science and health focus) will be taught at Lyon Street Elementary School by a College faculty. Students will be taking the course where they will also do practicums and later student teach. Plans call for Lyon Street faculty to teach courses, e.g., Reading in the Elementary School or Educational Technology. These collaborative efforts will expand to the point where the education of teachers becomes a shared endeavor between the College and the school.

During Fall 1992, we expect to have 5 Elementary Education majors in student teaching (4 males, 1 female). As a cohort group, Lyon Street will provide student teaching experiences for these students.

As of this date, no secondary/middle school students are scheduled for student teaching in fall 1992.

9. An advisory council consisting of Arts, Sciences, and Education faculty from the College and faculty from Lyon Street School has been appointed. Team building activities are planned for Fall, 1992. To date, decisions concerning PDS activities have been made by the College's education department in consultation with district personnel. The
principal, and staff of Lyon Street and the College's Arts and Sciences faculty.

10. Grant funds of $10,000 were provided through the South Carolina Center for the Advancement of Teaching and School Leadership. It was emphasized that the most of these funds would have to be spent on staff development for the Benedict faculty and the Professional Development School(s).

   (803) 786-3747

8. Provide locations for pre-service clinical experiences and student teaching, as well as onsite pre-service courses.
9. At the present time, decisions concerning various aspects of the PDS's operation are being made by a rather large and fluid Steering Committee whose core membership remains stationary while appropriate resource people are invited in to give expertise/direction on specific issues. These persons may serve during this time as ex-officio members of the committee. The governance structure will be closely examined during Fall semester and may change accordingly. The Committee leans more towards a philosophy of "inclusion" rather than "exclusion" with regard to governance structure. One can readily see that our "governance" is evolving...and perhaps rather slowly.

10. Percentage of field experiences in PDS' elementary settings: 15; percentage of field experiences in PDS' middle/secondary settings: 30

SC CONSORTIUM -- 4

81
The information on scope of the mission, governance, and funding is presently being developed and will be forwarded as soon as it is completed.

An estimate of the extent to which field experience at our site occur in professional development schools would range anywhere from 10 percent to 75 percent. The education department has four levels of field experience: in level I students observe in a variety of school settings in elementary, middle, and secondary schools all over the country. The professional development schools are used approximately 10 percent of the time. In level II students participate almost exclusively in the professional development schools. In level III (methods courses) and level IV (student teaching) our students are involved in a number of schools including the professional development schools.

Winthrop University (SC Consortium)

Developing planning stages for establishing a professional development school.
An exemplary program for children that focuses on acceleration, not remediation.

Based on Henry Levin's Accelerated School model, which is a school site-based, shared decision making model. Program direction is provided by cadres consisting of teachers and other staff, school-site principal, university representatives, and parents.

University provides faculty for training, implementation, and evaluation. Chevron Corporation provides monetary funding for program at school site. District provides some limited funding for special activities.

* * *
8. The School serves as the center for many of Texas A&M University's teacher, administrator counseling pilot programs.

9. Program direction is provided by a school based council made up of representatives from all grade levels and university based faculty.

10. A block of middle school methods courses are offered by university and school based faculty. Doctoral students in counseling intern at the school and a leadership program sponsored by Danforth foundation and developed by faculty from Jane Long, Educational Administration, Curriculum and Instruction, and Educational Psychology is located at the school. District provides some limited funding for special activities.

BYU -- 8
The following information applies to all the above listed districts:

8. **Scope of the Mission:** Partner schools are places where university and school educators collaborate on a renewal agenda structured by four partner school functions. 1) Preservice function-preservice education for new teachers which draws teachers and principals into sharing the teaching of university students and university faculty into sharing the teaching of public school pupils. 2) Inservice function-inservice education (staff development) for practicing teachers in the school and faculty on campus which draws professors and practitioners into reciprocal mentoring activities. 3) Curriculum function-curriculum development to improve the learning experiences of pupils which involves teachers, principals, and professors in examining, revising, and evaluating learning materials, programs, an assessment strategies. 4) Research function-research to foster university and school inquiry into questions jointly framed and pursued by teachers, principals, and professors.

9. **Governance:** Both the university and the schools agreed as equal partners to work for the simultaneous renewal of schools and improvement of teacher education. Each Partner School was assigned a volunteer member of the university elementary teacher education faculty, along with approximately 18 BYU students majoring in elementary education. The school principal, the teachers, and the university coordinator worked on a renewal agenda structured around the four
Partner School tasks. Schools in each of the following districts are
governed by a district council school, and university coordinators for
each partner school. The Partner School Committee is a larger entity
governing all districts involved in the partnership. This committee is
comprised of two co-chairs, partner school principals, coordinators,
university coordinators, and BYU Elementary Education Department
Chair.

10. Funding: There is no extra funding of the partnership efforts. All costs
are absorbed internally.
