This user's guide for professionals using Project Lifelong Learning staff development modules is designed to accompany the documentary on lifelong learning in the workplace, one of three half-hour television documentary programs intended for broadcast and for general public discussion activities. It introduces the project, the purpose of which is to inform people about successful ways to work toward reaching National Education Goal 5: adult literacy. Information follows on use of the package elements: public service announcements (PSAs); documentary, overview of staff development, and indepth staff development videos; readings; suggested discussion questions; ideas for implementing the strategies; bibliography; and resources. In the "Readings" section, an overview of the workplace context describing the goal of work force education programs is provided, followed by descriptions of programs in the video and their selection; and readings on the strategies defining what each means and why each is important. The five strategies are as follows: meet learner's needs, develop support for lifelong learning, accommodate learner differences, develop higher order skills, and enable learners to use all language processes in their lives. The 11 discussion questions are followed by ideas for implementing strategies. A bibliography lists 251 readings on literacy and lifelong learning in general and on the strategies. A subset of the readings is annotated. The resources section lists 25 organizations and 8 clearinghouses. Abstracts describe their goals, activities, and services. A newsletter/directory on the history and background of PSAs produced for literacy awareness completes the package. (YLB)

Introduction to
Project Lifelong Learning:
For the Workplace

Purpose of the Project

The purpose of Project Lifelong Learning is to inform people about successful ways to work toward reaching National Education Goal #5:

By the year 2000, every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

Project Lifelong Learning shows five key ways, or strategies, that programs can use to help adults become lifelong learners. The five strategies are:

- Meet the needs of the learner;
- Develop support for lifelong learning;
- Accommodate learner differences in the program;
- Develop higher order skills, such as problem solving and decision making; and
- Enable learners to use all language processes (reading, writing, speaking, and listening) in their lives.

The strategies were selected after reviewing the literature in adult education, workplace literacy, and related fields, and after conducting interviews with a 15-member advisory panel and more than 25 other nationally known experts in those fields. The strategies are flexible enough to be adapted to a variety of program settings.

The research suggests that adults learn best when learning addresses their goals, aspirations, and problems. Active, hands-on learning using realistic situations and materials helps learners make the important connection between “learning in a program” and “doing in life.” Thus, Project Lifelong Learning was developed around three contexts that provide meaningful learning experiences for adults: the workplace, the family, and the community.

About This Package

This package addresses the workplace context. The package is intended to help the public and workforce educators learn about the strategies and how they can be implemented. It is also intended to inform these audiences about ongoing workforce education efforts that use the strategies, both those that
occur in workplace settings and those that occur in training settings, such as adult vocational training centers. It includes:

- **Six public service announcements (PSAs)**, each approximately 30 seconds in length. Three of the PSAs showcase lifelong learning efforts across the country. Each of the other three showcases a successful adult learner who has benefited from these efforts. Two of the PSAs, one showcasing efforts and one showcasing a learner, focus on the workforce education context; the other four PSAs focus on community education and family literacy efforts. **Two versions of each PSA are on the tape.** One version includes the following tag line: For information, write P.O. Box INFO, Pittsburgh, PA, 15213. The other version has no tag line to allow local programs to add their own information.

- **A documentary video**, approximately 28 minutes in length. The documentary video is a collage of the strategies in action. It tells the story of three workforce education programs around the country that are working to achieve National Education Goal #5.

- **An overview staff development video**, approximately 28 minutes in length. The overview staff development video provides a broad understanding of each strategy through examples from workforce education programs around the country.

- **An in-depth staff development video**, approximately 28 minutes in length. The in-depth staff development video provides more information about how workforce education programs around the country have put the strategies into place.

- **Readings.** Readings are provided to give users more information about the workplace context, the programs featured in the videos, the strategies, and how they can be implemented.

- **Suggested Discussion Questions.** A series of discussion questions is provided, to get viewers thinking about the strategies, why they are important, and how they can be applied in their own and other programs.

- **Ideas for Implementing the Strategies.** Ideas for implementing the strategies are provided in a checklist form.

- **Bibliography.** Since the readings provided in this User's Guide can only provide limited information, a bibliography on literacy and lifelong learning in general, and on the strategies is provided. Many of the readings listed deal directly with learning for and in the workplace. A subset of the readings is annotated.
**Resources.** A list of resource organizations and clearinghouses is provided. Abstracts describe their goals, activities, and services.

Two parallel packages for the community and family contexts are available from WQED, 4802 Fifth Avenue, Pittsburgh, PA, 15213.

**How This Package Might Be Used**

The PSAs can be used to inform the general public about lifelong learning efforts and success stories. Users may take the PSAs to local television stations, including network affiliates and cable stations, for local broadcast. Either the versions with the "write P.O. Box INFO" tag line or those with no tag line may be used. Users can ask local stations to add local referral information to the versions with no tag line. For example, a coalition of local educational service providers might add their addresses and telephone numbers to the tag line. If the version with the "write P.O. Box INFO" tag line is used, viewers who contact Fox INFO will be referred to local resources.

The other materials in the package are most effectively used in a group setting, led by a facilitator. The facilitator can guide the group through the discussion questions and accompanying readings before and after viewing the videos to get the group thinking about the strategies, why they are important, and how they can be applied in their own and other programs. An organization or group that wishes to use the package may choose a member to be the facilitator. Or, an individual may identify a group that would benefit from the package and organize one or more group meetings around the package. For example, an administrator of a workplace literacy program may decide to use the package with teachers in the program.

All three videos and the accompanying materials may be used in sequence (documentary, overview staff development video, in-depth staff development video) over a period of three or more sessions. When used in sequence, the products add new information to that learned in the previous session. However, groups may also choose to use only one or two of the videos and the accompanying print materials, depending on their goals. For example, those who are interested in learning about how some programs nationwide implement the strategies might watch only the documentary video and use only some of the accompanying discussion questions and readings. Those who are interested in learning about the strategies may use the overview staff development video and appropriate discussion questions and readings. Those who are interested in learning about the strategies and how they can apply them may watch the overview and in-depth staff development videos, use the appropriate discussion questions and readings, then use the checklist of ideas for implementing the strategies to assess the extent to which they already use the strategies and learn further ideas for implementing the strategies. The bibliography may be copied and distributed to group members so that they can use it to further research the strategies.
Obviously there are many ways to use the videos and accompanying print materials provided in the User's Guide. How these materials are used depends upon the expertise and goals of a group. A facilitator can select materials and conduct a session or sessions appropriate to the needs of a group.

Information for the Facilitator

The facilitator acts as a guide to help other viewers learn about the strategies, why they are important, and how they can be applied in workforce education programs. By studying and selecting video and print materials carefully, the facilitator can create a session that is meaningful and useful to a particular group and situation. The facilitator's role includes:

1. Preparing for the session: previewing the videos and all accompanying print materials; selecting materials to use depending upon the group's goals and expertise.

2. Running the session: introducing the session; showing the video or videos; posing discussion questions; guiding the discussion; distributing materials (such as the checklist of ideas for implementing the strategies, readings, bibliography, or resource list).

The following section provides more detailed information on the video and print materials in the package and how they might be used by the facilitator. The materials are designed so that video, print, and group interaction can be combined into a variety of presentations to meet the needs of different audiences.

- The documentary video presents the efforts of three workforce education programs across the country to move toward National Education Goal #5. It can be used with audiences unfamiliar with ongoing workforce education efforts.

- The overview staff development video introduces the five strategies and why they are important through narration, video clips from programs, and interviews with staff and students involved with the programs. It can be used to introduce the five strategies and why they are important.

- The in-depth staff development video provides information on ways that the five strategies can be applied, through narration and examples from programs. It can be used to illustrate how workforce education programs can implement the strategies.
Four types of readings are included. The readings may be used by the facilitator to prepare for the sessions and may be duplicated to be distributed by the facilitator during the session.

The Overview of the Workplace Context describes the goal of workforce education programs and broadly characterizes efforts in the field.

About the Programs Featured in the Videos describes how the programs were selected and gives a brief description of programs highlighted in the videos. A list of all programs that provided footage for Project Lifelong Learning is included.

Readings on the Strategies define what each strategy means and why each is important. It embellishes the information provided in the overview staff development video.

Readings on Implementing the Strategies give ideas for ways the strategies can be applied in programs. Examples of each way appear in the in-depth staff development video.

Discussion questions are designed to build on one another. The first few questions get participants talking about lifelong learning and how it might help adults. Later: questions encourage participants to talk about the strategies, why they are important, and how they might be applied in workforce education programs. The last few questions encourage participants to consider how they currently implement the strategies in programs, and how they might implement strategies they do not currently use. The facilitator can choose appropriate questions from this list depending on the audience and its goals.

Ideas for implementing the strategies give more detailed suggestions on how to apply the strategies. The list may be used by the facilitator to prepare for the sessions. It may also be duplicated and distributed to group members. They may use it to assess the extent to which they already use the strategies, as well as to get ideas for implementing strategies that they may not currently be using in their programs.

The bibliography section may also be used by the facilitator to prepare for the sessions, or may be copied and distributed to group members at the end of the sessions.

The resources section includes a list of organizations and clearinghouses. The facilitator may distribute copies to the group at the end of session or series of sessions to enable group members to conduct further research on their own.
READINGS
Overview of the Workplace Context

The workplace is an important part of life for most Americans and a context in which much adult learning takes place. Many of the efforts to achieve National Education Goal #5 focus on learning “for and in the world of work.” They include both workforce preparation programs, such as vocational schools and community colleges that prepare individuals for work, and workplace education programs that are supported by business and industry and that train or retrain workers in a workplace setting.

Traditionally workforce preparation programs focused on vocational and technical training to prepare future workers for jobs. Workplace education programs focused primarily on job training for current employees and were available mostly to upper-level management and professionals.

Today both workforce preparation programs and workplace education programs are broadening their focus to provide literacy and lifelong learning skills for the workforce. For example, many workforce preparation programs are integrating technical and vocational education with basic skills education (in reading, writing, math, problem solving, and thinking skills); some also provide English as a Second Language (ESL) education to trainees. Workplace education programs are being developed to provide more employees with educational opportunities, such as brushing up on the basic skills or English language skills they need in the workplace. Some programs are providing lifelong learning opportunities for lower-tier employees to advance their skills and knowledge and upgrade to better jobs.

These changes in both workforce preparation and workplace programs have come about, in part, because of new trends and changes in the American workplace and in society. For example:

- People need more sophisticated skills and knowledge to adapt to technological changes in everyday life and in the workplace. They need to read, write, compute, and solve problems more flexibly and at a more sophisticated level than ever before.

- Many American workplaces are restructuring the work environment so that employees have more authority and decision making power. Employees must work cooperatively and closely, with each other and with management, in problem solving and decision making teams.

- Minorities, immigrants, and women are entering (and will continue to enter) the workforce in record numbers. For a variety of reasons, many need to brush up on the basic skills and knowledge they need to be successful in the American workplace.

Many American businesses realize that they must play a greater role in meeting the educational needs of the American workforce and that they cannot do it alone. New connections have been forged with other institutions
and agencies, including public schools, community colleges, human service agencies, vocational and technical institutions, and job training programs. In short, institutions and organizations that once existed and operated independently have pulled together to prepare the country for the demands of everyday life and the world of work.
About the Programs Featured in the Videos

Potential sites to be included in the Project Lifelong Learning video series were identified through discussions with the 15-member advisory panel and with experts in workplace literacy and workforce education, and by researching newsletters such as the Business Council for Effective Literacy’s Newsletter for the Business & Literacy Communities that report up-to-date activities in the field. To be selected for the videos, programs had to address real life learning needs and goals of learners and use one or more of the strategies. The programs also had to be active at the time the videos and supporting materials were being developed and had to be accessible by video crews. Programs finally selected for Project Lifelong Learning (across all three contexts—workplace, family, and community) represented: 1) a variety of geographic locations across the U.S. with a mixture of urban and rural settings; 2) a variety of physical settings, such as community colleges, technical schools, and workplaces; 3) efforts to serve a variety of racial and ethnic populations; 4) lifelong learning efforts, as well as those that focused strictly on literacy; 5) efforts by volunteer, as well as professional staff, and 6) efforts supported by a variety of funding sources (including government, corporations, and foundations, among others). The programs featured in the videos in the Project Lifelong Learning: For the Workplace series include:

- The Center for Employment Training (CET) in San Jose California, a nonprofit, community-based organization which provides job skill training, human development, and job placement services for those most in need. CET illustrates the importance of support services for their students (e.g., child care, counseling, and financial aid), and the program is designed to be sensitive to the cultural and educational backgrounds of students. CET also illustrates the integration of vocational and academic education; English as a Second Language, basic skills (reading, writing, and math), and thinking skills (including problem solving and decision making) are taught using real life materials and situations that learners will encounter on the job. CET works closely with local business and industry to ensure that the training they provide offers a direct pathway to employment in the community.

- Alpena Community College’s Workplace Partnership Project, in partnership with the Thunder Bay Labor Council. The program works with two employers in Alpena, Michigan, the Besser and Fletcher companies, to serve currently employed individuals who are brushing up on the skills they need to adapt to new technology and restructuring in the workplace. These programs show how workplace programs, developed through strong partnerships between business and education, help workers advance their thinking, problem solving, math, and language skills. The skills are taught using materials and situations from the workplace, but workers are also encouraged to apply the skills in all areas of their lives.
The Seafarer's Harry Lundeberg School of Seamanship in Piney Point, Maryland, which illustrates how lifelong learning opportunities can be made available for workers at all levels when labor and management work together. The program also illustrates another important collaboration—the integration of vocational and academic education. The program provides a variety of learning opportunities to educate the entire seafarer; classroom instruction in reading, writing, and math skills is combined with hands-on activities, and various technologies (like computer simulations, word processing, and database management) are also used in instruction.

The Arlington Education and Employment Program (REEP) of the Arlington (Virginia) Public School System which conducts workplace literacy training through a partnership between business and education. The partnership is composed of the Arlington and Alexandria schools, the chambers of commerce, and five industries through their trade associations or corporate headquarters. The partnership sponsors and conducts services that prepare employees to communicate more effectively on the job and enhance workplace productivity. English language training and other curricula are derived from the duties and tasks the employees perform on their jobs. Courses are scheduled and taught at the business site. Additional instructional opportunities are available for employees through the Learning Center at the Wilson Adult Center. Potential trainees may either self-select into the program or are identified by the businesses. Both the employees and the businesses provide direction in developing, conducting and evaluating the courses offered. Thus, the program illustrates the importance of collaboration with local employers in order to address both employer and employee needs.

Additional footage in the videos is provided by the following programs: the Adult Education Program of the State Regional Correctional Facility at Mercer, Pennsylvania; Appalachian Communities for Children (ACC), Annville, Kentucky; the Family Tree Project, Mesa, Arizona; Indianapolis Even Start; The Learning Bank of COIL (Communities Organized to Improve Life, Inc.), Baltimore, Maryland; Literacy Volunteers of New York City, Inc.; the Parent Readers Program, Brooklyn, New York; Project Even Start, Waterville, Maine; and Project READ, South San Francisco, California.
Strategy #1: Meet the Needs of the Learner

To meet the needs of the learner, workforce education programs must ensure that learners see how learning is meaningful and can be used on their jobs. Programs must ensure that learners feel comfortable as they participate. Many adult learners left school and do not persist in adult education programs because they do not see how school or program activities are relevant to their lives. They may have developed negative attitudes toward schooling due to these experiences. Workforce preparation and workplace education programs should help adult learners discover how learning is a positive way to get the skills they need to meet the demands of daily life at work. They may also help adults become aware of how learning meets the demands of life outside of work as well. This will keep learners enrolled in and motivated by the program, show them the connection between learning and their lives, and get them on the road to becoming lifelong learners.

Program staff should talk to learners about issues they feel are important to address in the program and how they should be addressed. Staff should then act on learners’ suggestions within the program. For example, educational program directors might talk to a group of assembly line workers about terminology specific to the workplace and how it can accurately be incorporated into a new basic skills training program. They make sure the terminology they use in training is up to date and accurate. Or, a group of instructors may talk to workers about their understanding of the goals of the company to establish where they agree with management as a starting point for training. Programs should discover the needs of individual learners and work to meet those needs.

As workers remain in a workplace over time, their needs, goals, and desires change. Workers’ responsibilities may change, for example. They may need to work in project teams rather than independently. They might advance up the job ladder, taking on new responsibilities such as writing project reports. Or, workers may change as they progress through an educational program, meeting new challenges, and experiencing success. Successfully completing a work-related basic skills program may inspire an employee to work toward a promotion. Programs must adapt to changing problems, needs, goals, and desires of workers over time.

Program staff should also rely on non-traditional instructional methods within the program, rather than more traditional methods adults experienced as part of their previous schooling. For example, programs may keep learners’ interest by utilizing discussion groups, computer writing lessons, or encouraging learners to tutor each other, rather than focusing solely on such traditional methods as lecturing or individual work in workbooks.
How Can Programs Implement Strategy #1: Meet the Needs of the Learner?

Use a Learner-Centered Approach

In workforce education programs that use a learner-centered approach, program staff understand that learners know their own strong areas and learning needs better than anyone else. Staff respect learners' knowledge and experiences. Learners have active input into all aspects of the program. They guide the course of their own programs. Staff ask learners about their needs and goals when they enroll in the program and periodically thereafter. Staff work to get to know individual learners to help better understand their work situations and how those situations influence their needs and goals. These needs and goals are addressed in instruction. For example, an instructor may put in extra time with an employee who needs to brush up on grammar skills for a new job that requires more writing than the employee had done previously. During instructional activities, learners have substantial amounts of input, control, and responsibility. Learners also have a say in how the program is designed and run. There may be a worker advisory panel that guides program activities and advises program staff on decisions.

Embed Instruction in a Relevant Context

Workforce preparation and workplace education programs that meet the needs of learners introduce new skills and knowledge that are meaningful to learners. These programs focus on teaching skills and knowledge that employees use on the job. Real situations that learners find themselves in on the job provide a springboard for instructional activities and provide materials to be used during instructional activities. Workers may practice writing reports to their supervisors by summarizing that day's actual events, for example, or they may write their own job descriptions. Programs may broaden the application of these skills to other contexts, however. Learners can discuss how they might apply skills in various jobs in the workplace. They can discuss how they might use these same skills in other areas of their lives. Some workplace programs provide opportunities for learners to work on skills that are not related to the job. For example, learners may bring materials from home that they would like to work on.

Offer Non-Traditional Instruction and Delivery

Programs that meet the needs of the learner often use "non-traditional" instruction and delivery methods. Non-traditional instruction is different from the kinds of instruction that many adult learners experienced in the past. It offers learning tools, situations, and relationships that adults probably
did not experience in their previous schooling. Non-traditional instruction and delivery may include:

- small group instruction;
- technology-based instruction;
- cooperative learning and peer tutoring;
- peer tutoring, where students work together; and
- distance education.

Technology-based instruction, including computer-assisted and computer-based instructional programs, and instructional and interactive video are important because the ability to use and interact with technology in everyday life, especially in the workplace, is fast becoming a necessary skill. Technology-based instruction helps learners develop basic and higher order skills while they learn to use new technologies. Learners may work individually, in pairs, or in small groups, using technology as a tool for instruction.

Cooperative learning and peer tutoring represent new ways for learners to interact with teachers and peers in an educational environment. Learners and instructors interact on an equal footing in cooperative learning. In peer tutoring, learners, rather than instructors, facilitate each others' learning.

In distance education, various media are used to provide communication between learners and teachers who are not at the same location. Educational television, teleconferencing, or computers provide the basis for interaction between instructors and learners.
Strategy #2: Develop Support for Lifelong Learning

To develop support for lifelong learning, workforce education programs must form partnerships and strengthen connections among providers in the community. They must provide support services to learners in the program. In the past, only a small percentage of adults took part in lifelong learning activities, mostly well educated, white collar professionals. But as society changes and becomes more complex, lifelong learning for all adults will be more important than ever. This is especially important for workers as societal changes affect the American workplace. Working with computers, for example, is now commonplace. Workers must handle more information than ever before. They work in teams rather than individually, which requires good communication skills.

All organizations, groups, and institutions that have resources to support lifelong learning—including information, money, time, facilities, or advocacy—should work together to support lifelong learning. These organizations, groups, and institutions include the education system (public and private schools, higher education, adult education), libraries, human service providers, business and industry, public services, community organizations, citizen groups, local, state, and federal governments, and families. The cooperation and resources of all such agencies, programs, and institutions are important for two reasons: 1) to provide a wide range of services and supports to learners with different needs and goals, and 2) to increase communication among providers, decrease duplication of services, and provide better coordination so that adult learners can make the most of available services. Programs should work with other community agencies to develop support for lifelong learning.

Support services, such as child care, incentives (cash bonuses and release time), career counseling, and job placement, should be provided by workforce education programs. Many adult learners do not take part in or make the most of the educational opportunities available to them because of barriers such as lack of child care, transportation, or money. Support services help to remove such barriers and increase learners' opportunities for participation. Programs should provide a variety of such support services to workers.
How Can Programs Implement
Strategy #2: Develop Support
for Lifelong Learning?

Form Partnerships and Strengthen Connections Among Providers

Workforce preparation and workplace education programs that develop support for lifelong learning work with other organizations in the community to provide comprehensive services to learners. By communicating and working with other community organizations, a program can direct learners to opportunities and services beyond those which it provides. For example, a worker enrolled in a workplace literacy program may decide that she would like to pursue a college degree. The program she is enrolled in may direct her to a local community college. A workplace program that operates a learning lab on Saturdays may recruit a community volunteer group to provide child care so that more employees can take advantage of the lab. Without such linkages, learners may be unaware of or unable to take advantage of all the learning opportunities and services available to them. When such linkages are provided, learners make the most of the services available to them. By communicating with and working with other community organizations, programs can also eliminate duplication of services, thereby helping to conserve resources and improve services. When a workplace program coordinates with another community organization to provide child care, for example, workplace resources and energies that would have been directed toward providing child care can be directed to other efforts. This allows each organization to focus on the services it is best equipped to provide, ultimately strengthening all of the organizations involved.

Offer Support Services

Programs can develop support for lifelong learning by providing support services to learners. For example, workplace programs may provide on-site child care or job counseling and placement. Such services help to relieve some of the learners’ worries and responsibilities, and allow learners to focus on learning. Programs may provide such services on their own, or if this is not possible, they may collaborate with other agencies in order to provide support services.
Strategy #3: Accommodate Learner Differences in the Program

To accommodate learner differences, workforce education programs must work to understand and respond to the differences among learners. Every learner comes to a program with his or her own unique qualities, background, beliefs, values, language, and experiences. These differences might affect learner participation in the program. Programs can respond to learner differences by:

- Organizing services to address cultural and ethnic differences. Attitudes, values, and beliefs about schooling are culturally determined to a great extent and they vary among adult learners. For example, learners from cultures that do not highly value formal education may reflect these values in the program. They may exhibit behaviors or say things that might be interpreted as a “bad attitude” but are instead a reflection of their cultural values.

- Organizing services to address special needs. Learners may have vision or hearing problems or a physical impairment that require accommodation in the program. They may have a learning problem that affects how they learn, such as difficulties following directions or screening out background noise while trying to work. They may have learning preferences; for example, preferring to figure something out on their own rather than listening to someone tell them about it. Age differences create unique learning needs: older workers who have been out of the educational system for some time may have different needs than younger workers. Environmental circumstances may also create special needs: for instance, if public transportation is not available, some workers may have difficulty staying after work hours to participate in a program.

This is an important strategy for workforce preparation and workplace education programs for several reasons. The majority of new entrants into the workforce in the next 10 years will be minorities, immigrants, and women. In addition, greater numbers of disabled individuals will be entering the workforce. The Americans with Disabilities Act, which mandates equal access to all disabled individuals, will affect workplaces. It specifically prohibits employers with more than 25 employees from discriminating on the basis of disability in employment. Workforce education programs will have to respond to the needs of a very diverse workforce.

Programs must become aware of the differences and needs of learners, and then must respond to those differences and needs in the program. When programs respond to the needs of learners, learners are more likely to experience success in the program and on the job.
How Can Programs Implement
Strategy #3: Accommodate Learner Differences
in the Program?

Develop Sensitivity to Learner Differences

Workforce education programs that accommodate learner differences work to discover the cultural, social, and educational history of each learner, and what life on the job is like for each learner. This includes finding out what learners consider to be their strong points, how they learn best, how they did and did not learn in the past, and how they would like to learn. It includes asking learners to talk about barriers that may be keeping them from fully participating in the program. Programs can use a variety of methods to enable learners and staff to share their background, experiences, goals and preferences. These include staff interviews with learners, informal discussions between a learner and a teacher or between groups of learners and teachers, or the use of formal assessment instruments.

Programs that accommodate learner differences provide staff development activities that raise awareness of the differences among learners and how these differences prevent or affect learners' participation in the program. Staff development activities can focus on raising awareness of cultural diversity, potential learning strengths, and how they can be identified, learning preferences and how they can be identified, and barriers to participation and how they can be identified.

Respond to Learner Differences

Workforce preparation and workplace education programs that accommodate learner differences act on the information they gather from learners to maximize the ability of every learner to fully participate in the program. They respect learner backgrounds and differences and build the program so it suits the backgrounds and differences of each learner.

These programs build on learner strengths. For example, learners may be asked to give an informal presentation to other members of the program about something in which they have expertise, such as a specialized technique for welding. This allows each learner to take turns in the role of expert while providing needed information to other learners in the program. Or, programs may make accommodations so that learners who have difficulty with written tests can respond to test items orally.

These programs also provide ongoing staff development that gives staff the tools they need to respond effectively to learner differences in the program. Such staff development activities ensure that staff remain flexible to accommodate changing needs in the program.
Finally, these programs encourage professional development and leadership in staff from diverse backgrounds, including those from underrepresented groups and those with special needs. They also encourage learners to take leadership roles in the program. The programs encourage such leaders to offer their valuable perspectives on the operation of the program, and use this information to more fully respond to learner needs.
Strategy #4: Develop Higher Order Skills

To strengthen higher order cognitive skills, workforce education programs must provide direct instruction to learners in those skills, as well as help learners use those skills in new and varied situations. Higher order cognitive skills include the ability to think critically (analyze and evaluate information and situations) and creatively (look at information and situation in new and imaginative ways). They include problem solving and decision making.

Instruction can take advantage of the fact that all adults use higher order cognitive skills to some extent. They have to evaluate what they see, hear, and read every day to make decisions and solve problems. For example, reading is usually considered a "basic skill." Yet, reading involves making decisions (deciding whether the word "bug" in a text means an insect or a listening device), integrating information (connecting information in the text with one's own knowledge), and thinking critically (following and analyzing an author's argument). All of these skills are an integral part of reading. So, even people who are just learning to read use higher order skills.

Programs must also recognize that the nature of the information adults must deal with, the choices they must make, and the problems they must solve are becoming increasingly complex. For example, new workplace trends, such as total quality management (empowering front line workers with more authority to solve problems and make decisions) and statistical process control (where employees use statistical methods to monitor the quality of products as they are being produced), make it necessary for all employees to use their higher order cognitive skills flexibly and in a variety of situations. At the same time, recent studies indicate that many adults do not make full use of the higher order skills when information becomes more complex.

Workforce education programs must help learners maximally use higher order cognitive skills to solve problems they encounter in the workplace.
How Can Programs Implement Strategy #4: Develop Higher Order Skills?

Provide Direct Instruction in Higher Order Skills

Workforce education programs that develop higher order cognitive skills show learners how they already use higher order skills on the job and how they can use them in new areas on the job. Adults may not be aware of how they already use higher order skills and may not see other ways in which they can apply these skills.

Programs begin by helping learners identify how they already use critical thinking, problem solving, and decision making skills. For example, a group of workers might brainstorm and list the types of problems they typically run into on the job and how they solve them.

Programs then help learners think about and practice other situations in which they can use higher order skills. For example, instructors and workers may discuss the list of problems and solutions with the workers, noting which solutions worked, what they would do differently, and how they might use similar skills in other situations. Instructors may then demonstrate for workers how they can use higher order skills in new situations. The instructors describe their thinking, one step at a time, as they solve a problem, make a decision, or work through a complex reading. For example, an instructor may model a problem solution for customer service representatives who deal with angry customers’ complaints. The instructor thinks aloud, saying: “The first thing I have to do is give the customer a chance to talk about his complaint and listen carefully to him. I have to remember not to let his anger get in the way of my listening. I need to shift our attention to the problem and its solution, rather than becoming defensive. I must work to get an understanding of the problem. As I listen to him, I will record his complaint on paper. Then we can look at it together to make sure we both see the problem the same way.” The workers then practice using higher order skills in similar situations. The instructors can provide guidance in new situations (for example, suggesting a next step when a worker is no longer making progress), gradually withdrawing this type of support as workers become more confident of their skills.

Provide Realistic Opportunities for Practice and Application of Higher Order Skills

When workforce education programs use realistic life situations, such as dealing with customers, for the practice and application of higher order skills, they provide a way for learners to transfer use of these skills to a variety of new situations. When learners practice using skills in realistic situations, they are more likely to be able to use them on the job.

Programs that successfully develop learners’ higher order skills bring real world problems into the educational setting. They use role plays and
discussion groups to provide realistic situations, like an interaction between workers on an assembly line. If possible, they provide opportunities for learners to practice and apply skills outside of the program. For example, instructors may ask workers to make note of events that they must communicate to their supervisors throughout the day.
Strategy #5: Enable Learners to Use All Language Processes in Their Lives

To increase learners' abilities to better use language processes, workforce education programs must provide a variety of opportunities for them to practice language skills and show them how these skills are important on the job. The language processes are reading, writing, speaking, and listening. They are the foundation of thought and communication and the tools people use to learn more about themselves and the world. Everyone can benefit from becoming a better speaker, listener, reader, and writer. The ability to express one's feelings and views and to respond to other's feelings and views is important. It empowers people and makes them feel that they can be proactive and can create change. Working to enhance language skills also strengthens higher order skills. Preparing a piece of writing, for example, involves the solution of many problems, including determining who the audience is, and how the piece will be organized.

In the workplace, success depends on advanced communication skills. Workers use the language processes in different ways, depending on the task at hand. For example, employees may gather information from several sources to solve problems, correspond with others to make requests, explain plans or procedures in writing, listen to and follow directions, make a presentation about a procedure, or read a manual to understand a new procedure. They may use electronic mail to report problems and read memos to learn about changes in procedures.

Learners in workforce education programs must be able to see how language can be used to solve problems, reach goals, and carry out daily activities at work. This is important because many adult learners think that reading is just being able to pronounce the words and that writing is spelling and handwriting. Programs themselves may contribute to this perception by the approach they take to teaching. Language skills are often taught in isolation and in the absence of meaningful applications. Programs must explicitly help learners make the important connection between learning language skills in the program and using them on the job.

Although they have unique aspects, the language processes are intricately related and the development of one process enhances the development of the others. For example, group discussion (speaking and listening) helps adults better understand what they are reading or writing about. Writing and revising one's writing demands reading. Staff in programs can capitalize on this through the instructional activities they design.

Workforce education programs must help learners maximally use language processes to solve workplace problems and meet workplace goals.
How Can Programs Implement
Strategy #5: Enable Learners to Use
All Language Processes in Their Lives?

Build Group Discussion Into All Learning Activities

Workforce education programs that successfully strengthen learners' abilities to use language processes build opportunities for group discussion into all areas of the curriculum: even those areas in which it is not traditionally used, such as mathematical problem solving. When a worker tells a group of his peers about how he competed a calculation, for example, he develops speaking, as well as mathematical skills, while the rest of the group develops listening, as well as mathematical skills. Discussion can also be used in conjunction with reading and writing activities. For example, a group of learners may need to refer to a complicated manual to operate a new piece of machinery. They may talk about what they already know as a group then read through the manual together, piecing together and writing down the procedure they must undertake. Such activities provide opportunities to develop all language processes concurrently.

Teach Reading for Meaning

Programs that enable learners to use reading show them how reading is used in the workplace. They help learners see the ways they can use text to meet their needs. They show learners that they must actively think about what they want from the text, ask questions of themselves to make sure they are getting what they need out of the text, use aspects of the text like titles and boldface print to direct their attention to important points, and, if appropriate, test their learning by trying to summarize the main ideas of the text.

Instructors in these programs use guided reading and modeling to demonstrate reading skills and strategies to learners. Instructors may guide learners through a text with questions and discussion. For example, before reading a chart, the instructor asks the learners to discuss information they are looking for and why. Learners are asked to discuss how they might attack the chart (read the row and column headings first?) The instructor then directs learners as they look information up in the chart. After using the chart, the instructor asks learners to summarize the procedures they used in their own words. Instructors may demonstrate effective reading behaviors as they read out loud to learners. For example, an instructor who wants to show how she approaches the task of reading a manual might say, "Before I read this manual, I think about my purpose for reading it. In this case, I need to learn how to sharpen the blade of a riding lawn mower. I will scan the table of contents to look for key words, like 'sharpening' and 'blade.' Before I begin to read the chapter, I will think about what I already know about doing this task. I know that there are a series of steps I must go through to remove the mower
housing before I can sharpen the blade. The manual will probably tell me step by step how to do this. As I read, I'm going to visualize each step in my mind before I do it.”

Teach Writing for Meaning

Workforce preparation and workplace education programs that enable learners to use writing show them how writing is used in the workplace. These programs help learners develop writing skills they can use by providing numerous opportunities for them to write with realistic purposes and audiences in mind (for example, writing a memo to a supervisor). Learners are encouraged to share their writing with the instructor or other learners in order to develop a feel for producing writing that is meaningful to an audience other than themselves.
SUGGESTED DISCUSSION QUESTIONS
Overview of the Discussion Questions

The purpose of the following discussion questions is to get viewers to think about strategies that will help us meet National Education Goal #5, what those strategies mean, why they are important, and how their own and other programs can implement the strategies. Facilitators might use these questions as presented or use them as models to prepare their own.

The questions are presented so that facilitators can choose those that are appropriate for their situations, depending on their audience and how they plan to use the videos. For example, a facilitator who is planning to show only the documentary video might select questions 1, 2, and 3 to use before showing the documentary, and questions 4, 5, 6, and 7 to use after showing the video. A facilitator who is planning to use the overview and in-depth staff development videos might choose to use questions 1, 3, 6, and 7 before showing the overview video, revisit questions 6 and 7 between showing the overview and the in-depth videos, then use questions 8 through 11 after showing the in-depth video. A facilitator planning to use all three videos might use questions 1, 2, and 3, show the documentary video, use questions 4, and 5, show the overview staff development video, use questions 6 and 7, show the in-depth staff development video, then use questions 8 through 11.

Obviously, there are a number of ways to use these or similar questions. The important thing is to stimulate discussion and encourage deeper thinking about strategies to enhance lifelong learning.
Project Lifelong Learning: For the Workplace
Suggested Discussion Questions

1. What does it mean to be a lifelong learner? What kind of learning happens in your life or your work setting right now? How does it help you?

2. How might workplaces that offer work-related literacy skills training to their employees benefit from those offerings? How might their employees benefit?

3. What characteristics would be important in workforce preparation or workplace education programs? It may be helpful to think in terms of your own schooling or any job training you have been involved in. What aspects did you find most useful? What changes would you have liked to see? What components might be added that would enable and encourage workers to pursue learning through their lifetimes?

4. Discuss some ways in which each of the programs you have seen in the documentary video (The Center for Employment Training, San Jose, California; Alpena Community College’s Workplace Partnership Project, Alpena, Michigan; and the Seafarer’s Harry Lundeberg School of Seamanship, Piney Point, Maryland) meets the needs of the workers or future workers enrolled in the program. How do these programs meet the needs of employers?

5. Discuss some ways in which each of the programs you have seen in the documentary video (The Center for Employment Training, San Jose, California; Alpena Community College’s Workplace Partnership Project, Alpena, Michigan; and the Seafarer’s Harry Lundeberg School of Seamanship, Piney Point, Maryland) develops support for lifelong learning among workers or future workers enrolled in the program. How do employers benefit from the lifelong learning opportunities available to their employees through these programs?

6. Five strategies have been identified which can help adults in workforce preparation and workplace education programs become lifelong learners. They are:

   - Meet the needs of the learner;
   - Develop support for lifelong learning;
   - Accommodate learner differences in the program;
   - Develop higher order cognitive skills, like problem solving and decision making; and
   - Enable learners to use all language processes (reading, writing, speaking, and listening) in their lives.
Discuss for a few moments what each strategy might comprise—for example, what would it mean to meet the needs of learners in a workplace program? Discuss for a few moments how your program or others in your community might implement each strategy. For example, how might a program meet the needs of learners enrolled in the program?

7. For each strategy, discuss reasons why it might be important to implement that strategy. Think what might happen in programs that do not use the strategies. For example, why is it important to meet the needs of learners in programs? What would happen if programs did not meet the needs of learners?

8. For each strategy shown in the in-depth staff development video, list the ideas for implementation that were shown. Can you think of any others?

9. Think about the strategies you currently use in your program. Tell the group what they are and how you currently implement them.

10. Are there any additional ways that you could implement the strategies in your program using resources currently available? Tell the group about these ideas and how you might tap available resources to put them into effect.

11. Are there any additional ways that you could implement the strategies in your program given that you had additional resources? Describe to the group your ideas and how you might access additional resources to support those ideas.
IDEAS FOR IMPLEMENTING STRATEGIES
Ideas for Implementing
Strategy #1: Meet the Needs of the Learner

Use a Learner-Centered Approach

___ Use intake interviews to determine learners' needs, goals, and interests (such as a desire to brush up on basic mathematical skills for work applications)

___ Encourage learners to set goals and take responsibility for working toward their goals

___ Give learners ideas for and assistance in assessing their own needs and goals

___ Conduct interviews periodically to keep abreast of learners' changing needs and goals

___ Include learner representatives on the program's governing board in order to involve learners in decisions about the program

___ Provide open forums for learners to communicate ideas about the program

___ Encourage learners to bring ideas, suggestions, and concerns to the attention of staff

___ Act as a facilitator in the learning process, rather than as a director

Embed Instruction in a Relevant Context

___ Ask learners to identify the skills they need to work on, such as technical writing

___ Build instruction around learners' needs and goals, such as communicating better with others in their project teams

___ Use realistic activities and scenarios as the basis for learning materials and activities (for example, use excerpts from frequently used manuals in reading instruction)

___ Identify skills needed in situations learners find themselves in (troubleshooting a malfunctioning furnace, for example) and make these skills the focus of instruction
Provide opportunities for learners to work with materials that are appropriate for their level and needs

Provide opportunities for learners to practice skills in many different situations

Encourage learners to bring materials that they would like to work on to the program, such as manuals that are particularly difficult to read

Offer Non-Traditional Instruction and Delivery

Ask learners to lead instructional activities

Provide opportunities for learners to work in small groups or pairs

Encourage learners to work at their own pace

Provide opportunities for learners to work on computers, or use other technologies like educational television or teleconferences

Complement technology-based instruction with interactive activities involving instructors and other learners

Use non-traditional print media in instruction, such as bills, memos, or reports
Ideas for Implementing
Strategy #2: Develop Support for Lifelong Learning

Form Partnerships and Strengthen Connections Among Providers

- Explore local resources to find out what other people are doing
- Keep abreast of government supported programs
- Make program staff aware of what other local programs are doing
- Establish and maintain contact with outside agencies through newsletters and informal gatherings
- Speak at meetings of other community groups or public gatherings to inform others about your program’s activities and to foster support for lifelong learning
- Make connections and form partnerships with other local service providers
- Work with partners to determine together what each player has to offer to and gain from the partnership
- Seek new partners among other local service providers
- Work with partners to see where gaps lie and duplication of services exists
- Work with partners to fill gaps and eliminate duplication of services
- Get to know the local media and how they can support lifelong learning in the community
- Make program staff aware of ways they can help learners get high school or college credit for learning
- Provide information to learners about other available educational opportunities like community college courses
- Refer learners to other local programs and agencies
Make Connections with Other Groups

- The local business, industry, and labor network
  — businesses
  — labor unions
  — business clubs
  — business and manufacturing associations
  — workers
  — chambers of commerce
  — private industry councils (PICs)
  — economic development groups (local and state)
  — job training programs

- The local education network
  — public schools
  — adult education programs
  — community-based programs
  — community, technical, and junior colleges
  — vocational education programs
  — literacy councils, volunteers, and coalitions

- Community programs and organizations
  — libraries
  — human services like welfare programs, social services, counseling, job training, state employment services departments, or job service offices
  — church groups
  — community-based organizations
- Project Literacy U.S. (PLUS) task forces

- Service organizations like Rotarians and Business and Professional Women

- Government organizations and programs

  - Political parties

  - Federal and state government resources

  - National clearinghouses

**Offer Support Services**

- Seek funding for support services

- Provide release time, job counseling and placement, and other support services, or link with other local organizations that can provide such services

- Organize learner support groups

- Support a mentoring program in which employees (possibly former learners) donate their time and experience to support currently enrolled learners

- Recognize learners' achievements in newsletters and ceremonies

- Display learners' work

- Encourage local professionals and organizations to donate their time and resources toward providing support services in the program

- Offer to coordinate existing support services in your program with other programs

- Formulate plans with other local agencies on how to obtain services for all agencies
Ideas for Implementing
Strategy #3: Accommodate Learner Differences
in the Program

Develop Sensitivity to Learner Differences

___ Provide opportunities for learners to share backgrounds, experiences, and beliefs with program staff and each other

___ Ask learners how they learned best in the past, how they did and did not learn, how they would like to learn

___ Use staff development activities that expand staff awareness of learner differences and barriers to learner participation in the program

___ Invite speakers that expand staff awareness of learner differences and barriers to learner participation in the program

___ Provide opportunities for staff to share their knowledge about learners (their needs, backgrounds, and concerns), and to discuss potential obstacles to their participation in the program

Respond to Learner Differences

___ Help learners identify personal strengths

___ Build on the strengths that each learner brings to the program

___ Keep the curriculum flexible, so all learners have options in choosing the ways they learn best

___ Tailor instructional approaches, techniques, materials, and procedures to meet individual needs

___ Hold staff development activities which inform staff about ways to pick up cues from learners that indicate they are experiencing difficulty, about ways to adapt instruction to meet individual needs, and about ways to be flexible in order to meet a variety of needs

___ Provide opportunities for staff to interact, communicate, share concerns, and plan ways to be more responsive to the needs of learners

___ Encourage professional development and leadership among staff from diverse cultural and special needs backgrounds and among learners enrolled in the program
Ideas for Implementing
Strategy #4: Develop Higher Order Skills

Provide Direct Instruction in Higher Order Skills

- Have learners identify how they already use higher order skills on the job and what those skills are
- Encourage learners and staff frequently to describe aloud the higher order skills they use in a certain situation, one step at a time (for example, talk aloud as they troubleshoot a malfunctioning piece of machinery)
- Provide opportunities for learners to discuss how they used higher order skills in particular instances, what might have worked better, and how they would do things differently next time
- Encourage learners and staff to model their thinking and problem solving skills for others
- Guide and support learners as they use higher order skills in new situations, then withdraw support as they gain confidence in using their skills in these situations (as they monitor and change settings on a piece of machinery on the shop floor, for example)
- Use scenarios and materials from the job when teaching higher order skills

Provide Realistic Opportunities for Practice and Application of Higher Order Skills

- Use "real-life" problems and situations (such as reading a chart to find a correct pipe size for a particular job) as the basis for classroom practice in higher order skills
- Use role playing to provide learners with opportunities to practice using higher order skills in realistic situations
- Provide a variety of realistic opportunities for learners to practice using higher order skills, so they are likely to transfer the skills to a variety of situations.
- Encourage classroom instructors to accompany learners onto the shop floor, if possible, to help them transfer skills learned in the classroom to job situations
Arrange for experienced employees on the shop floor to coach workers as they apply newly learned skills
Ideas for Implementing
Strategy #5: Enable Learners to Use
All Language Processes in Their Lives

Build Group Discussion Into All Learning Activities

____ Ask learners to talk about how they solved math problems or comprehended text

____ Ask learners to talk aloud as they perform a task, describing what they are doing and why

____ Use activities that necessitate discussion, such as asking learners to solve a problem independently, then compare their solution procedures with a peer

Teach Reading for Meaning

____ Use materials that learners really need to read on the job (manuals, memos, or reports) as the basis for instruction

____ Discuss with learners the different types of materials they read and how each should be approached

____ Instruct learners in the use of comprehension aids, such as previewing, questioning, and use of text features like headings and boldfaced print

____ Have staff and learners demonstrate good reading behaviors for other learners

____ Have staff and learners guide other learners through texts they must read, including reports or manuals

____ Have learners summarize and discuss texts with other learners (for example, a new procedure they must learn from a manual)

____ Have learners write down questions or notes about a text they have to read (for example, note where and how they must digress from a procedure recommended in a manual, due to special circumstances in their shop)

Teach Writing for Meaning

____ Discuss with learners the different types of writing they do and how they might approach each
Use situations in which learners need to write (such as writing a report to a supervisor) as the basis for instruction, and provide learners with opportunities to practice types of writing they need to do on the job.

Provide novel, but realistic, opportunities and reasons for learners to write. For example, they may make notes throughout the day about events to report to a supervisor.

Have staff and learners read and react to each other’s writing to build understanding of writing conventions and audience concerns.
BIBLIOGRAPHY
Annotated Bibliography

**General Readings**

Chisman, F. P. (1992). *The missing link: Workplace education in small business*. Washington, DC: The Southport Institute for Policy Analysis. A summary report of a two-year investigation of basic skills and other training programs in small firms. An increasing number of small firms are forming partnerships with local educators and their workers to craft workforce literacy programs tailored to their needs. The results are often dramatic in terms of productivity, quality, and a shift in corporate culture from a top-down management approach to a more cooperative relationship between workers and the firm.

U.S. Department of Education, Office of Vocational and Adult Education. (1992). *Workplace literacy: Reshaping the American workforce*. Washington, DC: Author. The National Workplace Literacy Program (NWLP) has awarded 149 grants to partnerships in 42 states and territories to improve employees' basic skills. The partnerships consisted of education organizations and at least one other organization, such as businesses, industries, labor organizations, and private industry councils. Five exemplary projects are described in detail. Attributes of successful programs include: active involvement of all project...
partners; active involvement of employees; analysis of job-based literacy skills requirements.

Strategy #1: Meet the Needs of the Learner

Askov, E. N. (1992). Curriculum design for workplace literacy. Adult Learning, 3(8), 12-13. Gives guidance for designing custom-made materials to help learners develop literacy skills they can apply in a variety of situations in the workplace. Note: The entire issue of Adult Learning, 3(8) is devoted to the topic of workplace literacy and solutions offered to improve workers' skills.

Askov, E. N., & Clark, C. J. (1991). Using computers in adult literacy instruction. Journal of Reading, 34(6), 434-448. Excellent resource to help practitioners make informed decisions about enhancing instruction with computer software. The article includes examples of outstanding software, advantages and disadvantages of using computers for instruction, and a matrix that lists relatively inexpensive computer software programs. The matrix codes each program by the basic skills that are developed or assessed, whether the basic skills are generic or job-related, the instructional methods used in the software, whether the programs can be customized or have mini-authoring systems, and by the publisher or distributor.

Beck, J. A. (1992). Combining literacy and employment training for women: Steps for starting a program. Washington, DC: Wider Opportunities for Women. A handbook for programs to combine literacy and employment training for women. Includes a discussion of common barriers that women face and the need for programs to provide comprehensive support services. Includes worksheets for program planning and implementation.

Packer, A. H. (1989). Retooling the American workforce: The role of technology in improving adult literacy during the 1990's. Southport, CT: The Southport Institute for Policy Analysis. Discusses the importance of using technology for adult basic skills training in the 1990s. Technology-based instruction should be flexible, interactive, and include a variety of media.
An excellent resource for workplace literacy program developers and practitioners. Philippi gives the reader step by step guidelines for using work related materials to teach basic skills, with special emphasis on the thinking and reasoning strategies learners need to use their skills in a variety of situations.

A concise guide to help union leaders better understand workplace literacy and develop and support worker-centered programs.

Background information to help practitioners teach basic skills in a meaningful context. Guidelines are given for facilitating functional context learning.

The 28 chapters in this book provide readers with important guidelines for developing and implementing workplace programs. Four major themes are developed: understanding the need for workplace literacy, identifying workplace training needs, examples of workplace basic skills training, and approaches for program development.

Strategy #2: Develop Support for Lifelong Learning

An overview of findings about partnerships in training and education in the workplace. Guidelines are given for choosing providers and forming partnerships.

ERIC Clearinghouse on Adult, Career, and Vocational Education. Trends and Issues: Vocational Education Involvement with Business/Industry/Labor.
Print resources and organizations are provided for vocational educators to develop partnerships with business, industry, and labor.

This chapter describes networking and collaboration to provide for those most in need of services. Barriers to and recommendations for effective linkages are detailed.

Community, junior, and technical colleges are responding in unique ways to the learning needs of adults. Sixteen case studies of effective literacy programs are provided.
Strategy #3: Accommodate Learner Differences in the Program

The impact of a multicultural society on adult education and the issues that must be considered in a comprehensive policy are the focus of this book. The dimensions of the problem, past and present concerns of major ethnic groups, and innovative approaches to practice and research are the major themes in this volume.

An excellent resource for researchers and practitioners concerned with cultural diversity. Theoretical perspectives, research-based articles, and descriptions of effective practices and programs are provided.

Research-based background reading for administrators, teachers, and tutors. Includes definitions of learning disabilities, prevalence, problems faced by learning disabled adults, assessment tools, and intervention techniques.

This entire issue is devoted to cultural diversity.

Provides a concise overview of the fastest growing field in adult education—English as a Second Language (ESL). The handbook includes statistics, information about materials, methods, testing, and resources.

 Gives answers to frequently asked questions about the Americans with Disabilities Act, especially regarding employment and public accommodations.

A synthesis of the findings from a two-year research study that included an extensive review of the literature, input from scholars and professionals, and in-depth site observations. Effective and innovative instructional approaches, methods, and technologies for adult ESL students are discussed conceptually and in practice; includes many resources.

Comprehensive list of resources: includes literacy and learning disability organizations, examples of collaborative efforts, and video, print, and technology resources. Available from PLUS Outreach: 4802 Fifth Avenue, Pittsburgh, PA 15213, (412)622-13V

Strategy #4: Develop Higher Order Skills

Thought-provoking background reading for anyone interested in helping adults develop critical thinking skills and become more questioning in all areas of their lives.

Reexamines traditional thinking about the relationship between basic and advanced skills and teaching methods for disadvantaged students. The article is a concise presentation of new approaches to help learners develop their basic and higher
order skills simultaneously. Approaches include: modeling, using dialogue, and supporting learners as they gradually develop higher order skills. Important information for teachers of adults.

Compilation of research-based articles on "learning how to learn," including how to teach problem solving strategies and how to use prestudy and probing questions.

Important background reading for anyone concerned about the development of higher order skills. Many facets of higher order skills are discussed, including working definitions, the relation between "higher order" and so-called "basic" skills, higher order skills in reading and math, programs for directly teaching higher order skills, and embedding thinking skills in all areas of the curriculum.

Sternberg, R. J. (1990). *Real life vs. academic problem solving*. In R. Fellenz & J. Conti (Eds.), *Intelligence and Adult Learning* (pp. 35-40). Bozeman, MT: Montana State University, Center for Adult Learning and Research.
Sternberg discusses nine differences between school-based and "real world" problem solving, including recognizing and defining problems, problem solving in context, feedback on what is right or wrong, and individual versus group problem solving.

---

**Strategy #5:**

**Enable Learners to Use All Language Processes in Their Lives**

A comprehensive synthesis of decades of reading research (primarily with children and young adults). This book has implications for teachers of adult beginning readers.

Summarizes a research report and the results. It includes the rationale for the study, descriptions of the materials, methods, procedures, and subject populations. Implications for instruction of ABE students, directions for further research, and teacher reactions to the project are included.

The eight authors of this volume explain how the most current knowledge and effective practices in reading instruction can be used to teach adult readers. This volume is intended for administrators and educators as well as paraprofessionals in all areas of reading instruction.

Describes a project to develop a curriculum to teach medical terminology using a structural analysis strategy. The curriculum materials are written in a narrative in which the main character, an LPN named Thelma, teaches a trainee named Mary.
how to read medical words and to be confident about her abilities to learn.

Wrigley, H. S. & Guth, G. J. A. (1992). Bringing literacy to life: Issues and options in adult ESL literacy. San Mateo, CA: Aguirre International. A synthesis of the findings from a two-year research study that included an extensive review of the literature, input from scholars and professionals, and in-depth site observations. Effective and innovative instructional approaches, methods, and technologies for adult ESL students are discussed conceptually and in practice; includes many resources.

The Center for Adult Learning and Educational Credentials is the pioneer in evaluating extrainstitutional learning, i.e., learning that is attained outside the sponsorship of legally authorized and accredited postsecondary education institutions. It has been evaluating learning since 1945. ACE: 1) provides an alternative means of achieving a high school credential through the operation of the General Educational Development (GED) Testing Program and the National External Diploma Program; 2) provides guidance to postsecondary education institutions for developing policies and procedures for awarding credit for extrainstitutional learning; 3) develops and disseminates statements, definitions, guidelines, and standards related to awarding educational credit and credentials; 4) sponsors conferences and workshops pertaining to the learning of adults and its recognition, including external education and institutional policies for awarding credit for extrainstitutional learning, to the clarification of the roles of postsecondary education institutions in servicing adult students, and to adult education issues.

Newsletter: CBE Report (Community-Based Education Report)

The Association for Community Based Education (ACBE) is a national membership organization of institutions involved, through education, in community building and indigenous leadership development. Its members include accredited colleges, economic development organizations, literacy and adult learning programs, and advocacy groups. Although diverse, they share a common commitment to help empower their communities to chart their future in economically productive and culturally relevant ways.

ACBE provides the following programs and services: a monthly newsletter, staff research services, database of information about community-based organizations, technical and fundraising assistance, networking among members, immigrants, community fellowship program, Mattie Cook Award, scholarship program, professional development training, publications, advocacy, special projects, internships, and independent study.

Newsletter: BCEL Newsletter for the Business & Literacy Communities

Publication: National Directory of Key State Literacy Contacts (1992). Provides an up-to-date list of people and organizations to contact in each state for information about literacy planning activities and instructional services. Also includes a resource list of national organizations and key contacts.

The Business Council for Effective Literacy is a national public charity dedicated solely to advancing general and workforce literacy in the United States. BCEL serves as a major source of information, analysis, and guidance for the literacy and business communities, and for public planners. Its broad purpose is to stimulate awareness and critical thinking at the local, state, and national levels; promote action and good practice among public and private sector organizations; and foster effective public policy development. A major portion of BCEL's work is devoted to working with the national business community and increasingly with workforce and workplace literacy issues. BCEL publishes a comprehensive and authoritative national newsletter, how-to guides, and other materials for the literacy and business communities.

Institute for the Study of Adult Literacy
204 Calder Way, Suite 209
University Park, PA 16801-4756
(814)863-3777
FAX: (814)863-3777

Newsletter: Mosaic (published 3 times a year, no charge)

The institute is internationally recognized for its work in literacy research, development, and dissemination activities. The institute's mission stresses the importance of connecting
research to improving practice; each research project results in a practical application in the field, including staff development activities, curriculum and instructional materials development, policy recommendations, and dissemination of research findings through in-house publications, professional publications, and presentations. Institute projects to date have addressed the following interrelated issues in adult literacy: computer-based instruction; workplace literacy; intergenerational literacy; staff development/training; special needs populations; and customized materials development.

International Reading Association (IRA)

FAX: (315)422-6360

Laubach Literacy Action is the United States program of Laubach Literacy International, the oldest volunteer adult literacy organization in the world. LLA was formally established in 1968, and through its current network of 1,000 local member groups, LLA reaches more than 150,000 new readers annually. Local Laubach programs work with learners who have very limited skills. Most enter the program reading below the 4th-grade level. Instruction in basic literacy, English for speakers of other languages (ESL), and math is offered in one-to-one or small group settings. Each local program is autonomous and each is unique in the

way it has developed to meet the needs of its own community. These member groups range from small rural councils to large urban programs which serve a diverse ethnic population. LLA works with the Laubach publishing division, New Readers Press, to develop instructional materials, technical assistance and training resources, and volunteer program management materials. These products are designed to provide a wide range of options for the local program to help them meet management and instructional needs. LLA works with a wide variety of organizations at the local, state and national level.

Newsletter: NCAL Connections (published quarterly, no charge)

The National Center on Adult Literacy (NCAL) at the University of Pennsylvania was established by the U.S. Department of Education in 1990, with federal co-funding by the Departments of Labor and Health and Human Services. The center's mission is threefold: (1) to enhance the knowledge base about adult literacy, (2) to improve the quality of research and development in the field, and (3) to ensure a strong, two-way relationship between research and practice. NCAL publishes a quarterly newsletter, NCAL Connections, available upon request at no charge. Research results are published and disseminated via technical reports, occasional papers, and policy papers, available upon request for a nominal fee. Requests for publications, or to be added to the mailing list should be directed to NCAL Dissemination.

The National Council of La Raza (NCLR) exists to improve life opportunities for Americans of Hispanic descent. A nonprofit, tax-exempt organization incorporated in Arizona in 1968, NCLR serves as an advocate for Hispanic Americans and as a national umbrella organization for more than 130 formal "affiliates," community-based organizations which serve Hispanics in 35 states, Puerto Rico and the District of Columbia. NCLR seeks to create opportunities and address problems of discrimination and poverty in the Hispanic community through capacity-building assistance to support and strengthen Hispanic community-based organizations; applied research, public policy analysis and advocacy; public information efforts to provide accurate information and positive images of Hispanics in the mainstream and Hispanic media; and special catalytic efforts which use the NCLR structure and credibility to create other entities or projects important to the Hispanic community.
related federal programs; 7) award fellowships to outstanding individuals pursuing careers in adult education and literacy; and 8) provide a toll-free, long-distance telephone line for literacy providers and volunteers.

Washington, DC 20202-7240
(202)205-9872

Section 371 of the Adult Education Act as amended by the National Literacy Act of 1991 authorizes the secretary to make demonstration grants for job-related programs of literacy and basic skills that result in new employment, continued employment, career advancement, or increased productivity for workers. Federal assistance in establishing workplace literacy programs is available through a competitive grant process under the U.S. Department of Education's National Workplace Literacy Program. The federal government pays 70% of the costs of setting up the program, and a 30% match is required from the partners.

Project Literacy US (PLUS)
4802 Fifth Avenue
Pittsburgh, PA 15213
(412)622-1320

Contact:  Margot Woodwell, PBS
Project Director

PLUS is a collaboration between the American Broadcasting Corporation (ABC-TV), its 222 affiliates, the Public Broadcasting System (PBS), and its 313 member stations. PLUS has three goals: 1) to raise awareness nationally about the extent of the illiteracy problem and its damaging consequences; 2) to form or strengthen community collaboratives to coordinate services and handle the increased demand; and 3) to get word to those needing help on how to get that help, reinforcing the message that there was no shame to coming forth. PLUS began in Pittsburgh in 1985 when community leaders asked public television station WQED to consider undertaking a local outreach project on the subject of adult literacy.

SER-Jobs for Progress, Inc.

The Hills at Decker Court
100 Decker Court, Suite 200
Irving, TX 75062
(214)541-0616
FAX: (214)650-1860

SER-Jobs for Progress, Inc., a nonprofit organization, is the largest Hispanic service-oriented corporation in the United States. SER is a network of employment and training organizations that provide direct human services to economically disadvantaged individuals. The overall mission of SER-Jobs is to formulate and advocate initiatives that result in the increased development and utilization of America's human resources, with special emphasis on the needs of Hispanics. The headquarters, SER National, located in Irving, Texas, provides training and technical assistance, research and planning, and program and policy development for the network. The SER network's affiliates are fully operational community-based organizations that provide program services to those who are in need of targeted redevelopment or employment. SER formulates meeting the challenges of tomorrow for Hispanics through two initiatives: the SER National Hispanic Literacy Initiative and the SER National Employment Initiative. The Literacy Initiative is implemented through SER's acclaimed Family Learning Centers, which bring together and serve economically disadvantaged individuals, their children, and senior citizens from the community. SER's Employment Initiative includes a national automated Job Bank, a biannual Job Fair.
Program and an issue of the SER America publication devoted to national employment concerns.

Wider Opportunities for Women (WOW) works nationally and in its home community of Washington, DC to achieve economic independence and equality of opportunity for women and girls. For more than 28 years, WOW has helped women learn to earn, with programs emphasizing literacy, technical and nontraditional skills, and career development. Since 1964, WOW has trained more than 10,000 women for well paid work.

Work in America Institute  
700 White Plains Road  
Scarsdale, NY 10583-5008  
(914)472-9606

Contact: Marty Cohen, Director of Policy Studies

The Work in America Literacy Network is an informal organization of more than 60 individuals representing 40 employers and labor unions that sponsor functional-context basic skills training for workers. Work in America Institute, with major funding from the MacArthur Foundation and a renewal grant from the GE Foundation, has developed a family educational program, Linking Home and School through the Workplace, to address the working parent's need for help both in parenting skills and academic skills. By teaching parents how to help their children with schoolwork, the program reinforces the basic skills of the adult.
Clearinghouses

ACCE: S ERIC
1600 Research Boulevard
Rockville, MD 20850
1-800-USE-ERIC (1-800-873-3742)

Striving for Excellence: The National Education Goals - Packets of information to help parents, teachers, and community members learn more about the six goals. Thirty separate ERIC Digests contain information about ways the country is working to improve the education system.

1992 ERIC Directory of Education-Related Information Centers - lists more than 300 organizations offering information on all areas of education.

Clearinghouse on Adult Education and Literacy

ERIC, the Educational Resources Information Center, is a national information system sponsored by the Office of Educational Research and Improvement, U.S. Department of Education. The goal of ERIC is to identify, select, process, and disseminate information in education. ERIC has a network of 16 clearinghouses, each serving a specialized field of education. The ERIC Clearinghouse on Adult, Career, and Vocational Education (ERIC/ACVE) is located at the Center on Education and Training for Employment, The Ohio State University. ERIC/ACVE provides comprehensive information services in adult and continuing education; career education, childhood through adult; and vocational and technical education. Some print resources include:

Information Resources - including current resources related to America 2000 and the National Education Goals.
Digests - summarize information on selected topics.
Trends and Issues Alerts - information on selected topics, including workplace literacy.
ERIC Clearinghouse on Reading and Communication Skills
Indiana University
Smith Research Center, Suite 150

Newsletter: NCLE Notes (published twice yearly)

The National Clearinghouse on Literacy Education (NCLE), an adjunct ERIC clearinghouse, provides information and technical assistance on literacy education for limited English proficient adults and out-of-school youth. As the only national clearinghouse for adult ESL literacy, NCLE provides information and technical assistance to researchers, instructors, and program administrators as well as to the public and the media.

The National Clearinghouse on Literacy Education:

- offers information, referral, and technical assistance related to adult ESL literacy and native language literacy;
- maintains a resource center that includes a national database of ESL and native language literacy providers and a mailing list of more than 5,000...
individuals and literacy programs;
• regularly edits, publishes, and disseminates a newsletter, digests, annotated bibliographies, books, resource guides—all focusing on issues of literacy for limited English proficient adults and out-of-school youth;
• collects, analyzes and abstracts material related to ESL literacy for the ERIC (Educational Resources Information Center) database; and
• conducts customized ERIC searches. Some print resources include:

Resource Guides - on Correctional Literacy Education, Family English Literacy, and Videotapes for Adult Literacy Trainers and Programs.
Digests - short articles and references on selected topics.
Minibibs - annotated references on selected topics.

National Information Center for Children and Youth with Disabilities (NICHCY)
P.O. Box 1492
Washington, DC 20013
1-800-999-5599

Contact: Information Specialist

The National Information Center for Children and Youth with Disabilities (NICHCY) is a national information and referral clearinghouse. NICHCY operates through the Clearinghouses Program authorized by Section 633 of Part D of the Individuals with Disabilities Education Act, (20 U.S.C. 1433), as amended by Public Law 101-476.

NICHCY is a project of Interstate Research Associates, Inc., and is supported through a cooperative agreement with the U.S. Department of Education, Office of Special Education and Rehabilitative Services (OSERS). NICHCY answers questions regarding all disability issues, networks with other disability organizations, prepares information packets on frequently asked question, and provide technical assistance to family and professional groups. Single copies of NICHCY materials are free.

Thomas Valentine, Associate Professor, Department of Adult Education, University of Georgia

Thanks are also due to Thomas G. Sticht, President and Senior Scientist, Applied Behavioral and Cognitive Sciences, Inc., for his advice at the beginning of the project and for suggesting potential programs to highlight.
This is a newsletter about Public Service Announcements devoted to literacy. PSAs have been delivering messages about illiteracy and adult education for a very long time. There has been a marked increase in PSAs since Project Literacy U.S. was established in 1985. Dozens of literacy campaigns have manifested themselves across the country. Along with many of them, public service announcements have been created to help them raise awareness. This newsletter has been issued as a product of Project Lifelong Learning which is described on page 6.

We have gathered information on existing, as well as past literacy PSA campaigns. From this data we have created a resource directory of public service announcements. To our knowledge this is the first time a directory of this sort has been compiled. We asked literacy service providers to supply any information on radio and television PSAs. If you know of other public service announcements that may have been omitted, please let us know by writing WQED, 4802 Fifth Avenue, Pittsburgh, PA 15213. This can ensure an even more complete directory in the future.

Information on other literacy campaigns and their resulting public service announcements is also included in this newsletter: Project Lifelong Learning is a campaign in progress. Other literacy campaigns include the Coors project, Literacy. Pass It On., The American Library Association's Coalition for Literacy campaign, and the PLUS/ABC campaign of 1986.

**RESOURCE LIST OF NATIONAL, STATEWIDE AND LOCAL LITERACY PUBLIC SERVICE ANNOUNCEMENTS**

Over the past 12 years many literacy campaigns have been instituted and along with them many public service announcements have been produced.

In an effort to create a resource directory of public service announcements about literacy, we asked literacy service providers to send us any information on national, statewide or local literacy campaigns and PSAs. The majority of the PSAs listed here are available to literacy groups for use in their own campaigns.
American Council on Education - The Center for Adult Learning

A series of audio and video PSAs encourage people who dropped out of school to get a high school diploma by taking the GED Tests which are sponsored by the American Council on Education.

Featured spokespersons include:
- Barbara Bush
- Bill Cosby
- Waylon Jennings
- Vikki Carr - available in both English and Spanish
- Congressman Ben Nighthorse Campbell

Dyslexia Public Awareness Association

One tape contains 4 spots about dyslexia:
- Danny Glover Spot features the actor discussing prevalent destructive attitudes toward dyslexic children. In this touching PSA, Glover talks about the evolution of attitudes toward dyslexia as a result of education and greater awareness.
- Jed is a 12-year old dyslexic boy who shares his experiences with the audience: he tells us how other kids treat him, and the difficulty he has in living up to the successes of his brother and sister.

The spots are directed by David Hemmings.

Length: :30 and :60

Alex Trebek, host of Jeopardy, is featured in a series of spots in PSAs produced by Literacy Volunteers of America.

WGED/Pittsburgh - PLUS

- 39 30-second spots of Read Together, Share the Joy show parents telling personal anecdotes of the joy they find in reading with their children and grandchildren.
Celebrities including Paul Rodriguez, Susan St. James, Ahmaad Rashaad, Jane Pauley, Phil Donahue, Big Bird, Cybil Sheppard, Ed McMahon, Patricia Wettig, Mr. Rogers, and First Lady Barbara Bush support these messages. Seven of the PSAs are also recorded in Spanish.

Maine Public Broadcasting

- a series of five personal experience endorsements for learning to read featuring the two state literacy hotline numbers.

- Give Us Books, Give Us Wings was produced as a PSA series. The PSAs are encouragements to learn to read, and include state literacy hotline numbers. They may be included in breaks around programs, or combined with the MPB logo to use as station breaks.

- Read With Me is another literacy PSA series designed to be included in breaks around programs, or in station breaks.

- Read Together, Share the Joy from PLUS in six edited versions with the “Give Us Books” hotline number tag on them.

Some of these segments are adapted from national campaigns, others are locally produced.

KOLO-TV produced two PSAs during a statewide campaign that ran continuously through 1991:

- **First Lady** features Barbara Bush and Sandy Miller (the Governor's wife) encouraging people to use the library and read together as a family.
- **Little Foot** presents delightful characters created by Dennis Rexrode and Christina Schlosser of Puppets, Inc., along with Librarian, Martha Gould. The viewer is inspired to support the local library.

Length: 30

**New York State Education Department**

- **The World** Introduces adult education students who describe the difference reading has made in their lives.
- **Len Elmore**, former New York Knicks basketball player, professes the importance of overcoming challenges and obstacles.
- **Harriet Sobol** is the wife of New York State Commissioner and also an educator. She discusses the importance of learning to read.

Focusing on students, this statewide campaign stresses the need for literacy. Local tags may be added.

**Mayor's Commission on Literacy**

- **Can You Read** is a PSA with three clips, which aired locally in Philadelphia in 1989. One shows a baby having a bad reaction to medicine because his father could not read the bottle. The next clip is of a man who lost his job because he cost his company $25,000 as a result of his inability to read. The last part of this tape presents a court room session with a woman evicted from her home. If she had been able to read, this situation would have been prevented. This tape is available in limited quantities. It may be stripped and localized by adding a tag.

**WNMU-TV Northern Michigan University**

- **Colin Powell** is another PSA that began locally and later went statewide. He gives advice on learning to read.

  - Length: :30
  - Unavailable

Two local PSAs were produced for PLUS as entries in a contest conducted by WNMU.

- The runner up PSA asks "Where would you be if you couldn’t read?" The answer is ... "Lost." Street signs are merely jumbled letters to someone who cannot read.

- A mother, carrying her child, is running down a long hallway of a hospital. Her baby needs immediate care. Because the mother is illiterate, she cannot read the signs to direct her to the emergency room. At the end of the spot we see her being tutored, and learning to read.

A new major literacy initiative aims to improve adult literacy and lifelong learning programs in the workplace, in the community and in the family.

It focuses on five strategies that emerged through a review of current research and interviews with experts in the field of adult literacy and lifelong learning by the Institute for the Study of Adult Literacy at The Pennsylvania State University. In the project, video materials and print information are being developed and disseminated to those who offer literacy and lifelong learning programs across the nation.

The Institute for the Study of Adult Literacy at Penn State received a grant from the Office of Educational Research and Improvement, a division of the U.S. Department of Education to merge relevant research on characteristics of successful adult literacy programs in the context of the family, the community, and the workplace. The Institute has partnered with PLUS, WQED (Pittsburgh), and the Media and Learning Resource Division of WPSX-TV (Penn State University).

A December 7 teleconference will officially launch the project. This is a teleconference for literacy service providers, as well as other community, business, government, union and educational leaders and employers interested in furthering the National Education Goal 5 — that by the year 2000 all adults will be literate and have the opportunities for lifelong learning. Clips will be shown from all the video materials which include:

- three half-hour television documentaries, one for each of the three subject areas produced by WQED Pittsburgh and intended for use on-air and in literacy presentation efforts
- six public service announcements, two for each documentary, to raise awareness of literacy efforts that can be customized for local, regional or national use by any agency or project
- six staff development videos for literacy service providers produced by WPSX-TV University Park, PA - an overview and a training video in each of the three subject areas: family, community, workplace.

Print materials to support the effort include a user’s guide for professionals utilizing the staff development modules, this newsletter on the history and background of public service announcements produced for adult literacy awareness, and an informational brochure.

Dissemination of the materials is intended to encourage the general public, parents, business, industry and labor organizations, community groups and educators to adopt and implement research findings and to provide audiences with strategies for improving adult literacy and lifelong learning programs.

To order Project Lifelong Learning print and video materials, please contact WQED. Phone: 412/622-6442. Fax: 412/622-6413. Or write to LITERACY Box INFO Pittsburgh, PA 15213.

Project Lifelong Learning Has Many Partners

The Institute for the Study of Adult Literacy at The Pennsylvania State University was established in 1985 as a result of the growing problem of adult illiteracy. Its mission includes developing a sound research base in adult literacy, leading and coordinating adult literacy services and improving practice. Funding approximating $850,000 per year comes from state and federal offices of education and commerce and private foundations. Its single largest funder is the Pennsylvania Department of Commerce, through the Appalachian Regional Commission, for projects focusing on literacy and economic development.

Each of the Institute’s projects results in a practical application in the field, including collaboration between researchers and practitioners, staff development recommendations and publication of research findings. The Institute’s track record in research and development of technology-based instructional models has earned international recognition, making it a leader in the field of adult literacy.

When Project Literacy U.S. was launched in December, 1985 by ABC and PBS, it set out to do three things: enlighten the public on the extent of the illiteracy problem and its damaging consequences; put in place community coalitions to handle an increased demand for literacy services; get the word to those who need help.

The two national broadcasters and their radio counterparts went on air with public service announcements, documentaries, features and news segments, and wove illiteracy into scripts for children’s and entertainment programming. This unprecedented collaboration between a commercial broadcaster and public television has produced results far beyond the dreams of its creators. PLUS has turned thousands of Americans and hundreds of American businesses toward community solutions for this country’s shocking illiteracy problem.

WQED Pittsburgh produced PLUS for PBS. America’s first community-supported public television station, WQED is a national production
The National Media Outreach Center is a division of WQED. The NMOC was established in 1988 to implement community action campaigns targeted to major social issues. The center organizes local, state and national problem-solving networks, and develops print and video packages to support them. The operation and its projects are supported by public television programming and key organization alliances at all levels. Two of the NMOC’s most prominent campaigns are THE CHEMICAL PEOPLE, a program to combat teen alcohol and other drug abuse, and PROJECT LITERACY U.S (PLUS), a literacy campaign co-produced with Capital Cities/ABC, Inc.

WPSX-TV is a community-oriented television station licensed to The Pennsylvania State University. WPSX is the hub of a complex set of telecommunications distribution systems that carry the programs of its creative staff to homes, schools, businesses, industries, hospitals, retirement communities: wherever people live and work. The station was funded "to develop, through television, an extension of the University’s resources to the Commonwealth." Administered through Penn State Continuing Education, Educational Communications/WPSX-TV provides a public television service, distance education and production services to audiences, students and clients within Pennsylvania and beyond. For more than a decade, WPSX-TV has been producing programs to help adults who are functionally illiterate. The station produces higher education courses intended for live, simultaneous use in multiple classrooms, campuses and other locations where interaction between students and faculty is possible. It is that same interaction which is the foundation of an extensive program of teleconferences produced by WPSX-TV.

The Office of Educational Research and Improvement is the primary research agency of the U.S. Department of Education. The office funds research, library, demonstration and school improvement programs; collects and analyzes statistics; reports on the conditions of education: and disseminates information about education programs. OERI is the nation’s premier educational research and development organization. Its primary mission is to improve the equity and excellence of American education. OERI programs are tailored to all levels of schooling and content areas of instruction. The office strives to provide the reliable statistical data and high quality research needed to reform schools. achieve the national education goals, and raise student achievement levels.

ABC JOINS PLUS IN HELPING ADULTS TO READ

With the creation of PLUS in 1985, the literacy movement finally gained a commitment of sustained, in-depth exposure by the media. The commitment by ABC and PBS to literacy programs and public service announcements guaranteed that the literacy message would reach a broad audience on a daily basis.

Public service announcements form the backbone of the PLUS commitment to exposure to literacy and education issues, an ongoing presence bridging special PLUS events and programs. The commitment by Capital Cities/ABC to a full weekly schedule of PLUS PSAs on the ABC Television Network in all dayparts makes PLUS the most widely distributed public service campaign from a single source in media history.

ABC-produced PLUS PSAs made their debut in 1986 with a series of four "introductory" PSAs.
- **Bible** tells the story of a man who has just learned to read. We see him standing in a church before his children and grandchildren as he reads the Bible to the congregation.
- **Can You Read This?** shows garbled type on the television screen which introduces viewers to the difficulties faced by new readers.
- **Time Lapse** presents a man at the progressive stages of ability in learning to read with increasing skill.
- **Literacy Initiative** features President Ronald Reagan issuing the call for a national literacy movement.

These four 30 second PSAs were produced by Travisano DiGiacomo Films.

Two 1987 PLUS PSAs highlight the issues of literacy in the workplace and literacy and youth.
- **Workplace Literacy** reveals a middle-aged man coming face to face with his lack of basic skills when he has to fill out a job application in an unemployment office.
- **Literacy and Youth** demonstrates the need for children to develop reading skills early. The scene is set in a schoolyard.

These two PSAs, each with 30 and 60 second versions, were produced for PLUS by Reeves Production Services.

The Learner of the Month PSA series introduced viewers to real-life new learners who spoke about
their accomplishments and feelings of pride. This series of 18 PSAs (30 and 60 second) ran from April 1987 through 1988, stimulating nearly 750,000 calls to the Adult Literacy Hotline. The U.S. Department of Education in 1987 attributed over 1 million new students in adult basic education classes to PLUS.

Youth/PLUS PSAs drew attention to the connection between the major problems facing young people; drug abuse, pregnancy, unemployment and crime, and low basic skills. A series of five 30 second and two 60 second PSAs drew this connection using examples of young people speaking in their own words. This 1988 series was produced by Winton Dupont Films.

A 1989 series of PSAs, Breaking the Cycle, produced by PLUS focused on the need to help illiterate parents of young children gain basic skills, in order to ensure their children's ability to learn.

The 1989 Dreams vs. Reality PSA series again used young children speaking in their own words, this time about their dreams for the future. These dreams were juxtaposed with facts about the extent of literacy and education problems facing children in the U.S. This series of eight 30 second and 60 second PSAs, produced by Imageworks of Jackson, MS, won a Clio award, the most prestigious award in the advertising industry.

In 1990, the PLUS theme was "You can do anything if you put your mind to it," stressing individual initiative. Five 30 second PSAs, produced by Charron, Schwartz & Partners, looked at this subject from a variety of angles:

- **Brains** shows us a man's brain telling him to wake up and get to work, saying "It's boring in here!"
- **In Flag,** we see an American flag falling to tatters as an announcer recounts facts about America's education crisis.
- **Graduation** introduces a commencement speaker telling students that they'll be lucky to get a job when they graduate if they haven't gained any basic skills.
- **Typewriter** reveals the difficulties faced in the U.S. workplace when employers can't find qualified workers. The message is illustrated by a pair of hands at a typewriter.
- **Escalator** presents a man walking up an escalator that grows progressively steeper and speeds up dramatically, illustrating how difficult it is to get ahead when you don't have the skills.

Two 1991 30 second PSAs, **Tap** and **Monkey,** drew attention to the impact of a huge population of undereducated and low-skilled Americans on our nation. **Tap** and **Monkey** were produced by Charron, Schwartz and partners.

PLUS Case History PSAs illustrated the issue of workforce literacy with real-life examples of businesses that retrained workers. This series of eight 30 second and 60 second PSAs ended with a national hotline number where a caller could receive information on local job training programs.

Current PLUS PSAs end with the "Never Stop Learning" tag line, representing the broad span of PLUS to encompass more general education issues. Two PSAs, produced in 30 and 20 second versions, dramatically illustrate the "Never Stop Learning" message, that learning is important at every stage of life, not just during the school years:

- **In Homework** we see a boy ask his mother why she's bothering to do schoolwork at night after work when she's out of school anyway. She responds that by doing homework while she's working, she's taking the surest avenue to getting ahead.
- **Reunion** presents a high school reunion, where people discuss what they're doing now. It's predictable: the nerdy science whiz is an electrical engineer; the class president is in public relations. The guy who dropped out has a surprise: he's a lawyer. He reveals his secret: He dropped back in.
Coors has always been committed to corporate responsibility - giving something back to the communities in which it does business. In 1990, the company focused its resources on one cause - adult literacy - an issue important to all communities.

There are 27 million adults in the U.S. who are functionally illiterate; illiteracy costs $225 billion in lost productivity annually; illiteracy impacts personal freedom, corporate success and the future of our country.

Launched in 1990, Coors' "Literacy. Pass it on." is a $40 million, five-year commitment to reach 500,000 adults with literacy services. This is one of the most comprehensive, long-term commitments by an American corporation addressing this critical issue.

To date, the success of the project manifests itself in the fact that more than 240,000 adults have been reached with literacy services. The Coors Literacy Hotline has received more than 50,000 calls, and the program has given $3.2 million in direct contributions to national and local literacy programs.

To achieve the stated program goal, Coors formed partnerships with four of the nation's leading non-profit literacy organizations: Laubach Literacy Action, Literacy Volunteers of America, Opportunities Industrialization Centers of America and SER-Jobs for Progress. Input from these partners helps direct efforts to reach the African American, Hispanic and women's communities as well as the general public.

The Coors Literacy Hotline (1-800-626-4601) was established to refer volunteers and non-reading adults to resources in their own communities. Multi-lingual referral services are available.

A national multi-media awareness campaign carries the message of the importance of literacy and promotes the Hotline to minority communities and the general public. National spokesperson Phyllis Coors, along with celebrity spokespeople: actor Danny Glover, recording artists Jeffrey Osborne, Lisa Lisa and Vanessa Williams and author Stephen Cosgrove make appearances on behalf of the program.

Impact at the grassroots level is an important complement to national programs. Coors' network of distributors can become active participants in the fight against illiteracy in their own communities. In September 1992, more than 170 distributors partnering with more than 2,500 retailers plus local media outlets and literacy groups participated in a cents-per-case promotion to generate literacy funds at the local level, increase sales and enhance distributor, retailer and brewery image.

Coors addresses the issue of illiteracy in the Hispanic community through a long-term partnership with SER-Jobs for Progress and a multi-media bilingual awareness campaign.

Coors' support of SER, which has 131 affiliates in 96 cities, has led to the opening of eight new SER Family Learning Centers in 1991. These community-based centers offer literacy training as well as adult education and basic job skills.

Coors' message to this community is delivered through the Univision network and other broadcast and print media.

Coors has a special message to the African American youth who are not completing high school. A component of this program addresses this critical community issue. Coors has partnered with the OIC (Opportunities Industrialization Centers) as well as other key organizations to ensure future success and enhancement of individual potential through mentoring, for models and support of basic skills programs.

Through radio, magazine, newspaper, outdoor, direct mail and various other publicity efforts, Coors has communicated the message of literacy and education being "The Right Dream." An original poster series by African American artists was commissioned and reprints are available to the public.

Literacy and Women

Community Relation's Women's Program has been focusing on "Literacy. Pass it On." since its inception with donations, corporate image advertising and events and promotions.

More than 80,000 women have joined with Coors in the fight against illiteracy. Through their purchase of children's books authored for Coors by Stephen Cosgrove, more than $175,000 has been donated to women's literacy projects. Cosgrove's second book commissioned by Coors, Read on Rita, is advertised in major women's magazines and is available to distributors and the public for $3.95.
New this year is an eight-page advertising insert featuring comments on the issue of women and literacy by such well-known celebrities and personalities as Kathy Bates, Dixie Carter, Patti LaBelle, Joan Van Ark, Dr. Ruth, U.S. Rep. Pat Schroeder and U.S. Sen. Nancy Kassebaum.

Many women's recreational sports sponsorships including the Women's Major Slowpitch National Championship, the Women's Major Fastpitch Championship, the Coors Light Invitational Women's Softball Championship and the Coors Light Women's Beach Volleyball Tournament all benefit literacy. In addition, major national projects include the "Right to Read" program of Girl Scouts-USA, involving 200,000 Girl Scouts in more than 10,500 literary projects across the United States.

HIPPY, the Home Instruction Program for Pre-school Youngsters, brings literacy into the home and empowers low-income mothers to be educational advocates for their children. Another major program, the Literacy Transfer Project of Wider Opportunities for Women (WOW), will incorporate strategies proven in its major national study, "Teach the Mother, Reach the Child."

With funding from Coors, Zonta International has created its first national literacy program involving its North American membership. Together, WOW and Zonta will provide literacy services for over 70,000 women.

Wesleyan College and Coors have created the Literacy Training Institute in which sororities across the country commit their chapters to the issue of literacy by serving as tutors for local literacy organizations. The first two institutes will result in 1,080 collegiate literacy tutors.

There are a variety of opportunities for distributors to leverage this comprehensive national program within their own communities. For more information on Coors "Literacy. Pass it on.", contact Celia C. Sheneman at 303/277-2784.

---

**Public Service Announcements from Coors**

**Pencil**
This straightforward announcer spot points out the fear and frustration 27 million Americans experience because they cannot read and write. Length: **30**

**New Reader**
This spot features brief statements from new adult readers across the country about why they decided to learn to read and what is has meant to them. Length: **30**

These PSAs close with "To volunteer or to learn to read call the Coors Literacy Hotline 1-800-626-4601." This 800 number is a national toll-free referral line managed by the Literacy Contact Center.

---

**NATIONAL COALITION FOR LITERACY BRINGS MANY GROUPS TOGETHER**

Since 1981 these national organizations have worked together in the National Coalition for Literacy:
- American Association for Adult and Continuing Education
- American Association of Advertising Agencies
- American Library Association
- CONTACT, Inc.
- B. Dalton Bookseller
- International Reading Association
- Laubach Literacy International
- Literacy Volunteers of America
- National Advisory Council on Adult Education
- National Commission on Libraries & Information Science
- National Council of State Directors of Adult Education

The Coalition has three major objectives:

- To develop and implement a public service advertising campaign with the AD Council and its designated volunteer agency, D'Arcy, Masius, Benton & Bowles.

The campaign objectives are to increase awareness of adult illiteracy as a large and growing problem, motivate prospective volunteers to join the national literacy movement and link them to local literacy agencies and to generate support from business.

- To respond to public interest and inquiries by providing a toll-free 800 telephone number, and a mail and phone referral service through Contact Literacy Center, Inc., Lincoln, Nebraska.

- To raise funds to support the public awareness campaign and the referral service by working with foundations such as the Business Council for Effective Literacy, corporations and agencies such as the U.S. Department of Education and others.
The Coalition for Literacy has had great impact on the problem of illiteracy.

One of the most important early results of the campaign was the number of phone calls to the toll-free telephone referral service staffed by the Contact Literacy Center, Inc. Gary Hill, Contact President, reported receiving more than 337,145 calls from prospective students and volunteers. These calls increased from 31,749 in 1985, 119,153 in 1986, to 186,243 through September 1987. In 1986 55% of these calls were from volunteers and 36% were from students. This is in addition to the network of state and local hotlines which carried most of the burden.

The Contact Center, Inc. increased its capacity to deal with this by adding new and necessary technology. Their staff increased from 15 to 18 full-time workers and volunteer hours greatly increased. The telephones showed high demand after television appearances by coalition-related speakers, strategically placed prime-time ads and several TV features. Faster response to inquiries was assured by using first-class mail, giving local numbers on the phone when possible and developing computer software to generate responses automatically.

The Contact Literacy Center began in 1978 as a project of the American Association of Advertising Agencies, and continued that affiliation through the Coalition for Literacy. The Center served as the national clearinghouse for the Coalition and responded to requests for information. The hotline was also used by various groups and organizations to respond to publicity on the problem of adult illiteracy nationwide.

New state literacy coalitions have been formed in more than half of the states. In many cases, these groups were formed as a result of Coalition activity. A regional planning conference in the Southwest was supported by the Coalition and technical assistance was provided for new state planning efforts in Washington, Oregon and other areas. The growth of literacy efforts has been unprecedented.

In June, 1986, Anabel Newman, Indiana University, published an evaluation of the impact of the Coalition's Volunteer Against Illiteracy campaign. She described increases in public awareness and resources devoted to adult literacy. Among the findings, the study indicated that awareness of the problems confronting illiterate adults and out-of-school youth in the United States increased measurably. In the first year that this campaign had been running, awareness of functional illiteracy as one of the nation's worst problems increased from 21 percent to 30 percent of the American public. There was a substantial increase in inquiries made to the Contact Center. Nearly 40,000 Americans have volunteered their time and skills to tutor functionally illiterate adults in response to the public service advertising campaign. Newman reported that over $32,095,000 was contributed by the media in time and space for the advertising campaign during its first year. Enrollments in literacy programs were up over nine percent from 1985. Requests to volunteer to the two major volunteer literacy groups, Laubach Literacy International and Literacy Volunteers of America, were up over 100 percent. There was also a marked increase in grant giving and donation of in-kind services to adult literacy from foundations, business and industry.

Many recent literacy related success stories can be attributed directly or indirectly to the Coalition's work and to its public awareness campaign. For example, the Coalition played an important advisory role in PLUS and the U.S. Department of Education's Adult Literacy Initiative, which attempts to consolidate federal activities and promote coalition building among the many organizations concerned about illiteracy.

- Increased coalition building at the state and local levels among libraries and other organizations such as Laubach International and Literacy Volunteers of America.

- Continuing efforts by the Business Council for Effective Literacy, which generates interest and support for literacy initiatives among business leaders.

- and PLUS, an unprecedented cooperative effort between Public Broadcasting Service and ABC, two major national broadcasters that joined forces in a common public service effort in the Fall of 1986.

Having concluded a very successful public awareness campaign, the Coalition members decided to launch a second phase. The Coalition has established the following goals and believes that it is important for these major organizations...
with a continuing concern about illiteracy to meet quarterly: to provide regular communication among members, to stimulate other public awareness efforts, to provide a forum for presenting relevant research and development projects, to establish policies and provide advice, to influence public policy and relate them to state programs. At the moment, the Coalition for Literacy is reviewing the membership of the Coalition and considering inviting other groups to join in the continuing battle against adult functional illiteracy.

AMERICAN LIBRARY ASSOCIATION OFFERS SPECIAL LITERACY PSAs

Raisin Rap - The California Raisins rap about reading. It is available on 3/4" videocassette.
Length: :30  Cost: $35

Check Out A Job directs job seekers and career changers to the library. Two versions of this spot are available. One is tagged to ALA, the other one has extra tape for local tag. 3/4" videocassette.
Length: :30  Cost: $35

Read to Someone You Love features Bill Cosby encouraging this enjoyable activity.
Length: :30  Cost: $35

Be Cool is an MTV-style video that delivers the message "you've got to be cool on the inside, too."
Length: :30  Cost: $35
