The Student Assistance Program (SAP) is a chemical use prevention and early intervention program. Entering the fifth year of implementation, the SAP has expanded from a part-time service contracted with Mental Health to a school-based program serving two high schools and three middle schools. The program is broad based, employing a variety of strategies to prevent chemical use and to intervene when a student does exhibit at-risk behaviors. Through SAP 100% of the students at the participating schools are reached through group guidance and up to 35% of the students are served on an individual basis. At the school level, the Core Team of administrators, counselors, teachers, and aides develops and implements prevention and intervention strategies. Students are not only receivers of services, but providers as well. Peer helpers work to prevent at-risk behaviors and to intervene with referrals as necessary. Continuing to offer direct guidance and counseling services to students and their families, SAP coordinators are also moving to expand community involvement. Through the collaborative efforts of the involved persons, SAP has initiated a number of programs which have increased awareness of drug issues and have prompted the citizens of the county to work together for a healthy, drug-free environment. (ABL)
The Student Assistance Program, established by the Franklin County Schools in 1987, is a chemical use prevention and early intervention program. Entering the fifth year of implementation, the S.A.P. has expanded from a part-time service contracted with Mental Health to a school-based program serving two high schools and three middle schools. The program is broad-based in approach, employing a variety of strategies to prevent chemical use and to intervene when a student does exhibit at-risk behaviors. Through S.A.P., 100 percent of the students at the participating schools are reached through group guidance and up to 35 percent of the students are served on an individual basis. Recognized as a model program by A.D.D. and treatment professionals, Franklin County S.A.P. is now a site for visitation and training for systems in North Carolina and out-of-state wishing to establish a Student Assistance Program.

Franklin County S.A.P. utilizes school and community involvement at four levels.

The School Board has enacted a strict substance use policy and has appropriated local funding. The Health Educator/ADD Contact at the Central Office organizes S.A.P. for the county.

At the school level, the Core Team of administrators, counselors, teachers, and aides develops and implements prevention and intervention strategies.

Students are not only receivers of services, but providers as well. Peer helpers work to prevent at-risk behaviors and to intervene with referrals as necessary.

Continuing to offer direct guidance and counseling services to students and their families, S.A.P. Coordinators are also moving to expand community involvement through formation of the Franklin County Coalition for Youth Success.

Through the collaborative efforts of the involved persons, S.A.P. has initiated a number of programs: special topic group counseling, Core Team, a peer helper program (SHARP), Parent-to-Parent, N.C. ASAP, Franklin County Coalition for Youth Success, and a comprehensive resource of relevant policies and treatment options. Such initiatives have increased awareness of drug issues and have prompted the citizens of Franklin County to work together for a healthy, drug-free environment.
Introduction

Franklin County is a county of 36,414 persons living in rural communities and small towns and working primarily in blue collar and agricultural jobs. Nine county schools serve 4,786 students.

The school and community recognize that alcohol and other drug use, chemical dependence, and the stress of living in a chemically dependent family environment represent a serious threat to the health and welfare of youth. The philosophy of the Franklin County School District is one of caring and concern for these students. Recognizing its responsibility to educate youth regarding chemical use and to intervene early with at-risk behaviors, Franklin County Schools established in 1987 the Student Assistance Program in Bunn and Louisburg High Schools. Committed to expanding needed programs, Franklin County implemented S.A.P. as a school-based program in 1989 and implemented a middle school program in 1990 at Edward Best, Gold Sand, and Youngsville Schools.

The Student Assistance Program has been successful in its effort to meet individual needs, through education and counseling, and to meet needs of the community at large through efforts such as chartering the regional NC ASAP, organizing a community coalition, and developing a peer program. The success of Franklin County S.A.P. can be attributed to a spirit of cooperation and teamwork of its professionals. Today, the S.A.P. is asked to share that success with other regions and states seeking to establish a Student Assistance Program.

Statement of Need

The American Drug and Alcohol Survey (1989) administered to students in grades six, eight, ten, and twelve, indicated that many students were at risk for involvement with alcohol and other drugs. Average age of first use was 14.2 years. Nearly 19% of students indicated that they were at high risk for chemical dependency and other life-threatening situations related to chemical use; 53% were classified as being at moderate risk. Seventy-five percent of the students had friends who used drugs, and 15% of these students had been asked by their friends to use drugs also. Seventy-five percent of the non-users surveyed said they would attempt to stop their friends from using drugs. The 1989 survey indicated two important issues: (1) substance abuse is a serious threat to Franklin County youth; (2) the young people are interested in prevention and intervention efforts.

A number of factors contribute to the susceptibility of Franklin County youth to substance abuse:

2. The unemployment rate is 9.5%, compared to a state rate of 6.2% (1990).

3. Local per student expenditure is $544.05 for the school system, compared to a statewide average of $785.18 (1989-90).

4. Nearly 20% of adults have no more than eight years of education; 33% have one to three years of secondary education (1988).

5. The drop-out rate for 1989-90 was 4.49%, compared to a state rate of 4.5%.
Twenty-six percent of ninth graders were retained for the 1989-90 school year.

Sixth and eighth grade students scored at the 55th and 50th percentiles on the total battery C.A.T., respectively, as compared to state average scores of 58th and 56th percentiles (1990-91).

The Early Prevention of School Failure Program identified 54% of all kindergarten students as being at a moderate to high risk for school failure and dropping out (1990-91).

During 1990-91, 324 cases of abuse and neglect were reported. Recognizing that at-risk youth often do become involved with alcohol and other drugs as a way of gaining peer support and of coping with harsh realities, Franklin County implemented the Student Assistance Program as a positive force to impact on these youth.

Involvement in Planning

A. Internal - Confronting the reality of chemical use rather than hiding in denial, the School Board hired in 1987 a substance abuse specialist, who provided student services and community education. The School Board has passed a strict substance use policy, developed through a collaborative effort of central office and school staff. In a time of austere financial budgeting, the Superintendent has worked with the School Board to expand Student Assistance services. A Health Educator/ADD Contact at the Central Office meets regularly with the S.A.P. Coordinators to update information, to assess services, and to initiate new programs.

   Staff development on the Core Team Model is provided each year with the goal of ultimately training all school personnel. These sessions have been attended by both teachers and administrators.

   Students suggest topics for group counseling, and, with implementation of the peer program this year, will provide some programs and services.

   The Student Assistance Program has enjoyed longevity and even expansion because there is commitment at all levels, the School Board, the Central Office, the individual schools, and the students.

B. External - Substance abuse professionals from Mental Health and from the A.D.D. office have continued to be involved in program planning and staff training. The Health Advisory Council, comprised of parents, school personnel, and health professionals, acts as an advisory council to the Alcohol and Drug Defense Program. S.A.P. Coordinators are currently spearheading an effort to develop a community coalition of concerned citizens, business leaders, and agency personnel to involve all of the community in meeting the needs of at-risk youth.

Implementation

A. Internal - The Student Assistance Program has evolved from a service contracted with Mental Health to a school-based program, an arrangement that provides greater continuity and stability of services. There is a half-time coordinator at each high school and one person to coordinate S.A.P. for the three middle schools. The coordinators provide the following services within the schools:

   (1) Coordination of a Core Team of trained administrators, teachers,
counselors, and aides who receive referrals from teachers, parents, or students on students exhibiting at-risk behaviors; collect data; intervene with strategies; monitor student progress; contact parents; and make referrals to outside agencies as needed. The teams received 188 referrals; 145 parent contacts were made (1990-91).*

(2) Group guidance on chemical use and AIDS education: 195 sessions, 2500 students.*

(3) Small group counseling on substance abuse awareness, family issues of alcoholism, sexual/physical abuse, parenting, grief and loss: 580 sessions, 264 students.*

(4) Individual counseling: 2230 sessions.*

(5) Implementation of a peer helper program, SHARP (Students Helping At Risk Peers), an elective course in the two high schools and in two middle schools. The 75 trained students will broaden the outreach to at-risk students.

(6) Project Graduation for the two high schools.

(7) Staff development: 151 teachers, SAP Awareness; 16 teachers, Parent-to-Parent Workshop.*

(8) Development of a resource notebook for administrators of school policies and treatment options.

(9) Development of a notebook of group activities.

(10) Coordination with Department of Social Services and UNC-Greensboro to develop a Secondary Pregnancy Prevention Coalition.

Other services offered include articles on substance abuse in the monthly staff newsletter, Spotlight On Health, published by the Health Educator/ADD Contact. Also, the I CARE HOTLINE provides 24 hour service for students.

To further their training, S.A.P. Coordinators have attended the 1990 and 1991 UNC-W School of Alcohol and Drug Studies, Division of Student Services Conference, and workshops on substance abuse, sexual abuse, group counseling, peer helping, and community coalition building.

Through yearly evaluations by students and staff, the S.A.P. Coordinators assess program strengths and weaknesses to expand and enhance S.A.P. services.

Plans for future services include: (1) expansion of S.A.P. to grades K-6; (2) publication of Pocket Friends, a list of community resources and phone numbers for students; and (3) expansion of peer helper program into the community through the Franklin County Coalition for Youth Success.

B. External - The Student Assistance Program also reaches outward to the community in a variety of ways:

*Statistics are for the 1990-91 school year through May 1, 1991.
(1) Organizing NC ASAP, a coalition of S.A.P. coordinators from nine
school systems, the first such regional organization in North
Carolina.

(2) Developing contacts with the local AA and Alanon organizations.

(3) Developing a resource file of treatment facilities for use by
students, families, and employees.

(4) Touring nearby treatment facilities.

(5) Distributing a pamphlet on S.A.P. services and speaking with
agencies, churches, civic organizations, PTA's, and the local news-
papers.

(6) Providing Parent-to-Parent Workshops (124 parents) and training 5
Parent-to-Parent trainers.*

(7) Providing S.A.P. training for surrounding counties.

(8) Working closely with the Probation Office, Mental Health, Health
Department, and Department of Social Services: 184 referrals to
outside agencies.*

(9) Working the Red Ribbon booth at the North Carolina State Fair and
soliciting business donations of ribbons for Red Ribbon Week.

Program Replication

An effective Student Assistance Program requires community awareness
and support because parental attitudes and values are key to student
decision-making.

An effective program is broad-based in services offered and educational
in approach, rather than judgmental.

An effective program requires priority status at all levels through (1)
a strict chemical use policy with appropriate consequences and treatment
options; (2) ongoing staff development, including administrators; (3)
awarding of renewal credit and Senate Bill 2 credit for Core Team service;
(4) permission for students to receive group counseling and other services
during the school day.

An effective program requires a Central Office coordinator (half-time
position, minimum) who places funding priority on direct services to
students.

An effective program requires a close working relationship between the
school coordinators so that the focus broadens beyond the individual
schools to a scope of community change.

While a program can be successful with the current model of a half-time
coordinator at each high school and one full-time coordinator to service
three middle schools, a full-time coordinator at each school would be
preferable as finances permit. The strength of a school-based model is that
duplication of services and personnel turn-over are avoided.

*Statistics are for the 1990-91 school year through May 1, 1991.
## Program Objectives and Strategies

<table>
<thead>
<tr>
<th>Specific Objectives</th>
<th>Strategy(ies)/Critical Tasks</th>
<th>Evaluation Procedures</th>
<th>Results/Impact</th>
</tr>
</thead>
</table>
| 1. To increase awareness with student, staff and community populations of the issues and dynamics that naturally occur with the use of alcohol and other drugs. | 1. Provide in class group guidance to students in 6 - 12th grades.  
   a. Signs and symptoms of chemical dependency.  
   b. Chemical dependency and alcoholism as a disease.  
   c. Alcohol as a drug.  
2. Provide staff training  
   a. Core Team Training, Phases 1, 2, 3, 4.  
   b. NC School for Alcohol and Drug Studies at UNC-W.  
   c. Student Services Conferences.  
   d. Peer Helper workshops.  
   e. Parent-to-Parent workshops.  
3. Provide community agencies and parents educational forums/support groups.  
   a. Parent-to-Parent workshops.  
   b. Speaking engagements with agencies, churches, PTA, and civic groups.  
   c. Newspaper articles. | 1. Record numbers of students receiving in-class guidance.  
2. Record numbers of staff completing training.  
   Complete written evaluation.  
3. Record numbers of persons served.  
   Feedback from public.  
   Written evaluations. | 1. 2500 students served as of May 1, 1991.  
2. a. 39 staff currently trained in Core Team concept.  
   Positive evaluations.  
   b. 4 staff completed NC Drug & Alcohol School in 1990 and 5 staff completed NC Drug & Alcohol School in 1991.  
   c. 8 - 10 staff received training at Student Services Conference.  
   d. 13 staff completed Peer Helper workshops.  
   e. 19 staff completed Parent-to-Parent workshop.  
3. 10 Parent-to-Parent workshops conducted. 124 participated.  
   Positive feedback from parents.  
   Generated calls from parents for help.  
   Positive feedback from community on presentations. |

| 5. To continually provide and adjust services in order to address the needs of at-risk youth. | 1. Join with other agencies to expand youth services and share program information.  
2. Apply for grant monies to extend SAP to grades K-5.  
3. Provide to students "Pocket Friends," a list of county emergency phone numbers. | 1. a. Staff are charter members of N.C.ASAP (Area Student Assistance Professionals).  
b. Staff have initiated development of a county coalition, Franklin County Coalition for Youth Success.  
c. Staff will join NALSAP (National Association of Leadership for Student Assistance Programs).  
2. Staff will apply for suitable grants.  
3. Staff will distribute "Pocket Friends" to students in grades 6 - 12 by January 1992. | 1. a. Closer working relationship with DPI and ADD. Increased opportunities for training.  
b. County coalition initiated in September 1991. First meeting held October 9, 1991, with various community groups attending.  
c. North Carolina to be second state in U. S. to have a statewide Student Assistance Program.  
2. Additional funds for program materials and for increasing staff.  
3. Increased student awareness of community sources of help. |
Flow Sheet for Teachers

Franklin County Schools Student Assistance Program
(Program procedures for referred students.)

1. Teacher fills out Student Assistance Program referral form.

2. Referral form should be put in a sealed envelope and placed in S.A.P. Coordinator's box.

3. S.A.P. Coordinator distributes referral forms to referred student's teachers.

4. Teachers will complete referral form and place it in a sealed envelope and return to S.A.P. Coordinator's box.

5. Referral forms are discussed at next core team meeting.

6. Core team will review information and an intervention plan is formulated.

7. Case manager, from the core team personnel, is assigned to work with the referred student.

8. Intervention is implemented.

9. Case manager does follow up.

THANK YOU FOR YOUR TIME!!!
STUDENT ASSISTANCE PROGRAM EVALUATION

In order to continue federal funding of the Student Assistance Program a yearly evaluation of the program must be submitted. Please help us out by checking either yes, no or not applicable to the questions below. Please comment whenever appropriate. Thank you for your time.

1. Do you understand the objectives/goals of the SAP?
   ____________ yes ____________ no ____________ n/a
   Comments

2. Did you make any referrals to the SAP? ____________ yes ____________ no
   If so, how many? ____________
   Comments

3. Did you receive notification from the core team that your referral was received?
   ____________ yes ____________ no ____________ n/a
   Comments

4. Did the SAP counselor provide you with follow-up about the referrals made? 
   ____________ yes ____________ no ____________ n/a
   Comments

5. Do you think the SAP counselor has a good relationship with students?
   ____________ yes ____________ no ____________ n/a
   Comments

6. Do you think the SAP counselor has a professional relationship with teachers?
   ____________ yes ____________ no ____________ n/a
   Comments

7. Do you feel that there has been some resolution regarding your referral's problem?
   ____________ yes ____________ no ____________ n/a
   Comments

8. Do you feel that the program has been helpful to students?
   ____________ yes ____________ no ____________ n/a
   Comments

9. Are there changes you would like to see in the SAP?
   ____________ yes ____________ no ____________ n/a
   Comments

What is S.H.A.R.P.?
S.H.A.R.P. is a county wide peer helping program designed to address student academic and social problems. Research shows that students will turn to other students when they are faced with a problem. Many students do not ask parents or school personnel some important questions and unfortunately they remain alone with the questions or obtain inaccurate information from their peers. It is the goal of the peer helping program to provide accurate educational information to students who seek answers to their questions. Another goal of the county wide peer helping program is to increase student attendance and academic performance by training students to tutor younger peers who may be experiencing academic difficulty. Perhaps the most important goal of the program is to enhance positive self esteem not only for the peer helper but the student receiving peer assistance. This is achieved by developing improved communication and problem solving skills. The peer helping program will offer students another forum to discuss student problems which often interfere with a positive school experience.

Who are the peers?
The S.H.A.R.P. Program began in the fall of 1991 at four schools; Youngsville, Gold Sand Middle, Bunn and Louisburg High. There were 65 students trained in the peer helper curriculum during that year. This year 1992-93, the S.H.A.R.P. program has been expanded to include all schools in Franklin County. This expansion will enable an additional 198 students to be trained as peer helpers! Students can become peer helpers by student nominations, self referrals, and teacher nominations. Those selected must be good listeners, interested in helping people, responsible and trustworthy. Peer helpers in 7th-12th grade will be expected to maintain a "C" average.

How are the peer helpers trained?
Peer helpers in 7th-12th grades will receive year long classroom instruction. Training topics will include: effective communication skills, problem solving skills, tutoring, helping characteristics, team building. Special areas to be studied will include; prevention of alcohol/drug use, understanding families, grief and loss, divorce, teen suicide, depression, eating disorders, teen sexuality and relationships.

Peer helpers in 4th-6th grade will receive one semester of instruction. The focus of training will include; team building activities, understanding people, listening, responding and questioning skills, conflict resolution, and safety issues.

For more information contact your school Guidance Counselor.
CONGRATULATIONS!

_____________________________ has been selected to participate in the peer helper program at______________________________.

As a member of S.H.A.R.P. it is understood that peer helpers will:

1. abstain from the use of alcohol and other drugs
2. maintain confidentiality of the students that work with peer helpers.
3. treat others with respect and dignity
4. abide by school rules and regulation
5. attend school regularly and maintain a "C" average
6. serve as a positive role model to other students
7. complete all peer helper responsibilities for this school year.

I __________________________ agree to follow the above responsibilities. I understand that failure to meet these commitments will result in a re-evaluation of my continuance as a peer helper.

Here are skills and qualities a leader can use to be a successful trainer of leaders. Think about past leadership experiences you have had. Then rate yourself on each skill or quality, using the scale: (S = Strong; G = Good, NS = Not Sure; W = Weak; P = Poor). Evaluate your strengths and weaknesses as honestly as you can. Use this checklist to chart your progress.

1. I can give a concise, clear description of the Peer Counseling Program. 
2. I can project my voice and display enthusiasm to a group.
3. I am able to observe people's behavior while I listen to what is being said.
4. I am able to interpret the combine messages of spoken words and non-verbal behavior.
5. I am able to ask open-ended questions which encourage another to share his/her ideas, feelings, or interest.
6. I can use effective openers to generate a lively group discussion.
7. I can discriminate between significant and irrelevant information and comments to use in teaching concepts or to guide a discussion to a certain focus.
8. I can restate or clarify a person's ideas.
9. I can take an unexpected incident or event and use it to teach a positive learning concept.
10. I am able to give constructive pointers to individuals in a non-judgmental manner.
11. I can share my own feelings relevant to a discussion.
12. I am able to elicit participation from most people in a group.
13. I am able to formulate de-briefing questions to process learning from an activity.
14. I have a sense of timing for the process of discussions and activities.
15. I am able to model an activity or skill comfortably.
16. I can accept anger or criticism from a person or a group without getting defensive.
17. I am able to let others display emotion, comfortably.
18. I have a sense of humor and can laugh at myself.
19. I like people believe in their potentials and affirm THEM!
Student Evaluation of Peer Facilitators

Franklin County Peer Helper Program (S.H.A.R.P.)

Date ___________________________ Name of School __________________________________________________________________________

Name __________________________________________________________________________

You are one of a sample of students in __________________________ (school) who have participated in some component of the peer facilitator program since __________. Your responses will be used to help evaluate the program. All information is confidential. Your name will not be used when the data is analyzed. Thank you for your time and help!

1. Check one of the following: I work mainly with a/an
   - [ ] Peer helper
   - [ ] Adult helper
   - [ ] Both

2. Check one of the following: I participated in
   - [ ] Individual interviews
   - [ ] Group meetings
   - [ ] Both types

Circle the best response: Strongly Agree (SA), Agree (A), Not Sure (NS), Disagree (D) or Strongly Disagree (SD).

3. My peer helper was interested in my problems. _____________________________ SA  A  NS  D  SD

4. I was comfortable working with my peer helper. _____________________________ SA  A  NS  D  SD

5. We clarified some of my ideas and concerns so that I could see them more clearly. _____________________________ SA  A  NS  D  SD

6. The number of meetings we had together were long enough to be helpful. _____________________________ SA  A  NS  D  SD

7. Meeting once a week was the right amount of time. _____________________________ SA  A  NS  D  SD

8. My peer helper was helpful. _____________________________ SA  A  NS  D  SD

9. I feel better about myself in some respects since meeting with a peer helper. _____________________________ SA  A  NS  D  SD

10. I would like to meet with my peer again and talk about some other ideas or concerns. _____________________________ SA  A  NS  D  SD

11. It is easier to talk with my peer helper about somethings than it is with adults. _____________________________ SA  A  NS  D  SD

12. I would recommend my peer helper to someone else who needed assistance. _____________________________ SA  A  NS  D  SD

13. I would like to be a peer helper someday. _____________________________ SA  A  NS  D  SD

14. What I liked best about my peer helper was: ____________________________________________

15. What I liked least was: ____________________________________________________________

16. Any other comments? ______________________________________________________________
Teacher/Host of Peer Facilitator Evaluation Form

Franklin County S.H.A.R.P. Peer helper program

To: Peer Facilitator Hosts
From: The Peer Facilitator Coordinator
       Cheryl Brelsford, S.H.A.R.P. Coordinator

Would you please help us evaluate the work of the peer facilitator who was assigned to work with your student(s) this semester. Your response can help us maintain and improve aspects of our program and the work of the peer facilitators. Please complete the following evaluation and put it in my office box. I would be happy to meet with anyone who wants to discuss the program or to share personal observations about students and their facilitators. Thanks for your support and assistance.

CIRCLE ONE:

SA-Strongly Agree; A-Agree; U-Uncertain; D-Disagree; SD-Strongly Disagree

1. I am glad that I chose to have a peer facilitator work in my class.
   SA   A   U   D   SD

2. I feel as though the peer facilitators have been well-trained.
   SA   A   U   D   SD

3. The students look forward to the peer facilitators being in class.
   SA   A   U   D   SD

4. I doubt if the peer facilitators really accomplished anything worthwhile.
   SA   A   U   D   SD

PLEASE COMPLETE THE FOLLOWING STATEMENTS:

5. If other teachers would ask me about the peer facilitators, I would say the following _____.

6. One suggestion I would like to make is
   ________________________________________________________________________

7. One concern I have is
   ________________________________________________________________________

8. Any other comments?

Thank You!

Franklin County Coalition for Youth Success

A team of concerned citizens attended the 2-day workshop "Peers Empowering Peers," sponsored by the N.C. Agricultural Extension Service and by the N.C. Department of Public Instruction, during the fall of 1991.

During the workshop, the Franklin County participants established the following statements:

Our Challenge: To help assist at risk youth in Franklin County to improve quality of life.

Our Vision: To provide at risk youth the resources and opportunities for development of life skills.

Our Response: To establish a community coalition by networking professionals to share resources and professional expertise in order to develop additional resources.

Our Mission: To provide a structure for the coordination and delivery of youth services.

Unit Resources: Youth serving agencies, businesses and material resources involved in building at risk youth programs.

The Coalition is comprised of representatives from the following groups: Agricultural Extension Services, Chamber of Commerce, Department of Social Services, Franklin County Schools, Guardian Ad Litem, Health Department, Juvenile Probation, Louisburg Police Department, Mental Health, National Guard. The goal is to add interested citizens who are not staff from youth serving agencies and to add youth representatives.

The Coalition has met monthly since October and has accomplished the following: 1) established an organizational structure, 2) written by-laws, 3) initiated the process of attaining non-profit status, 4) sponsored an alcohol/drug-free dance for county youth, "Sadie Hawkins," 5) initiated plans to sponsor Prom Promise, Project Graduation, and an information booth at the Whistler's Convention.

A team of Coalition members will be receiving more training at the "Community Coalition Training Institute," sponsored by STEP ONE Substance Abuse Services, in Winston-Salem on March 25-26, 1992.
ADOLESCENT PARENTING PROGRAM

Have you ever asked yourself:
* Do other teenage mothers feel different or cut off from their friends?
* What do other teenage mothers do when they are tired of being a mom?
* Do I ever get to have some fun?

If you answer "yes" to at least one of these questions, the Adolescent Parenting Program may be for you!

Who can participate in APP?

First time teen parents 17 years of age and younger regardless of income, disability, race or religion.

How does the program work?

A social worker and volunteer parent aide work together with the teen to:
* delay a second pregnancy
* earn a high school diploma
* enhance parenting skills
* acquire employment skills
* utilize appropriate health care and social services
* reduce dependency on welfare
* strengthen and establish an individual support system

What is the role of an APP volunteer?

Their role is to:
* work one-on-one with teen parents
* provide a positive role model
* be a trustworthy friend
* assist with transportation
* help parent build self-esteem
* help parent attain goals

Who do you call to sign up for this incredible new program?

* Lori W. Murray
  APP Coordinator
  Franklin County DSS
  496-5721 or your guidance counselor
