This guide was developed to provide information about the programs and services of the State University System of Florida to potential students with disabilities. The guide begins with descriptions of the six categories of disabling conditions recognized by the system (visual impairments; physical impairments; hearing impairment; specific learning disabilities; speech impairment; and other impairments—cardiovascular and circulatory, mental, psychoneurotic, or personality disorders, blood serum disorders, respiratory disorders, diabetes and epilepsy), summaries of federal and state laws, and information about funding for auxiliary learning aids. Each of the nine state universities is then described in a two-page section outlining its programs and services. These sections include highlights of the institution, admission procedures, available publications, university statistics, services provided to individuals with specific disabilities by category, and addresses of relevant university departments and student organizations. The guide concludes with descriptions of scholarships and supporting agencies available to assist students with disabilities. (JDD)

How to Use this Guide

The State University System of Florida's Guide to Programs and Services for Students with Disabilities (Second Edition) was developed to provide information about the programs and services of the State University System to potential students. This publication is designed to provide necessary information to students in an organized, brief manner.

Each of the nine state universities has a two page section, outlining the programs and services they offer students with disabilities. Each section is organized in the same manner, for ease of use. You will find:

On the left page: Highlights of the institution (as included in news publications and in the 1990 and 1991 State University System of Florida Annual Reports), admission procedures, available publications, and university statistics.

On the right page: Outline of services provided specific disabilities by category and important addresses of each main campus, admissions, ADA/504 Compliance Officer, Coordinator for Programs and Services for Students with Disabilities and any student organizations involved with students with disabilities.

Other relevant resources have also been included in this guide. For example, summaries of the current federal and state laws are included so that you may further determine available assistance.

Where Do I Go If I Have Questions?

After reviewing this publication, if you have any questions or concerns, do not hesitate to contact one of the Coordinators of Programs and Services for Students with Disabilities in a State University System institution.

Resource Guide to Programs and Services for Students With Disabilities
State University System

325 West Gaines Street
Tallahassee, FL 32399

Nine universities make up the State University System of Florida. Each institution provides different programs and services to assist students with disabilities. To learn more about individual institutions and their programs, consult the two-page section on each institution contained in this publication.

The nine state universities contained in this publication include:

Florida A&M University
Main Campus
Suite 301, FHAC
Tallahassee, FL 32307

Florida Atlantic University
Main Campus
Box 3091
Boca Raton, FL 33431

Florida International University

University of South Florida
Main Campus
4202 E. Fowler Ave.
Tampa, FL 33620

University of West Florida
Main Campus
11000 University Parkway
Pensacola, FL 32514
In order to provide services to students with disabilities, each university asks for voluntary self-identification of students with a specific disability. This information is kept confidential and is used for the purpose of aiding students in achieving their fullest potential while at the university. In addition, each university is required to submit annually, a confidential summary to the Board of Regents which includes the number of students with disabilities by category.

Listed below are the six categories of disabling conditions the State maintains as of September, 1991.

1. **Visual Impairment:**
   Disorders in the structure and function of the eye as manifested by at least one of the following: (1) visual acuity of 20/70 or less in the better eye after the best possible correction, (2) a peripheral field so constricted that it affects one's ability to function in an educational setting, (3) a progressive loss of vision which may affect one's ability to function in an educational setting. Examples include but are not limited to cataracts, glaucoma, nystagmus, retinal detachment, retinitis pigmentosa, and strabismus.

2. **Physical Impairment:**
   Musculoskeletal and connective tissue disorders, neuromuscular disorders. Physically disabling conditions which may require an adaptation to one's school environment or curriculum. Examples include but are not limited to cerebral palsy, absence of some body member, clubfoot, nerve damage to the hand and arm, cardiovascular aneurysm (CVA), head injury and spinal cord injury, arthritis and rheumatism, intracranial hemorrhage, embolism, thrombosis (stroke), poliomyelitis, multiple sclerosis, Parkinson's disease, congenital malformation of brain cellular tissue, and physical disorders pertaining to muscles and nerves, usually as a result of disease or birth defect, including but not limited to muscular dystrophy and congenital muscle disorders.

3. **Hearing Impairment:**
   A hearing loss of 30 decibels or greater, pure tone average of 500, 1000, 2000 Hz, ANSI, unaided, in the better ear. Examples include but are not limited to conductive hearing impairment or deafness, sensorineural hearing impairment or deafness, high or low tone hearing loss or deafness, and acoustic trauma hearing loss or deafness.

4. **Specific Learning Disabilities:**
   A disorder in one or more of the basic psychological or neurological processes involved in understanding or in using spoken or written language. Disorders may be manifested in listening, thinking, reading, writing, spelling, or performing arithmetic calculations. Examples include dyslexia, dysgraphia, dysphasia, dyscalculia, and other specific learning disabilities in the basic psychological or neurological process. Such disorders do not include learning problems which are due primarily to visual, hearing, or motor handicaps, mental retardation, emotional disturbance, or an environmental deprivation.
5. **Speech Impairment:**
Disorders of language, articulation, fluency, or voice which interfere with communication, pre-academic or academic learning, vocational training, or social adjustment. Examples include but are not limited to cleft lip and/or palate with speech impairment, stammering, stuttering, laryngectomy, and aphasia.

6. **Other Impairments:**
Not limited to conditions listed below.

- **Cardiovascular and Circulatory Conditions.** Include but are not limited to congenital heart disease, rheumatic fever and chronic rheumatic heart disease, arteriosclerotic and degenerative heart disease, other diseases or conditions of the heart, other hypertensive diseases, varicose veins and hemorrhoids, and other conditions of the circulatory system.

- **Mental, Psychoneurotic, or Personality Disorders.** Any emotional or behavioral neurosis that has, or could create, an unstable condition in the individual's actions. Include but are not limited to psychotic disorders, psychoneurotic disorders, alcoholism, drug dependence, and other character, personality, and behavior disorders.

- **Blood Serum Disorders.** Hemophilia, sickle cell anemia, HIV/AIDS, and disorders where the cause is unknown.

- **Respiratory Disorders.** Tuberculosis of the respiratory system, emphysema, pneumoconiosis and asbestosis, bronchiectasis, chronic bronchitis and sinusitis, other diseases of respiratory system.

- **Diabetes. Epilepsy.**
Other conditions that require an administrative or academic adjustment such as class schedules, parking, and course adjustments, and do not fit into any of the above categories may also qualify. Contact the Coordinator of Services and Programs for Students with Disabilities at a State University System institution for further information.

**Should I tell the university about my disability?**

That is for you to determine. The following information may help you in making a more informed decision.

1. It is illegal for any university to make pre-admission inquiries about a student's disability.
2. Students with disabilities apply under the same guidelines as all other students.
3. The only time your disability needs to be mentioned in the application process is if you wish to request special admission consideration.

Use question number 27 on the State University System Application Form to apply as a student with a disability (this is an option for you to consider when applying). Also, attach a letter explaining how your disability had an impact on the questionable grade(s), test score(s), or choice of high school courses. Once you ask for special consideration, the university then has the right to ask for relevant documentation to verify your disability. Any documentation provided is confidential and cannot be released to anyone without your permission.

In order to receive services at any State University System institution, you must register with the office responsible for programs and services for students with disabilities.

Documentation is necessary to verify every disability. In order to make sure that services are available on the first day of classes, make contact early, and provide all medical or psychoeducational information before classes begin. If you have learning disabilities, a "current" psychoeducational evaluation will be necessary. Contact universities of interest to see how "current" is defined. If you are still in high school, and the most current evaluation is older than three years, obtain a new evaluation before graduation. Evaluations in college are generally at the expense of the student.
Section 504.
Federal Register / Vol. 45, No. 92, pg. 30937-30944

Section 504 is designed to eliminate discrimination on the basis of handicap in any program or activity receiving federal financial assistance. It provides that no qualified handicapped person shall, on the basis of handicap, be excluded from participation in, be denied benefits of, or otherwise be subjected to discrimination under any program or activity which receives or benefits from federal financial assistance. Handicapped person means any person who has a physical or mental impairment which substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

Admissions and Recruitment

Qualified handicapped persons may not, on the basis of handicap, be denied admission or be subjected to discrimination in admission or recruitment. Institutions may not make pre-admission inquiry as to whether an applicant for admission is a handicapped person. After admission, the university may make inquiries on a confidential basis as to handicaps that may require accommodation.

Academic Adjustments

Universities shall make such modifications to academic requirements as are necessary to ensure that such requirements do not discriminate or have the effect of discriminating, on the basis of handicap, against a qualified handicapped applicant or student. Academic requirements that the recipient can not demonstrate that are essential to the program of instruction being pursued by such student or to any directly related licensing requirement will not be regarded as discriminatory within the meaning of this section.

Modifications may include changes in the length of time permitted for the completion of degree requirements and adaptation of the manner in which specific courses are conducted. Universities shall take such steps as are necessary to ensure that no handicapped student is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination under the education program or activity operated by the school because of the absence of educational auxiliary aids for students with impaired sensory, manual, or speaking skills.

Section 504 is too lengthy a document to include in this publication. If you wish a complete copy of the legislation, please contact the Equal Opportunity Programs Office at one of the State University System institutions.

Resource Guide to Programs and Services for Students With Disabilities
The Americans with Disabilities Act (ADA) was signed into law on July 26, 1990. This act protects millions of Americans with disabling conditions from discriminatory practices in public accommodations (including colleges and universities), employment, transportation and telecommunications. The ADA extends the coverage of Section 504 of the Rehabilitation Act of 1973.

The ADA protects every person who either has, used to have, or is treated as having, a physical or mental disability which substantially limits one or more major life activity. Individuals who have serious contagious and non-contagious diseases such as HIV/AIDS, cancer, epilepsy or tuberculosis are also covered under the auspices of ADA.

**Employment**

State University System institutions, as employers of students, faculty and staff, may not discriminate against qualified individuals with disabling conditions and must reasonably accommodate the disabilities of qualified applicants or employees unless undue hardship would result.

**Public Services**

State University System institutions may not discriminate against qualified individuals with disabling conditions by excluding them from participating in or denying them the benefits of the services, programs or activities of the university.

**Public Accommodations**

Public facilities of State University System institutions, including student unions, museums, athletic arenas, auditoriums, libraries, recreational facilities, etc., must be accessible to individuals with disabling conditions.

**Telecommunications**

Telecommunication relay services for hearing and speech impaired persons must be provided.

Questions

If you desire more complete information, please contact the ADA Coordinator at the addresses provided within this publication.

Note: Section 504 uses the term handicapped and ADA uses the term disabled. Section 504 will be amended to reflect the term disabled in the near future.
(1) A university shall provide reasonable substitution or modification for any requirement for admission into an undergraduate or graduate program of study, or for entry into the upper division, or for graduation for any student who is hearing impaired, visually impaired, dyslexic, or who has a specific learning disability where documentation can be provided that the student's failure to meet the requirement does not constitute a fundamental alteration in the nature of the program.

(2) In determining whether to grant a substitution or modification, a university will consider pertinent documents including, but not limited to, a physician's statement, vocational rehabilitation records, and school records maintained as a result of the exceptional child provisions of Public Law 94-142. The State Board of Education has prescribed in Rule 6A-10.041, FAC, the definitions of disabilities to which this Rule 6C-6.018 applies, and each university will provide the student the opportunity to present evidence to support his or her disabilities, and an appeals process.

Specific Authority
240.209(1), (3)(p) FS. Law Implemented 240.209(1), 240.152, 240.153 FS.

Ch 240. F. S. 1989. Postsecondary Education

240.152 Impaired and learning disabled persons; admission to postsecondary institutions; substitute requirements; rules.

Any person who is hearing impaired, visually impaired, dyslexic, or who has a specific learning disability shall be eligible for reasonable substitution for any requirement for graduation, for admission into a program of study, or for entry into upper division where documentation can be provided that the person's failure to meet the requirement is related to the disability and where the failure to meet the graduation requirement or program admission requirement does not constitute a fundamental alteration in the nature of the program. The State Board of Education, the Board of Regents, and the State Board of Community Colleges shall adopt rules to implement this section and shall develop substitute admission requirements where appropriate. History-s. 2, ch. 86-194.
Florida Relay Service

For students with hearing impairments, when trying to call a department on a University campus, use the Florida Relay Service if the department does not list a TDD number.

Things to Remember

- To make a call through the FRS, you only need a regular telephone and a TDD.
- Your call is answered by a Communication Assistant at the FRS Center in Miami. The assistant will serve as a liaison as you call the person you wish to reach. Each spoken word is typed into the TDD by the Communications Assistant. Your TDD response is relayed to the Communications Assistant who speaks to the hearing person who you called.
- There is no charge for this service, except on long distance calls, which are offered at discount rates.
- The service is available 24-hours a day, 365 days a year.
- The service should not be used in an emergency. Dial 911 first.
- All relay users should have their numbers ready when they call FRS.
- Hearing persons can reach the deaf, deaf-blind, hard of hearing and speech impaired by using the service.
- FRS should not handle TDD to TDD calls. Direct TDD calls should be made without FRS assistance.

To make a FRS call, simply dial

1-800-955-8771 (TDD)
1-800-955-8770 (V)

For information on how to obtain a TDD, and other assistance, call 1-800-222-2346.
Senate Bill 278H. Section 01. 407 Special Categories. Grants and Aids. Auxiliary Learning Aids for Postsecondary Handicapped Students from general Revenue Fund.

Funds provided in Specific Appropriation 407 shall be used for auxiliary learning aid assistance for handicapped students who are attending a state university or public community college in Florida and shall be administered under rules adopted by the State Board of Education. Such rules shall include standards of eligibility providing that auxiliary aids will be restricted to students who are handicapped within the definition of Section 504 of the Rehabilitation Act of 1973, as amended, and who are not able to obtain auxiliary aid assistance under state or federal vocational rehabilitation programs or other governmental programs. Such rules shall provide for reimbursement to the institution by the Department of Education for auxiliary aid assistance provided under this program. The level of reimbursement of funds shall be based on the number of disabled students served in the prior year, the amount of institutional matching funds provided and the institution's Auxiliary Learning Aids expenditures for the prior year. Any funds herein appropriated and unencumbered at the end of the fiscal year shall revert to the General Revenue Fund unallocated. Participating institutions shall be required to provide matching funds of at least 30 percent beginning in Fall 1991 and at least 40 percent beginning in Fall 1996. Eligible matching expenditures shall include equipment and personnel services which are dedicated to providing direct auxiliary instructional support to handicapped students.

Senate Bill 278H. Section 01. Specific Appropriation.

Upon request by the institution, an equal amount to 20 percent of an institution's allocation may be distributed at the time of allocation. Any funds provided in advance shall be deducted from the total amount the institution is eligible to be reimbursed for actual expenditures under its plan. At least once during the each year the allocation, expenditures and needs of all institution shall be reviewed. If this review shows that any institution is not spending this allocation at a rate that would exhaust the allocation by the end of the year, the Commissioner may adjust allocations between and among institutions. For 1992-93, the annual expenditure limit for individual students participating shall be $5,500.

None of the appropriation for auxiliary learning aids shall be expended for hourly, OPS or salaried personnel except for persons who are necessary for providing direct auxiliary instructional support to handicapped students. With specific prior approval of the Department of Education, funds may be used to pay salaries of interpreters for the deaf, learning disability specialists, readers, notetakers and tutors who work directly with disabled students in the learning environment and who are employed in full-time salaried positions where the workload justifies a full-time employee. At no time may any of the funds from this appropriation be expended for the salary of the institution's coordinator of disabled student services.

The Department of Education shall survey private colleges and universities to determine the number of student who are handicapped within the definition of Section 504 of the Rehabilitation Act of 1973. Based on its findings, the Department shall estimate the fiscal impact of expanding the auxiliary learning aids for postsecondary handicapped students program to include the eligible students in private universities. The Department shall include in its 1993-94 legislative budget request funds needed to serve handicapped students in private universities at the same level as handicapped students in the State University System are funded.

Department of Education Rules. State Board of Education. 6A-10.28 Auxiliary Aid Assistance for Handicapped Students.

1) Funds appropriated in Item 271D of section 1 of Chapter 79-212, Laws of Florida, for auxiliary aid assistance for handicapped students attending a state university or a public
community college in Florida shall be distributed quarterly to participating institutions as reimbursement for eligible expenditures made by the institution pursuant to this rule.

2) Subject to the availability of funds appropriated for this purpose, a state university or a public community college shall be eligible to receive reimbursement of funds expended to purchase auxiliary aids as defined in subsection 84.44(d) C.F.R. needed by a student attending that institution who is handicapped within the definition of Section 504 of the Federal Rehabilitation Act of 1973, as amended, and who is not able to obtain the needed auxiliary aid assistance under state or federal vocational rehabilitation programs responsible for providing such assistance. Assistance provided under this rule shall be used solely for the provision of auxiliary aids as defined in subsection 84.44(d) of the federal regulations governing the Section 504 program of the federal Rehabilitation Act of 1973, as amended. The reimbursement of expenditures for each handicapped student shall not exceed five thousand five hundred dollars ($5,500) per academic year. The limitation of funds for reimbursement shall in no way obviate or alleviate the institution’s responsibility to provide any auxiliary aids required by subsection 84.44(d) C.F.R.

3) In the event that a beneficiary of auxiliary aid assistance transfers from one state university or public community college in Florida to another, the benefits provided under this rule shall be transferred upon approval of the Department of Education.

4) Any auxiliary aid equipment provided to a handicapped student under this rule shall be the property of the institution, and upon completion of the course or program for which the student is enrolled, must be returned to the institution from which it was obtained.

5) With approval of the Department of Education, two (2) or more institutions may pool equipment in order to better meet the needs of handicapped students.

6) Each institution wishing to receive reimbursement for funds expended pursuant to Rule 6A-10.28(2), FAC, shall submit to the Commissioner at the end of each quarter (September 30, December 31, March 31, and June 30) a report containing the following: (a) the name of each student provided auxiliary aid by the institution; (b) the nature of the student’s handicap; (c) each auxiliary aid purchased for and provided to the student; (d) the actual expenditure by the institution for each aid provided; (e) a certification that the student was unable to secure the required assistance for this aid from any of the state or federal vocational rehabilitation programs responsible for such assistance.

7) Each quarterly report shall show institution expenditures for each quarter of the fiscal year and the total expenditure for the year to date. If more than one (1) student is provided assistance, a report containing the information in category (6) above shall be submitted for each student, and a summary report shall be submitted listing total expenditures for which the institution is requesting reimbursement for all eligible students.
General Program

In 1992, Florida A&M University was ranked number one, ahead of Harvard University, in the enrollment of National Achievement Scholars—the most sought after students in the nation.

Florida A&M offers 66 bachelor's and 16 master's degrees, as well as Ph.D.'s in pharmaceutical sciences and engineering. The university has five $1 million Eminent Scholar Chairs in the schools of pharmacy, journalism, business and engineering. The Centel Foundation has pledged another $1 million for a sixth endowed chair, also in engineering.

Florida A&M is second among historically black colleges and universities in federal research and development funding. In 1989, a Florida A&M professor received his second patent for a new steroid to treat rheumatism, arthritis, hay fever and asthma, without side effects from prolonged use.

Florida A&M's Coleman Library was recently renovated at a cost of $6 million, adding 30,000 square feet of additional space. The 450,000-volume library has a state-of-the-art media center—the only one of its kind in Florida. The center features computer-equipped study carrels, a campus-wide closed-circuit television system, a teleconference center, graphic arts division and computer laboratory.

The world-famous Florida A&M "Marching 100" Band continues to receive national media coverage. In 1985, it became the first band outside of the Big 10 Conference to earn the Sousa Foundation's coveted Sudler Trophy. In 1989, the band represented the United States in the Bastille Day parade down the Champs Elysee in Paris, celebrating the 200th anniversary of the French Revolution. Recently, the band was selected to participate in the inauguration of President Bill Clinton in Washington, D.C.

The Florida Black Archives and Research Center and Museum, housed at Florida A&M, remains the nation's largest repository for African and African-American artifacts and papers.

Florida A&M is an equal employment and opportunity university and is committed to assuring that all persons are provided an equal opportunity to pursue employment and educational opportunities free from harassment and discrimination.

Publications

A pamphlet listing services for students with disabilities, as well as a student resource guide, is available to all students upon request to the Coordinator for Services and Programs for Students with Disabilities.

General Program

Florida Atlantic University, which offers 41 master's and 14 Ph.D. programs in nine colleges, has the state's only ocean engineering program, which ranks among the top three in the United States.

Florida Atlantic is home to the Holocaust Research Center, which chronicles the Holocaust from 1933 to 1945. The Center is part of Florida Atlantic's growing Judaic Collections Center—the second largest collection of its kind in the state. In 1990, the university announced the establishment of its 11th Eminent Scholar chair, the Raddock Family Chair for the Study of the Holocaust.

In 1991, long time Florida Atlantic benefactor Charles E. Schmidt donated $10 million to the university's arts and humanities program.

An interdisciplinary program in ethnic studies, focusing on the historical, social and cultural diversity of ethnic and minority groups in American Society, has been established at Florida Atlantic. The program highlights the experiences of African-Americans, Asian-Americans, Hispanics and Native Americans in contemporary American Society.

Dr. Robert Taylor, director of Florida Atlantic's School of Accounting was named 1990 Outstanding Educator by the Florida Institute of CPA's. Graduates of the Accounting School recently achieved the nation's highest first-time passing rate on the Uniform CPA Examinations.

The Karen Slattery Educational Research Center for Child Development provides a model educational environment to children aged two to five, and practical experience to Florida Atlantic education students doing internships, supervised teaching and research.

Plans are approved for a $65 million, 52-acre research park to attract research corporations to Florida Atlantic.

Two Broward based colleges have been established in Liberal Arts and Urban and Public Affairs. Former Florida Governor Reubin Askew joined Florida Atlantic Faculty as Distinguished Visiting Professor in the Urban and Public Affairs School.

Florida Atlantic strives to provide equal access to a quality education by providing reasonable accommodations to qualified individuals. Contact the Office for Disabled Student Services for assistance.

Publications

A pamphlet listing services for students with disabilities is available upon request to the Coordinator of Services and Programs for Students with Disabilities.

Admissions Procedures

Students with disabilities may, at their request, receive special admissions considerations based on their disability. Check question #27 on the SUS Application. Applicants who would like special considerations are encouraged to contact the Coordinator of Programs and Services for Students with Disabilities to obtain additional information.

Florida International University

General Program

For several years, Florida International University has been named as one of "America's Best Colleges" by U.S. News and World Report.

Founded in 1965 and opened to students in 1972, Florida International was the youngest university on the southern regional "Best Colleges" list. Florida International is one of the fastest-growing public university in the United States and the largest university in southern Florida. At the same time, academic standards have increased. Entering freshmen have grade point averages a full point over the national average and SAT scores more than 100 points above the national average.

The School of Public Affairs and Services has received a $206,000 grant from the United States Agency for International Development for a project to study and strengthen legislative bodies in Latin America. The school has joined the State University of New York in Albany and the Center for Democracy in Washington, D.C., to create the Consortium for Legislative Development.

Florida International's Latin American and Caribbean Center received a $375,000 grant from the Andrew Mellon Foundation to initiate a new Caribbean research and training program. The prestigious Mellon Grant is one of the largest grants ever given in the United States to further Caribbean studies. The United State Department of Education designated the Center a Natural Resource center--the only stand-alone undergraduate center in the country given this distinction.

The School of Journalism and Mass Communications received full accreditation on a unanimous vote from the National Accrediting Council on Education in Journalism and Mass Communications (ACEJMC). Approximately 90 of the 360 journalism and mass communications programs at American colleges and universities are fully ACEJMC accredited. ACEJMC officials particularly praised the quality of teaching in the Florida International Program.

Disabled Student Services counselors work with students on an individual basis to design a program to assist the student. Assistance may be in the form of notetakers, readers, sign language interpreters for classes, library or laboratory assistants, or adaptive equipment.

Publications

A guide book for students with disabilities and a pamphlet listing services for students with disabilities is available upon request to the Coordinator for Disabled Student Services.

Admissions Procedures

Contact the Coordinator of Disabled Student Services for information.

General Program

In 1991, Dr. Dale W. Lick became the 11th President of Florida State University.

Recognizing the diversity of Florida's population, Florida State adopted new curriculum requirements introducing students to cultures beyond the western civilization. Florida State is the first university in Florida to incorporate a multi-cultural element into its liberal-studies curriculum.

The Supercomputer Computations Research Institute received a new $10 million Cray Supercomputer capable of performing 1.3 billion calculations per second. SCRI also installed the world's most powerful Thinking Machines Supercomputer to apply parallel processing techniques to the growing data-intensive computing applications encountered in industry and science.

Florida State is home to the National High Magnetic Field Laboratory, the national center for research in magnet-related technologies. The laboratory welcomed Dr. J. Robert Schrieffer, winner of the 1972 Nobel Prize in Physics, to its staff. Dr. Schrieffer is the fifth Nobel Laureate to serve on the Florida State Faculty.

The university also received its largest private gift in 1991, an Ocala art museum's works of fine art and an endowment valued at $42 million from Mr. Arthur I. Appleton of Ocala. The gift includes funding of an Eminent Scholar Superchair in the arts.

A national pollster donated 15 years of survey research on southern politics, a collection valued at $6 million, to Florida State. The Florida State College of Communications opened the Tarrance Archives of Public Opinion Research with studies and interviews donated by the Houston survey research company, Tarrance and Associates.

Students in the School of Motion Picture, Television and Recording Arts won first prize in the college-level equivalent of television's "Emmy" awards. Florida State film school students have produced many award-winning films and video productions in national and international competitions.

The presence of a disability should not be an insurmountable handicap. At Florida State University there is a commitment to provide students with disabilities the most integrated and least restrictive educational and living environment possible. Services vary depending on individual needs.

Publications

A pamphlet listing services for students with disabilities is available on request to the Coordinator for Services and Programs for Students with Disabilities.

Admission Procedures

Students apply under the same circumstances as all other students. For information about admissions call (904) 644-6200.

General Program

*U.S. News and World Report* has ranked the University of Central Florida among the top dozen regional universities in the South in its annual guides to the nation’s best colleges and universities.

The University of Central Florida students consolidated their world-class computer programming reputation by capturing fifth place in the 15th Annual Association of Computing Machinery Scholastic Programming Competition in San Antonio, Texas. The competition put the University of Central Florida team ahead of teams from Ivy League and Nobel Laureate-laden state universities.

The University of Central Florida is the lead university in a consortium of Florida Universities supported by the Centers for Disease Control to develop ways to educate teachers on AIDS and the HIV Virus.

Two professors of the Mechanical Engineering and Aerospace Studies Department developed a laser process for shaping ceramic tiles used to protect space shuttles during landing.

The crystal growing laboratory of the Center for Research in Electro-Optics and Lasers developed capabilities equal to any in the United States. Among its achievements: technology to grow laser crystals that provide access to blue wavelength, undersea communication, and developing a simplified technique for growing laser material needed for uses ranging from communications to medicine.

Construction is nearing completion on an $8.6 million track and field house facility. Also under construction is a $6.7 million art complex which will include classrooms, a gallery and an auditorium. Site preparation began in 1990 for a new 90,000 square foot student union.

The University of Central Florida’s Student Disability Services can provide the following for students who have disabilities: information and orientation to campus facilities and services, assistance with registration for courses, assistance with classroom accommodations (including exam accommodations), The University of Central Florida disabled parking decals, counseling, referral to campus and community services. The assistance provided depends on student’s disability and needs.

Publications

An information sheet for services and programs for students with disabilities is available on request to the Director of Student Disability Services.

Admission Procedures

Apply for admission early. Applications for admission will be accepted up to one year in advance of the admission date. The university application for admission contains an optional question regarding disability if a student needs special consideration for admission. It is the student’s responsibility to contact the Office of Student Disability Services to receive services.

General Program

The University of Florida is the state's oldest university and one of the three most comprehensive universities in the nation for the diversity of its academic programs.

The university offers 114 majors and 52 undergraduate degree programs, 152 master's and 89 doctoral degree programs in 87 of the university's 137 academic departments. The University of Florida has nationally recognized programs in business administration, engineering, education and research, architecture, journalism, fine arts, law education, agriculture, forestry and arts and sciences.

The state standard for health care is set on the University of Florida campus with Shands Teaching Hospital. The outstanding Health Science Center houses the colleges of medicine, nursing, pharmacy and health-related professions and the state's only colleges of dentistry and veterinary medicine.

The Institute of Food and Agriculture Sciences, with Colleges of Agriculture and the School of Forestry and Conservation, cooperative extension service and agricultural experiment stations, help Florida's $45 billion agriculture industry compete in the world market.

The University's student body is culturally diverse, representing every state in the union and many foreign countries.

Fifty-five Eminent Scholar Chairs, each endowed with at least $1 million, enhance a faculty that includes Guggenheim and Danforth fellows, Fulbright and Rhodes Scholars, winners of the Kyoto and Pulitzer Prizes, and members of the National Academies and their foreign counterparts.

The University of Florida has become one of the 25 top research universities in the nation, with nearly $190 million in research grants in one year.

The University of Florida ranked fifth in the nation in income from royalties and licenses--including $2.2 million from the product "Gatorade" which was created at the University of Florida.

Any student with a documented disability is eligible for indirect and direct services. The University of Florida will work with students on an individual basis to provide the appropriate services as necessary for students to complete a degree. The University of Florida encourages questions and contact by students as early as possible in the college-seeking process.

Publication Information

Pamphlets listing overall services for students with disabilities, information on The University of Florida's taped textbook project and computer access project, an ADA/504 fact sheet, student handbook and faculty guide are available upon request.

Admission Procedures

Students with disabilities apply under general guidelines. Students are encouraged to explain areas in academic performance that may be questioned. If you wish special consideration, use question #27 on SUS application and attach a letter explaining how a specific disability impacted on academic performance.

General Program

Set on a series of wooded ridges interspersed with small lakes and streams, the University of North Florida provides a beautifully rustic setting for a comprehensive urban university. Its 12 miles of nature trails are the only such system on a United States college campus that have been designated National Recreational Trails.

More than 80 Jacksonville-area businesses are involved in direct partnership programs with the University of North Florida College of Business Administration. More than 80 percent of the students in the College of Business Administration are employees in area businesses, and more than 500 graduates are employed in Jacksonville’s banking industry alone. The College of Business Administration also offers a basic course, Foundations in Business, which is taught by leading professionals who have built successful businesses.

The university offers 42 undergraduate and 23 master’s programs. Twenty students were admitted in the Fall of 1990 to the university’s first doctoral program, an Ed.D. in Educational Leadership. A new Masters of Health Administration has also been added.

A $400,000 gift from the AT&T Foundation established the Alliance for Tomorrow’s Teachers Program in 1991, assisting the university in building one of the nation’s most innovative and outstanding programs in education.

Through the University of North Florida Volunteer Center, students have pledged thousands of hours in volunteer time to help the homeless, educate the illiterate and feed the hungry.

The University of North Florida enrolls more than 270 foreign students from over 90 countries. The university sponsored a three-day conference on “Culture and Democracy” funded by a grant from the National Endowment for the Humanities. It also hosted the 41st annual meeting of the Negro Educational Review.

Disabled Student Services counselors work with students on an individual basis to design a program to assist the student.

Assistance may be in the form of notetakers, readers, sign language interpreters for classes, library or laboratory assistants, or adaptive equipment.

General Program

The University of South Florida is the 32nd largest university in the nation and the second largest public university in Florida. The University of South Florida has 11 schools and colleges on five campuses, offering 88 undergraduate, 85 graduate, two specialist in education and 20 doctoral degrees, including medicine.

In 1992, The University of South Florida’s New College in Sarasota was ranked among Money’s top 10 college values for the third year in a row.

The Suncoast Area Teacher’s Training Program has been rated by the Educational Testing Service as one of the nation’s five most innovative teaching programs. The University of South Florida has also earned national recognition in marine science, fine arts and engineering.

The campus newspaper, The Oracle, was named the best all-around student daily in the nation by the Society of Professional Journalists. The Student Lecture Series won the coveted Drew Pearson Award for the most outstanding lecture series of any college or university in the United States.

The University of South Florida’s Graphic Studio is the only university art program in the nation to have its collection placed in the archives at the National Gallery of Art in Washington D.C.

Some of the most prestigious names in English theatrical circles served as visiting artists in the University of South Florida’s British International Theatre Program in early 1992.

A relationship between the University of South Florida and the United States Geological Survey has resulted in cooperative projects involving the University of South Florida graduate students and USGS scientists on wetlands, coastal and marine research. The Eminent Scholar Lecture Series, co-sponsored by the University of South Florida, USGS and the St. Petersburg Times, is attracting world-class scientists to share their research results with the university community.

Academic accommodations are provided and coordinated through the Disabled Student Academic Services Office. Determination of eligibility for services should be completed prior to the start of the semester. Students are encouraged to contact the Disabled Student Academic Services Office early in the application process. All programs outlined in the University of South Florida catalog as well as all campus organizations are open and available to qualified students with disabilities.

Publications

A pamphlet listing services for students with disabilities is available upon request.

Admissions Procedures

The University does not make pre-admission inquiries regarding a student’s disability. Students who do not claim a disability will be regularly admitted or denied. However, consideration of extenuating or special circumstances will be given in determining admission upon the receipt of documentation of a disability.

No Student organization currently available.
General Program

The University of West Florida's campus has been called "the most beautiful I have ever seen" by Time architecture critic Wolf Von Eckardt. The 1,000-acre nature preserve of rolling hills and woodlands borders the Escambia River. Its 300 acres of estuarine marshes enhance field and laboratory studies for biology students.

The University of West Florida has won the National Archeological Public Service Award for an archeological conservation and education project that became a model across the United States. The team found and developed a 2,000-year-old Indian village and a turn-of-the-century Creole settlement under a corporate headquarters construction site.

A University of West Florida volunteer service contributes thousands of hours and has earned special recognition from Volunteer Pensacola, a community organization which matches volunteers with local needs. The Center for Learning Through Organized Volunteer Efforts refers students to local agencies and co-sponsors programs to paint homes for elderly citizens and those with disabilities.

The University of West Florida offers a 12-week Summer Semester in Japan program at the University of West Florida Center in Kobe, Japan. Students take courses in Japanese language, culture history and international business.

The university provides equal access to educational opportunities to all qualified individuals with disabilities. The services that are provided for students with disabilities range from individualized aids in classroom testing to accessibility in programs, buildings, and activities. In addition to regular counseling services provided by the university, students may also be referred to the Office for Vocational Rehabilitation or to the Division of Blind Services for assistance.

Publications

A pamphlet listing services for students with disabilities is available upon request.

Admissions Procedures

Students who do not meet general admission requirements and have documented proof of visual impairment, hearing impairment, motor impairment, or specific learning disabilities may petition for substitution of admission requirements.

Ms. Barbara Fitzpatrick
Student Affairs
11000 University Parkway
Building 21, Room 138
Pensacola, FL 32514
The following scholarships are available to students with disabilities. They are designed to assist students with disabilities in acquiring a quality post-secondary education.

**Hodgman Memorial Scholarship**

The Jean Hodgman Memorial Scholarship annually awards one $1000 scholarship to any junior or senior at any accredited four-year institution. Students interested in obtaining application information must contact Pat Friel of SUN-UP Foundation at (407) 725-7115.

**Johnson Scholarship**

*State University System*

The Theodore R. and Vivian M. Johnson Scholarship Program, established by the Theodore R. and V. M. Johnson Foundation, is designed to assist undergraduate students with disabling conditions who attend any of the nine institutions within the State University System of Florida. The amount of each scholarship is $2,000 for an academic year, and may be used to cover the cost of tuition, fees, room and board, books, and auxiliary aids such as notetakers, tutors, etc. Scholarships are renewable for a maximum of twelve semesters provided that the recipient makes satisfactory academic progress toward a degree and meets minimum performance requirements. Award recipients must enroll for a minimum of nine credit hours each semester. Scholarships are based on documented severity of a disabling condition and demonstrated financial need.

Applications for the Johnson Scholarship are available in February. Students interested in obtaining application materials should contact the Coordinator for Programs and Services for Students with Disabilities or the Financial Aid Office at any State University institution.

**Iacona Memorial Scholarship**

*Florida Atlantic University*

The Matthew Iacona Memorial Scholarship Fund was established by the Palm Beach County Epilepsy Foundation for students enrolled in undergraduate or graduate programs in Exceptional Student Education at Florida Atlantic University and who demonstrate financial need. For more information, interested students should contact the Office of Student Financial Aid at (305) 367-3530.
The Gore Foundation Scholarship was established for students with disabilities who need financial assistance to continue their education. Students interested in obtaining application information must contact the Gore Foundation directly at (305) 462-6643.

AFTER Scholarship Florida Atlantic University

Scholarships are available through the Amputees For Training Education Rehabilitation organization for disabled students needing financial assistance for educational costs. AFTER can be reached at (305) 421-7711.

The Rita McTigue O'Connell Memorial Scholarship annually awards two $1,000 scholarships to currently registered female students who have a physical disability. Scholarships are based on academic performance and involvement in university activities. This is not a need-based scholarship, and it is highly competitive. The application process begins January of each year and is completed in March. Students must be registered with the Office for Student Services. For more information call (904) 392-1261.

The Eccleston Callahan Memorial Trust annually awards two $500 scholarships to currently registered students with a disability. This is a financial need-based award. Students must be registered with the Student Financial Affairs Department. Call (904) 392-1275 for more information.

Contact the Coordinator for Programs and Services for Students With Disabilities at the University of North Florida for more information.
Division of Vocational Rehabilitation

Vocational Rehabilitation (VR) is a division within the Florida Department of Labor and Employment Security (LES). Rehabilitation Services are important when a physical or mental handicap interferes with your ability to work. VR’s purpose is to help you prepare for, find and return to gainful employment.

Eligibility is determined by a VR Counselor after obtaining a complete understanding of the applicant’s situation. Three things are important in determining eligibility for VR:

1. The applicant must have a physical, mental or emotional disability;
2. That disability must prevent the applicant from getting or keeping a job; and
3. The applicant must benefit from VR services in terms of employability.

For more information, contact:
Division of Vocational Rehabilitation
1709 A Mahan Drive
Tallahassee, FL 32399-0696
V (904) 488-8380
Suncom 278-8380
FAX (904) 488-8062
TDD (904) 922-2246

Division of Blind Services

Persons who are visually handicapped, blind or threatened with blindness are eligible for services. Basically, services are divided into two categories: (1) vocational rehabilitation services for potentially employable blind persons, and (2) medical, social, and rehabilitative services for blind children and other adults.

Eligibility is determined by a VR Counselor after obtaining a complete understanding of the applicant’s situation. Three things are important in determining eligibility for VR:

1. The applicant must have a physical, mental or emotional disability;
2. That disability must prevent the applicant from getting or keeping a job; and
3. The applicant must benefit from VR services in terms of employability.

For more information, contact:
Division of Blind Services
Douglass Building, Suite 203
2540 Executive Center Cir. W.
Tallahassee, FL 32301
(904) 488-1330

Advocacy Center for Persons with Disabilities

Client Assistance Program

The purpose of the Client Assistance Program is to assist individual applicants or clients with their relationships with programs, projects and facilities, funded under the Rehabilitation Act of 1973. Generally, this is accomplished by assisting clients and applicants of the Division of Blind Services. We can provide information and referral services, as well as consultation and advice, mediation, negotiation, and informal and formal representation, on vocational rehabilitation issues.

For more information, contact:
Division of Blind Services
Library for the Blind and Physically Handicapped
420 Platt Street
P.O. Box 2299
Daytona Beach, FL 32015
(904) 254-3824
(800) 342-5627

Library for the Blind and Physically Handicapped

This library provides free service to individuals who are unable to utilize conventional print because of a physical condition. Reading material available includes over 20,000 titles recorded on disc and cassette tape, and several thousand titles in Braille. Users are furnished, without charge, specially designed phonographs and cassette tape players.
