This guide identifies sources of funding for purchasing assistive technology for people with disabilities. It outlines eligibility requirements, specifies which devices can be obtained from which sources of funding, and discusses how to effectively approach the funding process. It begins by defining assistive technology categories, describing the Utah Assistive Technology Program, and identifying types of Utah funding sources. Steps in applying for funding are detailed, and the appeals process is explained. A directory of Utah funding agencies is then presented, including: Blue Cross/Blue Shield, Division of Services for People with Disabilities, Division of Aging and Adult Services, Utah Easter Seal Society, Department of Health, Independent Living Program, Medicaid, Medicare, Muscular Dystrophy Association, Special Education, United Cerebral Palsy Association, Vocational Rehabilitation Services, and Industrial Commission of Utah. For each agency, the following information is provided: contact person; address and telephone number; eligibility criteria; appeals process; unique considerations; and areas of coverage (such as ambulation, seating and posturing, bedroom aids, and communication). Introduction

Nearly 80,000 people with disabilities that range from moderate to severe live in Utah. Virtually all people with disabilities can benefit or have already benefited from technological advances. Technology that is used to improve functional capabilities of people with disabilities is referred to as "assistive technology" and can range from a cane to a motorized wheelchair, from a handheld calculator to a computer.

Advances in assistive technology have occurred so rapidly during the last 15 years that it has become difficult to find current information on what devices are available, where they can be obtained, how they are used, and how they can be purchased. The Technology-Related Assistance for Individuals with Disabilities Act was passed in 1988 to help consumers find information and obtain assistive technology devices and services. Funding from the "Tech Act" allowed states to plan, coordinate, and develop state-wide consumer responsive information and training systems and services designed to meet the assistive technology needs of individuals with disabilities. Assistive technology can help maintain independence, increase productivity, and add choices and dignity to the lives of people with disabilities.

The most crucial barrier: Funding

There is little doubt that the single most crucial barrier in obtaining assistive technology is the availability of funding. State service systems like the Departments of Health, Public Education, Vocational Rehabilitation, and Social Services were established years before most of today's technology was ever developed. Consequently, providing people with assistive technology was not part of their programs.

Regulations seldom mention assistive technology. The services that are provided do not include assistive technology, and staff in many service agencies may have little familiarity with the benefits of what is available and knowledge of how it can be obtained. Only in the last few years has this been changing. The transition has brought its own set of problems such as uncertainty in what should or should not be paid for, new definitions of eligibility, and changing regulations.

How this guide can help

The information presented in this guide is designed to help people with disabilities, families, advocates, and providers identify sources of funding for purchasing assistive technology. This guide outlines the eligibility requirements that apply at this time, which devices can be obtained from various
sources of funding, and how to effectively approach the funding process. This
guide should not only make the funding maze easier to unravel, but more
importantly, it should ensure that consumers successfully acquire the assistive
technology devices or services they need.
Assistive Technology

Assistive Technology Categories

Assistive technology refers to any type of device or service that is used to increase, maintain, or improve functional capabilities of people with disabilities. Assistive technology is more than just a device; it also includes evaluation, fitting, adapting, training, maintenance and repair. For the purposes of this guide, assistive technology is classified into the following broad categories:

- **Ambulation**: Devices that aid walking, including canes, crutches and walkers.

- **Mobility**: Devices that increase mobility, including all types of wheelchairs, transfer aids, three-wheel scooters, and patient lifts.

- **Seating and posturing**: Devices and services that include modifications to wheelchairs or other seating systems to provide greater stability, trunk/head support, upright posture and skin surface pressure reduction.

- **Bedroom Aids**: Devices that make bedroom functioning easier, including manual and electric beds, side rails and transfer equipment.

- **Environment**: Devices that improve or control the environment, including air cleaners, appliance adapters, electronic aids, personal alert alarms or security systems in both the home and work environment.

- **Architectural Modifications**: Structural adaptations that remove or reduce physical barriers, fabrications in the home, worksite or other areas, including ramps, lifts, bathroom changes.

- **Communication**: Electronic and non-electronic devices that provide a means for communication, including hearing aids, low vision aids, communication boards, and computer technology.

- **Transportation**: Adaptive driving aids, hand controls, car top carriers, modified vans or other motor vehicles used for personal transportation.

- **Recreation**: Aids or adaptations to sports equipment that enable people with disabilities to participate in recreational activities.

- **Educational/Vocational Aids**: Equipment that enables people with disabilities to complete school or work-related activities. This includes computer software or systems that enable persons with disabilities to use a computer and/or other job modifications.
The Utah Assistive Technology Program

The mission of the Utah Assistive Technology Program is to increase the availability, use and maintenance of assistive technology for people of all ages with all types of disabilities. Assistive technology can help them enrich their lives, gain independence, increase productivity and pursue opportunities to the fullest extent of their abilities. To do this, the Utah Assistive Technology Program has focused on providing information to consumers and providers about assistive technology, including where and how it can be obtained and financed. Project staff are working with state service systems to change regulations and procedures and increase staff expertise to improve the likelihood that persons with disabilities can obtain and maintain the technology they need.

One of the primary purposes of the Utah Assistive Technology Program is to expand the sources of funding and reduce the barriers in obtaining funding for the purchase and maintenance of assistive technology. The purpose of this Funding Guide is to help readers better understand which assistive technology...
devices and services they can expect to be funded from service programs. The guide includes eligibility requirements and ways of enhancing the probability that applications for assistive technology will be approved for funding so that consumers will receive the assistive technology they want and need.

Possible Funding Sources in Utah

Medicaid and Medicare

Perhaps the largest source of public funding to assist persons with disabilities is Medicaid and Medicare. Even though the regulations of these programs do not mention assistive technology, certain assistive devices can be purchased through these programs. Medicaid and Medicare consider assistive technology to be "durable medical equipment" (DME). DME has the following general criteria: "Can stand repeated use, primarily and customarily used to serve a medical purpose, generally not useful in the absence of illness or injury and appropriate for use in the patients home."

Medicaid and Medicare are most likely to cover durable medical equipment. Devices that are considered essential, such as basic primary medical equipment, including manual wheelchairs, and supplies and services such as oxygen, are covered. Items such as communication devices have been covered when medical necessity is established, such as when children cannot communicate.
their medical needs to their physician or emergency personnel without it. It is important to note that medical terminology such as "speech prosthesis" and "patient" rather than "client" or "student" should be used in the application. A physician's prescription usually is required for funding.

The regulations of Medicaid and Medicare vary between states. Even though Federal code includes provision for payment of electric wheelchairs, in Utah electric wheelchairs are rarely covered by Medicaid. Reasons given for not covering electric wheelchairs in Utah are that they are seen as a "convenience item" and incur "excessive expense." Medicaid also will not cover any device or service unless medical necessity is demonstrated. Computers are usually considered educational devices and are not considered for medical purposes.

Most daily living items such as bathroom lifts are usually denied as "non-essential." Daily living items and those that assist with an individual's care are hard to define and do not have the Medicaid codes required for funding. Medicaid and Medicare list specifically what items are covered. If an assistive device does not fit in one of the predetermined, fixed codes it will most likely not be funded. This is often a problem since there are not specific codes for many assistive devices. Under Medicaid, equipment cannot be customized, and used equipment is not funded. Medicaid requires prior authorization on most items, whereas Medicare will usually not give prior authorization. The consumer must purchase the item first and then submit the bill before a determination is made by Medicare.
Inspection
Insurance companies usually have similar guidelines to Medicaid and Medicare for durable medical equipment. Insurance companies are most likely to cover durable medical equipment: however, more flexibility is possible than with Medicaid or Medicare because a medical examiner will look at unusual situations and make a determination. Medical necessity should be justified, a physician's prescription should be included, and medical terminology should be used in insurance applications for funding.

Special Education
Special Education programs provide some funding for those children who are receiving special education to address their educational needs. A student's need for assistive technology must be considered on a case-by-case basis in connection with the development of the child's individualized education program (IEP) or individualized family service plan (IFSP). The IEP/IFSP team may determine that assistive technology is needed in special education as a related service or as supplementary to the regular classroom. If determined to be necessary for the student to receive a free appropriate public education, assistive technology devices and services including evaluation, fitting, adapting, training, maintenance and repair, must be provided by the school at no expense to the student's family.

Children's Special Health Services
Children’s Special Health Services provides evaluations and health services to qualified children with disabilities and provides a limited amount of funding for a variety of items. Because of budget constraints, Children’s Special Health Services has not authorized payment for wheelchairs, infusion pumps, ventilators, apnea monitors, communication boards or experimental items.

Vocational Rehabilitation
Vocational Rehabilitation Services purchases equipment that can be shown to be necessary for vocational training or job placement. Vocational Rehabilitation Services is not likely to purchase equipment not directly related to a client’s success in a vocational training program or job.

Independent Living Programs
Independent Living Programs pay for devices that allow a consumer to become independent or maintain independence but is least likely to fund physical restoration services and devices like physical therapy, prosthetics or surgery.
Unfilled Requests

Because of budget constraints, State service programs often restrict the types of devices they will pay for and have rather stringent eligibility criteria. These techniques are used for cost containment and to ensure that the devices that are purchased are consistent with the purpose of the organization. Perhaps the most common reason for a request to purchase assistive technology being denied is due to insufficient funds. Funding has not been able to keep pace with rapid advances in technology, nor is there a system to identify pieces of equipment that are no longer useful. It is sometimes more difficult for funding sources to perceive the benefits or potential benefits of how the requested device will help a person with a severe disability. It is the consumer or the provider requesting the device that must be ready to supply the information on benefits to be derived from assistive technology.

Increasing Funding Awareness

Increasing awareness is important for positively impacting the number of unfilled requests for funding. Consumers and providers should educate various agency personnel about community services and other programs that are available. Also, they should help insurance companies and other funding
sources understand the need for assistive technology devices and services. But awareness of programs does not help if money is not available to provide the devices or services. Lack of money in either governmental or non-governmental organizations to purchase and provide equipment and devices is an ongoing problem. Utah has formed the Legislative Coalition for People with Disabilities at (801) 531-0522 to help with this problem. You can help by lobbying the legislature so that state legislators understand the value of and need for assistive technology.

Application Steps

Often, requests for funding are denied because of a lack of information or necessary documents in the original application. Following are four steps that can help increase the probability of receiving approval for your request.

1. **Determine the best possible funding agency.** The best agency for funding is determined by each person’s specific need, age, financial status, and disability. Each agency specifies what devices are funded. To qualify for eligibility for many agencies such as Medicaid, Vocational Rehabilitation, Special Education, Independent Living, Social Security Insurance and Medicare, the disability must impact a major life activity such as walking, working or communicating.

   Some agencies only serve individuals diagnosed with specific disabilities. For example, the Muscular Dystrophy Association helps those individuals diagnosed with Muscular Dystrophy. Some agencies only fund needs for children, and some only fund needs for the elderly. Each person must determine the agency that will most likely cover his or her disability and assistive technology need. More than one funding source should be identified in case the first-choice agency denies funding.

2. **Use the right phrases and words that justify medical necessity and/or essential need to get approval.** Terminology can make the difference between success and failure. Proof of medical necessity must be in the request for Medicaid and most insurances. Vocational Rehabilitation Counselors must be convinced a particular device will make a person with a disability employable. For special education, the justification should provide evidence that a device or service would enable a child to be placed in a regular classroom environment or that a child needs the services to benefit from special education.

   The funding source must fully understand the device with the justification clearly documented. Letters should use specific policy language for medical necessity. Also, include letters that justify medical necessity from as many
FUNDING GUIDE FOR ASSISTIVE TECHNOLOGY IN UTAH

sources as possible - doctors, therapists, teachers, etc. Descriptive literature on the device may also be helpful. Photographs and videotapes of the client are also a good idea.

Never call first with a funding request. It is more difficult to undo a denial than to get approval. But if your application is denied, don't get discouraged: You can apply for funding from a different agency and/or file an appeal with the agency that denied funding.

3. **File an appeal with the appropriate agency.** If your original request for funding is denied, do not give up hope of receiving funding. Consumers should specifically question why their request for funding was denied. Find out if the denial was based on Federal or State law, insurance policy language, or simply local common practices or custom. States must comply with Federal law; State policies can be expanded through advocacy, and current practices can usually be changed through the director or supervisor.

   Ask for a written statement of denial, including the specific reference in law, regulation or the insurance policy provision the denial is based on. Get a copy of the law, regulation or policy. Consumers should get a copy of the insurance policy to determine if the denial is based on written insurance policy. If the policy is not in writing, ask the head person to describe the practice in writing for your records.

   Determine if the request is denied because of lack of funds or lack of information. Submit any additional information directly to the person handling your case. If necessary, go through the appeals process. In Utah, the State

---

**Application Steps**

1. Determine the best funding agency.
2. Compile the necessary documents and apply.
3. File an appeal if funding is denied.
4. Be aware of other funding sources.

Above: The sequence of steps in applying for assistive technology.

Right: Brian reads the daily newspaper on a print enlarger.

---

---

---

---

---

---
Attorney General’s Office has an Assistant Attorney General who works specifically with human services cases. It may be helpful to talk with the Chief Executive Officer of the insurance company and also to the State Insurance Commission to resolve difficulties.

4. Be aware of other funding sources. Even if your original request for funding is denied, other agencies might be able to provide funding. File another funding application with a different agency. Possible sources include Independent Living Centers, Easter Seals, Division of Social Services, United Cerebral Palsy, Muscular Dystrophy, a religious group the person with the disability is affiliated with, and donations from companies, corporations, or service clubs.

Trying to obtain funding for assistive technology can be an overwhelming task because of the amount of paperwork and procedures that must be used and followed. It also can be confusing because each agency has unique funding criteria. The next section contains a list of major funding sources and the types of services those agencies provide. The checklist on the next page will help define which agency offers funding for specific age groups. Once possible funding agencies are determined, contact that agency for specific eligibility requirements and application forms. Some addresses and phone numbers can be obtained in the directory, the last half of this Funding Guide. If you cannot find a particular agency in the back of this guide, look for that agency in your local telephone book. If you have trouble finding the information you are looking for, contact the Utah Access Network at 1-800-333-UTAH.

Sue uses an IBM PhoneCommunicator on her computer at work to make and receive telephone calls.
Major Funding Sources

**Medicare:** Federal program responsible for purchasing medically necessary products and services for eligible beneficiaries

**Medicaid:** Federal/State program intended to meet basic health care needs of people with low incomes

**Vocational Rehabilitation:** Federal/State program that provides vocational, independent living, supported employment services for citizens with disabilities

**Special Education:** Federal law requires that all children with disabilities receive a free appropriate education. Special education services are available on the basis of need

**Private Insurance Companies:** Health insurance, liability insurance, long-term disability insurance, no-fault automobile insurance

**Workers' Compensation:** Employers insurance required by law to cover employee injuries or accidents

**Veterans Administration:** Federal agency provides medical assistance and some devices to service men and women

**Independent Living Centers:** Non-profit organization that provides support, evaluation, services, and devices

**Division of Services for People with Disabilities:** State agency that provides primarily residential support services, training programs, and personal assistance services

**Children's Special Health Services:** State agency that provides evaluation and health services to children with disabilities

**Utah Easter Seal Society:** Charitable organization that provides services to all disabilities, all ages, statewide

**March of Dimes:** Charitable organization that assists people with polio and birth defects

**United Cerebral Palsy Association:** Non-profit organization that provides services to persons with cerebral palsy

**Muscular Dystrophy Association:** Non-profit organization established for medical research, which provides assistance to families and persons with muscular dystrophy
FUNDING GUIDE FOR ASSISTIVE TECHNOLOGY IN UTAH

Service Clubs: Local civic organizations such as Lions, Kiwanis, Elks & Rotary Clubs

State Library for the Blind and Physically Handicapped: National/State program provides free services to adults unable to read or use standard printed material

Utah Early Intervention Program: Federal/State program for children from birth to age 3 with developmental delays

Chapter I: Federal/State program for disadvantaged children administered through the school system

Head Start: Federal/State program for disadvantaged preschool children and families that meet qualification guidelines

Services for the Visually Impaired: Federal/State program administered through the State Division of Rehabilitation Services

Services for the Deaf and Hearing Impaired: Federal/State program administered through the State Division of Rehabilitation Services.

State School for the Deaf and Blind: State sponsored school for students who are deaf, blind, or visually impaired

Supported Employment: Federal/State program administered by the Division of Services for People with Disabilities providing employment opportunities for individuals with disabilities

Job Training Partnership Act (JTPA): Federal/State program administered through the State Office of Education designed to provide training opportunities for disadvantaged students and students with disabilities.

Division of Aging and Adult Services: Federal/State program designed to meet the needs of the elderly

Social Security Insurance (SSI): Federal social assistance program that assists those individuals who are not working for various reasons

Social Security Disability Insurance (SSDI): Federal social assistance program that provides funds for individuals who have a disability that prevents them from working
## Possible Funding Sources for Individuals with Disabilities in Utah

- SSDI
Filing Appeals

If a request for assistance is denied, it is important to know that consumers have a right to file an appeal with most agencies. The following section lists possible funding sources, their addresses and/or phone numbers and briefly denotes each agency’s process for appeal. Because agencies vary regarding the time allowed following a decision to file an appeal, contact the appropriate agency immediately for specific information on its appeals process.

Medicaid

Rights of Appeal - Reconsideration: Within twenty (20) days after the date of the final agency action is issued you may file a written request for reconsideration by mailing your request to the following:

Division of Health Care Financing, Director
P.O. Box 16580
Salt Lake City, Utah 84116-0580.
Telephone: (801) 538-6155 (SLC) or toll free 1-800-662-9651

You MUST by law include specific reasons in order for your request to be considered (Utah Code Section 63-466-13). Court of Appeals: Within thirty (30) days after the date of the final agency action OR denial of reconsideration, you may file a petition with the Utah State Court of Appeals. The original petition goes to:

Court of Appeals
230 South 500 East
Salt Lake City, Utah 84102
Telephone: (801) 533-6800

You MUST serve a copy of your petition to the Director of Health Care Financing. It may be mailed to P.O. Box 16580, SLC. UT 84116-0580. It MUST state the specific reasons for the appeal (Utah Code Sections 63-466-14(3) and 63-46b-16, 17 & 18).

Special Education

The student’s Individual Education Program (IEP) team, including the local school principal, should be contacted. If satisfaction is not reached at this level, the local school district Director of Special Education should be contacted. The next step is to contact the local school district Superintendent. Consult your local telephone book for school district numbers.
Insurance

The first step is to review the grievance procedure outlined in your insurance policy. After following this procedure, if you still feel you have been treated unfairly, you can contact:

Utah State Department of Insurance
Consumer Services Division
3110 State Office Building
Salt Lake City, Utah 84114
Telephone: (801) 538-3805

Utah State Office of Rehabilitation
Vocational Rehabilitation and Independent Living Services

An appeals process is available to remedy dissatisfaction with decisions made regarding application, eligibility or provisions of services for consumers of Vocational Rehabilitation (VR) and Independent Living Services (IL).

A consumer should first seek recourse through the VR or IL counselor, then the Vocational Rehabilitation and Independent Living Program Directors. If satisfaction is not reached at either level, the decision can then be appealed through the Client Assistance Program (CAP).

If the appeals process ultimately results in a Fair Hearing, the appeal will be heard by an independent hearing officer without ties to VR, IL, or CAP. Information about the appeals process will be given at the time of application and at any other time, if needed.

A appointment can be scheduled with your counselor to discuss any problems or grievance. If dissatisfied with the efforts of your counselor, a request can be filed for a supervisory review of your case.

You may also contact CAP if you are not satisfied with the vocational or independent living program services you are receiving. Assistance in understanding your rights as a VR or IL consumer is available through:

The Client Assistance Program
455 East 400 South, Suite 200
Salt Lake City, Utah 84111
(801) 363-1347 (voice or TDD) or
1-800-662-9080
Department of Health

Any decision made by an employee of the Family Health Services Division can be appealed to that employee’s immediate supervisor, up to the Division Director. In order to begin the appeals procedure an individual may:

1. Contact the Family Health Services Division employee with whom the individual has been working.
2. Contact the employee's immediate supervisor, or
3. Contact the Assistant Director of the Family Health Services Division for assistance at (801) 538-6161.

It is the responsibility of every employee of the Family Health Services Division to assist any consumer or anyone affected by a decision in the appeal. All appeals should be in writing. If an individual wishes, he or she may take the appeal immediately to any level including Bureau Director or the Division Director.

If the individual is not satisfied with the decision rendered, the appeal may be made directly to the Director of the Department of Health at the following address:

288 North 1460 West
Salt Lake City, Utah 84116
(801) 538-6111

Industrial Commission

(Workers' Compensation)

Hearings: If you have a problem that cannot be resolved with your employer or the insurance company, you may request a hearing.

Forms that initiate a hearing can be obtained from:

The Industrial Commission
P.O. Box 510250
160 East 300 South
Salt Lake City, Utah 84151-0250
Telephone: (801) 530-6800

At the hearing, you and/or your attorney will present your side of the story. Upon the basis of all available evidence, a legal decision will be made by the Industrial Commission. Either party may appeal the decision to the Utah Court of Appeals. It is recommended that if you apply for a hearing, you should
consider being represented by an attorney whose fees will be paid out of the award that might be granted.

Department of Human Services
Division of Services for People with Disabilities

An individual must request a hearing within 30 days of the effective date of the action being appealed. The request for a hearing must be received within 10 days of the notice if services are to be continued during the hearing process. The Office of Social Services (OSS) worker should be contacted.

In order to provide equal opportunity and to ensure due process, a person with a disability has the right to proper notice to present grievances or to resolve questions about eligibility through a hearing. An informal process should first be utilized by the person with the disability and other interested parties, but the individual has the right to a hearing before the Department of Human Services hearing examiner if the action cannot be resolved informally at the Regional or Division level.

A. Informal Process

The OSS staff (the individual's case manager) will do the following:

1. Explain the regulations on which the action is based and attempt to resolve the disagreement.

2. Suggest the problem be discussed with the OSS Regional Supervisor, Associate Director or Regional Director. If the individual is not satisfied with the associate director or regional director, the individual may request a review by the division director.

3. Give the individual a Form 490-S (a Hearing Request) if the individual is not satisfied with the action after the regional director or division director meets with the individual or if, at any time, the individual insists on a hearing.

B. Formal Process

A form 490-S (obtained from the individual's OSS Case Manager) must be filed within 90 days of a Department decision on action. Mail to the following:

Department of Human Services
Hearing Examiner
P.O. Box 45500
Salt Lake City, Utah 84145-0500
*If an individual wishes to continue to receive services during the hearing process, the individual must request the hearing within 10 days of the notice. If the individual loses the hearing, the individual will have to repay the cost of services provided during the hearing process.

**Division of Aging and Adult Services**

The district mails Form 490-S. Hearing Rights with Form 522. Notice of Decision, whenever an application is denied services or service payments are reduced or terminated. The client must request a hearing in writing within 30 days of effective date of the action being appealed. The request for a hearing must be received within 10 days of the notice if services are to be continued during the hearing process. The request for a hearing must be in writing, and Form 490-S Hearing Rights should be used for this purpose. If a client makes a verbal request for a hearing, the worker must help the client complete Form 490-S.

**Medicare**

All appeals should be put in writing, which can be a simple hand-written statement.

**Part A - Hospital In-patient**

Contact: Utah Peer Organization (UPRO) for quality of care and accuracy of billing while in the hospital.

675 East 2100 South, #270  
Salt Lake City, Utah 84106  
(801) 487-2290

**Part B - Out-Patient Hospital**

Ambulatory Surgical Services - Contact UPRO at address above. All Other Out-Patient Services, contact:

Blue Cross/Blue Shield of Utah

Agency Name

Utah Department of Health
Family Health Services Division
Children’s Special Health Services

Contact

Main Office (in Salt Lake City) (801) 538-6165
Provo (801) 379-8754
Ogden (801) 625-3645

Address: Children’s Special Health Services
P.O. Box 16650
Salt Lake City, Utah 84116

Also, contact your local Health Department.

Eligibility Criteria

Age Served: 0 through 17 years old
Types of Disabilities Served: Physical and Developmental

Persons must have a suspected or identified chronic illness or disability.

Financial Criteria

Services for those who meet financial eligibility criteria are provided at no cost to the client. For others, fees are based on a sliding scale.

Appeals Process

Appeals begins with the Bureau Director and then go to the division director. Any decisions or actions may be appealed at any time to an individual employee, their supervisor, the program director, the bureau director, or up to the division director.

Unique Considerations

The specific need must result from a health-related condition.

### Notes & Information

\(^1\)Only in limited cases.

\(^2\)Some equipment is available for loan.
Independent Living Program
Rehabilitation Services

Agency Name
Utah State Office of Rehabilitation
Independent Living Program

Contact
Independent Living Program
(801) 538-7548
Utah State Office of Rehabilitation
250 East 500 South
Salt Lake City, Utah 84111

Locations and telephone numbers of Independent Living Centers are as follows:
Logan (801) 753-5353
Price (801) 637-4950
St. George (801) 673-7501
Salt Lake City (801) 359-2457

Eligibility Criteria
Age Served: All ages
Types of Disabilities Served: All types of severe disabilities

Individuals must have a severe disability that significantly impacts a major life activity. A reasonable expectation that service will significantly increase the individual's independence must exist.

Planning and Service Delivery
Following a determination of eligibility, an Individualized Written Rehabilitation Program (IWRP) is jointly developed between the IL counselor and consumer. Specific services are then outlined, agreed upon, and delivered.

Financial Criteria
There is a financial needs test that is mandated by the State Legislature to determine the extent, if any, the individual would participate in the cost of Vocational Rehabilitation Services. For specific details, call one of the contact numbers listed above.

Appeals Process
Appeals process is listed in this document in the appeals section.

Unique Considerations
Assistive Technology Coordinators can help with selecting, obtaining, and maintaining assistive technology devices and services.

Medicaid

Agency Name
Medicaid

Contact Person
Constituent Service Specialist (801) 538-3989 (In Salt Lake City)
120 North 200 West 1-800-662-3722
Salt Lake City, Utah 84113

Eligibility Criteria

Age Served: All ages
Types of Disabilities Served: Varies

Individuals and families meeting the following criteria may be eligible for Medicaid: (A) United States resident, (B) Utah resident, and (C) specific income criteria such as categorically or medically needy.

Financial Criteria

Certain poverty income guidelines are established. Some income is excluded when determining eligibility except for pregnant women and children under age 6 with family incomes under 133 percent of poverty. Total countable assets must be under $2,000 for a single person household or under $3,000 for couples. For each additional household member, the asset limit is increased by $25. (Note: There is no asset test for pregnant women and children under age 6 with family income under 133 percent of poverty.)

Appeals Process

"Appeal Rights" papers will be enclosed with results of the original hearing for services. Also, enclosed will be a "Request for Hearing/Action" paper. Contact the Hearing Officer for information on appeals at (801) 538-6157.

Unique Considerations

Medicaid is an entitlement program. To attain eligibility, an individual must fit within at least one of many different Medicaid categorical groupings and meet a variety of financial and nonfinancial requirements.

Medicare

Agency Name

Medicare

Contact Person

If you are seeking information on new benefits or on benefits you are currently receiving call 1-800-426-3477 (in Salt Lake City call 481-6196). For hospital claims (Medicare Part A), you can dial direct by calling (801)487-6441. If you are a provider, physician, or a supplier call (801)481-6195.

Main Office Address: Medicare
2455 Parley's Way
Salt Lake City, Utah 84130

Eligibility Criteria

Age Served: 65 & older
Types of Disabilities Served: Varies

Contact your local Social Security Office for entitlement before contacting Medicare. Persons either must be 65 or one of the following: (1) eligible for any type of monthly Social Security benefits, (2) the spouse of an insured person entitled to monthly Social Security benefits, or (3) the widow or widower of a retiree or insured worker covered long enough by Social Security at the time of death or a government employee or retiree with enough Medicare qualified government employment. Individuals with developmental disabilities from birth to age 21 also may be eligible.

Financial Criteria

Part A is paid by the payroll taxes employees and employers pay. Part B provides additional coverage and requires an additional premium to be paid.

Appeals Process

Write a simple statement of complaint or dissatisfaction, requesting a review of the claim, and call contact numbers listed above.

Unique Considerations

Contact Social Security administration to apply for benefits about 3 months before age 65. If hospitalized, it is still possible to receive benefits if application is made with 6 months. Part B, the optional portion that must be paid with additional money, may be dropped at any time but can only be acquired during a limited time.

Age Served: All ages
Types of Disabilities Served: 40 neuromuscular disorders, including muscular dystrophies, motor neuron diseases, inflammatory myopathies, diseases of the neuromuscular junction, metabolic diseases of muscle, and other myopathies. Myopathies include ALS, spinal muscular atrophies, and Myasthenia Gravis as well as others. Contact the agency for names of other specific disorders served.

Persons must be seen by a Muscular Dystrophy Association clinic physician.

Financial Criteria

Payment scale based on income.

Appeals Process

None.

Unique Considerations

The Muscular Dystrophy Association (MDA) offers a diagnostic clinic free of charge, where if a person is diagnosed with one of the disorders MDA covers, clients can return for free testing and exams. MDA provides leg braces and other orthopedic equipment. It also provides repair and maintenance of orthopedic devices, braces, and wheelchairs.

The MDA offers support for occupational and physical therapy and sponsors a summer camp program for MD patients.

3. MDA Summer Camp
Special Education

Agency Name

Special Education

Contact Person

Local School District Director of Special Education
or the local school Principal

Eligibility Criteria

Age Served: 3 through 21 years old
Types of Disabilities Served: Those disabilities that affect mobility, communication, and learning.

Eligibility determination and classification of the student must be made by a multidisciplinary team or group of qualified professionals.

Financial Criteria

None.

Appeals Process

Appeals begin with the school principal, next they go to the Director of Special Education, and last they go to the Superintendent.

Unique Considerations

The need must be educationally relevant and must be contained in the student's current Individual Education Program (IEP). Parents may request that assistive technology be considered as part of their child's IEP.

### Notes & Information
Vocational Rehabilitation Services

Agency Name
Utah State Office of Rehabilitation
Division of Rehabilitation Services
Division of Services for the Visually Handicapped

Contact
Utah State Office of Rehabilitation (801) 538-7530
250 East 500 South
Salt Lake City, Utah 84111

Northern Utah (801) 621-4672 Eastern Utah (801) 637-7734
Salt Lake Downtown (801) 533-5165 Southern Utah (801) 586-9995
Central Salt Lake (801) 533-5975 Provo (801) 374-7724
South Salt Lake (801) 533-5291 Ogden (801) 399-9231

Division of Services for the Visually Handicapped (801) 533-9393

Eligibility Criteria
Age Served: Generally of Employable Age
Types of Disabilities Served: All types

The presence of a physical or mental disability that constitutes or results in a substantial handicap to employment and a reasonable expectation that a person will benefit from Vocational Rehabilitation services must exist.

Planning and Service Delivery
Following a determination of eligibility, an Individualized Written Rehabilitation Program (IWRP) is jointly developed between the VR counselor and consumer. Goals and objectives are formulated using data from evaluations of rehabilitation potential. Specific services are then outlined, agreed upon, and delivered.

Financial Criteria
There is a financial needs test that is mandated by the State Legislature to determine the extent, if any, the individual would participate in the cost of Vocational Rehabilitation Services. For specific details, call one of the contact numbers listed above.

Appeals Process
Appeals process is listed in this document in the appeals section.

Unique Considerations
Agency does not discriminate based on age, but the disability must be vocationally handicapping, which means service usually is provided to people of employable age.

All coverage except ambulation must receive prior approval.
Agency Name

Industrial Commission of Utah
(Workers' Compensation)

Contact Person

For general information, contact the employer, the Insurance Company, or the Industrial Commission (801) 530-6800. For specific claims information, write to Workers' Compensation at the following address:
Workers' Compensation
560 South 300 East
Salt Lake City, Utah 84111

Eligibility Criteria

Age Served: No limitation
Types of Disabilities Served: Varies

The disability must be causally related to a work-related injury or occupational disease. Some benefits are subject to statutes of limitation.

Financial Criteria

Plan pays all reasonable medical expenses necessary to treat a job-related injury or occupational disease. Compensation for lost wages is also available, subject to maximum amounts and time limitations.

Appeals Process

Appeals process goes through the Industrial Commission of Utah (801) 538-6800.

Unique Considerations

Benefits are paid by employer's insurance carrier. Disputes over eligibility are handled by the Industrial Commission, which also regulates and administers the system.

Employers are required by law to keep this insurance in force for the benefit of the employees.
