This technical assistance planning guide was developed as part of the PEERS (Providing Education for Everyone in Regular Schools) Project, a California project to facilitate the integration of students with severe disabilities previously at special centers into services at regular school sites and to facilitate the integration of students in special classes in regular schools into general education. The guide emphasizes building the capacity of states, school districts, and school sites to provide quality educational programs to students with disabilities in integrated and inclusive environments by providing a framework of technical assistance activities. The guide stresses local ownership and provides self-assessment checklists to evaluate practices at the state, district, and school building levels. After an introduction and suggestions for using the guide, the guide lists (with references) practices shown to be effective at each level. The next three sections address state level planning, district level planning, and building level planning respectively. Provided for each level is an "Effective Practice Checklist," specification of effective practices and supportive strategies, and a "Resource Planning Guide." Checklists and planning forms are appended. (Contains 406 references). (DB)
EFFECTIVE PRACTICES FOR INCLUSIVE PROGRAMS:
A TECHNICAL ASSISTANCE PLANNING GUIDE

ACKNOWLEDGMENTS

We wish to convey our thanks to a number of people who contributed to the development of this technical assistance planning guide. First, a special thanks goes to Dawn Hunter who gave us constructive criticism and invaluable editorial assistance. We also extend our gratitude to Paul Thompson and Robin Buckler for their support and assistance in developing this manuscript. Finally, we would like to acknowledge Swift Pense for her help in preparing earlier drafts.
Introduction

A major focus of education reform efforts designed to improve outcomes for students with disabilities has been on developing and implementing inclusive education programs. Inclusive programs provide educational and related services to support students with disabilities in all aspects of school and community life. This includes supporting students with disabilities as they interact with nondisabled peers to fully participate in general education and extracurricular activities. Inclusive education programs require that general educators, special educators, parents, students, and related service providers collaborate to develop and implement innovative strategies to accommodate diverse student needs in typical environments. These inclusive arrangements often present technical assistance challenges in terms of state and district level policy development, school organizational structure, curriculum development, program planning and implementation, and professional practices.

For the past decade, the two types of program models that have dominated reform efforts have included integrated education models and inclusive education models. Initial reform efforts were directed at the movement of students with severe disabilities from separate day schools or residential facilities to separate special education classes in regular schools. In the early stages of these reform efforts students typically received the majority of their instructional day in separate special education classes within the general education school and only minimally interacted with their nondisabled peers (e.g., at lunch, during recess, in the hallways, school assemblies). As educators observed the many benefits of these student interactions and research provided evidence to confirm their observations (Halvorsen & Sailor, 1990; Madden & Slavin, 1983), support increased for having students with disabilities spend at least part of their instructional day in the general education classroom. These initial experiences with integrated education have produced inclusive education models which fully included students with severe disabilities in general education classes and other age-appropriate settings. Sailor (1991) lists a number of elements common to full inclusion models:

1. All students attend the school to which they would go if they had no disability.

2. A natural proportion (i.e., representative of the school district at large) of students with disabilities occurs at any school site.

3. A zero-rejection philosophy exists so that no student would be excluded on the basis of type or extent of disability.

4. School and general education placements are age-and-grade-appropriate, with no self-contained special education classes operative at the school site.
5. Effective instructional practices such as cooperative learning and peer instructional methods receive significant use in general instructional practice at the school site.

6. Special education supports are provided within the context of the general education class and in other integrated environments (i.e., community and vocational settings, cafeteria, library, etc.).

The essential difference between the two types of approaches is in the use of separate special education classes. Both approaches emphasize placing students with disabilities in the age-appropriate schools they would attend if they were not disabled. Each emphasizes maintaining a natural proportion of students with disabilities at the school site. In addition, each stresses facilitating student interaction with nondisabled peers with approaches such as cooperative learning, peer instruction, and special friends programs. However, a critical difference between these two approaches is that in the integrated model part of the student's day is spent in a special education classroom; this is not the case for inclusive models. Inclusive models students are members of their general education class. Inclusive models also place greater emphasis on using collaborative group decision-making procedures to create learning opportunities for students.

There is strong evidence to suggest that when general education classes and other typical environments are modified to meet the needs of students with disabilities, they make significantly more gains in these placements than in pull-out programs or in other more segregated placements (Madden & Slavin, 1983; Wang & Birch, 1984). In an extensive review of the research on the effects of integrated educational placements for students with severe disabilities, Halvorsen and Sailor (1990) report that such placements were associated with a number of positive outcomes including increased social development, increased interactive behavior, enhanced skill acquisition and generalization, increased health and independence, greater success in meeting IEP objectives, more positive attitudes on the part of nondisabled peers and others in the community, and more normalized adult functioning. Similar studies on the effects of such placements for students with mild disabilities have found that they result in higher academic achievement (Deno, Maruyama, Espin, & Cohen, 1990; Leinhardt, 1980) and greater social-emotional growth (Madden & Slavin, 1983). Recent research suggests the greater the extent to which students with disabilities are included in general education classrooms and other age-appropriate environments, the more likely they are to have positive outcomes (Hunt, Farron-Davis, Staub, Beckstead, Curtis, Karasoff, Sailor, 1992).

In short, we know that well developed inclusive education programs can increase the effectiveness of special education services and supports to improve outcomes for students with disabilities. An extensive knowledge base provides a strong rationale for changing educational systems to support students with disabilities in inclusive environments. However, beginning the change process is one of the greatest challenges currently facing educational systems at the state, district, and building level. Some schools and education agencies are
beginning the change process by developing integrated educational programs at neighborhood or "home" schools. If a state, district, or school site chooses to proceed in this manner, we would encourage them to view this as a first step in an overall change strategy designed to ultimately lead to the development of inclusive educational programs. Others are omitting the intermediate step and are developing inclusive programs from the onset of their commitment.

This technical assistance planning guide emphasizes building the capacity of states, school districts, and school sites to provide quality educational programs to students with disabilities in integrated and inclusive environments by providing a framework for developing technical assistance activities. The guide facilitates planned educational change with a focus on local ownership and provides self-assessment checklists to examine whether effective practices are implemented at the state, district, and school site levels. It also suggests resources and strategies for use in planning technical assistance activities.

Organization and Use of the Guide

This technical assistance guide is designed to support change strategies at multiple levels by providing a framework for developing technical assistance activities at state, district, and building levels. Therefore, the guide is organized into three sections (i.e., state level practices, district level practices, and building level practices) to address planning needs. Each section includes a checklist of effective practices, a listing of corresponding change strategies, and identifies resources to assist educational programs in developing, adopting and implementing these practices. In addition, each section contains a table which cross references strategies and resources to specific effective practices.

This guide has been constructed with a bottom-up, grass roots change focus rather than a top-down orientation for organizing and planning school reform. Practices at the state and district level focus primarily on issues related to leadership, support, and program planning. While practices at the building level also address leadership, support, and program planning, greater emphasis is placed on the how to of providing services to students in inclusive environments. Practices at the building level are divided into three major subgroups: 1) leadership and support; 2) program planning and implementation; and 3) student inclusion. The leadership and support section emphasizes developing a school mission or philosophy to support inclusion and outlines effective practices related to administrative responsibilities and staff supervision. The program planning and implementation section focuses on IEP development, collaborative teamwork, and professional practices. The student inclusion section identifies effective practices for including students with disabilities in general education classes and extracurricular activities. In addition, this component addresses practices to facilitate the development of social relationships between students with disabilities and their nondisabled peers.

The practices suggested in this guide should be incorporated into existing state, district, and building level school improvement initiatives. For example, many schools have established school improvement committees that can serve as excellent vehicles for inclusion planning. In addition, aspects of inclusive education responsibilities can be incorporated into existing staff evaluation procedures.

Many people working at different levels (state, district, and school site) play critical roles in establishing and maintaining inclusive programs. This guide is intended for use by a variety of individuals in a number of ways:

* Family members make a vital contribution to inclusive programs; not only in the planning and design of their child's educational program, but also by advocating for inclusion at the building, district, and state levels. Families can use the guide as a foundation for effective advocacy and leadership by developing and planning inclusive educational programs at state and local levels, planning parent training activities, and planning community awareness activities to generate grass roots support and advocacy for inclusion.
* Teachers and instructional support staff with skills to support students in typical settings are critical to the success of inclusive programs. This guide contains strategies and resources for adapting curriculum, materials, and environments as well as collaborative teamwork, functional assessment, instruction of functional activities, and IEP development.

* Related service providers can use the guide to focus on providing therapeutic interventions that are embedded into the student's daily school routine and in other inclusive environments. They may want to concentrate on strategies and resources for practices regarding functional assessment, instruction of functional activities, and collaborative teamwork.

* Building administrators can use the guide to help instructional planning teams solve programmatic issues by identifying building-based and student-centered technical assistance resources.

* Local school district administration can use the guide to promote inclusion through effective leadership, supportive policies, and restructuring or expanding existing systems (i.e., transportation, personnel evaluation program). Central office technical assistance providers can use this guide to tailor their activities to individual school sites and instructional planning teams as well as to plan district-wide inservice training on specific topics.

* State education agencies can use the guide to focus on critical leadership activities to support and facilitate the change process for local education agencies by developing state policies and practices that support inclusion.

Suggested Process for Using the Guide

**Step One:**

Select and complete an effective practice needs assessment checklist from Appendix A for state level, district level, or building level planning. For building level planning, you may elect to narrow your focus by completing only a subgroup of the section (i.e., IEP Development). However, some strategies and resources complement more than one practice. By completing all sections of the building level checklist, you will be able to determine where specific strategies and resources will meet technical assistance needs across multiple areas. This can be helpful in making judicious use of training and staff development resources.
Step Two:

Following completion of the needs assessment checklist, determine which practices to focus on for technical assistance activities. The technical assistance planning forms in Appendix B can be used to record the practices you plan to focus on. Some technical assistance planners may want to address each practice identified as a need in some manner, while others may want to prioritize these practices and work on a few at a time.

Step Three:

After selecting the practices targeted for technical assistance activities, turn to the section of the guide which outlines state, district, or building level effective practices and supportive strategies (State Level - page 17, District Level - page 23, and Building Level - page 36). Identify the strategies you plan to implement and record them on the technical assistance planning form. Then, list the specific actions that must occur in order to implement each strategy. Assign a planning team member to be responsible for each action and determine a target date for completion. The planning team members can use the resource planning guides (State level - page 20, District Level - page 28, and Building Level - page 55) as needed to complete actions.

Step Four:

The planning team should meet at regular intervals to discuss issues and progress on implementing the plan and to make required modifications. The planning team may also use the checklist at selected intervals to evaluate and document progress in implementing effective inclusive practices.

As suggested earlier, education agencies are unique entities and cannot be expected to approach change in the same manner. Thus, each educational agency and school site will need to adapt the ideas presented here to meet their unique needs.
EFFECTIVE PRACTICES: SUPPORTIVE RESEARCH AND LITERATURE

This section provides citations for the research and literature on best practices for inclusive programs that provide a supportive rationale for the practices outlined in the effective practice checklists found in Appendix A. The full reference listing can be found in the Resources Section which begins on page 63.

State Level Practices

1. The state develops and disseminates a mission statement which reflects the philosophy that all children can learn and considers the local school accountable for serving all students (Hamre-Nietupski, Nietupski, & Maurer, 1990; Karasoff, 1991).

2. The state develops policies that facilitate district implementation of inclusive programs and eliminates policies that serve as disincentives (Hamre-Nietupski, Nietupski, & Maurer, 1990; Karasoff, 1991; Wilson, 1989).

3. The state increases the awareness, knowledge, and adoption of best practices for inclusive educational programs (Karasoff, 1991; Wilson, 1989).

4. The state promotes district implementation of inclusive programs (Hamre-Nietupski, Nietupski, & Maurer, 1990; Karasoff, 1991; Wilson, 1989).

5. The state evaluates inclusive programs and practice to assess the impact of state policies annually (Hamre-Nietupski, Nietupski, & Maurer, 1990; Karasoff, 1991).

District Level Practices

1. The district develops and disseminates a mission statement which reflects the philosophy that all children can learn and the local school is accountable for serving all students (Freagon, Keiser, Kincaid, Usilton, & Smith, 1992; Karasoff, 1991; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

2. The district facilitates locally owned change at the school site by providing policies and procedures that support building level implementation (Karasoff, 1991; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Wilcox, Ryndak, Butterworth, Eberhard, Kronberg, Panzer, Passenger, Peel, Ramsey, & Steveley, 1989; Wilson, 1989).

3. The district promotes awareness, knowledge, and adoption of best practices for inclusive programs and the continual updating of these services by seeking inservice training and consultation on an ongoing basis (Halvorsen & Sailor, 1990; Karasoff, 1991; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Wilson, 1989).
4. All school buildings are accessible to students with disabilities served by the district and to other individuals with disabilities in the community who may be employed in or visit these sites (Freagon, Keiser, Kincaid, Usilton, & Smith, 1992).

5. Students with and without disabilities wait at school bus stops together and ride to and from school on the same bus (Freagon, Keiser, Kincaid, Usilton, & Smith, 1992; Meyer, Eichinger, & Park-Lee, 1987).

6. Inclusive programs have been established at each school site and students with disabilities are members of age-appropriate (+/- 1yr.) general education classrooms in the same schools they would attend if they were non-disabled (Brown, Long, Udvari-Solner, Davis, VanDeventer, Ahlgren, Johnson, Gruenewald, & Jorgensen, 1988; Falvey, 1989; McDonnell, Hardman, Hightower, & Keifer-O'Donnell, 1991; Meyer, Eichinger, & Park-Lee, 1987; Meyer & Kishi, 1985; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Stainback, Stainback, & Forest, 1989).

7. Coordinated transition programs for younger and older students have been established (i.e. preschool -> elementary -> MS/Jr. high -> HS -> post-secondary) (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

8. School personnel evaluation criteria includes a standard on the inclusion of all students with disabilities into all aspects of the school community (Freagon, Keiser, Kincaid, Usilton, & Smith, 1992).

9. The district incorporates aspects of inclusive practices into its annual district-wide program evaluation activity (Freagon, Keiser, Kincaid, Usilton, & Smith, 1992; Karasoff, 1991).

Building Level Practices

LEADERSHIP AND SUPPORT

Part 1: School Mission/Philosophy

1.1 The school develops and disseminates a mission statement which reflects the philosophy that all children can learn and the school is responsible for serving them (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

1.3 The school philosophy supports the need for ongoing inservice training, staff development, and technical assistance (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).
Part 2: Administrative Responsibilities & Staff Supervision

2.1 The principal is ultimately responsible for program implementation including staff supervision and evaluation. (Bogdan & Biklen, 1985; Brinker & Thorpe, 1986; Halvorsen & Sailor, 1990; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

2.2 Special and general education teachers are responsible for:
- Attending faculty meetings.
- Participating in supervisory duties (e.g., lunch/bus/yard duty).
- Participating in extracurricular activities (e.g., chaperone dances, work with student clubs).
- Following school protocol by keeping principal or appropriate administrator informed on an ongoing basis. (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Taylor, 1982).

2.3 There is an ongoing process to support staff in implementing inclusive practices (i.e., time for team planning meetings, opportunities for staff development) (Halvorsen, Smithley, & Neary, 1992).

PROGRAM PLANNING AND IMPLEMENTATION

Part 3: IEP Development

3.3 Student programs are developed across the following curricular content areas:
- Communication/Socialization
- Personal Management (includes Self Determination)
- Recreation/Leisure
- Home/Domestic
- General Education/Academic
- Transition/Vocational
3.4 Parents, general and special education teachers, related service personnel, and students collaborate to write joint IEP goals and objectives (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Wilcox, Ryndak, Butterworth, Eberhard, Kronberg, Panzer, Passenger, Peel, Ramsey, & Steveley, 1989).

3.5 IEPs include personal management objectives to promote student self-advocacy (i.e., decision-making, choice-making, individual responsibility) (Meyer, Eichinger, & Park-Lee, 1987).

3.6 IEP objectives are developed with families and reflect family priorities (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

3.7 Student IEPs include instruction of functional activities in age-appropriate school and community settings (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

3.9 IEPs for students age 14 and older include objectives that address skills and services needed to support transition to adult roles (Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Wilcox, Ryndak, Butterworth, Eberhard, Kronberg, Panzer, Passenger, Peel, Ramsey, & Steveley, 1989).

3.11 The supports, aids, curricular modifications and other instructional methods required for the student to be successful in school and community settings are discussed during IEP meetings using a transdisciplinary approach (Brophy & Good, 1986; Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Wilcox, Ryndak, Butterworth, Eberhard, Kronberg, Panzer, Passenger, Peel, Ramsey, & Steveley, 1989).

3.12 The supports, aids, curricular modifications, and other instructional methods outlined in the IEP are implemented and updated according to the student's progress (Brophy & Good, 1986; Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Wilcox, Ryndak, Butterworth, Eberhard, Kronberg, Panzer, Passenger, Peel, Ramsey, & Steveley, 1989).
Part 4: Collaborative Teamwork

4.1 Teams meet weekly to plan instructional support services for all students (Freagen, Keiser, Kincaid, Usilton, & Smith, 1992).

4.2 The team collaborates to: 1) develop peer network/interactive systems; 2) adapt learning objectives for students within the context of the core curriculum; 3) make materials and environmental adaptations; and 4) provide physical assistance as needed (Halvorsen & Sailor, 1990; Meyer & Kishi, 1985; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

4.3 Teams collaborate to provide related services in inclusive settings (Halvorsen & Sailor, 1990; McDonnell & Hardman, 1989; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

4.4 Teams initiate systematic transition planning to support successful transition from one program to another (Gaylord-Ross, 1989; Halvorsen & Sailor, 1990; Meyer & Kishi, 1985; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

4.5 Team members meet informally with one another to discuss ongoing inclusion issues and maintain continuous communication (Halvorsen & Sailor, 1990; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

Part 5: Professional Practices

5.1 All instructional staff work with students in age-appropriate general education and community settings (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

5.2 Related services staff provide services in general education classrooms and in community settings using transdisciplinary and consultative approaches (Halvorsen & Sailor, 1990; McDonnell & Hardman, 1989; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

5.3 Instructional staff and related service providers develop adaptations for individual students to facilitate independence across environments (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

5.4 Instructional staff plan activities using materials, instructional procedures and environments that are age-appropriate and individualized (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).
5.5 Instructional staff adapt the general education curriculum to address academic and/or community-referenced content areas to meet IEP objectives (Freagon, Keiser, Kincaid, Usilton, & Smith, 1992; Halvorsen & Sailor, 1990; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

5.7 Instructional staff and related service providers ensure interaction with nondisabled peers in all activities (Halvorsen, Smithey, & Neary, 1992; Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987).

5.8 Instructional staff implement positive behavior management strategies that utilize natural cues/corrections with support from related services personnel and other team members (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

5.9 Instructional staff demonstrate positive attitudes towards and age-appropriate interactions with all students (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989).

STUDENT INCLUSION

Part 6: Student Activities

6.1 Students have access to all school environments for instruction and interactions (Halvorsen & Sailor, 1990; Meyer, Eichinger, & Park-Lee, 1987; Sailor, Anderson, Halvorsen, Doering, Filler, & Goetz, 1989; Taylor, 1982).

6.2 Students participate in and are included in activities such as:
- music
- art
- library
- gym
- lunch
- assemblies
- clubs
- general education classes
- home economics
- work experience
- recess/break
- computer use
- graduation exercises
- field trips

6.3 Students with disabilities are involved in extracurricular school activities such as:
- clubs
- dances
- after school recreation/day care programs
- scouts
(Meyer, Eichinger, & Park-Lee, 1987)
Part 7: Interaction with Peers

7.1 Students' instructional programs incorporate interaction with nondisabled students in the following areas:
- Communication/Socialization
- Personal Management (includes Self Determination)
- Recreation/Leisure
- Home/Domestic
- General Education/Academic
- Transition/Vocational

7.2 Students are involved with age-appropriate, nondisabled peers in structured interaction programs such as:
- Peer tutoring in school and community environments
- "PALS" (Partners at Lunch) or lunch buddies
- Circle of Friends
- Co-worker support at job training site
- MAPS

7.3 Social interaction programs are:
- Well organized
- Positive in orientation (emphasizing students' strengths, focusing on functional activities)
- Well-attended
- Supported by principal, faculty, and parents
- Viewed as a positive experience by students

(Halvorsen, Smithey, & Neary, 1992).

EFFECTIVE STATE PRACTICES AND SUPPORTIVE STRATEGIES

1. **Practice:** The state develops and disseminates a mission statement which reflects the philosophy that all children can learn and considers the local school accountable for serving all students.¹

   **Strategies:**

   Form a broad-based inclusion task force with key stakeholders and agency representation to collaborate on the change process.

   Develop a shared vision for change and inclusion based on desired student outcomes.

   Develop the mission statement incorporating the following components: a definition of inclusion, a rationale for implementing inclusive educational programs, a belief or vision statement, a brief outline of administrative policies that support inclusive practice, and recommended strategies and procedures for implementation.

2. **Practice:** The state develops policies that facilitate district implementation of inclusive programs and eliminates policies that serve as disincentives.³

   **Strategies:**

   Modify or develop state education policy to support change (i.e., eliminate budgetary disincentives for inclusion; offer school districts grants or other budgetary support).

   Review teacher certification requirements and modify as needed.

   Develop and adopt state best practice programmatic guidelines.

   Modify service delivery structure and resource allocations.

   Provide leadership on state task forces to promote inclusion.

3. **Practice:** The state increases the awareness, knowledge, and adoption of best practices for inclusive educational programs.²

   **Strategies:**

   Provide leadership training.

   Conduct summer institutes.

   Provide regionalized best practice forums.
Develop content specific training modules in collaboration with institutes of higher education and school district personnel.

Collaborate with institutes of higher education to develop coursework for preservice and inservice personnel preparation.

Utilize regionalized approach for delivery of inservice training.

Utilize trainer of trainers approach for wide dissemination.

Establish regional demonstration/implementation sites.

Identify and attend summer institutes within and outside the state and then share that information with all school districts.

Facilitate networking across the state among parents, school districts, institutes of higher education, and advocacy organizations.

Maintain momentum of knowledge of best practice: promote conference attendance; present at local, state, and national conferences; develop co-presentations with local sites; develop manuals, videotapes, newsletters, articles, etc.; and conduct statewide and districtwide mailings.

4. **Practice:** The state promotes district implementation of inclusive programs.

**Strategies:**

Guide school districts in developing a shared vision for change and inclusion based on desired student outcomes.

Assist school districts in conducting an inclusion needs assessment and developing an implementation plan to promote adoption of best practice.

Facilitate the development of clear and consistent technical assistance goals and objectives to support the implementation plan.
5. **Practice:** The state evaluates inclusive programs and practice to assess the impact of state policies annually.

**Strategies:**

Monitor and evaluate state and local policy changes, the number of state agency waiver requests, and the state compliance review process and findings.

Review child count data on the number of students moved into age-appropriate inclusive environments each year.

3. These effective practice items have been taken or adapted from: Karasoff, P., Alwell, M., & Halvorsen, A. (1992). *Systems change: A review of effective practices*. Unpublished manuscript. San Francisco State University, California Research Institute.
Several resources are provided for each of the following practices. These are listed in the Resources section (page 62) of this planning guide and can be located by reference number.

5. These effective practice items have been taken or adapted from Karmoff, P., Abbe, M., & Helyman, A. (1997). *Preventing abuse: A review of effective practices*. Unpublished manuscript. San Francisco State University, California Research Institute.
EFFECTIVE DISTRICT PRACTICES AND SUPPORTIVE STRATEGIES

1. **Practice**: The district develops and disseminates a mission statement which reflects the philosophy that all children can learn and the local school is accountable for serving all students.\(^{1,5}\)

   **Strategies:**

   Form a District Inclusion Task Force which includes representation from students, parents, teachers, parents, central office and school site administration, related services personnel, and the business community.

   Develop a shared vision for change and inclusion based on desired student outcomes.

   Develop the mission statement incorporating the following components: a definition of inclusion, a rationale for implementing inclusive educational programs, a belief or vision statement, a brief outline of administrative policies that support inclusive practice, and recommended strategies and procedures for implementation.

   Request that District Inclusion Task Force representatives disseminate the inclusion mission statement to their constituent groups.

2. **Practice**: The district facilitates locally owned change at the school site by providing policies and procedures that support building level implementation.\(^{5}\)

   **Strategies:**

   Establish a district-wide advisory board which involves all of the key stakeholders.

   Inclusive education activities occur within the context of existing school planning procedures.

   Develop or utilize the existing district mission statement to anchor the goal of developing inclusive educational programs.

   Establish preschool through transition inclusive programs.

   Modify or develop policies that support change by ensuring that students with disabilities attend the same school they would attend if non-disabled and that they have the same calendar and hours.

   Modify service delivery structure and resource allocations.

   Modify job roles and descriptions.
Develop programmatic guidelines. For example, establish a district support team to develop a community-based instruction procedural guide (i.e., liability, training, transportation, fiscal issues, supervision).

Define service delivery plans and administrative responsibilities within the system (e.g., chain of command; who will supervise teachers and support staff, who do teachers report to, etc.) and disseminate to staff.

Develop building-based support teams composed of general and special educators and related services staff.

Provide ample opportunities for professional growth and district recognition.

3. **Practice:** The district promotes awareness, knowledge, and adoption of best practices for inclusive programs and the continual updating of these services by seeking inservice training and consultation on an ongoing basis.25

**Strategies:**

Promote conference attendance for parents, teachers, administrators, and school board members.

Provide awareness training within existing staff development and inservice training mechanisms.

Provide opportunities to teachers, parents, administrators, school board members, and other stakeholders to visit exemplary sites.

Provide leadership training for central office and school site administrators.

Develop content specific training modules.

Develop regional demonstration/implementation sites.

Conduct districtwide mailings to keep interested parents and professionals informed of inclusive program progress and upcoming events.

Present information in a variety of formats to a wide array of stakeholders.

Utilize trainer of trainers approach.

Utilize existing district information fairs to disseminate best practice information.

Promote visitations within and across district to share ideas and information.

Share resources such as videotapes, newsletters, and books.

Highlight the benefits of inclusive education for all students at open house/parents' night.
4. **Practice:** All school buildings are accessible to students with disabilities served by the district and to other individuals with disabilities in the community who may be employed in or visit these sites.

**Strategies:**

- Evaluate the accessibility of all sites.
- Work through district planning group to ensure that reasonable accommodations are in place.
- Develop a guide that outlines procedures to ensure safety.

5. **Practice:** Students with and without disabilities wait at school bus stops together and ride to and from school on the same bus.

**Strategies:**

- Involve transportation representation in all or part of inclusion planning.
- Determine transportation services according to student need, residence, and district transportation practices.
- Assess the level of transportation support needed by individual students.
- Provide individualized support and assistance for students on school buses if required.

6. **Practice:** Inclusive programs have been established at each school site and students with disabilities are members of age-appropriate (+/- 1 year) general education classrooms in the same schools they would attend if they were non-disabled.

**Strategies:**

- Form a broad-based inclusion task force with key stakeholders and agency representation to collaborate on the change process.
- Develop a district policy statement which includes a definition and rationale for inclusion as part of the district’s overall improvement plan.
- Develop a written district and school site implementation plan for inclusive programs which addresses issues such as heterogeneity, non-categorical grouping strategies, age-appropriateness of school, home/magnet schools, and geographic location.
- Compile information on attendance area for each student and begin returning students to home schools.
Design student attendance procedures to address issues such as heterogeneity, age-appropriateness of school, home/magnet schools, and geographic location.

Develop a school site implementation plan for inclusive programs.

Develop plans and timelines for establishing inclusive programs across ages/school levels (elementary/middle school/high school/post secondary).

Review the organization and assignment of related service personnel to ensure that students receive the related services outlined in their IEPs.

Develop guidelines for the selection/assignment of teachers and paraprofessionals.

Develop a process for transition between classes and schools utilizing district and site school improvement committees.

Ensure adequate staffing patterns to support technical assistance provision during initial "start up" activities.

7. **Practice**: Coordinated transition programs for younger and older students have been established (i.e. preschool -> elementary -> MS/Jr. high -> HS -> post-secondary).

   **Strategies**:

   Develop procedures for transition between classes and schools utilizing district and school improvement committees.

8. **Practice**: School personnel evaluation criteria includes a standard on the inclusion of all students with disabilities into all aspects of the school community.

   **Strategies**:

   Develop standards for inclusion with a district-wide advisory board which involves all of the key stakeholders.

   Review current school personnel evaluation procedures and revise to incorporate inclusion responsibilities.

   Develop policies to ensure that included students count as part of general education teacher's contractual class size and required support services are provided.
9. **Practice:** The district incorporates aspects of inclusive practices into its annual district-wide program evaluation activity.

**Strategies:**

- Analyze effective practice checklist data.
- Conduct pre/post I.E.P. reviews.
- Evaluate of student, parent, and teacher satisfaction.
- Evaluate of student outcomes.
- Evaluate training events.

## EFFECTIVE PRACTICE CHECKLIST - BUILDING LEVEL

### LEADERSHIP AND SUPPORT

#### Part 1: School Mission/Philosophy

1.1 The school develops and disseminates a mission statement which reflects the philosophy that all children can learn and the school is responsible for serving them.2

1.2 The school philosophy emphasizes responsiveness to families and encourages active family involvement.2

1.3 The school philosophy supports the need for ongoing inservice training, staff development, and technical assistance.2

#### Part 2: Administrative Responsibilities & Staff Supervision

2.1 The principal is ultimately responsible for program implementation including staff supervision and evaluation.

2.2 Special and general education teachers are responsible for:

- Attending faculty meetings.
- Participating in supervisory duties (e.g., lunch/bus/yard duty).
- Participating in extracurricular activities (e.g., chaperon dances, work with student clubs).
- Following school protocol; keeping principal or appropriate administrator informed on an ongoing basis.

2.3 There is a defined plan and/or process for supporting staff in implementation (i.e., time for team planning meetings, opportunities for staff development).

### Status Key:

1 = Practice is effectively implemented; 2 = Practice is implemented but needs improvement; 3 = Practice is not implemented

2. These effective practice items have been taken or adapted from: Meyer, L.H., Eichinger, J., & Park-Lee, S. (1987). A validation of program quality indicators in educational services for students with severe disabilities. The Journal of The Association for Persons with Severe Handicaps, 12(4), 251-263.

3. These effective practice items have been taken or adapted from: Freagon, S., Keiser, N., Kinsaid, M., Usihno, R., & Smith, A. (1992). Individual school district profile for planning and implementing the inclusion of students with disabilities in general education and their transition to adult living and continuing education. Springfield, IL: Illinois State Board of Education, Project CHOICES/Early CHOICES, S.A.S.E.D.
EFFECTIVE BUILDING LEVEL PRACTICES AND SUPPORTIVE STRATEGIES

LEADERSHIP AND SUPPORT

Part 1: School Mission/Philosophy

1.1 Practices: The school develops and disseminates a mission statement which reflects the philosophy that all children can learn and the school is responsible for serving them.

Strategies:

- Form or utilize an existing school improvement committee which includes representation from parents, students, teachers, school administration, related services staff, school advisory council, and the community to address inclusion.

- Develop a shared vision for change and inclusion based on desired student outcomes.

- Develop the mission statement incorporating the following components: a definition of inclusion, a rationale for implementing inclusive educational programs, a belief or vision statement, a brief outline of administrative policies that support inclusive practice, and recommended strategies and procedures for implementation.

- Discuss the school inclusion mission statement with the PTA, school staff, and other interested key stakeholders.

- Request that key stakeholders disseminate the inclusion mission statement to their constituent groups.

1.2 Practice: The school philosophy emphasizes responsiveness to families and encourages active family involvement.

Strategies:

- Form a school improvement committee which includes representation from parents, students, teachers, school administration, related services staff, school advisory council, and the community.

- Involve interested parents in planning and evaluating inclusion at the site level (e.g., via school site councils, inclusion task forces, student planning teams, etc.).

- Include interested parents in all inservice training activities (as both participants and trainers).

- Involve PTA in inclusion efforts.

- Communicate regularly with parents.
1.3 **Practice:** The school philosophy supports the need for ongoing inservice training, staff development, and technical assistance.²

**Strategies:**

Conduct inservice training needs assessments across parents, teaching and instructional staff, related services personnel, and administrators.

Incorporate inclusion topics into school’s comprehensive inservice plan with suggestions from school personnel.

Work with local university community to address inservice needs.

Provide opportunities for inservice training providers to interact with one another at site and district levels.

Develop a district level support team to guide training efforts for the school community.

Provide opportunities for teachers, staff, and parents to visit model inclusive programs in the district or elsewhere.

Keep faculty informed about inclusive classes (e.g., staff presentations, regular faculty meetings).

Include articles about inclusion in the school newspaper to highlight the importance of inclusion to students, parents, and school personnel and to share successful strategies.

Provide information about inclusion in newsletters to all parents.

---

**Part 2: Administrative Responsibilities & Staff Supervision**

2.1 **Practice:** The principal is ultimately responsible for program implementation including staff supervision and evaluation.

**Strategies:**

Review existing service delivery plans and administrative responsibilities related to chain of command, staff supervision and evaluation; then modify plan to support building-based ownership of inclusive practice.

Ensure that all school personnel, including special education and related services staff, share common information concerning school rules and protocol.

Schedule special education staff for the same lunch periods and preparation periods as general education staff.
Provide leadership training for principals to enhance their skill in supervising all programs.

Design the master schedule to include all students and instructional personnel and accommodate team meetings and planning periods.

Merge special education personnel with general education teams to foster shared responsibility and collaboration.

Develop building level implementation guide for collaboration and inclusion outlining the roles, responsibilities, and process for teaming to individualize student programs following the first school year.

2.2 Practice: Special and general education teachers are responsible for:

- Attending faculty meetings.
- Participating in supervisory duties (e.g., lunch/bus/yard duty).
- Participating in extracurricular activities (e.g., chaperon dances, work with student clubs).
- Following school protocol by keeping principal or appropriate administrator informed on an ongoing basis.

Strategies:

Ensure that special education is part of overall school restructuring plan.

Involve staff in revising their job descriptions to include inclusion responsibilities.

Ensure that all school personnel, including special education and related service staff, share common information concerning rules and protocol.

2.3 Practice: There is an ongoing process to support staff in implementing inclusive practices (i.e., time for team planning meetings, opportunities for staff development).

Strategies:

Review existing service delivery plans and administrative responsibilities on chain of command, staff supervision and evaluation and modify to support building-based ownership of inclusive practice.

Examine alternatives for redeploying existing resources, if necessary, to provide for itinerant support (i.e., alternative staffing patterns).

Provide release time support for preparation activities (e.g., team building and planning, instructional strategies).
Survey staff to determine their interest in and need for organized ability awareness education for themselves and for their students.

Examine within district for resources for training (i.e., identify local expertise).

Use mentor or lead teachers to conduct inservice training and set up peer coaching systems to maintain and reinforce instructional skills.

Include the total school community in collaboration training.

Evaluate the impact and utility of the inservice training activities on student outcomes.

PROGRAM PLANNING AND IMPLEMENTATION

Part 3: IEP Development

3.1 Practice: Instructional staff and related service providers complete a functional assessment as an initial step in IEP development.

Strategies:

Develop and implement a comprehensive inservice plan with the parents of students with disabilities and school site personnel which addresses functional assessment.

Obtain/develop material and human resources for technical assistance on functional assessment strategies.

Develop a manageable student data collection system for use by general education personnel and/or instructional teams.

Discuss grading and assessment practices and explore mastery and performance-based assessment strategies for all students (i.e., portfolio assessment).

3.2 Practice: Activity-based evaluations of student interests and family priorities are part of the functional assessment.

Strategies:

Develop and implement a comprehensive inservice plan with the parents of students with disabilities and school site personnel to address functional assessment.

Select or develop a structured family interview procedure.

Include parents as members of ongoing student planning teams.
3.3 **Practice:** Student programs are developed across the following curricular content areas:

- Communication/Socialization
- Personal Management (includes Self Determination)
- Recreation/Leisure
- Home/Domestic
- General Education/Academic
- Transition/Vocational

**Strategies:**

Develop and implement a comprehensive inservice plan across all domains with the parents of students with disabilities and school site personnel (i.e., social relationships, adapting curriculum, cooperative learning, functional assessments).

Obtain/develop technical assistance on adapting curriculum, use of natural supports, delivering instruction in community settings, scheduling staff, training job developers, and site management.

Use mentor or lead teachers to conduct inservices and serve as peer coaches.

Set up peer coaching systems to maintain and reinforce instructional skills.

Examine building policy for barriers to going off site (i.e., liability, training, transportation, fiscal issues, supervision) and then develop a policy and procedures guide which adheres to district policies.

Conduct inventories of community and school environments which are identified by parents via the parent interview process.

Involve related service staff in functional assessments and community-based instruction.

Develop a rotational job sampling program for secondary students.

Coordinate use of job sites across district to avoid seeking duplicate jobs.

Develop a student peer support system (i.e., utilizing natural supports).

Identify and utilize existing generic vocational education opportunities in the district.

Form interagency groups to develop inclusive options at the preschool and post school level with representation from early childhood lead agency, school district, community college, vocational rehabilitation, business community, parents, and self-advocates.
3.4 Practice: Parents, general and special education teachers, related service personnel, and students collaborate to write joint IEP goals and objectives.

Strategies:

Develop and implement a comprehensive inservice plan with the parents of students with disabilities and school site personnel which addresses team collaboration issues.

Employ a collaborative process for group decision-making.

Utilize MAPS or similar personal futures planning techniques.

Include parents as members of ongoing student planning teams.

3.5 Practice: IEPs include personal management objectives to promote student self-advocacy (i.e., decision-making, choice-making, individual responsibility).²

Strategies:

Include student in IEP development and decision-making.

Ensure that student preferences are reflected in IEP goals and objectives.

3.6 Practice: IEP objectives are developed with families and reflect family priorities.

Strategies:

Select or develop a structured parent interview procedure for use by site personnel and families.

Review and discuss the parent interview priorities as a team to negotiate issues that may arise when school and family priorities differ.

3.7 Practice: Student IEPs include instruction of functional activities in age-appropriate school and community settings.

Strategies:

Obtain/develop technical assistance resources on adapting curriculum, use of natural supports, delivering instruction in community settings, scheduling staff, and training job developers.

Examine building policy for barriers to going off site (i.e., liability, training, transportation, fiscal issues, supervision) and then develop a policy and procedures guide which adheres to district policies.
Conduct inventories of community and school environments which are identified by parents via the parent interview process.

Involve related service staff in functional assessments and community-based instruction.

Develop a rotational job sampling program for secondary students.

Coordinate use of job sites across district to avoid seeking duplicate jobs.

Develop a student peer support system (i.e., utilizing natural supports).

Identify and utilize existing generic vocational education opportunities in the district.

3.8 Practice: IEP objectives reflect interaction with nondisabled peers.

Strategies:

Obtain technical assistance on cooperative learning, adapting curriculum, use of natural supports, staff scheduling, and facilitating social interaction and social relationships.

Implement school site practices which promote the development of peer relationships (e.g., inclusion in activities across environments, teacher responsibilities within the school, transportation schedule and coordinated school hours, etc.).

Develop a peer support system (i.e. MAPS, peer tutoring, circle of friends, etc.).

3.9 Practice: IEPs for students age 14 and older include objectives that address skills and services needed to support transition to adult life.

Strategies:

Involv e relevant adult service agencies in transition planning within the IEP process.

Obtain/develop technical assistance on adapting curriculum, use of natural supports, delivering instruction in community settings, scheduling staff, and training job developers.

Focus on a variety of community-based vocational experiences for exploration and assessment.

Identify and utilize existing generic vocational education opportunities in the district.

Provide supports and adaptations needed to maintain community vocational education opportunities.
3.10 **Practice:** IEP teams use natural proportion guidelines when serving students with disabilities in general education classrooms.

**Strategies:**

Define the process for establishing inclusive classes and address issues such as heterogeneity, age-appropriateness of school for students, home/magnet schools, and geographic location.

Develop plans and timelines for establishing inclusive programs across ages/school levels (elementary/middle school/high school/post secondary).

Develop a process for transition between classes and schools at the school site and district level through the instructional planning or building level team process.

Compile information on attendance area for each student and begin a process for returning students to home schools.

Utilize heterogeneous grouping in classroom, school and community environments.

Review the organization and assignment of related service personnel and develop guidelines to ensure that related services are provided in naturally occurring classroom and community contexts.

3.11 **Practice:** The supports, aids, curricular modifications and other instructional methods required for the student to be successful in school and community settings are discussed during IEP meetings using a transdisciplinary approach.

**Strategies:**

Develop and implement a comprehensive inservice plan across all domains with the parents of students with disabilities and school site personnel (i.e., social relationships, adapting curriculum, cooperative learning, functional assessments).

Develop inservice training for teams which include parents, instructional staff, and related service staff. Focus on issues such as collaborative consultation, role release, and adapting curriculum.

Use mentor or lead teachers and related services personnel to conduct inservices and serve as peer coaches.
3.12 **Practice:** The supports, aids, curricular modifications, and other instructional methods outlined in the IEP are implemented and updated according to the student's progress.

**Strategies:**

Obtain/develop technical assistance resources on adapting curriculum, use of natural supports, delivering instruction in community settings, scheduling staff, and training job developers.

Develop a manageable student data collection system for use by general education personnel and/or instructional teams.

Discuss grading and assessment practices and explore mastery and performance-based assessment strategies for all students (i.e., portfolio assessment).

---

**Part 4: Collaborative Teamwork**

4.1 **Practice:** Teams meet weekly to plan instructional support services for all students.

**Strategies:**

Revise staff job descriptions to incorporate inclusion responsibilities.

Develop building level implementation guide for collaboration which outlines the roles, responsibilities, and process for teaming to facilitate individualized student programs.

Provide periodic release time for team preparation activities (e.g., team set up and planning; the development of school and community inventories).

Ensure that scheduling and existing coverage enable transdisciplinary teams including parents to meet on a regular basis (i.e., rotating substitute teachers, teacher preparation periods, block scheduling).

Develop and implement a comprehensive inservice plan with parents of students with disabilities and school site personnel.

4.2 **Practice:** The team collaborates to: 1) develop peer network/interactive systems; 2) adapt learning objectives for students within the context of the core curriculum; 3) make materials and environmental adaptations; and 4) provide physical assistance as needed.

**Strategies:**

Conduct inservice needs assessments across all targeted audiences.

Use mentor or lead teachers or related services staff to conduct inservices and serve as peer coaches.
Obtain technical assistance on adapting curriculum.

Ensure that students receive necessary levels of support when participating in general education (e.g., therapy, paraprofessional support, adaptations, natural supports) and fade supports when they are not required.

4.3 **Practice:** Teams collaborate to provide related services in inclusive settings.

**Strategies:**

Form interagency groups to develop inclusive options at the preschool and post school level with representation from the early childhood lead agency, school district, community college, vocational rehabilitation, business community, parents, and self-advocates.

Develop inservice training for teams which include parents, instructional staff, and related service staff. Focus on issues such as collaborative consultation and role release.

Set up peer coaching systems to maintain and reinforce related service delivery to students in inclusive contests.

Review the organization and assignment of related service personnel. Design and use a collaborative related services delivery model and provide therapy in inclusive settings.

Reorganize related service personnel’s schedules to allow for providing services in natural settings (i.e., block scheduling).

4.4 **Practice:** Teams initiate systematic transition planning to support successful transition from one program to another.

**Strategies:**

Form interagency groups to develop inclusive options at the preschool and post school level with representation from early childhood lead agency, school district, community college, vocational rehabilitation, business community, parents, and self-advocates.

Outline the transition process between classes and schools at the school site level.

Examine site policy for barriers to going off site (i.e., liability, training, transportation, fiscal issues, supervision) and then develop a policy and procedures guide which adheres to district policies.

Conduct team meeting to develop the Individualized Transition Plan (ITP). Assign responsibilities and timelines to each team participant.

Include vocational training objectives for specific job sampling in the IEPs of students age 14 and older.
4.5 **Practice:** Team members meet informally with one another to discuss ongoing inclusion issues and maintain continuous communication.

**Strategies:**

Involve all parents of students with disabilities in all school activities such as student planning teams, parent/teacher conferences, and receiving general school mailings regarding school events.

Merge special education personnel with general education teams to foster shared responsibility and collaboration.

Schedule special education staff for the same lunch periods and preparation periods as general education staff.

4.6 **Practice:** Teams assist families in accessing community resources.

**Strategies:**

Provide families with a listing of community resources and specialized service systems.

Provide families with support from team members in securing needed resources.

**Part 5: Professional Practices**

5.1 **Practice:** All instructional staff work with students in age-appropriate, general education and community settings.

**Strategies:**

Revise staff job descriptions to include inclusion responsibilities.

Ensure that the policy on paraprofessionals allows them to implement teacher designed instruction away from the presence of certificated staff.

Examine building policy for barriers to going off site (i.e., liability, training, transportation, fiscal issues, supervision) and then develop a policy and procedures guide which adheres to district policies.

Form interagency groups to develop inclusive options at the preschool and post school level with representation from early childhood lead agency, school district, community college, vocational rehabilitation, business community, parents, and self-advocates.

Conduct inventories of community and school environments which are identified by parents via the parent interview process.
Identify and utilize existing generic daycare and preschool opportunities in the district.

Develop a rotational job sampling program for secondary students.

Identify and utilize existing generic vocational education opportunities in the district.

5.2 Practice: Related services staff provide services in general education classrooms and in community settings using transdisciplinary and consultative approaches.

Strategies:

Review the organization and assignment of related service personnel. Design and use a collaborative related services delivery model and provide therapy in inclusive settings.

Develop inservice training for teams which include parents, instructional staff, and related service staff. Focus on issues such as collaborative consultation skills, role release, and adapting curriculum.

Set up peer coaching systems to maintain and reinforce instructional skills used to support included students.

5.3 Practice: Instructional staff and related service providers develop adaptations for individual students to facilitate independence across environments.

Strategies:

Schedule multiple opportunities for students to demonstrate skills across environments, trainers, and activities.

5.4 Practice: Instructional staff plan activities using materials, instructional procedures and environments that are age-appropriate and individualized.

Strategies:

Obtain/develop technical assistance on cooperative learning

Utilize heterogeneous groups in classroom, school and community environments.

Utilize instructional and related services staff (i.e., therapists, paraprofessionals, etc.) to provide instruction/therapy in general education and community environments.

Discuss grading and assessment practices and explore mastery and performance-based assessment strategies for all students (i.e., portfolio assessment).

Ensure that students receive report cards at the same intervals as their peers.
5.5 Practice: Instructional staff adapt the general education curriculum to address academic and/or community-referenced content areas to meet IEP objectives.

Strategies:

Obtain/develop technical assistance on adapting curriculum.

Set up peer coaching systems to maintain and reinforce instructional skills used to support included students.

Use mentor or lead teachers to conduct inservices and serve as peer coaches.

5.6 Practice: Instructional staff incorporate ability awareness into general education curriculum on diversity and the human experience.

Strategies:

Survey staff to determine their interest in and need for organized ability awareness education for themselves and for their students.

Include articles about inclusion in the school newspaper before and after these programs are implemented.

Provide information about inclusion in newsletters to all parents.

Schedule presentations by guest speakers who are individuals with disabilities.

Infuse issues on disabilities and diversity within the general education curriculum.

Select media (e.g., library books, films) about successful people with disabilities.
5.7 **Practice:** Instructional staff and related service providers ensure interaction with nondisabled peers in all activities

**Strategies:**

Conduct building level inservice training on strategies to facilitate social interaction.

Obtain/develop technical assistance on cooperative learning, adapting curriculum, natural supports, and facilitating social relationships.

Implement school site practices to promote the development of peer relationships (e.g., inclusion in activities across environments, transportation schedule, and coordinated school hours, etc.).

Establish mechanisms and procedures for creating structured interaction programs (e.g., peer tutoring, circles of friends) involving general education students (site-based work experience, service credits, elective courses where appropriate).

Utilize natural supports to facilitate social interaction (i.e., enlist support from peers in the general education classroom).

Examine each aspect of the program to determine naturally occurring opportunities for interaction.

Use adaptations of MAPS and Circle of Friends to develop peer friendships and natural supports.

Enlist student participation in instructional and school planning teams to identify existing clubs and extracurricular activities (e.g., utilize the Student Council in developing peer support).

Involve the special education teacher in using their expertise to sponsor clubs and include students.

Examine the role of the paraprofessional and involve them in working with nondisabled students as well as students with disabilities.,
5.8 **Practice**: Instructional staff implement positive behavior management strategies that utilize natural cues/corrections with support from related services personnel and other team members.

**Strategies:**

Develop and implement a comprehensive inservice plan with the parents of students with disabilities and school site personnel to address positive behavioral support strategies.

Use mentor or lead teachers to conduct inservices and set up peer coaching systems to maintain and reinforce positive behavior management skills.

5.9 **Practice**: Instructional staff demonstrate positive attitudes towards and age-appropriate interactions with all students.

**Strategies:**

Develop and implement a comprehensive inservice plan with parents and school site personnel to address ability awareness and teacher modeling.

Ensure that students are included in all activities (i.e., taking yearbook and class pictures, graduation, orientations, class trips).

**STUDENT INCLUSION**

**Part 6: Student Activities**

6.1 **Practice**: Students have access to all school environments for instruction and interactions.

**Strategies:**

Use heterogeneous grouping strategies.

Work with school site teams to review existing clubs and opportunities for peer support in facilitating participation.

Enlist student participation in instructional and school planning teams.

Utilize natural supports to facilitate social interaction.

Utilize the Student Council in developing peer support.

Enlist support from peers in the general education classroom.
Develop a plan for recruiting general education peers to facilitate peer tutoring or friends programs.

Develop a peer and/or family support system to enable all students to participate.

Utilize instructional and related services staff (i.e., therapists, paraprofessionals, etc.) to support students in inclusive environments.

6.2 **Practice:** Students participate in and are included in all activities such as:

- music  
- art  
- library  
- gym  
- lunch  
- assemblies  
- clubs  
- general education classes  
- home economics  
- work experience  
- recess/break  
- computer use  
- graduation exercises  
- field trips  

**Strategies:**

Ensure that all students are included in master scheduling process.

Develop a peer and/or family support system to enable all students to participate.

Develop a plan for recruiting general education peers to facilitate peer tutoring or friends programs.

Examine the role of the paraprofessional and involve them in working with nondisabled students as well as students with disabilities.

Utilize instructional and related services staff (i.e., therapists, paraprofessionals, etc.) to support students in inclusive environments.

Use heterogeneous grouping strategies.

Work with school site teams to review existing clubs and opportunities for peer support in facilitating participation.

Enlist support from peers in the general education classroom.

Enlist student participation in instructional and school planning teams.

Utilize the Student Council in developing peer support.
6.3 **Practice:** Students with disabilities are involved in extracurricular school activities such as:

- clubs
- dances
- after school recreation/day care programs
- scouts

**Strategies:**

Develop a peer support system and/or family support system to enable all students to participate.

Enlist student participation in instructional and school planning teams.

Enlist support from peers in the general education classroom.

Use other support staff (i.e., speech teachers, paraprofessionals, etc.) to provide instruction/therapy in general education and community environments.

Utilize the Student Council to develop peer support.

Work with school site teams to review existing clubs and opportunities for peer support in facilitating participation.

Develop a plan for recruiting general education peers to facilitate peer tutoring or friends programs.

Utilize instructional and related services staff (i.e., therapists, paraprofessionals, etc.) to support students in inclusive environments.

---

**Part 7: Interaction with Peers**

7.1 **Practice:** Students' instructional programs incorporate interaction with nondisabled students in the following areas:

- Communication/Socialization   - Home/Domestic
- Personal Management (includes Self Determination)   - Transition/Vocational
- Recreation/Leisure   - General Education/Academic

**Strategies:**

Obtain/develop technical assistance on cooperative learning, adapting curriculum, use of natural supports, and facilitating social relationships.
Develop school site practices which facilitate peer relationships (e.g., inclusion in activities across environments, teacher responsibilities within the school, transportation schedule and coordinated school hours, etc.).

Develop a plan for recruiting general education peers to facilitate peer tutoring or friends programs.

Develop a peer support system and/or family support system to enable all students to participate.

Enlist student participation in instructional and school planning teams.

Enlist support from peers in the general education classroom.

7.2 Practice: Students are involved with age-appropriate, nondisabled peers in structured interaction programs such as:

- Peer tutoring in school and community environments
- "PALS" (Partners at Lunch) or lunch buddies
- Circle of Friends
- Co-worker support at job training site
- MAPS

Strategies:

Obtain/develop technical assistance on cooperative learning, adapting curriculum, use of natural supports, and facilitating social relationships.

Put in place mechanisms and procedures for creating structured interaction programs (e.g., peer tutoring, circles of friends) involving general education students (site-based work experience, service credits, elective courses where appropriate).

Implement school site practices which promote the development of peer relationships (e.g., inclusion in activities across environments, teacher responsibilities within the school, transportation schedule and coordinated school hours, etc.).

Utilize instructional and related services staff (i.e., therapists, paraprofessionals, etc.) to provide instruction/therapy in general education and community environments.

Utilize natural supports to facilitate social interaction.

Use adaptations of Maps and Circle of Friends for all students.

Develop a plan for recruiting general education peers to facilitate peer tutoring or friends programs.

53
7.3 **Practice:** Social interaction programs are:

- Well organized
- Positive in orientation (emphasizing students' strengths, focusing on functional activities)
- Well-attended
- Supported by principal, faculty, and parents
- Viewed as a positive experience by students

**Strategies:**

Develop and implement a comprehensive inservice plan with parents and school site personnel which addresses social relationships.

Provide parents opportunities to visit model inclusive sites that have social interaction programs in operation.

Provide information about social interaction programs in newsletters to all parents.

Involve PTA in planning social interaction programs.

Involve parents in planning social interaction programs/activities at the site (e.g., via instructional planning teams, school site councils, site level inclusion task forces, etc.).

Evaluate outcomes of social interaction programs on an ongoing basis through student planning teams.

<td></td>
<td></td>
</tr>
<tr>
<td>3.11 The supports, aids, curricular modifications and other instructional methods required for the student to be successful in school and community settings are discussed during IEP meetings using a transdisciplinary approach.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.12 The supports, aids, curricular modifications, and other instructional methods outlined in the IEP are implemented and updated according to the student's progress.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Part 4: Collaborative Teamwork**

4.1 Teams meet weekly to plan instructional support services for all students.

4.2 The team collaborates to: 1) develop peer network/interactive systems; 2) adapt learning objectives for students within the context of the core curriculum; 3) make material and environmental adaptations; and 4) provide physical assistance as needed.

4.3 Teams collaborate to provide related services in inclusive settings.

4.4 Teams initiate systematic transition planning to support successful transition from one program to another.

4.5 Team members meet informally with one another to discuss ongoing inclusion issues and maintain continuous communication.

4.6 Teams assist families in accessing community resources.

* Status Key: 1 = Practice is effectively implemented; 2 = Practice is implemented but needs improvement; 3 = Practice is not implemented

#### STUDENT INCLUSION

**Part 6: Student Activities**

6.1 Students have access to all school environments for instruction and interactions.

6.2 Students participate in and are included in activities such as:

- music - general education classes
- art - home economics
- library - work experience
- gym - recess/break
- lunch - computer use
- assemblies - graduation exercises
- clubs - field trips

6.3 Students with disabilities are involved in extracurricular school activities such as:

- clubs - scouts
- dances - after school recreation/day care programs

#### Part 7: Interaction with Peers

7.1 Students' instructional programs incorporate interaction with nondisabled students in the following areas:

- Communication/Socialization - Home/Domestic
- Personal Management (includes Self Determination)
- Recreation/Leisure - Transition/Vocational
- General Education/Academic

* Status Key: 1 = Practice is effectively implemented; 2 = Practice is implemented but needs improvement; 3 = Practice is not implemented
