This is the second catalog of the National Park Service's Listing of Education in Archaeological Programs (LEAP). It consists of the information incorporated into the LEAP computerized database between 1990 and 1991. The database is a listing of federal, state, local, and private projects promoting public awareness of U.S. archaeology including prehistoric, historic, terrestrial, and underwater. The listing categorized these educational activities among adult education, popular articles, audiotapes, brochures, ceremonies/dedication/commemorations, classroom presentations, community outreach, exhibits, films, newspaper articles, popular publications, posters, press releases, school curricula (elementary, middle, secondary), public service announcements, radio spots/interviews, slide presentations, television spots/interviews/programs, tours, videotapes, and volunteer involvement. Information in the report has been organized into chapters by major product categories: (1) posters, (2) brochures, (3) exhibits and displays, (4) public participation programs, (5) education programs, (6) audios/videos/films, (7) broadcasts, (8) press articles, (9) popular publications, and (10) community outreach. Product subcategories provide additional methods and materials under the main category. The catalog is based on product descriptions, and all the reported public awareness activities are listed by their general programs with a project summary and an identification of sponsoring agency or organization and contact person. Cross-referenced indexes list products by state, detailed categories, sponsoring agencies, and projects or programs. The products included are usually geographically specific and cover all time periods of North American human occupation. The products integrate cultural and natural resources to reach a broad audience and meet specific conservation objectives. The objectives of the national strategy for federal archaeology are included. (DK)

NATIONAL PARK SERVICE
U.S. DEPARTMENT OF THE INTERIOR

1992
EXECUTIVE SUMMARY

This is the second catalog of the National Park Service's Listing of Education in Archeological Programs (LEAP). It consists of the information incorporated into the LEAP computerized database between 1990 and 1991. This database is a listing of Federal, State, local, and private projects promoting public awareness of American archeology—prehistoric and historic, terrestrial and underwater.

The listing categorizes these educational activities among adult education, popular articles, audiotapes, brochures, ceremonies/dedications/commemorations, classroom presentations, community outreach, exhibits, films, newspaper articles, popular publications, posters, press releases, school curricula (elementary, middle, secondary), public service announcements (PSAs), radio spots/interviews, slide presentations, television spots/interviews/programs, tours, videotapes, and volunteer involvement.

This catalog is based on product descriptions, and all the reported public awareness activities are listed by their general programs (e.g., education programs, community outreach) with a project summary and an identification of sponsoring agency or organization and contact person. Cross-referenced indexes list products by State, detailed categories, sponsoring agencies, and projects/programs.
Primary acknowledgement for the LEAP Clearinghouse must be made of the many individuals and organizations who designed, implemented, and then reported on the public awareness projects compiled in this database. They have been significant contributors to the preservation of our archeological heritage.

The LEAP database is maintained by the National Park Service (NPS) Archeological Assistance Division (AAD). Francis P. McManamon, AAD Chief and Departmental Consulting Archeologist, has been supportive of the LEAP Clearinghouse since its initiation, as has Jerry L. Rogers, NPS Associate Director, Cultural Resources. Ruthann Knudson, AAD Resource Preservation Team (RPT) Leader, is the LEAP project manager, and meeting the project’s computerization needs is directed by Veletta Canouts, AAD Data Preservation Team Leader. LaTia Adams, RPT clerk-typist, assisted with telephone verification of contact person information.

The National Conference of State Historic Preservation Officers has continued to provide critical project contract staff support for the LEAP project. Lawrence Karr has developed and maintains the computerized LEAP data management system, and Patricia C. Knoll inputs all Clearinghouse data, translating the submitted information into appropriate LEAP formats. Jean Alexander edited data and proofread this volume. Candace Clifford acquired illustrations, redesigned the cover, and stylized the page layout. Roger Friedman coordinated production of the volume and assisted in acquisition and preparation of illustrations.

INTRODUCTION

The Listing of Education in Archeological Programs (LEAP) is a computerized national clearinghouse that was established to collect, categorize, and disseminate information about public educational products and programs related to archeology. This database has been developed by the U.S. Department of the Interior, National Park Service (NPS), Departmental Consulting Archeologist, and Archeological Assistance Programs (AAP), in cooperation with Federal, State, and local agencies and private organizations throughout the United States.

The LEAP Clearinghouse contains, but is not limited to, information on:

- Projects or programs (including cooperative efforts among agencies) to protect archeological resources, and to educate the public about these resources;
- Projects or programs with avocational organizations and volunteers involving archeological survey, testing, excavation, analysis, or interpretation;
- Projects or programs with museums, academic institutions, historical societies, etc., for exhibits or displays about archeological resources; and
- Brochures, posters, videos, radio and television coverage, and other products of these efforts.

The LEAP Clearinghouse is intended as a reference for Federal, Tribal, State, and local agencies, museums, societies, educational organizations, and individual archeologists seeking information on existing projects, programs, and products to increase public awareness of archeology.

LEAP was initiated in 1987, and a summary of data received in calendar years 1987 through 1989 was published in 1990 (Knoll 1990). This volume describes LEAP Clearinghouse history and structure. The present volume includes information submitted to the Clearinghouse in calendar years 1990 and 1991.

The LEAP database is built upon information provided on a standard reporting form (Figure 1.2). Information in the report has been organized into chapters by major product categories: Posters, Brochures, Exhibits/Displays, Public Participation Programs, Education Programs, Audios/Videos/Films, Broadcasts, Press Articles, Popular Publications, and Community Outreach. Product subcategories provide additional methods and materials under the main category. For example, "School Education Programs" includes the subcategories of "Curriculum" (elementary, middle, secondary, adult) and "Classroom Presentations." Under each product, individual organizations (Federal, State, local, or private) are listed by the State in which the archeology project or program occurred. A contact with address and telephone number is included. The title of the product, descriptive summary, and date the information was reported complete the product record. For additional easy reference, there are indexes organized by State, agency, product category and title, and project/program title.

The information in the LEAP Clearinghouse is submitted voluntarily and, therefore, only covers a portion of the existing programs and products. The products produced through these programs are either one-of-a-kind efforts or components of larger cultural resource management or education programs. They are usually geographically specific and cover all time periods of North American human occupation. The products also integrate cultural and natural resources to reach a broader audience and to meet specific conservation objectives. They are often co-produced and co-sponsored among agencies and organizations.

Future editions of the LEAP summary report will be produced as supplements on a schedule commensurate with the level of new information received. It will be maintained as long as users supply information and find the summaries useful. The possibility of using the Clearinghouse database for telephone queries for the most up-to-date information has been discussed.

Information exchange through the LEAP Clearinghouse can assist in developing public outreach activities by acquiring sources of information about existing public awareness programs. For Federal agencies, it can be an effective tool in developing and recording public awareness efforts as part of the Secretary of the Interior's National Strategy for Federal Archeology (Figure 1.1). Information may be submitted to the LEAP
Clearinghouse by any Federal, Tribal, State, or local government organization, academic institution, archeological or historical society, museum, private foundation, or company that has used outreach methods and materials to promote an archeological project or program to the public.

Requests for, and submission of, Clearinghouse forms should be directed to the LEAP Coordinator, Archeological Assistance Division, National Park Service, P.O. Box 37127, Washington, D.C. 20013-7127 (ph. 202-343-4101 [FAX (202) 523-1547]).

INTRODUCTION

OBJECTIVES OF THE NATIONAL STRATEGY FOR FEDERAL ARCHEOLOGY

- Public Education and Participation: We need more and better public education about and opportunities for the public to participate in archeology—Archeology Week celebrations, open houses, tours, volunteer programs, films. Federal and other public agencies that conduct archeological investigations or manage archeological sites should include public participation and education activities throughout their projects and programs.

- Public Use of the Archeological Paleoenvironmental Record: We need public use of the archeological record of thousands of years of human adaptation to changing environments. This identifies the conditions in which people have lived and the changes made in society, technology, and human habits in response to changing climate and natural resources, and can help us understand and shape our present responses to changing environments.

- Fight Looting and Preserve the Archeological Record in Place: We need to focus attention on archeological site protection, provide increased law enforcement personnel trained in archeological protection, and use the strengthened Archaeological Resources Protection Act to prosecute looters.

- Interagency Cooperation in Information Exchange: Federal and other public agencies must work to improve archeological information exchange at the national, State or regional, and local levels.

- Site Inventories: Federal agencies need to find the means to undertake archeological inventories of the public lands, and should encourage Tribes, States, local governments, and private organizations and individuals to inventory and provide information about the distribution and characteristics of the archeological resources in this country.

- Curation of Collections and Records: Federal agencies must systematically preserve the artifacts, other excavated remains, and related records from archeological sites on the public lands they manage or control, and encourage other private and public organizations and individuals to do the same.

Title and Narrative Summary of each product (list each product individually, including multiple examples of the same product type; continue on back if necessary).

Product Type:
A. Poster  B. Brochure  C. Exhibit/Display  D. Volunteer Involvement  E. Archeological Site Tour/Open House  
F. Public Ceremony/Dedication/Commemoration  G. School Curricula (elementary, middle, secondary)  
H. Classroom Presentation  I. Adult Education  J. Film  K. Videotape  L. Audiotape  M. Slide/Audio Tape  
N. Public Service Announcement  O. Radio Spot/Interview  P. Television Spot/Interview  
Q. Television/Program (PBS type)  R. Newspaper Article  S. Press Release  T. Popular Publication  
U. Popular Article  V. Community Outreach

Note:
Classroom presentations include K-12 and college. Popular publications are considered to be books, guidebooks, magazines, and newsletters, etc., that reach a general audience. Popular articles appear in these publications. Community outreach specifically relates to presentations to local groups.

**Product Title:** Florida Indians  
Native Americans have lived in Florida for more than 10,000 years. Hunting, gathering, fishing, and agriculture were practiced. As time passed, Florida’s Native Americans grew in number and their cultures became more complex. They lived mostly near water. In the 1500s, Native Americans were decimated by disease, warfare, and slavery brought by Europeans and also from war with other tribes. By the 1700s their numbers were reduced to remnants. This 18- by 32-inch poster is printed on heavy cream colored paper with maroon and purple colors.

**Product Title:** Mangrove Coast  
This coast is rich in history. Amazing prehistoric animals, like the mammoth, giant sloth, and sabre-toothed tiger, roamed the area. Early Native Americans had complex societies. Early European explorers arrived seeking wealth but found only hardship and death. Pirates, Indian fighters, homesteaders, and future U.S. Presidents all participated in the history of the Mangrove Coast. This full-color poster depicts the history of Florida’s west coast from Clearwater to Fort Meyers up to 1900. The size is 24 by 36 inches and it is printed on high quality enamel paper.

**Product Title:** Seminoles  
In the early 1700s, a group of Creek Indians left their homes in Georgia and moved to north and central Florida. They were joined by other groups of Indians from Georgia, Alabama, and South Carolina. In the mid and late 1700s, still other Indians arrived who spoke a different language, Muskogee. These groups were to become known as Seminoles. This historically accurate poster tells the story of where the Seminoles originated and what happened to them after they arrived in Florida. The 18- by 32-inch poster is printed in brown and violet on heavy cream colored paper.

**Product Title:** Offenses Concerning Dead Bodies and Graves
This brochure describes and explains Florida Statutes 872.02 and 872.05 that deal with the destruction of sites containing Native American and other significant burials. It states "any person who willfully and knowingly disturbs ... destroys, mutilates, defaces, injures or removes ... human skeletal remains or associated burial artifacts ... is guilty of a felony . . . ."

**Product Title:** Protecting the Past for the Future
Time Sifters Archaeology Society designed and printed 10,000 copies of this two-color, eight-panel brochure. It describes problems facing Florida's non-renewable archeological resources on public and private lands, such as looting, development, and lack of identification. It provides information about how to protect sites by local ordinance, zoning options, State laws, growth management legislation, preservation grants, and citizen involvement.

Product Title: Woes Bar Petroglyphs
Published in April 1989 as Cultural Resources Information Series, Number 1, this eight-page brochure includes historic photographs, rock art sketches, a map, and quotations from early researchers, as well as general background on rock art and specific information on this important site. The need for a brochure about this site was identified in the draft cultural resource management plan for the Snake River Birds of Prey Area, completed in 1986 for this Area of Critical Environmental Concern (ACEC)/National Register of Historic Places district. The brochure was introduced during Idaho's first Archaeology Week to coincide with a popular public tour of the petroglyph field.
Date of Information: 1991

Product Title: Cahokia Mounds: Building Education
This brochure describes available teacher workshops, educational programs for school groups, day camps, and adults, as well as giving a program schedule and list of available educational resources.

Product Title: Cahokia Mounds: Calendar of Events
The brochure lists the various exhibit openings, lectures, children and adult craft classes, bus trips, festivals, special performances, and field schools held throughout the year at Cahokia Mounds.

Product Title: Cahokia Mounds: City of the Sun
This brochure gives locational and descriptive information about this State Historic and World Heritage Site at Collinsville. It also provides a historical overview of the Cahokian/Mississippian culture.

Product Title: Cahokia Mounds State Historic Site 1990: Native American Craft Workshop Program
This brochure is a listing of Native American craft workshops and activities for children and adults at Cahokia Mounds.

Product Title: Cahokia Mounds State Historic Site 1990: Native American Craft Workshop Program
This brochure describes available teacher workshops, educational programs for school groups, day camps, and adults, as well as giving a program schedule and list of available educational resources.

Product Title: Cahokia Mounds: Calendar of Events
The brochure lists the various exhibit openings, lectures, children and adult craft classes, bus trips, festivals, special performances, and field schools held throughout the year at Cahokia Mounds.

Product Title: Cahokia Mounds: City of the Sun
This brochure gives locational and descriptive information about this State Historic and World Heritage Site at Collinsville. It also provides a historical overview of the Cahokian/Mississippian culture.

Minnesota

Agency: Fish and Wildlife Service
Project/Program: Rice Lake National Wildlife Refuge
Contact: Ralph Lloyd
Manager
Rice Lake National Wildlife Refuge

Product Title: Rice Lake National Wildlife Refuge
This brochure describes the Rice Lake National Wildlife Refuge, which includes information about the natural and cultural resources of the area. It covers topics such as bird watching, fishing, hiking, and camping, as well as the history of the refuge.
Date of Information: 2000
Product Title: Changing Times, Changing Uses
This brochure accompanies an auto tour of Rice Lake National Wildlife Refuge, with 10 stops. The tour is based on the physical remains of 10,000 years of human occupation. Indian rice and maple syrup gathering, a Civilian Conservation Corp campsite, and other evidence suggest how people have used and managed the natural resources from the past through to the present refuge operations.

Date of Information: 2/91

Product Title: The Future of the Past
This two-page brochure provides a brief summary of the five important cultural eras occurring in the region now comprised by Voyageurs National Park. A short message also informs the public about protecting archeological resources.

Date of Information: 1/91

Product Title: Mastodon State Park
This brochure gives a historical overview of one of the most important archeological sites in Missouri, where evidence of the coexistence of humans and mastodons 10,000 to 14,000 years ago was first discovered by archeologists. A map and list of park attractions are included.

Date of Information: 5/92

Product Title: Mastodon State Park: Teacher's Programming Handbook
This guide provides information to teachers about available education programs at the park and how to plan a visit.

Date of Information: 12/91

Product Title: Nebraska Archaeology
This brochure informs the public of the nature and purpose of the Nebraska Association of Professional Archaeologists and the Nebraska Archaeological Society. It identifies contacts for further information. The brochure was developed and printed by the Nebraska Association of Professional Archaeologists.

**Product Title: Workshops in Archaeology**  
Workshops in Archaeology is an annual program presented by the State Museum of Pennsylvania on the Saturday before Thanksgiving. This day-long event is designed to provide instruction in a variety of subject areas related to archeology and the improvement of knowledge of past lifeways. All classes are conducted by professionals or experts and are directed to the lay level of comprehension. A single registration fee typically entitles registrants to take two or three 1-hour classes of their choice, observe technological demonstrations, participate in an artifact identification clinic, attend a film festival, and enjoy both a morning coffee break and a closing reception.

Product Title: Take Pride in America Archaeological Bookmarks

Nearly 2.9 million archeological preservation bookmarks, in six regional designs, have been printed since 1988, and distributed within Federal agencies and from the Archaeological Assistance Division of the National Park Service in response to requests, e.g., from Women's Clubs, Indian Tribes, schools, State offices, libraries, museums. The number of request letters indicates that the bookmarks are valuable to a variety of public audiences. The bookmarks are scheduled to be redesigned with new illustrations and a bilingual (English and Spanish) message.

Product Title: Public Exhibits on Cultural Resources and Paleontology

In 1989 the Bureau of Land Management's (BLM) Cultural Resources Program installed a permanent exhibit in the BLM Resources Library in the Federal Building in Anchorage, featuring paleontological remains found on BLM land in northern Alaska. This included fossil dinosaur bones, as well as a mammoth tusk. In 1990 this display was joined by two others designed to be replaced periodically with subject matter to involve archeology, history, and information related to the protection and preservation of cultural resources. All three public exhibits are an effort by BLM to help educate the public on such matters.

Product Title: Celebrate Idaho's Second Archaeology Week
This special display was created for the Boise District's Partner in Education school. Designed for the elementary level, the display featured prehistoric and historic artifacts and tools used by archeologists. The display remained in place for the month of April 1990.

Product Title: Cultural Resource Management in the Boise District
The Boise District maintains a collection of photographic enlargements of various sizes, all mounted on foam core. These photos depict various aspects of the cultural resource management program: different site types, excavation, vandalism problems, etc. Captions are created as needed, depending on the purpose of the exhibit, and all components are easily attached to modular panels using Velcro. Several different variations of the photo exhibit have been used at the Western Idaho Fair (1987-1990), Archaeology Week (1989-1990), Partners in Education school events, Oregon-California Trail Association meetings, and District office displays.

Product Title: Indian Uses of Native Plants
Installed on a large bare wall in the Boise District Office, this exhibit used pressed, framed herbarium specimens to illustrate some of the more commonly used plants. Each plant was accompanied by information about how it was used by Native Americans as food, medicine, raw material, ceremonial, etc. The exhibit remained in place from 1984 through 1990.

Product Title: The Energy Park Site: Portrait of a 1,000 Year Old Community

This traveling exhibit consists of three 2- by 3-foot panels that describe the prehistory of the Red Wing region during the Mississippian era, with a focus on the Institute for Minnesota Archaeology's archeological excavations of a 7-acre Mississippian village site.

Product Title: History Beneath the Waves: The Archaeology of Pike's Fort

This 19-panel traveling exhibit describes the Mississippi River expedition of Zebulon Pike. Pike was commissioned by the U.S. Army to travel from St. Louis up the Mississippi River to negotiate peace between the Dakota and Chippewa nations, purchase land for an Army post (Fort Snelling), record the landscape, and look for the source of the river. The Institute for Minnesota Archaeology is using evidence left by Pike to study early human-land-animal relationships along the prairie-forest border in Minnesota.

**Product Title:** Scenes from Spiro Life

Six to 15 artworks by Donald R. Johnson depicting daily and ceremonial life at Spiro Mounds, A.D. 900-1450, may be used as additions to Spiro Mounds exhibits. Approximately 400 square feet or 125 running feet of space is needed for the display. The artworks are ready for hanging. A brochure, news release, and black and white photographs are included. This exhibit is available nationwide.

**Product Title:** Spiro Mounds: Prehistoric Gateway, Present-Day Enigma

This exhibit focuses on the objects and excavations of the richest prehistoric mound site in the southwestern United States that flourished as a major trading, cultural, and religious center from A.D. 900 to 1450. The format is a free-standing panel and cases with objects, photographs, maps, graphics, and interpretive labels. Approximately 1,000–1,800 square feet of space is needed for the display. Included is a slide-tape program, videotapes of historic TV film on Spiro, videotapes of Native American artisan Knokovtee Scott, a teacher’s guide, a trunk of hands-on objects, brochure, poster, news release, publicity photographs, and sales items. It is available nationwide. Smaller versions of the larger Spiro exhibit are designed for small community sites including schools, libraries, and museums. The format and content are similar. Approximately 300–400 square feet of space is needed for this smaller display. Interpretive materials are the same as listed for the Spiro exhibit.

**Product Title: Education and Heritage Preservation**  
The Chicora Foundation provided this display for the First Annual South Carolina Cultural Conservation Conference, September 28 to October 1, 1991, attended by more than 115 teachers and researchers. The display illustrated concern with the preservation of South Carolina archeological heritage and public education programs, and brochures and publications were available.  

**Product Title: Exploring and Preserving Carolina's Past**  
The Chicora Foundation provided this display for the Fourth Annual Fall Field Day on September 28, 1991, an archeology...
program sponsored by the Archaeological Society of South Carolina and hosted by the South Carolina State Parks, Recreation and Tourism Department. The display illustrated various archeological sites and artifacts investigated by Chicora in the Carolinas. The staff distributed pamphlets on South Carolina archeology and spoke with more than 500 visitors.

**Product Title: Heritage Preservation is Good Business**

The Chicora Foundation provided this display for the American Planning Association Regional Conference in Charleston, October 2-4, 1991, which was attended by approximately 350 city planners from the region. The display illustrated concern with the preservation of South Carolina's archeological heritage in the face of increased development, as well as noting that increased heritage visibility results in greater regional pride and growing tourism.

Product Title: Prehistory of Orange County
Evidence of 11,000 years of civilization in Orange County is on display in the James Madison Museum. Two display cases hold artifacts chosen to highlight the wide range of tool types and lithic materials in use by Native Americans throughout their long occupation of the Piedmont area of Virginia. Artifacts included are primarily those found by Sandra D. Speiden during her site surveys in the Rapidan River watershed in the late 1970s. The display was designed by Sandra Speiden as an educational tool for increasing public appreciation of the fact that the "First Families of Virginia" arrived at least 11,000 years ago, at the end of the last Ice Age.

Product Title: Public Education - Grand Junction Resource Area
The primary focus for site protection in the Grand Junction Resource Area is through public education. Teachers and the Museum of Western Colorado staff initiated outdoor education programs incorporating archeology with all natural resources in 1990 and 1991. Two areas, Rough Canyon and McDonald Creek, provide self-guided trails, a teacher's handbook, and trained tour guides. Presentations to schools, service groups, and professional meetings are ongoing.

Product Title: Ute Trails Project
Hundreds of hours each year are spent in this important interagency project between the Bureau of Land Management Glenwood Springs Resource Area, White River National Forest, Colorado Archaeological Society, Frontier Museum, Colorado Historical Society, and many individuals. Volunteers assist cultural resource management personnel in identifying the trail so that it can be mapped and signed. In the summer of 1990, a Boy Scout troop replaced 17 Old Ute Trail signs, and for 1991, the Ute Trails Project was accepted as a national volunteer Passport In Time project for the Forest Service.

Product Title: Anasazi Heritage Center
Created following inundation of a rich archeological area by a new reservoir, this Bureau of Land Management museum stands near the site of two significant 12th-century settlements now excavated and interpreted. It is a Federal repository of archeological materials, displaying artifacts and exhibits about pioneering researchers and modern archeological techniques. A Discovery Area invites visitors to weave or grind corn by prehistoric means, and to open drawers with touchable artifacts. Microscopes demonstrate microanalysis, while educational videotapes and computer games provide insight into, and respect for, the past. The museum also contains 1/4-size replicas of a ninth-century pithouse and a "test trench" showing a typical archeological site in profile.

**Product Title: Field School in Geoarchaeology**

The 1990 Cahokia Mounds Field School was held in conjunction with the Office of Continuing Education, Southern Illinois University at Edwardsville. The field school's focus was to explore the environment of the American Bottom, how Cahokians altered the landscape, and the role the changes played in the rise and decline of the site. Participants gained experience in coring, remote sensing, and botanical sampling, as well as learning the prehistory of Cahokia. Students were able to enroll in this non-credit course for one or two weeks from August 6 to 17. Participants had to be at least 16 years old with an interest in the Cahokia mounds and a willingness to learn. Prior experience was not necessary.

**Agency:** Local Societies

**Project/Program:** Avocational Certification Program in Archaeology

**Contact:**
- Elizabeth C. Miller
  Archaeological Society of New Jersey
  3 Risler St.

**Product Title:** 

The Institute for Minnesota Archaeology honors significant contributions to archeology by avocational archeologists at an annual award ceremony in January.

**Product Title:** IMA Volunteer Program

The Institute for Minnesota Archaeology (IMA) has had an active volunteer program since its inception in 1980. Volunteers have contributed more than 3,000 hours per year to various IMA projects in field, laboratory, and outreach. They are high school students, retirees, and everyone in between. New volunteers are recruited through the Volunteer Action Council and the IMA Outreach Program. Members provide the IMA with much needed help in both laboratory and fieldwork. The professional staff at the IMA works closely with these volunteers teaching and supervising their work. The range of volunteer involvement runs from basic lab skills like sorting, cleaning, and preparing artifacts for cataloging, to highly technical independent archeologist-directed study. Annual awards recognize volunteer contributions.

**Date of Information:** 1/91
Product Title: Avocational Certification Program

The Archaeological Society of New Jersey is dedicated to the dissemination of information about, and protection of, the prehistoric and historic archeological resources of New Jersey. The Avocational Certification Program is a program of education by professional archeologists for non-professional archeology enthusiasts. It is intended to prepare avocational archeologists for responsible participation in planning, research, and preservation activities in New Jersey, and to develop a network of trained archeological advocates throughout the State. The program includes classroom instruction in all aspects of academic and cultural resources management archeology, readings, fieldwork, examinations, and a final project, all taught and supervised by professional archeologists under the auspices of the Archaeological Society of New Jersey. There are modest fees to cover costs, and membership in the Society is required.

Product Title: Flagstaff Mine Historic Archeology

Volunteers and college students participated in excavations at a historic gold lode mine as part of a cooperative research program funded by the Bureau of Land Management (BLM), Baker County, and Eastern Oregon State College. Students learned professional excavation and mapping techniques under the direction of the principal investigator. Tours were provided to visitors to explain how archeological investigations contribute to further understanding early mining technology and turn-of-the-century mining lifeways. Information and artifacts from the archeological investigations will be incorporated into the programs of the BLM National Historic Oregon Trail Interpretive Center.

Product Title: National Historic Oregon Trail Interpretive Center

Numerous local and State news articles have described progress toward construction of a Bureau of Land Management (BLM) center at Flagstaff Hill Interpreting the Oregon Trail and other historic archeological resources on BLM land. The project is a cooperative effort between the BLM, the State of
PUBLIC PARTICIPATION PROGRAMS

Oregon, Baker County, local citizen groups, and volunteers. Interpretive and architectural design plans have been completed by contractors. Construction of the center began in 1991 to open in Spring 1992. Interpretive exhibits, living history and educational programs address: Oregon Trail history and the emigrant experience; the impact of westward expansion on Native American lifeways; regional exploration, settlement, and gold mining developments; cultural resource management; and the history of the BLM.

Product Title: Texas Archeological Society Field School
Each June a field school is sponsored by the Texas Archeological Society (TAS). Participants must be current members of the Society, which is open to all who pay dues and sign the ethics statement. Between 300 and 500 people attend the 10-day session, which is directed by a professional archeologist assisted by TAS members as crew chiefs. Society members contribute untold hours to survey, excavation, and analysis of materials. The projects are most often salvage in nature but contribute to regional research plans. The schedule includes fieldwork, afternoon workshops, and evening lectures. A youth program is included and usually attracts 30 to 50 students, ages 8 to 13. A teacher training program also has been incorporated into the field school. Teachers are monitored and given credit through the Texas State Education Agency for career ladder advancement.

**Product Title:** Blackjack Historic Mining Cabin Restoration

A 1930s mining cabin has been removed from its original location and is in the process of being restored and permanently affixed to a trailer bed. It will be used as a "traveling museum" exhibit with a particular emphasis on educating the public about historic resource values and their need for protection. The project is being undertaken with volunteer monies, labor, and provision of materials. The restoration process had become a community effort that has greatly exceeded its initial education goals.

**Product Title:** Archeological Laboratory Work for Volunteers

Volunteers participate in standard archeological laboratory activities at the Archaeology Laboratory on the campus of the University of Wisconsin at Oshkosh. Most of the archeological materials are from the collections of the University and resulted from recent excavation or survey projects of the University. Typical tasks include: washing artifacts; processing soil samples; water screening and flotation; cataloging and labeling materials; and filling of field notes, maps, air photos, and other manuscripts. Laboratory sessions for volunteers take place on Thursday evenings, September through April of each year.

**Product Title:** Earthwatch Volunteers

Funding and volunteers provided by Earthwatch Expeditions are enabling fieldwork to survey and record an extensive rock art complex and test excavate associated archeological deposits. This is an ongoing project expected to last several years and provide data needed for the management of the rock art Area of Critical Environmental Concern, site preservation, and research on Plains Archaic cultures. A major focus of the research is investigating past climatic changes and resultant human adaptations. The research results should
contribute to knowledge about global warming needed for future decision making.

Product Title: Miner's Delight Cleanup and Cemetery Enhancement

In 1990 the historic mining townsite of Miner's Delight, which contains numerous standing historic buildings, became the focus of Bureau of Land Management (BLM) cultural resource management. High school volunteers assisted BLM personnel in cleaning up and removing modern trash from the historic site. Local Boy Scouts and adult leaders conducted historic research on the Miner's Delight cemetery and developed an enhancement and preservation plan for protecting marked and unmarked graves. The volunteers erected an ornamental wrought iron fence, donated by a local cemetery, around some of the graves.

Product Title: South Pass Historic Mining District Structures Stabilization

The South Pass Historic Mining District was once the heart of Wyoming's gold mining industry. Gold had been discovered near South Pass in 1842 by fur traders of the American Fur Company. By 1868 an estimated 1,500 people lived in the area within the boomtowns of South Pass City, Atlantic City, and Miner's Delight. The major mining operations included the Carlssa, Miner's Delight, and the King Solomon mines. Today the area contains numerous standing historic structures managed by the Bureau of Land Management (BLM). In 1990 a historic dynamite shack and a miner's cabin were stabilized by the BLM with help from local Boy Scouts and other volunteers.

Product Title: Passport in Time

The Passport in Time (PIT) program provides opportunities for individuals and families to work with professional archeologists and historians on National Forests across the country. Typical projects include archeological survey or excavation, historic structure rehabilitation, rock art documentation, and oral histories. There is no registration fee or cost for participation. The PIT Traveler, announcing the current season's projects, is published twice a year in March and September. PIT volunteers take part in vital environmental and historical research. Their participation directly contributes to the understanding of the human story in North America and to the preservation of the fragile sites that chronicle that story. Volunteers share in new discoveries, learn about the science of archeology, and meet many new friends.

Product Title: Pithouse Living: Prehistory and Archaeological Method

This chalkboard classroom presentation, with a target audience of third to sixth grades, is provided to allow students to see how a pithouse was constructed in both plan and profile views. The chalkboard allows the archeologist to collapse and fill the pithouse with the sands of time, and then excavate, using the eraser, to show how archeologists grid and map features. Handouts are used to practice determining the provenience of artifacts.

Product Title: Time Travel: From Paleoindian to Palute

This chalkboard classroom presentation is provided to elementary schools all year, with a target audience of third to fifth grades. Chalk drawings of prehistoric life illustrate the technology, subsistence, and shelter used by Paleoindian, Archaic Basketmaker, Anasazi Pueblo II period, and Palute peoples. The eraser allows the archeologist to demonstrate the passage of time, as well as the impacts of vandalism.

Product Title: Classroom Presentations
During 1990, Bureau of Land Management (BLM) archeologist Boma Johnson made presentations to a teacher group and a number of university anthropology classes. His topics included Native American belief systems, the value of archeological sites for education, and cultural resources in the Yuma District. James Green of the Havasu City BLM office gave four presentations to grade school students.

Product Title: So, What's So Interesting about Archeology?
This course was taught by Bureau of Land Management archeologist Boma Johnson at Arizona Western College as a general interest and fun approach to archeology for the public. The class met one night a week for 10 weeks and covered such topics as belief systems and archeology, ancient communication systems, mythology and oral traditions, and Native American and Old World religious texts.

Product Title: Anasazi Life
This computer program acquaints elementary students with aspects of Anasazi culture as revealed through rock art and architecture. Emphasis is on the idea that cultures change over time. The program is part of the Discovery Area exhibit at the Anasazi Heritage Center. Planned for distribution to schools on a 5 1/4-inch floppy disk, it is usable on Apple computers.

Product Title: Artifact Loan Kits
Nine small collections of artifacts are packaged for classroom use along with maps, charts, site plans, and other explanatory material. Several of the kits form a chronological series intended to demonstrate culture change through time. Other kits, such as a local ceramic type collection, are designed to function independently.

Product Title: The Last Pictograph
This computer program puts elementary students in the role of an archeologist, challenging them to interpret information from a southwestern prehistoric site. It especially emphasizes land-use ethics with an anti-vandalism focus. The program is part of the Discovery Area exhibits at the Anasazi Heritage Center. Planned for distribution to schools on a 5 1/4-inch floppy disk, it is usable on Apple computers.

Product Title: Museum Visit Orientation Packet for Teachers
Teachers planning a class field trip to the Anasazi Heritage Center receive a packet containing: descriptions of exhibits; educational materials available for loan; maps of the museum and archeological sites on the grounds; suggested class activities before, during, and after the visit; logistical considerations; tips for teachers to make their visit more worthwhile; and a form with postage-paid envelope requesting an evaluation of museum services.

Product Title: Native American Awareness Day Classroom Visit
A museum interpreter and an archeologist from the Bureau of Land Management San Juan Resource Area have presented programs about local archeology as a contribution to Native American Awareness Day at Montezuma-Cortez Junior High School in Cortez, during the autumns of 1989 and 1990. The presentations have focused on the principles of stratigraphy, the importance of context in studying artifacts, and the importance of protecting cultural resources.

Date of Information: 1991
PRODUCT TITLE: Archeology and History in the BLM - Lessons from the Past - Volunteering Can Work for All of Us

Throughout the Spring and Fall classroom presentations about cultural resources and preservation were given on nine different occasions to more than 480 students in fourth through sixth grades of the Durango, Bayfield, and Ignacio school systems. In addition, one day of outdoor education was presented to 47 students in fifth grade in the Cortez School System.

PRODUCT TITLE: Ceramics in Archaeology

Presentations were made to several pottery classes at Durango High School in April 1990. The differences in materials, construction, and firing techniques between prehistoric ceramics and modern pottery were discussed. The talks included a message about the value of archeology and site protection.

PRODUCT TITLE: Anasazi Educational Outreach

Anasazi Educational Outreach began as a component of a publicly funded archeological project at a new reservoir site in southwestern Colorado. Six volumes of teaching materials and lesson plans integrate prehistory into standard subjects. Each unit addresses specific elementary grades and such subjects as language, social studies, or science. Accompanying foot lockers contain educational aids and materials. The units are: Anasazi ABC's, for language and social studies in kindergarten through second grade; Native American Folk Tales of the West, for language and social studies in first to third grades; Anasazi Puzzle, for social studies in third and fourth grades; Culture Vulture, for social studies in fifth and sixth grades; The Archaeologist, for science and social studies in fifth and sixth grades; and Earth Trek, for science and social studies in fifth and sixth grades.

PRODUCT TITLE: Colorado Archaeology Preservation Week

From March 11-17, 1990, the Bureau of Land Management, Forest Service, Colorado Archaeological Society Roaring Fork Chapter, Frontier Museum, and Colorado Historical Society showed more than 800 students in Carbondale and Glenwood Springs special displays and slide shows, as part of Colorado Archaeology Preservation Week. The activities also were part of the students' elementary and middle school curriculum to increase awareness of Colorado's rich cultural heritage and diversity. The program was repeated in Glenwood Springs and Basalt from April 7-10, 1991.

PRODUCT TITLE: Public Education - Grand Junction Resource Area

The primary focus for site protection in the Grand Junction Resource Area is through public education. Teachers and the Museum of Western Colorado staff initiated outdoor education programs incorporating archeology with all natural resources in 1990 and 1991. Two areas, Rough Canyon and McDonald Creek, provide self-guided trails, a teacher's handbook, and trained tour guides. Presentations to schools, service groups, and professional meetings are ongoing.

Product Title: Tools of the Trade
A slide presentation about the variety and protection of local cultural resources is included in this educational kit for upper elementary school levels. The kit provides hands-on teaching materials in the form of a knapsack containing archeological equipment and narratives about how and why these tools are used and the importance of methodology.

Product Title: Cultural History Kit
Using artifact casts, replicas, and pictorial cards students become archeologists as they fit the clues together to describe prehistoric lifeways in the lower Illinois River Valley. Observation and critical thinking skills are used throughout this activity. The kit includes collections of evidence representative of six prehistoric cultural time periods. These collections include 21 artifact casts, numerous replicas, and clue cards giving information about houses, settlement, subsistence, and burials. The kit also includes sets of questions relevant to the materials found in each collection. The extensive Teacher's Manual includes a summary of prehistory in the lower Illinois River Valley/Midwest, a discussion of trends to observe, activity instructions, an answer key to the questions contained in each of the collections, a suggested reading list, and suggested follow-up activities. Kits are available at a cost of $75.00/2-week loan or $375/purchase. Arrangements for the loan or purchase of kits should be made one to two months in advance.

Product Title: Experimental Archeology Field Schools
During the spring and fall, middle school, junior high, and high school groups can participate in an experimental archeology field school. The purpose of this program is to present a ho-
EducatioN Programs

Product Title: High School Five-Week Workshop
During this program students are given extensive training in numerous aspects of archeological research including excavation, analysis, geomorphology, botany, zoology, experimental archeology, and lithic analysis. The students work in collaboration with professional archeologists to design independent research projects. These projects provide significant new information to the body of archeological knowledge. Participants can also earn high school credit in World History.

Product Title: One-Week Workshops
High school students and adults can participate in one or more 1-week sessions. Daytime hours are split between site and laboratory participation. Evenings are devoted to ecological study of the Illinois River valley. The cultural history of the region is explored in a hands-on manner with artifacts and data from the Center's collections. Lectures by the professional staff and distinguished guests also are a part of the weekly activities.

Product Title: Research Seminar for Adults
A 1-week adult field school session is offered to university age and adult participants. Archeological excavation and artifact analysis occupy the daytime, while evenings are devoted to ecological study, experimental archeology, cultural history, and a guest lecture.

Product Title: Teachers' Workshop
Participants in the Center for American Archeology (CAA) Teachers' Workshop study many of the diverse aspects of archeology as they develop teaching units that incorporate the method and theory of archeology into their school curricula. The CAA is internationally recognized for its interdisciplinary approach to the study of prehistoric populations. This same successful method is applied in the workshop to develop units that incorporate archeology into the study of math, science, and social studies. Participants may earn credit in education or anthropology through Sangamon State University in Springfield.

Product Title: Field School in Geoaarchaeology
The 1990 Cahokia Mounds Field School was held in conjuncti
   on with the Office of Continuing Education, Southern Illinois University at Edwardsville. The field school's focus was to explore the environment of the American Bottom, how Cahoki- kians altered the landscape, and the role the changes played in the rise and decline of the site. Participants gained experience in coring, remote sensing, and botanical sampling, as well as learning the prehistory of Cahokia. Students were able to enroll in this non-credit course for one or two weeks from August 6 to 17. Participants had to be at least 16 years old with an interest in the Cahokia mounds and a willingness to learn. Prior experience was not necessary.

Product Title: Indiana Jones: Fact or Fallacy
This is a 45-minute slide presentation that introduces students to different aspects of archeology. The program discusses the main tasks of the archeologist and the team approach utilized in contemporary archeology. It covers the techniques of archeological survey and excavation and when each procedure is warranted. It also answers commonly asked questions such as: (1) How does an archeologist know where to excavate? (2) What does an archeologist do in the winter? (3) What type of education and training are needed to become an archeologist? A 15-minute question-and-answer period is scheduled after the slides.

Product Title: Ancient Clues
This program is designed for approximately 25 students. Lasting three hours, Ancient Clues divides students into teams. As teams, they examine a kit consisting of replicated artifacts and ecofacts representing different site types, i.e., Clovis, Late Archaic, Havanna/Hopewell, etc. Utilizing this physical evidence, each team reconstructs the culture and/or activities represented in each kit. Each team is given the opportunity to examine all four kits. After all the kits have been examined, the teams report their findings to the entire group and each site type is discussed.
EDUCATION PROGRAMS

Product Title: Stories from Stone
This program is designed for approximately 25 students and lasts two hours. The first half hour is spent introducing the field of lithic technology. This introduction covers different methods of manufacturing stone tools. Students are divided into four teams. Each team receives a kit consisting of stone tools and/or by-products of stone tool manufacture. The students must then separate the artifacts and ecofacts into groups based on proper identification. After every artifact and ecofact has been identified, a staff member checks each group. Any items that are misplaced are discussed with the team. Each team will examine all four kits. The three activities listed above are not kits for sale. They are services provided by the staff of Archaeological Communications.

Product Title: Artifact Kit and Slide Presentation
An artifact kit containing up to 100 objects that represent 5,000 years of Maine prehistory is available to schools and other educational groups. Included in the kit are: several varieties of stone and bone tools; pottery; samples of animal hides; porcupine quills; ash bark and sweetgrass used in basketry; and animal food bones. A packet of Information and suggested activities is included with the kit. Rental cost is $25.00 and reservations may be made for 2 weeks. A complementary slide program also is available. It describes the discipline of archeology, how archeology is done, and the kinds of information archeologists seek to collect. An outline of Maine prehistory from the earliest inhabitants 12,000 years ago up to contact 300 years ago is included with accompanying script. Rental fee is $5.00 for 2 weeks.

Product Title: Members Field School Week
A 1-week field school is open to members of the Abbe Museum. The field week takes place in early June and provides members the opportunity to accompany staff archeologists on survey and testing expeditions. Field week activities include training in proper excavation techniques, identification of materials, prehistory of Maine, survey techniques, mapping, and cataloging.

Product Title: Archaeology in the Classroom: A Workshop for Teachers
This workshop was designed specifically for teachers of kindergarten through 12th grades on the subject of archeology in the classroom. The workshop held June 17-19, 1991, included: lectures by professional archeologists and a member of the Native American community; a hands-on demonstration of flintknapping; actual archeological excavation; discussion with teachers who currently employ archeological techniques and theories for learning in their classrooms; exploration of available curriculum units and experimentation with merging parts of these into current class units; archeological videos, exhibits, publications, and sample curricula available for browsing during the evening hours.

Product Title: IMA Classroom Presentation
The Institute for Minnesota Archaeology has developed a general demonstration lecture suitable for elementary and secondary students with slides and reconstructed artifacts for students to examine.

Product Title: Saturday Morning Archaeological Mini Classes
One-time, 3-hour mini classes are held on Saturday mornings during the winter and are designed to be entertaining, informative, and inexpensive. A 1- to 2-hour lecture is given by an
Institute for Minnesota Archaeology staff member, followed by at least one hour for hands-on experience. Past classes have included map making, flintknapping, bottle identification, the use of a transit, bone analysis, and more.

Product Title: What Is An Archaeological Laboratory?
This is a three-session class at the Institute for Minnesota Archaeology through the Compleat Scholar, University of Minnesota Continuing Education and Extension.

Product Title: Delaware Stone Age Tools
Students name and describe the function of a sample of "modern" tools. After they determine the characteristics necessary to perform a tool's work, they identify the New Jersey Indian tool that performed a similar function.

Product Title: Indians and Europeans
Artifacts, slides, questions, and discussion aid students in examining the cultural clash between New Jersey Indians and European settlers.

Product Title: Introduction to Archaeology
Using slides and discussion this program explains why careful collection of data and accurate description are necessary before archeologists can reconstruct past activities. Students have the opportunity to make inferences based upon their description of some Indian artifacts.

Product Title: An Introduction To: New Jersey Native Americans
After an overview of archeology as a source of information about past peoples, students view the exhibit "New Jersey's Native Americans: The Archaeological Record," to see environmental and technological changes that influenced the lifestyle of New Jersey's Indians. Third through fifth grades use a prepared activity sheet, while older students are taken on a gallery tour.
EDUCATION PROGRAMS

**Product Title: Learning About the Past from Artifacts**

This in-service training for teachers is a 1- to 2-hour program offered in the school or at the Museum, for teachers of fourth through 12th grades. It offers new approaches to teaching history using a study of artifacts as a point of departure. The workshop includes suggestions for hands-on activities, creative writing projects, group discussions, and methods for enhancing students' problem solving and observational skills. Practical ideas for both classroom projects and museum field trips are developed. Limited to 20 teachers per session.

**Product Title: A Look at New Jersey Indian Artifacts**

Using New Jersey Indian artifacts students discover the difference between description, inference, and guess. This program can be used as an introduction to a unit about the Lenape Indians or as an enriching experience.

**Product Title: Sandbox Archaeology: Observation, Description, Elaboration**

By excavating and recording what is found in a simulated site (indoor sandbox), students learn about tools and techniques used by archeologists in the field. They discover why archeologists need to work carefully and why they need to record where objects are found. Students have an opportunity to describe and then make inferences about individual objects that are found, and then, relating objects to each other, about the culture that produced the objects. In addition, students view the Native American Hall to see how archeologists reconstructed the story of New Jersey’s Indians.

**Product Title: What Is Archeology?**

This presentation is directed at fifth and sixth graders and gives a brief overview of what archeology is and what it is not. A selection of items is given to the students so they can categorize them as to whether they are "true" artifacts or not. An example of stratigraphy, using a trash can filled with different layers of trash, is used to show that the oldest material is on
the bottom. The importance of leaving archeological material where it is found is stressed.

Product Title: Archaeology Field Experience Program for Grades 5 through 12

The Museum's Archaeology Department offers a popular hands-on field experience program every Spring and Fall. Under the direct supervision of museum personnel, fifth through 12th grade students have a unique opportunity to actively participate in all aspects of archeological excavation, recording, and recovery at actual sites in northeastern Ohio. The program is designed to increase students' knowledge and appreciation of the methodology used to reconstruct past lifeways of Native Americans as well as early European Ohio settlers. Important issues concerning environmental change, human ecology, vandalism, and the preservation of cultural resources also are addressed.

Product Title: Summer Archaeology Field Experience

Participants joined the professional archeology staff of the Cleveland Museum of Natural History in the survey, excavation, and interpretation of prehistoric sites and early historic structures in northeast Ohio. They received training in archeological field techniques, methods of data recording, laboratory procedures, and analysis. The course was offered as a series of three 2-week sessions: 5 days a week, 8 hours a day from June 17 to July 26, 1991. Participants could sign up for one or more sessions. Excavations for each session were conducted at two sites within the greater Cleveland area, with laboratory work held at the Cleveland Museum of Natural History. Cost for the first 2-week session was $175, including a 1-year Museum membership, $150 for Museum members. The field experience was open to all interested adults 15 years and older, especially senior citizens. High school, undergraduate, and graduate credit was available.

Product Title: Archaeology Lab

The Archaeology Lab is an inquiry approach to archeology for students in sixth through eighth grades. The lab is conducted at the Oklahoma Museum of Natural History and includes a brief lecture and slide presentation about archeological technique and specific prehistoric cultures found in Oklahoma. Following the lecture, students excavate sandbox "sites" representing different cultures and activities such as mammoth hunters or Plains-Village farmers. Following the excavations, students identify the artifacts and 'artifacts' found and write reports in which they are asked to draw conclusions about the economic and other activities for which they have evidence.
EDUCATION PROGRAMS

Product Title: Diaries in the Dirt

Diaries in the Dirt is a free-loan kit available to schools in Oklahoma through the Oklahoma Museum of Natural History, Plains Indian Pioneer Museum, and Museum of the Great Plains. The kits contain two board games; one focuses on life in Plains-Village time, circa 700-900 B.P., and one simulates the techniques, rewards, and difficulties of an archeological excavation. In addition to the board games, a three-dimensional multicomponent "site" made of blocks is included for students to "excavate." Artifacts and features are discovered by the students as they excavate the site by turning over the blocks. Full-sized replicas of many of the artifacts "excavated" are included for hands-on learning. A user's guide accompanies the Ex-Site exercise to assist teachers in its application. A teacher's guide, archeological publications, and popular books also are included in each kit. The kits were developed by the Oklahoma Museum of Natural History and Oklahoma Archaeological Survey through the Oklahoma Foundation for the Humanities under an Exemplary Award from the National Endowment for the Humanities and Phillips Petroleum Foundation, KIrpatrick Foundation, and Robert S. and Grayce B. Kerr Foundation.

Product Title: Camp Elkanah Outdoor Classroom

A 3-day outdoor camp for fifth-grade students includes a program prepared by a Bureau of Land Management archeologist on prehistoric lifeways and regional prehistory. Students may use stone tools to prepare native plant foods, arrange projectile points according to a generalized chronology, and assume roles in a story relating Native American cultural traditions. Students and parents learn how the conservation of archeological resources contributes to understanding and appreciation of the nation's heritage.

Product Title: Resources Appreciation Day

Every year sixth-grade students from nine schools in Baker County participate in a 2-day interagency outdoor education program emphasizing the conservation of natural and cultural resources. A Bureau of Land Management (BLM) archeologist instructs students in regional prehistory, past lifeways, and the importance of conserving cultural resources. Students learn how archeological sites are formed and examine artifacts to identify the resource that has been culturally modified. Participation in time-travel and survival-strategy role playing games teaches the students how an understanding of the past will help them make informed decisions about resource conservation for the future. Begun in 1980, the program is sponsored by the Kiwanis Club, with participation by program specialists from the BLM, Forest Service, Soil Conservation Service, and Oregon State Department of Fish and Wildlife.

EDUCATION PROGRAMS

Product Title: Archaeology in the Classroom: A Teaching Tool
This 2-day workshop for teachers of second through eighth grade was held in February 1990. It incorporated artifacts and interpretations from southern Texas and Maya sites as a teaching model for introducing concepts and methods of inquiry related to anthropology and archeology. The workshop was divided into one in-house session and one fieldwork session. The workshop was approved by the Texas Education Agency for 12 hours of Career Ladder Advanced Academic Training credit.

Product Title: Clues from the Past: A Resource Book on Archeology
This teacher resource book was written for teachers of grades 3 through 8. The first section introduces the techniques of archeology; the second section relates specific information about each region of the State through time; and the final section consists of classroom exercises designed to teach about archeology through simulation and study.

Product Title: Texas Archeological Society Field School
Each June a field school is sponsored by the Texas Archeological Society (TAS). Participants must be current members of the Society, which is open to all who pay dues and sign the ethics statement. Between 300 and 500 people attend the 10-day session, which is directed by a professional archeologist assisted by TAS members as crew chiefs. Society members contribute untold hours to survey, excavation, and analysis of materials. The projects are most often salvage in nature but contribute to regional research plans. The schedule includes fieldwork, afternoon workshops, and evening lectures. A youth program is included and usually attracts 30 to 50 students, ages 8 to 13. A teacher training program also has been incorporated into the field school. Teachers are mentored and given credit through the Texas State Education Agency for career ladder advancement.

Product Title: Workshop in Archeology for AAT Credit
The Texas Archeological Society's annual field school included a 4-day workshop in archeology for teachers, held June 8-11, 1991, cosponsored by the Texas Historical Commission (THC) and the Clarksdale Independent School District for 32 Advance Academic Training credits. Teachers joined field crews excavating a Caddoan site on the Red River, attended sessions on classroom methods, archeology, and history, and heard THC lectures.

**Product Title:** Native Americans of the Piedmont  
This 1-hour presentation is tailored for use in grades kindergarten through 12, and also is used for adult groups. It includes slides, handouts, hands-on work with artifacts, and a lecture on the Native Americans of the Piedmont, circa 9500 B.C. to the present. Participants are encouraged to bring artifacts for identification, and are given information about the importance of preservation.

**Product Title:** MAP the County: How to Record an Archaeological Site  
This two-session course is for volunteers interested in recording archeological sites. Participants are taught by a professional archeologist the basics of U.S. Geological Survey topographical maps, Virginia Department of Historic Resources site forms, artifact types, and basic recording procedures. Emphasis is placed on protecting sites, not collecting them. To date, 300 archeological sites have been recorded with the assistance of volunteers.

**Product Title:** Teacher Recertification Training: Piedmont Prehistory  
This 10-hour course was developed for one college credit toward Virginia recertification, and has been used to train teachers from kindergarten through 12th grade, in all subject areas, including humanities, natural and social sciences, agriculture and vocational arts, fine arts, and special education. Teachers are encouraged to develop their own curricula with up-to-date information about Native Americans of the Piedmont. The course is taught through the Department of Sociology and Anthropology of James Madison University in Harrisonburg.

---
**Product Title:** Introduction to Great Lakes Shipbuilding

This workshop was designed as a half-day class for sport divers to provide training for basic underwater surveys. The workshop taught the fundamentals of ship architecture, using Great Lakes wooden and steel ships of the 19th and 20th centuries. It also examined vessel design evolution, and the use of archeology to document historic maritime architecture. Hosted by the Manitowoc Maritime Museum, the workshop included presentations by a wooden model shipbuilder and a shipbuilder from a modern steel shipyard, as well as museum gallery tours of full-size vessel cross-sections and models of Great Lakes ships. Photocopied handouts were included. This free class was offered by the State Historical Society and Manitowoc Maritime Museum from 1988 to 1991.

**Product Title:** Introduction to Underwater Archeological Survey

This workshop was designed as a half-day class for adult sport divers with an interest in the rudiments of underwater archeology survey. Based on approaches used for the 1988 field survey project in Northern Door County, divers received introductory lectures on underwater archeology survey methodology, equipment, purposes for conducting surveys, and survey reporting. The workshop was designed to interest divers in conducting their own surveys of underwater archeological sites to assist the State Underwater Archeologist in inventorying and recording basic data about State underwater archeological resources. The class has been taught at various times and places around the State, and has resulted in increasing amounts of avocational survey data and better mapping skills, and in the formation of the amateur Wisconsin Underwater Archeological Association. Photocopied handouts are provided for the class.

**Product Title:** Underwater Archeology in Wisconsin

This slide presentation has been presented in various forms to students of all ages from kindergarten through 12th grade, as well as archeologists and historical societies, State and National Park interpretive programs, dive clubs, and to university undergraduate and graduate students of archeology. The program is narrated by the State Underwater Archeologist, is offered as requested, averaging twice a month, and introduces underwater archeology methods, basic equipment, and pioneering projects and individuals in the field. It also examines the underwater archeology conducted in Wisconsin, and the State's current efforts to inventory and preserve underwater archeological resources, illustrated with slides from State Historical Society field projects.

Product Title: Cultural Resource Management and the Bureau of Land Management

A total of 11 presentations were given before a variety of groups from October 1989 to September 1990 by Jude Carino, Bureau of Land Management (BLM) Casper District Archeologist. These presentations were given to more than 675 individuals. Groups included school children from kindergarten through high school, college classes, recreation groups, professional and avocational societies, and a variety of public land user groups, such as range, minerals, and utility users. Topics were varied, but centered around cultural resources in the local area, cultural resources and public land management, cultural resource compliance, and multiple use management of public land. The presentations were given as part of the public outreach program of the BLM and specifically the new BLM initiative, Adventures in the Past. The Casper District continues to maintain an active outreach program.

Project/Program: Dig 2
Contact: Interact Publishing
P.O. Box 997
Lakeside, CA 92040
800-359-0961

Product Title: Dig 2: A Simulation of Archaeological Investigation of a Vanished Civilization

This copyrighted simulation is designed to be used in middle or upper elementary grades. It calls for a class to be divided into two groups that will work independently throughout the simulation. The class first discusses categories of cultural activities or topics such as the economy, food, shelter, political organizations, arts, etc. The two groups then work separately and create their own "civilizations." Each group designs artifacts and art works that express the beliefs and activities of its created cultural system. The artifacts are then buried and "excavated" by the other group, which then has the task of interpreting the excavated civilization. This is a long project, but is easily incorporated into the study of ancient civilizations. It does overly emphasize the artifact as source of information and ignores the importance of provenience and other locational data. This particular drawback can be compensated by the classroom teacher if he or she is aware of it. It is available for $47.00 plus shipping and handling.

Product Title: Changing Visions of the Past  
This 28-minute video tells the story of how archeologists have studied the rich archeological heritage in and around Lake Pepin on the Mississippi River in Wisconsin and Minnesota during the last 140 years. The underlying theme of the program is that although the materials and data studied by archeologists do not change, the archeologists’ perception of the past as portrayed by these materials does change.

Product Title: Ground Truth: Archaeology in the City
This film documents the archaeological excavation of Philadelphia's First African Baptist Church Cemetery. The remains of more than 140 individuals buried between 1822 and 1841 were recorded at this site, providing important information on health, nutrition, and acculturation among early black Philadelphians. The film details all aspects of this important excavation and stresses the value of historical archaeology for explaining the overlooked and underrecorded elements of the nation's history.

Product Title: Archaeology Is Good Business  
On March 22, 1991, Michael Trinkley, Director of the Chicora Foundation, was interviewed on "The Free Market," a WVOX radio program hosted by investment counselor, Ben Rast. It was explained during the interview that a developer or business can collaborate with archeologists, resulting in increased residents' pride and tourism, in conjunction with the preservation and protection of archeological sites throughout the region.

Product Title: Archeological Testing at the Stoney/Baynard Site  
Michael Trinkley, Director of the Chicora Foundation, was interviewed by Beaufort SC-ETV at the Stoney/Baynard site in May 1991. The Foundation excavated a portion of this late 18th/early 19th century plantation site. The television interview focused on the importance of the site archeologically, and as the only site with a standing tabby structure remaining on Hilton Head Island.

Product Title: Preserving Archeological Sites  
Michael Trinkley of the Chicora Foundation was interviewed June 10, 1991, on the WIS-TV "Mid-Morning Show," and discussed the Foundation's efforts to preserve the archeological heritage of South Carolina. He also discussed future goals, as well as the variety of programs Chicora provides for interested groups and schools. He spoke on the television program again August 20, 1991, about existing and pending legislation to protect South Carolina archeological sites. Also discussed were the destruction and vandalizing of unprotected sites and the importance of these sites to the local, State and regional cultural heritage. He pointed out the importance of South Carolina heritage to the tourism business.

Product Title: Protecting Archeological Sites  
Michael Trinkley of the Chicora Foundation was interviewed on August 28, 1991, on the "John Wrisley Show," a WVOX radio program, on the subject of existing and pending legislation to protect South Carolina archeological sites. Also discussed were the destruction and vandalizing of unprotected sites, and the importance of these sites to the local, State, and regional cultural heritage. He pointed out the importance of South Carolina heritage to the tourism business.

Product Title: "National Historic Oregon Trail Interpretive Center"

Numerous local and State news articles have described progress toward construction of a Bureau of Land Management (BLM) center at Flagstaff Hill interpreting the Oregon Trail and other historic archeological resources on BLM land. The project is a cooperative effort between the BLM, the State of Oregon, Baker County, local citizen groups, and volunteers. Interpretive and architectural design plans have been completed by contractors. Construction of the center began in 1991 to open in Spring 1992. Interpretive exhibits, living history and educational programs address: Oregon Trail history and the emigrant experience; the impact of westward expansion on Native American lifeways; regional exploration, settlement, and gold mining developments; cultural resource management; and the history of the BLM.

Date of Information: 2/91

Product Title: "Snake River History at BLM Recreation Site"

Local press articles provided an overview of the history of the Snake River area in connection with improvements at a Bureau of Land Management-developed recreation site. One article described the land-use history of the river canyon from Native American occupations to early Euro-American agricultural, transportation, and mining developments. Many
of the archeological or historic sites representing early land use were inundated by Brownlee Reservoir in the 1960s.

**Product Title:** "Archaeologist Digs Company's Efforts"  
This article by Jill L. Norman in the January 24, 1991, Charleston Post-Courier, "This Week," described excavations of property on Kiawah Island, for Kiawah Resorts Associates. Several prehistoric and historic sites were examined, including that of the Shoolbred plantation house.

**Product Title:** "Artifacts Spared in Construction"  
This article by Kris Sykes appeared in the July 5, 1991, Camden Chronicle-Independent. It detailed the survey of property of Allied Signal's Oak/Mitsui plant prior to development. Six prehistoric sites that will contribute to the knowledge of the lifestyles of South Carolina's prehistoric Indians were discovered.

**Product Title:** "Developers Threatening Burial Sites"  
This article by Dave Moniz appeared in the June 3, 1991, Columbia State and included an interview with Michael Trinkley, Director of the Chicora Foundation, who has cooperated with developers, businesses, and attorneys to locate and identify old cemeteries to prevent their destruction by development. He also has demonstrated the advantages of preserving the sites, and greenspacing the areas to create passive parks inside developments.

**Product Title:** "Many Sites Unprotected from Looters"  
This article by Grayson Smith, which appeared in the Beaufort Gazette, discussed the irreversible damage done to archeological sites by pot hunters and collectors. It mentioned that more legislation is necessary to protect sites, and that the public must be educated about the importance of these sites.

**Product Title:** "Remains of 1750's House Found Along Hwy. 17"  
This September 5, 1991, article by William H. Whitten appeared in the Beaufort Lowcountry Ledger reporting on the investigation of a site along Highway 17, near Beaufort. It discussed the importance of the site, which includes a 1750s house site, a Civil War fortification, and a late 19th/early 20th...
**PRESS ARTICLES**

century African-American cemetery, and also explained the importance of this site to the heritage of South Carolina.

**Product Title:** "S.C. History Being Lost to Vandals"

This article from the Associated Press appeared in the August 7, 1991, Charleston Evening Post, reporting on the lack of education and legislation necessary to protect archeological sites in South Carolina. The controversy over an earthwork fortification built under the direction of Robert E. Lee was mentioned. Publicity on the site resulted in vandalism that could destroy it, yet there are no laws to protect it.

**Product Title:** Newspaper Stories about Thunderbird Archaeological Site

The 50th Anniversary project of the Archeological Society of Virginia (ASV), undertaken in 1988 and still underway, is the rescue from destruction of the 11,000-year-old Thunderbird Archaeological Site, a National Historic Landmark. The residential development lots encompassing the site are being purchased by Thunderbird Research Corporation (TRC) through the cooperative efforts of the ASV, TRC, the Virginia Department of Historic Resources, private organizations and foundations, corporations, and individuals throughout the world, to provide permanent protection. The project is gaining wide-spread interest as a model on which preservation efforts for other archeological sites can be based. Numerous articles and editorials about the project have appeared in the Washington Post and other newspapers.

**Product Title:** Bell Site Newspaper Articles

Since 1990 numerous news and feature articles about excavations at the Bell site (47WN9) in Winnebago County by the University of Wisconsin at Oshkosh have appeared in local and regional newspapers. The Bell site is the location of a fortified village occupied between 1680 and 1730 by the Mesquakie (Fox Indians). In 1716 the French and their allies mounted a major military expedition against the Mesquakie, besieging the village and bombard ing it with mortar fire. Sub-
sequent expeditions against the Mesquakie, in 1728 and 1730, finally drove them from eastern Wisconsin.

**Product Title:** "BLM Attaches 19 Stipulations to Wagon Trail OK"

This article was printed in the Worland Daily News, June 9, 1990, about the wagon train that followed the approximate route of the Bridger Trail, and celebrated both Wyoming's Centennial and the Bridger Trail. The majority of the route was on Bureau of Land Management land.

**Product Title:** "BLM Landswap near Meeteetse Mulled"

The Bureau of Land Management (BLM) is considering a trade of small tracts of public grazing land for 1,517 acres of private land. Assurance of better public access, preservation of recreational, historical and cultural resources, including a stone cabin, and wildlife habitat management are issues the BLM points to in explaining the trade. A report of this was printed in the July 8, 1990, Casper Star Tribune.

**Product Title:** "Legacy of the Bridger Trail Saved"

An interpretive and commemorative sign was dedicated at the Duck Swamp Recreation Area to provide public information regarding the Bridger Trail. This was a Wyoming Centennial Celebration event. Funds for the sign were provided by the Wyoming Centennial Wagon Train, Wyoming Highway Department, Wyoming State Historic Preservation Office, and the Bureau of Land Management. The dedication took place while the Wyoming Centennial Wagon Train was in Worland. The Worland Daily News reported this event June 19, 1990, as well as an earlier article "Trail To Be Marked Sunday By BLM" on June 15, 1990.

**Product Title:** "Local Business Helps Save Our Past for the Future"

This newspaper story from the February 9, 1990, Northern Wyoming Daily News in Worland highlighted the activities of a local private consulting firm.

**Product Title:** "Officials to Develop Historical Pictograph Site Near Thermopolis"

State, Federal, and Wind River Indian Reservation officials agreed to develop the Legend Rock site at Hamilton Dome for tourism. The site, near Thermopolis, consists of rock etchings believed to have been made 2,000 years ago, with the most recent being made about 700 years ago. This was reported in the Laramie Boomerang on August 19, 1990.

**Product Title:** "Public Land Users Warned Not to Remove Artifacts"

This general article warning readers about illegal removal of artifacts and certain fossils from public land was printed in the January 25, 1990, edition of the Greybull Standard.

**Product Title:** "Workers Disturb Artifacts: Pipelining Crew Strays (sic) onto Site"

Heavy equipment operated by a Marathon Pipeline crew was moved onto an open prehistoric campsite that may have been used for several thousand years. A portion of the 10-acre site was destroyed. Marathon Pipeline and the Bureau of Land Management discussed mitigation strategies. A report on this appeared in the April 13, 1990, Billings Gazette.

**Date of Information:** 3/91
Product Title: "Natural Corrals: Natural Concern, BLM Wants to Save Area"

The Natural Corrals, a popular attraction and recreation area for local residents, is located on the eastern edge of Zirkel Mesa. The Bureau of Land Management (BLM), in recent years, has voiced concern about an increasing problem of degradation to the area. The BLM is asking for voluntary cooperation in promoting responsible public use. An article on this mentions BLM District Ranger Lee Krum, Green River Resource Area geologist Randy Porter, and Green River Resource Area archeologist Russel Tanner. The story and a photo spread were printed in the May 19, 1990, Rock Springs Daily Rocket-Miner.

Date of Information: 3/91

Product Title: "Beckwourth Was Classic Explorer"

Beckwourth was one of the early frontiersmen who scouted the southwestern part of Wyoming. His autobiography is full of the "tall tales" for which the mountain men were famous; however, it is all part of the mountain man "mystique." An article on this was written for the Wyoming Centennial Celebration, and appeared in the February 2, 1990, issue of the Rock Springs Daily Rocket-Miner.

Product Title: "Fremont Was Early Visitor to Fabled Sweetwater Country"

This news story was the first of a series of articles about Wyoming history in celebration of the Wyoming Centennial. The article was about John C. Fremont and his role in the settling of Sweetwater County and southwestern Wyoming. It appeared in the Rock Springs Daily Rocket-Miner on January 14, 1990.

Product Title: "Stansbury Found Strange Trail 'Grave'"

This article from the March 9, 1990, Rock Springs Daily Rocket-Miner was printed in celebration of Wyoming's Centennial. In 1849, Captain Howard Stansbury was given the task by the Corps of Topographical Engineers of following the Oregon Trail west to Utah. There he was to survey the Great Salt Lake and the Salt Lake Valley. The article relates incidents occurring along Stansbury's trip toward Salt Lake.

Product Title: "Winter of 1856 Caught Martin Handcarts"

This article is taken from the February 2, 1990, Evanston Herald, from a series about Wyoming history for the Wyoming Centennial Celebration. Mormon emigrants pulling handcarts and on their way to Salt Lake City encountered severe winter conditions. No accurate count of the number of deaths is recorded. The figures range from 135 to 150 fatalities in the Martin Company alone. The Willie Company recorded 67 deaths, and numerous uncounted deaths from the Hodgett Wagon Train boost the total over 200. It was the greatest single tragedy in the entire history of the western migration.

Product Title: "Wyoming Centennial Commission Funds Oregon/Mormon Trail Signing"

The Bureau of Land Management Rock Springs District announced that $5,000 was awarded by the Wyoming Centennial Commission to help fund the District's Oregon/Mormon Trail signing through a gift catalogue project. The Rock Springs District began raising money for trail markers and interpretive signs in 1987. Since then, 11 signs and more than 100 markers have been installed. This was reported in the June 14, 1990, Pinedale Roundup.

Date of Information: 3/91

Product Title: "Bairoil Site of 'Significant' Archaeological Digs"

Bairoil was one of the early frontiersmen who scouted the southwestern part of Wyoming. His autobiography is full of the "tall tales" for which the mountain men were famous; however, it is all part of the mountain man "mystique." An article on this was written for the Wyoming Centennial Celebration, and appeared in the February 2, 1990, issue of the Rock Springs Daily Rocket-Miner.
Archeological excavations of nine sites in the Wertz oil field are providing a "major contribution" to the study of Wyoming prehistory. Pit houses and primitive tools dating from 2,000 to 7,500 years ago have been uncovered at the sites. The $635,000 project is funded by Amoco, which holds oil leases from the Bureau of Land Management in the area. This was reported in the July 15, 1990, issue of the Casper Star Tribune.

Product Title: Dedication Photograph in Newspaper

More than 100 people were present for the dedication of the Indian Bathtubs Trail that was constructed by members of the Loch Leven Future Farmers of America Chapter, in conjunction with the Bureau of Land Management and Encampment-Riverside Centennial Committee. A photograph of the event appeared in the July 18, 1990, Saratoga Sun.

Product Title: "BLM Gains Land In Johnson County"

The Bureau of Land Management (BLM) accepted control of 880 acres of land in Johnson County, including the Outlaw Cave trailhead, in the first land exchange under a 1988 agreement with the State of Wyoming. Management will be directed to accommodate the land use that is occurring now, while protecting the natural and valuable cultural resources that make the area so special. The BLM will provide trail maintenance and marking along the entire Outlaw Cave Trail. This was reported in the Buffalo Bulletin on March 29, 1990.

Product Title: "Johnson County Profile ... Archeology More Than Job for B.J."

Product Title: "Mountain Monument Dedication This Friday"

This article from the June 28, 1990, Buffalo Bulletin details the Bureau of Land Management dedication of a monument for the Wyoming Centennial. The monument is styled after shelters built by shepherders for many generations and is dedicated to those who have trailed sheep to and from summer pastures in the southern Bighorn Mountains.

Product Title: "Archaeological Excavations at the Crowders Creek Site: A Late Woodland Farmstead in the Catawba River Valley"

This article summarizes results of excavations in the south-central Piedmont region of North Carolina. Both excavations and subsequent analyses were accomplished with volunteer participation by interested individuals and groups from the Gaston County area. Several cultural-historical components, Early Archaic through Late Woodland periods, were identified on the basis of lithic and ceramic analyses. Excavated features were dated to the Late Woodland period by radiocarbon dating and artifact attribute analysis.

Date of Information: 9/91
Product Title: "Public Archaeology at the Schiele Museum: The Carolina Piedmont Archaeology Project"

This is an article about the accomplishments of avocational archaeology volunteers, and about the conduct and ongoing activities of the Carolina Piedmont Archaeology Project. This project has achieved a considerable measure of success in drawing on a variety of State, local, and private contributions to put together a multi-year regional archaeological survey and excavation project. Archeological field schools for college credit have been cosponsored by the museum with Gaston College, the local community college, and the University of North Carolina at Charlotte. Field schools have been conducted each year since 1985 with opportunities for avocational archeologists to get involved on weekends. Accomplishments of the project would not have been possible without the input of volunteers.

Product Title: The Mouse Raid

This is a children's book based on an oral tale related through generations of Hidatsa Indian people. It is the story of an informal club of young Hidatsa boys who, through the club's activities, acquire the skills necessary to become hunters and warriors in adult life. The story is by Marlene Ward, Joyce Burr, and Janet G. Ahler, and illustrated with watercolor paintings by Marcia Goldstein. It was published in 1989 by the Theodore Roosevelt Nature & History Association, Medora, North Dakota.

Product Title: People of the Willows: The Prehistory and Early History of the Hidatsa Indians

This is a popular book that presents the results of 15 years of research at the Knife River Indian Villages National Historic Site in central North Dakota. It describes the lifestyle of the Hidatsa Indians, summarizes their prehistory and history since A.D. 1100, relates their important role in the historic fur trade of the Northern Plains, and describes the effects on their culture resulting from contact with European-Americans. It also describes individual archeological sites in the park, and relates the history of archeological research in the region and in the park. It was written by Stanley A. Ahler, Thomas D. Thiessen, and Michael K. Trimble, and published in 1991 by the University of North Dakota Press, Grand Forks.

Product Title: "Remnants of Ancient Indian Occupation Unearthed in Southeast Oregon"

District archeologists conducted subsurface investigations of a large archeological site in the Trout Creek Mountains that yielded evidence of long-term occupation spanning the past several thousand years. The information potential of the site was described in a July 1990 Bureau of Land Management newsletter article distributed to 2,000 individuals and organizations. The article points out that illegal artifact collection turns potentially valuable scientific data into mere curios.

Product Title: Bias Against Archaeology?
This letter from Michael Trinkley, Director of the Chicora Foundation, was published in the September Issue of Historic Preservation News. The letter discusses the fact that archeological sites and their protection and promotion are seldom mentioned by people concerned with "preservation." Too often preservationists are concerned only with standing structures, not the archeological remains or evidence of former structures.

Product Title: Chicora Foundation Research, Volume 5, Numbers 1-3
This quarterly newsletter produced by the Chicora Foundation contains articles describing the Foundation's work in heritage preservation, including archeology, repatriation, conservation of artifacts, fire safety programs for museums and libraries, preservation of collections, heritage marketing, site preservation, the study of architecture in archeology, and the creation of a universal site survey form for the documentation of looting at archeological sites. The newsletter is sent to universities, libraries, businesses, public schools, and interested individuals.

Product Title: Preservation of the Past
This letter from Michael Trinkley, Director of the Chicora Foundation, was published in the Spring 1991 issue of the South Carolina Historical Society's Carologue. The letter discusses problems curatorial facilities and individuals may have in protecting archeological and historical collections from environmental damage, such as heat, humidity, or insect infestation. The letter also mentions several seminars the Foundation offers to the public in which preservation issues are discussed.

Product Title: Discoveries at the Blue Heron Site: An Archaeological Study in Milton, Vermont

The intention of environmental review archeology is to preserve cultural information for the public. Often, however, reports are seen by a limited audience. In the ongoing commitment to make this information more available to the public, the Archaeology Consulting Team has prepared two booklets to report on three interesting and important archeological sites in Vermont. Published in 1990, this booklet describes the 1988 and 1989 survey of an area to become a new housing development in the town of Milton. An archeological study was part of the environmental review process for the State. The archeologists were searching for evidence of the ancestors of the Abnaki Indians still living in that part of Vermont.

Product Title: Discoveries at the Oriole and Cold Crow Sites: An Archaeological Study in South Burlington, Vermont

This booklet, published in March 1991, describes the survey of an area for the proposed construction of a new office building in South Burlington. The archeologists tested the area for evidence of the Abenaki Indians and European settlers.

**Product Title:** "Nautical Archeology in Wisconsin: The 1988 Field Season"

This three-page illustrated article appeared in a special issue about Wisconsin maritime history in the Brown County Historical Society journal, Voyageur (Vol. 6, No. 1; September 1989). It reviewed the findings of the 1988 field survey of underwater archeological sites in Door County, and discussed the need for better public education and State management for the preservation of historic shipwrecks and other underwater archeological resources.

**Product Title:** "The Fleetwing: A Preliminary Report"

This nine-page illustrated article appeared in the quarterly publication of the Manitowoc Maritime Museum, Anchor News (Vol. 20, No.3; May 1989). It discussed archeological investigations of a Manitowoc-built schooner, wrecked in 1888 in Garrett Bay. The article addressed project findings as well as the need for better protection of State underwater archeological resources from looting.

Product Title: Dankworth Ponds Outdoor Classroom

The Bureau of Land Management (BLM), in cooperation with Arizona State Parks, has launched a program of outdoor cultural education with the construction of a pithouse, a replica typical of those used by Mogollon people who inhabited southeastern Arizona 1,200 years ago. Classes from two Safford schools participated in the construction. Plans include expansion of the facility at Dankworth Ponds State Park to include structures and use areas spanning Paleolndian, Archaic Pithouse, Pueblo, and Historic periods. Use of the facility by local school teachers and the BLM is intended to deliver a message about human adaptation through time and environmental awareness.

Product Title: Public Education - Grand Junction Resource Area

The primary focus for site protection in the Grand Junction Resource Area is through public education. Teachers and the Museum of Western Colorado staff initiated outdoor education programs incorporating archeology with all natural resources in 1990 and 1991. Two areas, Rough Canyon and McDonald Creek, provide self-guided trails, a teacher's handbook, and trained tour guides. Presentations to schools, service groups, and professional meetings are ongoing.

Product Title: Ute Trails Project

The Ute Trails Project offered public meetings, slide shows at local libraries and service organizations, and direct involvement through volunteer contributions to help assess the direction the public wished the Bureau of Land Management and Forest Service to go. A newsletter keeps those interested informed of ongoing events.

Product Title: Anasazi Heritage Center

Created following inundation of a rich archeological area by a new reservoir, this Bureau of Land Management museum stands near the site of two significant 12th-century settlements now excavated and interpreted. It is a Federal repository of archeological materials, displaying artifacts and exhibits about pioneering researchers and modern archeological techniques. A Discovery Area invites visitors to weave or grind corn by prehistoric means, and to open drawers with touchable artifacts. Microscopes demonstrate microanalysis, while educational videotapes and computer games provide insight into, and respect for, the past. The museum also contains full-size replicas of a ninth-century pithouse and a "test trench" showing a typical archeological site in profile.

Product Title: "Rock Creek Valley: A 4,000-Year-Old Industrial Site"
Regional Archeologist Stephen Potter gave a presentation at the Rock Creek Park Nature Center on the Late Archaic period prehistoric mining activities in the park, circa 2,000 B.C. He discussed the mining of quartzite to make chipped stone tools and the mining of scapstone to make oblong-shaped bowls. The public presentation included a brief demonstration of flintknapping, as well as the use of a spear thrower and Algonquian longbow.

Product Title: "Washington before Washington: The Development of Algonquian Culture in the Potomac Valley"
Regional Archeologist Stephen R. Potter delivered this public presentation on the development of Algonquian Indian Culture in the Potomac River Valley as part of the National Capital Region’s observance of American Indian Week. The slide illustrated talk dealt with the archeology and ethnohistory of the Algonquians of tidewater Maryland and Virginia from circa A.D. 200 to 1722.

Product Title: Special Showing of Digging for Slaves
As part of the National Capital Region’s observance of African-American History Month, Regional Archeologist Stephen Potter arranged for a public presentation of the BBC produced film Digging for Slaves. Afterward, Theresa Singleton, an archeological consultant to the film, answered questions from the audience concerning her part in the film’s production. The special program ended with Stephen Potter showing slave-made or used artifacts discovered during National Park Service excavations at Manassas National Battlefield Park.

**Product Title:** Halverson Bar Volunteer Project

This effort resulted in a display, a video of a talk show about the project, newspaper articles, and a "canned" slide show/talk. Presentations have been made at schools, Bureau of Land Management (BLM) offices, and before community service groups. The project involved a joint research effort between graduate history student volunteers at Boise State University and the BLM that resulted in a publication entitled *Prospects: Land-Use in the Snake River Birds of Prey Area, 1860-1987*. The history class won a national volunteer award for its work. The project area is located in the Snake River Birds of Prey Area, which is an Area of Critical Environmental Concern and a National Register of Historic Places district.

**Product Title:** "Aviator's Cave"

This hour-long presentation and slide show was given to the Bonneville County Historical Society as part of Idaho Archaeology Week 1990. It detailed small-scale excavations at Aviator's Cave on Idaho National Engineering Laboratory land. The cave is a lava tube that contains intensive Late Prehistoric (1,300-1,500 B.P.) occupations that have yielded an impressive assemblage of perishable material.

**Product Title:** "Prehistory of Southeastern Idaho"

This hour-long presentation and slide show about prehistoric settlement and subsistence on the northeastern Snake River Plain was given in March 1990, before the Idaho Falls Audubon Society and Chamber of Commerce.

During the field season, tours are given at the Institute for Minnesota Archaeology's (IMA) active excavations on a continual basis. There is also an annual meeting and open house in mid-January at the IMA office and laboratory facilities. Visitors have an opportunity to meet staff, view lab and field procedures, and hear interesting presentations from leaders in archeology. Lab tours also are available for small groups by appointment.

Product Title: Archeological Tour to Cahokia, St. Louis, Missouri
A 5-day, 4-night bus trip May 3-7, 1991, traveled along the Mississippi River to the great site of Cahokia near St. Louis. Stops included early fur trade centers, Indian settlements, logging centers, Ulysses S. Grant's home, and other historic sites. The Institute for Minnesota Archaeology sponsors regional and national tours to archeological sites, especially those of interest to Mid-West avocational archeologists.

Product Title: Bringing Archaeology to the Public
This Institute for Minnesota Archaeology (IMA) program visited several Minnesota towns and cities in 1991 to offer an Archaeology Day during which local residents could bring artifacts for identification and dating, talk with IMA archeologists, see the Changing Visions of the Past video, and hear a lecture on a local archeological topic. IMA archeologists also schedule appearances with local historical societies at shopping malls where members of the public can learn about the archeology being done in their community.

Product Title: Hill/Lewis Award
The Institute for Minnesota Archaeology honors significant contributions to archeology by avocational archeologists at an annual award ceremony in January.

Product Title: On the Trail of Lewis and Clark
This archeological tour in late Summer 1991 visited the ancient sites and frontier forts of the North Dakota Missouri River and Badlands. Stops included: the North Dakota Heritage Center; Forts Union, Buford, Lincoln, site of Custer's home, and Mandan, winter headquarters of Lewis and Clark; On-a-Slant Village, a reconstructed Mandan Indian village of the mid-1600s; Knife River Indian Villages; Theodore Roosevelt Park in the Badlands; and other historic sites.

Product Title: Archeological Excavation along the Arkansas Loop Pipeline Corridor
In 1990 three oil/gas companies, Meridian Oil, El Paso Natural Gas, and Northwest Pipeline Corporation, entered into a mutual cost-sharing agreement to excavate archeological sites affected by their pipeline projects near Farmington. A single archeological contractor, Woods Canyon Archeological Consultants of Yellow Jacket, Colorado, began a series of phased excavations within sites along the Arkansas Loop pipeline corridor. One portion of the project included an open house for members of the professional community, general public, and oil company management to view the excavations. Exposed were structural units and cultural features of the Archaic, Anasazi, and Navajo periods.

Product Title: Crow Canyon Special Management Area
Archeologists from the Farmington Resource Area led a group of interested individuals on a tour of the Crow Canyon Special Management Area (SMA) in northwest New Mexico. This 4,380 acre SMA contains outstanding examples of early Navajo rock art, as well as Shelf House and Hadlock Ruin, two Gobernador Phase, circa A.D. 1700-1750, Navajo sites.

Product Title: Foreign Exchange Students Tour Archeological Site

High school foreign exchange students representing five nations participated in a special Bureau of Land Management (BLM) field tour in September 1990 about regional prehistory and the Federal archeology program. Students visited an archeological site and learned about how cultural resources protection is incorporated into forest management plans. BLM's Operation Save program was described in connection with examination of a site where illegal artifact collection and excavation has been documented. Students were intrigued to learn that Native American Tribes of the region have a strong interest in the protection of cultural resources on Federal land.

Product Title: Historic Mining Tour

In July 1990, college students toured a historic mine property that includes intact industrial buildings and mining equipment on an active gold claim. A Bureau of Land Management archeologist gave a presentation about mining technology, historic architecture, and the history of the mining district. Students learned to compare the intact features, structures, and artifacts of a lode mine with the archeological remains of such properties. The basic components of documentation of a mine property for the Historic American Engineering Record were illustrated for the students. A visit to a historic mining ghost town concluded the tour.

Product Title: Tours of Historic House Museums
The Charleston Museum operates three historic house museums, the Heyward-Washington (1772), the Joseph Manigault (1803), and the Aiken-Rhett (1817). Archeology has been conducted at all three sites, and tours have provided interpretive information to visitors, particularly about the yards and outbuildings.

Product Title: "Recent Archeological Excavations in South Carolina"
Michael Trinkley of the Chicora Foundation spoke to the Camden and Columbia Rotary Clubs in April and June 1991, respectively, about the most recent archeological excavations undertaken by Chicora archologists. The presentations included discussion and photographs of the Vanderhorst plantation house, the Shoolbred plantation house, and other significant sites. He also emphasized the importance of the preservation of these sites for heritage and tourism purposes, as well as for education and research.

Product Title: Ann Pamela Cunningham's 100th Birthday
Debi Hacker, of the Chicora Foundation, spoke at the August 16, 1991, birthday celebration for Ann Pamela Cunningham, founder of the Mt. Vernon Ladies Society, which purchased and protected from destruction the Mt. Vernon estate in Virginia. Her family home, Rosemont, in Laurens County, was examined archeologically in late 1991. The significance of the Rosemont archeological site to Laurens area history was discussed.
COMMUNITY OUTREACH

Product Title: Archeological Testing at the Stoney/Baynard Plantation Site

The Chicora Foundation Investigated the Stoney/Baynard site (38BU58), a late 18th/early 19th century plantation site on Hilton Head Island. This site contains the only standing tabby structure remaining on Hilton Head Island, and has been greenspaced and protected from future development. During Investigations on May 20-29, 1991, 28 people volunteered their time and energy to assist in the excavations. The site was open daily for tours whereby the public was able to examine the entire site, as well as observe excavations and talk with the archeologists.

Product Title: Friends of Stoney/Baynard Plantation

On March 30, 1991, Michael Trinkley and Debi Hacker of the Chicora Foundation attended the dedication of the Stoney/Baynard Plantation site (38BU58), a late 18th/early 19th century plantation site on Hilton Head Island. This site contains the only standing tabby structure remaining on Hilton Head Island, and has been greenspaced and protected from future development. Speakers at the dedication included Mayor Barkie, Hilton Head Museum Board members, and Michael Trinkley.

Product Title: Preserve Your History for the Future

As part of the South Carolina Humanities Council Visiting Scholar Program, Michael Trinkley of the Chicora Foundation was available during the Hartsville History Day on May 19, 1991, to answer questions from the public concerning the various methods of preserving family heritage items. Materials brought to him for examination included books, letters, photographs, uniforms, dresses, shoes, samplers, and small archeological collections.

Product Title: Texas Archeology Preservation Award

Boy Scouts earn the Texas Archeology Preservation Award, sponsored by the Texas Archeological Society and Texas Historical Commission, either as investigators working in survey and excavation, or researchers using museum, library, and video resources. They learn about archeological sites, laws, and preservation, and interview professional archeologists to learn more about the discipline. Avocational members of the archeological community also assist Scouts working for this patch and associated merit badges.

Product Title: Vernal District Field Tours
Field tours of a wide variety of archeological sites are given to familiarize local and regional groups with the archeology of the Northern Colorado Plateau. Visitors are taught the cultural and natural values of a site, and how to enjoy the local and regional cultural history without destroying it. They learn how to preserve cultural properties and to understand their role in the Nation's cultural resources management program.

Product Title: "Native Americans of the Piedmont"
This 1-hour presentation is tailored for use in grades kindergarten through 12, and also is used for adult groups. It includes slides, handouts, hands-on work with artifacts, and a lecture on the Native Americans of the Piedmont, circa 9500 B.C. to the present. Participants are encouraged to bring artifacts for identification, and are given information about the importance of preservation.

Product Title: "Columbia Basin Archeology"
This presentation was made March 6, 1990, before the Luncheon Meeting of the Richland Rotary Club about the prehistory of Eastern Washington.

Product Title: "Indian Peoples of the Tri-Cities Area"
This presentation was given as part of a celebration of the Tri-Cities, Washington's Cultural Diversity, a segment of Lewis and Clark Days. It addressed the lifeways and religion of Native American residents who resided on the Columbia River during the 19th century in the Kennewick area.

Product Title: "Recognizing the Significance of Gable Mountain"
This presentation on the history of knowledge about the sacredness of Gable Mountain, located on the Department of Energy's Hanford Site, was given as part of the program "An Evening at Gable Mountain," sponsored by the Unitarian Universal Church in Kennewick.

Product Title: "Time and the River: Native American History of the Hanford Region"
This presentation on the ethnography of the Central Washington region was presented as the Banquet Speech of the Annual Hanford Life Sciences Symposium held in Richland October 19, 1989.

Product Title: Cultural Resource Laws and Regulations
At the request of the City Planning Commission of Richland, a presentation was made May 31, 1990, about Federal and State laws pertaining to cultural resources.
COMMUNITY OUTREACH

Product Title: Cultural Resources Management at the Hanford Site

The Department of Energy's program for managing archaeological and Native American cultural sites was described to a group of visiting Native American students from Montana State University July 16, 1990.

Product Title: Hanford Cultural Resources

Presentations have been made about the prehistory and early history of the Hanford Site and the Department of Energy's (DOE) efforts to manage the cultural legacy. The lecture was given to the Pasco Kiwanis Club in April and the visiting DOE Tiger Team in July 1990.

Product Title: Cultural Resource Management and the Bureau of Land Management
A total of 11 presentations were given before a variety of groups from October 1989 to September 1990 by Jude Carino, Bureau of Land Management (BLM) Casper District Archeologist. These presentations were given to more than 675 individuals. Groups included school children from kindergarten through high school, college classes, recreation groups, professional and avocational societies, and a variety of public land user groups, such as range, minerals, and utility users. Topics were varied, but centered around cultural resources in the local area, cultural resources and public land management, cultural resource compliance, and multiple use management of public land. The presentations were given as part of the public outreach program of the BLM and specifically the new BLM initiative, Adventures in the Past. The Casper District continues to maintain an active outreach program.

Product Title: Passport in Time
The Passport in Time (PIT) program provides opportunities for individuals and families to work with professional archeologists and historians on National Forests across the country. Typical projects include archeological survey or excavation, historic structure rehabilitation, rock art documentation, and oral histories. There is no registration fee or cost for participation. The PIT Traveler, announcing the current season's projects, is published twice a year in March and September. PIT volunteers take part in vital environmental and historical research. Their participation directly contributes to the understanding of the human story in North America and to the preservation of the fragile sites that chronicle that story. Volunteers share in new discoveries, learn about the science of archeology, and meet many new friends.

### PROJECT/PROGRAM INDEX

**Pinson Mounds State Archaeological Area**

- 29, 71, 97, 116

**Preservation Ethic for Children**

- 61

**Preserved Mississippian Village**

- 25

**Project Archeology: Saving Traditions**

- 65

**Protecting Cultural Resources**

- 8, 14

**Public Archaeology Program**

- 8, 25, 37, 69, 83, 93

**Public Archaeology/Educational Outreach**

- 56, 112

**Public Awareness**

- 24, 49, 50, 108

**Public Awareness Activities in Oregon**

- 15, 78, 85

**Public Awareness and Appreciation of Archeological Resources**

- 61, 62

**Public Awareness/Outreach**

- 88

**Public Education**

- 26, 37, 52, 53, 70, 94, 110

**Public Education/Outreach for Wyoming Centennial Celebration**

- 88

**Public Outreach**

- 63

**Public Outreach Efforts**

- 63, 89, 118

**Public Outreach/Adventures in the Past**

- 64, 89, 119

**Public Outreach/Education**

- 9, 17, 42, 84, 89, 119

**Public Outreach/Education Initiatives**

- 46, 75, 91, 104

**Public Service Publications and Activities**

- 58, 59, 96

**Publication of Preservation Brochures**

- 12

**Research and Educational Programs in Archeology**

- 28, 39, 57, 114

**Rice Lake National Wildlife Refuge**

- 14

**Richland Operations Office Public Awareness Program**

- 17, 117, 118

**Robert Ritzenthaler Chapter of the Wisconsin Archeological Society**

- 98, 118

**Salmon District Public Outreach**

- 13, 36, 50, 69, 108

**Sanctuaries and Reserves Division**

- 11, 67, 61

**Savannah River Public Awareness Program**

- 28, 39, 58, 71, 115

**Save the Past for the Future**

- 18

**Snake River Birds of Prey Area Cultural Resource Management Plan**

- 13, 24, 36, 76, 92, 109

**South Pass Historic Mining District Site Stabilization and Enhancement**

- 42, 64, 119

**St. Augustine Archaeological Association**

- 65, 49, 82, 91

**State Archaeology Regional Center Number 7**

- 41, 62, 86

**Summer Adult Archaeology Field Experience Program**

- 55

**Teacher Workshop**

- 59

**Teaching Prehistory, History, and Science from an Archaeological Point of View**

- 65

**Texas Archeological Society**

- 16, 40, 60, 86, 97, 116

**Texas Archeology Awareness Week**

- 9, 17, 30, 117

**Thunderbird Archaeological Site Preservation Project**

- 86, 98

**Traveling Public Photo Exhibit**

- 23

**Underwater Archeology Program**

- 9, 41, 63, 87, 99

**Upper Mississippi River National Wildlife and Fish Refuge**

- 83

**Urban Archeology in Charleston**

- 28, 39, 58, 96, 115
